2. It may be proper to add that not only are the expenses incurred in connection with the specific examinations and surveys authorized in this section borne by this appropriation, but also certain other expenses, particularly the cost of printing the annual report of the Chief of Engineers, which amounts to about $25,000; the cost of printing the congressional documents in which the reports of the preliminary examinations and surveys are printed for distribution, which for the past year has amounted to about $15,000; the pay of certain civilian employees in the Office of the Chief of Engineers amounting to about $40,000; and the expenses of the civilian employees and other expenses in connection with the Board of Engineers for Rivers and Harbors, amounting to approximately $15,000; making a total of $95,000, in addition to the expenses incurred for the specific examinations and surveys authorized.

3. Should additional preliminary examinations and surveys be incorporated in the bill by your committee, it would, of course, be advisable to increase the amount carried in this section proportionally.

Very respectfully,

H. TAYLOR,
Colonel, Corps of Engineers,
Acting Chief of Engineers, United States Army.

It seems that the total appropriation of $350,000 included and covered a variety of expenses, the making of surveys being the principal item; but $100,000 was required for service and printing other than making surveys. It will not do to unduly restrict the right of having surveys made, because what little information we have about these different projects comes to Congress in a reliable form through the reports made by the engineers. A community or a delegation from a State in Congress think that a certain enterprise is worthy. There is no way preliminarily to dispose of it except by examinations made by the responsible officers of the Government.

I am inclined to believe that the engineers have been altogether too liberal in their reports heretofore. I think I discover a purpose to radically change the policy, for we find them now frequently reversing what former engineers have done. It is the best thing we have at hand. The ingenuity and ability of the Senator from Iowa may devise a better plan. I hope he will devote himself to it, for I am one of those who believe that the time has arrived when substantial modifications of the existing plan should be made. I do not believe we will make much progress in that direction by denying a fair supply of public funds to discharge the duties now imposed upon these officers. I think the amendment is amply justified by the information given by the communication from the Chief of Engineers. The committee agreed with me, and we have accordingly put that amendment in the bill.

Mr. WORKS. Mr. President, my own impression is that most of the money that is expended for these surveys is money thrown away. Yet there are occasions where I think it is entirely proper that surveys should be made if it is done in good faith for the purpose of determining whether further improvement should be made or not.

I was struck by what was said by the chairman of the committee respecting the Arkansas River. There is a controversy here in good faith as to whether upon that river further money should be expended. The Senator says the object of this survey is to determine that question. If that be so, it is a perfectly legitimate appropriation, but I think most of them are not in that class. I voted against the appropriation for the Arkansas River because from the best information I could get at the time I thought it was not a case where the Government should make the appropriation. On the other hand, I do not think an appropriation ought to be denied to any river or harbor where it is for the public interest that the improvement should be made. Whenever a survey is ordered to develop the real facts as to whether an appropriation ought to be made or not I think it is a perfectly legitimate expenditure of public money and it ought to be allowed.

Of course, I do not know anything about the merits of these different cases where a survey has been provided for. Judging from what the Senator from Iowa says as to a good many of them it seems that no appropriation should be made or at least it would be a waste of public money. If we could only sort out the legitimate and worthy appropriations and only appropriate for what is in the public interest it would relieve us of a great

deal of trouble and responsibility. One of the great difficulties is to determine what kind of examination we can make of this question, and for a man to determine to his own satisfaction what appropriations ought and what ought not to be made. It is a matter that has troubled me ever since I have had to deal with these questions, and I have no doubt it does every other Member of this body.

Mr. NELSON. Mr. President, I merely wish to add a word of explanation. It is not possible for us to go and examine all the cases where Senators and Representatives think that improvements are desirable. We can only do it through the Engineer Department. The Engineer Department under the law make first a preliminary reconnoissance. They send out a local engineer to look over the ground and if he thinks it is not worthy of improvement he so reports. It is referred to the division engineer, who generally concurs with him, and then it goes to the board of review, and that is the end of the matter. That is all the expense. If, however, after such a preliminary reconnoissance the local engineer comes to the conclusion that the matter ought to be further investigated and gives his reasons for it, then it is again sent up to the division engineer, and through the division engineer up to the board of review to determine whether there should be an exact and careful survey.

So there really is no expense incurred of any account except in those cases where they deem it of sufficient importance to make a thorough survey, and those surveys are only made in those cases where the Engineer Department are convinced that there ought to be an improvement. In those cases they not only make a survey but they plan the work, suggest the manner in which it is to be done, and make an estimate of the cost of it.

In recent years, and I have kept somewhat track of it, in the case of a large number of surveys put in the bill there is nothing done with them. There is a preliminary report made, but the local engineer does not deem it worthy of improvement, and as a consequence nothing further is done in the bulk of these cases.

Now, as to the good cases, I can not conceive of any other body that could report upon them and furnish information except the Engineer Department. As I said at the outset, how could we do it? We must have some body of men trained to furnish us the information, and this is the only tribunal we have for that purpose.

Mr. KENYON. On the question of increasing the appropriation for examinations, surveys, and contingencies from $250,000 to $350,000 I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. MYERS (when his name was called). Announcing the same transfer of my pair which I announced on the last vote, I vote "yea."

Mr. THOMAS (when his name was called). Announcing the same transfer as heretofore, I vote "nay."

Mr. UNDERWOOD (when his name was called). I desire to inquire whether the junior Senator from Ohio [Mr. HARDING] has voted?

The PRESIDING OFFICER. The junior Senator from Ohio has not voted.

Mr. UNDERWOOD. I am paired with the junior Senator from Ohio and withhold my vote.

The roll call was concluded.

Mr. GALLINGER. I will again announce my pair with the senior Senator from New York [Mr. O'GORMAN], who is absent. For that reason I withhold my vote.

Mr. DILLINGHAM. I withhold my vote, having a general pair with the senior Senator from Maryland [Mr. SMITH].

Mr. STONE. Has the Senator from Wyoming [Mr. CLARK] voted?

The PRESIDING OFFICER. He has not.

Mr. STONE. I have a pair with that Senator. If he were present and I could vote, I would vote "yea."

Mr. CHILTON. Making the same announcement that I did on the former roll call, I vote "yea."

Mr. UNDERWOOD. I transfer my pair with the junior Senator from Ohio [Mr. HARDING] to the Senator from Tennessee [Mr. SHIELDS] and vote "yea."

Mr. STONE. I transfer my pair with the senior Senator from Wyoming [Mr. CLARK] to the Senator from Oklahoma [Mr. GORE] and vote "yea."

Mr. SIMMONS (after having voted in the affirmative). I wish to inquire whether the junior Senator from Minnesota [Mr. CLAPP] has voted?

The PRESIDING OFFICER. He has not.

Mr. SIMMONS. I have a general pair with that Senator. I transfer my pair to the Senator from Illinois [Mr. LEWIS] and let my vote stand.

The result was announced—yeas 34, nays 15, as follows:

YEAS—34.

Bankhead	Hollis	Nelson	Smith, Ariz.
Brandegee	Hughes	Oliver	Smith, Mich.
Chamberlain	Jones	Overman	Sterling
Chilton	Lane	Page	Stone
Clarke, Ark.	Lea, Tenn.	Poindexter	Underwood
Curtis	Lippitt	Ransdell	Warren
Fall	Lodge	Reed	Williams
Fletcher	Martine, N. J.	Sheppard	
Hardwick	Myers	Simmons	

NAYS—15.

Borah	La Follette	Smoot	Wadsworth
Brady	Norris	Sutherland	Walsh
Husting	Pomerene	Thomas	Works
Kenyon	Sherman	Thompson	

NOT VOTING—47.

Ashurst	du Pont	Lewis	Shafroth
Beckham	Gallinger	McCumber	Shields
Broussard	Goff	McLean	Smith, Ga.
Bryan	Gore	Martin, Va.	Smith, Md.
Burleigh	Gronna	Newlands	Smith, S. C.
Catron	Harding	O'Gorman	Swanson
Clapp	Hitchcock	Owen	Taggart
Clark, Wyo.	James	Penrose	Tillman
Colt	Johnson, Me.	Phelan	Townsend
Culberson	Johnson, S. Dak.	Pittman	Vardaman
Cummins	Kern	Robinson	Weeks
Dillingham	Lee, Md.	Saulsbury	

So the amendment of the committee was agreed to.

Mr. CLARKE of Arkansas. The amendment of the committee appearing at page 41, beginning at line 24, and continuing to line 8, page 42, was passed over until the Senator from Washington [Mr. JONES] could be present. That Senator is now present, and I ask that we take up that amendment for consideration.

Mr. JONES. Mr. President, I am sorry that I had to be away, but I had a matter in one of the departments and could not get back sooner. This item carries an appropriation for the improvement of Willapa Harbor and River, Wash. It is one of the new items in the bill, and provides for an improvement to give 24 feet in the channel of this harbor.

I think, of course, that this is a very meritorious item, and I desire just to present briefly the facts which I think warranted the committee in putting the item in the bill. This item was in each of the two preceding river and harbor bills which failed of passage. The Government has completed one project there giving 18 feet depth, and I think the engineers say with reference to this project what they have said about very few other projects. I want to read just a word from the report. It is said:

> Advantage has been taken of the increased depth given, but it has been found inadequate to permit vessels to move freely from mill to mill, as they are required to do in loading, except on the tides.

Now, as showing the importance of this harbor, I want to call attention to the fact that in 1905 the tonnage, exports and imports, was 76,713 tons. In 1910 the tonnage was 486,516 tons. It got up to 766,416 tons in 1912. We have had, according to the engineers' report, and it is something we all know, considerable depression in our part of the country during the last two or three years. Notwithstanding that, the imports and exports for 1914 amounted to 669,619 tons.

The engineers say in another part of the report that the vessels that come in have to load partially now on account of the depth of 18 feet and then go to other harbors to complete their loading, and if we get a 24-foot depth the vessels can load to the full limit. This is not domestic commerce, but largely foreign commerce, imports and exports, so that whatever benefits come from it are benefits to the foreign commerce, benefiting all the country.

I wish to say that in the preceding project the people of the city of South Bend contributed over $125,000 toward this improvement on an expenditure by the Government of $230,000. Under the project we propose here the people have to make a further contribution of $143,000. So those people are doing their part.

Without taking the time of the Senate further, unless some one asks a question, I am willing to submit this item on this statement of facts. It seems to me that what we have heretofore done fully justified the expenditures we have made, and that the prospects for the future justify this expenditure, and that the contribution on the part of those people entitle them to the favorable consideration of Congress.

The PRESIDING OFFICER (Mr. SHAFROTH in the chair). The question is on agreeing to the amendment of the committee inserting the matter from line 24, on page 41, to line 8, on page 42, the appropriation for Willapa Harbor and River, Wash.

The amendment was agreed to.

Mr. CLARKE of Arkansas. The amendment beginning at line 20, on page 42, was also passed over. The Senator from Washington [Mr. JONES] desires to be heard on that question.

Mr. JONES. Mr. President, this is the item with reference to Kahului Harbor on the island of Maui, in the Sandwich Islands, an item in which the Senator from Oregon [Mr. CHAMBERLAIN], too, is very much interested; but I know he is detained by business of the Senate. So I want to present just briefly the facts.

Of course this Territory has no representative in the Senate, and I feel justified on that account in presenting the matter here. Kahului Harbor is the harbor of the island of Maui, and the only harbor on that island, and the only way of getting products from the island, of course, as we know, is by ships. The Government has expended some money there in the construction of a breakwater. The expenditures have up to June 30, 1915, amounted to $390,000 and a little over. This is page 1591 of volume 1 of the engineers' reports.

When this project was adopted it was adopted subject to the condition that the Kahului Railway Co. should cede to the United States free of cost its property there. The report shows that they have expended for wharves and docks and on the breakwater and harbor improvement some $304,784. The commerce increased at this port from $1,800,000 in 1908 to a little over $13,000,000 in 1914.

In reporting on the new project, the Board of Engineers say in their report of this new project, on page 3:

> The district officer reports that the partially constructed breakwater has greatly facilitated the handling of freight, and greater protection is expected through the completion of the dredging provided for by the existing project. He finds that the harbor is subject to considerable shoaling, the cause of which he traces to sediment from the Iao River carried into the harbor by the littoral currents. He estimates the amount of shoaling at 33,000 cubic yards per annum, that it will cost at least $15,000 to remove it, and that it seems possible that if the harbor is enlarged the cost of maintenance will be increased. He states that a breakwater as proposed—

That is the one carried in the item in the bill—

> would prevent the littoral current entering the harbor, and would therefore check the deposit of material therein. He estimates the cost of the breakwater, including engineering, inspection, and contingencies at $250,000.

So we will save by the construction of this breakwater nearly $15,000 a year in the matter of maintenance. The district officer says he thinks that that saving will justify this cost.

> From the facts presented it appears that the construction of the west breakwater would be of some benefit in reducing wave action in the harbor and would be of material advantage in reducing the cost of maintenance.

The board therefore concur in the recommendation of the district officer.

I will say that I was talking with one of the commanders or captains of a vessel a short time ago that goes in and out of this harbor. He stated that with the breakwater constructed out as it is, the storms that sometimes come there very greatly endanger vessels in the harbor, because there is a sweep in one direction through which the winds can come right into the harbor. I do not know exactly the direction, whether it is east or west, but he said his vessel was almost driven from its moorings and he had to get out into the ocean in order to save the ship. The construction of this breakwater will very largely do away with that difficulty and that danger.

Furthermore, it seems that with these storms coming this one breakwater, running out into the ocean, causes a sort of eddy or current around the shore, which makes it also very dangerous for the vessels that are at anchor there. With this breakwater constructed as proposed, that danger will be very largely done away with. For these reasons I think that this provision ought to be made.

I have here also a letter addressed to me by the secretary of the Delegate from Hawaii, in which he gives the reasons which appealed to him in reference to the desirability of this improvement, which I ask may be put into the RECORD without reading.

The PRESIDING OFFICER. If there is no objection, the request will be granted. The Chair hears none.

The letter referred to is as follows:

> HOUSE OF REPRESENTATIVES OF THE UNITED STATES,
> *Washington, D. C., May 8, 1916.*
>
> Hon. WESLEY L. JONES,
> *United States Senate.*
>
> MY DEAR SENATOR: Referring to our conversation concerning the Kahului Harbor, Hawaii—West Breakwater, line 20, page 42 of the river and harbor bill.
>
> There are five chief reasons why this improvement should be immediately provided for:
>
> The first is that the West Breakwater is required in connection with the existing structure in order to make a safely protected harbor. Capt. Hall, of the American-Hawaiian Steamship Co., has personally told you of his perilous experience there last January.
>
> The deep-sea commerce of Kahului includes steamers from 10,000 to 18,000 tons register, and single cargoes sometimes represent over $1,000,000 in value. Such commerce is entitled to reasonable safety and protection. Under present conditions all the commerce with the mainland from that island is sometimes cut off for a week at a time, with great loss both to shippers and vessel owners.
>
> The second reason is that this improvement is a provision for commerce already existing, and not merely in prospect. In 1915 there were 562 vessels entered and cleared out of the port of Kahului, with the registered tonnage of 835,330. The actual freight handled was over a quarter of a million tons. The increase in freight handled annually at Kahului Harbor during the five years since the Government began its improvement is over 78 per cent.
>
> The third reason is that there is no alternative of rail shipment for this commerce. The entire island of Maui is dependent on this single port for the handling of all its commerce with the United States.
>
> The fourth reason is that the people of the island of Maui have themselves spent the sum of $304,784 in improving Kahului Harbor, and are therefore entitled to the just and prompt cooperation of the United States toward completing that harbor.
>
> The fifth consideration is that during the past nine years Hawaii has paid into the Federal Treasury a sum averaging over $1,683,000 per year. Deducting all Federal appropriations for Territorial purposes, the net payments to the United States Treasury have been over one and a quarter millions of dollars per year.
>
> With these facts before you, we appeal to the sense of justice and fair play in Congress to enable us to carry on our commerce and develop our islands.
>
> Respectfully, yours, GEO. MCK. MCCLELLAN,
> *For the Delegate from Hawaii.*

Mr. MARTINE of New Jersey. Mr. President, these harbors are so far away from us that we pay but little attention to them. It was my good fortune during the past summer to visit the island referred to in the Hawaiian group, and I was very much impressed with the trade and commerce of those ports on five of the principal islands there, and particularly of the harbor mentioned in the bill. It was my privilege to visit whilst there and to confer with shipping men and men interested in mercantile matters.

The breakwater, as the Senator from Washington [Mr. JONES] says, is not far enough extended. It is far enough out for an ordinary and placid sea; then, however, we really need none; but in case of a storm, it is very much needed. It was demonstrated to me in a very practical way that the breakwater should be very considerably extended in order to secure the ships and craft that would come in there seeking anchorage for the purpose of discharging their freight. The amount of business which is done in these ports is marvelous, as are the general thrift and enterprise that exist in those tropic islands. I was very much won to their suggestion, and I feel that it would be a manifest wrong upon the part of the United States Government if we should fail to adopt this provision which is embodied in the bill. I trust that it may pass.

There are other instances of a similar character in those islands, and I feel, considering their splendid loyalty, their marvelous business, and the wonderful climatic conditions that exist there, the Government of the United States should endeavor to make possible a tide of trade and commerce there that will eventually be colossal. I feel that it is our duty to do what we can to make safer and better the great shipping interests of those islands—the gems of the sea.

Mr. SMOOT. Mr. President, when I questioned this item a few moments ago I did so because I knew that there was a breakwater near where the one proposed is to be located. I have been on the island of Maui many times. It is the greatest agricultural island among the Hawaiian group of islands. I think it produces the largest and best pineapples in the world. It produces a great deal of sugar. It is true that they ought to have the very best harbor possible for the transportation of their commerce, which, I will say, is very rapidly growing every year.

After further examination of the report, I find that this is not for the repair or the rebuilding of the present breakwater but for an extension, which will be known as the west breakwater for the harbor. I have no objection to an appropriation for this purpose. I recognize that they have some very severe storms around the islands, and, perhaps, with the length of the breakwater as at present constructed, it would not afford ample protection to large vessels that may be loading or unloading in the harbor. Therefore, I believe that the amendment is a proper one, and that the money expended will indeed help the commerce of those islands, particularly the island of Maui. I do not believe that I care to say anything further in regard to the item, Mr. President.

The PRESIDING OFFICER. The question is on agreeing to the amendment reported by the committee.

The amendment was agreed to.

The reading of the bill was resumed.

The next amendment of the Committee on Commerce was, on page 44, after line 6, to insert:

Kennebec River, Me., Parker Head Harbor and Channel.

The amendment was agreed to.

The next amendment was, on page 44, after line 18, to insert:

A preliminary examination, report, and estimate for a landing place in the Point Judith Harbor of Refuge, R. I.

The amendment was agreed to.

The next amendment was, on page 44, after line 21, to insert:

Preliminary examination, report, and estimate for the removal of shoal spots in the westerly entrance of the Point Judith Harbor of Refuge, R. I., and in the harbor itself.

The amendment was agreed to.

The next amendment was, on page 45, after line 2, to insert:

New York Harbor, N. Y., with a view to securing an increase in depth up to 40 feet and suitable widths in the North or Hudson River Channel from deep water in the upper bay as far north as Spuyten Duyvil Creek.

The amendment was agreed to.

The next amendment was, on page 46, after line 2, to insert:

Greenwood Lake, N. J., survey with a view to dredging channel at the southern end.

The amendment was agreed to.

The next amendment was, on page 46, after line 7, to insert:

Hackensack River, N. J., with a view of obtaining a depth of 16 feet up to the Central Railroad Co. of New Jersey bridge.

The amendment was agreed to.

The next amendment was, on page 48, after line 5, to insert:

Front River, Ga.: For survey near Clark's Dock, Sapelo Harbor.

The amendment was agreed to.

The next amendment was, on page 48, after line 16, to insert:

Northwest Channel, Key West, Fla., with a view to securing a channel 30 feet in depth and of sufficient width from the harbor to deep water in the Gulf of Mexico.

The amendment was agreed to.

The next amendment was, at the top of page 49, to insert:

Ship channel from the docks at Apalachicola, Fla., through St. Georges Sound to the Gulf of Mexico, on such route as may be most desirable for the demands of commerce.

The amendment was agreed to.

The next amendment was, on page 49, after line 6, to insert:

Waterway between Sarasota Bay, near Venice, and Miakka River, Fla., with a view to giving such channel dimensions as commerce may demand.

The amendment was agreed to.

The next amendment was, on page 50, after line 9, to insert:

An instrumental survey of the Brazos River and of the Colorado River in Texas.

The amendment was agreed to.

The next amendment was, on page 50, after line 23, to insert:

Trinity River, near Liberty, Tex.

The amendment was agreed to.

The next amendment was, at the top of page 51, to insert:

Texas City Harbor, Tex., with a view to enlargement and protection.

The amendment was agreed to.

The next amendment was, on page 51, after line 2, to insert:

Brazos River, San Antonio River, Colorado River, Trinity River, and the tributaries of these rivers, all in Texas; Red River and its tributaries, Texas, Arkansas, Oklahoma, and Louisiana, with a view to devising plans for flood protection and determining the extent to which the United States should cooperate with the States and other communities and interests in carrying out such plans, its share being based on the value of protection to navigation.

The amendment was agreed to.

The next amendment was, on page 51, after line 10, to insert:

Sulphur River, Tex. and Ark.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. SMOOT. Mr. President, I should like to have the Senator from Texas explain why these surveys are really needed. Appropriations, for instance, for the Trinity River are being made every year. This bill provides for a survey of "Trinity River, near Liberty, Tex.," and also for a survey of "Brazos River, San Antonio River, Colorado River, Trinity River, and the tributaries of these rivers, all in Texas; Red River and its tributaries," and also of "Sulphur River, Tex. and Ark."

I should like to ask the Senator from Texas what is the real object of these surveys? Are they resurveys, or are they surveys ordered with the hope that a favorable report may be received, so as to expend money further up those rivers or more money than we are now annually appropriating on those so-called navigable rivers?

Mr. SHEPPARD. Mr. President, I will say to the Senator from Utah that the survey of the Trinity River near Liberty, Tex., is for the purpose of examining into a caving bank that is threatening the railroad bridge and a bridge that has been constructed by the county, to determine whether or not that is a proper charge in connection with the development of the river. In the immediate section near Liberty, Tex., the project as originally outlined included only snagging and open-channel work; but this proposed survey is to determine whether the protection of that caving bank can be properly undertaken by the Federal Government.

Mr. SMOOT. Then, it is for the Government to undertake to improve the bank so that it will protect the railroad bridge?

Mr. SHEPPARD. No; but to determine whether the damage resulting to the bridge is such an injury to navigation as will justify the undertaking of the work by the Federal Government.

Mr. SMOOT. Has there been any work heretofore done on the Trinity River near Liberty?

Mr. SHEPPARD. There has been no bank work done.

Mr. SMOOT. Has there been any dredging done?

Mr. SHEPPARD. There has been no dredging done.

Let me say to the Senator that the survey of Texas City Harbor, Tex., is to determine whether that harbor should be enlarged in order to accommodate ships of 400 feet in length. At present ships 300 feet in length can use the channel, but the larger ships have difficulty in using the harbor. It is to determine that particular point that that survey is undertaken.

Mr. SMOOT. How as to the Brazos River?

Mr. SHEPPARD. The next paragraph relative to surveys all relates to the question of flood protection in cooperation with the State and in relation to navigation.

Mr. SMOOT. That is something new for the Government to undertake, is it not?

Mr. SHEPPARD. No, sir. The language in the bill follows a similar clause, which was in the last river and harbor appropriation bill, in relation to some rivers in Ohio.

Mr. SMOOT. Is the Government now, under that provision, undertaking to control the waters tributary to the Ohio?

Mr. SHEPPARD. Of rivers in the State of Ohio. I have not seen the report.

Mr. SMOOT. Of different rivers?

Mr. SHEPPARD. It is simply for the purpose of developing a plan for flood protection in connection with navigation.

Mr. SMOOT. Mr. President, we will have a bill from the House now in a day or so at least appropriating over $50,000,000 for flood protection.

Mr. SHEPPARD. That bill relates only to the Mississippi and Sacramento Rivers.

Mr. SMOOT. I am aware that that bill relates only to the Mississippi River and to one river in California, but it seems to me that this item ought to be left to be dealt with when the flood bill is before us. If we are going to enter upon the subject of the control of flood waters, let us enter upon it properly; let it apply all over the country rather than simply to one river of the country.

Mr. SHEPPARD. It has not been determined yet, Mr. President, as to what the scope of the work of the new Flood Control Committee will be, and, inasmuch as this examination is desired during the coming year, it seemed that the only practical method to bring it about was to have the item inserted in this bill.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Colorado?

Mr. SMOOT. Certainly.

Mr. THOMAS. Mr. President, if one may judge from its name and from the bill which is its first production, it is a committee whose measures will soon overwhelm the Treasury of the United States.

Mr. SMOOT. I merely refer to two items in the bill, which we know is going to pass the House and which I am fearful is going to pass the Senate.

Mr. CLARKE of Arkansas. It has passed the House; and there were only 29 votes against it.

Mr. SMOOT. It does seem to me, Mr. President, that if we are going into the question of controlling flood waters it should not be on the river and harbor bill, but it ought to be on the flood-control bill, which will be before the Senate in a short time.

Mr. CLARKE of Arkansas. Mr. President, may I say a word to the Senator?

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Arkansas?

Mr. SMOOT. Certainly.

Mr. CLARKE of Arkansas. Of course all provisions for flood control will be preceded by a professional engineering examination. The flood-control bill provides that all those examinations shall be made by the engineering force of the War Department. If a survey should be directed in a bill coming from that com-

mittee, it would take the same course as the surveys proposed in this bill will take and would be made by the same officials.

Mr. SMOOT. If history is to repeat itself in relation to the flood-control bill, as it has in relation to the improvement of a lot of creeks in this country, I have no doubt that the report from the engineers will be most favorable. This plan will extend their work and give them a greater opportunity for spending Government money than they have to-day, and, God knows, they have enough power now in expending money appropriated by the Government of the United States.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Colorado?

Mr. SMOOT. Yes.

Mr. THOMAS. Before the Senator takes his seat, I want to call his attention to the phraseology of the amendment about which he is making inquiry. The Government officials are required, under the provisions of the bill, to make inquiry not only as to the rivers named but as to their tributaries. Of course, the tributaries are very considerable in number and very extensive in their range throughout the neighboring domain of these streams.

Mr. SMOOT. There are four rivers mentioned in the amendment.

Mr. THOMAS. This is an amendment to a river and harbor bill, the theory upon which such bills are founded being the control of the General Government over navigable streams. Such amendments as this, if they are properly included within the purview of a river and harbor bill, only serve to extend the jurisdiction of the National Government over streams which are not navigable, which can not be made navigable, and which can not be considered for the purposes of navigation at all, except as they may affect the volume of water in the streams of which they are tributaries and which are actually serviceable for purposes of navigation.

We are experiencing in the arid regions of the country some of the expensive consequences of extending the jurisdiction of the War Department over these streams. This jurisdiction finds its support and its excuse only in such amendments as this, which appear, as the Senator from Texas says, not only at present, but have appeared heretofore in previous river and harbor bills. That, to my mind, is an exceedingly sinister feature of these measures, because we know by experience what the control over the waters of these tributaries by so many of the different departments means to our people.

It is impossible nowadays for a modest locator of a homestead to secure a recognition of his appropriation from some tributary of water enough to cultivate his land and make a living upon it. He has to come to Washington or send down here and apply successively to the Interior Department, the Agricultural Department, and the War Department, and, if the tributary happens to be a tributary of an international boundary stream, to the State Department, before he can secure the right to use sufficient water to support himself and his family.

Mr. SMOOT. The Senator must not forget the Geological Survey. That bureau has also to pass upon the applications.

Mr. THOMAS. That bureau is a branch of the Interior Department. Of course if I enumerated the various bureaus through which his devious and tortuous way is directed before he reaches a conclusion, I would take up too much of the time of the Senate; but I want to protest, although I know it may be useless, against the inclusion in these bills of items which have reference to flood control or any other object except purposes of navigation. It is of very serious consequence to the arid regions of the country. While it is true that the share of the Government is being based upon the value of protection to navigation, everybody knows—and it is unnecessary to do more than state the fact—that the tendency is more and more to throw this burden upon the Treasury of the General Government, and these items being based upon the value of protection to navigation, ultimately means the imposition of the entire cost upon the National Treasury. That is incidental, however, to the consequences involved in the continued expansion of the jurisdiction of the Department of War over all the little streams and rivulets of the country.

Mr. SHEPPARD. Mr. President, may I say to the Senator from Utah that the last river and harbor act, passed in the Sixty-third Congress, approved March 4, 1915, contains the following clause:

Cheat River in Pennsylvania and West Virginia; Tygarts River, West Fork River, Kanawha River and its tributaries, all in West Virginia; Muskingum River and its tributaries, Scioto River and its tributaries, Miami River and its tributaries, all in the State of Ohio; Maumee River and its tributaries, Ohio and Indiana; Kankakee River, and the Wabash River and its tributaries, Illinois and Indiana, with a view to devising plans for flood protection and determining the extent to which the United States should cooperate with the States and other communities and interests in carrying out such plans, its share being based upon the value of protection to navigation.

Mr. SMOOT. That only goes to show that provisions of a wide, sweeping nature are placed on appropriation bills and passed without due consideration on the part of the Senate.

Mr. SHEPPARD. Let me say to the Senator that it was at the request of the Senator from Ohio, Mr. Burton, that the Ohio rivers were included in this clause, if I remember correctly.

Mr. SMOOT. I do not care what Senator requested it and I do not care how many times it has been done in the past; it is wrong in principle; and this item is not germane to the river and harbor bill.

Now, Mr. President, turn to page 50 of the bill and you will find an item—and I did not make any objection to it—which reads as follows:

An instrumental survey of the Brazos River and of the Colorado River in Texas.

There is at present a survey of the Brazos River and a survey of the Colorado River in Texas authorized. On the very next page an amendment is found authorizing another survey of the Brazos River, the Colorado River, and the Trinity River in Texas "with a view to devising plans for flood protection." How many surveys do we want of those rivers?

Mr. KENYON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Utah yield to the Senator from Iowa?

Mr. SMOOT. Certainly.

Mr. KENYON. And the Senator knows, does he not, that we are now making a survey of the Brazos River under a previous act of Congress, and we are also making a survey of the Trinity River? We might be able to see why there should be three surveys of the Trinity River, but why there should be three surveys of the Brazos River is beyond comprehension.

Mr. SMOOT. Mr. President, I think we ought to have a hundred surveys of the Trinity River, and perhaps of some of the other rivers, if thereby we could secure an increased flow of water; but, unfortunately, if we had a survey every day it would not increase the flow of water in these so-called navigable rivers. I would rather designate them as creeks than rivers.

If there is any justification for an amendment of this kind to this bill I should like to know what it is; particularly, Mr. President, when these rivers are now being surveyed, and when also as to two of these rivers there is an instrumental survey provided for. I will ask the Senator from Texas what he expects from the instrumental survey of these two rivers that is provided for in the amendment on page 50 of this bill?

Mr. SHEPPARD. An instrumental survey of the Brazos River is not now in progress. The examination now in progress is what is known as a preliminary examination and is not a technical inspection, such as would be called for by the words "instrumental survey."

Now, as to the Colorado River, the object of the instrumental survey is to have the river examined and technically surveyed at the same time.

Mr. SMOOT. I do not want to take any more of the time of the Senate; but I want a vote of the Senate upon the amendment.

Mr. CLARKE of Arkansas. Mr. President, I think the Senator from Utah has magnified the importance and extent of the scope of this amendment in order that he might condemn it. It is nothing more nor less——

Mr. SMOOT. I will say to the Senator that I had no such object.

Mr. CLARKE of Arkansas. Well, I will modify that by saying that the Senator misunderstands the scope of it, if I understand it.

Mr. SMOOT. That is better.

Mr. CLARKE of Arkansas. The purpose of it is simply to have made a preliminary examination of the territory described with a view of determining whether or not a comprehensive plan for protection against floods can be suggested to the local communities, and to determine the additional fact as to whether or not the situation developed by the examination is such that the United States would be justified in contributing to the expense of inaugurating the plan proposed. It is nothing more nor less than furnishing the community with the plans and the specifications as to how that particular difficulty may be overcome. It very frequently happens that the Public Roads Bureau of the Agricultural Department surveys a road for a community, makes an estimate of cost, and does a great many things that might be done by private investment, but which in these days are not done by private investment.

No one can enter any navigable river for the purpose of doing anything to it without the permission of the United States Government; and, because of that and other circumstances, it was thought proper to invite the National Government to make this survey, with a view of determining whether or not any scheme of reclamation of that kind was practicable.

Mr. SMOOT. Mr. President, the tributaries to these rivers are not navigable, and they are all, no doubt, within the State of Texas. If there is any method by which floods can be controlled in the State of Texas, the State of Texas ought to develop the method and ought to take care of those floods, just as the Western States take care of their flood waters. Texas has no greater floods than we have in the West.

Mr. CLARKE of Arkansas. There is nothing in this amendment that makes the United States pay the expense of installing the additional protection that this particular survey might suggest.

Mr. SMOOT. But the object of the amendment is to make the survey with a view of the Government of the United States cooperating with the State in controlling the flood waters.

Mr. CLARKE of Arkansas. If, under all the circumstances, that is deemed to be equitable, yes; otherwise, no.

Mr. SMOOT. I can not see why——

Mr. SHEPPARD. Cooperation is sought as to flood waters, provided the streams are navigable.

Mr. SMOOT. Does the Senator mean provided that the tributaries are navigable?

Mr. SHEPPARD. Provided they are navigable. The engineers will not make a recommendation for any work at all on a tributary unless there is a navigation interest to be subserved.

Mr. SMOOT. I should like to know from the Senator now, what, in his opinion, constitutes a navigable stream? How many inches of water must there be in a river to make it navigable?

Mr. SHEPPARD. I think a river may be navigable with a depth of 2 feet, or even a foot and a half, as a minimum.

Mr. SMOOT. There are many rivers provided for in this bill through which for eight months of the year a person can walk over and never know there is a river there.

Mr. SHEPPARD. Of course, the Senator makes that statement——

Mr. SMOOT. I make it upon the basis of a report made to Congress, and I make it upon the statement of men who know the facts and have stated them not once but more than once on the floor of the Senate. I used to think, of course, that a navigable river was one that had water sufficient at least to float a boat, even though it were only a duck boat, but that idea has gone glimmering long, long ago, and what I am fearful of, Mr. President, is that this is the beginning of another plan of making the Government of the United States pay for the control of waters within a State which the State itself ought to take care of. I might just as well come here and ask for an amendment to this bill for the deepening and the widening of the Jordan River between Utah Lake and Salt Lake, in my State. There would be more commerce carried on between those two lakes, if that river were dredged to a sufficient depth and were made wide enough so that boats could go on it, than there is—I was going to say on 15 per cent of the projects provided for in this bill. But, Mr. President, Utah is situated in the tops of the mountains, and we are a thousand miles from the ocean. We never expect to see a battleship anywhere near the borders of our State, but that does not deter me from being in favor of the improvement of our rivers, and especially of our harbors. I am perfectly willing to admit that in this bill there are items that I would gladly vote to increase, because I should like to see the work go on faster than it is going on or has been going on in the past. But this amendment will provide another plan of trying to throw onto the Government of the United States the responsibility of the State to control its flood waters in creeks that never in the world will be navigable. Therefore, Mr. President, I do not believe it ought to be passed.

Favorable reports are very easily obtained, considering the reports that have already been made on a number of projects in this bill, and it is only on that fact that I base the statement I have just made. Now, in all fairness to the Government of the United States, I want to ask the Senator from Texas if he does not think this amendment is carrying the thing too far?

Mr. SHEPPARD. I do not. I think the position of the Senator from Utah is entirely without justification, and entirely unfair.

Mr. SMOOT. All I want is a vote of the Senate. I want the Senate to say whether they think this plan of entering upon a new survey of rivers, with a view of devising plans for flood control, should be undertaken at this time.

I ask for the yeas and nays on the amendment.

Mr. SHEPPARD. Before we take the vote, let me say that unless the element of flood control is found to be related necessarily and fundamentally to the element of navigation, the result of this examination will be unfavorable, and the clause is so worded as to make the interest of navigation a necessary one. No such reason as that alluded to by the Senator from Utah has actuated me in offering this amendment.

Mr. SMOOT. I want to say to the Senator that if I really believed there could be an adverse report made upon a project I should be almost tempted to vote the money asked for. I want the Senate to vote upon it.

Mr. SHEPPARD. Very well, Mr. President. I am willing to leave the matter to the vote of the Senate.

The PRESIDING OFFICER. The Chair will remind the Senator of the fact that this amendment has been adopted. It is necessary to make a motion to reconsider the vote.

Mr. SMOOT. I was on my feet at the time, but I will admit that the Chair is correct. I tried to get the attention of the Chair before the announcement was made. I do not think there will be any objection at all to reconsidering the vote.

Mr. CLARKE of Arkansas. Mr. President, I move that the vote by which the amendment was adopted be reconsidered.

The motion to reconsider was agreed to.

Mr. SMOOT. Now I ask for the yeas and nays on the amendment.

The yeas and nays were ordered.

The PRESIDING OFFICER. The Secretary will state the amendment which is to be voted on.

The SECRETARY. On page 51, after line 2, it is proposed to insert the following:

Brazos River, San Antonio River, Colorado River, Trinity River, and the tributaries of these rivers, all in Texas; Red River and its tributaries, Texas, Arkansas, Oklahoma, and Louisiana, with a view to devising plans for flood protection and determining the extent to which the United States should cooperate with the States and other communities and interests in carrying out such plans, its share being based on the value of protection to navigation.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. DILLINGHAM (when his name was called). I have a general pair with the senior Senator from Maryland [Mr. SMITH], and therefore withhold my vote.

Mr. MYERS (when his name was called). Making the same announcement as heretofore of the transfer of my pair, I vote "yea."

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER]. In his absence, I withhold my vote. If I were at liberty to vote, I would vote "nay."

Mr. TOWNSEND (when his name was called). I have a general pair with the junior Senator from Florida [Mr. BRYAN]. Not knowing how he would vote, I withhold my vote. If at liberty to vote, I should vote "nay."

The roll call was concluded.

Mr. CLARK of Wyoming. I have a general pair with the senior Senator from Missouri [Mr. STONE]. In the absence of that Senator, I withhold my vote.

Mr. GALLINGER. I have a general pair with the senior Senator from New York [Mr. O'GORMAN], who is absent. For that reason, I withhold my vote.

Mr. OVERMAN. I inquire whether the junior Senator from Wyoming [Mr. WARREN] has voted?

The PRESIDING OFFICER. He has not.

Mr. OVERMAN. I have a general pair with that Senator, and withhold my vote.

Mr. SHEPPARD. I desire to state that the junior Senator from Kentucky [Mr. BECKHAM] and the junior Senator from Mississippi [Mr. VARDAMAN] are detained on business of the Senate.

Mr. SAULSBURY. I transfer my pair to the junior Senator from Tennessee [Mr. SHIELDS] and vote "yea."

Mr. SIMMONS (after having voted in the affirmative). I wish to inquire whether the junior Senator from Minnesota [Mr. CLAPP] has voted?

The PRESIDING OFFICER. He has not.

Mr. SIMMONS. I have a pair with that Senator. I transfer that pair to the junior Senator from Mississippi [Mr. VARDAMAN] and will allow my vote to stand.

Mr. CHILTON. Has the senior Senator from New Mexico [Mr. FALL] voted?

The PRESIDING OFFICER. He has not.

Mr. CHILTON. I have a pair with that Senator. I desire to be counted as present to make a quorum, however.

Mr. DU PONT (after having voted in the negative). I ask whether the junior Senator from Kentucky [Mr. BECKHAM] has voted?

The PRESIDING OFFICER. He has not.

Mr. DU PONT. I did not observe that he was absent from the Chamber. As I have a geenral pair with him, I withdraw my vote.

The roll call resulted—yeas 31, nays 14, as follows:

YEAS—31.

Bankhead	Hardwick	Myers	Simmons
Brandegee	Johnson, S. Dak.	Nelson	Smith, Ariz.
Broussard	Jones	Phelan	Smith, Mich.
Chamberlain	Lea, Tenn.	Poindexter	Sterling
Clarke, Ark.	Lee, Md.	Ransdell	Swanson
Culberson	Lewis	Reed	Underwood
Curtis	Martin, Va.	Saulsbury	Williams
Fletcher	Martine, N. J.	Sheppard	

NAYS—14.

Ashurst	La Follette	Page	Smoot
Gore	Lane	Penrose	Wadsworth
Harding	Lippitt	Shafroth	
Kenyon	Norris	Sherman	

NOT VOTING—51.

Beckham	Fall	McLean	Stone
Borah	Gallinger	Newlands	Sutherland
Brady	Goff	O'Gorman	Taggart
Bryan	Gronna	Oliver	Thomas
Burleigh	Hitchcock	Overman	Thompson
Catron	Hollis	Owen	Tillman
Chilton	Hughes	Pittman	Townsend
Clapp	Husting	Pomerene	Vardaman
Clark, Wyo.	James	Robinson	Walsh
Colt	Johnson, Me.	Shields	Warren
Cummins	Kern	Smith, Ga.	Weeks
Dillingham	Lodge	Smith, Md.	Works
du Pont	McCumber	Smith, S. C.	

The PRESIDING OFFICER. On the question of the adoption of the committee amendment the yeas are 31, the nays are 14. The Chair notes the presence of the following Senators who have not voted: The Senator from Vermont [Mr. DILLINGHAM], the Senator from Colorado [Mr. THOMAS], the Senator from New Hampshire [Mr. GALLINGER], the Senator from Michigan [Mr. TOWNSEND], the Senator from Wyoming [Mr. CLARK], the Senator from North Carolina [Mr. OVERMAN], the Senator from West Virginia [Mr. CHILTON], and the Senator from Delaware [Mr. DU PONT].

Mr. GALLINGER. Mr. President, in making the declaration I think the Chair ought to say, "who have not voted in consequence of being paired."

The PRESIDING OFFICER. Yes; probably the Chair had better say that in consequence of being paired they have not voted. The amendment is agreed to. The Secretary will resume the reading of the bill.

The reading of the bill was resumed.

The next amendment was, on page 51, after line 11, to insert:

Sulphur River and Days Creek, Tex. and Ark.

Mr. KENYON. Mr. President, I shall not call for the yeas and nays on that amendment, I think. I simply do not want it adopted without objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. REED. Mr. President, out of order, I ask leave to——

Mr. CLARKE of Arkansas. I object, Mr. President. We are about to get through with the amendments of the committee, and I hope that no member of the committee, at least, will obstruct us when we are so near reaching a climax in the bill. We have to close the consideration of it at 3.30.

Mr. REED. I simply wanted to read a telegram, Mr. President.

Mr. CLARKE of Arkansas. I object to that.

Mr. REED. Of course, I could not do it unless I spoke on the bill. I could do that, but I will not do it.

The reading of the bill was resumed.

The next amendment was, on page 51, after line 12, to insert:

San Antonio River.

The amendment was agreed to.

The next amendment was, on page 52, after line 2, to insert:

Arkansas River, from Little Rock to its mouth, an instrumental survey with a view to determining if a minimum depth at all seasons of 4½ feet can be maintained; and if so, a detailed estimate of the cost thereof.

The amendment was agreed to.

The next amendment was, on page 52, after line 9, to strike out:

Cache River from its mouth to Algoa, Jackson County, Ark.

The amendment was agreed to.

The next amendment was, on page 52, after line 20, to insert:

Thunder Bay River, Mich., with a view to improving the mouth.

The amendment was agreed to.

The next amendment was, on page 53, after line 6, to insert:

Black Lake Harbor, on Macatawa Bay, Mich., from piers to point 200 feet east of Graham & Morton dock, 16 feet, with a view to establishing car-service ferry.

The amendment was agreed to.

The next amendment was, at the top of page 54, to insert:

Traverse and Big Stone Lakes, on the boundary between Minnesota and South Dakota, with a view to connecting and extending navigation on and between said lakes.

The amendment was agreed to.

The next amendment was, on page 54, after line 6, to insert:

State of Kansas, floods in: Investigate the flood periods of the waters of the State of Kansas by an examination of the territory and from data already gathered by governmental, State, and private efforts by the Board of Engineers of the War Department, and to devise some general plan which will best guard against the recurrence of such floods and diminish their damaging effects upon the lower valleys of the Kansas, Arkansas, Missouri, and the Mississippi Rivers.

The amendment was agreed to.

The next amendment was, on page 54, after line 20, to insert:

Umpqua River bar and entrance, Oreg.

The amendment was agreed to.

The next amendment was, at the top of page 55, to insert:

Yaquina Bay and Harbor, Oreg., including consideration of any proposition for cooperation of local interests.

The amendment was agreed to.

The next amendment was, on page 55, after line 13, to insert:

Channel of Youngs Bay from the main ship channel of the Columbia River to a point 1 mile above County Road Bridge.

The amendment was agreed to.

The next amendment was, on page 55, after line 17, to insert:

That a survey of the Columbia River from the mouth of the Snake to Priest Rapids is hereby ordered to be made with a view to improving open-river navigation.

The amendment was agreed to.

The next amendment was, on page 56, after line 5, to insert:

That the Secretary of War be, and he is hereby, authorized and directed to cause preliminary examination and survey to be made and a report to be made thereon to Congress of the intervening territory between Puget Sound and the Columbia River, with a view to determining the advisability of constructing a canal connecting Puget Sound with Grays Harbor, Willapa Harbor, and the Columbia River.

The amendment was agreed to.

The next amendment was, on page 56, after line 13, to insert:

Virgin River, Nev., between its intersection with the east line of the State of Nevada and the Colorado River, with a view to confining such river within its channel and the protecting of the banks against erosion.

The amendment was agreed to.

The next amendment was, on page 57, after line 15, to insert as a new section, the following:

SEC. 5. That the St. Johns River south of Salt Run, in the State of Florida, is hereby declared to be not a navigable water of the United States within the meaning of the laws enacted by Congress for the preservation and protection of such waters, and that the provisions of river and harbor acts heretofore enacted providing for the prosecution of work upon that portion of the said St. Johns River, are hereby repealed.

Mr. FLETCHER. Mr. President, I submit to the chairman of the Commerce Committee whether or not that amendment should be insisted upon. It was proposed, I believe——

Mr. CLARKE of Arkansas. I will say to the Senator from Florida that, of course, it will not be insisted upon, and that any suggestions he makes in connection with it will be very cheerfully adopted by the chairman of the committee. The Senator was not present when it was inserted in the bill, else his judgment about the matter would have been taken at that time.

Mr. FLETCHER. I am obliged to the chairman of the committee.

I will simply say, in that connection, that I think the purpose of the amendment was, without doing any real harm to the navigation of the river, to promote the improvement of a large area of land lying in what is going to be a drainage district of the headwaters of the St. Johns. There was a difference between the engineers of the drainage district and the Army engineers as to the plans for promoting that drainage, and it was supposed that difficulties might be overcome by declaring that portion of the upper river nonnavigable.

I have a letter from the Chief of Engineers of the War Department to the effect that that purpose would not be accomplished by the amendment. I have consulted my colleague [Mr. BRYAN] on the subject. He leaves it to my judgment to insist or not upon the amendment. I am quite sure that if he were acquainted with all the facts he would himself favor not insisting upon the amendment.

Mr. SMOOT. Will the Senator have the letter read?

Mr. FLETCHER. I ask that the letter from the War Department on this subject be inserted in the RECORD, and I ask that the amendment be rejected.

Mr. SMOOT. I ask that the letter may be read, because no doubt the letter explains the item.

The PRESIDING OFFICER. In the absence of objection, the Secretary will read the letter.

The Secretary read as follows:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, May 13, 1916.

Hon. DUNCAN U. FLETCHER,
United States Senate.

SIR: 1. In reply to your letter of the 12th instant, relative to amendment to the river and harbor bill declaring the St. Johns River beyond Salt Run nonnavigable, I have the honor to inform you that it does not appear to me that this amendment will accomplish the purpose for which it was intended. The existing laws for the protection of navigable waters impose upon the War Department the duty of exercising jurisdiction on the nonnavigable portions of a stream to the extent of preventing any operations thereon from affecting the navigable capacity of the navigable portion of the stream below.

2. The reason a permit was not granted to the upper St. Johns drainage district was that the plan proposed would divert the water from the upper St. Johns River Basin in such a way as to affect adversely the navigable capacity of both the St. Johns and Indian Rivers. Declaring the upper St. Johns River nonnavigable would not relieve the department from the duty of interfering should this project be started in accordance with the present plans of the drainage district.

3. The department is fully cognizant of the desirability of carrying out some plan for the drainage of the upper St. Johns River district and is prepared to lend whatever assistance it can to bring about a satisfactory solution of the problem.

4. The papers in the case were returned some days ago to the district officer at Jacksonville, Fla., and both he and Col. Langfitt, the division engineer, were instructed to render any assistance practicable to the drainage district in revising the plans so as to remove the objections which have been found in them.

Very respectfully,
H. TAYLOR,
Colonel, Corps of Engineers,
Acting Chief of Engineers, United States Army.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the committee.

The amendment was rejected.

The reading of the bill was resumed.

The next amendment was, on page 58, line 1, to change the number of the section from "5" to "6."

The amendment was agreed to.

Mr. SMOOT. The last amendment should not have been agreed to, because section 5 has now been stricken from the bill.

Mr. CLARKE of Arkansas. Yes.

Mr. SMOOT. Therefore the old number should be retained.

Mr. CLARKE of Arkansas. The Senator is right about that. That, however, is a formal matter that can be attended to later.

The PRESIDING OFFICER. Very well.

Mr. CLARKE of Arkansas. Mr. President, I wish to inquire whether or not any amendments have been reserved that have not been disposed of.

The PRESIDING OFFICER. No; that disposes of the committee amendments. The bill is still in Committee of the Whole and open to amendment.

Mr. CLARKE of Arkansas. I will say to the Senator from Missouri [Mr. REED] that if he desires to have read the telegram to which he referred there will be an opportunity to do so at this time.

Mr. LODGE. Mr. President, if the committee amendments have been disposed of, I desire to offer an amendment introduced by my colleague [Mr. WEEKS].

Mr. CLARKE of Arkansas. At this stage, when the Senator from Missouri has disposed of the matter he desires to present, I wish to make a statement as to the order of business.

NATIONAL DEFENSE.

Mr. REED. Mr. President, whether founded upon facts or upon some misapprehension I do not know, but the papers have recently announced that there has been trouble about the mobilization of the National Guard in three States from which they were called—trouble about their taking oath of enlistment. Frequently it has been stated in the press that the National Guard have "fallen down." The impression seems to exist that the National Guard will not fulfill their duty if called upon in the Mexican embroglio.

In view of that condition I wired the commanding general of the National Guard of Missouri asking him what the situation was with reference to the Missouri National Guard, and I desire to read this telegram. I will say that the commanding general, Gen. Clark, is one of the most responsible gentlemen in my State—a man who does not talk unless he knows what he is saying. The telegram is addressed to me, and reads as follows:

If called upon the Missouri Guard will promptly respond, take oath, and meet every expectation. In anticipation of call we have carefully canvassed the matter in all organizations, and our officers are absolutely confident. All arrangements for quick mobilization have been quietly made, and you will be proud of the showing made by our guard if the call comes.

Our troops have had same physical examination required for Regular Army, and requirements have been rigidly enforced. The oath prescribed by the statute law requires support of Constitution and laws of the United States, and men understand they are obligated to go, and expect to do so. Conditions are very different here from the Texas and Arizona cases mentioned. We are having the additional oath prescribed in the new law printed, and when the President signs the bill it will be taken immediately.

H. C. CLARK.

Mr. MARTINE of New Jersey. Mr. President, if I may, I will state in that connection that within the past two days I have received a letter from Gen. Wilbur Sadler, of the National Guard of New Jersey, in which he asserts that there need be no fear so far as the New Jersey troops are concerned. When the hour demands them, the New Jersey National Guard will be in line and ready for the Government's defense.

Mr. REED. Mr. President, if I may say one word further, I have not yielded the floor.

Mr. MARTINE of New Jersey. I beg the Senator's pardon. I thought he had yielded it.

Mr. REED. The Senator from New Jersey is always welcome to a part of my time.

I only put this telegram in the RECORD in order that whether the assertions which are being made regarding the failure of the guard to respond are well-founded or otherwise, whatever that fact may be, the country may understand that there is no occasion for the people of the country to lose confidence in the National Guard. I think that fact ought to be plainly made known.

RIVER AND HARBOR APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. CLARKE of Arkansas. Mr. President, we have now reached the stage where the committee amendments have been disposed of. With reference to the further progress of the bill, I ask permission to read, in the few minutes at our disposal, what took place when the order of business was established.

I read from page 8677 of the RECORD of May 9. At that time this occurred:

Mr. CLARKE of Arkansas. Mr. President, I move that the formal reading of the bill be dispensed with and that the Senate proceed to consider first the Senate amendments, second the amendments to strike out the text of the House bill or to amend the same, and third the amendments offered by individual Senators. * * *

Mr. GALLINGER. Will the Senator from Arkansas kindly repeat the order?

Mr. CLARKE of Arkansas. That the formal reading of the bill be dispensed with, and that the Senate proceed to consider first the committee amendments, second the amendments to strike out the House text or to amend it, and third the amendments offered by individual Senators.

The order of business under that arrangement, which met with the unanimous consent of the Senate, will be to offer amendments to strike out the text of the House bill or to amend it. Under that order of business some very important amendments will be offered, as I am advised; and I suggest to such Senators as feel an interest in the ultimate passage of the bill that from this time forward I think their attendance in larger numbers than heretofore would be advisable.

There is so little time left this afternoon for the consideration of any further matter that I ask——

Mr. LODGE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arkansas yield to the Senator from Massachusetts?

Mr. CLARKE of Arkansas. I am very glad to yield to the Senator.

Mr. LODGE. I supposed that the order had been reached for introducing individual amendments, and I sent one to the desk; but I understand now that that order has not yet been reached.

Mr. CLARKE of Arkansas. No; it has not.

I therefore ask that the bill be laid aside until to-morrow morning at 11 o'clock; and I move that when the Senate takes a recess this afternoon it will be until 11 o'clock to-morrow.

The PRESIDING OFFICER. The Senator from Arkansas moves that when the Senate takes a recess to-day it be until 11 o'clock to-morrow morning.

The motion was agreed to.

EXECUTIVE SESSION.

Mr. NEWLANDS. I move that the Senate proceed to the consideration of executive business.

Mr. CURTIS. By unanimous consent, the Senate was to go into executive session at 3.30 o'clock.

The PRESIDING OFFICER. That hour has not quite arrived. There are one or two minutes left. The Senator from Nevada moves that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 2 hours and 15 minutes spent in executive session the doors were reopened.

NOMINATION OF GEORGE RUBLEE.

The injunction of secrecy was removed from the following proceeding in executive session:

Vote on motion to reconsider the vote by which, on the 15th instant, the Senate refused to advise and consent to the appointment of George Rublee to be a Federal Trade Commissioner:

YEAS—38.

Ashurst	Kenyon	Owen	Stone

Clark, Wyo.	Jones	Saulsbury	Weeks
Clarke, Ark.	Lippitt	Sherman	Works
Colt	Lodge	Smith, Ga.	
Curtis	Martin, Va.	Smith, Mich.	

The following pairs were announced:

The VICE PRESIDENT with Mr. REED.

Mr. BURLEIGH with Mr. ROBINSON.

Mr. CUMMINS with Mr. VARDAMAN.

Mr. DU PONT with Mr. BECKHAM.

Mr. GRONNA with Mr. JOHNSON of Maine.

Mr. MCCUMBER with Mr. GORE.

Mr. MCLEAN with Mr. MYERS.

Mr. TOWNSEND with Mr. BRYAN.

Mr. JAMES with Mr. SHIELDS.

Mr. MYERS. I am paired with the junior Senator from Connecticut [Mr. MCLEAN]. If he were present he would vote "nay" and if I were at liberty to vote I would vote "yea."

RECESS.

Mr. CLARKE of Arkansas. I move that the Senate take a recess.

The motion was agreed to; and (at 5 o'clock and 45 minutes p. m., Tuesday, May 23, 1916) the Senate took a recess, the recess being, under the order previously made, until to-morrow, Wednesday, May 24, 1916, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate May 23 (legislative day of May 18), 1916.

REGISTERS OF LAND OFFICE.

M. C. Warrington, of Mason City, Nebr., to be register of the land office at Broken Bow, Nebr., vice John Reese, term expired.

John P. Golden, of O'Neill, Nebr., to be register of the land office at O'Neill, Nebr., vice Brantley E. Sturdevant, term expired.

APPRAISER OF MERCHANDISE.

James Houlihan, of Pittsburgh, Pa., to be appraiser of merchandise in customs collection district No. 12, with headquarters at Pittsburgh, Pa., in place of Bernard B. McGinnis, resigned.

COLLECTOR OF INTERNAL REVENUE.

Benjamin F. Davis, of Lancaster, Pa., to be collector of internal revenue for the ninth district of Pennsylvania in place of Fred C. Kirkendall, transferred to the twelfth district.

Mr. Davis is now serving under a temporary commission issued during the recess of the Senate.

POSTMASTERS.

DELAWARE.

A. J. McCabe to be postmaster at Frankford, Del., in place of A. J. McCabe. Office became presidential April 1, 1916.

INDIANA.

Walter J. Rierden to be postmaster at Montezuma, Ind., in place of Emma G. Powell. Incumbent's commission expires June 14, 1916.

George W. Roy to be postmaster at Wolcottville, Ind., in place of Emery A. Metz, resigned.

Edward H. Taylor to be postmaster at Knox, Ind., in place of W. P. McCormick. Incumbent's commission expires June 12, 1916.

IOWA.

E. F. Main to be postmaster at Hopkinton, Iowa, in place of F. B. Tibbitts. Incumbent's commission expired March 13, 1916.

MASSACHUSETTS.

William J. Young to be postmaster at Woburn, Mass., in place of Edwin F. Wyer. Incumbent's commission expired December 20, 1915.

MICHIGAN.

Henry J. Lynch to be postmaster at Mayville, Mich., in place of James Garnsey. Incumbent's commission expires June 14, 1916.

MINNESOTA.

E. J. McGuiggan to be postmaster at Winnebago, Minn., in place of Charles Canfield. Incumbent's commission expires June 12, 1916.

MISSISSIPPI.

Arthur E. Bergold to be postmaster at Osyka, Miss., in place of Mae Wright. Incumbent's commission expires June 12, 1916.

NEBRASKA.

L. G. Lowe to be postmaster at Sidney, Nebr., in place of J. T. McIntosh. Incumbent's commission expired December 12, 1915.

W. E. Roudebush to be postmaster at Chappell, Nebr., in place of G. C. Neumann. Office became presidential January 1, 1916.

NEW YORK.

Archie Goodfellow to be postmaster at Jamesville, N. Y., in place of H. P. Cross. Office became presidential October 1, 1915.

PENNSYLVANIA.

L. J. Casey to be postmaster at Wilkes-Barre, Pa., in place of T. F. Heffernan. Incumbent's commission expired December 20, 1915.

VERMONT.

William H. Finn to be postmaster at St. Albans, Vt., in place of C. S. Forbes. Incumbent's commission expires June 5, 1916.

WEST VIRGINIA.

Richard C. Cooper to be postmaster at Farmington, W. Va., in place of W. H. Veach. Incumbent's commission expired March 13, 1916.

WISCONSIN.

Myra W. Blanding to be postmaster at St. Croix Falls, Wis., in place of Myra W. Blanding. Incumbent's commission expired January 16, 1916.

R. E. Bundy to be postmaster at Menomonie, Wis., in place of Egbert Marks. Incumbent's commission expired August 21, 1915.

Alexander G. Krembs to be postmaster at Stevens Point, Wis., in place of D. E. Frost. Incumbent's commission expired January 16, 1916.

HOUSE OF REPRESENTATIVES.

TUESDAY, *May 23, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

O Thou great Spirit, who hast spoken to Thy children of every age out of the great book of nature and hast spoken to the world out of the mouth of prophets and seers, and especially out of the mind and heart of Thy Son Jesus Christ, the express image of Thy glory, give to us, we beseech Thee, the hearing ear, the sensitive heart, that we may hear Thy word and obey, feel Thy loving presence to cheer and comfort, so that when we shall be called upon to pass from the endearing scenes of this beautiful world and our loved ones to go out into the great unknown we may pass serenely on with faith and confidence in Thee who doeth all things well. Hear us and thus bless us, in the name of the Master of all good works. Amen.

The Journal of the proceedings of yesterday was read and approved.

PORTO RICO.

The SPEAKER. When the House adjourned yesterday there were two matters on which the previous question had been ordered. The first one was the Porto Rican bill (H. R. 9533), and the first vote is on an amendment offered by the gentleman from Illinois.

Mr. MANN. Mr. Speaker, I ask that the amendment be reported.

The SPEAKER. Without objection, the Clerk will report the amendment.

The Clerk read as follows:

Page 28, line 12, after the word "enacted," insert "and no discrimination shall be made as to sex."

The SPEAKER. The question is on the amendment just read.

The question was taken; and on a division (demanded by Mr. MANN) there were 43 ayes and 67 noes.

Mr. MANN. Mr. Speaker, I ask for tellers.

Tellers were ordered, and the Chair appointed as tellers the gentleman from Virginia [Mr. JONES] and the gentleman from Illinois [Mr. MANN].

The House again divided, and the tellers reported that there were 59 ayes and 80 noes.

So the amendment was rejected.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. JONES, a motion to reconsider the vote whereby the bill was passed was laid on the table.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the bill (H. R. 10490) to prevent fraudulent advertising in the District of Columbia.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

The SPEAKER. The question now is on the rule reported by the Committee on Rules with reference to the District of Columbia appropriation bill. (H. Res. 240.)

The question was taken; and on a division (demanded by Mr. CAMPBELL) there were 91 ayes and 71 noes.

Mr. CAMPBELL. Mr. Speaker, I make the point that there is no quorum present.

The SPEAKER. The gentleman from Kansas makes the point that no quorum is present. Evidently there is not. The Doorkeeper will close the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 178, nays 136, answered "present" 8, not voting 112, as follows:

So the resolution was agreed to.

The Clerk announced the following pairs:

Until further notice:

Mr. MORRISON with Mr. HUMPHREY of Washington.

Mr. EAGLE with Mr. SMITH of Minnesota.

Mr. HUMPHREYS of Mississippi with Mr. WOOD of Indiana.

Mr. KINCHELOE with Mr. WHEELER.

Mr. ROUSE with Mr. MADDEN.

Mr. CASEY with Mr. SCOTT of Pennsylvania.

Mr. GALLAGHER with Mr. WINSLOW (ending May 27, inclusive).

Mr. SHERLEY with Mr. LONGWORTH (ending May 29).

Mr. CLARK of Florida with Mr. FULLER.

Mr. BRUCKNER with Mr. BENNET (ending June 20).

Mr. CANTRILL with Mr. LANGLEY.

Mr. SCULLY with Mr. MOONEY.

Mr. DRISCOLL with Mr. PAIGE of Massachusetts.

Mr. FITZGERALD with Mr. MOORE of Pennsylvania.

Mr. DOREMUS with Mr. FAIRCHILD.

Mr. DALE of New York with Mr. KEISTER.

Mr. ADAIR with Mr. COLEMAN.

Mr. HAMILL with Mr. GUERNSEY.

Mr. EAGAN with Mr. FOCHT.

Mr. DOOLING with Mr. ANTHONY.

Mr. CALDWELL with Mr. EDMONDS.

Mr. GLASS with Mr. HILL.

Mr. LEWIS with Mr. KREIDER.

Mr. CONRY with Mr. EMERSON.

Mr. MAHER with Mr. HUSTED.

Mr. LIEBEL with Mr. MCFADDEN.

Mr. CAREW with Mr. GOOD.

Mr. FINLEY with Mr. HEATON.

Mr. HULBERT with Mr. KEARNS.

Mr. WALKER with Mr. MORIN.

Mr. RUSSELL of Missouri with Mr. VARE.

Mr. SEARS with Mr. PETERS.

Mr. OGLESBY with Mr. MOSS of West Virginia.

Mr. FLYNN with Mr. GRIEST.

Mr. GODWIN of North Carolina with Mr. MCLAUGHLIN.

Mr. LITTLEPAGE with Mr. MILLER of Minnesota.
Mr. HART with Mr. CAPSTICK.
Mr. PATTEN with Mr. SNELL.
Mr. MORGAN of Louisiana with Mr. BRITT.
Mr. STEAGALL with Mr. BEALES.
Mr. POU with Mr. SUTHERLAND.
Mr. HENRY with Mr. GRAY of New Jersey.
Mr. BRUCKNER with Mr. COSTELLO.
Mr. GRIFFIN with Mr. LAFEAN.
Mr. SABATH with Mr. DRUKKER.
Mr. LOFT with Mr. WATSON of Pennsylvania.
Mr. MCLEMORE with Mr. BACHARACH.
On the vote:
Mr. RIORDAN (for rule) with Mr. WARD (against).
Mr. HEFLIN (for rule) with Mr. THOMAS S. WILLIAMS (against).
Mr. TAYLOR of Arkansas (for rule) with Mr. MILLER of Delaware (against).
Mr. STEDMAN (for rule) with Mr. ROGERS (against).
Mr. TAGUE (for rule) with Mr. KENNEDY of Rhode Island (against).
Mr. MONTAGUE (for rule) with Mr. SIEGEL (against).
Mr. WILSON of Louisiana (for rule) with Mr. LEHLBACH (against).
Mr. BARKLEY (for rule) with Mr. WALSH (against).
Mr. CARLIN (for rule) with Mr. MEEKER (against.
Mr. BUCHANAN of Texas (for rule) with Mr. RODENBERG (against).
Mr. GALLIVAN (for rule) with Mr. JOHNSON of South Dakota (against).
Mr. O'SHAUNESSY (for rule) with Mr. SWITZER (against).
Mr. HARRISON (for rule) with Mr. CHIPERFIELD (against).
Mr. KENNEDY of Rhode Island. Mr. Speaker, I am paired with the gentleman from Massachusetts [Mr. TAGUE]. I voted "no." I desire to withdraw that vote and answer "present."
The name of Mr. KENNEDY of Rhode Island was called, and he answered "Present."
Mr. MADDEN. Mr. Speaker, I voted "no." I am paired with the gentleman from Kentucky [Mr. ROUSE], and I desire to withdraw my vote and answer "present."
The name of Mr. MADDEN was called, and he answered "Present."
Mr. HUMPHREY of Washington. Mr. Speaker, I am paired with the gentleman from Indiana [Mr. MORRISON]. I desire to withdraw my vote "no" and answer "present."
The name of Mr. HUMPHREY of Washington was called, and he answered "Present."
The result of the vote was announced as above recorded.
The SPEAKER. A quorum is present; the Doorkeeper will unlock the doors.

AMENDING AUTHORIZATION OF FLEET SUBMARINES.

Mr. PADGETT. Mr. Speaker——
The SPEAKER. For what purpose does the gentleman from Tennessee rise?
Mr. PADGETT. Mr. Speaker, I rise to ask unanimous consent for the present consideration of the bill (H. R. 13670) to amend a provision in reference to a couple of submarines authorized in the bill of a year ago.
The SPEAKER. The gentleman from Tennessee asks unanimous consent for the present consideration of the bill which the Clerk will report.
The Clerk read as follows:

A bill (H. R. 13670) amending an act entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1916, and for other purposes, relating to the authorization of fleet submarines."

The SPEAKER. Is there objection?
Mr. MANN. Mr. Speaker, reserving the right to object, I would like to have the bill reported and then to have the gentleman state the necessity for it.
The SPEAKER. The Clerk will report the bill.
The Clerk read as follows:

Be it enacted, etc., That the provisions of the act entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1916, and for other purposes," which reads as follows: "Two submarines, to be of seagoing type, to have a surface speed of 25 knots or more if possible, but not less than 20 knots, to cost, exclusive of armor and armament, not exceeding $1,500,000 each," is hereby amended to read as follows: "Two submarines, to be of seagoing type, to have a surface speed of 25 knots or more if possible, but not less than 19 knots, to cost, exclusive of armor and armament, not exceeding $1,500,000 each."

The committee amendment was reported, as follows:

Page 1, line 3, strike out the word "provisions" and insert "provision."

The SPEAKER. Is there objection?
Mr. MANN. Mr. Speaker, reserving the right to object, let the gentleman make a statement about the bill.
Mr. PADGETT. Mr. Speaker, the appropriation act of last year authorized two fleet-going submarines, specifying that the minimum speed should be not less than 20 knots. The Secretary of the Navy advertised, as provided by law, for bids, and only received one bid, and that provided a guaranty of a minimum speed of 19 knots, and he was unable to get any company to bid for a speed guaranteed above 19 knots. They think they can get 20 knots, but they will not undertake or guarantee it, and the committee bring in this bill to amend it so they can proceed with the construction of these two submarines after advertising, if they get bids.
Mr. MANN. Mr. Speaker, may I ask the gentleman when were these submarines authorized?
Mr. PADGETT. In the appropriation bill of last year. The bill was passed, I believe, the 3d of March.
Mr. MANN. All of them were passed on March 3. When were they advertised for?
Mr. PADGETT. The designs were finally completed on December 11, 1915, and the department called for bids on February 16, 1916.
Mr. MANN. That was in February?
Mr. PADGETT. Yes, sir; that the bids were opened.
Mr. MANN. When did the Secretary make the request?
Mr. PADGETT. To the committee?
Mr. MANN. Well, to anybody. I do not know to whom he made it, but I suppose to Congress, not to the committee.
Mr. PADGETT. He addressed a letter to me March 3, 1916, and I introduced the bill March 24, and the committee reported it April 4.
Mr. MANN. Well, I am not going to object to this, but if we have equal speed all along the route these vessels may be constructed some time during the next century.
Mr. MADDEN. Mr. Speaker, reserving the right to object, I would like to make another suggestion.
Mr. MANN. I would like to make this suggestion: The Republican convention is going to be held in Chicago to nominate the next President of the United States week after next. [Applause on the Republican side.] I have so far been unable to get any understanding with that side of the House as to what the program of the House should be during the time of the convention. Quite a number of gentlemen on this side of the House are delegates to the convention and quite a number of others desire to attend the convention. I do not yet know whether it is the purpose of the majority to take up and consider matters of importance during the week of the convention or not. It is highly desirable that gentlemen who wish to attend the convention may know at an early date what is to be the program. While I shall not object to this request unless we can have some understanding, I will have to object hereafter to any unanimous-consent requests until the matter of the convention is disposed of or settled.
Mr. BUTLER. Reserving the right to object, let me ask the chairman of the committee what his purpose may be regarding the consideration of the naval appropriation bill?
Mr. PADGETT. I understand it is the expectation to bring in a rule to take it up either next Monday or next Tuesday.
Mr. BUTLER. Does the gentleman then propose to complete the consideration of that bill, which has very many new features in it, and which involves the Public Treasury to the extent of $361,000,000, during that week?
Mr. PADGETT. I understand it is the purpose to pass that bill not later than Saturday.
Mr. BUTLER. Can the gentleman give me some idea of how much general debate will be afforded the committee on this bill?
Mr. PADGETT. I understand it is the purpose to have one day devoted to general debate.
Mr. BUTLER. And then how many days to consider this important bill?
Mr. PADGETT. That would leave three.
Mr. BUTLER. Is it the purpose of the gentleman to conclude his bill by Friday of next week?
Mr. PADGETT. If we get it on Monday, it is hoped to conclude it on Friday; if we do not take it up until Tuesday, to pass the bill on Saturday.
Mr. BUTLER. If the gentleman will permit me to say to him, there are a good many gentlemen on this side of the House who desire to go away next week. Who created the impression I do not know, who was authorized to create it I do not know, but it has been well understood on this side that this bill would not be considered until after these two conventions had met and had concluded their proceedings. Many of the gentlemen on this side have made their arrangements to go away. It does not affect me personally, because I am going to stay here; and if there is any attempt to crowd the measure, I shall make it a business to see that every gentleman is in his seat. Gen-

tlemen who have understood they were to have the privilege of going away at the end of the week ought to have that privilege accorded to them.

Mr. PADGETT. I understand it is the purpose to pass the bill not later than Saturday of next week.

Mr. MADDEN. Most of the gentlemen going will leave here on Saturday morning and will not have opportunity to vote on the bill, and they ought to have that opportunity.

Mr. KITCHIN. It is our intention to get through with this District bill Friday, if possible, and take up on Saturday or Monday the naval bill, and to come here early in the morning and stay late in the evening, so that we can finish it by Friday night week, or Saturday at the outside. This will enable the gentlemen on that side who desire to vote on the bill to vote and attend the convention. I am sure that if we begin the naval bill on Monday and meet here at 11 o'clock or 10.30 a. m., and on one or two evenings sit until 10 or 11 o'clock, we can finish it by Friday night. We all know the points in controversy, and the questions that will arise under the bill have been debated and discussed for years and years, and there is no reason why we should take over three or four days under the five-minute rule.

Mr. BRITTEN. Does the gentleman really think that the House can consider the naval bill at the rate of $100,000,000 a day and do that subject justice?

Mr. KITCHIN. It does not make any difference as to what the amount is, or whether $1,000,000, or $2,000,000, or $100,000,000 may be in controversy if we know and understand thoroughly the entire matter. Some may want two battleships and some may want three battleships and some more or less. It is a matter that can be easily ended in a short time.

Mr. BRITTEN. This bill will take a lot of time to consider, and should be given a lot of time.

Mr. KITCHIN. We are willing to stay here until 10 or 11 o'clock every night, which will make it a week or more in time.

Mr. BRITTEN. I have no objection to rushing this bill, Mr. Speaker, but every item in the bill is of very great importance, and should be thoroughly considered, and I am sure you can not get proper consideration of the bill by 10 or 12 Members sitting around and listening to Members over here reading their manuscript.

Mr. BUTLER. I will say that if we begin Monday, we will have Monday, Tuesday, Thursday, Friday, and Saturday, and, if you desire it, have three hours in the evening. Will the gentlemen all be present if we sit in the evening? I understand how to keep them here, and I will try it, too.

Mr. KITCHIN. Another thing, if we can have unanimous consent to give Calendar Wednesday to this, I shall be glad to ask it, and I hope it will be granted. Now, I will ask the gentleman from Pennsylvania [Mr. BUTLER] if the gentleman does not think if we can begin Monday and the evening sessions, and if we can do away with Calendar Wednesday and give it to this, that we will have ample time for discussion by Friday night?

Mr. BUTLER. Mr. Speaker, it is a pleasure to endeavor to answer the gentleman's question.

Mr. KITCHIN. What do you think about it?

Mr. BUTLER. I do not. This is the twentieth naval appropriation bill that has been considered in the House since I have been here, and it is the first time it has ever been asked that we should dispose of it in three or four days.

Mr. KITCHIN. I do not desire to rush it through.

Mr. BUTLER. I am ready to take the morning session, but that time is not sufficient. I do not think you should require us to sit here in the nighttime to consider a bill of this importance. I think it ought to be considered in the daytime. I do not think we should be required to sit here at night.

Mr. COOPER of Wisconsin. Will the gentleman allow me to ask him a question?

Mr. PADGETT. With pleasure.

Mr. COOPER of Wisconsin. How many weeks or months has the Naval Committee been considering this bill?

Mr. PADGETT. December, January, February, March, April, and part of May, and not yet reported to the House.

Mr. COOPER of Wisconsin. So that the proposition now before the House is that a bill which it took this committee five months to consider the House should decide upon and vote to appropriate $360,000,000 in three days.

Mr. MANN. The gentleman is in error. We do not decide upon it. The President has already told them how to do it. [Applause.]

Mr. COOPER of Wisconsin. I accept the amendment.

Mr. BUTLER. The evidence submitted to this committee is very valuable and will help us for years to come. The chairman of the committee, with great patience, took this evidence, so that the House might have it and consider it, and it was never supposed by any of us that we would not have the opportunity to consider this bill as it should be considered, and with the country demanding that it should have consideration, within three weeks' time.

Mr. KITCHIN. I would like to say to the gentleman from Wisconsin [Mr. COOPER] that it has taken the Committee on Appropriations, having jurisdiction of the District of Columbia bill, four or five or six months, with night and day work, to get the District appropriation bill and the Appropriation Committee to get the sundry civil appropriation bill prepared, but we do not expect to take any such time as that in putting them through the House.

Mr. COOPER of Wisconsin. I hope the gentleman from North Carolina will not suggest that there is any resemblance between the District of Columbia appropriation bill and this bill.

Mr. MANN. The gentleman from North Carolina is in error as to the facts.

Mr. KITCHIN. No; I am not. Personally I am willing to give, so far as I am concerned, all the discussion you want on the bill. I am willing to have two weeks or three weeks devoted to it. But if the majority of this House will stand with me, we are going to begin the consideration of the naval bill on Monday, and not later than Tuesday.

Now, I wanted to hurry this matter up just to accommodate Members on that side, because Members had told me that they wanted to go to the Chicago convention and leave on Friday or Saturday. In order to accommodate them, I wanted to take this up on Monday and spend all the week till Friday night on it, and have evening sessions on it and get through in time for them to vote Friday and leave for the convention Friday night or Saturday morning.

Mr. MADDEN. Why not substitute it for this bill? Then you would have done something.

Mr. KITCHIN. And, to be candid with the gentleman, too, my present intention is to ask for a rule to take this up on Monday, or possibly Saturday if we can conclude the District appropriation bill by Friday night; and we are going through with that bill without interruption. I will ask unanimous consent for Wednesday, so that we may have Tuesday, Wednesday, Thursday, and Friday under the five-minute debate rule, giving full opportunity for discussion of all points at issue——

Mr. SMITH of Michigan. How many pages are there in the bill——

Mr. KITCHIN. And we can consider all the points in controversy.

Mr. BUTLER. Does the gentleman propose to have night sessions to consider the District appropriation bill?

Mr. KITCHIN. Yes.

Mr. PAGE of North Carolina. We will do that if we can.

Mr. KITCHIN. I will say, Mr. Speaker, that I have discussed it with the gentleman from Pennsylvania [Mr. BUTLER] and other members of the committee, and several Members on that side, and I did not perceive when we were discussing it privately so much opposition to this proposition from them as now appears in public. We all pretty much agreed upon that course, and while naturally you gentlemen would have to vote against any rule, yet from my conversation with you gentlemen I took it and understood that some of you would be very glad for us to run that rule over you. [Laughter.]

Mr. BUTLER. Mr. Speaker, I will say I voted in committee for this legislation, and I voted to put the legislation in the bill, and I should certainly vote for nothing to defeat it; but a good many gentlemen over here desire to discuss this bill. It is an absolute beginning of a new life for this country.

Mr. KITCHIN. Yes; and we ought to begin that life as soon as possible, if you consider it a good one.

Mr. PADGETT. And I hope we can take up and consider this submarine bill now.

Mr. BUTLER. Some people think it is not a good life.

Mr. BRITTEN. Would it be possible to substitute the naval bill for consideration on Thursday of this week?

Mr. KITCHIN. We can possibly get to it by next Saturday morning.

Mr. MANN. Mr. Speaker, I hope somebody will indulge me. We have been in session since the 1st of December, a period of nearly six months, and during that time we have passed, I believe, four of the regular appropriation bills, which are proceeding somewhat leisurely. Now, right upon the verge of the Republican national convention, where there is a contest in the convention of great interest to the Republican Members of the House, many of whom are delegates, the majority proposes to indulge in a trick to force their measures through hurriedly, without consideration, or to endeavor to force the Republican Members to stay away from the Republican convention. Such a

thing has never been done before. It is not generous, fair, or decent. [Applause on the Republican side.]

The SPEAKER. Is there objection to the request of the gentleman from Tennessee [Mr. PADGETT]?

Mr. BUTLER. Reserving the right to object, Mr. Speaker—and I am not going to object—let me say to the gentleman that he may have great difficulty in passing this naval bill next week, even if you have from 20 to 30 majority on it.

Mr. KITCHIN. Reserving the right to object, Mr. Speaker, I want to say to the gentleman from Illinois [Mr. MANN], the minority leader, that he knows that it is neither unfair nor is it a trick that we are trying to play upon that side of the House.

Mr. ADAMSON. Nor indecent.

Mr. KITCHIN. No; nor indecent; and I am really surprised that a man who usually keeps his head should lose it in this manner. Now, the fact is that I discussed the matter with the gentleman from Illinois, and with the gentleman from Massachusetts [Mr. ROBERTS], and with the ranking member of the committee from Pennsylvania [Mr. BUTLER] a few days ago, and told them that we would have to get this naval bill out before the convention, and thought we ought to do it, and of the method of procedure that I intended to take to pass the bill by Friday or Saturday week. I saw no real objection to it on their part, and the gentleman from Illinois thought we could get through it at this time if we would hold it down to the very merits of the question and the points in controversy and come here regularly and keep a quorum here. I do not think the gentleman really meant to say we were trying to trick them, because I was telling him all the time what we hoped to do.

Mr. MANN. Mr. Speaker, I myself never refer to private conversations with the gentleman from North Carolina, and the conversation which the gentleman says took place he states erroneously. What the gentleman said to me was, and he did say to me, that the President had directed him to pass the naval appropriation bill before the Republican convention. There was no discussion about it at all.

Mr. KITCHIN. No; I did not use any such language. Here is what I said. I believe I can jog the gentleman's memory.

Mr. MANN. My memory is very clear.

Mr. KITCHIN. Mr. ROBERTS and Mr. BUTLER were there, right by that desk, and I laughingly said, "Why, MANN, you know we have to pass this bill next week as a matter of policy. We have to pass this before the Republican convention"—not what the President said, but I said—"we have to pass this before the Republican convention, because you folks are 'mean' enough to denounce us for having been in session all this time and not having done anything for the Navy if we do not pass it before your convention meets."

Mr. MANN. That conversation never took place.

Mr. KITCHIN. Mr. ROBERTS said, "I don't know that that would give time," and the gentleman from Illinois said, "ROBERTS, they are in a position where perhaps they will have to do it"—substantially that.

Mr. MANN. The gentleman is now drawing on his imagination. I made no such statement.

Mr. KITCHIN. The gentleman said, "Well, I reckon we will denounce you, whether you pass it before our convention or afterwards." Did not you say that, now; honor bright? Did not you say that?

Mr. MANN. What I said was that we would denounce your naval policy, whether you passed the bill before the convention or not.

Mr. KITCHIN. No——

Mr. BUTLER. Mr. Speaker——

SEVERAL MEMBERS. Regular order!

The SPEAKER. The regular order is demanded.

Mr. BUTLER. I ask unanimous consent for two minutes to answer the gentleman from North Carolina.

The SPEAKER. There is one request for unanimous consent pending already. The gentleman from Pennsylvania asks for two minutes. Is there objection?

There was no objection.

Mr. BUTLER. Mr. Speaker, it is true I went to the gentleman from North Carolina, as I have frequently done, and as I expect frequently to do again. My purpose in going to him this time was to learn the sort of a bed he proposed to put me in. He did not consult me and I gave him no advice. I did not dissent, because he told me what he had concluded to do. I am prepared to lie still where he places me, but others upon this side of the House are not so content. I do not know whether the President asked that this bill be passed before our convention or not. I know that the country has demanded that there be some preparation made.

Mr. KITCHIN. And the country demands that you shall not filibuster to prevent the passage of this bill.

Mr. BUTLER. I understand that the country expects more of you than it will get.

Mr. GARNER. Will the gentleman yield?

Mr. BUTLER. Yes.

Mr. GARNER. The controversy here seems to be whether or not the President suggested that this bill pass before the convention.

Mr. BUTLER. I never heard anything about that.

Mr. GARNER. Does not the President have the right to suggest the policy of the party? He is the head of the party.

Mr. BUTLER. No doubt he has that right.

Mr. MANN. He has the right to tell you what to do, and you do it. [Cries of "Regular order!"]

The SPEAKER. The regular order has been called for, and the question is, Is there objection to the request of the gentleman from Tennessee?

Mr. KAHN. Reserving the right to object, I would like some information in regard to the bill.

The SPEAKER. The regular order has been demanded, and the question is, Is there objection?

Mr. HUMPHREY of Washington. Reserving the right to object, I would like to ask the gentleman——

The SPEAKER. That is not in order. The question is, Is there objection?

Mr. HUMPHREY of Washington. I object.

CIVIL PENSIONS—POST OFFICE DEPARTMENT.

Mr. MADDEN. Mr. Speaker, I desire to call up the motion to reconsider the motion of the gentleman from Indiana [Mr. Cox], by which the House gave unanimous consent to send the bills H. R. 6915 and H. R. 10130 from the Post Office Committee to the Committee on Reform in the Civil Service.

Mr. COX. Mr. Speaker, I do not believe the point of order has been reserved, but I will make the point of order.

Mr. MADDEN. I hope the gentleman will reserve it.

Mr. COX. I will reserve the point of order for a reasonable time.

The SPEAKER. Does the gentleman from Illinois desire to be heard on the point of order?

Mr. MADDEN. The gentleman from Indiana has reserved it.

Mr. COX. I will make the point of order.

Mr. MADDEN. Now, Mr. Speaker, the Post Office Committee of the House of Representatives is organized for the purpose of taking jurisdiction of post-office matters, including appropriations for the men who are employed in that service. It is given jurisdiction over the Railway Mail Service, the Foreign Mail Service, the postal savings bank, and all matters pertaining to post-office service, and anything that pertains to greater efficiency in the service I maintain comes within the jurisdiction of the committee. Frequently the committee has reported legislation to the House to do first one thing and then another with the end in view of creating a greater efficiency in the department. One piece of legislation reported by this committee and enacted by Congress was the classification act, by means of which the men in the service were given the right of promotion from grade to grade automatically from one year to another, which created an expense in connection with the conduct of the department. Nobody will contend that it did not also create greater efficiency in the department.

Not long since the committee had referred to it a bill providing for the enactment of a law to pay compensation for injury to men in the service while on duty. The committee took jurisdiction of that and reported the bill. Under that law a man in the Postal Service now injured in the line of duty is entitled to full pay for one year's disability and half pay for the second year, and the family receives $2,000 in case of death, if it is the result of the injury. I might enumerate many other salutary recommendations for the improvement of the department ratified by the Congress.

Nobody will claim that in the conduct of the great Postal Service of the United States the committee having jurisdiction over postal affairs has no right to recommend improvements in the service. Not long since bills were introduced and referred to the Post Office Committee providing for superannuation of men grown old in the service. What was the purpose of that? Only one, and that purpose was to retire men who had grown old in the service in order that young men might take their places and greater efficiency result from the enactment of the law.

The bill was under consideration by the committee. The question of order was raised as to the jurisdiction of the committee by the gentleman from Indiana, and a majority of the

Committee on the Post Office and Post Roads overruled the question of order raised by him.

The SPEAKER. Has the gentleman from Illinois anything to say as to whether this motion is in order?

Mr. MADDEN. I maintain that where a Member of the House makes a motion to reconsider any motion which the House acts upon it is in order.

The SPEAKER. He did not make any motion.

Mr. MADDEN. The Journal says that he did.

The SPEAKER. It does not make any difference what the Journal says; the RECORD shows what took place.

Mr. MANN. Oh, yes, Mr. Speaker; the Journal has been approved.

The SPEAKER. If the gentleman from Illinois has anything to say as to why the motion is in order, the Chair will hear him.

Mr. MADDEN. My contention is that the motion to reconsider as used in the Continental Congress and in the House since its first organization was made the subject of a rule adopted in 1802, and it has been the universal practice that where a motion has been made and carried by the House that it is in order to move a reconsideration and that any Member of the House can make the motion unless there was a roll call showing who was on one side and who was on the other. I maintain that there having been no roll call on the motion of the gentleman from Indiana that any Member now on the floor of the House can rise in his place and make a motion to reconsider under the rules of the House, and that it is in order and that it is the duty of the Chair to state the question to the House and give the House an opportunity to vote upon it. The bills taken from the Post Office Committee and referred to the Committee on Reform in the Civil Service, by unanimous consent, on the motion of the gentleman from Indiana [Mr. Cox] were under consideration in the Committee on the Post Office and Post Roads. Hearings had been held on the Griffin bill, and more than 100 Members of the House testified before the subcommittee in favor of that bill. The subcommittee had reported the bill favorably to the full committee. The full committee at its meeting on May 20 voted to take it up for further consideration on Wednesday the 24th of May, and yesterday morning when the House met at 11 o'clock, there being not more than 25 Members present, unanimous consent was granted to take the bills from the committee on the motion of the gentleman from Indiana [Mr. Cox] without knowing the facts and without knowledge of the effect of such action. I insist that the jurisdiction of the subject of the bills lies in the committee. That the gentleman's motion was not warranted without the consent of the committee and that a motion made by unanimous consent is no different than any other motion and under the rules a motion to reconsider will lie as in the case of action by the House of a motion made under any other circumstances.

Mr. GARRETT. If the Chair desires to hear——

The SPEAKER. The Chair will be glad to hear the gentleman.

Mr. GARRETT. Mr. Speaker, I direct the attention of the Chair to section 832, paragraph 3, of Rule XXII. Speaking of the matter of the reference of public bills and their rereference, in the latter part of the rule this language is used:

> And corrections in case of error of reference may be made by the House without debate in accordance with Rule XI on any day immediately after the reading of the Journal.

"By unanimous consent," that is one way. "On motion of the committee claiming jurisdiction," that is the second way. "On the report of the committee to which the bill has been erroneously referred," that is the third way.

Now, the use of the expression "by unanimous consent," when construed in connection with the other parts of the section, necessarily, it seems to me, implies that the ordinary rule does not apply to this particular case, and where a reference has been made by unanimous consent that it may not be reconsidered in the manner in which the gentleman from Illinois is attempting to reconsider it. It is not made upon motion, because there is no provision made as to how it shall be made on motion.

Mr. MADDEN. Will the gentleman yield?

Mr. GARRETT. Yes.

Mr. MADDEN. Why does the Journal say that it was made on motion?

Mr. GARRETT. I did not hear the Journal read, and if the Journal says that, it is erroneous; the rule, of course, controls.

Mr. FITZGERALD. Can anything be done in the House except on somebody's motion? How can it be done by unanimous consent except on somebody's motion?

Mr. GARRETT. Peculiarly enough this particular rule provides—and this is the only exception in all the general rules of the House—that by unanimous consent a proposition may be agreed to without a formal motion being made.

Mr. FITZGERALD. Oh, the rule uses an expression understood in parliamentary law. It uses the expression that by unanimous consent, but it must be upon somebody's motion. It can not be done by anyone without somebody suggesting or moving it. It must be by motion, and the rule was written by men who understood the meaning of an expression used in a parliamentary sense.

Mr. MANN. Mr. Speaker, while the rule provides that a change of reference can be made by unanimous consent, as suggested by the gentleman from New York [Mr. FITZGERALD], wherever unanimous consent is granted the Journal of the proceedings has always shown that the motion is made by unanimous consent, and in this case while the Speaker awhile ago intimated, without, I think, full consideration, that it made no difference what the Journal showed, still I think upon reflection the Speaker will find reason that the Journal of the proceedings, when they have been agreed to, tells what took place, no matter what really took place. And the Journal of this proceeding shows, as has been always the custom, that on motion of Mr. Cox, by unanimous consent, this order of transfer was made to discharge the Committee on the Post Office and Post Roads and referring these bills to the Committee on Reform in the Civil Service. That was a motion made, probably agreed to by unanimous consent. Now, the rule in reference to consideration says:

> When a motion has been made and carried or lost it shall be in order to move to reconsider.

I do not think that means there has to be a vote upon the motion. The Speaker frequently states: "Without objection, the amendment is agreed to; without objection, the bill is passed."

I do not think that the Speaker can hold, then, that because there has been no actual vote that a motion to reconsider does not lie. On the other hand, the Speaker frequently puts the question in reference to the passage of a bill, "Without objection, the bill is engrossed, read the third time, and passed," and subsequently the motion is made, usually is made, to reconsider and to lay that motion upon the table. That is the practice of the House. So that it does not require an actual vote, viva voce or otherwise, though the rule says when a motion has been made and carried or lost. It is made, it is carried when it is made by unanimous consent, and carried by unanimous consent, but it is still a motion, and when it is a motion it is in order to move to reconsider that motion.

Mr. COX. Mr. Speaker, I do not desire to burden the Chair with unnecessary argument, but the question before the House this moment is a question of procedure. It is not a question whether at this time, and so far as the decision the Chair is called upon to make, it is not a question whether or not the Committee on the Post Office and Post Roads, as I view it, has jurisdiction of these two bills, but it is a question of construing the rules of the House and whether or not the Speaker was operating within the rules of the House yesterday when he referred these bills from the Committee on the Post Office and Post Roads to the Committee on Reform in the Civil Service.

Now, as to what I did yesterday the RECORD shows I asked unanimous consent to refer these two bills from the Committee on the Post Office and Post Roads to the Committee on Reform in the Civil Service. If that should be treated tantamount to a motion upon my part, then the gentleman from Illinois is not within the rules of the House because he is not moving this morning, nor did he move yesterday, to ask unanimous consent of the House to reconsider the vote by which the question was carried yesterday.

Mr. STEENERSON. Will the gentleman yield?

Mr. COX. Not just at this minute. I read from page 9582 of the RECORD when this motion was made by the gentleman from Illinois [Mr. MADDEN] yesterday, and it is the motion that is pending before the House now:

> Mr. Speaker, I rise for the purpose of entering a motion to reconsider the vote by which the House on unanimous-consent motion of the gentleman from Indiana—

And so forth. That does not ask or does not move for leave or permission to ask unanimous consent to refer those two bills back to the Committee on the Post Office and Post Roads, nor does he ask or move for unanimous consent to ask reconsideration of the vote on yesterday when those two bills were referred by unanimous consent.

Mr. MADDEN. Will the gentleman yield?

Mr. COX. In a minute I will yield.

Mr. MADDEN. Does the gentleman contend that I would have to ask unanimous consent to make a motion to reconsider?

Mr. COX. No, sir; I do not contend that at all. Now, as to the point I made a moment ago. There are two motions I

made yesterday, and, treating it as tantamount to a motion, the motion I made treated in that light was to ask unanimous consent that those two bills be referred from the Committee on the Post Office and Post Roads to the Committee on Reform in the Civil Service. That is where my motion yesterday comes squarely within clause 3 of Rule XXII; and when the Chair reads the motion made by the gentleman from Illinois, as reported in the RECORD this morning, in the light of clause 3 of Rule XXII, it does not square itself at all. There are only three ways, as the gentleman from Tennessee well said, whereby public bills can be referred where the reference was originally erroneous. One is by unanimous consent; and I do not care whether the Journal shows unanimous consent was granted in the first instance or whether unanimous consent was granted for the purpose of permitting some Member of the House to make a motion to ask unanimous consent, the effect is just the same. There is not any difference whatever. The next way whereby public bills can be properly referred is a motion of the committee claiming jurisdiction. The gentleman from Illinois does not come within that reservation in the rule at all.

Mr. MADDEN. Will the gentleman yield?

Mr. COX. In just a minute I will. The next is on the report of the committee to which a bill has been erroneously referred. The motion of the gentleman from Illinois does not bring him within that part of clause 3 of Rule XXII.

Mr. MADDEN. The gentleman from Indiana will not contend or does not claim jurisdiction in the face of the fact that the gentleman raised the question of jurisdiction in the committee and a large majority of the committee overruled his contention.

Mr. COX. But the committee claiming jurisdiction is one thing, and the House, when the question comes squarely before it for decision on the question of jurisdiction, is a totally different proposition.

Mr. STEENERSON. Does the gentleman contend that the Committee on the Post Office and Post Roads have authorized or directed him to make the motion he made?

Mr. COX. No; I was proceeding under my own initiative when I asked unanimous consent to make the motion to refer, as the Journal shows. I would suggest to the Chair—probably the Chair has read it—Hinds' Precedents, volume 4, section 4665, a decision rendered by Speaker Crisp. It does not throw very much light upon the subject, but it is a construction of this rule.

The SPEAKER. Both the gentleman from Illinois [Mr. MADDEN] and the gentleman from Indiana [Mr. Cox] are disposed to be technical. The gentleman from Indiana insists that the motion of the gentleman from Illinois is not sufficient. The motion is good enough; that is, as far as the shape of it is concerned.

If the Chair was disposed to be technical, which he is not, the gentleman from Illinois [Mr. MADDEN] did not have a right to make the motion at all, because he was not here when the gentleman from Indiana [Mr. Cox] secured the rereference of the two bills. The Chair knows, because the gentleman from Illinois [Mr. MADDEN] stated on the floor of the House that he was not here.

Mr. MANN. That is not official to the Chair.

The SPEAKER. If it is not official to the Chair, I do not know what would be. The Chair takes it that the gentleman from Illinois [Mr. MADDEN] is a man of veracity. The only question involved in this thing is this, whether a motion to reconsider applies to the rereference of a bill by unanimous consent. This is the only rule the Chair knows of that specifically provides for a request for unanimous consent. This is subdivision 3 of Rule XXIII, at the last end of the subdivision:

> Corrections in case of error of reference may be made by the House without debate and in accordance with Rule XI on any day immediately after the reading of the Journal in three ways: By unanimous consent—

That is what has happened in this case—

> on motion of a committee claiming jurisdiction, or on the report of a committee to which the bill has been erroneously referred.

In this case it is the Committee on the Post Office and Post Roads which claims jurisdiction, and, without knowing, the Chair supposes that the Committee on the Civil Service Reform would fight its claim.

The gentleman from New York [Mr. FITZGERALD] used the exact words that ought to be used. It was a suggestion for unanimous consent. That seems to be the only way they can journalize a unanimous-consent request. The gentleman from New York said, "on a motion or suggestion." Now, the word "suggestion" is precisely the word that applies to the situation.

Mr. FITZGERALD. Mr. Speaker, the Speaker is bound by the Journal of the House, and can not go beyond it. The Journal has been approved. The Journal says, "By motion." The Speaker can not ignore the Journal of the House.

The SPEAKER. The Speaker is not deaf and blind, and knows exactly what happened here.

Mr. FITZGERALD. But the official record of the House of Representatives is the Journal, by which the Speaker is controlled.

The SPEAKER. The point of order made by the gentleman from Indiana [Mr. Cox] is sustained. The gentleman from Illinois [Mr. MADDEN] has a remedy. If he does not like the decision of the Chair, he can get his committee to come in here and move to refer this bill to the Committee on the Post Office and Post Roads.

Mr. MANN. A parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. MANN. Can he do that when the House itself has changed the reference once?

The SPEAKER. The Chair thinks he could.

Mr. MADDEN. I will take advantage of that situation. We will have the committee gotten together, and we will come to the House as a committee and ask for rereference of this bill.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. PAGE of North Carolina. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of the bill H. R. 15774, a bill making appropriations for the expenses of the Government of the District of Columbia for the fiscal year ending June 30, 1917, and for other purposes; and pending that, Mr. Speaker, I would like to see if we can reach unanimous consent as to the time for general debate with the gentleman from Minnesota [Mr. DAVIS].

Mr. DAVIS of Minnesota. Mr. Speaker, I would like to agree upon some time. I will say that I have requests for over three hours on this side.

Mr. PAGE of North Carolina. Mr. Speaker, there have also been numerous demands on this side for time, but I would like to suggest to the gentleman that in view of the conversation that went on in the House a little while ago relative to taking up of another appropriation bill after this one, it seems to me that this is not an opportune time to spend very much time in general debate. We ought to pass this bill as quickly as possible.

Mr. DAVIS of Minnesota. I agree with the gentleman, except in this particular: The general debate in this matter, while it may not be confined exclusively to the items of the bill, yet I am inclined to believe will, in the few hours which we agreed to, be confined to the so-called half-and-half plan. So that when that section of the bill is reached it will have been pretty generally debated under the general debate, and then the chairman of the subcommittee, the gentleman from North Carolina, will perhaps be justified in curtailing all matters of that kind. Now, I simply suggest that. I rather insist, if possible, that we have those three hours and a half upon this side.

Mr. PAGE of North Carolina. Mr. Speaker, that would mean seven hours' debate. In my judgment, that is too much. That would mean the remainder of the legislative day; and while the gentleman suggests that the debate might be confined to the first section of the bill——

Mr. DAVIS of Minnesota. I do not say it would be.

Mr. PAGE of North Carolina. He has no way of guaranteeing that. Neither has he any way of cutting off debate on that section when we reach it under the five-minute rule. I will say to the gentleman that we will be willing to suggest general debate on this side for three hours.

Mr. DAVIS of Minnesota. Under the conditions I do not see how I can agree to that.

Mr. PAGE of North Carolina. Mr. Speaker, if we can not get a unanimous-consent agreement for three hours—one hour and a half on a side—one half to be controlled by the gentleman from Minnesota [Mr. DAVIS] and the other half by myself, I shall proceed to an explanation of the bill. I move to go into the Committee of the Whole House on the state of the Union.

The SPEAKER. The question is on the motion of the gentleman from North Carolina.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 15774) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1917, and for other purposes, with Mr. FERRIS in the chair.

Mr. PAGE of North Carolina. Mr. Chairman, I ask unanimous consent that the first reading of the bill be dispensed with.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that the first reading of the bill be dispensed with. Is there objection? [After a pause.] The Chair hears none.

Mr. PAGE of North Carolina. Mr. Chairman, the bill under consideration making appropriations for the expenses of the District of Columbia for the fiscal year ending June 30, 1917, carries appropriations aggregating, exclusive of the water revenues, $11,631,907.34. The estimates submitted to the Congress in the Book of Estimates aggregated $15,182,196.34. The amount carried by the bill, therefore, is $3,550,298 less than the estimates.

The gentleman from Wyoming [Mr. MONDELL], in his remarks upon the rule for making in order certain legislative provisions contained in the bill, on yesterday made the statement that in this bill, not to use his own words, that we had so cut the estimates submitted to the committee that it did not provide for the necessities of the District of Columbia, and I merely want to say to the members of the committee in the consideration of the various items that go to make up the total of this bill that the subcommittee formulating it did not consider a single item with reference to what the total of the bill would be, but that every one of the many hundreds of items that go to make up the aggregate was considered by that committee on its merits and without regard to what the total of the bill should be.

Now, inferences might be drawn from the statements already made that it was extremely unusual for a bill to be brought in from the committee making appropriations for the District of Columbia as much as $3,000,000 less than the estimates submitted by the commissioners. The statement was also made, I believe, that this bill was less in amount than former bills reported to this House in prior years, providing for the expenses of the District of Columbia. I want at this place to put into the RECORD the fact that the bill now under consideration carries $591,689.11 more than the bill reported to the House a year ago by the same committee. In other words, it exceeds by nearly $600,000 the amount in the bill reported a year ago.

These are the figures:

District of Columbia appropriation bills, fiscal years 1908 to 1912, inclusive.

Year.	Estimates.	Reported to House.	Reduction.
1908	$11,598,222.00	$10,112,234.63	$1,485,987.37
1909	13,798,126.35	9,561,449.35	4,236,677.00
1910	16,176,355.52	9,961,418.52	6,214,937.00
1911	11,180,628.49	10,285,907.99	894,720.50
1912	12,872,985.90	11,498,371.50	1,374,614.40
Total	65,626,318.26	51,419,381.99	14,205,936.27

NOTE.—The total reduction of $14,206,936.27 of the District of Columbia bills, as reported to the House for the five fiscal years 1908 to 1912, inclusive, under the total amount of the estimates submitted by the commissioners for that period, is 21.6 plus per cent.

District of Columbia appropriation bills, fiscal years 1913 to 1917, inclusive.

Year.	Estimates.	Reported to House.	Reduction.
1913	$12,954,720.50	$10,302,208.00	$2,652,512.50
1914	12,874,297.60	11,221,964.00	1,652,333.60
1915	14,491,614.49	11,465,480.49	3,026,134.00
1916	12,909,434.23	11,303,048.23	1,606,386.00
1917	15,473,676.34	11,894,737.34	3,578,939.00
Total	68,703,743.16	56,187,438.06	12,516,305.10

NOTE.—The total reduction of $12,516,305.10 of the District of Columbia bills for the last five fiscal years, as reported to the House under the total amount of the estimates submitted by the commissioners for that period, is 18.1 plus per cent.

In 1915 the reduction, when the bill was reported to the House, is shown to have been $3,026,134 less than the estimates. In the year 1913 the amount reported to the House in the bill was $1,652,000 less than the estimates.

Going back prior to the present administration, in 1908—in the bill for 1909—the estimates submitted to that Congress were $13,798,126.35, and the appropriations reported to the House were $9,561,449, or $4,236,677 less than the estimates. For the fiscal year 1910 the estimates submitted to the Congress were $16,176,355, and the appropriations were $9,961,418, or $6,214,937 less than the estimates. In fact, the estimates submitted to this Congress, with only one exception, were larger than any that had been previously submitted to the Congress for the expenses of the District of Columbia, and the cut is very much less than it has been in recent prior years when the estimates were not so great.

Mr. TILSON. Mr. Chairman, will the gentleman yield for a question before he leaves that point?

Mr. PAGE of North Carolina. Yes; I yield to the gentleman.

Mr. TILSON. In general, what are the major items in which the cut was made below the estimates?

Mr. PAGE of North Carolina. I can cite to the gentleman in two or three items the major cuts that were made; items that were not reported in this bill, but which were in the estimates.

Mr. TILSON. That is, of the larger items?

Mr. PAGE of North Carolina. Yes; of the larger items. There was an estimate submitted for the purchase of a park in the northwest, for which $624,000 was asked. There was also an estimate for a park known as the Patterson Park, in the northeast, carrying several hundred thousand dollars—the amount I do not just now remember exactly. There was also an estimate submitted asking for an appropriation for the building of a municipal garbage-disposal plant that carried several hundred thousand dollars. These are the three largest items that suggest themselves to my mind at this time.

Now, I want to say in this connection that the appropriation carried in this bill for the improvement of the streets within the city is a larger appropriation than has been carried in any bill, to my knowledge, at any time. The appropriation for the schools in the District is not quite so large as last year, for the reason that last year we were carrying final appropriations, several hundred thousand dollars, for the completion of the new high schools. They were completed, and, of course, there was no estimate at this time.

Mr. AYRES. In reducing the items for the school facilities, did that in any way reduce the salaries of the teachers?

Mr. PAGE of North Carolina. Not in any way. The amounts carried in this bill for the pay of teachers and the organization of schools in the city of Washington does not cut one iota from the estimates submitted by the school board, and there were increases this year, not only in the number of employments but some increases of salary. There are always increases of salaries of teachers, because they automatically advance.

Mr. SMITH of Michigan. What is the amount in the bill for the schools?

Mr. PAGE of North Carolina. Something over $3,000,000. I will give the gentleman the exact amount if he will indulge me for just a moment. It is distributed in a number of amounts in the copy of the bill reported to the House, and I have not the amounts, but it is considerably over $3,000,000.

Mr. SMITH of Michigan. That is one-half of the amount necessary to carry on the schools?

Mr. PAGE of North Carolina. No; that is the total amount, because we do not segregate in the bill the part that is being paid by the District and the part that is being paid by the Treasury. We do not make those distinctions, but the total shows the total for the object to which the money is devoted.

Mr. SMITH of Michigan. Are there any figures showing how that amount compares with the expenditures of other cities of similar population for school purposes?

Mr. PAGE of North Carolina. I do not know that any evidence was elicited in the hearings taken as to the comparative cost of schools in Washington and other cities this year, but we have investigated it at other times, and I think it is higher than in any city comparable in size in the United States.

Mr. GARD. Mr. Chairman, will the gentleman pardon an interruption?

Mr. PAGE of North Carolina. Yes.

Mr. GARD. For the information of the gentlemen on the other side I will say that the report of the auditor of the District of Columbia, made in October, 1915, shows that for education in the public schools and special education in public libraries the appropriation was $3,164,308.17.

Mr. FESS. On page 41 of the bill, line 5, the item in all for teachers is $1,438,200.

Mr. PAGE of North Carolina. That is for teachers only. That, of course, does not include the other expenses in connection with the schools.

Mr. FESS. I thought the inquiry was as to teachers.

Mr. PAGE of North Carolina. No. I find on reference to the report that the total amount carried for the schools in this bill—and that includes new construction and all the expenses of the schools—is $2,801,780, which was very nearly $3,000,000.

Now, I do not care at this time to make any reference to the legislative provisions that are in this bill. In spite of the fact that it was said yesterday by certain gentlemen that the first legislative provision which changes the fiscal policy as between the Treasury and the District of Columbia has not been discussed, that hearings had not been had, I am sure that gentlemen who made those statements did not make them seriously, or they themselves had not taken advantage of the opportunity

to inform themselves, because there has been during the last two sessions of Congress, and there was during the last Congress particularly, a great deal of discussion on the floor of the House relative to this subject, which led to the passing of a resolution and the appointment of a special committee to take testimony and report to this House their conclusions as to what was the proper fiscal relation to be adopted between the Government and the District of Columbia.

That report has been made. These gentlemen spent practically two months in taking voluminous testimony, which is now in the hands of the Congress in two volumes.

In passing I might say that certainly seven-tenths, if not more, of the evidence taken by this committee was from people who are in favor of the old half-and-half plan, or opposed to any change. Yet after hearing these people patiently and at length this committee reported in favor of the abolition of the half and half. That has been embodied in this first legislative provision in the resolution adopted this morning, and the gentleman from Ohio [Mr. GARD], who was a member of that select committee, having the floor yesterday, made the statement that with one exception the language carried in this bill is in accord with the report made by that special committee, which was a unanimous report, signed by the three Senators and the three Representatives who composed it. I intimated to him then on the floor of the House, and I want to say now, that when we begin the reading of this bill under the five-minute rule I shall offer an amendment that meets the view of the gentleman from Ohio [Mr. GARD], which will except from this provision the funded debt of the District; and so long as that debt remains, which will be only a few years, will carry in this bill in connection with that particular item the specific language that one-half of this amount shall be paid from District revenues and one-half from any money in the Treasury not otherwise appropriated. I think that meets absolutely and fully not only in spirit but actually the recommendation contained in the report made by this joint committee. Now I yield to the gentleman from Massachusetts [Mr. TINKHAM].

Mr. TINKHAM. Does the honorable Representative from North Carolina think the following words, which are the only words in the report of the joint select committee that have any reference to the abolition of the so-called half-and-half plan, recommend that it be abolished? The words in the report are as follows, on page 11:

> But we think that the conditions of to-day and of the few years last passed are so different from the conditions of 1878 that this arbitrary rule, a rule of time seeming necessity, need no longer be applied to the District appropriations.

Mr. PAGE of North Carolina. Oh, certainly; and I can take one verse from Holy Writ and prove anything. In the full report of this committee they do recommend specifically that the taxes collected in the District of Columbia be expended for the expenses of the District of Columbia, and supplemented by the Congress in such amount as may be necessary for the expenses of the District.

Mr. TINKHAM. Will the honorable Representative yield?

Mr. PAGE of North Carolina. I yield to the gentleman from Massachusetts.

Mr. TINKHAM. I desire to bring the attention of the honorable Representative to the final recommendation in the report of the joint select committee:

> Our unanimous conclusion is that the rate of taxation in the District should be fixed and certain; that the Congress should pursue a definite policy of regular and liberal appropriations.

Mr. PAGE of North Carolina. In reply to that I will say, Mr. Chairman, that there is nothing in this provision or in this bill that refers directly, indirectly, or remotely to any subject of taxation in the District of Columbia, and this committee does not propose to take it under consideration.

Now I will yield to the gentleman from Missouri [Mr. LLOYD].

Mr. LLOYD. Is it not true that there are a number of items that are carried in the sundry civil bill, where the bill provides for distribution between the District of Columbia and the National Government, and that in order to make to the country a proper statement of the distribution of this fund between the General Government and the District of Columbia those items ought to be included?

Mr. PAGE of North Carolina. They certainly ought. There are a number of them.

Mr. LLOYD. Is it not true that every one of those items in the sundry civil bill will be paid out of the Treasury of the United States?

Mr. PAGE of North Carolina. No; that is not true, because it is specified in many of them that they shall be paid half from the revenues of the District of Columbia and half from the Federal Treasury.

Mr. LLOYD. But you have provided that the full $8,000,000 which will be received from taxation in the District shall be paid toward the expenses of the District. According to this bill there will be a little over $3,000,000 paid out of the Treasury of the General Government and $8,000,000 from taxation in the District of Columbia. Now, when you add that which belongs to the District which is found in the sundry civil bill, then the amount that is to be paid by the General Government will be not $3,000,000 but nearly $5,000,000.

Mr. PAGE of North Carolina. Of course. It will be this amount plus the amounts carried in the sundry civil bill for the District, whatever those amounts may be.

Mr. LLOYD. The gentleman catches my point.

Mr. PAGE of North Carolina. I do.

Mr. LLOYD. That at the present time, according to the report, there is a slightly misleading statement——

Mr. PAGE of North Carolina. I see the gentleman's point. It was an amount that was indeterminate when this report was written, because we had no knowledge, and neither had the gentleman or the House, as to what amounts would be carried in the sundry civil bill.

Mr. LLOYD. And it is also true that while the sundry civil bill will provide that one-half shall be paid out of the District funds and one-half shall be paid out of the Treasury, the effect will be, notwithstanding that provision, that the full amount will come out of the Federal Government, because the full $8,000,000 will have been absorbed in paying the expenses provided for in the District of Columbia appropriation bill.

Mr. PAGE of North Carolina. Why, certainly, because there will be no District revenues out of which to pay the sums carried in the sundry civil bill.

Mr. TINKHAM. Will the honorable Representative yield for a question?

Mr. PAGE of North Carolina. I yield to the gentleman.

Mr. TINKHAM. The Committee on Appropriations this year recommended the construction of a new bridge across the Potomac and provided that the proportion to be paid by the District of Columbia should be 50 per cent, and the appropriation to be paid by the Federal Government should be 50 per cent. I desire to ask the honorable Representative from North Carolina why that percentage was fixed on a basis of half and half?

Mr. PAGE of North Carolina. Simply because that is the law until this provision is adopted in this bill, and it was fixed on the basis of the then law. I want to say further to the gentleman, in line with the remarks made by the gentleman from Missouri [Mr. LLOYD], that necessarily the entire amount for the construction of this bridge, chargeable to the District of Columbia under the half-and-half provision, will be paid from the Treasury of the United States and none of it from District revenues, because the District revenues will be exhausted, and that is plus the amount paid by the National Treasury, as shown in this bill.

Mr. TINKHAM. When the Appropriations Committee reported the bill for the new bridge it could have fixed the proportion to be paid by the District of Columbia or the Federal Government—that is, the fair proportion—could it not, notwithstanding any previous appropriations?

Mr. PAGE of North Carolina. The gentleman should inform himself. The Appropriations Committee did not report that bill for the building of the bridge. We had nothing to do with it. It came from the Committee on Interstate and Foreign Commerce, and was considered by the same committee in the Senate. It did not come from the Appropriations Committee at all. I want to submit to the gentleman that the members of the Appropriations Committee of the House do not have jurisdiction over matters in the Committee on Interstate and Foreign Commerce.

Mr. TINKHAM. When the Committee on Interstate and Foreign Commerce, if it was the Committee on Interstate and Foreign Commerce that reported the bill for the construction of the new bridge, and reported that it should be paid for half from the funds from the District of Columbia and half from the funds of the Federal Government, did the honorable Representative from North Carolina protest that this proportion and plan of payment was unfair or inequitable?

Mr. JOHNSON of Kentucky. If the gentleman from North Carolina will permit me, I will suggest to the gentleman that the District people caused that bridge bill to be introduced, and in it they required the United States to pay for all of it, but the Committee on Interstate and Foreign Commerce changed the conditions of payment and compelled the District to pay one-half of it.

Mr. PAGE of North Carolina. Mr. Chairman, I move the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and Mr. FOSTER having taken the chair as Speaker pro tempore, Mr. FERRIS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 15774, the District of Columbia appropriation bill, and had come to no resolution thereon.

Mr. PAGE of North Carolina. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15774, the District appropriation bill, and pending that, I move that all general debate on the bill be concluded at 3 o'clock and 30 minutes this afternoon, and on that I move the previous question.

The SPEAKER pro tempore. The gentleman from North Carolina moves that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the District appropriation bill, and pending that he moves that general debate on the bill shall be closed at 3.30 o'clock this afternoon, and upon that he moves the previous question.

Mr. DAVIS of Minnesota. Mr. Speaker, I would like to ask the gentleman if we can not agree to have general debate close at 4 o'clock?

Mr. PAGE of North Carolina. I will agree to that; the gentleman knows that I am reasonable, but I did not want general debate to occupy the whole legislative day. I will withdraw my motion, Mr. Speaker, and ask unanimous consent that debate be closed at 4 o'clock, one-half the time to be controlled by the gentleman from Minnesota and one-half by myself.

Mr. HUMPHREY of Washington. The gentleman has already occupied some time.

Mr. MANN. They want to hog the whole of it.

Mr. PAGE of North Carolina. Now, the gentleman need not have made that remark. I was going to ask how much time I had consumed.

The SPEAKER pro tempore. The gentleman has consumed 22 minutes.

Mr. PAGE of North Carolina. Mr. Speaker, I ask unanimous consent that general debate on the bill close at 4 o'clock this afternoon, one-half of the time to be controlled by myself and one-half of the time by the gentleman from Minnesota [Mr. DAVIS], and that the 22 minutes already consumed by me be charged to me.

The SPEAKER pro tempore. The gentleman from North Carolina withdraws his motion to close debate and asks unanimous consent that general debate shall close at 4 o'clock p. m., one half to be controlled by himself and the other half by the gentleman from Minnesota [Mr. DAVIS], and that the 22 minutes occupied by the gentleman from North Carolina shall be deducted from his time. Is there objection?

Mr. MANN. Reserving the right to object, suppose somebody should make a point of no quorum?

Mr. PAGE of North Carolina. That is taken out of the time.

Mr. MANN. Is that a fair proposition?

Mr. PAGE of North Carolina. I am not going to make any such point.

Mr. MANN. Nobody knows; how can you distribute the time?

Mr. PAGE of North Carolina. This request was made by the gentleman from Minnesota, and I agreed to it in perfect good faith. As far as I can, and as far as my influence will go, I shall keep it.

Mr. MANN. I do not doubt that; but it is bad practice, because anybody in the House can make the point of no quorum.

Mr. PAGE of North Carolina. I can say to the gentleman from Illinois that I am sure it will not be made on this side of the House.

Mr. MANN. And I do not think it will be made on this side; but no one can tell.

Mr. PAGE of North Carolina. If it is made on this side of the House I will take it out of the time.

Mr. MANN. Instead of fixing the exact hour, why not fix the length of time?

Mr. PAGE of North Carolina. I am not willing to do that, because that would be a bid for somebody to have a call of the House.

Mr. MANN. Very well; I shall not object, although I think it is ungenerous and unfair.

Mr. PAGE of North Carolina. And I think that is gratuitous on the part of the gentleman from Illinois.

Mr. MANN. It is true just the same, and I will get even with it in some other way.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from North Carolina.

There was no objection.

The SPEAKER pro tempore. The question now is on the motion of the gentleman from North Carolina that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the District of Columbia appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. FERRIS in the chair.

Mr. DAVIS of Minnesota. Mr. Chairman, I yield 25 minutes to the gentleman from Minnesota [Mr. SCHALL].

Mr. SCHALL. Mr. Chairman, one of the two most important issues that has been before this House was recently passed, the Army bill. The other is the Navy bill, which, I understand, is reported, or is to be immediately reported, out and will next be before us.

In speaking upon the question of adequate preparedness, it is fitting that I place upon record the opinions of those in my district interested in the question. They are by counties, as follows:

Shall the Navy be increased?

Counties.	Yes.	No.	No vote.
Wright	390	206	19
Pine	345	296	31
Mille Lacs	291	179	46
Kanabec	162	353	10
Isanti	339	173	22
Chisago	339	113	19
Anoka	447	248	121
Hennepin[1]	3,300	1,451	568
Total	5,613	3,019	839

[1] Hennepin County includes all rural part, third, fourth, and tenth wards of the city of Minneapolis.

Yes	5,613
No	3,019
No vote	839
Total	9,468

Shall the Army be increased?

Counties.	Yes.	No.	No vote.
Wright	366	239	19
Pine	291	350	31
Mille Lacs	279	185	52
Kanabec	162	326	37
Isanti	333	179	22
Chisago	279	173	19
Anoka	414	281	121
Hennepin	2,862	1,919	538
Total	4,986	3,543	839

Yes	4,986
No	3,543
No vote	839
Total	9,468

Mr. Chairman, when the Army bill was first under discussion our respected leader, conservative, far-sighted, seasoned statesman, equipped and in a position to read the signs of the times, told us that we were sitting on the top of a volcano that was liable to erupt at any moment, and from the depths of his patriotic soul urged us to expend American dollars now for peace as an insurance against war, instead of oceans of American blood later. And last Saturday he pleaded with us as our last chance to vote against the conference Army report, so that we might put preparedness men in the saddle and secure adequate preparedness now, not a year from now. The Army bill provides for an increase to our standing army of 12,000 men by July 1, 1917. Two years and 11 months from the time the war broke in Europe we have magnificently prepared by adding 12,000 men to our Army, a corporal's guard, a patch of tin, when we need a panoply of steel.

When Mrs. Schall read to me the other day a statement made to an American audience by no less a person than William Lyon Phelps, of Yale, I felt impelled to resent it and to add what little I could to public opinion upon the important and vital question of adequate preparedness. He said, "The American flag and patriotism are an illusion." I thank him for that word "illusion." Only an illusionist without the pulse of patriotism, disordered in his understanding of what the flag really means, could have honestly made such a statement. All the devoted lives, all the patriots whose blood has consecrated our soil, the

shades of Washington, Jefferson, Lincoln, must cry out against such utterances. What, gentlemen, are the facts that face us? What are the conditions that surround us? Who are the nations we must abide with? We are living in the most vital crisis the world has ever known, an era of warriors, a snarling, fighting, lawless, war-torn world, built from top to bottom—armies, business, churches, homes, individual rights—on fighting, competition. In animal and in vegetable life alike, it is the survival of the fittest. The community of grass kills the community of brush. The high plant kills the low plant. The mistletoe battles with its supporting oak. The strong prey upon the weak. Sir Edwin Arnold observed:

> How lizard fed on ant, and snake on him,
> And kite on both; and how the fish hawk robbed
> The fish tiger of that which it had seized,
> The shrike chasing the bulbul, which did hunt
> The jeweled butterflies; till everywhere
> Each slew a slayer and in turn was slain;
> Life living upon death. So the fair show
> Veiled one vast, savage, grim conspiracy
> Of mutual murder, from the worm to man
> Who himself kills his fellow.

Gentlemen, the whole social fabric of the world rests upon the fighting power of man. Do men no longer wish to fight for their homes, their country, their loved ones? Any man worth the name of man would rather die for a right cause if need be than live ignominiously. If not to fight, means that America shall go down before the ambition of any foreign nation, shall bend her neck to the command of any foreign power, or suffer disgrace and shame in silence, then who is so ignoble as to prefer to sacrifice future interests for the comforts of a present peace? [Applause.] Shall we be a nation of men capable of protecting our rights at home and abroad or shall we be fat oxen waiting for the butcher's knife? Unpreparedness offered up the gentle peace-loving Incas to be crushed under the heel of the invading Spaniard. Unpreparedness has shackled China and rendered her subservient to any power that cares to dictate. Belgium and Greece were neutral, had justice on their side and all the brotherly love argument, when they asserted they were nations and not highways, but preparedness soon demonstrated that they were only military roads. To advocate unpreparedness as a means of keeping out of war that nation that was born and cradled in war, nurtured and reared to manhood in war, held together by war, is the height of fatuity. [Applause.]

It is no guaranty, gentlemen, that we are peaceful, that our policy is not one of aggression, that we want nothing but to be let alone, to be allowed to go our own way. Belgium did not want anything but to be let alone, and yet the attack on France was made through Belgium, because she furnished the way of least resistance. Poland has not wanted anything but to be let alone, yet for a century she has been the shambles of Europe. Unpreparedness, gentlemen, will sacrifice any nation or any individual. Men easily believe that which they desire. We have listened to the siren song of peace so long that we are like to be sunk in the Lethe of our prosperity. Two years ago it was easy to believe that science, with its terrible engines of destruction, had rendered war impossible. We all hoped that the brotherhood of man was near at hand when all international questions could be settled in open court. But the chaos of to-day shows war yet a grim reality and vain the 50-year long dream for the brotherhood of man. It is pathetic to hear pacifists declare that after the war the European nations will be too exhausted to fight.

Nothing so well prepares a nation for war as war. England, Germany, France, Russia, Italy, Japan, Austria, Bulgaria, Turkey are better prepared to-day than they were at the beginning of the war. It is not what they have, it is what they can get along without. They have learned to live in terms of war instead of peace. A great readjustment has taken place. A mighty unselfishness has been bred. It will not help to stick our head in the sand like the ostrich. England, basking in the security of her ocean fortifications, failed to prepare and she is to-day paying dearly the penalty. Our preparedness in no way compares with that of England, for she being a sea-going nation had the greatest navy in the world, and it is due entirely to her navy that she is to-day a nation. We should profit from the lessons of experience written in the blood of patriots across the sea. Europe slept in her fancied security. She awoke not to a nightmare but to a grim reality, a hideous leering monster of war that will find the sea no barrier to batter us defenseless when he has finished over there. In fact, the sea to-day offers less resistance than entrenched ground. It is too late, gentlemen, to install a fire department when the great buildings in your town are burning. It is too late to put an insurance policy on your house after it is destroyed.

We can not expect to be weak to-day in preparedness and hope to be strong to-morrow when the enemy lurks at our door. Adequate preparedness is an insurance policy against war and a vast saving in the ghastly consequences. We can not have peace just by wishing for it. We must be strong enough to demand it. "No war is inevitable until it occurs." If we can gain time, we can gain peace; but you can not gain time without adequate preparedness, moral and material, to make the proposed enemy hesitate before they strike against such formidable odds. War is the last protest in a series of ineffectual protests. The might of war is the only legal international tender of to-day. [Applause.] Why prepare? Our neighbor to the north is involved in war. Our warring neighbor to the south is more than friendly to our warring neighbor far to the west. Our President tells us that we are liable to be attacked simultaneously on both coasts. Gentlemen, to stand unarmed in the midst of armies is childlike simplicity.

What was the impelling cause that made the President in the early days of his diplomatic experience, in opposition to his own party, the Progressive Party, and the Republican Party, urge Congress to reverse itself and repeal the Panama free-toll act, and, that if they did not, he hardly knew how to handle the delicate diplomatic situation that might arise. What was back of the fiasco at Vera Cruz, when after demanding a salute of 21 guns, we slunk home, hooted by the picayunish nation as Gringoes, forced to be content with a salute of 5 guns. No man, and especially the President, could have thought it was weak, anarchistic Mexico that made us do that.

There was no motive in the Western Hemisphere, but from the East and from the West there came suggestions; and should he not take kindly to these suggestions, an eloquent finger pointed to a mighty array of preparedness. Had the President been as able in international questions as he undoubtedly is in economic ones he would have known earlier that whether we will or no our path inevitably converges to those of other nations. He would have known where the Mexican situation was leading. He would have known, as all other nations knew, that all that protects the Isthmus of Panama, Alaska, the Philippine Islands, Hawaii, and our protectorate over Haiti and Nicaragua is our potential, not our actual, power; and he would undoubtedly have taken the people into his confidence and told them the situation instead of telling them that there was no need of preparing. With the highest motives, hoping for the best, doubtless thinking that he could in some way handle the situation, he procrastinated in warning the people. Had he even warned them when a war broke in Europe we would to-day be in a position to maintain our neutrality, and his belated and frantic efforts for preparedness would be unnecessary. What was it that suddenly caused him to plead for preparedness? Gentlemen, it was the ghost that stalks abroad in Mexico and will not down, which, as President of the United States, had he been the leader he should have been, he should have known would not down when he was forced to humble the honor and pride of the United States by withdrawing from Vera Cruz.

The President stated in Kansas City on February 2, 1916: "I have not enough men to guard the Mexican border. I have not enough men to keep bandits from raiding our territory. The whole world is on fire." This was nothing new. It had been on fire a year and a half at that time, and apparently he had just discovered it. "If these flames," he continues, "creep in upon the United States, they may creep in on both coasts." And then he says, "You know that great sweep from the Isthmus of Panama to Alaska and that great distance from the Gulf of Mexico to the River St. Lawrence. There are many harbors and many cities open to attack"; and then he adds, "Do you think a Navy that ranks fourth is enough to guard that long expanse of coast?" That long, expansive coast was no longer February 2, 1916, than it was on April 21, 1914 (Vera Cruz fiasco), or in August, 1914 (outbreak of European war). The eleventh-hour warning of this once "too-proud-to-fight" but now "willing-to-knock-them-down-for-moral-influence" President exclusively in possession of all the facts that peril menances our western coast should give us pause, and tend to explain his sudden grasping of the submarine situation in order to crystallize the people's attention, eradicate from their minds the lessons of nonpreparedness he has been teaching them, while he secures belated preparedness in order that there may be some guaranty that at the close of the European war they will not turn loose their armies and navies on us.

If we have anything that Europe wants she will take it, unless we develop sufficient resistance to prevent her. The instrument will be ready, and ever in the background is an excuse in the Monroe doctrine by which we are irreparably bound to resist foreign aggression in the Western Hemisphere. To stand unarmed among the impoverished and hungry, but at the same

time highly prepared nations of Europe after the war is to invite spoliation. We have the wealth, they will have the armies and the navies, and it is folly to think they will not avail themselves of this opportunity. It is our duty as citizens in the present crisis, no matter how we got there or whose fault it is that we are there, to stand unflinchingly for the future safety of America. And I believe it the patriotic duty of the people's representatives, the crew of the ship of state, no matter how many and numerous protests come from the passengers, to steer that ship of state from the dangerous maelstrom of nonpreparedness. The 100,000,000 passengers, though now unconscious of the danger that lurks, but trustful of our seamanship, will not hold us guiltless when the time comes and, through nonpreparedness, the great suction of the vortex of war has gained control of our ship. The people's representatives should know the threatening clouds that round us hang, and they should move forward fearlessly in that course which judgment and honor prescribe. The people will approve when they understand the situation. The people's representatives should have vision, patriotism big enough and broad enough to give the country what it needs, regardless of whether it loses votes or not. They should go before and beckon. Given a starting point, it should be their business to reason to a conclusion. They should be driving into the minds of the people the situation as it is, not as we wish it were.

We are unprepared, gentlemen, not because we have no facilities but because we have no organization of those facilities. We have organizations of capital, we have organizations of labor, we have organizations of business men, but each are organized for selfish purposes. We have been wasteful, prodigal with our vast resources, and our thriftlessness has endangered the nobility of the Nation's soul. Our Army and Navy have been costly, extravagant, inefficient. We have spent more than any nation on the face of the earth but one, yet are worse prepared.

In the Spanish War we lacked enough colliers to escort our Navy. We lacked transports. We lacked even the most essential minor details of tents and uniforms and guns. Our present brush with a single Mexican bandit shows us, what has been perfectly well known to all our possible opponents, that our condition is one of hideous insecurity. We can not even have honest aeroplanes or honest submarines. Armor plate that costs the United States $616 was laid down in Russia in 1893 for $249. To cheat Uncle Sam is to cheat a gullible stranger, a ludicrous caricature, in nowise related to ourselves. To squander the public money is a crime only if it is discovered. But all this can to-day be no argument against our adequately preparing for imminent danger. If through adequate preparedness we could disarm the world, we would be willing to throw it all into the scrap heap and count the money well spent.

We are a great, spoiled, undisciplined, destructive Nation. A discontented and oppressed laboring class, an opulent profligate upper class, a universal distrust of class toward class, and of the individuals within that class, where the greed of envy is pitted against the greed of arrogance. On the one hand an unlawful property destruction, on the other commercial tyranny. The problem of to-day's preparedness is the amalgamation of our divergent forces into one spirit of patriotic defense of their common country. The loyalty of our citizens in a crisis has never been found wanting. Under the stern call of duty, in the school of sacrifice, patriotism and devotion flourish, but the warfare of to-day is waged with scientific engines of destruction, and in order to be prepared we must have in readiness these engines of war before the day of storm and shock. There will be no lack of men. The brain, the brawn of the Nation we can count upon by the millions. They will gladly come to the defense of their homes and country. All they ask is to be assured that our policy is one of defense not of aggression, and that their guns will not be turned upon their own class; that the expense of preparedness will be borne in proportion to the income of the individual or corporation; that military service will be an equal burden on rich as well as poor, and that it will not mean a military system that makes a lord of the officer and a slave of the private. Democracy and constitutional government is their slogan.

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. MEEKER. Mr. Chairman, I ask that the gentleman may have three minutes more.

The CHAIRMAN. The time can not be extended by unanimous consent.

Mr. STAFFORD. How much time does the gentleman desire?

Mr. SCHALL. I do not want to monopolize more than my share of the time, but there are many things that ought to be said.

Mr. STAFFORD. The time is limited, but I will yield to the gentleman five minutes.

The CHAIRMAN. The gentleman from Minnesota is recognized for five minutes more.

Mr. SCHALL. I thank you. Those who fear militarism through preparedness are incontrovertibly refuted by the disbanding of the great Union Army. That great Army, made up of the best stuff in the country, from all walks of life, conscious of the power they held within themselves, marched, with battered arms, torn flags, and faded uniforms, regiment by regiment through the streets of our capital, past the reviewing stand, and impatiently awaiting their discharge eagerly hurried back to their homes, leaving thoughts of war forever behind. An army of freemen fighting for their liberties can not be a menace to the Republic. The Navy can never menace its country. It can never be used save as defense. The fact that it is responsible to the people's representatives for its maintenance removes the idea of militarism. Our aim should be the best Navy we can get. Where there is no supremacy there is no glory, nor is there security, when the nation with the superior navy is using it to flout and humiliate us. One hundred years ago England was pursuing exactly the same tactics of insufferable presumption. She boarded our vessels, she removed our sailors, she disregarded our protests, till the United States was forced to go to war. To-day that same issue looms threateningly. Our trade is being filched from us by pilfered mails, by infamous orders in council, each more humiliating and exacting than the last. She invades the territory of our merchant and transport ships, while we sit impotent and baffled, unable and unready to defend our rights. Notes and protests only make us ridiculous unless we have the power to back them up. [Applause.] Shall our beautiful Capitol again go down in ruin as it did in 1814? Our Navy is the only argument that will avail, now or at the end of the war, to get us respectful hearing. To-day all over the world our policy is derided, and we are laughed at as a nation of women. If the first arm of defense is powerful we shall not have to humbly implore nor suffer humiliation in silence. If we are to guard within our thousands of miles of coasts, our priceless inheritance, the third of the wealth of the world, we must do something besides talk. Talk will not cut down any of the years it takes to build a Navy. They talked and talked and talked before the Revolutionary War, but there came a time when all talk culminated, and it took George Washington and his brave army of farmers seven years to put us in a position where we were able to talk with effect and say that taxation without representation is tyranny. We talked and talked and talked before the Civil War. But there came a time when talk would no longer avail. For four long years the red tide of carnage swayed to and fro, brother against brother, friend against friend. But the end came at last, when Gen. Grant extended his hand to Gen. Lee and said, "Let us have peace." Then and not till then were we able to talk and say that a State shall not wreck a Union. And war became a Pentecost from which a national spirit descended upon us.

We should be more than human if in the life of our Nation there did not come times when talk and treaties would not suffice. We should be prepared to guard American lives and American rights everywhere, during the war and at the close of the war we should be in a position to advance the American ideal—ideals that can not be purchased in the market place. [Applause.]

Our pressing duty is to organize our undisciplined democracy, our reserve strength, to preserve our security and honor. Why should we be penny-wise and dollar foolish over preparedness? What shall it profit a nation to gain the wealth of the world and lose her own soul? The antithesis of freedom, as we understand it, will prevail in Europe, whoever wins. The question is, Can we organize our undisciplined democracy to match the discipline of absolutism? Brotherly thoughts and good intentions in a mob will not avail against organization. Defeat is inevitable, everything else being equal, when the undisciplined nation is pitted against the disciplined. Warfare of to-day is a fight between the resources of nations, from top to bottom, from the mightiest manufacturer to the least considered atom of economic resource, it is the struggle between the organized genius of combating nations. This must be our lesson from the war. If we fail to learn it, even the preserved from warfare, we shall cheat ourselves of this mightiest lesson of the twentieth century. And we must inevitably perish as a democracy before that nation which having best learned its lesson shall prevail. Individuals can not save us, nor individual unselfish-

ness. The reaction must go to the very essence of our Nation. It must work through and transform the whole mass. We are individually patriotic, but we are not collectively patriotic. We must have one thought, one soul, one heart for America and the ideals she represents.

New dangers, new problems, confront us. They must be met by a close-knit, high, and true devotion to duty and to humanity. The bristling dangers that surround us should inspire a national soul of patriotism and quicken our national life to something more than lukewarm insipidity, half selfish, half indifferent. Words oft mouthed till they mean nothing must be flamed into life again till no man can say "my country" and "my flag" without a thrill of loyalty to that flag and that country which means all there is of human freedom, human equality. [Prolonged applause.]

The CHAIRMAN. The time of the gentleman from Minnesota has again expired.

Mr. SCHALL. I ask permission, Mr. Chairman, to extend and revise my remarks.

The CHAIRMAN. The gentleman asks unanimous consent to revise and extend his remarks. Is there objection?

There was no objection.

MESSAGE FROM THE SENATE.

The committee informally rose; and Mr. SHACKLEFORD having taken the chair as Speaker pro tempore, a message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had agreed to the report of the committee of conference on the disagreeing votes of the two Houses on the amendments of the House to the bill (S. 4856) entitled "An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors."

The message also announced that the Senate had passed without amendment bill of the following title:

An act (H. R. 14771) granting the consent of Congress to commissioners of Charlton County, Ga., and Nassau County, Fla., to construct a bridge across the St. Marys River.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

The committee resumed its session.

Mr. HOWARD. Mr. Chairman, I yield 15 minutes to my colleague from Georgia [Mr. CRISP].

The CHAIRMAN. The gentleman from Georgia [Mr. CRISP] is recognized for 15 minutes.

Mr. CRISP. Mr. Chairman, I am going to do the unusual thing in general debate, to really discuss the measure before the House. [Applause.]

I do not arrogate to myself the ability to change the opinion of any of the old Members of this House on this much-discussed half-and-half question, for they are thoroughly familiar with it. They will recall how the Washington press during the last Congress abused, reviled, and ridiculed me because I had the temerity to introduce a bill to repeal this half-and-half proposition, for I believed then, as I do now, that it is unfair to the people of the United States. They will remember how intemperate the local taxpayers were toward those Congressmen who favored the repeal of this law and that their attitude became so intolerant that Congressman Prouty, of Iowa, on December 22, 1913, introduced House resolution 358, providing for an investigation of their conduct, claiming their attitude was an attempt to intimidate Members of Congress, to prevent them from performing their public duty. The preamble of said resolution read as follows:

Whereas on Saturday, December 20, 1913, there appeared in the Washington Times, a paper published in the city of Washington, and having a very large circulation throughout the United States, in an article headed in large type clear across the front page, the following:

"NATION-WIDE FIGHT ON CRISP BILL BACKERS—DISTRICT CHAMPIONS UNITE IN EFFORT TO PREVENT REELECTION.

"Plans for a concerted fight against the reelection of the Members who voted for the measure are already under way. Their respective districts will be flooded with letters protesting against their unpatriotic stand toward the National Capital. Voters throughout the country will be appealed to in the hope that Congressmen will be urged to take the welfare of the District at heart and aid in making the Capital City of the United States the queen metropolis of the world. Members of the executive committee of the joint committee of Chamber of Commerce, the Board of Trade, and the Retail Merchants' Association have been notified by Chairman William H. Singleton, of the committee, that they must be ready at a moment's notice to answer a call to meet and determine on some concerted action immediately."

The resolution was by a vote of the House referred to the Committee on Rules and no further action taken on it. On the floor of the House I asked that no investigation be made, stating I could take care of myself, and the threats of the local people would not deter me from doing my duty as I saw it.

The repeal of this act of 1878 was discussed at length in the last Congress, and I have found, during my short experience here, that when a Member has made up his mind on a legislative proposition it is generally like the law of the Medes and Persians, which changeth not. Therefore in debating this measure I am directing my remarks to my new colleagues, and I hope I may be able to throw some light on it, so as to help them in arriving at a conclusion as to how they should vote. It is not my purpose or intention in this speech to speak for home consumption. It is with the sincere desire to try to convey to my colleagues some information, hoping that they will see the matter as I see it, and vote to repeal this half-and-half proposition, which, to my mind, is utterly unjustifiable, and entails inequitable tax burdens on your constituents and mine.

Now, if we believe the Washington papers, this half-and-half proposition is a holy of holies. It is more sacred than the Declaration of Independence, the Bill of Rights, or Magna Charta itself, and I am sure my new colleagues, even before they came to Washington and took the oath of office as Congressmen, very frequently received the Washington Star, full of the beauties of the half and half, arguing why it should not be repealed, for the local people will do all in their power to retain this law.

Mr. Chairman, it is plain why the property owners of Washington are so anxious to prevent the repeal of the half and half, for they are perfectly willing, aye, even quite anxious, for the people of the United States to bear half their tax burden, which they will be forced to do as long as the half-and-half act remains the law. I earnestly favor repealing this inequitable and unfair law, and I am confident this Congress will repeal it.

Now, what are the facts as to the government of the city of Washington? The National Government acquired the District of Columbia in 1800, and from 1802 to 1871 the affairs of this city were managed by a mayor and aldermen, just as the municipal affairs of Baltimore or New York or any other city in the United States are managed, and the Supreme Court of the United States, in the case of the Metropolitan Railroad Co. against The District of Columbia, expressly stated that the Government of the United States exercised no authority or control over the internal affairs of the District of Columbia.

We read in Holy Writ that Esau sold his birthright for a mess of pottage, and I have often thought history repeated itself when the citizens of Washington gave up their inalienable birthright as American citizens, to manage and control their own local affairs, for a mess of pottage, getting the Federal Treasury to pay part of the taxes for the maintenance of the District of Columbia. I am willing as a Member of Congress to vote to allow the people of the District to pay their own bills, manage their own affairs, and to give them representation in the Halls of Congress.

In 1874 Congress was told that the tax rate on the property owners of Washington was exorbitant and confiscatory, and that the city was bankrupt, and that, as it was the National Capital, Congress should come to its relief. Permit me to say in passing that from 1802 until 1874 Congress yearly appropriated millions of dollars to the District of Columbia; but there was no fixed law requiring it to pay any particular proportion of the expenses, but Congress was liberal in its appropriations. Since the act of 1878 Congress has donated to the city government of the District of Columbia over $110,000,000, besides the many millions spent by the Government in the District erecting and maintaining Government buildings. In 1878 Congress passed what is called and known as the organic act for the District of Columbia, and under that act the Federal Government was to pay half the expenses of the maintenance and operation of the government of the city of Washington. Congress passed this act because Congress was of the opinion that the taxable property in the District of Columbia at that time was not sufficient to run the affairs of the government without inflicting undue hardships or burdens upon the taxpayers.

When the act of 1878 was passed Washington consisted of 6,110 acres, 3,606 of it already laid out in streets and mostly paved, and the Government only owned 1,523 acres of the 6,110, the Government land being practically all in parks, and the citizens of Washington derived the greatest benefit from Government parks. Now, under the terms of the act of 1878 the people of the United States are being made to bear half the expense of developing and caring for 44,316 acres of land, of which the Government owns but 5,550 acres, practically all of this being in parks. It is a very different proposition, making the people of the United States bear half the burden of maintaining Washington in 1878 to caring for and developing the whole of the District, which they are now required to do.

In 1878 Washington had about 150,000 people; now it is a city of 350,000 people, and the taxable property is many millions more than it was in 1878. In 1878 the city had a bonded indebtedness of many millions; now its bonded indebtedness is about six millions, less than the bonded indebtedness of any city in the

United States anywhere near its size. Conditions now are very different to what they were in 1878, and Washington citizens and property owners are fully able to pay the expenses of the maintenance of their city government without being taxed higher than the citizens of other cities, and it is nothing but equitable and right that they should do so. It is unjust that the citizens of other States should be taxed to maintain their own cities and then pay an additional tax to lessen the tax burden on the favored property owners of the Capital City. When the act of 1878 was passed it provided that all property in the District of Columbia, real estate and tangible and intangible personal property, should be taxed at the rate of $1.50 per hundred. You have heard much of the crime of attempting to repeal, modify, or change this sacred organic act. Some of my colleagues may be surprised to know that in 1902 Congress passed a law, and passed it on the District appropriation bill, modifying and changing this sacred organic act by providing that real estate should be taxed at only two-thirds of its value instead of its full value, and intangible personal property and articles of personal adornment should be absolutely exempt from all taxation; and I will venture my head that you did not hear any cry or complaint from the Washington papers or the Washington people about changing the sacred organic act in that respect, for it again lessened their taxes.

Mr. TINKHAM. Mr. Chairman——

Mr. CRISP. Mr. Chairman, I must decline to yield until I finish what I desire to say. Then, if I have any time left, I will be glad to answer the gentleman or any other gentleman to the very best of my ability. My friend the gentleman from Kansas [Mr. CAMPBELL] spoke about legislating on an appropriation bill, and how outrageous it was to interfere with or change this sacred organic act by legislation on an appropriation bill. It may interest some of my colleagues to know that they will find in volume 32 of the Statutes at Large the District of Columbia appropriation bill, approved July 1, 1902, about 14 pages of legislation relating to taxation of real estate—reducing the assessment to two-thirds valuation—in the District, dealing with the taxation of personal property and exempting intangible personal property from all taxation, and providing sundry other tax exemptions. You will find the legislation deals with the whole system of license taxes in the District and with many other subjects foreign to an appropriation bill. But that legislation was, in the main, favorable to the taxpayers of the District, and you heard no complaint.

Now, Mr. Chairman, when the sacred organic act was passed a tax was levied on real estate and on tangible and intangible personal property, but as time went on and the taxable property grew larger and larger, even at this low rate of taxation, the taxes collected from the District of Columbia, plus an equal amount to be contributed by the Federal Government, aggregated more than could be expended. I must compliment the owners of the Washington papers and the real estate speculators for being shrewd and far-seeing men. They knew that if this condition continued the people of the United States would not stand for being annually forced to pay many millions of dollars for the maintenance of the city government of Washington when the amount raised from local property owners in the District at a low rate amounted to more than they could use and allowing the surplus of the District half to pile up in the Treasury to the credit of the District, so something had to be done. In my judgment, this was a good time for Congress to have legislated in the interest of all the people of the United States by reducing the proportion of expense the people of the United States should pay for the maintenance of the affairs of this District; but instead of doing this Congress further favored the property owners of Washington rather than the toiling tax bearers of our country, for by the act of July 1, 1902, the sacred organic act of June 11, 1878, was amended by providing that real estate should be taxed at 66⅔ per cent of its value instead of its full value and that intangible personal property, such as money, notes, mortgages, and so forth, should not be taxed at all, thus largely reducing the amount of taxes to be collected from Washington property owners. This reduction of taxes to the local people in no way curtailed the expenditures of the government of the District, for the Federal Treasury supplied an annual donation sufficiently large to meet all requirements.

Gentlemen of the committee, you will bear in mind that in Washington there is only one tax levied, which is the city tax. They have no State and county taxes, as we have in all States of the Union. So when they pay one tax that is the only tax they do pay. I have some figures that were furnished me by the United States Census Office, which I used in a speech here about two years ago; I do not think there has been any change since then, and I will take the liberty of calling the attention of my colleagues to these comparative figures, showing what taxes the citizens of the United States pay in cities of approximately the size of the city of Washington:

	Nominal tax rates.			Total.	Reported basis assessment.	Reported true tax rates.	Rate per hundred.
	City.	County.	State.				
					Per cent.		
Detroit	$19,832	$1,454	$2,204	$23,580	100	$23,580	$2.35
Milwaukee	11,468	3,425	985	15,878	90	14,290	1.42
Cincinnati	11,430	2,959	451	14,840	100	14,840	1.48
Newark	13,760	4,076	2,564	20,400	100	20,400	2.04
New Orleans	22,000	.....	6,450	28,450	75	21,338	2.13
Washington	15,000	.....	.....	15,000	66⅔	10,000	1.00
Minneapolis	23,460	2,950	3,580	29,990	50	14,995	1.49
Jersey City	13,860	5,550	2,590	22,000	100	22,000	2.20
Indianapolis	15,900	2,615	3,185	21,900	60	13,140	1.31
Louisville	17,900	2,800	5,000	25,700	70	17,990	1.79
Atlanta	12,500	.....	5,000	.....	60	.....	.....

Mr. SISSON. Mr. Chairman, does the gentleman object to an interruption?

Mr. CRISP. I stated that I preferred not to be interrupted.

Mr. SISSON. I only wanted to ask this question, to make it more clear to myself and other Members: Does the gentleman include in that rate the State and county taxes?

Mr. CRISP. I do.

Mr. SMITH of Minnesota. Will the gentleman yield?

Mr. CRISP. Yes.

Mr. SMITH of Minnesota. The gentleman says the Minneapolis rate is 1.49 on the 50 per cent valuation?

Mr. CRISP. Yes, sir.

Mr. SMITH of Minnesota. The Minneapolis rate, including county and State taxes, is 3.6.

Mr. CRISP. Mr. Chairman, you will see from a comparison of these figures that the property owners of the city of Washington have a smaller tax rate on their real estate and tangible personal property—intangible personal property bears no tax, as it does in about all the States—than any other city of approximately its size, and that the property owners in the city of Washington are of all these cities the most favored.

Mr. LLOYD. Mr. Chairman——

Mr. CRISP. Mr. Chairman, I shall have to decline to yield until I complete my statement.

Mr. LLOYD. The tax in the District of Columbia is $1.50, is it not?

Mr. CRISP. The tax rate is $1.50, but under the law I have just quoted real estate is assessed at only 66⅔ per cent of its true value, which makes the tax rate but $1 on the actual value. I have stated that the figures I quoted, giving the tax rate of other cities, showed the rate of tax on the full value of the property, so the Washington rate is only $1 on the hundred.

Mr. Chairman, when it was first suggested that the half-and-half act should be repealed the advocates of the law contended that the tax rate of Washington was confiscatory and greater than that of the taxpayers of other cities. This claim has been overwhelmingly disproved; therefore the beneficiaries of the bounty from the Federal Treasury residing in the District were driven to the extremity of seeking some other reason why the act of 1878 should remain. They then contended that a per capita tax on the property owners of Washington was larger than any other city. I take the liberty of quoting some figures on the subject used in a speech on the floor by Congressman BEN JOHNSON of Kentucky, which are as follows:

Per capita expenditures.

CITY.

GROUP II.

Milwaukee	$25.38
Cincinnati	37.47
Newark, N. J	36.80
New Orleans	24.94
Washington, D. C.	35.45
From local revenues	18.79
From Federal subsidy	16.66

GROUP III.

Minneapolis	33.50
Seattle	44.83
Jersey City	22.33
Kansas City, Mo	41.48
All nine cities	33.33
All cities over 30,000	32.59
Cities of Group I	37.56
Cities of Group II	39.99
Cities of Group III	28.92
Cities of Group IV	24.15
Cities of Group V	22.87

Mr. LONGWORTH. That is the per capita tax?

Mr. JOHNSON of Kentucky. That is the per capita tax. Now, your city of Cincinnati pays per capita $37.47. Washington has a per capita tax from its local revenue of only $18.79.

These figures show that while the per capita tax in the District of Columbia, according to expenditures, approximates that

of other cities in the same group with it, the burden borne by the citizens of the city of Washington is just about half of the per capita tax of other cities, for the Federal Government pays half of the per capita tax in Washington, so this claim fails.

Mr. Chairman, I will not argue this phase of the question longer, but if anyone cares to pursue it further, if they will do me the honor to read a speech I made in the House on December 16, 1913, on this question, they will see that the repeal of the half-and-half act will work no hardship or injustice upon the property owners of Washington, but its repeal will be doing justice to the citizens of the United States and relieve them from a tax burden which they ought not in good conscience to be forced to bear.

In the last Congress I introduced House bill 9417, entitled "A bill to repeal the act of June 11, 1878, known as the half-and-half act." The Committee on the District of Columbia reported the bill favorably, whereupon for days all four of the Washington papers ridiculed me, and mass meetings were held over the city denouncing me, and Congress was urged to retain the half-and-half act. When the District appropriation bill was before the House for consideration an amendment was offered repealing the half-and-half act, and after debate the House, by a vote of 186 to 100, favored the repeal of the act. (See CONGRESSIONAL RECORD of Dec. 14, 1914, p. 178). The Senate refused to concur in the amendment, though twenty-odd Senators favored the repeal, and when the bill came back to the House I urged the House to remain firm and let the bill fail, rather than to recede from our position repealing this act. In a few days Congress was to adjourn, for it expired by law on March 4, and our leaders urged that a compromise be made, that a commission be appointed to investigate the fiscal relations between the District and the United States, and to report to this Congress. The leaders of the respective parties in the House, Messrs. UNDERWOOD, FITZGERALD, MANN, and others, urged that this compromise commission be accepted, and finally, by a vote of 165 to 151 (see CONGRESSIONAL RECORD of Feb. 27, 1915, p. 4865), Congress appointed the joint commission. This commission consisted of Senators CHILTON, SAULSBURY, and WORKS, and Congressmen RAINEY, GARD, and COOPER. Certainly, Mr. Chairman, this commission was impartial, for an examination of the votes on the half-and-half proposition will disclose the fact that neither of them ever voted to repeal the half-and-half act. This commission was composed of patriotic, able, learned Members of Congress, and they entered upon the duty assigned them with a determination to do equity and justice to the people of the District and of the United States. They had hearings for 60 days, and after careful consideration of the testimony, unanimously reported to Congress that the half-and-half provision, or the sacred organic act of June 11, 1878, should be repealed. The bill before the House carries into effect the recommendation of this joint committee to repeal the act of 1878, and, Mr. Chairman, it is with great satisfaction that I realize that this Congress will repeal this act of 1878, and thus correct a wrong that has existed for many years, and relieve your constituents and mine from an unjust tax burden, and at the same time inflict no hardship upon the local property owners.

Mr. Chairman, the local people say because the Government owns property here they should pay half the taxes, and I am thoroughly persuaded they are quite willing for your constituents and mine to pay all of their tax burdens. Addressing my colleagues from the Western States, let me ask how can you justify to your constituents burdening them to pay half the taxes of the District of Columbia, because the Government owns a small amount of property here, when the Government owns millions of acres of land in your States and does not pay 1 cent to your States, counties, or cities as taxes. How can my colleagues from any of the States justify such a thing, when you know the Government pays not 1 cent of tax on the valuable public buildings and other property in your State or mine? It may interest you, my colleagues, to know that practically none of the foreign Governments of the world pay any taxes to the municipality of their capital city on account of property owned therein. This statement may be verified by reference to Senate document 163, Sixty-third Congress, third session, which is a report from the various United States ambassadors and ministers to foreign countries, advising our State Department regarding this identical subject. No State in the Union contributes from its treasury the people's money toward maintaining the city government of its capital city because the State owns property therein, and to my mind no equitable reason exists why the Nation should do so. Gentlemen from prohibition constituencies, do you know when you vote for the half-and-half act you are giving the District of Columbia a premium of $1,500 out of the Treasury of the United States for every barroom established within the District? Such is the case, for the whisky license here is $1,500, and whenever the District sells a license $1,500 is raised in revenue, and under the half-and-half act the Federal Treasury must contribute a like amount to the District, so each whisky license sold in the District yields to the municipal government $3,000, fifteen hundred contributed by the owner of the bar and fifteen hundred by our constituents, and the United States gets for the license only $25.

I must bring these remarks to a close. But for the selfishness of it, it would be pathetic the way the Washington press and property owners are begging for the retention of the half-and-half act. A few days ago there appeared in the Washington Post an editorial, calling upon the President to veto the Army preparedness bill because it had a provision in it to spend $20,000,000 outside of the District of Columbia to erect a nitrate plant, to extract nitrogen from the air, to be used by the Government in the manufacture of powder, and the surplus nitrate to be sold to the great producing classes of our country for fertilizers. From a Washington viewpoint this expenditure is outrageous, while I consider it one of the best provisions of the bill, for it will aid our farmers by giving them cheaper fertilizers.

Let me again contrast the Washington viewpoint. Mr. HULBERT, of New York, introduced a bill to take from the people's Treasury one and a half million dollars to improve Potomac Flats by building a stadium for the college athletes to hold revelry, run foot races, and engage in athletic sports, and the Washington papers and Washington people urge its passage, and I will guarantee that any Congressman who will vote for the bill will be heralded in the Washington papers as a statesman, broad visaged and patriotic; if any Congressman has the temerity to oppose the expenditures of any money from the Federal Treasury for any object to be created in the District of Columbia he is proclaimed provincial, narrow minded, and unpatriotic.

A few days ago our beloved Speaker, Hon. CHAMP CLARK, stated in substance on the floor in discussing the flood-control bill:

> If you will spend every dollar in the Treasury of the United States in the District of Columbia the local press and people will approve it, but if you seek to authorize the erection of public buildings in your district or mine, or try to improve the navigable streams of our country, or seek to lessen the cost of transportation from the farms to the towns by building good roads, the local press will cry out "Pork-barrel statesman."

Mr. Chairman, I would not do the citizens of Washington an injustice. I do not want to inflict upon them any unjust or harsh taxes. They are citizens of our beloved country and are entitled to the same rights and privileges that the citizens of your State and mine are entitled to, and they should receive from the Government exact and impartial justice—no more and no less. I believe the Federal Government should compensate the District of Columbia for all benefits it receives from it, and under the bill before the House it will amply do so.

I have done all I could, in my humble way, to bring about the repeal of this so-called sacred half-and-half act because I believe it unjust to the people of the United States and confers special privileges on the citizens of the District. It is with gratification that I find myself vindicated by the able joint commission, and it is to me a source of happiness that this Congress will repeal the act of 1878. I am pleased. For by its repeal no injustice is done the local property owners, and justice, though tardy, will at last be done your constituents and mine.

Mr. PAGE of North Carolina. Mr. Chairman, I yield to the gentleman from Texas [Mr. DIES].

Mr. DIES. Mr. Chairman, I ask leave to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. PAGE of North Carolina. I yield to the gentleman from Texas [Mr. STEPHENS].

Mr. STEPHENS of Texas. Mr. Chairman, I ask leave to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. STAFFORD. Mr. Chairman, in the absence of the gentleman from Minnesota, I yield 25 minutes to the gentleman from Wyoming [Mr. MONDELL].

Mr. MONDELL. Mr. Chairman, for a number of years past there has been a considerable amount of discussion relative to the wisdom of the arrangement under which the Federal Government has since the seventies paid one-half of the expenses of the District of Columbia. So much opposition developed in Congress to what is known as the half-and-half plan that on March 3, 1915, a joint select committee was appointed with duties and responsibilities as follows:

> That a joint select committee shall be appointed consisting of three Senators to be named by the Presiding Officer of the Senate and three Members of the House to be named by the Speaker of the House of Representatives, whose duty it shall be to prepare and submit to Con-

gress a statement of the proper proportion of the expenses of the government of the District of Columbia or any branch thereof, including interest on the funded debt, which shall be borne by said District and the United States, respectively, together with the reasons upon which their conclusions may be based.

The report of that committee made some time ago is very definite in two essential features. One with regard to the payment of the interest on the funded debt of the District of Columbia, and the other a recommendation as to the attitude that Congress should assume toward the District in the future.

The Committee on Appropriations has seen fit to bring into the House legislation in connection with the District bill which the majority of the members of the committee claim or assume, carries out the recommendation of the joint committee.

In the first place, the bringing of legislation of this importance into the House on an appropriation bill is a very questionable procedure. There is a committee directly charged with responsibility in matters of this kind, presided over by the able and amiable gentleman from Kentucky, composed of Members of the House selected on account of familiarity with municipal matters, and certainly thoroughly able and qualified to legislate or at least to advise the House.

I do not think the Committee on Appropriations is altogether to blame for bringing in this legislation. The Committee on the District of Columbia, in my opinion, should have very promptly, after the submission of the report of the joint select committee, busied itself with legislation proposed and intended to carry out, if in the wisdom of the committee they should be carried out, the findings and conclusions of the joint committee.

The Committee on the District of Columbia, so far as I know, has not, up to this time, taken up that matter systematically with a view of bringing in legislation. At least they have presented nothing to the House, although several months have elapsed since the report was made, and the time has come to make up the District appropriation bill. The Appropriations Committee was confronted with this situation—the view expressed in the House by at least a large minority if not a majority was that the old fiscal relations were not satisfactory or at least were not wise under present conditions.

The first question naturally was, How were the bills to be paid? Were we to continue under the old system, when a joint committee of the House and Senate had recommended a modification; and if not, what was to be done? Under these circumstances it will be urged that the Committee on Appropriations can be very greatly blamed for assuming responsibility for legislating, although even under those circumstances the bringing in this important legislation by the Committee on Appropriations is not, in my opinion, fully justified. Having assumed responsibility for this legislation, the committee brought in legislation which does not, in my opinion, harmonize with either the letter or the spirit of the report of the joint commission. Certainly it does not harmonize with the spirit of that report when you view the legislation in conjunction with the items of the bill and the appropriations which it carries. So far as the interest on the bonded debt is concerned, this legislation flies squarely in the face of the report of the joint commission. The Committee on Appropriations has assumed to know more about that than the joint committee did.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. MONDELL. Yes.

Mr. COOPER of Wisconsin. It also flies squarely in the face or two decisions of Comptroller Downey, of the Treasury Department, on that exact proposition.

Mr. MONDELL. That is undoubtedly true.

Mr. PAGE of North Carolina. Will the gentleman yield?

Mr. MONDELL. Certainly.

Mr. PAGE of North Carolina. Neither the gentleman from Wyoming or the gentleman from Wisconsin were present during the brief remarks I made on the bill this morning. At least I assume they were not, because I stated emphatically that when we reached the sinking-fund item I should introduce an amendment, already prepared, stating directly that one-half of this amount should be paid from the District revenues and one-half from the money in the Treasury not otherwise appropriated. I also stated that in the first provision of the bill on the first page where the exception is made in line 11 I proposed to strike out the word "and" and insert the word "except."

Mr. MONDELL. I did not hear the gentleman's statement, but I am glad to know that he contemplates offering the amendment he now suggests. The very fact that such an amendment is now offered, before we begin the consideration of the bill, radically changing and modifying the legislation which the subcommittee presented to the committee and the committee to the House is proof sufficient, it seems to me, that the committee did not give the matter proper consideration at the time it took it up.

Mr. PAGE of North Carolina. Will the gentleman yield?

Mr. MONDELL. In just a moment. I know that the subcommittee is qualified, I know that the full committee is qualified, to legislate on this or other subjects, therefore when a committee makes such a blunder as to bring in a proposition which it proposes to amend before it is presented, it is proof certainly not of a lack of capacity on the part of the committee, but of a lack of consideration of the subject.

Mr. PAGE of North Carolina. Will the gentleman yield for one moment?

Mr. MONDELL. I do.

Mr. PAGE of North Carolina. I want to say in that connection that the view of the subcommittee in framing this paragraph was that it is merely a bookkeeping matter, and I think, if I were to take the gentleman from Wyoming or the gentleman from Ohio or the gentleman from Wisconsin into the committee room, I could convince him in 15 minutes that is true; but I want to confess that I despair of convincing the House in the brief time given in this discussion that it is a mere bookkeeping matter, and to remedy the objection in the minds of gentlemen I now say I will offer this amendment.

Mr. MONDELL. Well, some very extraordinary things have been done in the world as a matter of bookkeeping. We have had a beautiful, illuminating illustration of that, or had some time ago, in the methods of bookeeping by the Secretary of the Treasury, where by the application of peculiar bookkeeping he added some forty or fifty million dollars to the net reserves of the Federal Government, made the Federal Government richer by fifty or sixty million dollars, as I recollect, by the legerdemain of fancy bookkeeping. Still to the average man, the ordinary individual, it may seem more than a matter of bookkeeping to decide whether or not one party has to pay all of $6,000,000 debt, and the interest thereon, or whether it is to be divided between two parties. While to the ordinary individual it may be more than a matter of bookkeeping, I will grant you that a gentleman who can accept as a matter of bookkeeping forty, fifty, or sixty million dollars added to the sum in the Federal Treasury is peculiar in his views, and he can accept almost anything as a matter of bookkeeping. Most of us look upon it as more than a matter of bookkeeping. However, the committee has seen the error of its ways even before it reached the discussion of the legislation, and now proceeds to attempt to square itself by an amendment, which does, as a matter of fact, meet with the approval of all of us.

But that is only one feature of the report of the committee. The very important feature—but before I go to that I want to make this suggestion with regard to legislation on an appropriation bill. It is a most objectionable and dangerous way to legislate, as we all know, as those who have written the rules know, and therefore prohibited it. Such legislation becomes particularly objectionable presented under a special rule. Dangerous as such legislation is, when it is enacted, as it frequently is practically by unanimous consent, it is even more dangerous when made in order by a rule. The fact that the majority of the Committee on Rules favor making the legislation in order, the fact that in the vote on the rule the support of the rule in itself carries to a certain extent an approval of the legislation, you bring about a situation under which at least the majority side is practically pledged to the legislation before it has been discussed at all. Under conditions that exist here all Members do not hear the discussion of measures and a man may become pledged to a piece of legislation through a vote to make it in order and never thereafter discover the error of his judgment, because he does not hear the discussion of the matter. He simply follows the lead that is thus given him before he understands anything about the virtue or the lack of virtue of the proposition thus made in order.

Now, a very important part of the report of this joint committee is the last paragraph of its report. Personally I have regretted somewhat that the committee, composed of able men, could not have found some basis for a definite determination of the percentages of the cost of the District to be borne by the District and by the Federal Treasury, respectively. But personally I am anxious to follow that committee so far as I can in good conscience and this legislation taken in connection with and interpreted by the bill, of which it is a part, does not carry out the spirit of that joint report which is set forth in the last paragraph as follows:

> Our unanimous conclusion is that the rate of taxation in the District should be fixed and certain; that the Congress should pursue a definite policy of regular and liberal appropriations, having in view not only the permanent moral and physical advancement of the city, but also its preeminent beauty and grandeur as the municipal expression of the Nation's home and its peoples' pride.

Now, I leave it to any Member of the House on either side if this bill, reducing as it does the estimates submitted by

the commissioners by over two and one-half million dollars, leaving out as it does many items urgently urged by the commissioners, trimming many other items to the bone, if this bill thus put together and presented to the House in anywise expresses the view of the joint committee "that Congress should pursue a definite policy of regular and liberal appropriations having in view not only the permanent moral and physical advancement of the city but also its permanent grandeur as a municipal expression of the Nation's home and the people's pride." This, the first bill presented under the new plan proposed by the joint commission, as interpreted by the majority of the Committee on Appropriations, realizes what some of us have feared would happen when we depart from a definite provision as to the respective share of appropriations to be paid by the District on the one hand and the Federal Government on the other. What we feared was this: That first an agitation would be started for increasing the revenues of the District in an unreasonable and in an unwarranted way. The gentleman from Georgia has just voiced that idea. The very first argument made here on the bill is to the effect that the District does not pay taxes enough; that the people of the District are tax dodgers and are escaping the payment of such sums as they should pay toward the maintenance of the government. This in face of the fact that the joint committee expresses its opinion in the paragraph that I have just quoted to this effect:

Our unanimous conclusion is that the rate of taxation in the District should be fixed and certain.

And further in other parts of the report they express the opinion that the people of the District have been paying reasonable sums for the maintenance of the District government.

Mr. PAGE of North Carolina. Mr. Chairman, of course the gentleman realizes that there is nothing in this bill affecting either the assessment or the rate of taxation?

Mr. MONDELL. I realize that. I have not suggested that there was.

Mr. PAGE of North Carolina. Now I will ask a question in order to furnish the gentleman information, namely, if he knew this bill carried $591,000 more than the bill as reported to this House from the Committee on Appropriations last year, in view of his statement as to its illiberality?

Mr. MONDELL. What the gentleman states may be true, but, if the gentleman will recall, I expressed the same opinion with regard to the bill of last year that I am expressing with regard to the bill now before us. It was illiberal to the last degree. It neglected important improvements and betterments which this city needs. It refused betterments and improvements that the city of Washington should have if it were not the Capital of the Nation, and improvements and betterments the importance of which were emphasized by the fact that Washington is the Capital of the Nation. That was my first fear, that if we departed from the rule of a definite apportionment there would be a constant and never-ending insistence upon an increase of tax burdens. I do not say, because I am not sufficiently informed to say, that the present tax rate and the present tax levy is just what it ought to be in the District, but certain I am that you could not greatly increase the assessment and the levy in the District of Columbia without doing injustice to its people.

Now, second, what I have feared and what has been demonstrated in this bill is that if we depart from a fixed rule of apportionment of expenditures, the Appropriations Committee will be constantly tempted, as this committee has been, to keep the expenditures just as low as possible, without much reference to the real needs of the city and the District. In other words, I fear that without a fixed rule of apportionment of expenditures as between the city and the Federal Government, we will fail to obtain that "definite policy of regular and liberal appropriations" which the joint committee laid down as the first essential of satisfactory conditions in the District. In the time that I have it will be entirely impossible for me to go over in detail the items of the bill.

The CHAIRMAN. The time of the gentleman has expired.

Mr. DAVIS of Minnesota. Mr. Chairman, I ask unanimous consent that the gentleman may have five minutes more.

The CHAIRMAN. Is there objection? [After a pause.] The Chair hears none.

Mr. MONDELL. I shall not have time to go over in detail the items estimated for by the District Commissioners that have been entirely eliminated, or the numerous items in the bill in which the estimates have been, I was going to say, scandalously scaled; but I will say unjustifiably scaled.

There are a number of improvements badly needed which the people of the District have been asking for for years. The city needs, and needs badly, a better and systematic improvement of the water front of this city. We need that improvement for the benefit of the people of Maryland and Virginia, on the Potomac and Chesapeake, who so largely contribute their produce to feed the people of this District. It is needed on behalf of the people of the District in order that the cost of living may be reduced by making it cheaper and easier to discharge the produce of the neighboring States and have it cared for until transported to the markets of the District.

A bill that reduces by half a million dollars the estimate for school buildings in a city like this can not be justified unless the committee brings in an indictment against the District Commissioners to the effect that they are extravagant in their estimates beyond all conscience. If the District Commissioners so poorly understand and so misinterpret the needs of this District for schools that they bring in estimates of $500,000 in advance of the needs of the District, some one ought to start an inquiry relative to their capacity. As a matter of fact, I assume the estimates were not too high. In my opinion, they included very few items that should not have been provided for.

This city needs a city hospital. It needs a new municipal lodging house, and needs it badly, as everyone knows who has visited the small, inadequate building which is now used.

The city needs more playgrounds. It needs, above all things, public bathing facilities for the young people and the children of the District. There are few cities of its size in the Union that have such meager and limited public bathing facilities as has the District of Columbia. We need appropriations for vacation schools and care of playgrounds. I have four children in the public schools, and they have been importuned constantly for the last month to make contributions, to sell tickets, and to do all sorts of things to raise money to provide for the vacation schools and the playgrounds, and yet this committee refuses a single, solitary penny for those things, though the people of the District are anxious to provide for them.

Mr. PAGE of North Carolina. Is there anything in the estimate as to these items?

Mr. MONDELL. There is a $7,000 estimate for this purpose. The committee did not only not provide for it, but entirely overlooked it, evidently.

Mr. PAGE of North Carolina. Mr. Chairman, I yield one minute to the gentleman from Tennessee [Mr. SIMS].

Mr. DAVIS of Minnesota. Mr. Chairman, I yield four minutes, in addition, to the gentleman.

The CHAIRMAN. The gentleman from Tennessee [Mr. SIMS] is recognized for five minutes.

Mr. SIMS. Mr. Chairman, on April 13, 1910, I delivered a speech in the House which I will now read, if the House will be patient and bear with me:

"Mr. Chairman, on February 20, 1901, more than nine years ago, as a supplement to some observations I had made on the rules of the House, I read an article from the Kansas City Times, the same being by Mr. H. J. Groves, at that time the staff correspondent of that paper. I now read enough of the article I then read to give the House an idea of what it was:

NEW ENGLAND INFLUENCE IN AMERICAN POLITICS.

"'WASHINGTON, D. C., *February 4, 1901.*

"'In his great ship-subsidy speech in the Senate Mr. Vest called attention to the domination of New England in American politics. The Senator said:

"'"New England is rich and powerful. Her people have made money in every contingency and in every era in the history of our country.

"'"I admire them; I admire their courage, their sagacity, their aggressiveness. With a sterile soil and an inhospitable climate, they control the politics and the policy of the United States. They send their ablest men to both branches of Congress and keep them here as long as they can preserve the material interests of that section. It makes no difference how much these Representatives and Senators may differ with the people as to matters of sentiment and abstraction, if they are true to the material interests of New England, that is enough. The two Senators from Maine differ as widely as the North and South Poles upon the foreign policy of the United States, but they are both here to-day by the unanimous vote of the Legislature of Maine. The two Senators from Massachusetts are equally diverse in their opinion as to the Philippine question and the Philippine war, but the people of Massachusetts send them both here because they know their ability and recognize their usefulness.

"'"New England, six small States, a majority of them not as large as counties in Missouri, controls the politics of the whole United States. There is no measure before the Senate or the other branch of Congress in which New England does not receive the largest share of Government bounty."'

"'In these few words Senator Vest told a story known to every student of public men and affairs. The six little States which form the New England group have figured prominently in the settlement of every question that has been presented to the Republic. The West and South have sacrificed prestige in Washington by changing the Representative every time an ambition was born in the imagination of some bright young lawyer. The reason these sections have not exerted more influence in national legislation is because they have left but few of their Representatives here long enough to ripen into usefulness.

"'But few men who are sent here leave an impress upon the legislators of the country. Those who do either possess commanding and unusual ability or else secure prestige by continued service and consequent familiarity with the needs of the country.

"'Senator Vest is not mistaken about New England. He told the gospel truth, and the West and South should study what he said.

"'The people of the West and South should not overlook or pass unnoticed the statement made by Senator George G. Vest that New England has dominated the politics and legislation of the Republic. He is not a word dealer or phrase coiner. He means what he says and always has the proof to substantiate his statements. This condition has existed, and every student of public affairs knows it. Senator Vest graphically stated the fact. He casually told the reason: "They keep their men here."

"'I would not advocate the changing of the congressional tenure of office. The people should have an opportunity to pass on the congressional record often, at least every two years; but if the record is a good and growing one, it should be indorsed. There are many who give to Congressmen two terms, no more. These districts are never influentially represented.

"'Thus you have the story of influence in Congress. It is the story of long service.

"'H. J. GROVES.'

"It will be seen that the article consisted of a liberal extract from a speech of the late Senator George G. Vest, of Missouri, then serving his last term in the Senate of the United States, with a very forceful comment by Mr. Groves, who was a brilliant and able newspaper man then residing in Washington. As is well known to all intelligent men, Senator Vest was one of the greatest statesmen this country ever produced—that for learning, wisdom, and oratory he had few equals and no superiors.

"It matters not what a Member's educational qualifications may be, it matters not how great an intellect he may possess, nothing can fully equip him for the most effective service here except continued service. As bearing directly upon this point, I now read from a speech of President Taft, made in this city several years ago. He said:

"'There is only one thing I want to say about Ohio that has a political tinge, and that is that I think a mistake has been made of recent years in Ohio in failing to continue as our representatives the same people term after term. I do not need to tell a Washington audience, among whom there are certainly some who have been interested in legislation, that length of service in the House and in the Senate is what gives influence. And, therefore, that rotation in office, while it may satisfy the different counties and keep them from a county internecine war, very much interferes with the State of Ohio exercising that influence that it ought to exercise in the Senate and in the House. I am in favor, therefore, of continuing the representation as we have it, so that our representatives shall be the foremost in both Halls of the Legislature.

INFLUENCE OF SMALL STATES.

"'Why is it that the small States of the East exercise so much power in Congress? It is not because an eastern man has any more capacity in the matter of legislation than a western man—certainly not more than an Ohio man. It is because when they get a good representative they keep him as long as he lives, and then he has the influence that vastly exceeds the more numerical representation of population. I do not know whether this is quite germane to the subject, but it occurred to me to say this because I feel as if we were all interested in having Ohio well represented and in having Ohio make herself felt in the legislation of this country by adopting a system that will certainly bring about the weight she is entitled to.'

"Mr. Chairman, who knew better the value of long and continuous service in Congress than President Taft? He could have had no other motive in asking his own State to continue their representatives in Congress than the desire that his State have the weight and influence in this body that can come in no other way than by continuously returning the same men.

"I now beg the indulgence of the House to read an editorial from the Washington Post, of this city, on the above extract from that speech:

ROTATION IN OFFICE.

"'There is a truth as profound as political experience can make it in the following passage from the speech of President Taft before the Ohio Society of Washington:

"'"Why is it that the small States of the East exercise so much power in Congress? It isn't because an eastern man has any more capacity in the matter of legislation than a western man—certainly not more than an Ohio man. It is because, when they get a good Representative, they keep him as long as he lives, and then he has the influence that vastly exceeds the more numerical representation of population."

"'Though a man were Hazlitt and Macaulay combined, he would not be a great writer unless he had been of the guild a while. We are told by Edmund Burke himself that it was by slow degrees and constant discussion that Charles James Fox became the greatest parliamentary debater the world ever saw. Fox entered the British Commons before he was 20 years old. He remained a member of that body till his death, at the age of 57. In opposition he did as much to advance the cause of good government as Pitt did in power, for he kept Pitt not only on the alert but on his good behavior.

"'Had Fox been an American and a Member of our Congress, he would have been fortunate if he had been chosen to and served in 10 Congresses—20 years. Sam Randall was not bred a statesman, but he became one of our great parliamentary leaders by reason of his long service. Had John G. Carlisle been English born, he would have served in the House of Commons at the least 50 years. Gladstone was in the Commons 60 years. Had he been an American, it is doubtful if the whim of a single constituency would have allowed him 12 Congresses.

"'Matt Carpenter was a more powerful intellect than William B. Allison, but Allison exercised an infinitely more powerful influence on our parliamentary policies than Carpenter. One served less than 12 years, the other more than 30.'

"Mr. Chairman, as corroborative and cumulative testimony on this very important question of length of service in this body, I now read from the address of the Hon. CHAMP CLARK, the present Democratic leader in this House, and who, in all human probability, will be its next Speaker if the Democrats return to power, delivered on the 9th day of April, 1910, on the life, character, and public services of the late Hon. David A. De Armond, of Missouri, as follows:

"'That he stood among the highest here and was recognized as a force to be taken into account at all times and under all circumstances was a fact known to all of us. Why did he so rank? First, because of his native ability, his accurate information, his clear, incisive style of speaking, his fidelity to principle, and his flawless integrity. Secondly, by reason of his long service and by his constant attendance on the sittings of the House.

"'He died near the end of his nineteenth year in Congress. Of all the Missourians who have been Members of the House, one only exceeded him in length of service—the sterling and well-beloved Richard Parks Bland, who died in the early part of his twenty-fifth year of service, possessing an international reputation. The Missourian next to him in point of service in the House was Gov. John S. Phelps, who served 18 years and rose to be chairman of the Committee on Ways and Means, the first chairman of that committee from the sunset side of the great river. Roger Q. Mills, of Texas, is the only other trans-Mississippian to achieve that greatly coveted honor. The high places to which Phelps, Bland, and De Armond rose in both the House and the country is another illustration of the value of long service—value not only to themselves but to their constituencies and to the entire Republic.

"'Men should not be sent hither simply to gratify their own personal ambitions, but because they can be of service, and having proved that they are of service, wisdom dictates that they should be kept here so long as they continue to be of service; and it may be confidently asserted that the value of the services of a man of capacity, character, industry, and good habits increases in exact proportion to his length of service. New England understands this thoroughly. So do the cities of Philadelphia and Pittsburgh. When a Representative from any of those places demonstrates his fitness here he is retained until he retires, dies, or is promoted. Five times in succession Philadelphia has had the distinguished honor of furnishing the "father of the House"—Kelley, Randall, O'Neal, Harmer, and Bingham. Should Gen. Bingham, the present "father of the House," for any reason cease to be a Member, the title of "father of the House" would pass to still another Pennsylvanian, my friend the Hon.

John Dalzell. These facts should furnish much food for thought to every constituency in the land.'"

Mr. Chairman, it now appears that when I said in my speech delivered in this place in 1910 that in all human probability the Hon. CHAMP CLARK would be the next Speaker of the House of Representatives I was more of a prophet than I could lay claim to at that time, for since that prophecy was made Hon. CHAMP CLARK has been three times elected Speaker of the House, without a dissenting vote in his own party, either in caucus or in the House, which can be said of no other man in our history.

Party changes may come and go in this body, but the effect of long and continuous service on the strength and usefulness of its membership remains incontrovertible.

When my speech of April 13, 1910, was delivered the House was Republican, and I then gave a statement as to the length of service of the chairmen and ranking members on 18 of the more important committees of the House as it was at that time constituted, which proved conclusively that my contention as to the value of long service was true.

The House of Representatives is now Democratic, and I give the names and length of service of the chairmen and ranking majority and minority members of each of 12 committees, as follows:

AGRICULTURE.

A. S. LEVER, chairman; length of service, 16 years.

GORDON LEE, ranking majority member; length of service, 12 years.

GILBERT N. HAUGEN, ranking minority member; length of service, 18 years.

APPROPRIATIONS.

JOHN J. FITZGERALD, chairman; length of service, 18 years.

SWAGAR SHERLEY, ranking majority member; length of service, 14 years.

F. H. GILLETT, ranking minority member; length of service, 24 years.

FOREIGN AFFAIRS.

H. D. FLOOD, chairman; length of service, 16 years.

CYRUS CLINE, ranking majority member; length of service, 8 years.

HENRY A. COOPER, ranking minority member; length of service, 24 years.

INSULAR AFFAIRS.

W. A. JONES, chairman; length of service, 26 years.

FINIS GARRETT, ranking majority member; length of service, 12 years.

HORACE M. TOWNER, ranking minority member; length of service, 6 years.

INTERSTATE AND FOREIGN COMMERCE.

W. C. ADAMSON, chairman; length of service, 20 years.

T. W. SIMS, ranking majority member; length of service, 20 years.

JOHN J. ESCH, ranking minority member; length of service, 18 years.

JUDICIARY.

EDWIN Y. WEBB, chairman; length of service, 14 years.

C. C. CARLIN, ranking majority member; length of service, 10 years.

ANDREW J. VOLSTEAD, ranking minority member; length of service, 14 years.

MILITARY AFFAIRS.

JAMES HAY, chairman; length of service, 20 years.

S. HUBERT DENT, ranking majority member; length of service, 6 years.

JULIUS KAHN, ranking minority member; length of service, 14 years.

NAVAL AFFAIRS.

LEMUEL P. PADGETT, chairman; length of service, 16 years.

J. FRED TALBOTT, ranking majority member; length of service, 22 years.

THOMAS S. BUTLER, ranking minority member; length of service, 20 years.

POST OFFICE AND POST ROADS.

JOHN A. MOON, chairman; length of service, 20 years.

DAVID E. FINLEY, ranking majority member; length of service, 18 years.

HALVOR STEENERSON, ranking minority member; length of service, 14 years.

WAYS AND MEANS.

CLAUDE KITCHIN, chairman; length of service, 16 years.

HENRY T. RAINEY, ranking majority member; length of service, 14 years.

JOSEPH W. FORDNEY, ranking minority member; length of service, 18 years.

BANKING AND CURRENCY.

CARTER GLASS, chairman; length of service, 16 years.

EVERIS A. HAYS, ranking minority member; length of service, 12 years.

RULES.

ROBERT L. HENRY, chairman; length of service, 20 years.

EDWARD W. POU, ranking majority member; length of service, 16 years.

PHILLIP P. CAMPBELL, ranking minority member; length of service, 14 years.

In this list I have given the names and length of service of all chairmen of the 12 committees, and also of all the ranking majority members, except in the case of the Banking and Currency Committee, for the reason that the ranking majority member, as the committee was made up at the beginning of this Congress, has recently died. I have given all the names of the ranking minority members and length of service of all. These 12 committees are the most important committees of the House.

As a general rule, the chairman and ranking majority with the ranking minority members of all committees are appointed on conference committees of the two Houses on all bills where differences arise between the House and Senate in order to adjust such differences and by reason of being so appointed on conference committees, they perform the most important legislative service that can be performed, as reports of conference committees must be accepted or rejected as a whole. On this account the three House members on a conference committee represent the whole membership of the House.

The CHAIRMAN. The time of the gentleman from Tennessee has expired.

Mr. DAVIS of Minnesota. Mr. Chairman, if the gentleman desires five minutes more I shall be glad to yield it to him.

Mr. SIMS. I would be glad to have it.

The CHAIRMAN. The gentleman from Tennessee is recognized for five minutes more.

Mr. SIMS. In case of a change in party control, the ranking minority members, as a general rule, become chairmen of their respective committees, and the chairmen of the committees of the party losing control become ranking minority members of the same committees and as such continue to go on conference committees, notwithstanding a change in party control of the House. It therefore follows that a study of the length of service of the chairman, ranking majority, and ranking minority members of these 12 committees I have named will shed much light on the importance and value of long and continued service in this great legislative body. I find that the combined service of the 12 chairmen and 11 ranking majority members, 23 in all, amounts to 370 years, making the average service for each member to be a fraction over 16 years. I find that the combined length of service of the 12 ranking minority members to be 196 years, or an average of 16⅓ years for each minority ranking member. I find that the combined length of service of the 35 members I have just named to be 566 years, or as near as I can express it numerically, an average length of service of each of the 35 members of 16⅛ years.

These facts and figures demonstrate beyond any sort of doubt the wisdom of returning Members to this body continuously as long as they retain the mental and physical vigor necessary to enable them to effectively discharge their official duties.

Mr. Speaker, I hope I may be pardoned if I now give a somewhat detailed statement of the record of the Tennessee delegation in the House of Representatives as to length of service and character of same and as to committee assignments.

RECORD OF TENNESSEE MEMBERS OF SIXTY-FOURTH CONGRESS.

SAM R. SELLS, of the first district, is ranking minority member of the Committee on Pensions and is also a member of the Committee on Roads. His length of service is 6 years.

RICHARD W. AUSTIN, of the second district, is ranking minority member of the Committee on Public Buildings and Grounds, and is also a member of the Committee on Insular Affairs. His length of service is 8 years.

JOHN A. MOON, of the third district, is chairman of the Committee on the Post Office and Post Roads. His length of service is 20 years.

CORDELL HULL, of the fourth district, is a member of the Committee on Ways and Means. His length of service is 10 years.

W. C. HOUSTON, of the fifth district, is chairman of the Committee on Territories, and is also a member of the Committees on the Census, Labor, and War Claims. His length of service is 12 years.

JOSEPH W. BYRNS, of the sixth district, is a member of the Committee on Appropriations, and is chairman of the subcom-

mittee of that committee which makes up the legislative appropriation bill. His length of service is 8 years.

LEMUEL P. PADGETT, of the seventh district, is chairman of the Committee on Naval Affairs. His length of service is 16 years.

T. W. SIMS, of the eighth district, is ranking majority member of the Committee on Interstate and Foreign Commerce. His length of service is 20 years.

FINIS J. GARRETT, of the ninth district, is the ranking majority member of the Committee on Insular Affairs, and is also a member of the Committees on Rules, Expenditures on Public Buildings, and Flood Prevention. His length of service is 12 years.

K. D. MCKELLAR, of the tenth district, is a member of the Committee on Military Affairs. His length of service is 6 years.

It will thus be observed that the 10 Members constituting the Tennessee delegation have membership on the important committees of Pensions, Roads, Public Buildings and Grounds, Insular Affairs, Post Office and Post Roads, Ways and Means, Rules, Census, Labor, War Claims, Appropriations, Naval Affairs, Military Affairs, Interstate and Foreign Commerce, and Territories.

I know of no other 10 Members of this House from any other State that have an equal number of committee assignments on so large a number of the greatest and most important committees of the House as does the Tennessee delegation, and the reason for such fortunate committee assignments is apparent to all who will study the facts I have just detailed. The combined length of service of the Tennessee Members of this House is 118 years, and the average length of service of each Member is 11⅘ years. Length of service tells the whole story. It will be observed that Messrs. MOON, HULL, BYRNS, PADGETT, SIMS, and MCKELLAR are all members of committees which, under the rule adopted by the Democratic caucus on organization of this House, bars them from membership on any other committee.

Service on the great Committees on Interstate and Foreign Commerce, Ways and Means, Appropriations, Naval Affairs, Military Affairs, and Post Office and Post Roads was regarded by the caucus as being of such preponderating importance, both to the House and to the Nation, as to require all the time of their Members.

Barring the application to myself of what I am just about to say, I think any citizen of Tennessee, regardless of politics, may well be proud of the record of its delegation in the House of Representatives of the Congress of the United States. But the making of such a record would have been impossible without the long and continuous service with which the people of the State of Tennessee have honored its Representatives in this body. [Applause.]

The CHAIRMAN. The time of the gentleman from Tennessee has again expired.

Mr. SIMS. Mr. Chairman, I ask unanimous consent to include in my remarks, in the proper place, parts of my address to the House delivered April 13, 1910.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. PAGE of North Carolina. Mr. Chairman, I yield 20 minutes to the gentleman from Kentucky [Mr. JOHNSON].

The CHAIRMAN. The gentleman from Kentucky [Mr. JOHNSON] is recognized for 20 minutes.

Mr. JOHNSON of Kentucky. Mr. Chairman: During the last few years much has been said and printed concerning the half-and-half relations existing between the Federal Government and the District of Columbia. There is published in Washington a magazine known as the National Geographic Magazine. I have in my hand a copy of that magazine for March, 1915, in which appears an article by ex-President Taft relative to the National Capital. That article has been very elaborately illustrated for the purpose, no doubt, of conveying to its readers the impression that the District of Columbia is asked by some people to bear all the burden of Capital building. One illustration in that article appears on page 227, and is a picture of one end of the Capitol Building, the Senate end.

I wish to take these illustrations one after another and see to what extent the property in the District of Columbia is taxed for the purpose of building a National Capital. The picture to which I just referred, on page 227 of the magazine, shows property built entirely out of Federal funds, and property in the District of Columbia was not taxed at all to build it.

The next illustration is on page 229, which shows the south wing of the Capitol Building. That, too, was built entirely out of public funds, and the property in the District of Columbia was not taxed at all to help build it. The next illustration is on page 230, and shows a part of the building of the Daughters of the American Revolution. Property in the District of Columbia was not taxed to help build that.

Another of the illustrations is shown on page 231, which is a front view of the United States Treasury Building. Property in the District of Columbia was not taxed to help build that. The next two illustrations are shown on pages 232 and 233, and both show the Washington Monument. The property in the District of Columbia was not taxed to help build that. The next illustration is on page 234, and shows the statues in Lafayette Square. The property in the District of Columbia has not been taxed to help build them. On page 235 is shown a rear view of the White House. The property in the District of Columbia has not been taxed to help build that.

The next view is of the Connecticut Avenue Bridge. The property in the District of Columbia was, however, taxed to pay half of that.

The next illustration is a view of a building on New Hampshire Avenue. The property of the District of Columbia has not been taxed to help build that. The view on page 239 of the magazine is of the Chesapeake & Ohio Canal. The District was originally taxed way back yonder to help build this canal, but the bonds and stocks which the old cities of Georgetown and Washington took in that canal were unloaded on the United States Government, and those stocks are now held by the United States Government and are not worth the paper on which they were printed.

On page 240 we have the Arlington Memorial Amphitheater, a most elaborate thing. That is being paid for out of the Federal Treasury, and the property in the District of Columbia is not taxed to build that. Then, on page 241, we have an illustration of the cemetery at Arlington. That was purchased and paid for out of the Federal funds, and the property in the District of Columbia was not taxed to pay for that. Then, on page 242, is a picture of the proposed homes of four of the great departments of the Federal Government. When they are built the property in the District of Columbia will not have been taxed to build them.

On page 244 we have a picture of the dome of the Capitol and the front of the Capitol. The property in the District of Columbia has not been taxed to help build that.

Mr. NORTON. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Kentucky. I do.

Mr. NORTON. Does the gentleman maintain that the property of the District of Columbia should be taxed to pay for improvements of that kind?

Mr. JOHNSON of Kentucky. I do not; but I am answering the often-made statement that the people of the District of Columbia have imposed upon them the onerous task of building a beautiful National Capital. I am showing now that out of fifty pictures of buildings used to illustrate the Taft magazine article only one of them was built partly out of funds raised by taxing the property of the District of Columbia, and that is the Municipal Building.

Mr. FOCHT. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Kentucky. I do.

Mr. FOCHT. Does not the gentleman think it is the desire of the people of this Republic—and that they are willing to pay—that the Government beautify and make this the most beautiful city in the world?

Mr. JOHNSON of Kentucky. I am fully in accord with the gentleman in his views. I have stated on many occasions, and now repeat, that the United States Government ought to erect all the buildings it needs; that it ought to quit renting, and that it ought to construct elaborate buildings. But I do oppose the public and new Members of Congress being imposed upon by just such stuff as this and made to believe that property in the District of Columbia is taxed to erect all these buildings, when they do not pay a farthing for the purpose.

Mr. LONGWORTH. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Kentucky. I do.

Mr. LONGWORTH. Can the gentleman say how the tax rate of Washington compares with the tax rate of other cities?

Mr. JOHNSON of Kentucky. I am coming to that later on.

Mr. LONGWORTH. I just thought I would suggest that.

Mr. JOHNSON of Kentucky. I now wish to resume my comment on Mr. Taft's magazine article and the illustrations which accompany it.

On page 247 of the magazine already referred to I find a view from Arlington Cemetery of the Lincoln Memorial. Recently Congress has appropriated more than $2,600,000 for the Lincoln Memorial, and property in the District of Columbia has not been taxed a cent for the purpose of paying for this memorial. However, the Taft article as illustrated conveys to the mind of the uninformed reader that this is one of the great projects toward

capital building for which the District of Columbia is called upon to pay.

On page 250 is another view of the magnificent Lincoln Memorial, to which I just referred. This additional view is, no doubt, added to the number of illustrations for the purpose of impressing the implication that property in the District of Columbia is taxed to help build it.

On page 251 is a picture of the "basin" in Potomac Park. This basin is one of the adornments and places of pleasure in the District of Columbia. A picture of it is, no doubt, used in the Taft article so that the uninformed reader may again draw the conclusion that property in the District of Columbia has been taxed to build it. However, it was paid for entirely out of the United States Treasury.

On page 252 is a picture of the Army War College and on page 253 is a picture of the Bureau of Engraving and Printing. It is but reasonable to infer that these, too, have been used to illustrate the Taft article so that the uninformed reader may be left to believe that property in the District of Columbia has been taxed to help build them, while the fact is that they were paid for entirely by the United States.

On page 254 we find the Taft article further illustrated by pictures of the new Union Station and the new Post Office Building. The property in the District of Columbia was not taxed to help pay for either of these. The general supposition is that the Pennsylvania Railroad Co. and the Baltimore & Ohio Railroad Co. bore the burden of the cost of the Union Station. That supposition, however, is incorrect. The act of Congress provided that the station should not cost less than $4,000,000. In money and land the United States contributed something like $8,000,000 toward the railroad terminals, improvements, and changes made necessary by the erecting of the Union Station and elimination of grade crossings. In 1903, I believe it was, Congress made the Baltimore & Ohio Railroad Co. a present of a million five hundred thousand dollars toward these improvements. About the same time a present of a similar amount was made to a subsidiary of the Pennsylvania Railroad Co. by the United States. The new Post Office Building, which is shown in the same illustration, was paid for entirely out of funds of the United States. The District of Columbia paid nothing toward its erection.

On page 255 is a beautiful illustration of the United States Treasury Building. The Federal Treasury paid for the erection of this building, and property in the District of Columbia was not taxed to help build it.

On page 256 is a picture of the Red Cross Building. Property in the District of Columbia was not taxed to help build that.

On page 257 is a picture of the New National Museum, just south of Pennsylvania Avenue. Property in the District of Columbia was not taxed to help build that.

On page 258 is a picture of the Von Steuben Monument in Lafayette Square. Property in the District of Columbia was not taxed to help pay for that.

On page 259 is a beautiful colored picture of Lincoln Park and the Thomas Ball monument to Abraham Lincoln. Property in the District of Columbia was not taxed either for the purpose of purchasing this park or erecting this handsome Lincoln Statue.

On page 260 is shown the beautiful fountain in the rear of the White House. Property in the District of Columbia was not taxed to pay for the construction of this.

On page 261 is a picture of the White House with the Army and Navy Building in the distance. Property in the District of Columbia was not taxed to pay any part of this.

On page 262 is a picture of the building of the National Geographic Society. Property in the District of Columbia was not taxed to pay for any part of this.

On page 263 is a picture of the United States Patent Office. Property in the District of Columbia was not taxed to pay for any part of this.

On page 264 is a picture of the Pan American Union Building. The property in the District of Columbia was not taxed to pay any part of the cost of that.

On page 265 is a picture of the Continental Hall of the Daughters of the American Revolution. Property in the District of Columbia was not taxed for the purpose of erecting this magnificent building.

On page 266 is a picture of the Public Library of the District of Columbia. The District of Columbia paid no part of the cost of its construction.

On page 267 is a picture of the Millet-Butt Memorial Fountain. The property in the District of Columbia was not taxed to pay any part of the cost of that.

On page 268 is a picture of the accepted design for the George Washington Memorial Hall, which is to cost about $2,000,000. The property in the District of Columbia will not be taxed to erect that.

On page 269 we have a picture of the Municipal Building. The property in the District of Columbia was taxed to pay one-half the cost of this building and the United States paid the other one-half.

On the same page is a picture of the Carnegie Institution of Washington. Property in the District of Columbia was not taxed to pay any part of the cost of that.

On page 270 is a picture of a residence on Massachusetts Avenue covered with wistaria. Property in the District of Columbia was not taxed to build it.

On page 271 is a picture of a beautiful rose garden. The property in the District of Columbia was not taxed to create it.

On page 272 is a picture of the House Office Building. Property in the District of Columbia was not taxed to build it.

On page 273 is a picture of the Library of Congress, perhaps the most beautiful building in the world. The property in the District of Columbia was not taxed to help build it. The Federal Government built it at its own expense.

On page 274 is a picture of the National Capitol, showing both the Senate and House wings. Property in the District of Columbia was not taxed to help build that.

On page 275 is another picture of the National Capitol, inserted in the Taft article, no doubt, for the purpose of impressing upon the minds of the uninformed the enormous cost of Capital building, and for the further purpose, perhaps, of leaving the uninformed to infer that property in the District of Columbia had been taxed to help build it, when such was not the case.

On page 276 is shown a picture of the Temple of Scottish Rite, built at a cost of a million and a half dollars. The property in the District of Columbia was not taxed to help build that.

On page 279 is a view of one of the roads through Rock Creek Park. The property in the District of Columbia was taxed to pay for one-half of that.

On page 281 is a picture of the Volta Bureau. Property in the District of Columbia was not taxed to help pay for that.

On page 284 is a picture of the Smithsonian Institution. Property in the District of Columbia was not taxed to help pay for that.

On page 286 is a picture of the Roosevelt group of lions, and on page 287 is a picture of the Roosevelt rhino group in the National Museum. Property in the District of Columbia was not taxed to help pay for them.

Although not shown in the illustrations, there is the Senate Office Building, one of the costly structures of the National Capital, but property in the District of Columbia has not been taxed to help pay for that.

Then there is the beautiful and costly Potomac Park, upon which it is now proposed to erect a stadium to cost a million and a half dollars. This park has been made at the cost of the United States Government, and property in the District of Columbia has not been taxed to help create it.

It is also proposed to erect an armory for the District Guard at a cost of $2,500,000. The authorities of the District of Columbia do not contemplate paying any part of this. The fact is that the wirepullers in the District of Columbia are not so anxious to secure an armory as they are to have the United States build a convention hall under the guise of building an armory, so that the hotels and boarding houses in the District of Columbia may use it as an argument as to why conventions should come to Washington.

It is contemplated to build a memorial bridge between the Lincoln Memorial at Arlington. If this bridge is built according to present designs, it will cost something like twelve million or fifteen million dollars. No one anticipates that property in the District of Columbia will be taxed to help build that.

Out of the 50 or more pictures illustrating Mr. Taft's article it is not certain that property in the District of Columbia has been taxed to help pay for more than two of them, yet they have all been used in connection with this magazine article for the purpose of showing to the country the great cost of National Capital building without being frank enough to say in so many words that nearly all of the cost was paid by the Federal Government and but an insignificant part of it paid by the District of Columbia.

The great cost of Capital building and Capital beautification has been paid and is being paid by the National Government and but little by the District of Columbia.

Mr. Taft commences his magazine article by saying:

I have been deeply interested in the development of Washington ever since as Solicitor General I looked out of the windows of the clerk's office of the Supreme Court, at the Capitol, and stood awe-struck by the beauty of that sweep from the Capitol down to the Monument,

thence to the shining bosom of the Potomac beyond, and across to the Arlington hills. * * *

When I left Washington on the 4th of March, 1913, the last view that my eye lovingly rested upon was that other axis, at right angles with the first, from the south windows of the White House across the White House Grounds and the White Lot to the Monument, thence to the Potomac Park and the majestic river, with the far hills of Anacostia to the left and a distant suggestion of Alexandria on the right.

For the creation of nothing within that sentimental description was property in the District of Columbia taxed.

Further along in the article Mr. Taft, in advocating a condemnation of the Palisades and the country back of it in Virginia, says:

In this way the limits of Washington may be extended across the Potomac and brought within the improving influence of the Government Treasury.

Even he does not thereby intimate that it is to be brought within the improving influence of the treasury of the District of Columbia.

Again, further along in the article, Mr. Taft says:

While they (the people of the District of Columbia) have to pay but half of the expense of the city government, that half is greater than most cities of Washington's class impose upon their people. There are two reasons for this. The first of these is that no other city of its class has so many unusual expenses to meet. For instance, no other city of its size has as many square feet of street surface to maintain, etc. * * *.

Only Pennsylvania Avenue and three or four squares of Louisiana Avenue are in reality much broader than the streets of other cities. They are broader upon paper, but are not broader in reality. Take Sixteenth Street, for instance; from curb to curb it is but a street of average width the country over. However, at least 35 feet on each side of the sidewalks are given to making front yards for the residents along that street. Those who own homes on Sixteenth Street, on K Street, and on practically all of the other streets throughout the District of Columbia have the free use of front yards in which they have no money invested and for which they pay no rents. Yards in front of residences in all other cities of this country are the property of the home owners. In those yards the owners have their money invested, but they derive no more pleasure from those yards for which they are compelled to pay than the residents of the District of Columbia derive from their front yards, for which they do not have to pay.

On page 289 of the magazine article Mr. Taft says:

When the question of finding a fair basis for the financial resolutions between the United States Government and the District of Columbia was pending in Congress during the middle seventies a report favorable to the half-and-half plan was made by the Judiciary Committee of the House. Among other striking statements in that instrument was one which shows how the lawmakers of that period viewed the subject. It is as follows: "There is something revolting to a proper sense of justice in the idea that the United States should hold free from taxation more than half of the area of the Capital City and should be required to maintain a city upon an unusually expensive scale, from which the ordinary revenues derived from commerce and manufactures are excluded; that in such a case the burden of maintaining the expenses of the Capital City should fall entirely upon the resident population."

How absurd and misleading it is for a man of Mr. Taft's prominence to include such a statement in his magazine article. When he refers to the legislation of the "middle seventies" he no doubt refers to the act of June 20, 1874, and the act of June 11, 1878. By the first of these acts the temporary commission form of government was established, and by the second the permanent commission form of government was established.

Mr. Taft should have known that by the act of February 21, 1871, the charters of the old cities of Washington and Georgetown were repealed, and that the one municipality of the District of Columbia was created and the entire District of Columbia made the Capital City. Therefore, when he used the quotation above referred to, he should have known that "more than half of the area of the Capital City" was not withheld from taxation. The original city of Washington comprised only about 6,000 acres. The District of Columbia, which is now the Capital City, is made up of approximately 45,000 acres; and such has been the case since the act of February 21, 1871.

The United States Government owns Potomac Park, but it is not used exclusively for governmental purposes. Instead, it is used as a pleasure ground for the people of the Capital City. The United States Government owns the great park around the Capitol. That is not used exclusively for governmental purposes, but is also used as a pleasure ground for the people of the Capital City. The United States Government owns Lafayette Park, Franklin Square, Lincoln Park, and a number of other parks, but none of them is used for governmental purposes, but all are given up as pleasure resorts to the people of the Capital City. Therefore the people of the Capital City can not complain that these parks are held free from taxation. The streets of the Capital City do not belong to the Government, except for public use. It has been held by the Supreme Court of the United States, in the case of Smith *v.* The Corporation of Washington (20 How.), that the United States only exercises sovereignty over the streets and holds them only in trust for the people.

Every day we see something in one or the other of the Washington papers asserting that if the half-and-half arrangement is done away with that those who would do away with it suggest nothing to take its place. This assertion is really silly, because there is something substantial proposed to take its place, and that something is the proposition that the United States shall not be committed to the payment of any definite proportion of the expenses of the District of Columbia, but that property in the District of Columbia shall continue to be taxed as it is now taxed, and the proceeds from that taxation used for municipal purposes; and if the amount be not sufficient to fully meet all of the municipal functions, then the United States Government is to make up the difference.

Again, the Washington papers day after day say that the proposition which is now before the House does not fix a permanent rate of taxation. There is already a permanent rate of taxation in the District of Columbia, and thus far nobody has proposed to change it. That rate is as definite and certain as Congress can make it. It can not be made more definite and certain without an amendment to the Constitution of the United States fixing the rate of taxation at a certain figure and providing that thereafter it can not be changed.

They say that the present rate of taxation is "flexible." If it is flexible its flexibility has never been used to increase the rate but always to lessen it. Since the adoption of the act of June 11, 1878, known as the "organic act," the rate of taxation has several times been changed, but every time it has been changed it has been made less and less. In its flexibility it has always "flexed" downward. It has never "flexed" upward. The Republicans revised the tariff upward, but they have always "flexed" the rate of taxation in the District of Columbia downward.

The gentleman from Kansas [Mr. CAMPBELL] and the Washington papers continue to assert that the present half-and-half arrangement was the result of four years' study and labor. They say that it took from 1874 to 1878 to construct the policy of the half and half. In this they are all mistaken. The truth of it is that it took four years of expensive lobbying upon the part of the "Committee of One Hundred" to induce Congress to enter into that arrangement.

The friends of the half and half insist that the amendment to the appropriation bill doing away with the half and half has been hastily drawn. In this also they are mistaken. When those who have been in Congress for long years have heard this question discussed year after year and have finally reached the conclusion that the half and half should be done away with, then the friends of the half and half say that their action is hasty. But, when other Members, like the gentleman from Massachusetts [Mr. TINKHAM], for instance, arrive in Washington one day and the next day arrive at the conclusion that the half and half is the proper thing, then the friends of the half and half do not charge them with hasty action, but they laud their judgment to the skies.

When the select joint committee was appointed a little more than a year ago to have hearings upon this subject and then report their findings to Congress, the Washington papers and the other friends of the half and half announced that they would be satisfied with the findings of that select joint committee. They all gave credit to the intelligence and good judgment and integrity of purpose and fairness of the members of the select joint committee, and indicated quite clearly that they would abide by their finding. They received the appointment of the members upon this select joint committee with delight. No doubt much of this came from the fact that no one of the six of this joint select committee had ever cast a vote against the half-and-half arrangement. It is reasonable to presume that the friends of the half and half were surprised when this joint select committee reported that the half and half should be repealed.

The defenders of the half and half one year ago indicated quite clearly, as I have said, that they would abide by the decision of the joint select committee. That committee has made a unanimous report. The substance of that report is embodied in the present District of Columbia appropriation bill. I insist that the defenders of the half and half show their good faith, acquiesce in that report, and support the section in the District appropriation bill which does away with the half and half.

The Washington papers and the Washington lobbies at first insisted that the rate of taxation in the District of Columbia was as much as that in any other city in the United States of

comparable size. They have been driven from that false position by an exposition of the facts. Then they resorted to another comparison by which they undertook to show that their per capita tax was greater than that of other comparable cities in the United States. They seem to forget that persons are not taxed, but that property is. In consequence the argument of a per capita tax can not possibly answer their purpose. But for the sake of argument let us accept the proposition that it does answer the purpose. I think I will show in my remarks of to-day that the per capita tax of the residents of the District of Columbia is far less than the per capita tax of the residents of any other city of comparable size in the United States.

There are a number of citizens' associations in Washington which, with the chamber of commerce and the board of trade, are constantly petitioning Congress for the expenditure of greater and greater sums of money in the District of Columbia, without ever intimating that they are willing for any increase in the rate of taxation in order that their unreasonable requests may be granted.

I have before me a communication dated April 29, 1916, addressed to me by the Board of Trade of the District of Columbia. In this communication they ask for a great many things, as follows:

First. That public-comfort stations be provided as follows: At the northeast corner of Ninth and F Streets NW.; at or near the corner of Thirty-second and M Streets NW.; at or near Fourteenth Street and Park Road NW.

Second. An additional shelter at the Farmers' Produce Market, at Twelfth and B Streets NW., to be built on the B Street side.

Third. A central heating plant for the group of school buildings at Seventh and O Streets NW.

Fourth. A new modern fireproof building to replace the present municipal lodging house.

Fifth. A new Eastern High School, large enough to accommodate 1,500 pupils.

Sixth. A graded school building with an assembly hall on site owned by District to accommodate the Woodridge, Langdon, and East Brookland sections.

Seventh. A fireproof storage building for the safe and economical keeping of supplies.

Eighth. Provision for a suitable armory building.

Ninth. New buildings to replace the present first, fourth, seventh, and harbor precinct stations.

Tenth. That cells and cell corridors in precinct stations 2, 7, and 9 be reconstructed, modernized, and made sanitary.

Eleventh. A new municipal hospital, but not on the site proposed at Fourteenth and Upshur Streets NW.

Twelfth. Larger appropriations for salary increases, for the employment of additional assistants, and for equipment, especially for a greater number of books at the Public Library of the District of Columbia, totaling more than $100,000.

Thirteenth. That a ship canal of ample size connecting the Eastern Branch with Chesapeake Bay be constructed by the United States Government.

Fourteenth. That the channel of the Potomac River, from its mouth to Washington and Georgetown Harbors, should be dredged to the depth of 28 feet, width of 400 feet.

Fifteenth. That the channel of the Anacostia River, from its mouth to the Navy Yard Bridge, should be dredged to a depth of 28 feet, preferably 400 feet wide.

Sixteenth. The Anacostia River should be made navigable from its mouth to Bennings Bridge.

Seventeenth. The United States should acquire all lands on both banks of the Anacostia River now owned by private parties.

Eighteenth. The United States to inaugurate a system of permanent dock improvements, and so forth, from the mouth of the Anacostia River to Bennings Bridge.

Nineteenth. That appropriation be made for the construction of a new fire and ice boat, with hinged smokestacks, to be located in Georgetown.

The above communication is but one sample of their extravagant and unreasonable demands of Congress.

Something has been said here to-day about the decision rendered by the Comptroller of the Treasury (Judge Downey) relative to the interest on the 3.65 bonds of the District of Columbia which, in the District appropriation bill is always referred to as the "interest and sinking fund."

The Comptroller of the Treasury, in writing that opinion, laid erroneous premises upon which to base his opinion. Even after he had laid erroneous premises for it he labored throughout that opinion to make good his position. I have long ago accepted that opinion as final, and it is not my purpose now to offer any further or additional argument in support of my original contention relative to the payment of the principal and interest of the 3.65 bonds. While I now decline to make any argument in favor of the position which I took relative to this subjct I feel it not at all out of place that I say something in criticism of that opinion.

The comptroller, in that opinion, makes the act of June 11, 1878, retrospective when it is entirely prospective in its nature.

It relates to future expenses of the District of Columbia and not past expenses. It relates to future and not past relations beween the United States and the District of Columbia. While, no doubt, some unpaid expenses of former years have been paid since June 11, 1878, on the half-and-half plan, this has been done by virtue of express provisions of appropriation acts and not by virtue of the half-and-half clause of the organic act. Indeed, the half-and-half clause is not a self-executing provision. It is a mere pledge as to future appropriations. No payment has been made or could be made under authority of the organic act itself. Nor is there anything in this act which authorizes any release of any obligation of the District to the United States or anyone else. If any such release was then contemplated it was evidently intended by Congress that it should be effected through subsequent legislation. But the fact that no subsequent legislation has authorized any release, at least as to interest advanced during the fiscal years 1877 and 1878, is strong evidence that no such release was ever contemplated by Congress.

The precise question here involved is whether the half-and-half clause of the organic act is retrospective as to payments of interest during the fiscal years of 1877 and 1878. The general rule is that an act is to be construed as prospective only, unless the language employed can not be reconciled with such a construction. Here, however, the language employed admits of no retrospective construction. It is provided—

> To the extent to which Congress shall approve of said estimates, Congress shall appropriate the amount of 50 per cent theerof; and the remaining 50 per cent of such approved estimates shall be levied and assessed upon the taxable property and privileges in said District other than the property of the United States and the District of Columbia.

The use of the future tense is conclusive of the question of whether the half-and-half clause was intended to be retrospective in its operations. The subject matter of this legislation is future estimates, future appropriations, and future levying of taxes upon District property and privileges.

The comptroller refers to the provision of the act of June 20, 1874, which contemplates proportional appropriations by the United States and the District of Columbia toward the payment of interest on the bonds, and it is decided by the comptroller that the organic act "fixed the respective proportional payments of the United States and the District at 50 per cent each." But if the organic act is prospective and not retrospective in its operations, such fixing related only to years subsequent to 1878. Before 1878 the 3.65 bondholders had no right to complain if determination of what should be the proportion of the payments to be made by the United States and the District of Columbia was deferred for several years, provided the obligation to make proportional payments was recognized and provision was made by Congress for the payment of current interest. Such provision was made by congressional legislation, and this legislation not only satisfied the legal demands of the bondholders but also fixed the obligations of the District with respect of these payments. Congress certainly had power to place upon the District such obligation or liability as to the interest payments for the years 1874 to 1878, or for any other period as seemed just to Congress. Congress was empowered to fix one proportion for the years 1874 to 1878 and another proportion for subsequent years. This, in effect, was what was done.

In determining the amount of the indebtedness of the District of Columbia to the United States the comptroller undertakes to make an adjustment of interest payments between 1874 and 1878 on the half-and-half plan. It is not claimed that Congress has expressly authorized any such adjustment. The acts of July 31, 1876, and March 3, 1877 (19 Stats., 106, 346), expressly provided for a reimbursement by the District of Columbia to the United States, and it is frankly conceded by the comptroller that if this question be viewed from the standpoint of these two acts alone the District owes the United States a million dollars. But inasmuch as the two acts are congressional enactments, it would seem that Congress alone could release the liability created by them. It would also seem that any such release would have been expressed by Congress in language at least as plain as that which was employed to create the liability. It should also be borne in mind that whenever Congress has intended that there should be an adjustment of accounts between the District of Columbia and the

United States such adjustment has been provided for by express enactment.

Referring to the acts of July 31, 1876, and March 3, 1877, the comptroller says:

> These statutes were purely provisional and designed to meet the exigencies of the situation by providing a means of payment of the interest on these bonds which fell due before the enactment of a permanent provision for its payment, and payments under them were subject to future proportional adjustment of accounts.

Of course, Congress had power to make such release or adjustment, as between the United States and the District of Columbia, as seemed just and proper to Congress; but the error of the comptroller is in assuming in this part of the opinion that Congress has authorized a "proportional adjustment of accounts," which, in fact, has not been done.

Construing the acts of July 31, 1876, and March 3, 1878, the comptroller says:

> If we isolate and consider alone the legislation of the two fiscal years 1877 and 1878 there can be no doubt that, under the specific requirement of the statutes under which money to pay the interest on these bonds for these years was advanced by the United States, the District was indebted to the United States under the terms of the statutes at the close of the fiscal year 1878 in the amount of $1,003,257.24, and as limited by the submission this is the question which I am called upon to decide.

The comptroller then decides that the organic act of June 11, 1878, fixed "absolutely and finally the respective obligations of the United States and the District with reference to these interest payments from the first interest accruing on the bonds until the last interest payments shall have been made."

The comptroller, therefore, decided that although at the close of the fiscal year 1878 the District was indebted to the United States on account of interest payments in the sum of $1,000,000, the organic act of June 11, 1878, had the effect of releasing a part of this indebtedness or of equalizing all interest payments, past and future, of the United States and the District of Columbia. It will readily be conceded, however, that there is no language in the organic act which expressly authorizes any such adjustment. But was there any such implication? As the District owed the United States $1,000,000 at the close of the fiscal year 1878, any adjustment of this indebtedness by the organic act which reduced the indebtedness would in reality be a partial release of the indebtedness. The comptroller, however, expressly decided that the organic act did not release any part of the preexisting indebtedness, this language being used:

> There is nothing in the organic act which expressly or by sufficiently founded implication remits or cancels any part of the then existent indebtedness of the District either to the United States or to others.

And again the comptroller says:

> The organic act took no account of and made no provision for the payment of any indebtedness growing out of the transactions of the preceding four years between the Government and the District and that condition was permitted to continue for 35 years.

We find, therefore,, that neither in the organic act nor in any subsequent legislation has there been a releasing of any part of the indebtedness of the District to the United States existing at the end of the fiscal year 1878. But if there has been no such release and payment has not been made, which is conceded by the comptroller, how can we escape the conclusion that the indebtedness existing at the close of the fiscal year 1878 is still existent? Congress alone would have the right to release an indebtedness of this sort, and the comptroller concedes that Congress has not done so.

Mr. TRIBBLE. Mr. Chairman, will the gentleman yield there?

Mr. JOHNSON of Kentucky. I will.

Mr. TRIBBLE. Does the District of Columbia pay for any of the upkeep of these buildings, or part of them?

Mr. JOHNSON of Kentucky. Only to a very limited extent when all are considered.

Mr. TRIBBLE. The Government pays all that?

Mr. JOHNSON of Kentucky. Yes; the Federal Government pays it. The Federal Government paid for and owns LaFayette Park, opposite the White House, and paid for and owns Franklin Square, and paid for and owns Lincoln Park and a number of other parks that I could recount, if I had the time, and for the purchase of which property in the District of Columbia has not been taxed a penny.

Now, answering the question of the gentleman from Ohio [Mr. LONGWORTH], who asked me a question a few moments ago as to the rate of taxation in the District of Columbia, I will say that in a speech which I made in the last Congress I named forty cities in the United States, and set opposite the names of each one of them its rate of taxation. I wish now to reinsert that list in the RECORD, and in connection with it I wish to say that the rate of taxation in Washington is the lowest of them all. Opposite the name of each city I will put its rate of taxation, beginning with the city which has the smallest rate, and go down the list, naming the cities in order as the rate of taxation increases, as follows:

Washington, on the $100	$1.00
Philadelphia, on the $100	1.50
St. Louis, on the $100	1.51
Pittsburgh, on the $100	1.53
Cincinnati, on the $100	1.56
Bridgeport, on the $100	1.65
Chicago, on the $100	1.71
Boston, on the $100	1.72
New Orleans, on the $100	1.72
Milwaukee, on the $100	1.76
St. Paul, on the $100	1.76
Minneapolis, on the $100	1.79
Lawrence, on the $100	1.80
New York, on the $100	1.82
Springfield, on the $100	1.82
Brooklyn, on the $100	1.85
Cleveland, on the $100	1.88
New Haven, on the $100	1.90
Rochester, on the $100	1.93
Lowell, on the $100	1.94
Lincoln (Nebr.), on the $100	1.97
Baltimore, on the $100	1.98
Detroit, on the $100	1.99
Camden, on the $100	2.00
Syracuse, on the $100	2.00
Trenton, on the $100	2.00
Lynn (Mass.), on the $100	2.00
New Bedford, on the $100	2.02
Newark, on the $100	2.02
Fall River, on the $100	2.03
Cambridge, on the $100	2.04
Providence, on the $100	2.05
Jersey City, on the $100	2.12
Grand Rapids, on the $100	2.14
Tacoma, on the $100	2.17
Utica, on the $100	2.20
Des Moines, on the $100	2.22
Buffalo, on the $100	2.29
Charleston (S. C.), on the $100	2.50

And yet, after a showing of that kind, which places Washington as the least taxed of them all, there come those here to-day and defend Washington's millionaires from paying tax on their wealth.

The general average paid by the forty cities which I have just named is $1.90 on each $100 worth of property, yet Washington complains of being overtaxed when she pays only a dollar on the hundred.

The special joint committee had a hearing upon that subject. And I wish to have this to say upon that subject:

"The report of the Joint Select Committee on the Fiscal Relations between the United States and the District of Columbia" contains—beginning on page 186, volume 1, Exhibit No. 38—an analysis of municipal taxation of various cities of over 100,000 in comparison with the District of Columbia. This exhibit was prepared under the supervision of a so-called "Citizens Committee" in support of the half-and-half plan of appropriation.

An examination of this exhibit No. 38 shows an ignoring, if not a specific denial, of the self-evident fact that the District of Columbia combines in its government the functions elsewhere separated into State, county, and municipal administrations and receives the same benefits. Thus ignored or denied, the document excludes from the municipal taxes of the cities embraced in its tabulations certain items of contributions to county and State support for the specific purpose of maintaining its argument that the District of Columbia bears a heavy tax in the aggregate and per capita in comparison with the other cities named therein.

Therefore it excludes county expenditures, as follows:

"1. Municipal taxation for general government expense of counties in which the cities are located (p. 192).

"2. Municipal taxation for conservation of health and sanitation of the counties in which the cities are located (p. 193).

"3. Municipal taxation for highways in the counties in which the cities are located (p. 193).

"4. Municipal taxation for interest on the debt of the counties in which the cities are located (p. 194).

"5. Municipal taxation for county outlays of the counties in which the cities are located" (p. 195).

For the same purpose it further excludes State expenditures, as follows:

"6. Taxation for the expenses of the general State government (p. 196).

"7. Taxation for State conservation of health and sanitation (p. 196).

"8. Taxation for State highways (p. 197).

"9. Taxation for apportionment of 'all other' State expenditures to counties and other civil divisions, principally for highways (p. 198).

"10. Taxation for interest on State debts and outlays" (p. 198).

With these exclusions the tabulations are easily manipulated to make a showing favorable to the contention that Washington pays a per capita tax comparable with the average of cities of over 100,000 population.

"But, strangely, the citizens' committee omitted any presentation of the expenditures of cities, particularly of census Group II, in which Washington is included, until their attention was forcibly directed thereto during the hearings. Whereupon, they promised to supply the omission, and did furnish a tabulation near the close of their argument, too late to permit an examination of their presentation by its opponents. (Vol. 2, facing p. 1636.) This tabulation was not of the cities of Group II, but the five cities of Group II, including Washington, and four cities of Group III.

These nine cities, including Washington, with their per capita expenditures, set forth in census bulletin No. 126, for the year 1913, are as follows:

Per capita expenditures.

CITY.	
GROUP II.	
Milwaukee	$25.38
Cincinnati	37.47
Newark, N. J.	36.80
New Orleans	24.94
Washington, D. C.	35.45
From local revenues	18.79
From Federal subsidy	16.66
GROUP III.	
Minneapolis	$33.50
Seattle	44.83
Jersey City	22.33
Kansas City, Mo.	41.48
All nine cities	33.33
All cities over 30,000	32.59
Cities of Group I	37.56
Cities of Group II	39.99
Cities of Group III	28.92
Cities of Group IV	24.15
Cities of Group V	22.87

Mr. LONGWORTH. That is the per capita tax?

Mr. JOHNSON of Kentucky. That is the per capita tax. Now, your city of Cincinnati pays per capita $37.47. Washington has a per capita tax from its local revenue of only $18.79.

Actually, then, the citizens of Washington make less expenditures per capita out of their own pockets than the citizens of any city named by the advocates of the half-and-half subsidy, and less than the average of any group of cities set forth in Census Bulletin No. 126.

So this is the argument and the order which comes to Congress from the advocates and local beneficiaries of the half-and-half subsidy:

You Congressmen from New York City, according to Census Bulletin No. 126, your constituents raised $39.52 per capita in taxes in 1913. You are asked to vote a subsidy so that Washington need raise only $18.79 per capita.

You Congressmen from Chicago, your constituents raised $31.91 per capita in taxes. You are now asked to tax them some more that Washington need raise only $18.79 per capita.

You Congressmen from Philadelphia, your toiling taxpayers raised $24.94 per capita. You are now asked to add to their burden that Washington may escape with only $18.79 per capita.

You Congressmen from St. Louis, your population were taxed $29.86 per capita in 1913. Now, let them pay some more that Washington taxpayers may escape with only $18.79 per capita.

You Congressmen from Boston, Cradle of Liberty and the Boston Tea Party, your sturdy citizens contributed for local taxes $47.10 per capita. Surely they will not mind a little extra taxation that the citizens of Washington may escape with only $18.79 per capita.

Mr. MANN. What figures did the gentleman give as to Washington?

Mr. JOHNSON of Kentucky. I will repeat what I said. A moment ago I said concerning Chicago:

They raised $31.91 per capita in taxes. Now, tax them some more that Washington need raise only $18.79 per capita.

Mr. MANN. I should have to challenge the gentleman's figures. I do not know where he got them.

Mr. JOHNSON of Kentucky. The gentleman will do nothing more than challenge them. He will not disprove them.

Mr. MANN. I know they are not correct.

Mr. JOHNSON of Kentucky. The gentleman is mistaken. They are correct if the census is correct.

You Representatives from Cleveland: Your taxpayers raised only $24.34 per capita. Surely you will not object to helping Washington out with her taxes at $18.79 per capita.

Baltimore with $24.68 per capita, Pittsburgh $38.26, and Detroit with $28.29. How can your Congressmen refuse to aid Washington taxpayers with a little subsidy to keep their burden down to $18.79 per capita?

Those are all Group I cities. Now, dear Congressmen from Group II cities—Buffalo, San Francisco, Los Angeles, Milwaukee, Cincinnati, Newark, N. J., New Orleans, and Minneapolis—your cities averaged only $39.99 in expenditures per capita. Washington has a champagne appetite and a beer income. It raises only $18.79 per capita and wants to expend $35.45 per capita. You vote in favor of having your constituents help make up the $16.66 deficit. You will be highly rewarded. Your names will appear often in the society columns of the Washington papers.

Or the case can be presented in a comparison of municipal indebtedness in 1913:

New York City	$1,177,321,916
Chicago	95,344,355
Philadelphia	117,386,321
St. Louis	25,034,860
Boston	118,666,742
Cleveland	53,027,487
Baltimore	71,410,448
Pittsburgh	61,423,379
Detroit	17,348,286
Buffalo	33,654,772
San Francisco	35,064,936
Los Angeles	43,444,330
Milwaukee	14,252,888
Cincinnati	66,376,079
Newark, N. J.	44,308,700
New Orleans	44,167,875
Minneapolis	23,199,804
Seattle	34,785,209
Jersey City	29,887,847
Kansas City	11,448,915
Washington	9,566,137

At this time the funded debt of Washington is only about $6,000,000.

Now, good Congressmen from all these cities: Your constituents have mortgaged their present and their future and their children's future for the great public improvements which were secured by these enormous bonded indebtednesses. You are now asked to add to their tax burdens whatever is necessary that Washington may be spared the same necessity.

Yet there is a rule of common sense and common justice: A country, a State, or a city is entitled to have expended for its own benefit just what it is willing to raise in taxes or to incur in public indebtedness, and not another dollar, not another cent. If Washington insists on eating nothing but cake, it should be permitted to raise the dough. [Applause.]

Mr. PAGE of North Carolina. Mr. Chairman, I yield five minutes to the gentleman from Texas [Mr. SLAYDEN], and I understand the gentleman from Minnesota [Mr. DAVIS] also yields to him five minutes.

Mr. DAVIS of Minnesota. I yield to the gentleman from Texas five minutes.

The CHAIRMAN. The gentleman from Texas [Mr. SLAYDEN] is recognized for 10 minutes.

Mr. SLAYDEN. Mr. Chairman, I regret very much that I can not have more time to speak about the matter to which I am going to invite the attention of this large and interested audience of Members. While I am not going to speak about the bill which is under consideration, I shall talk about a matter that I think most Members are interested in, because I am going to undertake very briefly—courteously, I hope, but firmly—to resent some slanders that have been uttered against the Texas National Guard.

An editorial that appeared in a Washington paper last Sunday had as its heading, "Poor Showing of the National Guard." I shall not concern myself with that part of it which refers to the National Guard of New Mexico and of Arizona. Concerning those two divisions of this military body now on the border I am not informed.

But I have kept myself reasonably well informed about the Texas National Guard, because their rendezvous is in my home town of San Antonio. But "A poor showing of the National Guard," accompanied by a general attack on the character of these people as soldiers and on their qualities as men is, at least, a fair inference from the remarks that have been made, and these remarks have not been confined to papers in Washington, but have been a conspicuous feature of a number of papers all over the country. There seems to have been a concerted and untruthful attack upon the National Guard or Organized Militia of the States. Now, I would like to ask, in what way has there been a poor showing? And in order that I may answer that question with accuracy, I have jotted down some few things that I have learned from the War Department and from other sources of information.

The testimony of Gen. Albert L. Mills, who is the head of the Militia Division in the War Department, given before the House Committee on Military Affairs when the Army reorganization bill recently enacted was under consideration, disclosed the fact that at the 1915 inspection of the National Guard of the State of Texas there were only 2,236 officers and men in that organization; but less than a year later, Mr. Chairman, approximately 4,000 responded to the President's call. Of this number less than 3 per cent were not inclined to agree to serve in the Army for an indefinite period. Now, let it be remembered in behalf of these men that they have wives and children dependent on their earnings. Many of them have meager earnings at best, and when the head of the family quits working, the bread supply of the family is in actual danger. The people of my State are not paupers, but they are not rich. They nearly all have to work for a living. We have few idlers, few men of leisure in the State.

Now, without knowing the conditions in each case, the peculiar obligations of each man, you and I, Mr. Chairman, and the Members of this House are not in a position to judge of that matter. Let us be charitable, and let us keep our minds on the fact that the whole of the Texas National Guard did assemble on the call of the President, and with a promptness that has caused Gen. Funston, their commander in chief at this time, to speak of them in words of the strongest commendation of their soldierly qualities, their general alertness, and their willingness to do service for their country and to obey the orders of their superior officers. [Applause.] I have here a report from the San Antonio Express of last Saturday of the militia activities of the previous day. It is a satisfactory answer of these critics of the Texas troops:

"The question whether the National Guard of the country can be depended on when needed"—

I am quoting now—

"has been finally and eloquently answered, as far as the Texas troops are concerned," remarked one regimental officer. "There has been a lot of talk that the National Guard could not be depended on in case of war. We have been told in the Halls of Congress and in the newspapers that the men would not volunteer and that there was no way to compel them; that the money and time spent training them had all been wasted. The men of Texas were not compelled to enlist in the United States service, and they did not enlist not knowing what they were doing. The effect of signing the muster roll was explained to each man and all entered the service with full knowledge of what it means."

Gen. Frederick Funston yesterday referred to this fact and said that it was a remarkable showing. The general seemed much pleased with the result of the muster.

FEW FAILED EXAMINATIONS.

The medical officers took charge of the men as soon as they were out of the hands of the mustering officers, and examinations were begun. The surgeons were pleased with the high standard of the men, and said that very few would be rejected. All of the companies have been carefully "weeded" of men who were physically unfit at their home stations, and the few rejections resulting from examinations were for diseases contracted since the previous inspection.

The entire brigade was inoculated with typhoid serum yesterday. Several surgeons were detailed for the work, and it was quickly done.

The Adjutant General of the Army, H. P. McCain, told me to-day that he had a telegram in his office from Funston's headquarters, saying that 3,354 men had been mustered into the service up to the hour at which that telegram was dispatched. [Applause.] I think that is doing very well considering that less than a year ago the whole Texas Guard had only 2,236 men in it.

In passing I will say, Mr. Chairman, that after the 1915 inspection the impression spread throughout the State that the services of the guard might be needed, and in a few months it was increased by more than 50 per cent. Does that show any disposition to hang back? Does that show any inclination to dodge a situation that might have some danger in it? Fifty per cent increase! No; that does not show any inclination on the part of these Texans to shirk any duty that may be expected from them, as some of these slanderous newspapers have persistently said.

Now a word as to delay. Some of these Texas guardsmen had to travel 24 hours on fast trains to reach the rendezvous at Fort Sam Houston. Naturally they needed a day or so at home to adjust their personal affairs, and then remember the distance they had to travel. Keep in mind that they are citizens not professional soldiers, and were engaged in all sorts of work and had business ties that could not be broken in five minutes, except in newspaper offices.

The mobilization was ordered on the 9th of May, and on Friday the 20th of May, 11 days later, 3,354 of these citizen soldiers of Texas had been examined by the medical officers and passed, had signed the roll, and then mustered into the service. Any hanging back there as has been untruthfully charged? The transfer of Texas troops commanded by Gov. Fergusson to service with the United States under the command of Woodrow Wilson involved a lot of clerical work which can not be done in a minute, except in some newspaper offices. The enlistment of the physically unfit must be prevented for the general good of the service and for the protection of the Treasury through the needless growth of the pension list.

Mr. LONGWORTH. Will the gentleman yield?

Mr. SLAYDEN. My time is very brief.

Mr. LONGWORTH. I wanted to ask if there is any connection between the Texas Rangers and the National Guard?

Mr. SLAYDEN. Not at all.

Compare this rapid growth of the little Texas army with the vain efforts to enlist 20,000 men for the Regular Army. In about 90 days, with the most extraordinary efforts to get recruits, less than 7,000 men were enlisted for the United States Army under what would almost be considered an emergency call.

Reference was made last Sunday in the newspapers from which I have quoted to some alleged remarks of governors of Texas that if the United States would stand aside and let Texas undertake the job she could handle the border situation. It may be that they did say something like that, Mr. Chairman, but they were individual not official utterances. They spoke for themselves and not for the State.

I am not inclined to boast, but I will venture the statement that if circumstances required it Texas could do so. [Applause.] She does not invite nor does she expect to be given the task. The border is a national as well as a State boundary and the question is international.

Texas will do her duty fully to the satisfaction of the country in the settlement of this question, but she does not expect to prevent raids into the United States with three or four thousand troops, when more than 19,800 Regulars that were on the border on March 9 failed to prevent it on that day at Columbus, N. Mex. There are more than 2,000 miles of border from the Pacific to the Gulf and occasional raids of thieves and murderers have always occurred, and always will, I suppose, as long as the border exists.

A handful of Texans, Mr. Chairman, defeated the Mexicans at San Jacinto and made a great republic out of a Mexican province that had a glorious national existence for nine years and then came into the United States, not as a conquered territory but by courtship, coming in through honorable wedlock and receiving her dower, which is very different from conquest. [Applause.]

Texans distinguished themselves in Mexico in the War of 1845. They made themselves immortal by service with Hood, Terry, and Ross in the Civil War, and I beg to assure you, now that divisions between us no longer exist, you may rely upon them as staunch, loyal, valiant defenders of the Union. [Applause.]

Mr. DAVIS of Minnesota. Mr. Chairman, I yield 35 minutes to the gentleman from Massachusetts [Mr. TINKHAM]. And I want to caution the gentleman to bring himself within the 25 minutes, for I have no further time to yield.

Mr. TINKHAM. Mr. Chairman, I shall not only endeavor to confine myself in debate to 25 minutes of time, but also to the real question before the committee. The question before the committee is the District appropriation bill, with various proposed measures of legislation, and I am here to speak and protest against that measure of legislation which repeals what has been the law since 1878, concerning the fiscal relations of the District of Columbia and the Federal Government, the law which has required that in all appropriation bills since that date the Federal Government should pay half and the District of Columbia should pay half.

Mr. Chairman, the vision in the eyes of Washington, the founder of this city; the vision in the eyes of L'Enfant, the planner of this city, was not the same as that of the joint select committee when it drew its report; nor was it the same as the vision of the honorable Representative from Georgia, who has spoken in support of its report; nor that of the honorable Representative from Kentucky, who has spoken to the same effect, and who desire to see the wise fiscal provisions now obtaining in the District of Columbia abolished, for the abolition of the present equitable arrangement between the District of Columbia and the Federal Government must inevitably lead to a lesser Washington rather than a greater Washington; to a less worthy and magnificent Capital for this great Nation. Had the vision in the eyes of Washington and of L'Enfant been such as the vision of this joint select committee and these honorable Representatives, then Washington would not be here, and if Washington were here it would not be the imperial city that it is to-day.

Mr. Chairman, in discussing the issue now before the committee and the legislation proposed in the appropriation bill, which is based upon the report of the joint select committee, I desire to bring your attention closely to the report. It is one of the most curious and extraordinary legislative reports that

has ever been brought to my surprised attention. The joint select committee was directed by the Sixty-third Congress what it should do in the following language:

To submit to Congress a statement of the proper proportion of the expenses of the government of the District of Columbia, or any branch thereof, including interest on the funded debt, which shall be borne by the said District and the United States, respectively, together with the reasons upon which their conclusions may be based.

The joint select committee was directed specifically to report the proportion of the division of the expenses between the District of Columbia and the Federal Government. This was their sole function and only direction. It has not reported any proportion, as directed. It has merely reported in doubtful language that there seemed no longer any need of the so-called half-and-half plan. I therefore submit to the committee that the joint select committee has not conformed to the directions of the Sixty-third Congress. When, in 1878, a somewhat similar committee was appointed to fix the fiscal relations between the District of Columbia and the Federal Government the very same directory words were used as were used by the Sixty-third Congress—in fact, the exact words—and this committee in 1878 did as it was directed, and, as it should, found the proportion. Now, I submit, Mr. Chairman, that the joint select committee has not done what it was directed to do, nor has it done what, by precedent, its predecessors did. In discussing the joint select committee's report I do not challenge any of its findings of fact, but I do maintain, first, that it did not do as directed by the Sixty-third Congress, and, second, that the reasons given in its report are inconclusive and, in fact, would support the maintenance of the present half-and-half plan rather than its abolition.

The committee finds, on page 14 of its report, that the assessment of the property in Washington is fair and the rate of taxation is reasonable, and that, therefore, the Nation is not being asked for an unfair contribution under the present law. This important finding of fact needs comment, as it completely refutes the statements made in the Sixty-third Congress which brought about the appointment of the joint select committee, which, in turn, has led to the change in fiscal relations recommended in the present appropriation bill. Sensational claims were made that property was undervalued and that the tax rate was not fair. Had these claims been known to be untrue, the joint select committee would never have been appointed and there would have been no proposal to change the equitable relations now maintained between the District of Columbia and the Federal Government. This committee should take into consideration this important finding of fact in their deliberations, for if it finds that the very basis for the appointment of the committee has been destroyed, it means that the very reasons for the proposed abolition of the half-and-half plan were unfounded and the committee should seriously hesitate to adopt a new, indefinite plan of appropriations, which many believe will be destructive to the development of Washington along the lines it has developed in the past—grandly, graciously, and wonderfully.

Mr. Chairman, on page 11 of the committee's report the committee finds that more and more land is being acquired by the Federal Government and that more and more land in the District of Columbia will be acquired for the Federal Government in the future. They also find specifically that the so-called half-and-half plan has been fair both to the Federal Government and the District of Columbia in the past. If this plan has been fair in the past and more and more property is being exempt from taxation by being taken by the Government, then how can it be claimed that now or in the immediate future the half-and-half plan will be unfair, except that the District of Columbia will be called upon for a greater proportion than is its fair share? Is it not rather possible that the half-and-half plan to-day is unfair and that the Federal Government should contribute more rather than less, not only now but in the future? In any event, the half-and-half plan is not unfair to the Federal Government, and should be maintained, as is the wish of the residents of the District of Columbia.

At the conclusion of the report of the joint select committee, on page 15, it says "that Congress shall pursue a definite policy of regular and liberal appropriations." If the legislation in the appropriation bill is adopted, this committee will be adopting an indefinite policy in place of a definite policy. The present measure calls for a definite contribution from the District of Columbia, with a certain tax rate, but the contribution of the Federal Government is left uncertain. I ask that the recommendations of the committee be ignored and that the half-and-half plan be maintained as definite and the proposed legislation be defeated as indefinite. Under the half-and-half plan the appropriations are regular; under the plan proposed in the appropriation bill appropriations will be irregular.

So far as liberality is concerned, the very first application of this new indefinite policy shows that it will result in illiberality and parsimony.

Mr. RAINEY. Mr. Chairman——

Mr. TINKHAM. I must decline to yield, as I have but a short time to say what I desire. Under the operation of the proposed new indefinite system as opposed to the definite system of the half-and-half law now maintaining, we have before us a bill which is less in amount than a number of the other District appropriation bills of the past. The largest appropriation bill in the past was made in 1915, when the appropriations were $12,252,000; the next largest was made in 1912, when the appropriation bill was $12,061,000; the third largest appropriation bill was in 1916, when the amount appropriated was $11,949,000. All of these appropriation bills were passed under the half-and-half plan. The present bill calls for an amount less than either of these, and is the first production of the new proposed policy. Is there wonder that those who believe in liberal appropriations for the National Capital and a magnificent future for it should feel that an unsound course is being pursued in the abolition of the present beneficent and fair adjustment between the obligations of the Federal Government and the District of Columbia. It may be said that the bill is not finished, and that there will be material additions to its appropriations, but the naked fact is that there is not going to be as liberal appropriations as there were in some of the bills in the past, and therefore that the final conclusions of the joint select committee are not being carried out by adopting the proposed plan.

I want to bring the attention of this committee to the fact that in the very language of the report of the joint select committee it is left in much doubt whether it really intends to recommend finally and conclusively the abolition of the half-and-half plan. The report says, on page 11, "but we think." That is not a word of assertion or an imperative word. "We think"—meaning, perhaps, that they may be in doubt "conditions of to-day and of the few years last passed are so different from the conditions of 1878 that this arbitrary rule, a rule at that time of seeming necessity, need no longer be applied to District appropriations." The committee merely makes a suggestion that it may not be needed; that perhaps it is not needed. If it had desired to recommend the abolition of this so-called arbitrary rule it could and should have used the word "should" in place of "need;" but they did not. This statement leaves Congress without the guidance of the joint select committee to determine whether it is well or not to abolish the half-and-half plan. Its recommendation can only be said to squint in the direction of its abolition. This should be taken into serious consideration by those who may be doubtful as to the advisability of the proposed drastic action.

Mr. Chairman, commenting upon the first product of the proposed new system, let us look again to the present bill. It calls for an appropriation from the District of Columbia of 70 per cent and 30 per cent from the Federal Government. I ask you whether that is fair? I ask you if the Federal Government has not at least a half interest in the District of Columbia? Is there an honorable Representative upon this floor who desires to say to his constituents or to the Nation, that the United States has less than 50 per cent, less than a half interest in the District of Columbia?

Mr. Chairman, on the question at issue I want for a moment to invoke the history of the past, and I believe that the past is the best guide for the future. There was once an indefinite plan of appropriations for the District of Columbia, just such a plan as is now proposed, and that indefinite plan called upon the District to appropriate what it could and the Federal Government would make up the deficit. That plan was in operation from 1800 to 1878. The result of that plan, which plan was similar to the plan herein proposed, was a bankrupt city; a city of which all Americans were ashamed, and a situation which was such a scandal that Congress was called upon by the Nation to apply a cure. As a result, after great deliberation, in 1878 a definite plan for regular and liberal appropriations was evolved, which plan is the plan known as the half-and-half plan, and which is yet the law. If the past can give any guidance for the future, then this committee should not adopt the proposed indefinite plan, but should maintain the present definite and fixed one. The fundamental and vital trouble with the report of the joint select committee, one that can be seen from its language and its reasoning is that the committee takes the view that Washington is first an American city and afterwards the Capital of the United States. It therefore gives its attention, first, to what Washington shall contribute and then what the Federal Government shall contribute. This process of reasoning is narrow, wrong, parochial, and unpatriotic. The committee should first have considered Washington as the National Capital and

then as an American city, and have asked the question, first, What shall the Federal Government contribute? and then, What shall the District of Columbia contribute? I ask the honorable Representatives who strongly oppose the half-and-half plan how they explain the fact that this very Congress has already made an appropriation for a bridge across the Potomac, half of which is to be paid for by the Federal Government and half to be paid for by the District of Columbia. Why was that proportion fixed, if it was not fair, if it was not just?

The only answer can be that it was the sense of this Congress that the proportion was fair and equitable. If this proportion was fair and just in relation to a bridge, why should it not be fair in relation to the maintenance of a street, the building of a school, or the construction of a fire house? Why should this proportion not be fair in relation to other expenses of the District of Columbia. The chairman of the Appropriations Committee has just assented to an amendment to the bill by which the interest and sinking fund of the debt of the District of Columbia should be paid in a proportion of half by the District of Columbia and half by the Federal Government. If he feels that this is a fair proportion to pay upon the debt, why not upon the general expenses for the maintenance of the District? Every American city makes an appropriation for the interest and sinking fund upon its debt, and it is made upon the same basis that all of its appropriations are made for general maintenance. When you say that the debt of the District of Columbia shall be paid for, 50 per cent by the Federal Government and 50 per cent by the District of Columbia, you are asserting beyond denial that the principle of half payment by the Federal Government and half payment by the District of Columbia is right, but you refuse to apply the principle further than the debt. This is a complete contradiction in terms and in principle. An honest search shows the absurdity of the committee's reasoning and its confusion of ideas and its confusion of sound with unsound principles.

Mr. PAGE of North Carolina. Mr. Chairman——

Mr. TINKHAM. Mr. Chairman, I can not be interrupted.

The CHAIRMAN. The gentleman declines to yield.

Mr. TINKHAM. Let us reason this question from a different point of view and with more philosophy. The fundamental difference between Washington and any other city of the United States is, first, that Washington does not tax itself or make its own appropriations, but that those are imposed by Congress; and, second, that Washington is a capital city with all that that implies—broad streets and avenues, much property dedicated to public uses all withdrawn from taxation, and laws prohibitive to the development of manufacturing establishments. From these facts must inevitably follow a different treatment of fiscal policies to the treatment of such questions in any other city of the United States. No fiscal system should allow of any uncertainty, or at least the uncertainty should be reduced to a minimum. Appropriations from year to year should be systematic and orderly. In the District of Columbia, as the appropriations come not only from the National Treasury but from the tax revenue of the District of Columbia, it is necessary in order that the progress of the Capital may continue in an orderly and systematic manner that there shall be a definite apportionment between the contribution of the National Government and the contribution of the District of Columbia, so as to insure a sufficient amount of money for public purposes without inflicting unjust taxation upon the people of the District of Columbia, and to that end a definite apportionment should be made. In practice the so-called half-and-half plan, although arbitrary, has worked well.

Where two people are to make a contribution for certain continuing purposes and the one's contribution is fixed and the other may give from time to time what his whim and caprice may allow, the inevitable result is trouble, injustice, and inequity. To obviate any such difficulties mathematics, as part of human machinery, is invoked and some definite proportion settles the problem. This should be done in settling the fiscal relations of the District of Columbia to the Federal Government. It might well be said that Congress should set a standard and safeguard for itself so as to put a restraint upon undue economy or undue extravagance. The theory upon which the Capital was founded was that all expenditures would be for the benefit of the whole people, that the District of Columbia was the child of the Nation, the creation of the Union for its own purposes, and that Congress in making laws for the District of Columbia was a body acting for all the people of the Nation. Washington should be protected against arbitrary rule, and it has been said by one of our greatest modern statesmen that the half-and-half plan was a protection for the District of Columbia against the abitrary rule of Congress, no matter how well Congress might be disposed toward the District of Columbia.

A beautiful Washington spreads its splendor before an admiring Nation. Its beauty and its grandeur are the result of wise and beneficent laws, and those laws should not be changed without convincing proof and without irresistible evidence that Washington will be made a greater and more worthy Capital of this great Union of States. The joint select committee has not adduced this proof, nor has this evidence been submitted in this debate. [Applause.]

Mr. DAVIS of Minnesota. Mr. Chairman, I yield five minutes to the gentleman from Pennsylvania [Mr. FOCHT].

Mr. FOCHT. Mr. Chairman, within the five minutes which I have been given to discuss this question, and one that has commanded the attention of every Congress since I have been here, I will not be able to give all the thought I have to it; but I want to say that I am in hearty accord with the gentleman from Massachusetts [Mr. TINKHAM], and I am glad to say that my home State of Pennsylvania is in full alignment with the idea of public development and improvement that Massachusetts has always been.

Now, what is Washington? We saw yesterday the distinguished leader of the Republican side propose that we should grant franchise to the colored women of Porto Rico. No franchise is given to even the males of Washington, yet the National Government has control of all the property. It can preempt every avenue and every alley. It has full charge and full control and direction of the entire District of Columbia, and yet none are allowed to vote, and I understand now it is proposed to tax them 70 per cent of the total levy within the District.

My friends, it is a matter of common decency and patriotism that since we are to consider and undertake to follow out the designs of George Washington and his French engineer and make this the show place, not only of the country but of the Western Hemisphere and the world, the Government should at least largely share in the outlay and burden of support.

But we find it is proposed by this committee that the residents of the District of Columbia shall pay the greater share of the expense of governing the Capital City. The residents of the District of Columbia comprise whom? Largely shopkeepers, boardinghouse keepers, clothiers, tobacconists, and barbers, and a few in many instances poorly paid Government employees, and these people are called upon to help make this the world's most beautiful city and support it for the pleasure of winter visitors and transient Congressmen.

It is true, as alleged, that there have been land sharks here. Yes. We could even point to former Presidents who have been in land speculations and to Congressmen and to other public officials, so that if land sharks have come here, it is probably due to the example set them by men in the official life of the Federal Government.

But my surprise was greatest when at a hearing it was stated by people competent to know that in this great National Capital the children of some of the schools do not have free school books. I was further surprised when I saw the arrangement of some of the schoolhouses which I visited. I was more than ever astounded when I was told that much of this was due to the inefficiency and incompetency of those who undertake to direct the city affairs, and who in large part have charge of the construction of some of these buildings. And to-day we have the admission that hospitals are not ample to accommodate the sick of the District.

Think of that for a minute! In the National Capital of a Government like this, a Nation that has the revenues of any half dozen empires of the world, and yet is so parsimonious as not to take care of the school children and the feeble and the ill of the District.

Mr. GORDON. Mr. Chairman, will the gentleman yield?

Mr. FOCHT. No, sir; not now; in five minutes.

I sincerely trust, Mr. Chairman, that there will be a broader and more magnanimous spirit exhibited toward this city. If there are any sharks, as alleged, wipe them out, and when you wipe out the land shark, wipe out also the illegal loan shark, and for the credit of the Nation, for the credit of this committee and of Congress, also wipe out the Chinese and other cheap joints which decorate the Avenue right before the Goddess of Liberty. [Applause.] Until we do that, my friends, it will not be for us to legislate and extend the franchise to Porto Rico and the Philippine Islands. We have plenty to do within a square of this great Capitol of our country. And so let us, from the North and the South, from the East and the West, feel that this is the great Capital City of our great country. Let us realize that the people of the country differentiate between a great Capital City of

beauty and convenience as against great commercial and industrial cities like Philadelphia, Pittsburgh, and New York, where wealth abounds and property values have no limit. [Applause.]

The CHAIRMAN. The time of the gentleman from Pennsylvania has expired.

Mr. PAGE of North Carolina. Mr. Chairman, I yield one minute to the gentleman from Minnesota [Mr. STEENERSON].

Mr. STEENERSON. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. PAGE of North Carolina. Mr. Chairman, I yield 15 minutes to the gentleman from Ohio [Mr. GARD].

The CHAIRMAN. The gentleman from Ohio [Mr. GARD] is recognized for 15 minutes.

Mr. GARD. Mr. Chairman, as a member of the joint select committee which took up the question of the fiscal relations between the District of Columbia and the General Government, I desire to reply more immediately to the prepared and contributed remarks of the gentleman from Massachusetts [Mr. TINKHAM].

Certain complaints are found with the report of the Committee on Fiscal Relations, and these I shall discuss. In the first place, it is said that the committee has not done that which the House intrusted it with doing; in other words, that it has not found a proportion of definite contribution.

Gentlemen of the committee, in the consideration of the trust which was given to this joint select committee by the Senate and by the House of Representatives, there were two things which we considered. The first was the payment of the interest and the principal upon the funded debt. The second was the question of the proportion to be paid for the expenses within the District of Columbia by the residents thereof.

The committee made a finding that under the existing law, the law which authorized the issuance of the so-called 3.65 bonds which constitute the whole of the funded debt of the District of Columbia, under the continued practice of the years, under the rulings of at least two different Comptrollers of the Treasury, and in full justice to the holders of the bonds, the residents of the District of Columbia and the residents of the General Government outside of the District of Columbia, that the proportion of half and half should obtain.

Therefore, I suggested on yesterday to the chairman of the subcommittee of the Committee on Appropriations in charge of the District of Columbia appropriation bill that the language of the pending bill was not in accord with the finding of the Joint Select Committee. The chairman of the subcommittee has accepted my suggestion and will incorporate an exception, paying "half and half" the funded debt of the District of Columbia. This is because, as I said, an existing law authorized the issuance of the bonds, has carried them down through the years, and that existing and particular law should continue until the payment of those bonds. The city of Washington, I think, is most fortunate in this respect, for of these 3.65 bonds, which compose its entire debt, only about $6,000,000 remain unpaid, and this is to be paid at the rate of about $975,000 per year, so that in 1922 or 1923 the city of Washington will have no debt of any kind, no funded debt or any other sort of debt, but will be a municipality free from any and all indebtedness.

Now, in the consideration of the other question referred, the committee found that there was no necessity of determining any proportionate contribution between the residents of the District of Columbia and the residents of the United States outside of the District of Columbia, but did find that the responsibility of the residents of the District of Columbia should be fixed definitely and absolutely; therefore it was the finding that, just as the residents of New Orleans and just as the residents of New York and of Boston and of Cincinnati and other cities do, so the residents of the city of Washington or of the District of Columbia should return a fair and reasonable amount in taxation, and that that should be their contribution to the government of this city and of this District, and that with that contribution their responsibility should end.

I do not know that the language in the bill is most happily chosen with regard to the finding of the joint select committee, since the finding in effect was this, that the residents of Washington should pay a reasonable amount of taxes into the Treasury of the United States, that this entire amount should remain in the Treasury of the United States as a credit to a special District fund, and that this fund should be used for the maintenance of the government in the District of Columbia, and for no other purpose.

With that idea in mind, it followed that there was suggested a definite and fixed responsibility and that in so far as the residents of this District were concerned there could be no greater apportionment of municipal expense against them. Their responsibility was fixed, was definite, and was certain. That was in the minds of the committee, because the committee not alone found it impossible to determine any positive proportion, but under their thought it was unnecessary, as is stated in the language of the report:

> In seeking to apportion benefits resulting to the General Government and to the citizens and residents of the District of Columbia, it is manifest that no line or rule of distinction can be found.
>
> The expenditures of the District of Columbia are for police and fire protection, education, sanitation and health, charities, correction and reform, the care of the insane and the poor, and in each and every one of these specific items of expense both the General Government and the District of Columbia are benefited, but the ratio of benefit is impossible to determine and, under our thought, unnecessary.

There can be no doubt, gentleman of this committee, that the power conferred upon this select committee to determine the proportionate amount of contribution contained the general power of informing the House whether or not any proportionate contribution could be authorized by the evidence. This committee was in session for two months, and we heard very carefully every one who presented himself to give information as to the state of affairs within the city of Washington and the District of Columbia. I am very happy to say that a great contribution of information was afforded by the representatives of the citizens' committee of the city of Washington. They had a very carefully prepared brief which was filed with the committee, and which the committee studied, and they had the information from the most representative men in the city of Washington, touching the question of the contribution, if any, which was to be made by the residents of Washington and the General Government. We approached this question with a full realization that the city of Washington is the capital of the greatest Nation on earth, and for one I believe that the city of Washington should be maintained in all its departments as the model municipality of the world. The city of Washington is to-day one of the most beautiful cities in the world, and it should be made increasingly beautiful. Therefore it was the idea of this committee that the appropriations, which necessarily are yearly, should be regular, should be systematic, and all operate toward the end that the city of Washington should become the model of all municipalities of the United States of America.

It is indeed unfortunate that the gentleman from Massachusetts [Mr. TINKHAM] has chosen to say in his speech that the action of the Subcommittee on Appropriations is in direct violation of that which the select committee has found, when he seeks to convey to the House his idea that in this bill there is a relative contribution of 70 per cent by the residents of the District of Columbia and 30 per cent by the General Government.

In addition to the amounts which are carried in this appropriation bill, the gentleman from Missouri [Mr. LLOYD] this morning very aptly gave the information that in the sundry civil bill are carried $2,000,000 additional; so, instead of $3,000,000 being contributed, somewhat over $5,000,000 are now being contributed by the General Government to the maintenance of municipal affairs within the District of Columbia. But, independently of that, it was not the idea of the select committee, nor is it the idea of this subcommittee, to report any authorized proportion, either 50-50 or 60-40 or 70-30, but only to find, as the select committee has found, that the only contribution which the residents of the District of Columbia should be called upon to make is a fair, reasonable, and honest response to taxation; that when they have made that response then their duty and their responsibility as residents of this District must cease, and that whatever is necessary for the continuation of the activities of this Capital, the carrying on of all its municipal expenses, shall devolve upon the General Government whose Capital it is. So that it is not now for the Members of this House to be assailed with the expressed idea that the 50-50 contribution has been abandoned and in its place has been substituted a 70-30 per cent contribution.

Mr. TINKHAM. Mr. Chairman——

The CHAIRMAN. Does the gentleman from Ohio yield to the gentleman from Massachusetts?

Mr. GARD. Very gladly.

Mr. TINKHAM. I desire to ask the honorable Representative from Ohio if, in explicit language, the committee were not requested to find a proper proportion, and I desire to ask if they have found any proportion?

Mr. GARD. I explained that just a moment ago. If the gentleman had been in the Hall, doubtless he would have heard my explanation. I read from the report of the select committee that the committee found that all of the assembled things

which are necessary to carry on a city and necessary to carry on the city of Washington and the District of Columbia were impossible to be apportioned between the citizens of the District and those of the General Government, and therefore we found that the only responsibility which these people of this District should have was a fixed and certain responsibility in taxation.

I am of those who believe in the continuation of improvement of Washington as a typical modern city, as the model city of the world, and I therefore believe in all necessary playgrounds and parks. I believe, as does the gentleman from Wyoming [Mr. MONDELL], in the beautification and improvement of the river front. I believe, too, in the authorization of money for the building or improvement of a municipal hospital. I believe in all of these things, because they mean the development of Washington as a truly capital city, as the representative city of this great Government. But in every respect I think that the residents of Washington may fully rely upon this Congress and succeeding Congresses of the United States to maintain Washington as a city beautiful in every way as should be maintained the Capital of our Nation. [Applause.]

The CHAIRMAN. Debate having expired, under the unanimous-consent order the Clerk will read the bill under the five-minute rule for amendment.

The Clerk read as follows:

Be it enacted, etc., That hereafter all appropriations made for the support of the government of the District of Columbia, including all sums appropriated in any general appropriation act indicated to be paid out of the District of Columbia revenues and amounts to pay the interest and sinking fund on the funded debt of said District, shall be paid out of the revenues of the District of Columbia to the extent that the same shall be sufficient therefor and the remainder out of any money in the Treasury not otherwise appropriated.

Mr. PAGE of North Carolina. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from North Carolina offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. PAGE of North Carolina: Page 1, line 6, strike out the word "and" and insert the word "except."

Mr. PAGE of North Carolina. I merely want to say for the benefit of gentlemen who were not in the House when I mentioned it earlier this morning that this amendment is in order to except from the provision of this paragraph the sinking fund and bonded debt and interest thereon, and in another place in the bill I shall offer another amendment to make it payable half from the revenue of the District and half from the Federal Treasury.

Mr. MANN. Mr. Chairman, it has been a good while since I have read the report of the joint commission, and I do not know that I have ever read it very carefully, but my recollection is, refreshed from what I have heard to-day, that the commission recommended that the funded debt be paid half and half, the proportions otherwise being paid first out of the District revenues and the balance out of the National Treasury.

Mr. PAGE of North Carolina. That is my understanding of it.

Mr. MANN. Am I correct, I will ask the gentleman from Ohio?

Mr. GARD. As expressed possibly not exactly correct, but the substance of it is true.

Mr. MANN. As the gentleman from North Carolina said this morning, it was a mere matter of bookkeeping. Of course, it is absolutely immaterial what fund the funded debt is paid out of, after you provide that the District revenues shall be wholly absorbed in some other way, the balance is to be paid out of the Federal Treasury. I am very much surprised that such a distinguished joint commission as was appointed should have made a distinction between the method of paying the interest and principal of the funded debt and the other expenditures of the District, because in the end it does not make one cent's worth of difference. It will add a little to the bookkeeping cost to accept this amendment. The District revenues will all be expended in some way, and the balance will be paid out of the General Treasury. To say that a particular item shall be paid one-half out of the Treasury and one-half out of the District revenues is only to add to the expense of somebody. How a joint commission composed of such eminent gentlemen could have brought in a report making this distinction, which an ordinary bookkeeper, getting $75 a month, or even $50 a month, would have known better, really beats me.

The CHAIRMAN. The question is on the amendment offered by the gentleman from North Carolina.

The question was taken, and the amendment was agreed to.

Mr. BORLAND. Mr. Chairman, I move to strike out the last word. I have not taken any time in general debate on this bill, although I have been very much interested in the subject of fiscal relations of the District since my first service on the District Committee eight years ago. I became convinced then that the half-and-half plan had been outgrown; not only that, but actually became an evil both to the Government and to the District.

At the time the half-and-half plan was adopted in 1878, the District, in common with many other American municipalities, following the era of extravagance after the Civil War, had become enormously involved in debt and was totally bankrupt. It was necessary for the Federal Government to maintain a Capital here and conduct the operations of the city government. The cost was not material at that time for it was less than half a million dollars. So that the fact that the Federal Government contributed 50 per cent and 50 per cent was raised by taxation in the District was a mere hasty and arbitrary division of the expense. But since that time, under the fostering care of the Federal Government, the value and amount of private property of the District has increased enormously, until to-day, with only 15 mills on the dollar taxation, the District raises $8,000,000.

If the arbitrary requirements of law compelled the Federal Government to contribute dollar for dollar we would have to contribute $8,000,000, making a total of $16,000,000 for governing the District, which is more than is needed. Therefore the time has come when the half-and-half principle has broken down of its own weight.

This proposition simply is that the private property in the District pay 15 mills on the dollar, which no man will contend is an excessive amount for city property, and that this shall first be applied to its own local purposes. If that is not a fair business proposition, I would like to see one. Then we go further and say that, regarding this as the National Capital, if Congress imposes a higher cost of administration than the city needs the Federal Government shall meet the excess. In addition to that, there are a great many other things which in other cities the cities would have to provide—like the park system, the monuments—the great deal which goes to the beautification and attractiveness of the city, is supplied by the Federal Government without expense to private property.

No man will contend that private property here ought to pay a less rate of tax than private property in other cities. I do not think it can be contended that 15 mills is an excessive rate of taxation for a city of this size and governed as it is.

But the worst feature of the half-and-half principle is that it has become the shelter of tax dodgers. It is impossible, as long as this half-and-half principle exists and the 15 mills real estate tax will raise $8,000,000, to increase the tax burden of the District. You can not raise a saloon license in the District of Columbia without taxing the Federal Treasury an equal amount. That is a plain absurdity.

The CHAIRMAN. The time of the gentleman from Missouri has expired.

Mr. BORLAND. Mr. Chairman, I ask for five minutes more.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. BORLAND. There is another disagreeable feature about this thing which lurks behind the demand for the repeal of the half-and-half clause. Under the present fiscal system no taxes are levied on intangible wealth, and thus this city has become the center of intangible fortunes. All you have to do is to go to the probate records and find them. This man Post, who manufactures the breakfast foods, or did until he committed suicide, was a legal resident of the District of Columbia. Why? Because he had $31,000,000 intangible property and $240,000 real estate. On his $31,000,000 he did not pay a penny to the District of Columbia; he did not pay anything, because no law provided for it. And to the State of Michigan he did not pay a dollar, because he was not a resident of that State. I could name 100 such cases. We can not tax intangible property while the half-and-half plan is in existence, because if we raise $8,000,000 under the present plan, $16,000,000 is more than we need, and if we tax intangible wealth and raise $3,000,000 or $5,000,000 more, making a total of $13,000,000 raised in the District, we would have to double that and make it $26,000,000 out of the Federal Treasury.

We need not increase the taxes on the small home owner or the small merchant, who pays the bulk of the taxes now. But there is a vast amount of untaxed wealth in the District that knows it may be taxed if the half-and-half plan is abolished.

So you see it operates as an automatic check upon the taxation of intangible property or accumulated wealth in the District of Columbia. Now that is the whole secret; that is the whole story in opposition to the repeal of the half-and-half.

Mr. FESS. Will the gentleman yield?

Mr. BORLAND. In just a minute. I desire to present one more point. Not only that, but there is no law in the District of Columbia for the taxation of inheritance, and yet there is a

law in New York and almost every other State in the Union. A man who comes here finds that his fortune is exempted from inheritance tax.

Mr. COOPER of Wisconsin. Will the gentleman yield?

Mr. BORLAND. In a moment.

Mr. COOPER of Wisconsin. And yet a special committee wrote it in its report.

Mr. BORLAND. Of which I think the distinguished gentleman was a member. An inheritance tax ought to be levied here. If it produces three or four million dollars, as it certainly would, that would tax the American people three or four million dollars under this arbitrary system of the half-and-half plan. So before you can abolish tax dodging in the District of Columbia, which certainly is enjoyed here, and no man has lived here any length of time without seeing it, you must provide that the taxes raised in the District of Columbia shall first be applied to local purposes. Now if there is anything unfair in that proposition that the taxes upon private property in the District shall first be applied as far as they may be to the local government of the District, I am utterly unable to see it.

If we were to provide that the taxes should be raised until they absorbed the running expenses of the Government, there might be some objection that we were unfairly taxing the property here in the District of Columbia, and yet I am not at all sure, with the enormous accumulation of private wealth in the District, drawn here by the police protection, the beautification, and the other advantages of the city, I am not sure but what the private property here ought to contribute a higher rate of taxation than it does contribute at the present time. But no such proposition is involved here. The rate of assessment remains the same, 15 mills on the dollar on real estate and tangible personality.

Mr. FESS. Will the gentleman yield?

Mr. BORLAND. I do.

Mr. FESS. Under what authority is this estimate for 1917 made?

Mr. BORLAND. Under what authority?

Mr. FESS. Yes. Is that Congress——

Mr. BORLAND. No; it is made up by the District Commissioners.

Mr. FESS. And the District Commissioners are subject to whom?

Mr. BORLAND. The District Commissioners are appointed by the President of the United States, one of whom must be an Engineer officer of the Army.

Mr. FESS. Subject to the Federal Government.

Mr. BORLAND. Subject to the Federal Government.

Mr. PAGE of North Carolina. I understood the gentleman from Ohio to ask how the estimates were made up. The commissioners submit the estimates to the Secretary of the Treasury as are all other estimates.

Mr. FESS. The allowance or recommendation is three and one-half million dollars less than they estimate?

Mr. BORLAND. Yes.

Mr. FESS. Now, the only question with me is whether the authority making up the estimates and the authority acting upon the recommendation might not, in order to relieve the Federal Government of certain expenses, cut down the recommendation so as to relieve it of this burden and still not harm——

Mr. BORLAND. I see the point the gentleman has in his mind. I want to say to the gentleman that my experience——

The CHAIRMAN. The time of the gentleman has expired.

Mr. FESS. Mr. Chairman, I ask unanimous consent that the gentleman have at least one minute or two minutes.

The CHAIRMAN. The gentleman from Ohio asks unanimous consent that the gentleman from Missouri may proceed for one minute. Is there objection? [After a pause.] The Chair hears none.

Mr. BORLAND. I have believed, I want to say to the gentleman from Ohio, that the half-and-half plan has had the effect of raising a great deal more revenue by doubling the amount of the District revenue out of the Federal Treasury, and the commissioners in times past made estimates a great deal more expansive than they would have made if they were expending simply the money of the District.

Mr. FITZGERALD. I will say at times they made estimates sufficient to absorb all the estimated revenues of the District regardless of the necessity.

Mr. BORLAND. I think that is true, as the chairman of the Committee on Appropriations says. That is the natural desire, but irrespective of that we always take the estimate simply as a basis for the hearings, and if we find the estimates are not justified on the facts stated we cut them down, and that is true. I think, concerning all the estimates of the other departments of the Government.

The CHAIRMAN. The time of the gentleman has expired.

Mr. RAINEY. Mr. Chairman——

Mr. PAGE of North Carolina. Mr. Chairman, before the gentleman from Illinois proceeds I would like to find out if we can not reach an agreement as to time of debate on this particular section. I ask unanimous consent that all debate on this paragraph and amendments thereto close in 10 minutes.

Mr. MANN. Mr. Chairman, I am perfectly willing if the gentleman wants to postpone consideration of this and preceding paragraphs until to-morrow and that we go ahead and read the bill; otherwise I would not be willing to close debate without letting the Members of the House know about this being under consideration. Why not put this over?

Mr. PAGE of North Carolina. Mr. Chairman, I do not know; I think the Members of the House were rather put on warning this morning, and I do not see why we should not dispose of these matters as we go along.

Mr. MANN. I am only making the suggestion; it is immaterial to me.

Mr. PAGE of North Carolina. I have no desire to unduly cut off time.

Mr. MANN. Otherwise I will try to get a quorum of the committee here.

Mr. PAGE of North Carolina. Mr. Chairman, was my request objected to?

The CHAIRMAN. The Chair has not yet put the request. The request of the gentleman from North Carolina is that all debate close on this paragraph and all amendments thereto in 10 minutes. Is there objection?

Mr. MANN. I object.

Mr. DAVIS of Minnesota. Mr. Chairman, I object also because the gentleman from Massachusetts is preparing an amendment in effect striking out the first two sections of the bill and substituting the old law. Hence 10 minutes' discussion seems to me to be rather limited.

Mr. PAGE of North Carolina. Has the gentleman any suggestion as to how long we shall spend in debate on this paragraph? I would like to reach an agreement.

Mr. MANN. The gentleman knows perfectly well a vote on this will not be had without having more Members here. Why does not the gentleman go ahead with other matters in the bill and let this go over? There will certainly be more Members here. I will not be satisfied for a vote without getting a quorum.

It would save time, in my judgment, for it to go over.

Mr. PAGE of North Carolina. Mr. Chairman, I ask unanimous consent that this first paragraph of the bill——

Mr. MANN. The two paragraphs. They are both involved.

Mr. PAGE of North Carolina. All affecting this one subject—down to and including line 10, on page 2—may go over until Thursday morning, to be taken up the first thing at that time. I ask unanimous consent that that be done.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that further consideration of the first two paragraphs, running down to and including line 10 on page 2, be postponed until Thursday morning after the convening of the House. Is there objection? [After a pause.] The Chair hears none. The Clerk will read.

The Clerk read as follows:

Office of corporation counsel: Corporation counsel, $4,500; assistants—first $2,500, second $2,000, third $1,800, fourth $1,500, fifth $1,500; stenographers—one $1,200, one $840, one $720; clerk, $720; in all, $17,280.

Mr. JOHNSON of Kentucky. Mr. Chairman, reserving a point of order, I would like to ask the gentleman from North Carolina, who has the bill in charge, what increases of salary there are in this section?

Mr. PAGE of North Carolina. We increased the second corporation counsel from $1,800 to $2,000, the third assistant from $1,600 to $1,800, and there is one new employment of a clerk at $720.

Mr. JOHNSON of Kentucky. Still reserving the point of order, I would like to ask the gentleman if he does not think it would be best—in fact, if it is not necessary—to amend this paragraph of the bill, to make provision against the corporation counsel or any of his assistants taking as an addition to their compensation part of the costs which are taxed in a suit. For instance, I now hold in my hand a check by which a litigant with the District of Columbia paid the costs. Part of the costs taxed in the suit amounted to $10 for attorney's fee. One of the assistant corporation counsel appropriated that fee to himself, and I am advised that that is done constantly notwithstanding that it is contrary to law so to do.

Mr. PAGE of North Carolina. I was going to ask the gentleman if there is any provision of law by which this corporation counsel is not guilty in such a case as that?

Mr. JOHNSON of Kentucky. No; but I believe if this paragraph were amended to prohibit them from appropriating this part of the funds it would prevent their doing so in the future.

Mr. PAGE of North Carolina. Does not the gentleman think it would possibly be better to put in a provision here specifically saying that they should not have the fees, in face of the fact that it is compensation under the law and they have no right to collect the fees; that he might put the evidence, if not before the corporation counsel, if they are guilty, but some other official of the District of Columbia under the law as it now exists?

Mr. JOHNSON of Kentucky. I believe the simplest way would be to put the amendment here providing that they should not appropriate any part of the cost taxed. If the gentleman will agree that this paragraph be passed, so that I may have a little time in which to prepare an amendment, I will do so. I would like to reserve my point of order, so that if we do not get a satisfactory amendment I can make a point of order to it.

Mr. PAGE of North Carolina. I ask unanimous consent that this paragraph be passed over for a few moments and that we may revert to it later on.

The CHAIRMAN. The gentleman from North Carolina [Mr. PAGE] asks unanimous consent that the paragraph be passed over for a few moments so that the gentleman from Kentucky may prepare an amendment. Is there objection? [After a pause.] The Chair hears none. The Clerk will read.

The Clerk read as follows:

Municipal architect's office: Municipal architect, $3,600; engineering assistant, $2,400; superintendent of construction, $2,000; chief draftsman, $1,800; draftsmen—one $1,400, one $1,300; heating, ventilating, and sanitary engineer, $2,000; superintendent of repairs, $1,800; assistant superintendent of repairs, $1,200; boss carpenter, boss tinner, boss painter, boss plumber, boss steam fitter, five in all, at $1,200 each; boss grader, $1,000; machinist, $1,200; clerks—one $1,200 (including one now paid from lump-sum appropriations), one $1,050, one (office of superintendent of repairs) $1,000 (now paid from lump-sum appropriation), one $720; copyist, $840; driver, $600; in all, $31,110.

Mr. COX. Mr. Chairman, I reserve a point of order on the salary of the chief draftsman, $1,800. Is not that an increase?

Mr. PAGE of North Carolina. Yes; it is an increase from $1,700 to $1,800.

Mr. COX. That is what I thought. I am going to make a point of order on that right now.

Mr. PAGE of North Carolina. Will the gentleman reserve the point of order?

Mr. COX. I reserve it.

Mr. PAGE of North Carolina. I believe I can convince him that he does not want to do that. I want to say to the gentleman that as a result of the lack of sufficient help in this architect's office it has been necessary in a number of instances to have outside architects to prepare plans for certain buildings in the District, at a very considerable increased cost over the increase we have given in this item.

Mr. COX. You have provided for a new engineer and assistant here at $2,400.

Mr. PAGE of North Carolina. That is in order that the architect may spend his time in the office.

Mr. COX. It is a new place?

Mr. PAGE of North Carolina. It is a new place.

Mr. COX. How many more new places are there in this paragraph?

Mr. PAGE of North Carolina. That is all.

Mr. COX. There is a new place here provided at $2,400, and an increase to $1,800 for another man.

Now, you say that for lack of proper help this work is going to be done by outside persons?

Mr. PAGE of North Carolina. Yes; at the usual architect prices of 6 per cent.

Mr. COX. I recall that a few years ago there was considerable discussion on the floor of the House that a fellow who did this work went out and did outside work.

Mr. PAGE of North Carolina. I will say to the gentleman that they can not do it now.

Mr. COX. Is this permanent law?

Mr. PAGE of North Carolina. Law issued by the commission.

Mr. COX. They are not doing it?

Mr. PAGE of North Carolina. They are not doing it. In fact, they have not time to do the work to be done now.

Mr. COX. Well, Mr. Chairman, it is a pretty hard job for me to let these increases of salaries go through, especially where they are all drawing a salary of $1,700.

Mr. PAGE of North Carolina. Mr. Chairman, I am sure that the gentleman from Indiana is an economist. I have served with him here long enough to know that, and I think he will give me credit for not wanting to pay any more than is necessary to get the service properly performed in these offices, and I want to assure him here and now that these increases that we have made here from the viewpoint not only of myself, but the members of the subcommittee preparing the bill, were made in order that we might save money in the preparation of plans instead of employing outside architects.

Mr. COX. I will make a point of order on any increase of salary over $1,200 a year, but inasmuch as the gentleman makes a strong case in behalf of this item, I will withdraw my point of order and trust to his judgment.

The CHAIRMAN. The point of order is withdrawn. The Clerk will read.

The Clerk read as follows:

Public Utilities Commission: For salaries (including inspector of gas and meters, $2,000; assistant inspectors of gas and meters—1, $1,000; 2 at $900 each; messenger, $600, transferred from engineer commissioner's office); in all, $30,000.

Mr. TILSON. Mr. Chairman, I move to strike out the last word, in order to ask the gentleman in charge of the bill just how he gets the amount of increase from $25,000 plus to $30,000? Is that a lump-sum appropriation, "For salaries (including inspector of gas meters, $2,000; assistant inspectors of gas and meters—1, $1,000; 2 at $900 each; messenger, $600, transferred from engineer commissioner's office); in all, $30,000"?

Mr. PAGE of North Carolina. Well, I will say to the gentleman that that is really a lump-sum appropriation that is paid out to the various employees under this bureau, a scheduled list of whom is submitted to the committee by the commission each year.

Mr. TILSON. I observe that the employees named here are not increased either in number or amount of salary, and yet the total is increased by nearly $5,000.

Mr. PAGE of North Carolina. I will say to the gentleman that, of course, these people are not put on the permanent roll because they are not permanent employees. There are inspectors of gas and inspectors of meters and other inspectors, a messenger, and several statisticians and engineers. A number of employees who are paid from this item, and who are not carried on the rolls, are specified because of the fact that they are not permanent employees and we can drop them at any time.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn. The Clerk will read.

The Clerk read as follows:

Department of insurance: Superintendent of insurance, $3,700; deputy and examiner, $2,000; statistician, $1,700; clerk, $1,200; stenographer, $840; temporary clerk hire, $1,200; in all, $10,440.

Mr. JOHNSON of Kentucky. Mr. Chairman, I make a point of order against the increased salary in that paragraph.

The CHAIRMAN. Will the gentleman indicate it?

Mr. PAGE of North Carolina. It is an increase from $1,700 to $2,000.

Mr. JOHNSON of Kentucky. Page 11, line 12.

Mr. PAGE of North Carolina. Does the gentleman make the point of order or reserve it?

Mr. JOHNSON of Kentucky. I make the point of order.

Mr. PAGE of North Carolina. Unquestionably it is subject to a point of order. If I had the opportunity, I might persuade the gentleman that he is wrong.

Mr. JOHNSON of Kentucky. I reserve a point of order, then.

Mr. PAGE of North Carolina. I can at least give my friend from Kentucky the reasons which prompted the members of the subcommittee in increasing the salary of this particular man. The superintendent of insurance is paid $3,500 under the law, and this man, his deputy and examiner, acts in the absence of the superintendent of insurance. This man, who now receives a salary of only $1,700, is charged with the responsibility of acting in his place as insurance superintendent, and because of the responsibilities that necessarily devolve upon this man at times as the head of this office, we thought his salary should be increased. He is an expert accountant and necessarily examines the books of insurance companies, and an underpaid man, in our judgment, could not fill this position satisfactorily, and therefore we increased the salary.

Mr. JOHNSON of Kentucky. Mr. Chairman, I think it would be far better for the people of the District of Columbia if the present superintendent of insurance should go away and stay away. Partly through his connivance the rates of insurance in the District of Columbia have been increased from 50 per cent to 150 per cent and more, and I feel absolutely certain in my own judgment when I say that it has been with his connivance and with his approval.

I did not expect that this item would be reached this afternoon. I have some figures that I would like to submit to the House relative to what is going on in insurance circles in the District of Columbia. I believe I can establish the fact that the present superintendent of insurance is a mere tool behind

the insurance companies, undertaking to put up insurance rates on the people of the District of Columbia.

Mr. STAFFORD. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Kentucky. In a moment. During the last year, if I am correctly advised, on account of the increased rate the amount of insurance written in the District of Columbia fell off $7,000,000 and the losses fell off $200,000, and notwithstanding that the premiums collected by the fire insurance companies in the District of Columbia from those who continued to carry their insurance was increased about $123,000.

Now I yield to the gentleman from Wisconsin.

Mr. STAFFORD. Mr. Chairman, I wish to inquire what is the tenure of this official and by whose grace does he retain his position?

Mr. JOHNSON of Kentucky. This official is appointed by the Commissioners of the District of Columbia, and I think that he serves at their pleasure. When this gentleman was about to be appointed I believed that I knew then that he would not work in behalf of property owners in the District of Columbia, but that he would use his office in behalf of the insurance companies doing business here. I then protested to the Commissioners of the District against his appointment, and each of the two then civilian commissioners assured me that he would not be appointed, but, notwithstanding their assurance to that effect, he was appointed.

Mr. STAFFORD. Has any charge been lodged with the present commissioners as to the conduct of this man?

Mr. JOHNSON of Kentucky. I do not know; but they must know of my speech concerning him during the last Congress. He was appointed when the board was made up of Mr. Newman, Mr. Siddons—now Mr. Justice Siddons—and the engineer commissioner. I forget who he was at that time.

Mr. STAFFORD. I assume from the statement of the gentleman that there is no hope of any relief until the commissioners are changed?

Mr. JOHNSON of Kentucky. I am constrained to accept that belief.

Mr. TILSON. Will the gentleman yield for a question?

Mr. JOHNSON of Kentucky. I do.

Mr. TILSON. The gentleman has made a speech, which, if correctly interpreted, would mean, it seems to me, that we ought to move to strike out the whole or at any rate part of the salary of the superintendent of insurance, but really he has not said anything in support of his point of order that would strike out the proposed salary of the deputy examiner, or reduce it from $2,000 to $1,700.

Mr. JOHNSON of Kentucky. I am not in favor of paying any additional compensation to a servant of the District of Columbia who is working against the interests of the people of the District of Columbia.

Mr. TILSON. It is in order to move to reduce the superintendent's salary, is it not? And ought not the gentleman do that rather than aim a blow at the man who is receiving only $1,700?

Mr. PAGE of North Carolina. Mr. Chairman, if the gentleman will yield, I was just going to make the same suggestion that my friend from Connecticut [Mr. TILSON] has made, that because of information which the gentleman from Kentucky has relative to the superintendent of insurance I hardly see why this examiner, who is really doing expert work in this office, and who is not guilty of any of these things that he even charges against this other man, should be made the object of the gentleman's point of order instead of offering an amendment to reduce the salary of the superintendent of insurance.

Mr. JOHNSON of Kentucky. I do it for the reason that I do not believe he would be retained in the office by the present superintendent of insurance unless he was doing the will of the superintendent of insurance.

The CHAIRMAN. Does the gentleman make the point of order?

Mr. JOHNSON of Kentucky. I do.

The CHAIRMAN. The Chair sustains the point of order.

Mr. JOHNSON of Kentucky. In addition to that, I move to strike out the salary of $3,500 of the superintendent of insurance, in line 12, page 11.

The CHAIRMAN. The gentleman from Kentucky moves to strike out the salary of $3,500, in line 12, page 11.

Mr. LLOYD. Mr. Chairman, I hope the gentleman will state what the particular thing is that the superintendent of insurance has done to increase the insurance rates.

Mr. JOHNSON of Kentucky. During the last session of Congress I stated on the floor of the House here that the present superintendent of insurance had been the moving spirit behind the formation of an insurance trust in the District of Columbia. I gave the names and instances of when and where he had gone out of his way not only to induce but to coerce the officials of independent insurance companies to join and become a part of this trust, which has put up the rates of insurance in the District of Columbia in the last two years from 50 to 250 per cent, I believe.

Mr. LLOYD. Does the gentleman think he is responsible for the increase?

Mr. JOHNSON of Kentucky. I think he could have defeated it if he had been willing to do so; but instead of being disposed to defeat it he has been an instrument in the hands of these people to multiply the rates of insurance upon the people in the District of Columbia.

Mr. LLOYD. What proof has the gentleman of that fact?

Mr. JOHNSON of Kentucky. In my former speech I stated the proof, and I gave the names of the men to whom he had gone and asked them to join the trust, and had practically threatened to drive them out of business if they did not go into the trust. Mr. Chairman, I believe that for the welfare and in the interest of the people of the District of Columbia this salary should be stricken out. When a man is working for the insurance companies and against the interests of the people whom he is supposed to represent, if the Commissioners of the District of Columbia do not remove him, Congress ought to remove the salary. The people in the District ought not to be taxed and thereby be compelled to pay the salary of an officer who is working against the interest of the people of the District who pay him.

Mr. STEPHENS of Texas. If this trust exists in violation of the Sherman antitrust law, as a combination of that kind would be, why is it not prosecuted?

Mr. JOHNSON of Kentucky. I do not know anything more than the gentleman from Texas does about why it is not prosecuted.

Mr. STEPHENS of Texas. Why not call the attention of the Department of Justice to it?

Mr. JOHNSON of Kentucky. But I think the people of the District of Columbia ought not be compelled to pay this salary when the man who draws the salary is working directly and constantly against their interests. I move to strike out the $3,500 in line 12 on page 11.

Mr. PAGE of North Carolina. Mr. Chairman, I rise in opposition to this amendment offered by the gentleman from Kentucky. I am sure that this committee can not take the responsibility of abolishing the commissioner of insurance of the District of Columbia. If the things that the gentleman from Kentucky has said about the conduct of this office are true there is another method by which it can be reached, a perfectly proper and orderly method. If this man can not be reached through the appointing power of the commissioners, if he is guilty of half that the gentleman from Kentucky has charged here, he can be removed very easily through the courts, and I hope that the amendment will not be adopted.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Kentucky [Mr. JOHNSON].

The question was taken; and on a division (demanded by Mr. JOHNSON of Kentucky) there were—ayes 15, noes 33.

Accordingly the amendment was rejected.

The Clerk read as follows:

Employment of females: To carry out the act to regulate the hours of employment and safeguard the health of females employed in the District of Columbia, approved February 24, 1914, namely: For 3 inspectors (2 of whom shall be women), at $1,200 each; stenographer and clerk, $900; in all, $4,500.

Mr. MONDELL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Wyoming offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. MONDELL: Page 12, after line 9, insert as a new paragraph the following:

"Child-labor law: For the enforcement of the provisions of the act 'to regulate the employment of child labor in the District of Columbia,' approved May 28, 1908, namely: For 2 inspectors, at $1,200 each, $2,400: *Provided*, That the existing provision of law requiring the detail of two privates of the Metropolitan police force for the enforcement of said act is repealed."

Mr. PAGE of North Carolina. Mr. Chairman, I make the point of order against the amendment. I will say to the gentleman from Wyoming that exactly what he asks is provided for in the bill in another place. These two policemen are relieved and these two inspectors are appointed.

Mr. MONDELL. Is the provision made specifically for the enforcement of this law?

Mr. PAGE of North Carolina. It is, by the withdrawal of the policemen and the appointment of the inspectors, almost in the language of the gentleman's amendment.

Mr. MONDELL. And in their appointment is it specified that it is for the enforcement of this law?

Mr. PAGE of North Carolina. It is, in that connection.

Mr. MONDELL. In view of the statement of the gentleman from North Carolina I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. If there be no objection, the amendment will be withdrawn.

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Free Public Library, including Takoma Park branch: Librarian, $4,000; assistant librarian, $1,800; chief circulating department, $1,500; director of children's work, $1,500; children's librarian, $1,000; assistant in charge of school work, $1,000; librarian's secretary, $1,000; Takoma Park branch librarian, $1,000; reference librarian, $1,000; assistants—1 $1,000, 1 in charge of periodicals, $1,000, 1 $900, 6 at $840 each, 6 (including 1 for the Takoma Park branch) at $720 each, 3 at $600 each, 3 (including 1 for Takoma Park branch) at $540 each; copyist, $540; classifier, $900; cataloguers—1 $840, 1 $720, 2 at $600 each; stenographer and typewriter, $720; attendants—1 $720, 6 at $600 each, 5 at $540 each; collator, $540; 3 messengers, at $600 each; 10 pages, at $420 each; 3 janitors, at $480 each, 1 of whom shall act as night watchman; janitor of Takoma Park branch, $360; engineer, $1,200; fireman, $720; workman, $600; library guard, $720; 2 cloakroom attendants, at $360 each; 6 charwomen, at $240 each; in all, $55,160.

Mr. COX. Mr. Chairman, I make a point of order on the increase of salaries to the librarian, $4,000; assistant librarian, $1,800; the chief of the circulating department, $1,500.

Mr. PAGE of North Carolina. In the first item that the gentleman mentions I think there is an increase; the other two items I do not think are changed.

Mr. COX. As I compared it, the assistant librarian last year was $1,500 and the chief of the circulating department was $1,200.

Mr. PAGE of North Carolina. On reflection, I think the gentleman is right. I hope he will reserve his point of order.

Mr. COX. I will reserve it on the last two.

Mr. PAGE of North Carolina. There is probably no institution for which this bill provides where the amount of work has increased as it has in the public library in the city of Washington. The increase in the number of volumes circulating and the amount of work that has been consequently involved is great. That, together with the fact that these people are not getting excessive salaries, led us to make the increases. I will say to the gentleman that the librarian has been for a number of years librarian of the city library and had numerous offers at a very large increase of salary in other cities, and has only been kept here by the insistence of certain influential people—for instance, the Librarian of the Library of Congress, and various other people—because of the excellent work that this man is doing here. Personally I know nothing about him. This committee a year ago on these representations increased the salary to $4,000 and it went out on a point of order. I can only say that if it goes out on a point of order this time I believe the city will lose the services of this very valuable man, who has trained a force there and is worth $4,000, and more than anybody he will get there. But it is with the gentleman from Indiana, and he must assume the responsibility.

Mr. COX. I have supreme confidence, Mr. Chairman, in the gentleman who has charge of the bill, as well as the entire committee. I recall that six or eight years ago Members on this side of the House were charging day in and day out Members on that side of the House with the constant and continuous increase of salaries, and I think many Members on this side promised that when we got control of the House we would stop increasing salaries. This man may be worth $4,000, as the gentleman from North Carolina says, I will concede everything he says about him. I will concede all he says about the other men, but all through this bill are large increases of salaries. I do not believe that a salary of $1,200 is excessive, but I made up my mind to make a point of order to all increases of salary over $1,200. The gentleman has begged me not to carry that out as to one or two salaries, but I am going to stand hitched on this, and I make the point of order on all three of them.

The CHAIRMAN. The Chair sustains the point of order.

Mr. PAGE of North Carolina. Mr. Chairman, I offer an amendment as follows:

On line 11, after the word "librarian," where it first occurs, insert $3,500. After the word librarian," in the same line where it occurs the second time, I move to insert $1,500; and on line 12, after the word "department" insert "$1,200."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 12, insert in line 11, after the word "librarian," where it occurs, "$3,500"; after the word "librarian," where it occurs the second time, insert "$1,500"; after the word "department," in line 12, insert "$1,200."

The amendment was agreed to.

Mr. STAFFORD. Mr. Chairman, I think there is some obvious incongruity if you pay the chief of the circulating department of this library $1,200 and pay the new director of children's work $1,500. It does not seem to be in harmony with the recommendations of the committee, and everyone who has the faintest knowledge of library work must know that the superintendent of the circulating department is a much more important position than the director of children's work.

Mr. COX. The director of children's work is a new place.

Mr. STAFFORD. I hope the gentleman will withdraw his objection.

Mr. PAGE of North Carolina. Not only was $1,500 inserted in connection with this employment, but it was in harmony with the views of the committee. I believe that the director of children's work is possibly the most responsible position in the library.

Mr. STAFFORD. The gentleman recognizes that the director of children's work will not have near the number of employees under his charge that the superintendent of the circulating department has. I assume this library is similar to the library in my own city, with which I am somewhat acquainted. The superintendent of the circulating department there receives, I believe, something in the neighborhood of $2,000, and he has numerous employees under his charge, whereas the director of children's work only has three or four, so I really believe the superintendent of the circulating department has a much more responsible place than that of director of children's work.

Mr. PAGE of North Carolina. I will say to the gentleman I do not think that disparity exists in the employment here, because under this director of children's work she has a certain amount of circulating work under her, as well as the other, and quite a number of employees.

Mr. STAFFORD. Three or four, whereas the superintendent of the circulating department has some ten or a dozen.

Mr. PAGE of North Carolina. I do not know the number, and I do not think the gentleman knows how many there are.

Mr. STAFFORD. I do know that in my home city, and I am comparing the institutions because the sizes are about the same. I simply rose to impress on the gentleman from Indiana the incongruity of voting one person $1,200 where there is more responsible work and allowing the other for less responsible work $1,500.

Mr. PAGE of North Carolina. In other words, the gentleman from Wisconsin was inviting the gentleman from Indiana to make his point of order against this, too?

Mr. STAFFORD. I beg the gentleman's pardon. We have passed the question of making a point of order. I take issue with the gentleman from North Carolina on that point. I was simply trying to call the attention of the committee to the incongruous position in which the gentleman's point of order placed the committee.

The CHAIRMAN. The time of the gentleman has expired.

The question is on the amendment of the gentleman from North Carolina.

The question was taken, and the amendment was agreed to.

The Clerk read as follows:

Appropriations in this act shall not be expended for the purchase or maintenance of horses or horse-drawn vehicles for the use of the commissioners, or for the purchase or maintenance of horses or horse-drawn vehicles for inspection or other purposes for those officials or employees provided with motor vehicles.

Mr. MONDELL. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 17, line 8, as a new paragraph, insert:
"For the purchase or condemnation of a site and the erection thereon of a central garage, $35,000."

Mr. PAGE of North Carolina. Mr. Chairman, I make a point of order against the amendment.

Mr. MONDELL. Will the gentleman reserve the point of order?

Mr. PAGE of North Carolina. I will reserve the point of order.

Mr. MONDELL. Mr. Chairman, I offer this amendment not that I claim to be fully informed as to the necessity for this central garage but because it is one of the items estimated for by the Commissioners of the District and because of the very convincing statement which was made regarding it in the hearing before the committee. It was stated by the engineer commissioner:

Col. KUTZ. When our subordinates presented their tentative estimates to the commissioners there was hardly a department that did not ask for one or more additional passenger-carrying vehicles, and the same thought occurred to the commissioners that has occurred to Mr. Howard in connection with the use of passenger vehicles. We felt that the present system, whereby such vehicles were assigned to separate departments, was uneconomical. These vehicles are housed in different parts of the city and there is no way, without a central garage, by

which we can unify the use of these machines, so we have had inquiries made, and an estimate prepared, based on the assessed value, as to the cost of acquiring a small tract of land in the rear of the District Building, with the expectation of putting up on it a $10,000 building and using it for housing and caring for all of our passenger-carrying vehicles, which number about 15 now.

If we can get such a central garage it is our purpose to put it in charge of a single individual, have every passenger automobile housed there, and nothing taken out except on a specific requisition and on a certificate showing that the use of the machine is for official business. We feel that such a garage would greatly increase the usefulness of the machines that we now have, and it was with the expectation that you would look at the matter in the same light and authorize such a garage that we asked for no more machines in the engineer department, though I believe the need is greater than the need of a year ago, as our work is increasing every year.

It seems to me that the reasons given by the engineer commissioner for this central garage are strong and convincing that the expenditures would be in the interest of economy. If such a central garage were built, it would, I am sure, reduce the complaints that have been made, and the more or less scandal there has been, not in this office, but elsewhere in the Government service, as to the use of official vehicles for private or social use. It occurs to me that the building of such a garage would be a matter of economy, of good governmental procedure, and the estimate is certainly in line with the recommendation of the joint select committee that the appropriations for the District of Columbia should be regular and liberal and in keeping with the needs of the District.

Mr. PAGE of North Carolina. Mr. Chairman, in view of the fact that the gentleman from Wyoming is so much opposed to legislating on appropriation bills, I must insist on my point of order.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

Work on streets and avenues: For work on streets and avenues named in Appendix L, Book of Estimates, 1917, $186,600, to be expended in the discretion of the commissioners upon streets and avenues specified in the schedules named in said appendix and in the aggregate for each schedule as stated herein, namely:

Mr. JOHNSON of Kentucky. Mr. Chairman, I desire to make a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. JOHNSON of Kentucky. Does the paragraph end with line 24, "namely," or does it go along until all of the enumerations have been made subsequent to that?

The CHAIRMAN. The Chair thinks that while the Clerk is reading by paragraphs this paragraph would run down to the end of line 11, page 22.

The Clerk read as follows:

Provided, That streets and avenues named in said schedules already paved with Belgian block or granite shall not be paved or otherwise improved under this appropriation, and the remaining streets and avenues, except as herein specified, shall be contracted for in the order in which they appear in said schedules, and be completed in such order as nearly as practicable, and shall be paved, in the discretion of the commissioners, instead of being graded and regulated.

Mr. JOHNSON of Kentucky. Mr. Chairman, I make the point of order against the item on page 21, line 25, the northwest section schedule, $34,300.

Mr. PAGE of North Carolina. Will the gentleman state on what ground he makes his point of order?

Mr. JOHNSON of Kentucky. Yes; because it is not authorized by law. Under the act approved March 2, 1893, there is this language:

No expense for the improvement of any street, circle, reservation, or avenue made under the provisions of this act outside of the cities of Washington and Georgetown shall be chargeable to the Treasury of the United States, but such expense shall be paid solely out of the revenues of the District of Columbia.

Mr. PAGE of North Carolina. I beg to say to the gentleman that none of these streets are outside of the city of Washington.

Mr. JOHNSON of Kentucky. Some of them, if I am correctly advised, are beyond the original boundaries of the city of Washington.

Mr. PAGE of North Carolina. I will say to the gentleman that the schedule that makes up this amount contains Twenty-sixth Street from K to Virginia Avenue, Twenty-seventh Street from I to K, Twenty-third Street, B to E, W and Florida Avenue to Eleventh, making $34,300, all within the limits of Georgetown, or what is termed the city of Washington.

Mr. JOHNSON of Kentucky. Well, it is the first one of those items to which I make the point of order—Twenty-sixth Street from K to Virginia Avenue.

Mr. PAGE of North Carolina. Mr. Chairman, I submit that item does not appear in the bill.

Mr. JOHNSON of Kentucky. Mr. Chairman, the rule is this, that those who contend for the correctness of a proposition have to sustain it. I make the point of order against it upon the authority which I just read. Now, the burden is upon the gentleman from North Carolina to show that it was within the old city of Washington, and that is a physical impossibility for him to do.

The CHAIRMAN. The Chair will hear the gentleman [Mr. PAGE].

Mr. PAGE of North Carolina. Mr. Chairman, I confess I can not, to save my life, say to the gentleman just exactly where Virginia Avenue is located, and I do not think he knows.

Mr. JOHNSON of Kentucky. The gentleman knows that Virginia Avenue is not in the old city of Washington.

Mr. PAGE of North Carolina. Well, I did not know that. I do not recall that that is true. I think it is up to the gentleman to convince the Chairman of this committee that it is not.

Mr. JOHNSON of Kentucky. No; it is up to the gentleman from North Carolina to show to the Chair that it is in the old city of Washington. That is a well-established rule.

Mr. PAGE of North Carolina. Mr. Chairman, if the Chairman of this committee is depending upon "the gentleman from North Carolina," who has charge of this bill, to convince him that Virginia Avenue is or is not inside the limits of what is known legally as the city of Washington, he will have to call in another witness, because I can not say, and I think he ought to be convinced by some authority that it is not before he sustains the point of order made by the gentleman from Kentucky.

Mr. JOHNSON of Kentucky. The burden is upon the gentleman from North Carolina to show that Virginia Avenue is within the old city of Washington.

Mr. PAGE of North Carolina. I want to submit these schedules. These items now being considered were submitted to the committee as being within the city of Washington. Immediately following this is another item for the construction of a suburban road that includes all this street north of Florida Avenue and outside of the legal limits as read by the gentleman from Kentucky.

Mr. JOHNSON of Kentucky. To all of which I expect to make a point of order, Mr. Chairman.

Mr. HOWARD. Mr. Chairman, I desire to submit this proposition to the committee. The act of 1893 that the gentleman has read from is specifically repealed by the act of 1895, which the gentleman will find in the same volume. The act of 1895 specifically repeals the act of 1893 so far as the boundary limits of the city of Washington are concerned.

Mr. JOHNSON of Kentucky. The gentleman is mistaken. But the act of March 3, 1909, Statutes at Large, volume 35, page 728, has this provision, which I will send to the Chair:

The cost of acquisition of land for street extensions, and all advancements heretofore or hereafter made for this purpose by the Secretary of the Treasury shall be repaid in full from the revenues of the District of Columbia.

That is but in keeping with the act I have just read.

Mr. MANN. Mr. Chairman, may I ask the gentleman from North Carolina if the money is not to be paid out of the revenues of the District of Columbia, anyhow?

Mr. PAGE of North Carolina. Certainly; for this purpose. If the gentlemen who are opposed to the first section of this bill will withdraw this objection, I think the point of order made by the gentleman from Kentucky would go by the board even though it would hold otherwise.

Mr. MANN. Up to date there is no appropriation made except as made out of the revenues of the District of Columbia. The revenues of the District of Columbia are much more than sufficient to pay for this item. It does not seem to me it makes any difference whether the statute says it is to be paid out of the revenues of the District of Columbia or not.

The CHAIRMAN. The first section has been agreed to.

Mr. JOHNSON of Kentucky. It has not become law.

Mr. MANN. That is the way it stands so far as the bill is concerned now.

Mr. GARD. May I ask what was the gentleman's inquiry? I was out and did not hear it.

Mr. MANN. I was asking whether it made any difference whether this was to be paid out of the revenues of the District of Columbia, as the gentleman says the law provided, because this was to be paid out of the revenues of the District?

Mr. HOWARD. If the gentleman will permit me, the gentleman from Kentucky has cited the act, but it has been repealed, and I have cited the Chair to the act of 1895 that specifically repeals it, and the point of order made under the act of 1893 would be good if the act of 1895 did not repeal it. It has been specifically repealed, and the gentleman has got the law in his hands.

Mr. JOHNSON of Kentucky. I believe the gentleman from Georgia [Mr. HOWARD] is correct about it. There is a repeal hid away here in the law which I failed to notice. I withdraw the point of order.

Mr. MONDELL. Mr. Chairman, I ask unanimous consent to return to line 14, page 21, to offer an amendment.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to return to page 31, line 14, for the purpose of offering an amendment. Is there objection? [After a pause.] The Chair hears none. The Clerk will report the amendment.

The Clerk read as follows:

Page 21, line 14, insert as a new item the following:
"For improvement at Eastern and Western Markets and Farmers' Produce Market, $23,000."

Mr. MONDELL. Mr. Chairman, these are items estimated for by the District Commissioners and urged very earnestly by them. The improvements for the eastern and western markets are for painting, for toilets, for retaining walls, and pavements, and the improvement they desire at the Farmers' Produce Market is a new shelter. They call attention to the importance of these improvements in order to keep the markets in condition, and particularly the new shelter at the Farmers' Produce Market, in order to shelter the farmers who come there in inclement weather to sell their produce. I fail to understand on what theory the committee declines to appropriate for these very worthy public betterments.

Mr. PAGE of North Carolina. Mr. Chairman, I am thoroughly satisfied that if the gentleman from Wyoming would go down to the foot of Tenth Street and see how much space there is under these sheds that we have already constructed, and would also take into consideration the fact that one of the greatest and most frequently visited buildings in the city of Washington—the National Museum—is located near by, he would realize that the construction of the sheds is merely another one within the shadow of that great building.

Mr. MONDELL. I will agree with my friend that that is not the place for a permanent market.

Mr. PAGE of North Carolina. I was going to say that we have already a number of sheds there, and I think we have gone further already than we should have gone in constructing these market sheds at this place, and your committee did not feel like spending money to extend what possibly some day—not very far in the future—might become objectionable, and we might make an appropriation to remove them.

Mr. MONDELL. I think they are somewhat objectionable now, but so long as we are using that place as a market we should shelter those farmers that come there with their produce. I will say to my friend that I frequently go to that market. I find it necessary in these days of high cost of living under a Democratic administration to economize, and I go down to the market early in the morning to buy of the farmers my little basket of produce for my family in order to secure some relief from these Democratic conditions of high cost of living. [Laughter.] I agree with the gentleman, that we may not always keep a market there, but I frequently have gone down there when there were insufficient shelters for the farmers, and so long as we have the market we should have shelters, should we not?

Mr. PAGE of North Carolina. If there is an hour or two perhaps at certain seasons of the year when there is not sufficient shelter to take care of all the farmers that come in, it is to be regretted, but that is an exception to the rule.

Mr. MONDELL. A farmer can get very wet in an hour, and so can a customer who is bargaining with a farmer for sweet corn and peas and radishes, and one thing and another.

Mr. PAGE of North Carolina. I imagine that the gentleman, when he goes down there, is very well protected in his automobile, and does not get rained on.

Mr. MONDELL. Not this year. What with the Democratic high cost of living and gasoline, I can not afford an automobile. How about the other markets?

Mr. PAGE of North Carolina. A majority of the subcommittee preparing this bill went in person to examine the proposed repairs at both these markets. I do not mind saying that two of them were on the gentleman's side of the House, and the chairman of the committee happened to be on the subcommittee that visited these markets.

Mr. MONDELL. And he hypnotized the other two.

Mr. PAGE of North Carolina. No; they hypnotized me; and they came to the unanimous conclusion that it would be a waste of money to spend more money on those markets.

Mr. MONDELL. It was a pure matter of hypnotism. [Laughter.]

Mr. PAGE of North Carolina. No. I am sure that the gentleman from Wyoming, if he were a member of that subcommittee, or if he were to go down there now, would reach the same conclusion, that to spend the money as provided for in his amendment would be to waste the money. I am sure he would not undertake if it he knew what he was doing.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Wyoming.

Mr. CANNON. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Illinois moves to strike out the last word.

Mr. CANNON. Do I understand the gentleman to say, touching this market, whose location I am not clear about, that is near the National Museum?

Mr. MONDELL. It is almost directly in front of the National Museum. It is the farmers' produce market, where there are sheds, under which the produce is assembled—sheds under which the farmers can shelter their produce.

Mr. CANNON. Now, the gentleman claims that for the comfort of the living these repairs ought to be made or extensions made, notwithstanding that it might perhaps disturb the beautiful repose of the dead over in the Museum? [Laughter.]

Mr. MONDELL. Well, I think some day we will remove that market. We have erected a very beautiful monumental building there as a museum; and while personally I enjoy a produce market and find it a very interesting place, and like to commune with my farmer friends there in the morning as I buy their produce, still I think it is not exactly the place to permanently retain an institution of that kind. But we have the market. We have these steel shelters recently erected. We shall not tear them down, and we should have enough of them to protect the farmers produce and their customers.

Mr. PAGE of North Carolina. Mr. Chairman, was a vote taken on the amendment?

The CHAIRMAN. No; it was not taken. The gentleman from Illinois [Mr. CANNON] intervened. The question is on agreeing to the amendment offered by the gentleman from Wyoming.

The question was taken, and the amendment was rejected.

Mr. PAGE of North Carolina. Now, Mr. Chairman, I ask unanimous consent that the committee may return to the item to which the gentleman from Kentucky [Mr. JOHNSON] desired to offer an amendment, on page 6, line 15.

The CHAIRMAN. Is there objection to the gentleman's request, that the committee return to page 6, line 15?

There was no objection.

Mr. JOHNSON of Kentucky. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. JOHNSON of Kentucky: Page 6, at the end of line 15, after the figures "$17,280," add the following: "*Provided*, That hereafter no attorney for the District of Columbia shall be entitled to or receive any attorney's fees taxed as costs in any litigation to which the District of Columbia is a party."

Mr. MANN. Mr. Chairman, I supposed the gentleman wanted to have that turned into the Treasury.

Mr. JOHNSON of Kentucky. Well, it would go like the rest of the costs go if these attorneys did not take it out. They have been taking out this part of the costs.

Mr. MANN. Then I should think it might be construed that there should be no attorney's fees taxed as costs.

Mr. JOHNSON of Kentucky. That is not my construction. Let us have it read again, Mr. Chairman.

The CHAIRMAN. Without objection, the Clerk will again report the amendment.

The amendment was again read.

Mr. MANN. Clearly I think the court would say the law forbids the taxing of attorney's fees.

Mr. JOHNSON of Kentucky. No; the attorney's fee is $10.

Mr. MANN. This says he should not receive it.

Mr. JOHNSON of Kentucky. Yes; he should not receive it.

Mr. MANN. He should receive it, but not retain it.

Mr. JOHNSON of Kentucky. No; it should not be paid to the attorney at all. What does the gentleman suggest?

Mr. MANN. I first thought of suggesting the word "retain," but I am not sure. I suppose when you tax an attorney's fee the attorney must receive it, but he ought to turn it over.

Mr. JOHNSON of Kentucky. I do not think that in the routine of business he ever touches the rest of the costs, and he should not touch this; but I am anxious to have suggestions to fix it so that it will be properly fixed, and I have no objection to striking out the word of the amendment "receive" and put in there the word "retain" in lieu of it. I am quite sure, on reflection, that would make it plainer.

Mr. PAGE of North Carolina. Mr. Chairman, I suggest to the gentleman from Kentucky that he add to his amendment the words "as a part of his compensation."

Mr. JOHNSON of Kentucky. I believe the amendment suggested by the gentleman from Illinois is better. I ask unan-

imous consent to modify my amendment by striking out the words "entitled to or receive" and put in lieu thereof the word "retain."

The CHAIRMAN. Is there objection to the modification of the amendment suggested by the gentleman from Kentucky?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment as modified.

The Clerk read as follows:

Provided, That hereafter no attorney for the District of Columbia shall retain any attorney fee taxed as costs in any litigation in which the District of Columbia is a party.

The amendment was considered and agreed to.

Mr. PAGE of North Carolina. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. FERRIS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 15774, the District of Columbia appropriation bill, and had come to no resolution thereon.

LEAVE OF ABSENCE.

By unanimous consent, leave of absence was granted as follows:

To Mr. BURKE, after to-day, for eight legislative days, on account of sickness in his family.

To. Mr. HULBERT, for three days, on account of illness in his family.

To Mr. MCFADDEN, indefinitely, on account of sickness.

To Mr. LITTLEPAGE, indefinitely, on account of illness.

To Mr. WILSON of Louisiana, indefinitely, on account of official business.

WITHDRAWAL OF PAPERS.

By unanimous consent, leave to withdraw papers from the files of the House without leaving copies, no adverse report having been made thereon, was granted as follows:

To Mr. LANGLEY, from the Committee on Pensions, papers in the case of Henry Fields, H. R. 8298, and William Winn, H. R. 8565, Sixty-fourth Congress.

To Mr. DYER, papers in the case of Peter Mathews, H. R. 17708, Sixty-third Congress.

Also, papers in the case of Herman J. Wacker, H. R. 804, Sixty-third Congress.

EXTENSION OF REMARKS.

Mr. HELVERING. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the shipping bill.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. HICKS. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on agriculture.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

ENROLLED BILLS SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bills of the following titles, when the Speaker signed the same:

H. R. 12027. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war;

H. R. 14771. An act granting the consent of Congress to commissioners of Charlton County, Ga., and Nassau County, Fla., to construct a bridge across the St. Marys River;

H. R. 12766. An act for making further and more effectual provision for the national defense, and for other purposes; and

H. R. 10490. An act to prevent fraudulent advertising in the District of Columbia.

The SPEAKER announced his signature to enrolled joint resolution of the following title:

S. J. Res. 72. Joint resolution to provide for holding the Texas Bicentennial and Pan American Exposition in 1918.

HOUR OF MEETING TO-MORROW.

Mr. KITCHIN. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow. Is there objection?

There was no objection.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 50 minutes p. m.) the House adjourned until to-morrow, Wednesday, May 24, 1916, at 11 o'clock a. m.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. BURGESS, from the Committee on Rivers and Harbors, to which was referred the bill (H. R. 12455) authorizing and directing the Secretary of War to lease to Charleston-Dunbar Traction Co. a certain strip or piece of land owned by the United States Government on the Great Kanawha River in West Virginia, reported the same with amendment, accompanied by a report (No. 741), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. NOLAN, from the Committee on Labor, to which was referred the bill (H. R. 11876) to fix the compensation of certain employees of the United States, reported the same with amendment, accompanied by a report (No. 742), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 15796) granting an increase of pension to Isaac W. Nutting; Committee on Military Affairs discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 15053) granting a pension to John Richstein; Committee on Invalid Pensions discharged, and referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and a resolution were introduced and severally referred as follows:

By Mr. GARD: A bill (H. R. 15912) to purchase a cyclorama in oil of the Battle of Gettysburg; to the Committee on the Library.

By Mr. LEVER: A bill (H. R. 15913) to authorize the Secretary of Agriculture to establish uniform standards of classification for cotton; to provide for the application, enforcement, and use of such standards in transactions in interstate and foreign commerce; to prevent deception therein; and for other purposes; to the Committee on Agriculture.

By Mr. STEELE of Iowa: A bill (H. R. 15914) to authorize the Secretary of Agriculture to license establishments for and to regulate the preparation of viruses, serums, toxins, and analogous products for use in the treatment of domestic animals, and for other purposes; to the Committee on Agriculture.

By Mr. LLOYD: A bill (H. R. 15915) authorizing the Secretary of War to make certain donations of condemned cannon and cannon balls; to the Committee on Military Affairs.

By Mr. GOOD: A resolution (H. Res. 246) directing an inquiry relative to the organization of a post-office lobby; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. DALLINGER: A bill (H. R. 15916) granting a pension to John A. White; to the Committee on Invalid Pensions.

By Mr. DAVENPORT: A bill (H. R. 15917) granting an increase of pension to Andrew J. Molder; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15918) granting an increase of pension to Fannie Dunnigan; to the Committee on Invalid Pensions.

By Mr. DOWELL: A bill (H. R. 15919) granting an increase of pension to William C. Barnett; to the Committee on Invalid Pensions.

By Mr. DUPRÉ: A bill (H. R. 15920) granting a pension to Wiley Lawson; to the Committee on Pensions.

By Mr. GLYNN: A bill (H. R. 15921) granting an increase of pension to Lucia Barber Thorpe; to the Committee on Invalid Pensions.

By Mr. GOODWIN of Arkansas: A bill (H. R. 15922) granting an increase of pension to Idella White; to the Committee on Invalid Pensions.

By Mr. GORDON: A bill (H. R. 15923) granting a pension to Edward V. Andrews; to the Committee on Pensions.

By Mr. HILL: A bill (H. R. 15924) for the relief of George Rutherford; to the Committee on Military Affairs.

By Mr. HILLIARD: A bill (H. R. 15925) granting an increase of pension to Harvey Sallade; to the Committee on Invalid Pensions.

By Mr. KINCHELOE: A bill (H. R. 15926) granting an increase of pension to Catharine May; to the Committee on Invalid Pensions.

By Mr. KINKAID: A bill (H. R. 15927) for the relief of the Commercial Bank of Gibbon, Nebr.; to the Committee on Claims.

By Mr. LAFEAN: A bill (H. R. 15928) granting an increase of pension to William H. Wilhelm; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15929) granting an increase of pension to Rebecca Poff; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15930) granting an increase of pension to Mercy K. Monroe; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15931) granting an increase of pension to Rebecca B. Diehl; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15932) granting an increase of pension to S. Caroline Gemmill; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15933) granting an increase of pension to Mary Jane Brooks; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15934) granting an increase of pension to Eleanor E. Butcher; to the Committee on Invalid Pensions.

By Mr. LENROOT: A bill (H. R. 15935) granting a pension to Josephine Duncan; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15936) granting a pension to Mary Baxter; to the Committee on Invalid Pensions.

By Mr. NEELY: A bill (H. R. 15937) granting an increase of pension to William E. Cornwell; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15938) granting an increase of pension to George W. Hall; to the Committee on Invalid Pensions.

By Mr. OAKEY: A bill (H. R. 15939) granting a pension to Nellie Hanlon Bush; to the Committee on Invalid Pensions.

By Mr. OVERMYER: A bill (H. R. 15940) granting an increase of pension to Thomas J. Harbaugh; to the Committee on Invalid Pensions.

By Mr. RAKER: A bill (H. R. 15941) authorizing certain exchange of lands between the United States and the heirs of S. G. Little; to the Committee on the Public Lands.

By Mr. TEMPLE: A bill (H. R. 15942) granting an increase of pension to Lewis O. Barnes; to the Committee on Invalid Pensions.

By Mr. STERLING: A bill (H. R. 15943) granting an increase of pension to Edward Looby; to the Committee on Pensions.

Also, a bill (H. R. 15944) granting a pension to Annie S. Blanchard; to the Committee on Pensions.

By Mr. STINESS: A bill (H. R. 15945) granting an increase of pension to William R. Smith; to the Committee on Invalid Pensions.

By Mr. TAVENNER: A bill (H. R. 15946) granting an increase of pension to Margaret Hagerman; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of board of supervisors of city and county of Honolulu, relative to right to make changes in existing roads in county of Honolulu; to the Committee on Military Affairs.

By Mr. ASHBROOK: Petition of merchants of Shiloh, Ostrander, Centerburg, Utica, Lexington, Fredericktown, Brink Haven, Buckeye City, Danville, Howard, Perrysville, Plymouth, Loudonville, Ashley, Shelby, Mansfield, and Ashland, all of the seventeenth Ohio district, asking that concerns who sell goods by mail be compelled to contribute their share of municipal, county, and State taxes; to the Committee on Ways and Means.

By Mr. BAILEY: Petition of P. B. Baker, Frank Glessner, the Diamond Hardware Co., George W. Wilharm, C. E. Reed, F. J. Fay, T. H. Meckling, W. P. McKillip, T. B. McFarland, C. B. Jacobs' Son & Co., T. W. Snyder, Claude L. Pruyn, L. Leedom & Son, and Walter H. Leedom, all of Hollidaysburg, Pa., for the passage of a measure placing a tax on mail-order houses; to the Committee on Ways and Means.

By Mr. BURKE: Memorial of Good Roads Association of Wisconsin, at a meeting held at Milwaukee, Wis., May 18, 1916, urging Congress to designate and construct and maintain a system of highways; to the Committee on Roads.

By Mr. CAREW: Memorial of Convention of Mental Hygiene Societies of the United States, favoring bill for division of mental hygiene in United States Public Health Service; to the Committee on Interstate and Foreign Commerce.

By Mr. CRAMTON: Petition of Fred Poppeck, Albert Breining, August Teschendorf, Fred Dargatz, August Lomitzke, Ernest Adler, C. H. Pawliz, Louis Poppeck, Fred Finkel, Emil Marquardt, all of Port Hope, Mich., for an embargo on the shipment of munitions to belligerent nations; to the Committee on Foreign Affairs.

Also, resolutions of Local Union No. 97, of the National Brotherhood of Operative Potters of Mount Clemens, Mich., protesting against radical increase in appropriations for Army and Navy; to the Committee on Military Affairs.

Also, petition of Frank G. Jayne and 110 other business firms of the seventh congressional district, in support of bill proposing tax on mail-order houses; to the Committee on Ways and Means.

Also, petition of Wales Grange, No. 450, protesting against legislation which would prevent sale of products made in whole or in part by prison labor; to the Committee on Interstate and Foreign Commerce.

Also, petition of Mrs. J. A. King and 13 others, of Almont and Imlay City, Mich., protesting against passage of bill closing barber shops in the District of Columbia on Sunday as a law enforcing the observance of certain religious views; to the Committee on the District of Columbia.

Also, petition of Rev. C. Binhammer and 24 others and A. A. Martini and 44 others, of Sebewaing, Mich., protesting against any restrictions placed upon the work of the American Red Cross by nations engaged in the European war that prevent impartial aid to all such belligerents alike; to the Committee on Foreign Affairs.

Also, petition of Mrs. G. C. Gregg and 40 others, of Memphis, Mich., asking passage of the Susan B. Anthony suffrage amendment; to the Committee on the Judiciary.

Also, petitions of the Congregational Sunday School at Utica; Wesley Methodist Episcopal Church, of Colfax Township; Mount Pleasant Sunday School at Wales; Cole Sunday School and Church at Yale; Methodist Episcopal Church at Caseville; Sunday School of First Congregational Church, at Carsonville; Pentecostal Church of the Nazarene, at Mayfield; the congregation and Sunday School of Methodist Episcopal Church at Algonac; First Baptist Church, at Vassar; Baptist Church at Bad Axe; Methodist Episcopal Church and Sunday School at Lawrence; Evangelical Church and Sunday School at Elkton; Trinity Evangelical Church, at Snover; Sunday School of Trinity Evangelical Church, of Snover; the Methodist Episcopal Church and Sunday School of Shabbona; First Congregational Church, of St. Clair; Second Presbyterian Church, of Marlette; Methodist Episcopal Sunday School at Carsonville; Methodist Episcopal Church of Carsonville; Methodist Episcopal Church at Decker; Methodist Episcopal Church at Elkton; Methodist Episcopal Sabbath School at Metamora; the people of the Methodist Protestant Church of Lum; 22 citizens of North Street and Atkins; church people at Peck; J. D. Bradshaw and 25 others, of Yale; Andrew J. Niles and 53 others, of Carsonville; Owen Smith and 21 others, of Sanilac County; C. C. Kemp and 25 others, of Bad Axe; Charles Blank and 46 others, of Snover; Solomon Eidt and 25 others, of Elkton; Oliver M. Wood and 24 others, of Marlette; William Jones and 45 others, of Atkins, Blaine, and North Street; Mrs. Sarah Hascall and 24 others, of Vassar; George Day and 59 others, of Algonac; R. C. Moore and 23 others, of Lum; John McCrudy and 12 others, of Fairgrove; J. S. Hossler and 23 others, of Metamora; Earl C. McCarty and 18 others, of Colfax Township, Huron County; J. S. Hoffman and 18 others, of Elkton; Joseph Tomlinson and 65 others, of Port Austin; Fred D. Walker and 22 others, of Lum; Sidney J. Powers and 46 others, of Caseville; George E. E. Evans and 31 others, of Brockway Township; Thomas Mollan and 23 others, of Wales; Hugh Hodgins and 25 others, of Brockway Township; George W. Howe and 16 others, of Port Huron; E. L. Bates and 25 others, of Waldron; J. G. Haller and 26 others, of Lapeer; Ira G. Chapman and 5 others, of Utica; Bruce C. Adam and 45 others, of Lamatte, all in the State of Michigan, in support of the Webb-Smith national prohibition resolution, proposing an amendment to the Constitution of the United States for national prohibition; to the Committee on the Judiciary.

Also, petition of Frederick Kaufmann and 50 others; Frank Meissner and 74 others; Evangelical Zion's Church, of Mount Clemens; J. W. Leipprandt and 134 others, of Pigon; Charles Brandt and 38 others; Ernest R. Wolf and 19 others; Henry Graichen and 4 others; Charles J. Wolf and 36 others; George Schroeder and 5 others; also telegrams from J. Murray, H. H. Powers, E. J. Smith, F. J. Wargowsky, Clarence Kellogg, Dr. C. R. Osius, and Rev. Rausch, all of Port Huron; the three Evangelical Lutheran congregations of the township of Sebewaing; C. C. Haag, pastor of St. John's Church, of Port Huron; Citizens' League of Richville; the Hemmeter Cigar Co., of Detroit; Citizens' League of Reese; St. John's Church, of Pigeon, all in the State of Michigan, protesting against the United States becoming a party to the Europeon war; to the Committee on Foreign Affairs.

By Mr. DALE of New York: Petition of Charles K. Blatchly, employment secretary, the Prison Association of New York, favoring Senate bill 1092 and House bill 42; to the Committee on the Judiciary.

Also, petitions of Clarence M. Smith, of New York, and Lucy Loud Ellis, of Pendleton, Oreg., favoring the Susan B. Anthony amendment; to the Committee on the Judiciary.

By Mr. DYER: Memorial of St. Louis Medical Society, opposing Senate joint resolution 120; to the Committee on Appropriations.

Also, memorial of Rising Sun Council, No. 52, Luxemburg, Mo., opposing House bills 491 and 6468; to the Committee on the Post Office and Post Roads.

By Mr. ELSTON: Petition of R. A. Craig and 110 other citizens of Alameda County, against House bill 13048, to create a juvenile court in the District of Columbia; to the Committee on the District of Columbia.

Also, petition of R. A. Craig and 42 other citizens of Alameda County, protesting against House bill 652, to provide for the closing of barber shops in the District of Columbia on Sunday; to the Committee on the District of Columbia.

By Mr. ESCH: Memorial of Good Roads Association of Wisconsin, urging the necessity of the early designation, construction, and maintenance of a system of national highways to be built and maintained by the National Government; to the Committee on Roads.

By Mr. FITZGERALD: Memorial of automobile manufacturers of New York, protesting against the enactment of the Tavenner bill, House bill 8665, or any similar measure; to the Committee on Labor.

By Mr. GALLIVAN: Memorial of the Lithuanians of Greater Boston, condemning certain acts of Great Britain; to the Committee on Foreign Affairs.

By Mr. GLYNN: Memorial of sundry citizens of Waterbury, Conn., favoring permanent international tribunal; to the Committee on Foreign Affairs.

By Mr. GOOD: Memorial of board of directors of the Marshallton Club, indorsing House resolution 175; to the Committee on Mines and Mining.

By Mr. GOODWIN of Arkansas: Papers to accompany House bill 13738, for relief of Robert W. Johnson; to the Committee on Invalid Pensions.

By Mr. HAMLIN: Papers to accompany House bill 15890, to increase the pension of Louise Mawluing; to the Committee on Invalid Pensions.

By Mr. HILL: Papers in the case of George Rutherford; to the Committee on Military Affairs.

By Mr. HUDDLESTON: Petition of E. H. Parker and others of Birmingham, Ala., in re House bills 491 and 6468; to the Committee on the Post Office and Post Roads.

Also, petition of Will D. Root and others of Birmingham, Ala., in re Senate bill 645; to the Committee on the District of Columbia.

Also, petition of Rev. H. Reuter and others, of Birmingham, Ala., in re House bills 491 and 6468; to the Committee on the Post Office and Post Roads.

By Mr. KELLEY: Petition of 15 citizens of Clio, Mich., against certain amendments to the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. LINTHICUM: Memorial of the Maryland Antivivisection Society of Baltimore, Md., favoring House bill 11079; to the Committee on Agriculture.

By Mr. LOUD: Petition of D. E. Wade and 51 other citizens of McLure and Wagerville Townships, Gladwin County, Mich., for passage of House joint resolutions 84 and 85; to the Committee on the Judiciary.

By Mr. McDERMOTT: Petition of Messrs. William Stemrick, N. Murray, C. Lyons, C. F. Kemney, and others, all of Chicago, Ill., favoring the passage of the Lobeck classification bill; to the Committee on Agriculture.

By Mr. MAGEE (by request): Petition of citizens of Syracuse, N. Y., opposing House bills 491 and 6468; to the Committee on the Post Office and Post Roads.

By Mr. RAKER: Memorials of sundry citizens and organizations of the State of California, favoring the reporting out of the Susan B. Anthony suffrage amendment from the Judiciary Committee; to the Committee on the Judiciary.

By Mr. ROWE: Memorial of Protestant Churches Association of Greater New York City, opposing war with Germany; to the Committee on Foreign Affairs.

Also, memorial of Chamber of Commerce of the State of New York, report on pneumatic-tube main service; to the Committee on the Post Office and Post Roads.

Also, memorial of National Automobile Chamber of Commerce, opposing the Tavenner or similar bills; to the Committee on Interstate and Foreign Commerce.

By Mr. STINESS: Petition of James S. McCabe, of Providence, R. I., favoring the resolution requesting the President to designate a day on which funds may be raised for the relief of the Armenians; to the Committee on Foreign Affairs.

Also, petition of Phoebie L. Cargill, of Providence, R. I., favoring Senate bill 4874; to the Committee on Agriculture.

By Mr. SULLOWAY: Petition of citizens of first congressional district of New Hampshire, favoring Senate concurrent resolution No. 12, granting relief to suffering citizens of Armenia; to the Committee on Foreign Affairs.

By Mr. TAYLOR of Colorado: Petition of sundry citizens of Grand Junction, Colo., favoring the passage of House bill 8665, to regulate working conditions for skilled labor in Government service; to the Committee on Labor.

Also, petition of citizens of Grand Junction, Colo., protesting against passage of bills to amend the postal laws in relation to religion; to the Committee on the Post Office and Post Roads.

By Mr. TEMPLE: Petition of Piper & Fullerton Co., Beaver Falls, Pa., favoring House bill 13916, laying an embargo upon crude petroleum; to the Committee on Interstate and Foreign Commerce.

Also, petition of A. Chattaway, of Hazzard, Pa., favoring increase of compensation for fourth-class postmasters; to the Committee on the Post Office and Post Roads.

By Mr. TILSON: Petition of John Connell and 22 others, of Meriden, Conn., urging Congress to pass House bill 8665, to prevent the introduction of efficiency systems in Government workshops; to the Committee on Labor.

SENATE.

WEDNESDAY, *May 24, 1916.*

(Legislative day of Thursday, May 18, 1916.)

The Senate reassembled at 11 o'clock a. m., on the expiration of the recess.

The VICE PRESIDENT resumed the chair.

Mr. SMOOT. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Fletcher	Myers	Smoot
Bankhead	Gallinger	Nelson	Sterling
Borah	Hardwick	Norris	Sutherland
Brandegee	Hollis	O'Gorman	Swanson
Broussard	Husting	Overman	Taggart
Chamberlain	Johnson, S. Dak.	Poindexter	Thomas
Chilton	Jones	Ransdell	Thompson
Clapp	Kenyon	Shafroth	Tillman
Clark, Wyo.	Kern	Sheppard	Vardaman
Clarke, Ark.	La Follette	Sherman	Wadsworth
Culberson	Lane	Simmons	Warren
Curtis	Lea, Tenn.	Smith, Ariz.	
Dillingham	Martine, N. J.	Smith, Ga.	

Mr. CHILTON. My colleague [Mr. GOFF] is absent unavoidably to-day.

The VICE PRESIDENT. Fifty Senators have answered to the roll call. There is a quorum present.

Mr. WADSWORTH. Out of order I ask unanimous consent to submit a favorable report from the Committee on Claims.

The VICE PRESIDENT. Without objection, the report will be received.

M. A. SWEENEY SHIPYARDS & FOUNDRY CO.

Mr. WADSWORTH, from the Committee on Claims, to which was referred the bill (H. R. 13064) for the relief of the M. A. Sweeney Shipyards & Foundry Co., reported it without amendment and submitted a report (No. 478) thereon.

FOREIGN-BUILT DREDGES.

Mr. RANSDELL. Out of order I ask leave to submit a report from the Committee on Commerce.

The VICE PRESIDENT. The Chair hears no objection, and the report will be received.

Mr. RANSDELL. I am directed by the Committee on Commerce, to which was referred the bill (S. 4797) to amend an act entitled "An act concerning foreign-built dredges," approved May 28, 1906, to report it favorably without amendment, and I submit a report (No. 479) thereon.

Mr. O'GORMAN. Mr. President, I ask unanimous consent for the immediate consideration of the bill just reported from the Commitee on Commerce. It is to permit an American contractor to bring in two dredges which he had occasion to use on some work in Canada. All the material used in the construction of the dredges was produced in the United States. The assembling of the material was done in Canada. The bill gives the Secretary of Commerce discretion as to the imposition of terms and conditions on which the dredges may be brought into this country.

The VICE PRESIDENT. Is there objection to the present consideration of the bill?

There being no objection, the bill was considered as in Committee of the Whole. It proposes to amend the act entitled "An act concerning foreign-built dredges," approved May 28, 1906, by adding, at the end of section 1, the following words: "or unless permitted by the Secretary of the Department of Commerce, on such terms and conditions as he may impose."

The bill was reported to the Senate without amendment, ordered to be engrossed for a third reading, read the third time, and passed.

WOMAN SUFFRAGE IN COLORADO.

Mr. SHAFROTH. Mr. President, various statements have been made by individuals and reported in the press concerning the financial condition of the State of Colorado and the city of Denver, which condition, it was claimed, has been produced by woman suffrage. I have a statement here signed by 70 of the prominent business men of the city of Denver, and I ask unanimous consent that it be inserted in the RECORD without reading.

Mr. SMOOT. The Senator does not want to have the 70 names printed in the RECORD?

Mr. SHAFROTH. Yes; they are very prominent men, comprising the bankers, the wholesale merchants, bond brokers, and other business men. Their very names will produce conviction as to the absolute verity of their statement. The charge was made that the credit of the State of Colorado was impaired, which is an absolute falsehood. Then leading men have taken the trouble to get up a statement of this kind, which shows that the standing of the city of Denver and the State of Colorado in finances is as good as that of any city or State in the Union. Their bonded indebtedness is insignificant compared to the wealth of that city and State. It would be well for States having only manhood suffrage to take notice of this condition in an equal-suffrage State. I should like very much to have the statement inserted, with the names of the signers.

Mr. SMOOT. I have no objection to the insertion of the statement, but I thought the statement of the Senator was sufficient to describe the character of the signers, and that it would be useless to take up that much space in the RECORD.

Mr. SHAFROTH. It is very short—all on one page. The statement is signed by men well known throughout the United States.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

THE TRUTH ABOUT COLORADO.

Because various irresponsible persons, in no way representing the real spirit of Colorado, have circulated statements defamatory to the credit of the State and its womanhood, we believe the time has come when all such silly and slanderous stories should be repudiated by the intelligent and public-spirited men of the State of Colorado.

The demand for Colorado bonds is far greater than the supply. In per capita wealth, in expenditures for education, in the percentage of homes without encumbrance, in public improvements in all matters affecting social welfare and the humane side of legislation, Colorado stands well to the front, as may easily be verified by the reports of the United States Government

In all efforts that have served to forward the health and prosperity of the State the women of Colorado have done their share. The enfranchisement of women is no longer a question here. Equal suffrage was granted by popular vote in 1893 and incorporated in the constitution 10 years later by a majority three times the size of that given the original referendum.

H. J. Alexander, president First National Bank; J. A. Thatcher, president Denver National Bank; George B. Berger, president Colorado National Bank; Godfrey Schirmer, president German-American Trust Co.; W. J. Galligan, president City Bank & Trust Co.; John Evans, president International Trust Co.; James C. Burger, president Hamilton National Bank; Frank N. Briggs, president Interstate Trust Co.; James H. Causey, banker and investment bonds; Gordon Jones, United States National Bank; C. B. Whitehead, bonds and investments; Persifor M. Cooke, banking; E. J. Weckbach, banking; Hume Lewis, of Boettcher, Porter & Co., bond dealers; C. K. Boettcher, Boettcher, Porter & Co.; John H. Porter, Boettcher, Porter & Co.; M. C. Harrington, president Hibernia Bank; W. M. Marshall, president Central Savings Bank & Trust Co.; C. MacA. Willcox, vice president Daniels & Fisher Stores Co.; W. R. Owen, vice president the Denver Dry Goods Co.; H. M. Stoll, the Joslin Dry Goods Co.; A. D. Lewis, the A. T. Lewis & Son Dry Goods Co.; Meyer Neusteter, the Neusteter Co.; Frederick W. Hedgcock, president Hedgcock & Jones Specialty Store Co.; Wm. I. Mead, manager the May Co.; A. Giesecke, president Denver Music Co.; V. G. Campbell, the Knight-Campbell Music Co.; H. M. Williamson, president Davis Chemical Co.; Alfred T. Bowen, Davis Chemical Co.; George E. Turner, Turner Moving & Storage Co.; C. A. Kendrick, president Kendrick-Bellamy Co., stationers; A. J. Spengel, president Spengel House Furnishing Co.; W. H. Kistler, president W. H. Kistler Stationery Co.; E. L. Scholtz, the Scholtz Drug Co.; O. L. Smith, jr., vice president Smith-Brooks Printing Co.; Jesse W. Wheelock, general manager Northwestern Mutual Life Insurance Co.; Henry Van Kleeck, mortgages and investments; Zeph Charles Felt, real estate; George S. Van Law, real estate and loans; E. W. Merritt, real estate and loans; Cass E. Herrington, legal department Colorado Fuel & Iron Co.; O. E. Lefevre, ex-district judge, retired capitalist; Charles D. Hayt, attorney, ex-judge supreme court; Charles M. Deardorff, attorney; J. B. Grant, attorney; Henry May, attorney; Frank E. Gove, attorney; A. N. Patton, attorney; Alva A. Swain, Pueblo Chieftain and Grand Junction News; Carlos M. Cole, superintendent public schools; William H. Smiley, supervisor high schools; J. M. Downen, Clayton School for Boys; John B. Garvin, instructor East Denver High School; C. A. Brooks, past national patriotic instructor, Grand Army of the Republic; S. A. Ritter Brown, author and capitalist; James A. Beebe, president Iliff School of Theology; S. B. Longacre, dean Iliff School of Theology; Borden P. Kessler, instructor Iliff School of Theology; Charles O. Thibodeau, pastor Grace Methodist Episcopal Church; T. E. McGuire, pastor Park Hill Methodist Episcopal Church; James Thomas, pastor Grant Avenue Methodist Episcopal Church; Orrin W. Auman, district superintendent Denver District Methodist Episcopal Churches; H. R. A. O'Malley, rector St. Stephen's Church; S. R. S. Gray, vicar West Denver; James Rae Arneill, M. D.; O. D. Wescott, M. D.; Edw. Wm. Lazell, M. D.; the City Federation (a delegate organization of the Associated Charities, Ministerial Alliance, and nearly 50 other societies of Denver, instructed its president and secretary to sign the foregoing statement), by Dr. Clinton G. Hickey, president, and Walter C. Heckendorf, secretary.

DENVER, COLO., *May 10, 1916.*

RIVER AND HARBOR APPROPRIATIONS.

Mr. CLARKE of Arkansas. I ask that the river and harbor bill may be laid before the Senate and proceeded with.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. HUSTING. Mr. President, I rise this morning for the purpose of addressing the Senate on the so-called river and harbor bill, and I expect at the end of my remarks to offer a motion to recommit the bill to the committee with instructions to report out a bill in a sum not exceeding $20,000,000. In support of that motion which I propose to make I now address myself.

Mr. NELSON. Will the Senator from Wisconsin yield to me?

Mr. HUSTING. Certainly.

Mr. NELSON. Do I understand that the Senator is moving to recommit the bill?

Mr. HUSTING. I shall move to recommit the bill at the end of my remarks.

Mr. NELSON. I was going to suggest to the Senator that there are a few more amendments to be offered, and we had better complete the bill before a motion is made to recommit it. I would ask the Senator to postpone the motion until we have finished the bill, and then his motion to recommit would be more appropriate.

Mr. HUSTING. Perhaps the Senator is right from his point of view, but from mine I think this is the appropriate time. That is my humble judgment.

Mr. CLARKE of Arkansas. I quite agree with the Senator from Wisconsin that if the bill is going to be recommitted it had better be recommitted at this point.

Mr. HUSTING. I was going to say in explanation of that that if the bill is going to be recommitted it had better, it seems to me, be recommitted before we spend any further time in the consideration of the bill. All the committee amendments are now in, and the Senate is informed of the type of bill which the committee proposes to pass.

Mr. President, in opposing this bill I should like to be understood as not opposing any particular appropriation in the bill or of commending any particular appropriation in the bill, because I am opposing this sort of a bill in its entirety. There may be and undoubtedly are very meritorious projects in the bill. I do not think there is any doubt that there are a great many projects in the bill that have little or no merit whatever, and that the Government is spending its money in a wasteful and extravagant manner in carrying all the projects which are proposed in the bill.

In a matter of this kind, although Wisconsin in a measure is interested primarily, I have voted in at least one instance against a proposal to increase the appropriation for the Mississippi River from $1,250,000 to $1,500,000. I voted that way because I do not know whether it is needed or is to be wisely expended. If it is a good thing I am sure that standing alone those favoring it will be able to vindicate that appropriation. If we spend money only to aid in meritorious projects merit will get a better hearing when standing alone, and the project will get more money when standing alone than it can possibly get if we are going to divide the funds which ought to be expended for meritorious projects among a great many others of little or no merit whatever. I, for one, am willing to let the Wisconsin projects or those affecting Wisconsin stand on their own legs. If there is any project which concerns Wisconsin immediately I am willing to have that particular measure stand or fall on its own merits.

I am sure that whatever is to be expended here in the improvement of harbors along Lake Michigan is good and will stand alone, and not only that but I believe that those harbors are worthy of a greater expenditure of money than has heretofore been made on them. As a matter of self-enlightened interest for Wisconsin and Wisconsin projects I say I want to disapprove any bill which uses any meritorious scheme in which Wisconsin may be interested as a stalking horse or a bait for any other project which has no merit.

I am sorry to hold the opinion that it has been the practice in the past—I guess that is not seriously disputed; in fact, some of the things that have arisen in the discussion of the pending bill warrant me, I think, in believing it—that sometimes meritorious measures are left out of the bill in order to coerce, or rather to persuade, those particularly interested in such projects in voting for some other project that has no merit whatever, in order to secure its own just demands. That is a practice that is not only bad, but which leads to extravagance and to the expenditure of money for many improper projects. So, I say, in discussing this matter I want to object chiefly to the system that is in operation here, to the method used in attempting to pass a river and harbor appropriation bill.

There has been expended, I am informed, $850,000,000 on river and harbor projects. It has been, as has already been stated here and as everybody knows, a hit-and-miss proposition. It is a sum here and a sum there and a sum some other place of so many million dollars a year, so that altogether a grand total of $850,000,000 has been reached in river and harbor projects; certainly a most stupendous sum, and a sum which, if it had been properly expended, should show results somewhat commensurate with the immense sum of money which has been expended. I repeat, it has been a hit-or-miss proposition.

A great deal of criticism that can be directed against our whole waterways proposition—or rather lack of one—can be directed against a river and harbor scheme of this kind. It gets us nowhere; it never will get us anywhere; it accomplishes nothing, except to take money out of the Treasury and to squander it for a great many unworthy purposes.

This is not a party question. The parties ought not to divide upon this proposition, and I, for one, would like to discuss it from a nonpartisan standpoint. Our friends on the other side have insisted all along that it is a nonpartisan question and that they propose to discuss it from a nonpartisan standpoint, although the record will show that not all of the Senators, yet a number of them, have injected into their remarks speeches of a highly partisan nature. They have taken occasion to call into this discussion the Mexican question, the European question, and a great many other questions.

Before proceeding any further I want to say a few words about that. The trouble with a great many of the appropriations which a Democratic Congress has been obliged to make is that they have been made necessary to carry out a great many of the extravagant measures instituted by a Republican administration. The consequence of extravagant appropriations does not always stop with the administration that is responsible for them, but it continues on and on for a great many years. Projects are started, first, in a river and harbor bill calling for an immediate small appropriation, but the project involves a possible expenditure, as I think the record will show and as I think I can show a little later on, of hundreds of millions of dollars. So projects have been started under former administrations carrying with them appropriations for the immediate needs of a project which has been started, but which, in the end, is going to involve the expenditure of hundreds of millions of dollars. That is not our fault, but it is the fault of those who started the project. Of course the argument now is that, having put in ten or twenty or thirty or forty or fifty million dollars, it is the duty of a Democratic administration to continue the appropriation.

If our friends on the other side wanted to be fair about it, they would at least acknowledge the corn, and say "We want you to continue these things, but we admit that we are responsible for them." But what do they do? They hold up before our eyes the threat that if we pass the appropriations they are going to charge us with extravagance, and if we abandon them they are going to charge us with "scuttling the ship." They have done that in reference to the Philippine question, which is something that we have inherited from a Republican administration. They foisted onto our necks something that is costing us I do not know how many hundreds of millions of dollars—I believe about $300,000,000—but when we are trying to separate ourselves from what has proven to be an incubus, we are charged with scuttling the ship. If we continue to pay the money that the Philippines cost us, they are charging that up as a part of Democratic extravagance.

I might cite the Mexican question, another thing that we have inherited from our Republican friends. It is a matter that they did not settle, but which they handed down as a legacy from their administration. In this debate Senators on the other side have been talking about the cowardice of a Democratic administration, and have complained that we have not gone to war with Mexico; that we have not intervened; that we have not sent down 250,000 men to invade Mexico. If we had taken their advice and taken care of the situation in the manner in which they have suggested, our appropriations would have sprung up to a great many hundreds of millions more than they are already amounting to. If we had taken their advice and gone into and invaded Mexico and expended a half billion dollars, they would charge that up to Democratic extravagance. If we do not do it, we are charged with cowardice, and with a failure to do our duty. If we do what they deem to be our duty and spend the money, then we are extravagant, they say.

In this connection, I might say that our Republican friends have not hesitated to inject into this debate the European question.

Others on the other side contend that we should have gone to war with Germany in defense of Belgium's neutrality. If we had done that, the sum total of the appropriation bills would amount to billions of dollars and the bills which we shall pass this session would "look like 30 cents."

I am not going into a discussion of that any further than to show the bearing that this charge of extravagance, coming from the Republican side of the Chamber, has on the necessities of the country. In short, the criticisms which have been made amount to this: That if we do not do a certain thing, we are this, that, or some other thing, and if we do what they suggest we ought to do, then we are guilty of unwarrantable extravagance; in other words, we will be "damned if we do and be damned if we don't." So it seems to me that it will be impossible for us to satisfy the Senators on the other side, or at least some of them, and consequently I presume the only thing that is left for us to do is to try to satisfy the people of this country, which is, of course, of the first importance and the other only of secondary or more remote importance. Therefore I want to speak with regard to this bill from the standpoint of what I conceive to be the interest of the people, disassociated from any possible partisan tinge, for, in a large way, it is nonpartisan. Those supporting this bill are nonpartisan except in the sense that in this bill and bills of like nature their interests, or what they conceive to be their interests, are tied up together and party lines are not drawn, nor are sectional lines.

A great deal of time has been consumed in the discussion of this bill and a great deal of information has been put into the RECORD. I do not think that anyone can have listened to the indictments against this bill or the facts as portrayed here without feeling that this bill in its entirety ought not to pass. I do not think that this Government at this time, when it is engaged, and must continue to be engaged for some time at least, in extraordinary expenditures for preparedness, both in the way of defense and also in an industrial way, in the way of spreading our commerce to the four corners of the globe and providing for contingencies of a grave and great nature which

now confront us, ought to expend money that is going to be needed so badly elsewhere in the development of small or insignificant creeks or rivers.

I think, in consonance with the general purpose of this Congress, that every river and harbor project ought to be made a part of a harmonious whole from a military and commercial standpoint and ought to be made to harmonize with the general spirit of preparedness in the way of preparing this country to compete with the world, either in a contest of arms, if it should come, or in a contest of commerce when it shall come, as it is bound to come. Everything else ought to be stricken out of this bill, ought to be sidetracked for the moment, or entirely abandoned; and I would say the same thing even in regard to those projects which have some merit. They do not all have to be completed at this time. Rome was not built in a day, and neither must every small stream or creek or river be developed in a day. There are appropriate times for things, and I think the appropriate thing at this time is to swing our resources back of this country in its program of preparedness, as I have said, both in a military and naval sense and also in a commercial sense.

Referring to extraordinary expenditures, I want to add to what I said awhile ago that the country is asking us to prepare, and we have already passed a bill, which, I think, has become or will soon become a law through the President's signature, which will raise the military expenditures of this country something like $150,000,000 or $200,000,000 annually. We are soon to enter upon the development of our Navy, and I understand the naval appropriation bill will reach a total of something like $250,000,000 or $300,000,000. A shipping bill has reached the Senate, calling for something like $50,000,000. These matters have got to be attended to, because the people as a whole demand that they shall be taken care of; and, of course, the people know that when they make that demand they have got to pay the bills. These things do not come like nitrates from the sky, but have to come about by the expenditure of money from the Treasury. While they know that, and while they are willing to pay the bill for these purposes, even if they increase the expenditures of this Government several hundred millions of dollars annually, I think they do expect, on the other hand, that things which are not of such moment shall either be cut out or deferred or abandoned for the time being.

Our friends on the other side are crowding this Congress for increased preparedness. I know a great many on this side also favor adequate preparedness, and now if that is brought about in accordance with the universal demand or the nonpartisan or bipartisan demand and money is voted for that purpose, it will not lie in the mouths of our Republican friends in the next campaign to charge us with extravagance, because it is not extravagance to put our house in order and to put ourselves in such shape as we ought to put ourselves in to meet exigencies that are now confronting or soon will confront us. And it will not become a Republican to criticize as extravagance something done which they had demanded and costing money for the appropriation of which they are in part responsible. However, even though our friends on the other side are demanding a correction of an evil for which they are responsible in the instance of the river and harbor system—if they call such a thing a system—I feel we ought to feel no resentment, but ought to feel grateful to them for pointing out the evils of their system and for offering to help us cure the evil. I also think we should take in the proper spirit the warning held out to us by them, accompanied as it is with an admission that this and other extravagances on their part while in power in part were responsible for their party's downfall. I hope we will profit by their warnings and their experiences.

Now, in discussing the bill I am not going to go over the old ground that has already been covered, but I have selected three rivers which are to be improved under this bill, and, instead of selecting the worst, I presume everyone will agree that I have selected the best.

You have heard a great deal about some of the rivers and creeks that are to be improved under this bill. Senators have shown the worst projects covered by this bill; they have shown that streams and creeks which carry only a foot and a half of water sometimes are to be improved, and hundreds of thousands, if not millions, of dollars expended upon them. I do not think there is any question about those projects being bad. I think the question was asked a Senator who was discussing one of these creeks where there was little water whether they wanted to supply more water in the creek. It occurred to me that perhaps the reason why a great many of these creeks and rivers are to be improved is because there is too much earth and ground in the bottom of the creeks and rivers, and they want to dig out mother earth itself; they want to turn something from a purpose to which it is adapted to some purpose to which it is not adapted. We can not change the face of this hemisphere, but we can do certain things to advantage. For instance, in the discussion of the East River project here the other day, which was left out of this bill when it was originally reported to the Senate, it was shown that a certain ridge in the river separated deep basins on either side, and that by the expenditure of a couple of hundred thousand dollars this ridge or bar could be removed, and our dreadnaughts could enter from the sea into the Brooklyn Navy Yard, where during stress of war or battle they might be obliged to go.

That is a project that no two men can disagree upon. It is perfectly obvious that that bar has got to be removed, because it is necessary to have it removed. But that is a far different project from turning a stream having a foot and a half of water into a stream that is navigable for its entire length by means of excavation throughout its entire length, because the more you excavate the lower the water drops. That does not increase your volume of water at all. If you take any given stream with a certain limited supply of water and gouge it out for its entire length, you will have the same result when you finish that you had when you started. You will still have too much ground at the bottom of your river; and you can keep on until you get down to the hot place and it will not do you any good. There is another way, and oftentimes the better or only way, in which water can be put on top of land, and that is by means of dams and reservoirs; but that is another story. What I was going to say is that these creeks a foot and a half in depth their entire length can never be made into rivers that will carry ocean-going steamers. You are just expending your money for the purpose of giving exercise to some men that you like to see exercise. It is merely a little game, that is all—a little play. What I mean to say is that you are paying your money for a useless purpose to keep men out of mischief or to keep them going. That is the effect of it. I do not say that that is the purpose, but that is the effect of it, and it does not get you anywhere.

But that kind of streams I do not care to talk about; but I do want to take what I consider the three most plausible projects we are expending our money on. I think it will be agreed that if the three best that we have do not warrant the expenditures we are making, as we are now making them, then, of course, the worst can not be good enough to spend any money on. I have reference to the Mississippi River, the Missouri River, and the Ohio River.

I have gathered some data here—not through my own industry, but through the industry of others—bearing upon the expenditure of money on these three rivers. I have given some study to the subject and looked over some of the tables, and in a general way know a little about the subject. I hope to know more in the course of years. But, from the showing that is made here, I can not see where we get anything out of even the improvement of these rivers under the present method of expenditure of money. I am going to take up a little of the time of the Senate to discuss these rivers and the money expended on these rivers, and I trust I may be pardoned for reading part of this, because I have not the figures in mind.

Under the present bill we are to expend for these three streams $15,500,000; and the bill contemplates the expenditure of over $20,000,000 on 11 streams, or a grand total of over $40,800,000. I believe the Senate committee has raised it to something like $43,000,000. I am going to ask to have the table that I have here included in the RECORD if not already printed in some other speeches. I should like to have it looked at. It shows how this money is to be apportioned. I am going to dwell on the Missouri River first.

That river takes $1,750,000. Of this, $1,500,000 is appropriated for 400 miles of river which lie between Kansas City and St. Louis. When the project of the whole river shall have been completed it will have cost the Government the sum of $34,000,000. Nearly $20,000,000 has already been expended, and an expenditure of $14,000,000 is contemplated. Before the era of railroads this river bore a great carrying trade. To-day it has dwindled down to almost nothing; and, as I shall show you shortly, the greater part of the so-called commerce of the Missouri consists of the transportation in barges of the sand and stone and gravel which the Government itself is using in the improvement of this highway of commerce.

Since the opening of the Sixty-fourth Congress two tables showing the plans in favor of reinstating the Missouri River project have been placed in my possession. There is reported, based on the report of 1914, a loss of commerce as follows:

Tons of commerce reported in 1905, 343,435; in 1913, 347,235; in 1914, 240,550. That is a loss of 30 per cent of the commerce on the Missouri River.

After making the deductions of gravel and stone used by the Government itself in these improvements, and the logs and material that could be floated down without any improvement, the actual commerce is as I shall state a little further on. This feature of the commerce, or this distinction between the commerce, I believe, has been discussed here in the Senate; but it seems that these reports are made up with a great deal of duplication, and include commerce carried on by the Government in its execution of the work. Of course it is manifest that when they stop their work this part of the river commerce will cease, and consequently it is not a proper item to be charged up as a part of the general commerce. Therefore it is deducted; and of course on these rivers where logs and lumber can be floated without any improvements, it is clear, it seems to me, that a project should not be credited with a certain amount of commerce that it would have received anyway without the improvements in the river. Of course, too, when a stream can carry logs and timber and things of that kind without any improvement and continues to carry them with the improvement, that part of the commerce is not to be credited to the improvement, but is to be credited to the river in its original state; and therefore it should be deducted.

On the Missouri the actual commerce in 1905 was 18,182; in 1913, 24,000; and in 1914, 19,000, a loss of 30 per cent also for 1914 over 1913.

Mr. STERLING. Mr. President, I should like to ask the Senator if he means by the commerce on the Missouri River the commerce through the entire extent of what is known as the navigable Missouri River, from Fort Benton to the mouth of the Missouri, near St. Louis, or does he just refer to particular stretches of the river, as from St. Louis to Kansas City and from Kansas City to Sioux City, Iowa?

Mr. HUSTING. I should have to refer to the reports to get that information. I think the Deakyne report will show that. I am coming to that in a little while. Perhaps I have that information here. My understanding is that that is the entire river, or so much thereof, at least, as is credited to the part over which the improvement has been made for which this appropriation is asked.

Mr. STERLING. I am not sure whether the figures given by the Senator referred to the tons of commerce or to the value of the commerce.

Mr. HUSTING. Those are the tons of commerce. I want to say to the Senator from South Dakota, or any other Senator present, that I should like to be corrected in case I make mistakes in the figures presented. I have confessed that I am not as well grounded in this matter as I should be; but I am taking this from what I consider reliable reports, and I should like to be corrected if I make any misstatement. To my mind, these figures never have been contradicted or challenged.

Take, for instance, the conditions on the Missouri River in 1913. The report shows—and this will be found in Mr. FREAR'S minority report—a table which purports to give the freight traffic on the Missouri River. The total valuation of the commerce is $3,929,212.32 and a tonnage of about 347,235. Of this, 309,577 tons was sand and gravel hauled 1 mile.

Nine-tenths of the traffic was barged 1 mile; showing that while the figures are somewhat imposing, yet, getting down to brass tacks, there is not very much left in the way of any substantial commerce. Of the above, 309,577 tons consisted of sand and gravel carried 1 mile, probably in the Government's own construction work—a good deal of it, at least. Somebody in the neighborhood of Kansas City hauled 2,513 tons of sand 9 miles, and 10,312 tons of railroad ties were hauled 14 miles. This makes a total of 322,402 tons of these freight items, and the average haul was about 2 miles. The balance consists of a little bit of grain, logs, and wood, chiefly material which could be floated down any unimproved river. The total of this amount is 24,833 tons and the average haul less than 100 miles.

Lieut. Col. Herbert Deakyne, of the Corps of Engineers, who was sent to reexamine the Missouri River, reported on April 15 that this project should be abandoned. I am going to take the time of the Senate to read his report in full:

REEXAMINATION OF MISSOURI RIVER FROM KANSAS CITY, MO., TO THE MOUTH.

WAR DEPARTMENT,
UNITED STATES ENGINEER OFFICE,
Kansas City, Mo., April 22, 1915.

From: The District Engineer Officer.
To: The Chief of Engineers, United States Army
(Through the Division Engineer).
Subject: Reexamination of project, Missouri River, Kansas City to mouth.

1. In compliance with instructions contained in department letter dated March 18, 1915, I submit the following report giving my general views on the question of the modification or abandonment of the project for the improvement of the Missouri River from Kansas City to the mouth. This report is called for by section 14 of the river and harbor act approved March 4, 1915.

2. The project for this improvement was adopted by Congress July 25, 1912, in the following language:

"Improving Missouri River with a view to securing a permanent 6-foot channel between Kansas City and the mouth of the River, in accordance with the report submitted in House Document No. 1287, Sixty-first Congress, third session, and with a view to the completion of such improvement within a period of 10 years, $800,000: *Provided*, That cooperation from the localities benefited may be required in the prosecution of the said project in case any comprehensive plan is hereafter adopted by Congress for an apportionment of expense generally applicable to river and other projects in which any improvement now or hereafter adopted confers special or exceptional benefit upon the localities affected: *Provided further*, That nothing herein contained shall postpone the expenditure of the amount hereby appropriated or any further appropriation for said project without action by Congress."

However, the first appropriation for the work was made June 25, 1910, in the following language:

"Improving Missouri River, with a view to securing a permanent 6-foot channel between Kansas City and the mouth of the river, $1,000,000: *Provided*, That the Secretary of War shall appoint a board of three officers to further consider and report upon the most economical and desirable plan of securing such channel, in which report consideration will be given to the subject of cooperation on the part of local interests in the work of said improvement: *Provided further*, That the report hereby authorized shall be submitted to Congress on or before the opening of its next regular session."

3. The appropriations and allotments made for this project are as follows:

June 25, 1910	$1,000,000
Feb. 27, 1911, authorized Aug. 24, 1912, appropriated	600,000
July 25, 1912	800,000
Mar. 4, 1913	2,000,000
Oct. 2, 1914	850,000
Mar. 4, 1915	1,000,000
Total of 6 appropriations	6,250,000

It will be noted that the appropriations have been made at about half the rate mentioned in the act adopting the project.

4. The expenditures to March 4, 1915, were $3,577,290.85, consisting of $3,286,082.59 for improvement and $291,208.26 for maintenance. It is estimated that the project is about 9 per cent completed. There have been large expenditures for plant since the inception of the project, and for that reason and on account of the lack of appropriations at the proper rate, the amount expended and the percentage completed appear out of proportion. But it has been demonstrated that the work can be done within the estimated unit cost, and it is my opinion that with appropriations at the rate of $2,000,000 per year for improvement and sufficient funds for maintenance the project could be completed within the total estimated cost.

5. The cost of maintenance after completion of the project is estimated at $500,000 per year. The maintenance work, including snagging, is now costing about $100,000 per year. It will gradually increase as the work progresses. If appropriations are continued at the rate of about $1,000,000 per year, and the maintenance increases from $100,000 to $500,000 per year, averaging $300,000 per year during the execution of the work, it is plain that over 20 years from this time will be required to complete the project.

6. I consider that the question of modifying or abandoning the project is one to be decided by a comparison of the cost involved with the benefits derived. Assuming the money of the Government to be worth 3 per cent interest, the total estimated cost of the project represents $600,000 per year interest. Adding the maintenance cost of $500,000 per year gives $1,100,000 per year as the permanent charge to the Government resulting from the execution and maintenance of this project.

7. The benefits derived are represented by the increased facilities for navigation. There are other incidental benefits, such as the protection of lands from erosion and the amelioration of flood conditions, but these have not been recognized as proper objects of Government expenditure on the Missouri River and are therefore not considered in the analysis.

8. The commerce to be considered is present and prospective, and the advantages that commerce will obtain from the improvement are the actual saving in freight charges by the use of the river and the effect on railroad freight rates produced by the possibility of water transportation.

The commerce for the calendar year 1914 is not fully tabulated.

Then follows the total I have just read. I want to say that is in Deakyne's report, and that is my authority for the statement.

Mr. STERLING. I ask the Senator if he can refer again without much trouble to the figures he gave of the tonnage on the Missouri River from Kansas City to the mouth?

Mr. HUSTING. This is the total, but I think that is filed with the Deakyne report. I will give you the figures found in his report and that is my authority for these distances concerning which he proposes to cover. He does not say what part of the stream it is in, but I assume it is for that part affected by this money, whether the whole or a part of it.

Mr. STERLING. I refer to the figures given by the Senator.

Mr. HUSTING. This is the same table.

Mr. STERLING. May I call the attention of the Senator for the purpose of the RECORD to the statement given in the report of the Committee on Commerce? As I remember the figures given earlier in the Senator's address, he gave the tonnage as something like 18,000 or 19,000 tons.

Mr. HUSTING.. No; the total tonnage was 347,235.

Mr. STERLING. For 1913?

Mr. HUSTING. For 1913; and I deducted from that the gravel. I am coming to that now, and I will give them over again if you desire.

Mr. STERLING. I do not care to have the Senator repeat it, but I call the Senator's attention also to the value of that tonnage during the three years 1912, 1913, and 1914, showing a constantly increasing value of the tonnage during those three years.

Mr. HUSTING. Please give me the page of the report.

Mr. STERLING. Page 365 of the report. I suppose that is taken from the report of the Board of Army Engineers.

Mr. HUSTING. These figures are taken from the Deakyne report and I assume that they are correct. I say personally I do not know whether they are or not.

Mr. REED. Mr. President——

The VICE PRESIDENT. Does the Senator from Wisconsin yield to the Senator from Missouri?

Mr. HUSTING. Certainly.

Mr. REED. I ask the Senator if he does not know that that report was absolutely turned down by a full board, who sat on it and repudiated it——

Mr. HUSTING. What board?

Mr. REED. The board of appeal that was appointed, at the head of which was Col. Black, now Gen. Black; and that after a full hearing this report was not only repudiated, but after the hearing placed Deakyne in a position that I will not say was discreditable but, at least, it was extremely pitiable.

Mr. HUSTING. I am sorry if I shall be quoting anybody who has been discredited by any subsequent investigation, but I do not understand from the Senator that his figures were challenged.

Mr. REED. There were many other figures given, and the fact that his figures were inapplicable and unjust was made clearly manifest.

Mr. HUSTING. That is a matter of argument.

Mr. REED. No; it is not a matter of argument, because the board of appeal found against him, consisting, I think, of nine officers who came there and had a hearing lasting for several days. At the head of that board was then Col. Black, who is now Gen. Black, Chief of Engineers. The fullest hearing was had, and I say without desiring to reflect upon Col. Deakyne that I never saw a man in a much more pitiable condition than he was after that hearing had proceeded a few days.

The fact is Col. Deakyne did not understand the Missouri River or know what he was trying to do. It had been a pretty complete failure all the time he was out there; and his report is discredited and discarded and in the waste basket of forgetfulness, except that the Senator has reached down and shaken the dust off of it and brought it in here before the Senate.

Mr. HUSTING. I will say to the Senator that I do not understand whether the Senator is stating these things as his opinion or whether he is stating his opinion as to the pitiable condition of the engineer at the time he appeared before the board. I will state to the Senator that I shall take occasion to look up this conference of these governors or the report of this committee and see whether they have denounced him as severely as the Senator has done.

Mr. REED. They did not denounce him. They simply reported against everything that he reported in favor of, that is all.

Mr. HUSTING. I would consider that as a matter not in any way reflecting on the figures and facts given by the engineer.

Mr. REED. I have already said there were at this hearing facts and figures produced which showed that the figures of Col. Deakyne were inadequate, were not complete, and that new facts and new figures and new evidence throw added light on the whole proposition and entirely destroy the effect of these figures. The Senator will be so kind as to permit me to observe at this point one trouble with Col. Deakyne's figures, and it goes to the Senator's argument. I do not know whether the Senator has ever seen the Missouri River or not.

Mr. HUSTING. Yes; I have seen it.

Mr. REED. I suppose he has seen it. That is probably about all.

Mr. HUSTING. I have not seen it as often as the Senator has.

Mr. REED. No. One trouble is that Col. Deakyne's figures were based upon tonnage upon a river which everybody admits until it is improved is only navigable at certain periods of the year and by boats of certain special build and limited capacity. The effect of the Senator's argument is and the effect of Col. Deakyne's report was that it was a fair test of the value of the river. In other words, a river is unnavigable because of certain bars across it. Therefore these gentlemen say, not being navigated to any great extent, it is unfit for navigation, and they proceed to prove that by the fact that there is no navigation, and that navigation is practically impossible, when the proposition is to cut through those obstructions and to place the river in a condition to be navigated.

Mr. HUSTING. How many miles, I should like to know, have to be excavated and how much money has to be expended before the improvement of the Mississippi River can be made.

Mr. REED. The amount that is estimated for the completed project is $20,000,000.

Mr. HUSTING. And $14,000,000 more.

Mr. REED. No; about $14,000,000 to cover the entire river.

Mr. HUSTING. For 400 miles.

Mr. REED. From Kansas City to St. Louis, a distance of about 420 miles, I think, though I have not the figures in my mind. Now, I want to get——

Mr. HUSTING. Before the Senator leaves that, as I understand it his reflection on this engineer is that his idea of what is going to happen after the river is improved differs from the opinon of the corps of engneers who examined it.

Mr. REED. No; the point I am making now is that no man with good judgment and with a reasonable degree of fairness wants to attack a thing simply for the sake of attacking it.

Mr. HUSTING. I should like to ask the Senator a question in order to get this position clearly before the Senate, if he will. The point, then, is that the figures are not disputed, but that the appropriation rests on the future commerce and the possibilities of future commerce, and not on what has already been engaged.

Mr. REED. There are some of the figures that the engineer gave that are accurate. Many of them, however, are not complete.

Mr. HUSTING. Will the Senator point out those not complete.

Mr. REED. I will at the proper time. I could not do it out of mind. I have not the report before me. I can bring the figures here, however. This is what I want to get into the Senator's mind, and I am presenting it to him as a fair man. Assume the case of a good highway built up to a river bank and a good highway upon the other side of the river, an impassable river, and no bridge. Now, it is proposed to appropriate some money to build a bridge, and the report is there has never been any traffic across that river, and therefore, because there has never been any traffic across the river, except perhaps by some ford that could only be used one month in a year, the bridge should not be built. Now, that has been the line of reasoning followed by every man who has opposed this project.

Mr. HUSTING. That will not be the line I am going to follow.

Mr. REED. That was Deakyne's plan. He said, "Here is a river. How much business have you upon this river now?" In the face of the fact that he knew and that everybody else knew who knew anything about it that the reason why the traffic was not on the river was because in moving their boats up and down at every season of the year except in high water there were certain shallows and certain bars that made it impossible to move their boats. The project is to remove those obstructions. Therefore the question is not how much there has been but how much there will be in traffic upon that stream.

Now, that is to be settled. It is upon the basis that the river has been made navigable, which all engineers, five or six boards sitting at different times, have agreed is entirely feasible and practical. The further question is, Is there business? Is there traffic along this river which at prices that it can be hauled for will go to the river?

The answer to that is that there is no territory west of the Mississippi River that will afford an equal amount of traffic. That is shown by population, shown by the great wealth and resources of the country, by the enormous production, by the thick population, and by the fact that the boat line already operating under these almost impossible conditions has been able to operate and pay its expenses with a cut in freight rates on the average of 20 per cent. Now, if you——

Mr. HUSTING. If the Senator please, I should like to resume my argument.

Mr. REED. Let me just finish this sentence. When you remove the obstructions so that the river can be fully employed, the evidence that was taken before the board of appeals overwhelmingly shows that the river would carry upon its bosom an enormous commerce which would result in a reduction of freight rates to all of that great State and to the territory that is tributary to it, the Dakotas, and even Oklahoma, and that the resultant benefit to the public would be almost incalculable. Yet in face of that showing we are asked to consider Mr. Deakyne's report based upon the unimproved condition of the river. I am obliged to the Senator.

Mr. HUSTING. The Senator talks of the future. It is impossible to show the future. I do not care what any corps of engineers may venture to predict as to what is going to happen in the future, the future can be better judged from the past than it can by the prognostications of a board of engineers. I believe—I have been so informed, and I feel that I am fairly safe in making the statement—that the figures all go to show that river transportation has decreased over those parts of rivers that have been improved, or, in other words, that it has decreased whether it has been improved or not.

Mr. REED. On the Missouri River?

Mr. HUSTING. Yes. I will take it not for a couple of years, but take it ever since the river has been improved, and there has been a decrease in proportion to the total transportation, if not a literal decrease in transportation, in the amount of transportation.

Mr. REED. Mr. President——

The PRESIDING OFFICER (Mr. SIMMONS in the chair). Does the Senator from Wisconsin yield to the Senator from Missouri?

Mr. HUSTING. For a question.

Mr. REED. The Senator certainly wants to get his figures right.

Mr. HUSTING. Yes.

Mr. REED. There was a time many years ago when there were no railroads and when the traffic there had to be upon the river, when there was a very considerable tonnage upon the Missouri River and upon many little rivers that we would not consider navigable.

Mr. HUSTING. I have already shown by this table that the tonnage on the Missouri River has decreased from 343,435 tons in 1905 to 240,550 tons in 1912, the total commerce. It is true that before the advent of the railroad west of the Mississippi the river tonnage was high, but it has steadily been declining ever since, at least proportionately if not literally.

Mr. REED. There are no such figures, in fact.

Mr. HUSTING. The Senator——

Mr. REED. I want to get the Senator right. My word on this is almost as good and important as an Army engineer's. They are not infallible. I say to the Senator that the figures absolutely show that since the present boat line was put on—now some four or five years back—there has been a steady, constant, and rapid increase in traffic upon that river; and anybody who says to the contrary—I do not care whether he is an Army engineer or whether he is a Hottentot—is not stating what is the fact.

Mr. STERLING. I should like to say, in all fairness, I think the Senator from Wisconsin ought to include in his table the value of this commerce, as it has increased in the last three years. It runs thus—that is, between Kansas City and the mouth of the Missouri: In 1912 it was $3,149,870.

Mr. HUSTING. The Senator is now speaking of the value of the commerce.

Mr. STERLING. Of the value. Just let me complete this statement. In 1913 it was $3,929,212, and in 1914, $4,677,207, making a total for those three years on that stretch of the Missouri River of $11,756,289.

Now, the Senator from Wisconsin does not consider that as inconsiderable commerce; but if there was that commerce with the then condition of the river and it can be increased by the improvement of the river, would not the Senator be in favor of making the improvement?

Mr. HUSTING. I will ask the Senator whether he is giving the value of the cargo. I should like to have the Senator give, if he can, the tonnage.

Mr. STERLING. I can give the Senator the tonnage.

Mr. HUSTING. It may be different from the figures I gave.

Mr. STERLING. The tonnage in 1912 was 185,110; in 1913, 347,235; and in 1914 the tonnage was as the Senator stated—240,550—but now the value of that tonnage has exceeded the value of the tonnage in either of the other years by considerably over a million dollars.

Mr. HUSTING. I do not see that the value of the cargo throws any light on this question at all. It does not as far as I am concerned, or as far as my understanding of the problem is concerned.

Mr. STERLING. It seems to me that the important element in it is the value of the commerce.

Mr. HUSTING. Not of the commerce carried to show the saving in the carrying of that commerce.

Mr. STERLING. Now——

Mr. HUSTING. Just a moment. If you transport commerce in gold coin of the value of $1,000,000,000 down a river and get $500 worth of revenue out of it for the carrying of it, and the Government spends $10,000,000 to transport that billion dollars of gold down the river 5 miles, I do not see that that is a help to the transportation problem.

Mr. KENYON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Iowa?

Mr. HUSTING. Certainly.

Mr. KENYON. In the figures suggested by the Senator from South Dakota, if he will analyze them he will find, for instance, 211,000 tons worth of sand and gravel barged a mile and sand and gravel again barged for 9 miles.

Mr. STERLING. I will ask the Senator from Iowa for what year was there tonnage of that kind?

Mr. KENYON. In the report of 1915.

Mr. STERLING. In the report for 1915?

Mr. KENYON. No; the year 1914.

Mr. STERLING. Will the Senator state the total tonnage and the value of the total tonnage for 1915?

Mr. KENYON. I have it not for 1915. I have it for 1914. It is in the 1915 report. I have it also for 1913. There were 309,000 tons of sand and gravel barged 1 mile.

Mr. HUSTING. I will say to the Senator that Engineer Deakyne analyzed those figures. I may as well here ask what are we spending money for in the way of improving water transportation? Is it for the purpose of hauling down the stream goods of great money value, or is it for the purpose of serving the people and saving them money on transportation?

That brings me to the proposition of the Senator from South Dakota. I say it does not make any difference what the value of the cargo is that goes down the river as between a railroad and the waterway. It seems to me that the figures throwing light on the amount of revenue derived by the transportation companies and the amount of tariff or toll that the public has to pay and the difference or the saving between those two either directly or indirectly by reason of the river improvement is the test whether we are spending our money for a useful purpose or not. In other words, taking the question of convenience into consideration, would we, as a business proposition, vote $10,000,000 or $20,000,000, with $14,000,000 more, or a total of $34,000,000, to carry, as the Senator admits his own figures show, a few hundred thousand tons of commerce, where we know that the public will save only about $10,000 per annum?

Mr. STERLING rose.

Mr. HUSTING. Just pardon me a moment. The Senator from South Dakota gave some figures here as to the tonnage, which entirely coincide with the figures that I have given. So these figures are not challenged; they are corroborated by the report of the committee.

Mr. STERLING. Will the Senator permit me to make a suggestion right there?

Mr. HUSTING. Certainly.

Mr. STERLING. The Senator speaks of an expenditure of $20,000,000 on the Missouri River. Now, may I ask to what reach or stretch of the river he has reference?

Mr. HUSTING. I refer to the portion of the river through which this tonnage is carried.

Mr. STERLING. Does the Senator mean, now, from Kansas City to the mouth of the river?

Mr. HUSTING. I refer to any tonnage that goes on the river.

Mr. STERLING. Does the Senator mean the whole river?

Mr. HUSTING. I mean that part of the river on which this $34,000,000 was expended, or an expenditure which has been made on this particular stretch of the river. If I am wrong, I should like to be corrected.

What is the standard here? What is the compass with which we are going to steer this business? Is it by a view of the good the expenditure does the people and the amount it saves them on transportation charges, or is it going to be without any regard to return for the money expended? Is it merely going to be just for no particular purpose, except to spend the money in certain States because Senators or Representatives want it spent there?

Take the Missouri River. I say it is one of the best, and I have singled it out, and I want to tell the Senator from Missouri [Mr. REED], who was not here at the time that I singled it out, that I am singling this out as one of the three most promising enterprises of the lot—not as the worst, but as one of the best. The worst have been pointed out by the Senators who have spoken before me; but the purpose of my argument, in so far as I can make it clear, is to show that even as the best, taking the best project into consideration, under the present system——

Mr. STERLING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from South Dakota?

Mr. HUSTING. Just a moment. We are expending our money uselessly and extravagantly without getting just returns for the expenditure.

Mr. STERLING. Mr. President, it seems to me that the Senator from Wisconsin will have to revise his figures in regard to the amount expended on the Missouri River from Kansas City to the mouth. I have here a statement under the head of "Financial summary" of the amount expended on all projects to June 30, 1915, which shows the expenditure to have been $10,475,618.90. I understood the Senator to say that $34,000,000 had been expended for that purpose.

Mr. HUSTING. No; I said $20,000,000 and $14,000,000 more——

Mr. STERLING. Then it seems to have been just about half the amount which the Senator stated.

Mr. REED. Mr. President, the Senator is talking manifestly with perfect fairness; that is, he intends to be fair——

Mr. HUSTING. I intend to be fair.

Mr. REED. But I suggest to him that, if he thinks there has been any such sum of money as that expended on the stretch of the Missouri River from Kansas City to St. Louis, he had better discontinue his speech, and get somewhere within eight or ten million dollars of the facts.

Mr. HUSTING. I will let the Senator from Missouri get close to the facts. I am stating my authority. I have already made the statement that I have no personal knowledge of this matter, but I am taking my figures from reports that purport to be true. I shall be glad to be corrected by any Senator who finds anything to the contrary.

Here in this summary I find, on looking at it, that the appropriation for the general improvement has been $15,451,432, and from the mouth of the river to Kansas City it is $2,250,000, making a total of nearly $18,000,000. What part of that has been expended I will let the Senator explain, and I hope he will; but, taking the statement that $10,000,000 have been expended as true, the same argument obtains, and with $14,000,000 more of expenditure it makes a total of $24,000,000. If my figures are not correct, let us take the Senator's own figures.

Mr. REED. I did not give those figures. I said that the Senator was off over $10,000,000. Now, he has got it up to $24,000,000 as the amount which will be ultimately expended.

Mr. HUSTING. There is $14,000,000 more to be expended. The Senator himself said that a little while ago.

Mr. REED. I said approximately, but I did not say $10,000,000 had been expended. The total that was contemplated to be appropriated was $20,000,000. So the Senator will have to cut off 4,000,000 more cats to get down to the number that are in the back yard.

Mr. HUSTING. I said that if there were only ten millions appropriated, the same argument will hold good, and the Senator admits that the amount will be $21,000,000.

Mr. REED. No; I admitted it to be $20,000,000.

Mr. HUSTING. Well, the Senator admits it to be $20,000,000. I will not haggle with him about millions; five or six million dollars, more or less, in a matter like this, according to past practices, does not change the proposition in the least. Let us say that $20,000,000 will be expended on this proposition.

I say the test is whether we are warranted in expending that $20,000,000 when we could take every ounce of commerce that has been floated down there, pay the expense of transportation on the railroads, and have almost our $20,000,000 left in the Treasury.

Mr. STERLING. Mr. President, as I understand, the commerce for three years——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from South Dakota?

Mr. HUSTING. Yes.

Mr. STERLING. The commerce for the three years 1912, 1913, and 1914 amounts to more than has been expended up to this date.

Mr. HUSTING. But the Senator from South Dakota misunderstands me. I did not mean to pay for the cargoes. I meant to pay for the transportation charges on those cargoes.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Missouri?

Mr. HUSTING. Certainly; for a question.

Mr. REED. If the result of the river transportation has been to reduce railroad rates generally to all that vast territory, would the Senator from Wisconsin regard that as a fact that might be considered?

Mr. HUSTING. That is a fact that certainly should be taken into consideration as a factor in the question; but I am coming to that a little later. I am now talking about the saving in the transportation charges.

Let us take these figures. I again want to say that I do not propose that the United States shall buy the cargo and pay the $10,000,000 for the cargo itself; but I am speaking as to the saving in the transportation charges on this cargo. This cargo, as I understand, in 1914 amounted to 240,550 tons. I do not understand that that part of it was carried a considerable distance. The total tonnage carried between these points amounted in 1913 to 347,235 tons.

Of that gravel, logs, and lumber rafted amounted to 309,684 tons, which leaves a difference of 37,551 tons of genuine commerce; that is, commerce in the sense that it would be transported regardless of whether or not this improvement was going on.

I do not know just what transportation per ton might be worth. Let us say that it is worth $5 a ton, which is a pretty fair charge, I think, for 50 cents a hundred is a pretty fair charge.

Mr. REED. Fifty cents a hundred would be $10 a ton.

Mr. HUSTING. Very true; 50 cents a hundred would be $10 a ton. Let us say $10 a ton. You would have for this 37,551 tons $370,000 for the total freight charges of that commerce. Now, let us say you save 20 per cent by sending it by water. That would make $60,000 saving to the people in the carrying of that cargo; but you are going to pay out when it is all done a total expenditure of $20,000,000. The interest on that at 3 per cent represents an annual interest charge of $600,000. Add a maintenance cost of $100,000 or $200,000 or $300,000 a year, and you are paying practically a million dollars per year to save somebody $60,000 in freight charges. Those are merely arbitrary figures. You can double them or you can divide them or you can multiply them by three or four, and the showing will be the same, except in the matter of degree. Does it pay to do that? That is the question. Is there not some other way, some better way, to arrive at this thing and make it pay?

I want to say that I am not in favor of permanently abandoning the waterways of this country. I favor a complete and harmonious development of the Mississippi River watershed from the Great Lakes down to the Gulf. What I am complaining of is that we are proceeding in a way that is wasteful and extravagant and does not get us anywhere.

Proceeding with the reading of this report—and I want to say in behalf of Col. Deakyne that, without a further showing at least, I do not subscribe ipso facto to the declarations made by the other board; in fact, it has been one of the peculiar things in all this river and harbor appropriation business that inquiries are made by Congress; an engineer is sent to the ground to look it over; he comes back and makes a good, honest report, and after he has made a report that is adverse, and that turns down the project, the engineer is browbeaten; he is coerced; and he is discredited because he has dared to go in and independently to tell the truth and make a fair and honest report.

Mr. REED. Mr. President——

Mr. HUSTING. I am going to presume that this man made an honest report until I hear some facts which convince me to the contrary.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Missouri?

Mr. HUSTING. Yes; for a question.

Mr. REED. What reason has the Senator to think that Col. Deakyne is any more honest than the board of eight or nine men who were sent there to examine this project?

Mr. HUSTING. I do not say he is any more honest. I say he is as honest, presumptively.

Mr. REED. But the Senator complains that an engineer goes out and makes an honest report, and then is turned down by some board, the intimation being that the men composing the board were dishonest, and he was honest.

Mr. HUSTING. I do not know anything about that. I will say, in reply to the Senator, that here is a man who goes and gets the facts; he is on the ground, and presumably he knows the facts; but when he gets back here his findings are overturned by others who are not acquainted with the facts and who in fact invested him with the authority to go and get them.

Mr. REED. Why, Mr. President——

Mr. HUSTING. The presumption in my mind is in favor of this engineer's report, unless some presumption is raised against his honesty and integrity; and when the Senator sees fit to impugn bad motives to the colonel, I am going in my humble way, at least for the present, to state why I think the colonel is all right.

Mr. REED. Mr. President, the trouble with the Senator is, that when a report is made by an officer condemning a project that appeals to the Senator's mind that man immediately is honest; but when anybody reports the other way, that being in

opposition to the Senator's own preconceived notions, he regards the other man as dishonest. Now——

Mr. HUSTING. Wait a moment.

Mr. REED. I did not reflect upon Col. Deakyne's honesty; I simply said he had made a report that was literally torn to pieces upon a full hearing. Now, I say to the Senator——

Mr. HUSTING. Who tore it to pieces, I should like to ask the Senator?

Mr. REED. It was torn to pieces by the testimony of witnesses, by an elaborate statement of facts by witnesses who testified that they were on the ground and knew all about the conditions. Now, I call the Senator's attention to the fact that the board of appeal did not sit here in Washington; the board of appeal went out on the river and examined the project, and it had upon it men who were familiar with river improvement in the country and who were familiar with the history of the Missouri River improvement. Therefore it was not any star-chamber examination by men who had never been on the ground.

Mr. HUSTING. Was Col. Townsend one of these men?

Mr. REED. I think not; I do not recall his name. I am not good at remembering names.

Mr. HUSTING. Has the Senator finished?

Mr. REED. Yes.

Mr. HUSTING. The Senator says that Col. Deakyne's report was all torn to pieces. I should like to have the Senator, if he will be kind enough, to call my attention to the place where these facts were challenged or produce figures with which to disprove these facts. Opinions and insinuations merely that this man is not all right do not dispute the facts.

Here are the facts which the colonel has given, and he has given his reasons. I think his reasons are good; I think they are sound; I think his whole analysis of the question is sound; and if anybody has any fault to find with the Deakyne report, it would seem that either his reasoning or his facts or something else of material interest and value to this discussion should be disproven.

Of course, this Deakyne report, discrediting in a way, or at least advocating the abandonment of this project, certainly, standing for its face value, is an indictment against the project; and, of course, if this report and its author can be discredited, it certainly relieves the situation quite a bit, so far as that project is concerned.

I do not want to stand here and defend Col. Deakyne if he is indefensible, but I should like to know whether the facts are wrong or whether his reasoning is wrong or whether his premises are wrong. Now——

Mr. REED. Mr. President——

Mr. HUSTING. If they are, I should like to have the Senator, not during my time, but I should like him to be kind enough during his own time to put them in the RECORD, so that it will disprove this without going into a discussion of it. The facts, if they are facts, will show that it is all wrong if that is really the case.

Mr. REED. I want to put them in now——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Missouri?

Mr. REED. Because the Senator ought to get right. I think the Senator can be convinced, although, perhaps, not here in public.

Mr. HUSTING. I would be willing to take it up with the Senator at some other time.

Mr. REED. Of course, the Senator would hardly get up and read to the Senate the findings of fact and conclusions of law of a nisi prius court if he knew that that decision, upon an appeal, had been completely reversed. He would regard the decision on appeal, and not the nisi pirus decision, as the authority.

Mr. HUSTING. Let me ask the Senator a question.

Mr. REED. Now——

Mr. HUSTING. Wait just a moment. I should like to have the privilege of asking the Senator a question on my time.

Mr. REED. I wanted to make my statement of fact; that was all.

Mr. HUSTING. The Senator does not dispute the amount of tonnage that has been carried on the river in these years, does he?

Mr. REED. I have already said that it was inaccurate in that it did not include a great many items that ought to have been included, and that it was not brought down to date.

Mr. HUSTING. The Senator from South Dakota [Mr. STERLING] shows that it agrees with the tonnage reported by the committee, so that Col. Deakyne's report is verified by the figures given by the committee. The Senator also admits, as I understand, that at least $21,000,000 is to be devoted to this project.

Mr. REED. No; the Senator still is bound to swell it one million.

Mr. HUSTING. I beg the Senator's pardon; I mean twenty million.

Mr. REED. Yes. The Senator never makes any mistakes the other way. Go ahead, however.

Mr. HUSTING. Well, I do not think the Senator from Missouri will make a mistake the other way on his figures. The question that is vital, to my mind, here is whether we are warranted in expending $20,000,000 to carry about 37,551 tons of commerce annually.

Mr. REED. The Senator addresses that inquiry to me. I have already pointed out to the Senator that this river, with these bars and obstructions in it, can only be navigated under great difficulty, and at certain seasons of the year not at all, but that every engineer who has ever reported upon the project has said that it is absolutely feasible to remove these bars and obstructions. The question, then, is not How much have you carried over impassable obstructions? but How much can you carry with the obstructions removed? The Senator refuses absolutely to bring his mind to the consideration of that question.

Mr. HUSTING. If the Senator will not interrupt me any further, I will try to bring my mind to that question.

Mr. REED. Will the Senator let me conclude? A while ago I asked the Senator, who stands here reading the report of Col. Deakyne, if he would think of reading to the Senate as an authority the finding of fact and conclusion of law of a nisi prius court when he knew that that finding of fact and all the conclusions of law had been overturned by the appellate court. I now want to say to him that Col. Deakyne made this report. The law provides for a board of appeals which consists, I think, of nine—I am not sure, although I sat for days before the board—of from seven to nine Army engineers. At the head of that board was Col. Black, who is now the Chief of Engineers of the Army.

Mr. HUSTING. When did that board sit?

Mr. REED. It sat here last fall—last December. And I read to the Senator the concluding paragraph of that report.

Mr. HUSTING. By whom was it signed?

Mr. REED. It is signed by William M. Black, senior member of the board, for the board, of course.

A review of the entire situation indicates that the present grounds for continuance of this project are stronger than those which led to its adoption. The board therefore concludes that it is advisable for the United States to continue the improvement of the Missouri River between Kansas City and the mouth in accordance with the existing project.

I have only read the concluding paragraph; but there is nothing in the whole report reflecting upon Col. Deakyne. Nobody is charging him with bad faith, but there is a complete turn-down of his entire conclusion. Now, I ask the Senator, knowing that fact, knowing that this report is turned down by a board duly constituted for that purpose, turned down unanimously, if he thinks he ought to stand here before the Senate and read Col. Deakyne's report as the correct finding of fact?

Mr. HUSTING. I presume we are here for the purpose of considering the facts. If the board's report forecloses the Senate from going into the question, then the discussion might as well end right here; but I for one understand that that is merely advisory to the Senate, the same as Col. Deakyne's report is advisory to the Senate; and I for one reserve to myself the right of seeing whose judgment and whose reasoning is the best, so that I may form my own opinion on the subject and so that I may vote intelligently on the subject.

Mr. REED. Mr. President, has the Senator read the report of this board of review?

Mr. HUSTING. No; but I have given the facts here.

Mr. REED. If the Senator has not read the report of the board of review, and, in fact, did not know such a report had ever been made until I told him so a few moments ago, and says that he reserves to himself the right to examine the facts, I want to ask if he does not think he had better read that report before he assumes as a fact things that have already been condemned?

Mr. HUSTING. Why, Mr. President, the Senator says "things have been condemned." I do not understand that any things have been condemned. It is a matter of judgment between the board and the colonel on facts that are not disputed.

Mr. REED. The facts are in dispute.

Mr. HUSTING. The Senator makes the statement that because the report differs from Col. Deakyne, therefore his findings of fact are challenged and discredited. Why, of course I know that Col. Deakyne's report was overturned; otherwise we would not be here discussing this item. It would not be in the bill. I know it was overturned, but I want to know why

it was overturned and whether or not they were warranted in overturning it.

Mr. REED. Then why does not the Senator read the "whys" that are set forth in this report before he undertakes to enlighten the Senate about something he has never seen? If he wants to know the "whys," why does he not go and look at them?

Mr. HUSTING. The Senator has outlined what they have found—that they think they are going to have a great deal of commerce in the future. I have the facts here, which I do not think the Senator will dispute; that instead of the board being warranted in the belief that the transportation is going to be increased in the future all the facts of the past negative that presumption, and that as a matter of fact the probabilities are that the transportation will decrease instead of increase. So, I say it is not a question of whose report is right; and I am not citing the Deakyne report as to what he thinks, but I am merely citing it because of the facts that he adduces here, and which throw light on this question. I say again that the questions recur whether we want to spend $20,000,000 to preserve a commerce of 37,000 tons annually. That is the question, and it is from that point of view that I am going to argue this matter or try to argue it, at least.

Now, I will go ahead with the reading of the Deakyne report.

A table is given here for 1913 which shows the grain and the hay and the feed and the flour and the oil, and so forth, amounting in all to 347,235 tons.

The items that are not benefited by improvement of the river are the sand and gravel barged and the logs and lumber rafted.

Now, why is that? That is because they do not have to improve a river to float down barges or logs and lumber. The river is good enough for that without improvement. So if you are going to put $20,000,000 into that river, you have got to show that they are going to haul something besides that which they can already float down the river without spending the $20,000,000.

Eliminating the logs and the sand and gravel barged, the remaining traffic is 37,551 tons, divided into classes which are carried over average distances of from 8 to 291 miles. The total freight charge on this traffic was about $41,000. The Kansas City-Missouri River Navigation Co., the only through line on the river, operating between Kansas City and St. Louis, charges 80 per cent of the railroad freight rates. Assuming this to be the relation between the rail and water rates for the entire traffic, the saving to shippers by the use of the river in 1913 was about $10,000.

The interesting question is, Are those figures correct? That is to say, that the shippers were saved $10,000 by the expenditure of something like $10,000,000, and in which we are asked to invest another $10,000,000, or $20,000,000 in all. In other words, is it a good business proposition to expend $20,000,000 to save $10,000 annually?

It is evident that this saving is entirely inadequate to warrant the serious consideration of an expenditure by the Government of $1,100,000 per year in interest and maintenance.

The colonel here, with all the disgrace that he is said to have suffered by the adverse report of the Board of Engineers covering his recommendations, not the facts, is a mathematician, at least. He figures out, by what we have already spent—that is, the interest on the money that we have already spent and the maintenance charges, that it will cost the Government to maintain this project $1,100,000 a year. Now, the Colonel wants to know whether we want to spend $1,100,000 a year in perpetuity to save somebody $10,000 annually.

With all due regard for the board that turned down Col. Deakyne, I should like to have them explain why they think it is wise for the Government to spend $1,100,000 a year to save $10,000. I should like to have them explain why it would not be better to give a bounty of $10,000 to these shippers and pay the difference in the freight rates for them and save $1,990,000 a year. I say, with all due respect for them, that I stand for the colonel as against the board.

I think his reasoning is a great deal better than the board's reasoning, and if the facts are correct, I should like to have the Senator from Missouri give his opinion as to what he thinks about that as a business proposition.

Mr. REED rose.

Mr. HUSTING. I do not mean at this time, I will say to the Senator.

Mr. REED. Mr. President——

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Missouri?

Mr. HUSTING. Yes.

Mr. REED. I have already tried to make plain to the Senator that a man can not test his ability to cook victuals until he has fuel to put in his stove; that you can not test the ability to carry traffic upon a stream by what is carried when you have no channel through which a boat can run; and that any man who uses the amount of traffic which is carried on a nonnavigable stream to test what will be carried upon that stream when it is made navigable is not proceeding in accordance with ordinary common sense and reason.

I want to say to the Senator further that he is in that class of individuals to which the old lady belonged who said to her daughter, when she asked: "Mother, may I go out to swim?" "Yes, my darling daughter; hang your clothes on a hickory limb, but don't go near the water." The girl was expected to swim without going into the water. The Senator expects transportation upon a stream that the Government admits and everybody admits has bars and shallows in it that prohibit successful transportation; and then, under those conditions, he stands and lustily shouts, "Why don't you show us that you have carried enough traffic to pay the interest on the investment?"

You might just as well say to a man who had not yet built his house, "Show us the rents you have received from your house." The wise man would say, "How much rent will I get when the house is built?" not "How much have I received before it is built?"

Mr. HUSTING. Let me ask the Senator whether he does not think a wise man would find out what other people were getting for like houses in the way of rent?

Mr. REED. Yes; and you would find out how many people there were in a community, and what the rents were, and then you would estimate. So this board has found out here what the population is; that at one end of this stretch of the river is a city of 750,000 people; and that at the other end of the stretch are nearly 500,000 people.

Mr. HUSTING. Just a moment. Does the Senator know of any river that has been improved that would warrant him in believing that this $10,000 in saving is going to be stretched into anything near——

Mr. REED. Now the Senator talks about $10,000 in saving. Indeed, I think it is pretty nearly useless for the Senator and me to debate.

Mr. HUSTING. Then I hope the Senator will let me proceed.

Mr. REED. When the Senator admits, as he has admitted, that if the lowering of the rates upon the river resulted in a general lowering of freight rates, that fact ought to be considered, and then utterly ignores the fact that the river traffic has kept down railroad rates, and proceeds to talk about $10,000 saving——

Mr. HUSTING. I want to say to the Senator that he does not give me an opportunity to get to that. I will try to get to it a little later.

Mr. REED (continuing). It looks to me as though he was more interested in attacking the project than in ascertaining the facts.

Mr. HUSTING. The Senator does me an injustice. I want to say that this is the trouble with the Senator's position about this young lady who wanted to go out and swim: The mother in his case would say, "No; my darling daughter; we have no river around here, but I will go and dig one for you, and then, after we get it dug, I will let you go in and swim."

Mr. REED. No; what she would say, if she had any sense, would be: "If you want to learn to swim, go down to the river and learn to swim."

Mr. HUSTING. Well, she would say: "It is not deep enough, my daughter, so I will go and dig a few million dollars' worth of ground out of it."

Mr. REED. That would be a good thing if there was great necessity for a bath.

Mr. HUSTING. To be sure; and if that was the only place to bathe it would be all right to go and dig a hole for the young lady to go in swimming. But here the Senator wants to ignore all the lakes and the oceans we have around here, and go and dig some rivers purely for the purpose of giving some young lady an opportunity to take a swim. I will ask him whether, in that case, he would want to expend $1,100,000 a year in order to give the ladies of the country $10,000 worth of bathing.

That is the way I look at this situation. I say that it is a business proposition, that it is a matter of public policy, and I again say that I stand for Col. Deakyne as against the board in his saying that he does not believe in a project on which in order to save somebody $10,000 they want to spend $1,100,000 a year.

Mr. REED. Will the Senator let me enlighten him on the situation with reference to the difficulties of navigation and the absolute unfairness of testing this matter by the present navigation?

Mr. HUSTING. Yes; although I should like to proceed.

Mr. REED. Here is a report. There are between Kansas City and St. Louis some 11 shallows. The report of the Kansas City (Mo.) Navigation Co.—which was put in at this hearing, and which was very accurately kept—shows that on one bar, the Baltimore bar, their boats were obstructed 85 times in the season of 1914–15; the Glasgow bar, 154 times; the Saline City bar, 165 times; the Plow Boy bar, 210 times; the Stanley Island bar, 230 times; the Isbell bar, 258 times; the Chamois bar, 266 times; the Klondyke bar, 334 times; the St. Albans bar, 337 times; the St. Charles bar, 363 times; the Pelican Island bar, 377 times.

Those were the obstructions that these boats suffered. Nevertheless, in the face of all that, they practically managed to pay expenses, with a cut in freight rates of 20 per cent. On the other stretches of the river, with these bars out, these boats could ply up and down there carrying any amount of commerce. What this bill proposes to do is to cut out these bars and shallows and to remove these obstructions.

In view of the figures I have given, does the Senator think that the navigation, in the face of these obstructions, is a fair test of what can be done with the obstructions removed? I should like to have the Senator answer that question fairly. Does he think it is a fair test?

Mr. HUSTING. I do not quite understand the Senator's question as to what is a fair test.

Mr. REED. I could not make it plainer.

Mr. HUSTING. I ought to say that one illustration does not make a fact any more than one swallow makes a summer. This thing has got to be looked upon in its entirety.

I have already said that I can conceive that in the East River of New York, where there is an obstruction and a bar surrounded by water on both sides, the removal of the bar will make the entire river navigable. A hill now and then will warrant that it ought to be removed, and the railroad considers it good business policy to remove it and even up their grade, but they could not shovel away the whole Rocky Mountains any more than you can excavate the bottom of the whole river and make it something that nature did not intend it to be. It is not to be done by digging out the bottom. You can put water on top of it and increase your depth of water in an intelligent way, but when that river is only a 2-foot river you can not make it a 10-foot river. No matter how much you dig, when you dig all along the bed the water settles down in its bed, and you have still only 2 feet; you have a big ditch, but you have not any more water in it. So a project to be a feasible project, and I do not claim to know very much about engineering, does seem to me to promise some success, first, in the way of deepening the channel and have it remain permanently deepened, and, secondly, in inviting commerce.

The Senator from Missouri says something about building a bridge across a river. I would say that I would vote to build a bridge across a river where it was necessary to transport stuff from one side to the other, but I would not spend $1,100,000 for a bridge across any river if you can get your stuff across another bridge for $10,000 a year. I would not believe in covering the entire river with bridges when one bridge would do the work.

The Senator says that they anticipate an increase of commerce. I think the figures have been pointed out here, and I do not think anybody will dispute it or show figures to the contrary, that the water-carrying freight has decreased and decreased until it is almost a nullity on rivers that used to carry heavy commerce.

I think the time is coming back, however, and is not very far distant, when our rivers shall have been properly developed, that we may have a carrying trade in the way of small launches and small craft that will make these waterways and these lakes very valuable. I think our mails will be carried that way, and I think things will be transported that way and without the necessity of much excavation, but rather by means of dams and reservoirs; but as to expending the amount of money in this bill without getting any returns, I can not see the sense of it.

The Senator says another thing. He says that this matter is being argued upon the theory that the traffic will never be increased.

I say, in answer to that, the facts show that the traffic is not increasing, but decreasing instead, where it has already been developed and where money has been expended. I want to ask whether it is fair to assume that when rivers have been improved and millions of dollars have been put into these things or taken out of it, whichever way you put it, and no increase in traffic has resulted on those stretches that have been improved, but, on the contrary, the traffic has decreased, have we got to take the board's word for it that in their judgment it is going to increase. That is something entirely beyond the province of a board to say or even to know.

It is a matter that lies within the knowledge of any Senator or for that matter within the knowledge of any citizen, at least his guess is as good as another's; and I will take the judgment of no head of the Board of Engineers on that proposition when experience negatives the conclusion. If a man has only a little common sense—I do not care what his learning is—and will look up the statistics and base his idea upon them, he will find that notwithstanding $850,000,000 have been poured into these things, the traffic on rivers has decreased instead of increased.

I have a good deal of respect for a man's opinion when he says he does not believe it will increase when we have put the last million dollars into it. I should like to ask the Senator from Missouri whether he expects me or any other Senator to take the board's word for it? We can not expect to get any return until $20,000,000 have been put into it, until the matter is absolutely completed, and then the harvest is going to come all at once, and in the meantime we must put our faith in the board's judgment and must close our eyes to the facts and the experience of the past.

I have heard a great many stories of that kind told about other enterprises when the thing did not begin to pan out, and you were told just to keep on paying in your assessments, and when the thing is completed it surely would hand you a gold brick, or something equivalent in value to it.

Now, proceeding with Col. Deakyne's report, he said:

> 12. The reduction in rail rates resulting from the possibility of water transportation is not a simple subject. There is no question that towns having water transportation are for that reason favored with lower rates than other places having no water transportation and requiring equal rail haul. It is my understanding that this condition is recognized by the Interstate Commerce Commission. It is frequently argued that if the improvement of a river gives lower rail rates, such improvement is justified even if the river never carries a ton of freight. This might be true if there were no other method of controlling rail rates, but in these days when the railroads claim that they are being regulated too much, there appears to be no lack of governmental machinery for controlling them, and it does not seem necessary to spend $20,000,000 to bring about a proper rail rate between Kansas City and St. Louis.

That is pretty good sense. We have got an Interstate Commerce Commission and we have a railroad commission in my State, and I presume they have them in other States, and we have intrusted to them the duties of rate making. I do not share the belief that a great many entertain that the railroad commissions are perfect and that they are regulating rates in such way that they go up or down, according to the increase or decrease in expense and the amount of business—the tonnage. It is a very inelastic system. The pressure is put on the commission when business is poor to raise their rates, and complacent commissions oftentimes raise them; and after having raised them, when business has increased like it has done at the present time, for instance, we hear no more about lowering them back to where they were before they were raised. Some time ago the railroads made a great outcry that they were not paying expenses, and the matter was investigated. The rates were raised. Now, business has come with a rush, and I understand they are hard-set to carry the transportation of the country. The high rate sticks, nevertheless, and I do not believe it will ever be pulled down, at least not on the initiative of any board, and hardly on the initiative of the railroads.

So I say I do not share in the belief that the rates are always just as they should be, but the power is always there, and I do not assume that a rate commission would find a justification for lowering the rates or keeping them high merely because of water competition. I do not think that is a sound proposition. I know it has been contended by the railroads that they are justified in lowering their rates and charging for a long haul less than for a shorter haul where they are met with water competition, but I do not think that is sound. I do not think that the railroad commission is going to hold that way.

I think it is immaterial what competition they have. The question is, Are they earning a reasonable return on their investment? If they are, it does not make any difference what their competition is or whether it subjects them to the competition of lower rates, they are held to a fair and reasonable rate, nevertheless.

There is another answer to that proposition, and perhaps a better one. Now, we have an illustration out where I live. I know in the little town I live in we are paying, or used to pay, 25 cents more per ton for coal than was paid for a ton in a city 22 miles farther on. The railroad said that they made that rate because of the competition on Winnebago Lake and Fox River. The tonnage on that is quite small, indeed, and I presume that the railroads just put that as an excuse for hitting our people

for 25 cents a ton more than they did the people of the city 22 miles farther on. But assuming it to be sound in the sense that they should have the right to lower rates as against the public, yet, as a matter of fairness to those living inland, is it just and right that they should charge less for a greater service than for a lesser one and make somebody else pay for it?

The trouble with this argument is that if a town is on a river that has a potential carrying capacity and a railroad lowers rates from that place, they think they must raise it somewhere else; and they come to the commission and have it raised because they are not earning enough on their investment.

Is it a justification for the voting of money out of the Public Treasury to lower somebody else's transportation rates in a city on a river when it is known that it will correspondingly increase the rates of those off the river? In other words, are they justified in taxing you to help some purely local interests?

Perhaps that argument might be extended, and you may say, Well, what is the use of expending public moneys for harbors or Lake ports and sea ports? The answer to that is that it helps the whole country, and everybody is benefited by a general lowering of rates. But that argument will not hold good on river transportation where there are railroads running close by and where water transportation can lower rates only locally. Thus, people away from the river will not load their stuff into a railroad car 8 or 10 miles away from the river and run to the river and pay the cost of unloading and putting it on board and pay for retransporting it when it gets to its destination at another point 8 or 10 miles out, because of the 20 per cent saving. That would be swallowed up and more, and they would get no benefit out of it. So the benefit is purely local.

So I say that appeals to me as being a pretty good statement by the colonel, and I will proceed now with the further reading of his report.

13. In some cases the improvement of a stream is justified, even at high expense, where the absence of rail transportation leaves the territory along the stream entirely dependent on water transportation.

That is a fair statement. Our people have got to have a way to get out their stuff, and it is entirely justifiable for the Government to help them if they can, because they are entitled to some service.

Now, he goes on and says:

This is not the case with the Missouri River between Kansas City and the mouth. Over a great part of the distance the river is paralleled with railroads on both banks, and there are few localities that have no railroad within easy reach.

14. There remains to be considered the question of prospective commerce, and in my opinion the improvement must stand or fall by this criterion.

Coming to the point now made by the Senator from Missouri:

In the survey report upon which the present project is based the prospective commerce was given by the president of the Missouri Valley River Improvement Association as 1,000,000 tons. (See p. 45 of H. Doc. No. 1120, 60th Cong., 2d sess.) That estimate was based upon a 10-foot channel, with six or seven boats especially adapted to the navigation of the Missouri River, handling cargoes of 2,000 tons each, and making one round trip per week during a navigation season of 10 months. The fact is that anyone can make almost any estimate he sees fit as to the prospective commerce. I think a better way to approach the subject is by inquiry concerning a river that has been improved.

I should like to know whether that is not a rather sensible suggestion? He says anybody can make a guess as to what is going to happen, and then he asks whether the better way is not to inquire what has happened on the streams that have been improved. That is just the suggestion I made a little while ago. Also it seems to me to be an entirely proper one.

An example is the Mississippi between the mouth of the Ohio and the mouth of the Missouri.

That is just above the point in question.

In the annual reports of the Chief of Engineers this stretch of river is reported as having a navigable depth of 6 feet or more during the entire navigation season of recent years. The commerce for the calendar year 1913 was 258,709 short tons, not including sand and gravel or ferry traffic. It should be noted that this stretch of river is so situated as to draw commerce from the improved stretches of the Mississippi above and below it, as well as from the Ohio and the Missouri. If the Mississippi under these conditions and with a 6-foot channel carries 258,000 tons, it seems to me doubtful whether the Missouri with the same depth will carry any more. The Missouri River traffic would have to increase sevenfold to equal that on the above section of the Mississippi and would have to increase a hundredfold to reach a figure commensurate with the cost of the work.

I wonder whether anybody is so enthusiastic as to contend that if this additional $10,000,000 is spent, or $20,000,000 in all, traffic on the Missouri is going to increase a hundredfold in order to reach a figure commensurate with the cost of the work. I do not know whether I need to dwell on that. I do not think anyone with the wildest imagination possible can figure out that it will ever increase a hundredfold. I do not think the Board of Engineers would say that or have said it, and yet it appears that that is the figure necessary to be reached to be "commensurate with the cost of the work."

15. From the foregoing considerations I am of the opinion that the present and reasonably prospective commerce on the Missouri River between Kansas City and the mouth is not sufficient to warrant the continuance of the present project. I think the snagging should be continued, so that commerce may have the advantage of the natural depth of the river and the river shall not be allowed to become entirely obstructed. Any attempt at partial improvement seems futile, because the draft of boats, and therefore their cargoes, will be determined by the least existing depth. If the river is improved at all, the work should be complete as to protection of banks and control of channel. For the same reason it seems to me injudicious to spend any money in keeping up the works already built. If in another generation the improvement of the river becomes advisable, the present works will be of little value, and in the meantime the channel depth in the portions that have been improved are not likely to be less than in the portions wholly unimproved.

16. It is to be noted that these views agree in many respects with the previous attitude of the Engineer Department, as expressed by the Board of Engineers for Rivers and Harbors June 8, 1908, and by the Chief of Engineers December 2, 1908, in action on survey report published in House Document No. 1120, Sixtieth Congress, second session.

Now, we have, it seems, two boards who have approved these views, and so I do not see why our friend, Col. Deakyne, should have been so terribly humiliated when another board with a new Chief of Engineers differed from him and went and overturned all the precedents of his predecessors in office before he got there. By the way, this same Gen. Black has only been chief, I think, since December; at least it is less than a year since his predecessor went out. So here comes a new chief, Gen. Black, according to the statement of the Senator from Missouri, and overturns the reports not only of Col. Deakyne but of boards who have also looked into this project.

The views of the board as to the futility of partial improvement and the wastefulness of inadequate and irregular appropriations are of particular interest. The Missouri River Commission in its final report also expressed the opinion that there was no middle course between mere snagging and through systematic improvement.

17. I recommend that the present project be modified so as to provide for snagging alone at an estimated cost of $40,000 per year and that all other work be stopped.

HERBERT DEAKYNE,
Lieutenant Colonel, Corps of Engineers.

I desire to have printed here the report of Col. Herbert Deakyne in full.

REEXAMINATION OF MISSOURI RIVER FROM KANSAS CITY, MO., TO THE MOUTH.

WAR DEPARTMENT,
UNITED STATES ENGINEER OFFICE,
Kansas City, Mo., April 22, 1915.

From: The District Engineer Officer.
To: The Chief of Engineers, United States Army
(Through the Division Engineer).
Subject: Reexamination of project, Missouri River, Kansas City to mouth.

1. In compliance with instructions contained in department letter dated March 18, 1915, I submit the following report giving my general views on the question of the modification or abandonment of the project for the improvement of the Missouri River from Kansas City to the mouth. This report is called for by section 14 of the river and harbor act approved March 4, 1915.

2. The project for this improvement was adopted by Congress July 25, 1912, in the following language:

"Improving Missouri River, with a view to securing a permanent six-foot channel between Kansas City and the mouth of the river, in accordance with the report submitted in House Document Numbered Twelve hundred and eighty-seven, Sixty-first Congress, third session, and with a view to the completion of such improvement within a period of ten years, eight hundred thousand dollars: *Provided*, That cooperation from the localities benefited may be required in the prosecution of the said project in case any comprehensive plan is hereafter adopted by Congress for an apportionment of expense generally applicable to river and other projects in which any improvement now or hereafter adopted confers special or exceptional benefit upon the localities affected: *Provided further*, That nothing herein contained shall postpone the expenditure of the amount hereby appropriated or any further appropriation for said project without action by Congress."

However, the first appropriation for the work was made June 25, 1910, in the following language:

"Improving Missouri River, with a view to securing a permanent six-foot channel between Kansas City and the mouth of the river, one million dollars: *Provided*, That the Secretary of War shall appoint a board of three officers to further consider and report upon the most economical and desirable plan of securing such channel, in which report consideration will be given to the subject of cooperation on the part of local interests in the work of said improvement: *Provided further*, That the report hereby authorized shall be submitted to Congress on or before the opening of its next regular session."

3. The appropriations and allotments made for this project are as follows:

June 25, 1910	$1,000,000
Feb. 27, 1911, authorized Aug. 24, 1912, appropriated	600,000
July 25, 1912	800,000
Mar. 4, 1913	2,000,000
Oct. 2, 1914	850,000
Mar. 4, 1915	1,000,000
Total of 6 appropriations	6,250,000

It will be noted that the appropriations have been made at about half the rate mentioned in the act adopting the project.

4. The expenditures to March 4, 1915, were $3,577,290.85, consisting of $3,286,082.59 for improvement and $291,208.26 for maintenance. It is estimated that the project is about 9 per cent completed. There have been large expenditures for plant since the inception of the project, and for that reason and on account of the lack of appropriations at the proper rate, the amount expended and the percentage completed appear out of proportion. But it has been demonstrated that the work can be done within the estimated unit cost, and it is my opinion that with appropriations at the rate of $2,000,000 per year for improvement and sufficient funds for maintenance the project could be completed within the total estimated cost.

5. The cost of maintenance after completion of the project is estimated at $500,000 per year. The maintenance work, including snagging, is now costing about $100,000 per year. It will gradually increase as the work progresses. If appropriations are continued at the rate of about $1,000,000 per year, and the maintenance increases from $100,000 to $500,000 per year, averaging $300,000 per year during the execution of the work, it is plain that over 20 years from this time will be required to complete the project.

6. I consider that the question of modifying or abandoning the project is one to be decided by a comparison of the cost involved with the benefits derived. Assuming the money of the Government to be worth 3 per cent interest, the total estimated cost of the project represents $600,000 per year interest. Adding the maintenance cost of $500,000 per year gives $1,100,000 per year as the permanent charge to the Government resulting from the execution and maintenance of this project.

7. The benefits derived are represented by the increased facilities for navigation. There are other incidental benefits, such as the protection of lands from erosion and the amelioration of flood conditions, but these have not been recognized as proper objects of Government expenditure on the Missouri River and are therefore not considered in the analysis.

8. The commerce to be considered is present and prospective, and the advantages that commerce will obtain from the improvement are the actual saving in freight charges by the use of the river and the effect on railroad freight rates produced by the possibility of water transportation.

9. The commerce for the calendar year 1914 is not yet fully tabulated. For 1913 it was as follows:

Articles.	Amount.		Valuation.	Average haul.	Rate per ton-mile.
	Customary units.	Short tons.			
				Miles.	
Grain	253,940 bushels	6,701	$195,303.38	123	$0.0091
Hay		114	2,049.66	106	.0153
Feed and flour		334	9,538.88	8	.0670
Oil	46 barrels	12	345.00	8	.0483
Manufactured iron and steel		1,655	897,790.50	291	.0089
Live stock	4,800 head	945	137,039.20	31	.0403
Salt	148 barrels	22	259.00	9	.0510
Sand and gravel	1,735 cubic yards	2,513	1,646.00	9	.0557
Brick	4,800	16	56.90	9	.0349
Cement	534 barrels	107	1,152.90	26	.0346
Lumber	75,360 feet b. m.	183	2,976.60	13	.0333
Other building material		15	1,088.00	10	.0415

Total		347,235	3,929,212.32		

[1] Owner.

10. The items that are not benefited by improvement of the river are the sand and gravel barged and the logs and lumber rafted. They amount to 309,684 tons. Ferry traffic is not counted in reporting the commerce on the Missouri River.

11. Eliminating the logs and the sand and gravel barged, the remaining traffic is 37,551 tons, divided into classes which are carried over average distances of from 8 to 291 miles. The total freight charge on this traffic was about $41,000. The Kansas City-Missouri River Navigation Co., the only through line on the river, operating between Kansas City and St. Louis, charges 80 per cent of the railroad freight rates. Assuming this to be the relation between the rail and water rates for the entire traffic, the saving to shippers by the use of the river in 1913 was about $10,000. It is evident that this saving is entirely inadequate to warrant the serious consideration of an expenditure by the Government of $1,100,000 per year in interest and maintenance.

12. The reduction in rail rates resulting from the possibility of water transportation is not a simple subject. There is no question that towns having water transportation are for that reason favored with lower rates than other places having no water transportation and requiring equal rail haul. It is my understanding that this condition is recognized by the Interstate Commerce Commission. It is frequently argued that if the improvement of a river gives lower rail rates, such improvement is justified even if the river never carries a ton of freight. This might be true if there were no other method of controlling rail rates, but in these days when the railroads claim that they are being regulated too much, there appears to be no lack of governmental machinery for controlling them, and it does not seem necessary to spend $20,000,000 to bring about a proper rail rate between Kansas City and St. Louis

13. In some cases the improvement of a stream is justified, even at high expense, where the absence of rail transportation leaves the territory along the stream entirely dependent on water transportation. This is not the case with the Missouri River between Kansas City and the mouth. Over a great part of the distance the river is paralleled with railroads on both banks, and there are few localities that have no railroad within easy reach.

14. There remains to be considered the question of prospective commerce, and in my opinion the improvement must stand or fall by this criterion. In the survey report upon which the present project is based, the prospective commerce was given by the president of the Missouri Valley River Improvement Association as 1,000,000 tons. See page 45 of House Document No. 1120, Sixtieth Congress, second session. That estimate was based upon a 10-foot channel, with six or seven boats especially adapted to the navigation of the Missouri River, handling cargoes of 2,000 tons each, and making one round trip per week during a navigation season of 10 months. The fact is that anyone can make almost any estimate he sees fit as to the prospective commerce. I thing a better way to approach the subject is by inquiry concerning a river that has been improved. An example is the Mississippi between the mouth of the Ohio and the mouth of the Missouri. In the annual reports of the Chief of Engineers this stretch of river is reported as having a navigable depth of 6 feet or more during the entire navigation season of recent years. The commerce for the calendar year 1913 was 258,709 short tons, not including sand and gravel or ferry traffic. It should be noted that this stretch of river is so situated as to draw commerce from the improved stretches of the Mississippi above and below it as well as from the Ohio and the Missouri. If the Mississippi under these conditions and with a 6-foot channel carries 258,000 tons, it seems to me doubtful whether the Missouri with the same depth will carry any more. The Missouri River traffic would have to increase sevenfold to equal that on the above section of the Mississippi, and would have to increase a hundredfold to reach a figure commensurate with the cost of the work.

15. From the foregoing considerations I am of the opinion that the present and reasonably prospective commerce on the Missouri River between Kansas City and the mouth is not sufficient to warrant the continuance of the present project. I think the snagging should be continued, so that commerce may have the advantage of the natural depth of the river and the river shall not be allowed to become entirely obstructed. Any attempt at partial improvement seems futile, because the draft of boats, and therefore their cargoes, will be determined by the least existing depth. If the river is improved at all, the work should be complete as to protection of banks and control of channel. For the same reason it seems to me injudicious to spend any money in keeping up the works already built. If in another generation the improvement of the river becomes advisable, the present works will be of little value, and in the meantime the channel depth in the portions that have been improved are not likely to be less than in the portions wholly unimproved.

16. It is to be noted that these views agree in many respects with the previous attitude of the Engineer Department, as expressed by the Board of Engineers for Rivers and Harbors June 8, 1908, and by the Chief of Engineers December 2, 1908, in action on survey report published in House Document No. 1120, Sixtieth Congress, second session. The views of the board as to the futility of partial improvement and the wastefulness of inadequate and irregular appropriations, are of particular interest. The Missouri River Commission in its final report also expressed the opinion that there was no middle course between mere snagging and thorough systematic improvement.

17. I recommend that the present project be modified so as to provide for snagging alone at an estimated cost of $40,000 per year, and that all other work be stopped.

HERBERT DEAKYNE,
Lieutenant Colonel, Corps of Engineers.

That is not all. There was another report made by C. McD. Townsend, colonel, Corps of Engineers:

[First indorsement.]

OFFICE DIVISION ENGINEER, WESTERN DIVISION,
St. Louis, Mo., May 22, 1915.

Just a year ago—

To the CHIEF OF ENGINEERS, UNITED STATES ARMY:

1. Forwarded, concurring in the opinion of the district officer that the existing river commerce is not sufficient to justify the permanent improvement of the Missouri River from Kansas City to its mouth, but not approving the recommendation that the work should be entirely abandoned.

2. It is believed that there is still opportunity for the revival of western river commerce, but that it should first be sought not in the tributaries but in the main river. There is neither the density of population nor of material seeking shipment on the tributaries of the Mississippi, with the exception of the Ohio, to cause such a revival which will be in the nature of a revolution of the existing methods of transportation and will naturally originate at large centers of population, such as Chicago, Pittsburgh, St. Louis, and New Orleans, where large amounts of manufactured products are seeking shipment. The agricultural products originating on a river bank are not sufficient to justify a large expenditure for the improvement of the river channel. With a revival of commerce on the main stream its extension to the tributaries will gradually follow.

3. The fact, however, that there has been a failure to properly utilize the improved channel that has been maintained during the past 10 years from St. Louis to New Orleans should cause Congress to hesitate before continuing the large appropriations it is making for the western rivers.

4. In the opinion of the division engineer the problem of developing our western rivers should be treated as a single one. Instead of scattering appropriations over the entire western territory, a channel of 8 or 9 feet depth should first be provided from Chicago to New Orleans, and the offer of assistance in the construction of a canal along the Des Plaines River from the State of Illinois accepted. An opportunity should then be afforded the American people to determine whether they want waterways, not by rhetorical efforts in river conventions, but by a practical utilization of the channel thus afforded. Until such revival occurs appropriations on the tributaries should be confined to maintaining the existing status. The existing works should not be allowed to deteriorate. At present an annual appropriation of $150,000 for snagging and the maintenance of existing works is therefore recommended.

C. McD. TOWNSEND,
Colonel, Corps of Engineers.

So that here the colonel of the Corps of Engineers—the head of the division—approves Col. Deakyne's report with the exception that he does not favor the abandonment of the present project, but believes Congress should continue to appropriate $150,000 a year.

That is what the men on the ground thought of this proposition. I submit in all fairness to the Senate whether their facts which are practically admitted to be true and the inferences

they have drawn from those facts and the reasons given by them are not far superior to any which the Board of Engineers has given.

I should like to have this report printed in connection with my remarks.

The PRESIDING OFFICER. If there be no objection, it will be so ordered.

Mr. HUSTING. Let us dig into this proposition and see whether or not in its essence it is merely a commercial waterway scheme. In the report of the Board of Engineers for Rivers and Harbors in House Document 463, page 7, there appears the following:

15. It has been estimated that, with the channel held by revetted banks, there would be available for agricultural purposes in the bottom land along the river between Kansas City and St. Louis, 500,000 acres, the greater part of which would be less than a mile distant from the river, and a considerable portion of which is now necessarily nonproducing. It is claimed that this area would contribute very substantially to the river traffic.

Page 210, report of 1914 of Chief Kingman, shows also the situation:

WHERE THE MONEY GOES.

To show specifically why $1,552,650 was recommended by Col. Deakyne for land-reclamation purposes in 1915, and $1,000,000 paid by Chief Kingman, I quote from page 2510, report 1914, on this 400 miles of the Missouri, along which Army engineers estimate 500,000 acres will be saved, valued at $100 to $125 per acre—land belonging to private interests deeply interested in this $20,000,000 project:

During the coming fiscal year it is proposed to carry on work with the funds for which allotments have been approved in the completion of contracts now in force and in work by day labor and Government plant, as follows:

97,500 linear feet standard revetment, at $10	$975,000
11,000 linear feet concrete revetment, at $10	110,000
21,950 linear feet 3-row standard dike, at $15	329,250
Maintenance of improvement	25,000
New plant	13,400
Snagging and repairs to plant	50,000
Surveys and superintendence	50,000

Other work will be done if appropriations are made.

This work is expected to result in greater permanence and depth of channel in the improved sections and greater ease of navigation.

APPROPRIATIONS AND ALLOTMENTS (ON THIS PRESENT PROJECT).

June 25, 1910	$1,000,000
July 25, 1912	800,000
Aug. 24, 1912	600,000
Mar. 4, 1913	2,000,000
Oct. 2, 1914	850,000
Total of appropriations	5,250,000

A $60,000,000 LAND RECLAMATION PROJECT.

One million four hundred thousand dollars was demanded for 25 miles of revetment and diking in 1915.

It appears from this that these men who speculated in these swamp-river bottoms along the banks of the Missouri are reaping the advantages of the work of the Government. It is a reclamation scheme pure and simple. The only difference is that in most reclamation projects the Government makes the project pay for itself either because of increased price for Government lands or some other device. Here the Government steps in and disburses millions, and as far as I know never receives anything in return.

The figures above show that 90 to 95 per cent of the money expended is going to reclaim the lands of the owners of these 500,000 acres. It appears as though somebody were getting rich off of the charity of the United States.

16. Interested parties invite attention to the readjustment of transcontinental railway rates that is being made as a result of traffic through the Panama Canal. The effect of these changes is to give pronounced advantage to Eastern seaboard industries for the Pacific coast trade, and thus to handicap the interior manufacturers, and it is claimed that their only hope of retaining a competitive position is in having the benefit of cheap water routes to the sea. An improved channel in the Missouri would connect with the effective channel already provided in the Mississippi and give such a route from Kansas City to the Gulf of Mexico.

Hon. JAMES A. FREAR said, in the House on January 10, page 1115, RECORD:

INFLUENCE ON FREIGHT RATES—STONE-AGE STATESMEN.

Any attempt to sift worthless projects from waterway bills is hooted down by a few stone-age statesmen and lobby agents who affect to believe that millions of dollars in Government money now annually thrown away on private-land reclamation, private water powers, and deserted rivers, in some indefinite way will serve to reduce freight rates for the public at large; that those who oppose wasteful waterway bills are thereby preventing a reduction in railway tariffs. No well-informed man will so argue to an intelligent audience, and it is significant that railways now contribute liberally to waterway lobbies to secure Government-built railway, water terminals, and other private privileges. Under existing law any undue loss in income on one branch of the railroad must be made up on the rest of the system to secure reasonable rates guaranteed under the Constitution, and yet the Government is asked to waste millions on favored communities to be paid out of taxes contributed by other communities.

Men who oppose waterway waste are among those who have demanded strict railway regulation.

Speaking personally, as before stated, with my colleague [Mr. LENROOT] and other State legislators I was identified with the passage of railway-regulation laws which were secured in Wisconsin after a lively fight lasting several years. Having the greatest waterway commerce of any State in the country, with one exception, and with the two greatest lakes and greatest river in the world washing its borders, Wisconsin is profoundly interested in genuine waterway development, but she will never come to the Government Treasury under the pretense that railway freight rates are to be lowered by such means.

Her railway commission and the Interstate Commerce Commission have abundant powers to control such rates and have exercised those powers effectually. The same situation is true in practically every State that cares to use the constitutional rights it possesses.

If the railroads must reduce rates to meet the competition of water at points along the Missouri River or any other river they will raise the rates at some inland point to make up the difference, or they will be forced to raise the rates on commodities that can not by their nature be the subject of river traffic.

What shippers and growers and manufacturers want is to get their products to the market as quickly as possible. Therein lies the primary reason for the triumph of railroads and electric roads over that branch of the traffic which takes the slower water route. The more money that is lavished on the rivers of this country the less grows the commerce that exists upon the particular streams. They seem to be shifting in adverse proportion.

I have some more figures here which I do not feel as though I want to take up the time of the Senate to read, but I should like to have them included also in my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. HUSTING. I have some figures here on the Ohio River which have been presented to the Senate at former sessions, and I think also at this session and in my opinion in this debate. It would be only duplicating what I have said to read these figures. I think it is a fair statement to say that the figures concerning the Ohio River show the same state of affairs.

The Ohio River gets, under this bill, an appropriation of $5,509,000. Congress has already appropriated $53,000,000 for this purpose, and to complete the locks and dams it will take $38,601,488 more. That makes a total of something like $91,000,000 for this project.

The figures in connection with the Ohio River improvement and the rates of traffic going through different locks when analyzed, as they have been in this printed statement which I am going to put in in connection with my remarks, and which I do not care to go over and discuss at this time, show that, when the figures are analyzed right down to the bone, the traffic carried on is entirely incommensurate with the expenditures, and that if it is merely to figure out the saving of the 20 per cent, not only as to the traffic which is actually carried on the river, but that which is tributary to it, there can not be any doubt in anybody's mind that it would well pay the Government to pay out as a bonus the actual amount of freight charges paid by shippers on the actual amount of saving made by them, and it would not make a dent in the appropriation.

I am going to have this also printed in connection with my remarks.

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, July 27, 1914.

Hon. S. M. SPARKMAN,
Chairman Committee on Rivers and Harbors,
United States House of Representatives.

SIR: 1. Referring to the statement of the commercial statistics of the Ohio River, telephoned to you some time since, I have the honor to inform you that a report just received from the district officer states that the commercial statistics which he reported by telegraph have been found upon careful check to have contained some duplication. A corrected tabular statement of the statistics is herewith.

2. As to the reason for reporting the statistics at only six locks, it may be stated that the particular locks were selected with a view to obtaining as complete statistics as possible, and at the same time to eliminate duplication as much as practicable. Boats with through tows are required to report only at the first lock through which they pass. The item for open-river commerce is the local commerce carried on between the various locks and dams.

Very respectfully,

DAN C. KINGMAN,
Chief of Engineers, United States Army.

Ohio River tonnage, calendar year 1913.

[Through lock and open river.]

	Tonnage.	Valuation.	Passengers.
Lock No. 1	1,982,257.5	$3,720,794.36	86,518
Lock No. 8	224,080.5	1,095,666.92	5,005
Lock No. 18	374,945.0	2,336,645.31	9,421
Lock No. 26	796,629.0	2,926,918.65	17,266
Lock No. 37	1,988,434.0	9,953,466.24	104,078
Lock No. 41	1,537,146.5	6,318,567.53	11,767
Open river	1,503,111.5	14,088,452.70	1,086,897
Ferries	1,401,519.5	36,085,390.07	2,949,834
Total	9,814,123.3	77,026,901.78	4,270,785

A corrected statement of average freight floated on the Ohio, based upon official lock reports, is now presented over Chief Kingman's signature, and invites scrutiny.

OHIO RIVER TRAFFIC AT LOCK 1.

Lock 1 is given 1,982,257 tons. But page 2711 says that is commerce which passed through the lock—"and open river"—at that point. The table further shows that of the impressive tonnage reported, including duplications, 1,946,119 tons consisted of soft coal, sand, and gravel that was always floated down the "open river," leaving a commerce of 36,135 tons, including 11,240 tons of floatable logs and ties, or less than 25,000 tons, that may or may not have required the services of this $100,000,000 lock system.

OHIO RIVER TRAFFIC AT LOCK 8.

Lock 8 and "open river" is given 224,080 tons by Chief Kingman, page 2712. Of that traffic, so reported, soft coal and railroad ties, that for a half century were floated down the open river, reached 207,429 tons, leaving 16,651 tons of cement and other reported freight at that point for which a $100,000,000 lock system is being built under the recommendation of Army engineers.

OHIO RIVER TRAFFIC AT LOCK 18.

Other lock statistics are of the same character. For fear this statement may not be accepted, as based on investigation, I will take the next lock. Chief Kingman's next lock, 18, and "open river" statistics are found on page 2713. He reports a total "commerce" of 374,945 tons, whereas out of an even 50 items reported, 2 items of soft coal and logs reached 342,836 tons. Just what method was taken for shipping some 7,000 tons of oil and 2,500 tons of lumber, found in the remaining 48 items, the report fails to disclose. One thing is certain amid all this attempt to impress Congress with inflated statistics of open-river and lock traffic, the Government is annually paying bills reaching, with the regular and sundry civil bills, from $5,000,000 to $8,000,000 for the Ohio River alone, for a comparatively insignificant commerce average along the river, apart from soft coal, sand, and gravel, of less than 50,000 tons at given points, as shown by the official reports.

The same is true of the Mississippi River. I have only taken the Missouri River because I have had it more in detail, but what I have said in regard to the Missouri River is largely, if not entirely, true with regard to the Mississippi proposition.

A large part of the 600 miles between St. Louis and Minneapolis borders on the boundaries of my State. It is proposed to spend this year the sum of $1,200,000 on this project. According to the plans it is proposed to complete the entire Mississippi project at a cost of $166,000,000. All this $20,000,000 either is going or has gone on that part of the river which lies between St. Louis and Minneapolis. Does the traffic warrant it?

I say that the analysis that I have here, which I have taken from the CONGRESSIONAL RECORD, contains tables—which I believe to be true, but if they are not correct I should like to have them corrected—to show that it is entirely disproportionate to the amount of money expended under the present system and in the manner it has been done, and that it is impossible for anybody to sit down and figure out where the United States Government could be justified in expending that tremendous amount of money, judging by the returns that we have from this expenditure.

Upper Mississippi River freight statement for 1913.

Designation.	Short tons.	Ton-miles.	Valuation.
Logs	64,489	30,245,340	$315,271
Rafted lumber, shingles, etc	13,570	4,400,147	190,001
Miscellaneous freight	1,294,864	12,229,310	31,417,968
United States material	772,392	9,445,576	781,897
Total	2,145,315	56,320,373	32,705,137

Classified freight traffic, 1913.

Articles.	Amount.		Valuation.	Average haul.	Ton-miles.
	Customary units.	Short tons.			
				Miles.	
Apples	160,090 barrels	11,505	$200,218	34.4	395,959

Shells	11,428 tons	11,428	246,229	42.9	490,801
Shingles	622,000 pieces	65	1,866	1.3	85
Teams	23,501	26,609	6,540,900	1.7	46,537
Wheat	11,500 bushels	382	12,347	7.9	3,015
Wood	21,847 cords	34,248	108,213	16.4	560,865
Miscellaneous	71,042 tons	71,042	5,366,996	231.0	1,642,366
Total		2,145,315	32,705,137	26.2	56,322,373

A comparative statement of upper-river commerce is also offered by years, during which period between $20,000,000 and $25,000,000 have been expended by the Government on the advice of Army engineers. While the 1913 commerce was only about 35 per cent of that floated in 1885, it will be ascertained upon analysis that over nine-tenths of the 35 per cent floated in 1913 is bogus commerce, or, assuming the 1885 commerce reported to have been legitimate, in 28 years river freight fell approximately 96 per cent.

Mississippi River: Mouth of the Missouri to St. Paul, Minn.

[From reports of the Chief of Engineers, War Department.]

	Tonnage.
1885	5,607,196
1886	3,200,000
1887	3,500,000
1888	3,750,000
1889	3,500,000
1890	4,200,000
1891	3,300,000
1892	3,750,000
1893	3,200,000

1911	2,081,566
1912	1,830,294
1913	2,145,315

[From reports of the Chief of Engineers, War Department, 1904, vol 2, p. 2157, and 1913, vol. 2, p. 2385.]

	Tonnage.
Average tonnage for years 1877 to 1903, inclusive	4,615,376
Tonnage in 1912	1,830,294
Decrease	2,785,082

ENGINEER'S STATISTICS OF COMMERCE (?).

"Commerce" reached 2,145,315 tons in 1913, so the Chief of Engineers reports. Tons of what? Let us see:

	Tons.
Brush for river construction work	82,450
Gravel dredged from river	398,178
Rock for river work	708,000
Sand dredged from river	562,000
Logs that have floated for 50 years	98,268
Lumber and wood barged	64,408
Animal ferried across river	55,322
Automobiles ferried across river	6,034
	1,974,980

This quotation from a St. Paul paper shows what is thought of the project by those who are supposed to be interested in this improvement. Here is what the St. Paul Dispatch says:

[From the St. Paul Dispatch, Aug. 12, 1915.]

DEMAND IS SLIGHT FOR RIVER SHIPPING—ASSOCIATION OF COMMERCE COMMITTEE FINDS 20 FIRMS USING WATER FREIGHT.

A report made to-day by a special committee of the association of commerce shows little demand at this time for river transportation. An estimated tonnage of 10,464 inbound and 2,472 outbound for one year was made to the committee by 20 out of 64 business firms.

THIRTY-SIX DO NO RIVER BUSINESS.

Thirty-six of the 64 firms said they could do no business by river transportation.

Eight shippers said they may be able to use the river, but were unable to make any definite statement. Several of the largest firms did not reply to the communication sent to them by the committee.

REPORT FOR A YEAR.

The tabulated report for a year showed from foreign ports by way of New Orleans 1,124 tons of freight would come in and only 7 tons go out. From Pacific and Atlantic ports, by way of New Orleans, 4,200 tons will come in and 1,715 go out.

Along the Mississippi River 2,704 tons could be picked up and 165 tons sent to the way points. From St. Louis to St. Paul the inbound is estimated at 606 tons and the outbound at 360. Pittsburgh and other points on the Ohio would send 1,830 and take 225 tons from St. Paul.

TOTAL TONNAGE 12,936.

The total tonnage is estimated by the 20 concerns at 12,936. This is the estimated amount of the business, and not an estimate of all St. Paul firms.

For October 160 tons can be brought in by river and only 3 tons sent out.

The committee which made the investigation is composed of H. T. Quinlan, J. W. Cooper, C. E. Tuttle, C. H. Bigelow, C. J. McConville, Charles Patterson, H. S. Sommers, J. A. Seeger, J. A. Gregg, and J. Clair Stone.

Can anything be added to this tragic statement of a $20,000,000 expenditure for a waterway that will float about 12,000 tons of commerce for St. Paul annually out of a hundred million tons and over handled by the Twin Cities? Some open-river expenditures ought to be made to provide for the small existing local freight, but $2,000 per mile annually is a notorious waste of money directly chargeable to the Chief of Engineers.

Yet from his reports we are told, according to a contributed manuscript which will later be considered—

As I say, I have taken probably three of the most promising projects, so far as rivers are concerned, as examples to show the benefits of these river and harbor appropriations. Surely if money could be well expended, or if, what is more to the point, money were being expended to advantage anywhere, it would be upon these streams; but the figures and the facts show that the people are not getting their money's worth from these appropriations. If it is true that even in those instances—and those instances where one would naturally suppose we would get the greatest benefit—those expenditures are not bringing adequate returns, then I should like to know where on earth we could expect any returns from the hundred or more that are incorporated in this bill—items in regard to the improvement of certain creeks and rivers which seem upon their face to be of absolutely no value whatever to anybody?

Another thing. I find here, for instance, that as to the Mississippi River, only yesterday we agreed to abandon a project, which is found on page 36 of the bill, as follows:

Reservoirs at headwaters of Mississippi River: That so much of the adopted project for the construction of a low reservoir dam at Gull Lake, Minn. as provides for the digging of ditches between Gull Lake and Round Lake and between Round Lake and Long Lake is hereby abandoned; and the Secretary of War is hereby authorized to surrender to the parties entitled thereto the flowage rights on Long Lake and Round Lake heretofore granted the United States for the aforesaid work.

I do not know just how much money has been expended on that particular reservoir, but I merely took the opportunity to look up and to see what was done on that sort of work on the Mississippi River. I find that on reservoirs and headwaters $1,648,354 has been expended. This bill has been amended by abandoning a part of this project. It may be a small portion of it; I do not know; but it is some portion of it. Not only that, but it is a portion of it in which lie the headwaters of the Mississippi. What is the object of having us vote a million and a half dollars to improve reservoirs on the headwaters of our great streams, which at some time in the future we are going to use as reservoirs, to put in money and actually develop them, and then come here before Congress and in a bill appropriating other moneys for the development of other reservoirs withdraw that appropriation and turn the flowage rights back to the men from whom we secured them? What is the purpose of that?

I find other items here. I found an item which, however, the Senator from Florida [Mr. FLETCHER] did not insist upon, but a bill was introduced by one of the Senators providing that a part of St. John's River should be abandoned above a certain point—a river on which has been expended several million dollars.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER (Mr. STERLING in the chair). Does the Senator from Wisconsin yield to the Senator from Florida?

Mr. HUSTING. Yes, sir.

Mr. FLETCHER. I will say to the Senator from Wisconsin that that portion of the river never has been improved at all by the Government.

Mr. HUSTING. That may be, if the Senator please. I am not saying anything about that, but here below on the river we are spending millions of dollars to keep it navigable, and a part of the navigability depends upon the headwaters of streams if you want to control the river and to control navigation. So in a bill improving other streams and voting hundreds of millions of dollars we are withdrawing some of them as they become improved from the general jurisdiction of the United States and putting the matter out of the hands of the United States; in other words, we are building up something at a cost of millions of dollars, and then at a sacrifice of thousands and thousands of dollars we are abandoning these things and destroying them. We are spending millions in attempting to build up and then tear down as fast as some of it is built.

There is another thing in this bill, I think, or there is at least another bill here which proposes to surrender the jurisdiction of the Illinois River into the hands of the State of Illinois. What is the object of that?

I think that is a fine illustration, if the Senate will permit me to point it out, of the cross purposes at which we are working. Here we are expending hundreds of thousands and millions of dollars to improve the navigation on Lake Michigan, Lake Superior, and other lakes. We are digging out the bottoms of the lakes and improving our harbors. Then, again, I understand there is a bill coming over here carrying $45,000,000 to build levees and dikes down in the south end of the Mississippi River. What have we done and what are we doing and what are we going to do?

I am sorry the Senators from Illinois are not here, for I do not want to say anything against something that I know is dear to their hearts, and rightfully so, for it means a good deal to the city of Chicago, but I can not help pointing out the senseless action of the United States in connection with these propositions. I ask what have we done? We have permitted the State of Illinois to turn a river that formerly flowed into Lake Michigan and to throw its waters down into the Mississippi Valley. By doing that we have taken water from where it is needed, beneficial, and handed it to a section of country where it is not wanted and where it is destructive. Now a movement is on foot to give the State of Illinois further jurisdiction over that river; to expend further millions of dollars to deepen that waterway, and to still further tap the navigable waters of the Great Lakes and take greater quantities of water from them.

What is the consequence and what is going to be the consequence? The consequence is that we are going to lower the water and to have lower levels in the Great Lakes. Having lowered the levels of the Great Lakes at great expense to the State of Illinois, we are going to spend millions of dollars to dig out the bottoms of the Lakes for harbor improvement to make up for the lowering of the water caused by the tapping of those Lakes by the Illinois River.

That is not all. Then we are going to vote millions of dollars, to be expended down in Louisiana, to build dikes, so that these waters which have been withdrawn and are destroying our navigability on the Lakes are going to overflow and destroy their property down there. Money is being spent to lower our Lakes, then money must be spent to deepen our harbors because of the lowering of the Lakes, and then money is to be spent to protect property from floods caused by the spending of money in the lowering of our Lakes. It is a waste all around to spend money to no purpose. What kind of a proposition is that? Is that good business sense? Yet those are the things that are going on all the time.

Here in a report that I have is a list of abandoned canals. Of canals, we have abandoned in this country 2,444 miles, which cost us in the neighborhood of $81,171,374; canals that we have built with public money, but which we have abandoned. What is the use of digging canals if we do not want them? But if we have to finance them, what is the use of throwing them back and giving them away? I say, what is the use of giving the State of Illinois, great though her needs may be, the possibilities of destroying the commerce on the Great Lakes by making it necessary for us to appropriate moneys to dig out our harbors and then turn around and because of what we have done, at least in part, because of the additional waters that have been thrown into the Mississippi Valley, we have to vote additional millions to put up dikes to keep those waters which have been thrown away, or which have been withdrawn from beneficial use and which turned into a destructive force, from destroying the lives and property of our citizens in the South?

Not only that, but I understand that almost all of these great waterway schemes involve revetting, which only can be defended upon the theory that it is to drain land, to reclaim land, which is something that has no part in a river and harbor bill. That is another question and another story; and they can not justify that expenditure on the ground that it is going to reclaim certain lands on the banks of the Missouri or on the banks of the Mississippi or on the banks of the Ohio. That is not a part of a proper waterway scheme. That is a reclamation scheme, not a scheme of navigation.

But, aside from that, what are we doing? We are also discharging water through those lands with greater rapidity, with the result of making greater floods down in the Mississippi Valley. The States are permitting the citizens to straighten out the streams, to reclaim the swamp lands; we are permitting them to cut down the forests, destroy the swamps, destroy the springs, all with the result that the water is being hurried down the Mississippi Valley just as fast as we can get it there. Then, when we do that, and it causes floods down in Louisiana, they want us to expend $45,000,000 to take care of those floods.

There was a time when nature took care of the floods. There is not any question in my mind that the Mississippi River Valley, or those flood areas or those parts of the river and lands adjacent thereto, were naturally subject to periodical floods; but it is going to be worse and worse, unless we find some way to correct it. It is true they can not help it down there; but they ought not to aid in doing certain things, and the people of those States ought to aid in doing certain things that are going to ameliorate and correct the condition caused by those floods.

I say nature took care of the flood proposition in early times. We had forests. Snows would fall upon the forests, and they would not thaw until along some time in May or June. We had marshes to hold the waters like sponges, which gradually released them during the summer months. We had springs that were located in these forests that let the accumulated waters out gradually. So we had an even flow of water throughout the whole year; but now every improvement, every advance in civilization which has resulted in the cutting down of our forests, the draining of our swamp lands, and the straightening of our rivers, all lead to one thing, and that is to hurry the water off of our territory just as fast as we can get it off and to put it onto the territory of those below us. We are expending money and voting money for those things. Then when the floods come, because of the very thing happening that was bound to happen, we have to go into the other pocket to make good for our errors in the first instance. So it is costing us money coming and it is costing us money going. So the thing comes right down to this point, with me, at least, that I think before we go on expending any more hundreds of millions of dollars we ought to know in advance what we are going to do, what is our objective, and at what we are driving. For instance, the voting of $45,000,000 for the purpose of building dikes or levees for flood protection amounts in the end to little if anything beneficial; that does not get us anywhere. The flood is a symptom of mismanagement in the handling of our waterways; it is a disease. It is a disease caused by a surplusage of energy which has been forced down into the rivers through our own unwise and thoughtless action. The very fact of the building of the Chicago Drainage Canal shows that we have not any well-defined ideas, because, as I have pointed out before, we are spending money to create a condition which creates the disease, and then we spend millions more to cure the disease of our own making.

So it is with the floods. They have floods down the Mississippi Valley, and it need not be a matter of surprise that those floods occur, for where else should the waters go if they could not go down the Mississippi Valley? Where do we expect those floods to go? The great volumes of water that are gathering throughout this immense territory have to find an outlet. They all head down to the same place, and, under present conditions, they can not go out in an orderly manner any more than you could cry fire in a crowded theater and expect all of the people to get out of the same door at the same time without a panic or without injury to life and limb. A flood is an absolutely inevitable consequence of the thing for which we are at least in part responsible. If we want to expend this money in this way, why not do it so as to bring important and good results at some time?

This is a matter in which I take a great deal of interest. I am not going to tire the Senate with talking about it again; but I do say that, if you want to cure the flood evil, all you have to do is to regulate the stream flow in every river and stream in that watershed, and then you will have the flood evil cured. Not only that, but then you will have permitted the waters to go out in an orderly manner and take their exit, in the way nature intended they should, to the sea, by providing an even flow of water; by making a beneficial use of something, that, unchecked, would be destructive; by providing in advance that this thing that is of such great value to us in the use of water power and irrigation and navigation be so treated as to conserve it and to save it, and by thus treating and conserving it take away a destructive power. We should make it our servant instead of our master. Then you will turn a murderous and destructive agency into something that is a factor for the upbuilding of wealth. It will be a wealth producer, and not a wealth destroyer, if you treat the question right; and, in order to treat it right, do not go down where these rivers overflow their banks and empty into the sea, but go up the streams and hold them where they belong, in a way which can be arranged absolutely and scientifically by a competent corps of engineers.

There is no question that this problem could be solved if this matter were placed in the hands of a competent body of engineers taken not only from the military, but from hydraulic and civil fields of activity—men who know their business as well as the men knew their business who constructed the Panama Canal. All you have to do is to find another colonel like the colonel who built the Panama Canal; let another Col. Goethals—or perhaps that great constructor himself—figure out some waterway scheme embracing the country from coast to coast and he will tell you just how much water has to go down through the several creeks and rivers and waterways of the country; he will tell you approximately just how many cubic feet of water have to force their way through the Mississippi River bottoms in a given time and at a certain time; and he will tell you how to check them and how to use them. He will tell you where to use them, where you should put up your dams for storage reservoirs and for water-power purposes. He will tell you how to regulate them and how to regulate their stream flow so that when your system is perfect and built from above down—from the source of the stream down—in the course of time and with a minimum expenditure of money, if the matter is wisely administered, it will take care of every problem which we have in the way of rivers and harbors and waterways construction, in the way of irrigation, in the way of navigation, and, lastly, in the way of flood control, because you will stop the floods when you harness the waters and stop the waters from running away from you. There is not any question about that. It is a matter susceptible of easy regulation and at a minimum of expenditure; and I say that, if the thing is properly administered, it will pay for itself by way of returns that can be exacted from those given privileges to use this water to enrich themselves.

I feel that the way to go would be first to settle upon a plan and then to go ahead only with those things which are absolutely necessary, which we do not want to abandon, and which we can not abandon at this time. When the plan has been evolved by a corps of engineers, by men who know their business, it should be adopted and prosecuted to a conclusion. We legislators can not expect to know, and do not know, how this can be done, except in a general way; but if it can be shown—and I am sure it can be shown as a matter of scientific demonstration—to be practicable, to be profitable and beneficial, by men who are making a study of this subject, then we can go ahead and spend our money in a wise way.

Suppose we had now $850,000,000 to set out on a big, broad, comprehensive scheme to take care of our waterways and our harbors, we would at the time of completion of the whole system have money in the Treasury, besides having a completed waterway system. It is not a matter which can be built in a day or a year or, perhaps, in a score of years; but in the course of time we could have a system every angle and every element of which would be doing good and helping the country at large. All we have to do is to do it, in my humble judgment, by eliminating the present system and adopting a wise and proper plan.

My friend from Missouri a few minutes ago talked about building a house. I wonder what kind of houses we would have in this country if a lot of carpenters and masons set to work to build houses, without knowing what kind they were going to build and without a plan. We would have a fine hodge-podge proposition all over the country if we started to do that. I wonder what kind of railroads we would have in this country if every railroad went to work without consulting engineers, and started up in a haphazard hodge-podge way to build railroads all over the country, a mile here and a mile there. We have an illustration of that in the good-roads proposition, that ought to be corrected. In my State every county is building its own highways, and every town is determining where the road should be built for the money that comes to their town. In the course of time, if the money is expended, we will get something out of it, but anybody must know that, if a plan were arranged in advance, scientifically arranged in an orderly manner, with brains back of it and intelligence back of it, we would get $5 for $1 which we are expending now; and why should we not go ahead and do it?

It lies within our power here to do just as we want to do if we can get a majority to agree; and when a thing seems so perfectly obvious as this would appear to be, why not proceed in that way and conduct this kind of business in a proper manner?

I say we ought to stop, except as to those improvements which are absolutely necessary, and then we ought to look about and see what we can do in the way of getting some big, broad, comprehensive scheme to take care of all these questions either by way of a bureau or a department or perhaps through the instrumentalities which we have already established; but in some way that is dependent upon good reasons, scientific reasons, and not in part or in whole dependent upon this system, that "I will give you this if you will give me that," or "I will do this if you will do that," or "we will build this if you will build that"; not dependent upon anything that in particular benefits the whole country, but possibly benefiting only a few sections, where the representative people perhaps are zealous and want to get it for their appropriation; want to get an appropriation as a warrior of old wanted to get a scalp so he could wear it in his belt and boast about it.

We have our problems in Wisconsin, as I said at the outset. We would like to have our harbors improved as well as anybody else, but if there is any one of them which we can not show to Congress is important and worthy of the money being spent upon it I am not going to defend it, and I do not want to see it adopted. Neither do I want to see anything passed

that is going to put money into any other State unless it appears that not only the purpose of it, but the effect of it, is to give benefits to the country at large, or at least to a great portion of our inhabitants, commensurate with the moneys expended.

I feel as though this bill ought to be recommitted with instructions to the committee to report a bill out for what has heretofore been thought sufficient, namely, $20,000,000, for the purpose of carrying on such projects as seem to be proper and most necessary. I have tried to show that even the best of these projects, so far as the appropriations relating to streams are concerned, do not appear to have brought in returns such as we have a right to expect and ought to expect from the investment of governmental funds. Yet there may be such; but I think enough has been shown, and it appears sufficiently clear from the facts adduced here, that Congress ought not to appropriate $43,000,000 for things which at least, appear dubious and not deserving, and many of which are practically without merit. When so recommitted, meritorious provisions may be brought forward and taken care of pending some sort of united action on the part of Congress to go at this matter in a scientific way. I think that if that is done something could be worked out here in the next two years. The present system has gone on for over a century in the old way; another year or two will not make so much difference; but the policy ought to be changed at once, and we ought to go at this thing in a different and, if I may be pardoned for saying so, in a more comprehensive way, with some idea of what it is going to lead to and where it is going to land us.

At the outset I made a statement that I was not here to oppose any of the particular projects; that I was here to try to discuss the system. This is not a system that ought to make Americans feel proud of their country or of their efficiency. I do not think a system of that kind is good enough for the United States; I do not think it reflects credit on the United States or makes anybody feel proud of it. I venture to say that the people of the United States, so far as I have any idea of their sentiment, favor a complete change of this system. It has been shown that our people are not afraid to appropriate money for some worthy cause, even though it costs a great deal. Not a grumble has been heard about the digging of the Panama Canal, and not a word of complaint has been heard about the additional expense occasioned by reason of certain cavings or slides, and that we have not yet got, because of that fact, the canal into its highest state of efficiency; but they have all backed the idea, without grumbling or without talking about the cost; they have all indorsed the idea of the Panama Canal, and they will indorse any kind of a proposition, no matter how much money it costs, if the ordinary man can be shown that for the dollar he has to produce from his pocket he is getting a dollar's worth of benefit somewhere in some way. He wants to feel that his affairs are being administered in a way that is going to bring benefit to the country and that it is not being thrown away or wasted.

When matters are discussed here about economy, we do not talk just the same as we do when we are talking about this question of raising the taxes from somebody.

I remember here when the water-power bills were up there was a proposition of raising some little revenue from the water-power privileges; but it was said "We will not need that money; the Nation does not want to exact tribute from its people." That is all very good, but you have to get your money somewhere, and if you do not get it from the fellow who is getting benefits from you you have to get it from the fellow who is not getting any benefits from you. If you are not going to tax the man who is being given special privileges, then you have to tax the man who is not being given special privileges. The Lord knows that a lot of men in this country when tax-paying time comes around are hard-set to get the money to pay their taxes; but after all they are good Americans, and the least grumbling comes from those who are least able to bear the tax. However, the average man likes to see at least one thing, and that is to see his money wisely expended. He would like to see the country of which he is a citizen administer his affairs for his benefit and the benefit of his fellow citizens, and even if the taxes are high, and even if he thinks sometimes that there is injustice he does not care really if he knows that back of the dollar he has had to contribute and which is being spent some good scheme is being pressed forward which is going to bring material returns in the way of benefits to all of the citizens of the country. That is what he would like to see in the expenditure of money on rivers and harbors. If you are going to tax him and going to take his money away from him he does not want you to toss it away on unworthy projects. He wants you and me and all of us to see that the money he has earned by the sweat of his brow is invested in a way that is going to benefit him and his fellow citizens.

I do not honestly think that he will feel that the method under which $850,000,000 of this money has been expended has been one that he can sanction or approve. He will never propose three cheers and wax enthusiastic over this proposition. I do not think that any Senator in this Chamber deep down in his heart thinks so himself. I have never heard anybody boast about the blessings secured from this expenditure. I have only heard them on the defensive, explaining, if not apologizing for, what has been done. I have never heard them parading around before the voters in campaigns the benefits and blessings which we have derived from river and harbor appropriations. One thing upon which all parties are agreed is that the least said about it the better. That is a fair test whether we ourselves think it is a good thing. We like to talk about the things that we think are beneficial, and the things that are not beneficial which we have no reason to be proud of we like to forget.

Applying that test or any other test, it seems to me that the expenditure of this money in this way any longer is beyond judgment or excuse, and therefore I move that the bill be recommitted to the committee with instructions to bring out a bill appropriating a sum not exceeding $20,000,000.

Mr. TOWNSEND. Mr. President, will the Senator allow me?

Mr. HUSTING. I yield the floor.

Mr. TOWNSEND. I wanted to ask the Senator if he did not think it would be better to withhold his motion to recommit until the efforts to perfect the bill have been completed? There are many Senators who feel somewhat as does the Senator from Wisconsin, but who are, however, very much in favor of a proper river and harbor bill, who believe that there are many items in this bill which should be passed; and who, if the bill could not be changed, would be inclined to vote with the Senator, but who would not do that at this time. I was wondering if his purpose would not be served as well by withholding his motion to recommit until the efforts to perfect this bill have been completed.

Mr. HUSTING. I will say to the Senator——

Mr. TOWNSEND. I take it that what the Senator wants is to have the bill recommitted. He certainly must recognize the fact that there will be a better opportunity to recommit it if it can not be amended so as to suit the ideas of Senators of what a proper bill should be than there is now, before all efforts to amend the bill have been exhausted.

Mr. HUSTING. I will say to the Senator that, of course, it is my hope and purpose that the bill may be recommitted. I am sure I do not know whether this is a proper time or not, but I am willing to adopt the Senator's suggestion.

Mr. TOWNSEND. I am going to vote for the Senator's suggestion if the present bill is not materially amended, and I know that there are several other Senators who feel as I do. I do not care to interfere with the Senator's plan as to what he wishes, but it seems to me that in behalf of an effort to get the best bill possible it might be better to withhold his motion until later along in the consideration of the bill.

Mr. HUSTING. I will take the Senator's suggestion and will be glad to withhold the motion to recommit the bill until some time further on.

Mr. CLARKE of Arkansas. Mr. President, I ask that that motion be reduced to writing.

Mr. HUSTING. I thought I had it here, but I have not been able to find it.

Mr. KENYON. Mr. President, I now move to strike from the bill, on page 23, lines 21, 22, and 23.

Mr. CLARKE of Arkansas. What item is that?

Mr. KENYON. That is the Brazos River item. I think the Senator from Texas will be here in a moment.

Mr. CLARKE of Arkansas. I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Harding	Nelson	Smith, Md.
Bankhead	Hardwick	Newlands	Smith, Mich.
Brady	Hitchcock	Norris	Smoot
Brandegee	Hollis	O'Gorman	Sterling
Broussard	Hughes	Oliver	Stone
Catron	Husting	Owen	Sutherland
Chamberlain	Johnson, S. Dak.	Pittman	Taggart
Clapp	Jones	Poindexter	Thomas
Clark, Wyo.	Kenyon	Pomerene	Thompson
Clarke, Ark.	Kern	Ransdell	Tillman
Culberson	Lane	Reed	Townsend
Cummins	Lea, Tenn.	Shafroth	Underwood
Dillingham	Lewis	Sheppard	Vardaman
du Pont	Lippitt	Sherman	Wadsworth
Fall	Lodge	Simmons	
Fletcher	Martine, N. J.	Smith, Ariz.	
Gallinger	Myers	Smith, Ga.	

The VICE PRESIDENT. Sixty-five Senators have answered to the roll call. There is a quorum present.

Mr. KENYON. Mr. President, I wish to say a word about this amendment before it is voted on, if I can have the attention of the Senate. The amendment is to strike out on page 23 the words:

Continuing improvement from Old Washington to Waco by the construction of locks and dams heretofore authorized, $200,000.

We voted yesterday for a survey of the Brazos River. The bill carries another survey. At a former session of Congress we voted for a resurvey and a reexamination of this project, the report of which has never been as yet presented to Congress. We are now called upon to vote $200,000 on this Brazos proposition before the report of the engineers is received here and considered.

I wish to call attention to this proposition in a general way. We have appropriated somewhere around two and a half million dollars on the Brazos. There is no commerce that can be called commerce on the stream. The cost to the mouth is something like $10,000,000. Two hundred thousand dollars was allotted under the act of 1914 and there was $200,000 in the allotment of 1915.

The Brazos project is divided into two parts, from Velasco to Old Washington and from Old Washington to Waco. The former project carries in the bill for open-channel work $15,000. I think probably there will be no objection made to that item. The commercial statistics as to that part of the stream should be very interesting.

On page 913 of volume 1 of the Engineer's Report for 1915 we find this interesting proposition:

Commercial statistics: No record of commerce could be obtained for 1914. The record for 1913 shows 1,080 short tons, valued at $81,000. No record of commerce had been obtained for 1912. One boat makes weekly trips from Galveston to Columbia, but no record could be obtained.

We have spent on that part something like $399,000. Then, on the part where the locks and dams are to be constructed we appropriated up to the end of the last fiscal year $993,689.34. There was allotted under the act of 1914, $200,000, and under the act of 1915 the allotment for the Army engineers was $200,000, making a total of $1,393,689.

That is the proposition that the last Congress decided should be resurveyed and reexamined, and that report has not as yet come to Congress. Is it not a fairly reasonable proposition now to wait until that report gets here?

Mr. NEWLANDS. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Nevada?

Mr. KENYON. I yield.

Mr. NEWLANDS. Are we to understand that an appropriation is made in this bill for a project with reference to which a resurvey and a report and investigation have been ordered by Congress?

Mr. KENYON. Yes; and no report has yet been made. That need not shock the Senator.

Mr. NEWLANDS. On what theory, after Congress has determined that a matter shall be resurveyed and a reinvestigation made, is an actual appropriation made in this bill?

Mr. KENYON. If the Senator will explain to me the theory under which we have been voting propositions into this bill where reexaminations have been ordered and where the engineers had reported against the proposition, I might be able to explain this to him.

Mr. NEWLANDS. With reference to what proposition does the Senator speak?

Mr. KENYON. Arcadia, Mich., and the Arkansas River.

Mr. SMOOT. I wish to say that the following projects are included:

Inland waterway from Norfolk to Beaufort Inlet, N. C.
Coosa River, Ga. and Ala.
St. Lucia Inlet, Fla.
Brazos River, Tex., from Old Washington to Waco.
Red River, La., Ark., Tex., and Okla.
Ouachita River, Ark. and Okla.
Arkansas River, Ark.
Tennessee River, Tenn., Ala., and Ky.
Fox River, Wis.
Missouri River, Mo.

And there are a number of others.

Mr. FLETCHER. May I ask the Senator from Utah——

Mr. KENYON. This project is to consist of eight locks and dams.

Mr. FLETCHER. I understood the Senator from Utah to refer to some river in Florida.

Mr. SMOOT. I did—St. Lucia Inlet, Fla. The engineers were instructed in the act of March, 1915, to make a resurvey of that inlet. I will say to the Senator——

Mr. FLETCHER. No; the appropriation was made and the Board of Engineers approved it. That is the work going on now. The resurvey proposition has not yet come up because it has not been acted upon by Congress, but the improvement of the river is based on the favorable report of the district engineer, the Board of Engineers for Rivers and Harbors, and the Chief of Engineers.

Mr. SMOOT. In the act of March 4, 1915, section 15, it appears——

Mr. FLETCHER. That report has not yet been presented to Congress.

Mr. SMOOT. That is exactly what the Senator from Iowa says.

Mr. FLETCHER. That report does not exclude the improvement. It contemplates a more ambitious improvement of the project than ever before.

Mr. KENYON. They are all ambitious.

Mr. SMOOT. They are all that way. I am not disputing that at all. That is why the resurveys are made.

Mr. FLETCHER. The appropriation, the Senator will see, is not based on that. Nobody is asking that the action of Congress shall be based on that report, because it has not been made.

Mr. SMOOT. But the appropriations go right on.

Mr. FLETCHER. Where does the Senator see that in the bill?

Mr. SMOOT. I simply stated in answer to the question asked of the Senator from Iowa, the rivers included in the request made of the engineers for resurveys, and among them was the St. Lucia Inlet, Fla. That is what I meant.

Mr. FLETCHER. The inquiry was directed as to projects in this bill that did not meet the approval of the Board of Engineers. There is no provision in the bill for St. Lucia Inlet at all.

Mr. SMOOT. Does the Senator say that St. Lucia Inlet, Fla., is not a questionable project?

Mr. FLETCHER. I say there is no provision in this bill, and we will deal with that when we get to it. We are talking about a concrete proposition before the Senate, and St. Lucia Inlet is not in the bill. It makes no difference whether it is a meritorious project or not, we are not passing upon it.

Mr. KENYON. I think the Senator from Utah is out of order in claiming that there is any project that is questionable in the bill.

Mr. FLETCHER. Why not be reasonable about it? What is the use of discussing something that is not in the bill? We are talking about the bill that is before the Senate. There is no use in saying that the bill contains items that are unworthy, that have not been favored by the engineers at all, and then point to the St. Lucia Inlet as one of the items when it is not in the bill at all. That is the kind of argument we have been hearing all the way through this discussion.

Mr. NEWLANDS. Mr. President——

Mr. KENYON. I yield to the Senator from Nevada.

Mr. NEWLANDS. May I inquire from the Senator from Iowa whether the St. Lucia Inlet, Fla., referred to, is a project for which appropriations have heretofore been made?

Mr. KENYON. I think there is no question of that.

Mr. NEWLANDS. Then I should like to ask the chairman of the committee if continuing appropriations on the St. Lucia Inlet, Fla., should for the time being be abandoned in order to await the report upon the reexamination authorized by the last river and harbor act, why the same course has not been pursued with reference to all the items and all the projects with reference to which reexaminations were ordered? If the order of Congress that a reexamination should take place with reference to the Florida project has been made so effective as to exclude that project from the present appropriations, why should not the same rule be applied with reference to all other projects that were ordered to be reexamined by Congress, and why should the committee report to us appropriations upon such projects which were ordered to be reexamined?

Mr. CLARKE of Arkansas. Mr. President, will the Senator from Iowa yield to me for just a moment?

Mr. KENYON. Certainly.

Mr. CLARKE of Arkansas. I am not entirely familiar with the history of the St. Lucia Inlet provision, but my recollection is that there has been no appropriation made to begin work there for the reason that the last two or three river and harbor bills failed. The pending bill was largely made up in the House of Representatives. Such items as were eligible to admission there under the theory of being old projects were included in it there. We did not go over the whole field to determine whether or not something that ought to be in the bill was left out, because we had before us projects amounting to about $125,000,000, and we were compelled to select as between many meritorious proj-

ects in order to bring the bill within the limits of the possibility of the Government to provide for them. The Senator from Florida is more familiar with the situation at St. Lucia Inlet, and I am sure if the Senator from Iowa will permit him he will gladly state the position there.

Mr. KENYON. St. Lucia Inlet is not in this bill. I think we had better, perhaps, take up something that is in the bill.

Mr. SMOOT. I notice also that the Chief of Engineers reports that on July 1, 1914, there was an unexpended balance of $99,927.08; that June 30, 1916, the amount expended during the fiscal year for the work of improvement was $13.05; and that on July 1, 1915, there was an unexpended balance of $99,414.03. That is the history of the financial summary as given by the Chief of Engineers in relation to St. Lucia Inlet, Fla.

Mr. FLETCHER. There was a project adopted for St. Lucia Inlet by Congress on the favorable report of the district engineer and the favorable report of the Board of Engineers and the Chief of Engineers, and an appropriation of $100,000 was made to begin that work. That was in 1913. The engineers were under the impression that a dredge could be built that would excavate the rock at the entrance without blasting. They thought that such a dredge could be brought from Panama, and there was some effort to do that. Gen. Goethals was on the stand, and testified before the Commerce Committee that there was a dredge at Panama which could take out this rock, which is not very hard rock. It is a coral formation under water and is hardened upon exposure. The engineers supposed that could be done, and for a long while they expected that they would get the dredge from Panama. But there were subsequent troubles, as Senators know, down there, and the material at Panama was needed there, so the dredge was not forthcoming.

That is the reason why, as the Senator has suggested, only some $13 was spent of that money for a period of time covering one year. That was spent in calling for bids for the work. The bids were rejected because they were regarded as too high. The Government engineers thought they could do the work cheaper than they could get it done by contract, and they rejected the bids. Nothing was done, and so time has gone on, and no part of the appropriation has been used.

As the present contracts have been let, the work is going on, or will shortly be begun. Contracts have been entered into. When the Government found they could not get the dredge which they supposed they could use they made a contract at a figure which they believe is reasonable, much less than the former figures were. The contract is, as I said, actually closed, and the contractors are soon to begin work, if they have not already begun work within the last few days.

So there was no need for any reconsideration of the St. Lucia project, because there is enough money on hand to accomplish what had been authorized by Congress.

Mr. NEWLANDS. Mr. President——

The VICE PRESIDENT. Does the Senator from Iowa yield to the Senator from Nevada?

Mr. KENYON. I do, if he will get through in a moment or two.

Mr. NEWLANDS. I merely wish to ask the Senator from Florida whether the contract for the St. Lucia Inlet has been let since the time when Congress ordered a reexamination of the project?

Mr. FLETCHER. I think it has.

Mr. NEWLANDS. March 4, 1915.

Mr. FLETCHER. They were authorized to go on under the original act and do that work.

Mr. NEWLANDS. Does not the Senator assume that Congress intended, with reference to the projects that were intended to be reexamined, that no such important step should be taken in the work as letting a contract until the report upon the reexamination was submitted to Congress?

Mr. FLETCHER. The engineers had full power and authority to proceed with the project, which had been approved by Congress. A reexamination might lead to the enlargement of the project or a change of the project to some extent.

Mr. NEWLANDS. Or perhaps to an abandonment?

Mr. FLETCHER. No; it could not possibly lead to an abandonment. I think nobody suggests that. There is need of that improvement there, and the question is as to the extent of it.

Mr. NEWLANDS. The act itself says "with a view to their abandonment."

Mr. FLETCHER. It has never been recommended that it be abandoned by any board or any engineer.

Mr. KENYON. I will say to the Senator from Nevada, he will also find that a resurvey was ordered for Trinity River some years ago. It is going on now. The bill carries $250,000 for Trinity River. The Senator will also find that the engineers just a few days ago reported against the James River proposition, that has been running for some 20 years, and is destined to run, probably, for all eternity. They reported against that just a few days ago. The bill carries $190,000 for the James River.

But I want to get back to the Brazos. It is set forth on page 914 of the Engineers' Report that this project has not been adopted as a whole by Congress. We have gone along appropriating for different locks and dams in a scheme that requires eight locks and dams and 103 miles of open channel work, at an estimated cost of $2,915,000. It seems strange that Congress should go ahead year by year and appropriate these large sums of money while the project as a whole, according to the Army engineers, has never been adopted.

I am not quite certain from these reports whether any of the locks and dams have been completed. They state on the same page that Lock No. 1 has been brought to 98 per cent of completion, and that Lock No. 8 was 75 per cent completed. A total of $853,052.11 has been expended, of which $441,564.63 was expended at Lock No. 1. Here is the statement about the commerce:

> Commercial statistics: No freight is now carried on this section of the river, nor can be economically until the improvement is completed.

Of course the answer to that is, as it is to all these other projects, you can not have your commerce until the project is completed; but what I am insisting on is that a project of this character, involving millions, where Congress has ordered a resurvey and a reexamination, ought not to have another dollar appropriated until we get the result of that examination.

Mr. NEWLANDS. I should like to ask the Senator how many projects which have been ordered to be reexamined by Congress are included within the appropriations made by this bill?

Mr. KENYON. I can not tell the Senator exactly. I think I am safe in saying that there are seven or eight. If the Senator had lent his genial presence to us yesterday and the day before he would have known that the Senate has voted in the bill projects that were condemned by the Army engineers under a reexamination ordered by Congress. While we can not do anything here, I hope that somewhere inquiries are going to be made of the Senators who have voted those things as to why it was done. Of course, the Senator knows we have had practically no attendance here, and there has been no attention given to the discussion of this bill. Senators rush in from the cloakrooms when the yeas and nays are taken and ask "What is the committee amendment?" or "What is it that we are to vote on?" I suppose that always will be true, but it has been especially true in the consideration of this bill. I kept an account one day when we were discussing the East River project, New York, of the attendance. At 25 minutes after 1 there were 7 Republicans in the Chamber and 12 Democrats. At 45 minutes after 1 there were 11 Republicans and 12 Democrats. The Democrats seem to have done better than the Republicans.

Mr. GALLINGER. There are more of them.

Mr. KENYON. At 5 minutes after 2 there were 11 Republicans and 14 Democrats in the Chamber. At 25 minutes after 2 there were 11 Republicans and 12 Democrats. At 45 minutes after 2 there were 14 Republicans and 10 Democrats, the only time when the Republicans had more here than the Democrats.

Mr. BORAH. May I ask the Senator whether it was the same 11 who were here or was that the average?

Mr. KENYON. I think perhaps some went to lunch; I do not know where the others went. It simply illustrates the kind of consideration that has been given to this bill.

Mr. CLARKE of Arkansas. The Senator will bear witness to the fact that I have been here all the time.

Mr. KENYON. The Senator from Arkansas has been here every moment.

Mr. President, I think I have said all I want to say about the Brazos River. If the Senate wants to vote these kind of matters into the bill, of course that is its privilege.

Mr. THOMAS. Before the Senator takes his seat I should like to ask him a question. The Senator said, if I understood him correctly, that the bill carries an item for James River, Va., for a project which has been condemned by the Army engineers. Does the Senator refer to the item at the top of page 12?—

> James River, Va.: Continuing improvement and for maintenance, $190,000.

Mr. KENYON. I referred to that item. I want to qualify what I said in this way: The project calls for many millions of dollars. It is a project, I think, for a 22-foot depth. The Army engineers report against that. I have here the advance sheets of their report.

Mr. THOMAS. When was that report made?

Mr. KENYON. That report was made the 13th day of May.

Mr. THOMAS. Since this bill came over from the House?

Mr. KENYON. Since we have been discussing it. They report in favor of an 18-foot depth to the river and a turning basin at Richmond to cost $450,000, and recommend that that appropriation be divided into two parts, that they be made two annual appropriations; $190,000 is provided for here and $190,000 is appropriated on the theory of the old plan.

Mr. THOMAS. With the abandonment of the old project?

Mr. KENYON. The modification.

Mr. THOMAS. A modified project?

Mr. KENYON. A modification of the project from 22 feet to 18 feet. The district officer says it can be completed for $2,588,636.79. They have there an 18-foot channel and they recommend abandoning that project in favor of simply constructing a turning basin to cost $450,000 and maintaining the river at 18 feet. I think we will hear more about that river before we are through with the bill.

Mr. THOMAS. Then I will content myself by waiting until the subject comes directly before the Senate.

Mr. KENYON. I shall not raise any more question about it, but I imagine the Senators from Virginia will.

Mr. THOMAS. Let me ask one other question, then. Assuming that the bill passes in its present form and the $190,000 appropriation becomes effective and is expended upon the prevailing project, what effect will that have upon the recommendations last made by the Board of Engineers?

Mr. KENYON. I assume it will be that much money wasted, because it goes on the old project and will not be used for what the engineers recommend.

Mr. THOMAS. So, notwithstanding the present recommendation, if this item becomes a law it will be expended upon the existing project, and then we will have to spend just as much more upon the new project as though this appropriation had failed?

Mr. KENYON. Unless the bill is changed and the $190,000 provided for is to be used for the turning basin.

Mr. POMERENE. May I ask the Senator a question?

Mr. KENYON. I yield.

Mr. POMERENE. A moment ago the Senator from Iowa said there were seven or eight projects provided for in the bill on which resurveys had been ordered. Can the Senator state what would be the cost of those projects which are provided for in the bill?

Mr. KENYON. Does the Senator mean the amount of money that is carried in the bill for those projects?

Mr. POMERENE. The amount of money that is carried in the bill for those seven or eight projects.

Mr. KENYON. No; I can not. There is $250,000 carried for the Trinity; $200,000 for the Brazos; $25,000 for Arcadia.

Mr. SMOOT. How much for the Missouri?

Mr. KENYON. The Missouri was condemned by only two of the engineers. There is a million and a half carried for the Missouri which is condemned by the district engineer and the division engineer but not by the Board of Engineers. Then there is the Arkansas River.

Mr. POMERENE. What is the amount for the Missouri?

Mr. KENYON. A million and a half. For the Arkansas River I think the appropriation is $234,000.

Mr. SHEPPARD. If the Senator from Ohio will allow me, I will say to the Senator from Iowa——

Mr. POMERENE. I will be very glad to allow the Senator.

Mr. SHEPPARD. No resurvey of the Trinity River was ordered in the last river and harbor act, and the instrumental survey now in progress on the Trinity was not ordered with a view to determine whether the project should be retained or abandoned, but in order to determine exactly how many locks and dams would be required under the existing project.

Mr. KENYON. Does the Senator say that under the last act or the previous act there was not a resurvey or reexamination of the Brazos ordered?

Mr. SHEPPARD. I am referring to the Trinity.

Mr. KENYON. Oh.

Mr. SHEPPARD. The Senator said a resurvey had been ordered of the Trinity to determine whether the project should be retained or abandoned.

Mr. KENYON. I did not say, however, that a resurvey had been ordered of the Trinity in the last act. I knew that that was not so. It was ordered some years ago and a survey is now in progress of the Trinity. Is not that true?

Mr. SHEPPARD. But it is an instrumental survey to determine the exact number of locks and dams necessary for the project. This resurvey was not ordered for the purpose of determining whether the project should be continued or discontinued.

Mr. KENYON. The Senator may be correct; I do not know. He knows more about the Trinity than I do.

Mr. POMERENE. The Senator from Iowa also made the further statement that there are other projects provided in the bill which have been rejected by the Board of Engineers. Can the Senator state what would be the cost of those items?

Mr. KENYON. As to the Arkansas River, to which the Senate added another $25,000, I can give the Senator the exact figures. The amount is $234,700, where the engineers recommended $35,000. Then there is the Wichita, on which I expect to show a little later the Army engineers recommended $234,000 and the bill carries $470,000. That is one of the projects resurveyed. The Arcadia, which is the proposition of the distinguished senior Senator from Michigan [Mr. SMITH], carries $25,000, a small amount. That was condemned by the Army engineers and it is placed in the bill by a committee amendment.

Mr. President, that is all I care to say about the Brazos River.

Mr. NEWLANDS. Mr. President, this discussion simply illustrates how hopeless the present system of conducting river development is. We find it universally admitted that although the United States Government has been employed for over a hundred years in working upon our rivers river commerce has steadily declined; that on the whole the rivers are not so well adapted to navigation as they once were.

Now, where does the fault lie? Does it lie with the Board of Engineers who are charged with the work of developing these rivers? Does it lie with Congress, or does it lie with and is it inherent in the general system, or rather no system, that exists for comprehensive river development? Has Congress been at fault? What general legislation has it ever adopted with a view to the complete regulation of our rivers as instrumentalities of commerce? Have we ever proposed or adopted with reference to river development and regulation such a full and comprehensive measure as we adopted for the commencement and the completion of the Panama Canal? Have we ever proposed or adopted such a full and complete system of legislation as we adopted with reference to irrigation and reclamation of arid lands in 17 States?

Have the engineers been incompetent or has Congress been incompetent? The engineers demonstrated their competency in the completion of the Panama Canal, costing over $400,000,000. The engineers have demonstrated their capacity in 23 irrigation projects in 17 States, costing nearly $80,000,000, and embracing problems in engineering and in hydraulics far surpassing in difficulty those attendant upon the building of the Panama Canal. Almost all of those projects have been completed within a period of 12 years.

Here we have, then, a competent Engineer Corps of the Army, their competency demonstrated at Panama, and a competent corps of civil engineers in the Reclamation Service whose competency has been demonstrated in 23 projects either finished or nearing completion within a period of 12 years.

Mr. SMITH of Arizona. I do not wish to interrupt the Senator, but I should like to suggest a word rather than to be foreclosed by the statement the Senator just made in reference to some matters that may subsequently arise as to irrigation projects. I shall say no more to the Senator than that, while the greatest possible intelligence has been shown by the engineers, some very grave mistakes have been made by them. Rather than to let it go as an absolute piece of certainty without a reservation in the RECORD, I wish to accompany the Senator's remarks with the statement that there have been grave mistakes made, and they naturally would be made in any enterprise as large as that.

Mr. NEWLANDS. Yes, Mr. President, mistakes have been made, and mistakes always are made in great works. A mistake was made in the original estimate of the cost of the Panama Canal. It was estimated at $150,000,000, the actual completion costing more than $400,000,000. Mistakes were made in the estimates regarding the irrigation works; estimates largely increased by the unprecedented rise within the period of 10 years of the cost of labor and of supplies. But the fact remains that these great monumental works have been undertaken and have been completed within a period of 12 years. So I say the fault does not lie with the engineers. Where does it lie?

Oh, you may say commerce has declined upon these rivers because the railroads have taken the place of the rivers as instrumentalities of commerce. Yes, they have taken the place, but how has that place been taken? By the cruel and brutal competition of the rail carriers with the water carriers, which resulted in the destruction of the latter, and Congress has been impotent to stay the ruthless hand of the rail carriers.

Is river regulation and river navigation a failure elsewhere in the civilized world? Is not river transportation employed side by side with rail transportation in every civilized country

in the world that has rivers? Can you point me to one that has not fully developed its rivers or is not now engaged in the work of developing its rivers? Their work is not to reclaim swamp lands but to promote commerce.

We have Germany, we have France, we have Austria, we have Russia, all of which countries either have developed or are in the work of developing their rivers to their full capacity for transportation, even going to the extreme of connecting those rivers at their headwaters and at other places with each other in such a way that they have a perfect network of waterways, consisting of natural and artificial waterways, just as complete a network as the railways themselves. There it is well understood that the rivers are to be used for cheap and bulky products, far exceeding in tonnage the valuable products, and whose cheap transportation is absolutely essential to cheap living among the people and to cheap production and manufacture everywhere.

In this country the railroads, eager to absorb the entire tonnage, have upon these products received rates that are hardly compensatory, because the products will not stand high rates of transportation, and we are constantly increasing the capitalization of the railways of the country to meet the demand of bulky transportation, which could be much more economically made by the cheaper development of our rivers for transportation. But in all those foreign and highly civilized countries we find the water carrier coordinating with the rail carrier and not sandbagged by the rail carrier, and both of them coordinating with the ocean carriers in the development of a scientific system of transportation. If the development of our rivers has failed, why has it failed? Because our engineers are incompetent? No; because Congress has been incompetent.

Mr. SHERMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Nevada yield to the Senator from Illinois?

Mr. NEWLANDS. Certainly.

Mr. SHERMAN. Will the Senator, for my information, name a single inland waterway in the United States that carries any commerce of any consequence at this time?

Mr. NEWLANDS. I do not know of any except perhaps the Ohio; and this reduction of water-borne commerce has been the result of the system which has been pursued by Congress. What has that system been? The system of individual initiative by Members of Congress, under which an individual Senator or an individual Representative presents a measure that relates to his particular locality, and which has the virtue perhaps of aiding commerce in some degree, but in a very large degree of expending money in the locality from which the Representative hails.

Mr. SHERMAN. Mr. President——

The VICE PRESIDENT. Does the Senator from Nevada yield further to the Senator from Illinois?

Mr. NEWLANDS. Certainly.

Mr. SHERMAN. May I inquire, then, whether this whole river and harbor bill is not in fact what Hancock said the tariff was, a local issue?

Mr. NEWLANDS. Well, it looks so; and we find Members of the House and of the Senate seeking positions upon committees having jurisdiction of this subject, not so much with a view of building up a great comprehensive, useful system, which will embrace the development of the commerce of the country, but with a view to the benefit of a particular section or locality which they represent; and then the temptation is presented of a union of support in favor of individual projects, otherwise indefensible, with a view of carrying them all through in the pending bill.

And how was this system further strengthened? The engineers were useful, it is true. Upon them Congress relied for the ultimate work. But instead of giving the engineers a free hand and enabling them to report their suggestions with reference to full and comprehensive legislation upon this subject Congress in its very river and harbor bills put shackles upon its engineers, put them in chains, and forbade them to make a suggestion beyond the proposal made to them by the initiative of an individual Congressman, approved by Congress. You will find in two or three cases in the legislation of Congress, as it progressed, an absolute instruction and a veto upon the action of the engineers with reference to any suggestion beyond the matter in hand. The engineers have never yet been called upon to present a full and comprehensive scheme for the development of our rivers as instrumentalities of commerce.

I do not know how many hundred millions have been spent, and yet commerce has declined; and what remedy is now proposed by the action of the House of Representatives? The organization of a Committee on Flood Control; not the organization of a committee to create navigable rivers, not the organization of a committee to promote commerce, but to control floods; and those floods, according to its action, are to be controlled only upon the lower reaches of the Mississippi River. They invite the waters in this vast watershed, embracing one-half of the United States, to flow down to them without embarrassment or obstruction. They say to us, "Hurry them on; drain your lands; reclaim your swamp lands; let all the waters hurry down to the lower Mississippi River, and then we will take care of them." And how do they propose to take care of them?

By building levees mountain high on either side of the Mississippi River in order to prevent the overflow. And when we suggest that a policy may be pursued in the upper reaches of these rivers, in the great intermountain region which is the source of many rivers, in the Great Lakes region, in the great regions of the Ohio and the Tennessee and the Cumberland and the upper Mississippi, that developments may be made there by which the flow of the water may be so obstructed as to prolong the length of the high-water season below, so that its flood height will be only one-half of the accustomed height, we are told that we are visionary; that nothing should be done in the way of obstructing or slowing up the progress of these waters; that nothing should be done in the shape of turning these waters into a national asset, into creators of wealth; but we should permit them to mass together for destruction below; and then a cry of distress comes up from our southern friends: "The waters coming from your region are destroying us. Give us $6,000,000 a year with which to put up mountains on each side of this great river to prevent these waters from overflowing our lands and from destroying our cities." And when we tell them that there are four departments of the Government that are engaged in the great work of water conservation and water study—the Department of Commerce, the Department of the Interior, and the Department of Agriculture, in addition to the Department of War—and that each one of these departments has two or three scientific services that are engaged not only in studies, in scientific research with reference to this matter, but in actual engineering work, and that these departments ought to be brought into coordination with the War Department in plans and in works, the reply is made to us: "No; we prefer that this entire work shall remain as it has been, in the hands of but one of these departments—the War Department—and that the engineers of the Army shall alone attend to this work," without the aid of the accumulated experience and knowledge of these scientific services, many of which for over 50 years have been serving their country faithfully and well, not only in the matter of research but in the matter of actual engineering work.

I have no words of criticism for the Engineer Corps of the Army. There is nothing that can be said in commendation of the integrity of that corps which I would not indorse; but I have the same words of commendation with reference to the integrity and the efficiency of the engineering corps of the Reclamation Service, composed of civil engineers. I assert without fear of contradiction that that engineer corps has solved more difficult problems with reference to hydraulics than have ever been considered by the Engineer Corps of the Army; and yet our southern friends say that these men shall not be brought into collaboration; that you will drain the whole Union for money with which to take care of the floods in the southern reaches of this river, and you will not apply a dollar to the obstruction of these waters on their way to the lower flood reaches of the river and the application of these waters to beneficial purposes, such as making the arid lands blossom, such as the creation of water power, the development of electrical energy—entering more vitally into the lives of our people than any other agency, advancing their comfort and their convenience and diminishing their physical effort—the restoration of our forests, where vast masses of trees will drink up this moisture which otherwise would go into the streams and rivers, and develop it into fiber useful to man; and, above all, or equally with these other uses, involving the scientific control of water in such a way as to promote the reclamation and use of swamp lands as well; so that all of these uses and controls of water, creating wealth, can be developed by the very method employed for slowing up the progress of these waters falling from the heavens on the various watersheds of the country from their sources to the gulfs and oceans.

We have in the West 17 arid and semiarid States, with 34 votes in this body—States which occupy for the most part the elevated region of the country, where men have vision, where there are men who can see things beyond the boundaries of their own States, and who are capable of conceiving of great engineering works that will benefit not only them but the entire country. Are we going to participate longer in the piecemeal legislation which has thus far characterized Congress? Are we

going to encourage the committees which have fallen into bad habits of division of projects and silence, which are intent upon what has been designated by the country as a spoils system? Or are we going to give a committee jurisdiction of this subject whose very name indicates its purpose?

What was the basis for the proposition upon which the Interstate Commerce Committee was organized? It was the promotion of interstate commerce. Prior to that time, the Commerce Committee of the Senate was the only committee on commerce having jurisdiction both of foreign and of interstate commerce. What did the Senate mean when it created the Committee on Interstate Commerce? Why, it meant that it intended to segregate that entire subject from the jurisdiction of the Commerce Committee, and give it to the new committee.

What has that new committee done? Why, it advanced gradually and progressively toward complete jurisdiction of the subject, and wisely so. The first question which it took up was the question of rail transportation, for that was the vital question of the time—the regulation of these giant carriers that had constructed a network of rails over the entire country, and were controlling political organizations and legislatures and administrative officers. After a long struggle, as the result of the recommendations of that committee, legislation was enacted under which public regulation was developed, and it is now about to enter upon an inquiry which embraces not only the perfection of that regulation but the study of a possible Government ownership.

Then it took up the question of the control of telegraph companies, and then of express companies, and then of oil carriers; and now it finds before it the vital question of the development of our water transportation, the promotion of water carriage, and its regulation and control in such a way as to protect it from the rail carriers, who have been the destroyers of the water carriers, and the development of both as coordinate instrumentalities for the service of the public.

Mr. President, the traditions of the committees of the House and the Senate—the Rivers and Harbors Committee of the House and the Commerce Committee of the Senate—are such as to give no indication that they will take up this question in a full and comprehensive way, and it does not fall within their jurisdiction. That jurisdiction has been exercised there by sufferance and not as a matter of right; and yet, when we seek to have bills for the regulation of commerce between the States by the instrumentality of water carriers referred to the Interstate Commerce Committee, whose jurisdiction upon those subjects is a matter of right, we are met by the objection that the practice has been to the contrary, and that as a matter of tradition the Commerce Committee has control of this subject.

Mr. President, I have talked with individual members of the Commerce Committee, which is composed of men of the highest distinction and the highest character in this body. I know how individuals on that committee have felt with reference to the lameness and the impotency of this development. They are embarrassed by the practices of the past, by the traditions of the past. They are embarrassed by the necessity of immediate action with reference to the localities which they represent; and it is much easier to pursue the beaten path of legislation than to indulge in revolution which may temporarily disturb the progress essential in their judgment to the prosperity of the communities which they represent.

I make no attack on that committee or its membership. I was once a member of that committee myself. I sat upon it for several years. My purpose in going upon the committee was to secure the consideration of some big measure that would correct the practices of the past. I found that committee so overloaded with work—not simply with work relating to the river and harbor bill, but with work relating to other departments and bureaus of the Government—that they had not the time to take up such a consideration; and whilst I was persistent and insistent I could never get patient consideration for a broad and comprehensive measure. So, having failed there, I went off the committee; and ever since I have been off the committee I have been pressing this matter upon the floor, in the hope that I could arrive at some accommodation. I have even gone so far as to suggest that we should organize a new committee in the Senate as they organized it in the House—a committee of 15, of which one-third should be taken from the Committee on Commerce one-third from the Committee on Interstate Commerce, and one-third from the Committee on Irrigation and Reclamation of Arid Lands. I have not been able to make any headway with that proposal. Such a committee would not resemble the committee that has been organized in another body, whose jurisdiction seems to be only over flood control and whose jurisdiction seems to be exercised simply in taking care of the floods after they have been massed, instead of preventing them from massing. It would be a committee composed of experienced men on all three of these committees, embracing Senators representing every section of the country, with a view to framing not simply a measure for the flood control of the lower reaches of the rivers but with a view to controlling those waters from the time they fall from the heavens upon the earth, God's benefaction to men, and putting every drop of that water to beneficial use before it finally mingles with the waters of the ocean.

Whilst this bill has progressed I have not been disposed to intrude my views very much regarding it. For instance, I did not know until to-day that this bill embraced seven or eight projects with reference to which Congress at the last session, during the consideration of the last river and harbor bill, ordered a reexamination to be made. Why did Congress order that reexamination? Because it had doubts as to the feasibility and value of the projects. Does not good faith require that Congress should wait until these examinations and reports are made to Congress, so that it can form its judgment? Yet these appropriations are placed in this bill, doubtless as the result of the settled convictions of the Senators or Representatives representing the districts to which they belong of their feasibility and their value; but the judgment of Congress was that their feasibility and value was in such doubt as to require a reexamination, and those reports have not been made. How are the items in this bill? They are in this bill as a part of this very system which I criticize, whereby, in order to get the support of all the members of the committee for a bill and to present an undivided front either in the House or in the Senate, it is necessary to include measures concerning which there is doubt, but concerning which certain members of that committee have no doubt. So they are included, and thus the judgment of two or three or four or five or six men backing these projects, which have been declared by Congress to be of doubtful value, is forced upon the judgment of the Senate and the House of Representatives, and we are called upon either to defeat the entire bill or to let these appropriations go through.

I wish to say that, with reference to the flood-control bills coming from the House of Representatives, I claim that there has been—I will not go so far as to say a lack of good faith, but I do claim that there has been a lack of consideration. The city of New Orleans was in danger, was fearing another flood. The Reclamation Association of New Orleans and the Chamber of Commerce of New Orleans have declared in favor of a bill which I have been urging for years, known as the Newlands-Broussard river-regulation bill, differing in their judgment, perhaps, from the rest of the lower Mississippi Valley, the people of which seem attached to the present system of river development and river appropriation.

The city of New Orleans, as the result of that system of inviting the waters of this great watershed to rush down the Mississippi River, by the very doors of New Orleans, has seen the flood level constantly rising in height and threatening the destruction of the city, and so the people of that city have been compelled to build their levees higher and stronger. The entire city may yet, at some time, be the victim of some failure of or defect in its levee system through a crevasse or otherwise. So, being apprehensive, as they saw the policy being carried out of building these levees higher and higher in order to prevent the waters from going over their accustomed area of overflow and thereby lowering the height of the flood below, observing that their flood level was constantly increasing in height, they sent a telegram to the Secretary of Commerce calling attention to this important question. That communication was laid before the Cabinet, and as a result of that the interdepartmental committee of Cabinet officers, appointed three years ago to consider this river-regulation bill, as a result three-fourths of them declaring in favor of it and the other one-fourth, the Secretary of War, not opposed to it but not enthusiastic about it, that interdepartmental Cabinet committee was called togeher, and what did they do? The first thing they did was to send for those who were responsible for the Newlands-Broussard bill and for the Ransdell-Humphreys bill, assuming that these two bills covered all the proposals that could be made upon the subject. As a result of this inquiry, these gentlemen, this Cabinet committee, made a unanimous report to the President, recommending substantially the organization which has been urged by the bill which bears my name. They recommended coordination of services by the appointment of a departmental council, consisting of the Secretaries of War, of the Interior, of Commerce, and of Agriculture, with the President at its head, and authorizing that commission to bring the various services into coordination, and providing the other machinery for full and comprehensive consideration of all the problems that relate to water, including cooperation with the States.

It was supposed, inasmuch as the Senator from Louisiana [Mr. RANSDELL] assented to those recommendations, his assent would carry the support of his associate in that bill, Mr. HUMPHREYS, of the House, but it did not.

Mr. RANSDELL. Mr. President, may I interrupt the Senator?

Mr. NEWLANDS. Yes.

Mr. RANSDELL. I should like to ask the Senator if, when he invited me to that conference, I did not insist that he wait until Mr. HUMPHREYS returned?

Mr. NEWLANDS. The Senator did.

Mr. RANSDELL. And told him that I had no authority to speak for Mr. HUMPHREYS?

Mr. NEWLANDS. That is right.

Mr. RANSDELL. Then, why does the Senator try to insist on my binding Mr. HUMPHREYS? He has done that about three or four times on this floor. I told the Senator that I could not bind Mr. HUMPHREYS; that I could not bind the other House; that I was willing to stand by what the interdepartmental conference did; and I urged Mr. HUMPHREYS and several of his most influential associates to create some kind of commission which would carry out the ideas of the Senator from Nevada; but they refused to do it. I am willing now—and I said so the other day on this floor—to create a commission to work out some kind of control of the waters from the time they fall from the clouds until they get into the ocean.

I can not control this matter, however. I have presented the interdepartmental plan for a national waterways commission to a number of Senators, asking them if they would stand for such a commission; and I have not found one who would agree to anything of the kind. I am tired of having my name brought in so often, I will say to the Senator, in connection with this by innuendo or otherwise. I want the Senator to confine himself absolutely to a plain statement of the actual facts of the case. I tried to get Mr. HUMPHREYS there; I tried to get the Senator to wait until he came, but he would not do it.

The Senator insisted on holding the conference, and at the meeting I said that I had no objection to the general plan which the departmental committee desired. I am willing to have it, so far as I am concerned. I am so anxious to get legislation for the lower Mississippi that if Congress will legislate for it and relieve my people from the awful suffering and sorrow that they have had to undergo from the waters of 31 States since the beginning of this Republic, I shall make no objection to investigating other projects; but I insist on this, and this alone: That no money be appropriated for anything until it has been thoroughly and carefully investigated and reports thereon have been made to Congress. The Senator will remember that I said that, and I am willing now to have a commission created that will study water for the purposes of irrigation and navigation, porosity and absorbent qualities of the soil, about which the Senator is so anxious, drainage, flood control, and every use of water; but I do not think that it really would be quite dignified to ask the President of the United States and four of his Cabinet officers to form such a commission.

It seems to me that, if we wish to get something practical, we should create a commission of seven or nine of the ablest men in the United States, of the ablest engineers, men of the caliber, for instance, of George W. Goethals, the Panama Canal builder. We might create a commission of that kind and put Goethals or some other able man like him at its head, and say to them, "Gentlemen, we are not altogether satisfied with the present system of spending money on drainage, navigation, irrigation, flood control, the use of water in connection with forestry, and all the uses of water. Work out something better if you can, gentlemen of this commission, and submit it to us, and let us see if we can devise wiser methods than those now in use." I have no objection to that kind of a commission. I have said that here; I said it to the Senator from Nevada [Mr. NEWLANDS] first, and then I said it to many others. I am entirely willing to have that kind of commission, but I do not wish to be placed in a false position, and I do not think the Senator from Nevada means to misrepresent me; I hope he does not; but I am bound to state exactly what happened at that meeting and to set myself right.

I had no power to control the other House, but I did confer with Mr. HUMPHREYS and some of his associates and try to get them to have a much broader commission than their bill provides. I discussed all these questions with Mr. HUMPHREYS, Dr. FOSTER, and Mr. R. J. WILSON, and they will tell the Senator so. I urged that on them strongly.

Mr. NEWLANDS. Mr. President, I am very glad to hear the views of the Senator from Louisiana, though they have been expressed with unnecessary heat. I am glad also to know that he favors substantially the recommendation by this departmental commission.

I did not misrepresent the Senator from Louisiana. I stated the facts—the fact that the junior Senator from Louisiana [Mr. BROUSSARD], the senior Senator from Louisiana [Mr. RANSDELL], and myself consulted with this Cabinet committee, and that it was assumed by us that his colleague in the Ransdell-Humphreys bill would follow those recommendations. That assumption proved to be incorrect; but the statement that the assumption existed and it was incorrect is no reflection upon the Senator from Louisiana.

I wish, however, to state that I have now learned for the first time that the Senator from Louisiana is prepared to accept the recommendations of this Cabinet committee; I mean for the first time recently, but since the bill was introduced and reported by the Flood Control Committee of the other House, I assumed that the Senator from Louisiana had practically abandoned that recommendation, for I understood—and in that I may be inaccurate—that the Senator from Louisiana introduced in the Senate the same bill that was introduced by Mr. HUMPHREYS in the other House. Is not that correct?

Mr. RANSDELL. I did so because I believed it was the very best that we could get.

Mr. NEWLANDS. I assume from that that the Senator was disposed to support that bill, and I am opposed to that bill.

Mr. RANSDELL. I am disposed to support the bill, Mr. President.

Mr. NEWLANDS. I am going to fight against that bill because of the abandonment of the most essential recommendations of this cabinet committee, which is a coordination of the various scientific services of the country in this great work of comprehensive river development, the basic thing upon which the other sections of the country rely. I am willing to give Louisiana the money; but what I insist upon is that the bill that carries the money should also carry the organization that will be of advantage to sections of the country other than the lower reaches of this river. I am more intent upon a perfected organization that will give us a perfect plan than I am upon immediate appropriations. I am perfectly willing to sacrifice any appropriations called for by the bill which I have supported, and am perfectly willing to give the South the appropriations that they insist upon; but their policy seems to be to insist that we should shove the waters continually down upon them so that they levee against them, and spend money in leveeing against them, whilst we say we want to retain these waters within our own boundaries as the sources of untold wealth. That bill unfortunately——

Mr. RANSDELL. Will the Senator permit a brief interruption?

Mr. NEWLANDS. Yes.

Mr. RANSDELL. I want to ask the Senator if he recalls that in March, 1909, a National Waterways Commission was created by act of Congress, with the following membership: Theodore E. Burton, of Ohio, chairman; Jacob H. Gallinger, of New Hampshire, vice chairman; Samuel H. Piles, of Washington; William Alden Smith, of Michigan; F. M. Simmons, of North Carolina; James P. Clarke, of Arkansas; and William Lorimer, of Illinois, on the part of the Senate; and on the part of the House, D. S. Alexander, of New York; Frederick C. Stevens, of Minnesota; Irving P. Wanger, of Pennsylvania; Stephen M. Sparkman, of Florida; and John A. Moon, of Tennessee?

That commission made a report in March, 1912, which shows that they had examined the waterways practically all over this country and Europe. I shall not take the time of the Senate by reading it. But on page 65 of their final report they say that they thoroughly examined the Mississippi River from St. Paul to New Orleans, that they had inspected the Missouri River from Kansas City to its mouth and the Illinois River from the lower portion to the head of navigation. They had the assistance of a great many very able engineers and experts. I desire to read merely a brief sentence from the report, as follows:

> Numerous propositions have been made for the creation of a board of public works or other body which shall decide upon the feasibility and desirability of propositions for expenditures on rivers and harbors. The commission is unwilling to recommend a change of this kind, and points to the fact that the past recommendations of the Engineer Corps have been carefully prepared and with a degree of expert knowledge and comprehension of the commercial needs of the country which could not well be supplied by any other body or organization. The advantages which attach to the Engineer Corps are obvious. The members are in the permanent service of the Government and are free from those influences which would inevitably be brought to bear upon men in civil life. Those engineers now engaged in the work are carefully trained in the planning and execution of these improvements and have special qualifications for judging the feasibility and the cost of proposed river and harbor projects. They also have a good general knowledge on the

probable commercial results which would accrue, though on this point their opinions have not been regarded as conclusive.

That commission was created for the purpose of investigating questions pertaining to water transportation and the improvement of waterways and to make recommendations to Congress. It was certainly composed of a number of the very ablest men in the Congress at that time, and it recommended leaving waterway matters in the hands of Congress and the Engineer Corps of the Army. I do not know that we can act in any wiser way than that, though, as I have said, I am willing to have another commission created to make a study similar to that made by the National Waterways Commission and with enlarged powers, as I have indicated, to see if any better plans can be worked out.

Mr. CLARKE of Arkansas. Mr. President, I want to say that, whilst I was a member of that commission, I was not able to devote any attention to its work.

Mr. NEWLANDS. Mr. President, I will state that that commission, called the National Waterways Commission, was organized some two or three years after the Inland Waterways Commission had made its report. Mr. Burton was the chairman of both of those commissions. The National Waterways Commission, the last one appointed, was composed entirely of Members of the Senate and of the House, selected from the Commerce Committee of the Senate and from the Rivers and Harbors Committee of the other body. Those committees were practically wedded to the system which has existed so long. The Inland Waterways Commission was a commission appointed by President Roosevelt and composed of two Senators, two Representatives, and the chiefs of the various scientific services, including the Chief of Engineers of the Army, the Chief of the Reclamation Service, the Chief of the Forestry Service, the Chief of the Geological Survey, and some others.

That first commission, the Inland Waterways Commission, after a thorough survey of the entire subject, visiting every part of the country, made a report recommending practically the organization covered by the bill which I had the honor to introduce and the organization recommended by the present Cabinet committee. Mr. Burton signed that report as the chairman of that commission.

Now, I wish to say that, whilst Mr. Burton knew more about the waterways and the harbors of this country than anybody else, Mr. Burton was never an active advocate of the development of our rivers. Instead of being the engine that propelled this movement he was always the brake upon the movement. Brakes, as well as engines, have their use. So far as I am concerned I prefer to belong to the motive power rather than to the braking and obstructing power. But you can review Mr. Burton's entire connection with the river development of this country, and you will not find that driving energy, that faith and confidence that are essential to carry through a great movement; but throughout, so far as river regulation is concerned, Mr. Burton has been an obstructor, a brake upon the movement, rather than a motive power.

I make no reflection upon Mr. Burton when I state that. He will probably state that to be his own position. He signed the Inland Waterways Commission report, however, providing practically for the very organization for which I am now contending.

Why was that second commission organized? I asserted at the time that that commission was organized because it was felt by the opponents of river development, of real, genuine river development, that the recommendations of the Inland Waterways Commission, urged by Mr. Roosevelt and urged by Mr. Taft in a report when Secretary of War, were about to ripen into legislation, and so the expedient was resorted to of getting a new investigating commission.

I protested against it at the time. I wanted no more investigations; I wanted work; and I wanted a commission organized to commence work and not simply to study the subject; and that commission was not organized in such a way as to develop a vital energy in this movement.

So I expected that a commission composed entirely of members of the Rivers and Harbors Committee of the other House and of the Commerce Committee of the Senate, who had been accustomed for years to regard the Engineering Corps of the Army with the highest confidence and esteem, and to question whether there was wisdom anywhere else than in that corps—I expected that they would make a report practically insisting that the work should continue as heretofore, entirely under the control of the Engineer Corps.

Recollect, that I do not propose to deprive the Engineer Corps of one iota of jurisdiction which they have had in the past. I simply propose to add to their knowledge and their information and their work the knowledge and the information and the work of other scientific services of the Government; but I regret to say that the Engineer Corps of the Army, exclusive, as it always has been, by reason of its military organization, does not look with favor upon a cooperation or coordination of powers; and that is the one criticism that I have to address to that corps. I have no hostility to that corps; on the contrary, the great bulk of the work done under this proposed new system of organization will be done by the Engineer Corps of the Army, and their work will be enlarged instead of diminished; but it seems perfectly obvious that when different forces and boards and bureaus and services are at work upon the elusive waters of these great river systems—in Montana to-day, in Missouri to-morrow, and in the Gulf of Mexico the day after that—the cooperating, coordinating powers of all these services should be employed by the Government, not only in plans but also in work.

So, as against Mr. Burton as chairman of the National Waterways Commission, composed simply of members of the Commerce Committee of the Senate and of the Rivers and Harbors Committee of the other body, I appeal to the judgment of Mr. Burton, as chairman of the Inland Waterways Commission, composed not only of Senators and Representatives, but of the chiefs of the scientific services of the Government, and by reason of that fact, it seems to me, taking a broader view of the subject.

If you will refer to the report of the Inland Waterways Commission, you will find that that commission regards as essential the coordination of these scientific services, the cooperation of the Nation with the States in the proper and proportionate development of the rivers of the country.

Mr. President, I will say that I do not think the members of the Commerce Committee of the Senate and of the Rivers and Harbors Committee in the other House are quite satisfied as individuals with the system which has been pursued; but they find themselves under the restraint of yielding their individual opinions here and there in order to get what they need, or what they think they need, for their constituencies. It seems to me, therefore, that the Senate of the United States might well turn over this subject matter of the development of our rivers to the committee which is organized for the development of interstate commerce and declare now that, inasmuch as the subjects relating to interstate commerce have constantly increased, coming under the jurisdiction of this committee, this subject shall also be added.

What I fear is that, if we permit, against the individual judgment of the Members of this body, a big measure like this, with many defects, to pass upon the assumption that it has in it more of good than of bad, we will lose the opportunity of broad, comprehensive legislation upon this subject, which can be spurred on only by necessity. If those interested in the various projects realize that they can get only what they want by the perfection of the system, they will hurry to perfect the system.

I am very unwilling myself to take any obstructive attitude with reference to any legislation; but if ever there was a condition that warranted it it is now. For two sessions river and harbor bills—I think for two sessions—have been rejected by Congress, and we have been compelled to resort to lump-sum appropriations. That very condition shows that the system is at fault and that there is a widespread dissatisfaction with it, which is reflected not only here but throughout the country; and it seems to me that Senators may well now consider whether this is not the time to seize for appropriate work and whether if this opportunity is lost it can be recovered in the future.

Mr. VARDAMAN. Mr. President, I would commend to Congress the wise advice given by one of the world's great thinkers:

> Be wise to-day; 'tis madness to defer;
> Next day the fatal precedent will plead;
> Thus on, till wisdom is push'd out of life.

The discussion of this bill has been of peculiar interest to me. The variety of views expressed and the multiplicity of plans proposed reveal the marvelous mechanism and the winding ways of man's mentality. The different viewpoints, the angles at which the question is seen, and the conclusions reached afford an interesting study in psychology.

My good friend the learned and patriotic junior Senator from Iowa [Mr. KENYON] finds little good in the measure, and with tears in his voice he solemnly assures the Senate that his sense of duty is so outraged by this legislative enormity that he is utterly helpless from any point of consideration to square an act in support of this bill as consonant with his sense of obligation to his constituents. Therefore he is compelled to maintain an attitude of relentless antagonism to it. In this determination he is very ably assisted by the erudite, persistent, and patriotic Senators from Nebraska and Wisconsin. Notwithstanding the fact that the system of river and harbor improve-

ment is of long standing and the policy an ancient one, if such a term may be used with reference to anything in America, which has repeatedly received the unqualified approval of the American people in their national political platforms and at the polls, viewed through the glasses used by these able Senators and measured by the standard employed by them it is a veritable thing from Nazareth, out of which no good could possibly come.

Mr. President, there is not anything conceived in the brain or constructed by the hand of finite, fallible man that is perfect. One who recognizes man's mental and moral limitations, and the great variety of interests to be subserved, would not expect this measure, or any other measure, that might originate with this body to be free of all objectionable features. Certainly the proponents of this bill do not claim for it perfection, or in very large degree the elements of inerrancy. But it is as good as its predecessors. It is as good as the men who framed it, and the men who framed it are as good as any other men who occupy places in this Chamber or hold membership in the Congress.

Now, let us see how this bill was created, the multiplicity of interests it is intended to serve, and the various sections of our common country where these interests are located. From the east to the west, the north to the south, contributions are made to this proposed piece of legislation. It is intended to take care of the waterways of New England, down our eastern coast to Florida, from Florida around the continent to San Francisco, and from San Francisco to Alaska, and from Alaska back to the Northeast. It also serves the Middle and Western States, and the Northern, Southern, and Eastern States. There is scarcely a place an inch square on a map of America of ordinary size that does not mark the location of some interest treated by the bill. It was constructed by the Representatives in Congress of the American people from every section of the Republic—men who are here for the purpose, not of promoting personal interests, but rather of serving the interests of all the men and women who pay the taxes and bear the burdens of government. The bill is altruistic in its purposes, boldly patriotic in its design, and intended solely for the public good.

If this were a new project or an untried scheme, there might be some justification for the wholesale abuse, the conscienceless lambasting, and the cruel excoriation which this measure has received at the hands of certain honorable Members of this body. But it is not new. It is pretty nearly as old as the Republic itself.

And, as I stated a moment ago, it has received the unqualified indorsement and approval of all the important political parties in America. The great seminal idea or principle running through this bill underlies the prodigious conservation schemes which have been adopted by this Government and put into operation in the semiarid West. Its benign purpose is to facilitate commerce between the sections by deepening the channel of the great waterways, the effect of which will be to lower the freight rates and save to the people the profits which otherwise would go to the owners of the railroads and the common carriers.

Now, I am not at all wedded to the policy of digging canals or canalizing rivers for the sole purpose of controlling freight rates on railroads. That strikes me as rather an expensive expedient or policy. If I had my way about such matters, I should insist upon the Governments, State and National, regulating railroad rates, and thereby save to the taxpayers the cost of constructing waterways. But, Mr. President, I can not have my way about these things. My judgment will not be taken by all the Members of Congress and the American people on this or any other question. No man can hope to have that degree of consideration given his views. There is no infalliby wise, benevolent despot in this country to whom these matters may be referred for prudent and perfect arrangement. So I shall do that which every rational and patriotic servant of the people in the legislative department of the Government ought to do. I shall take the next best thing. I am not going to say, because the Senator differs with me, that the scheme he proposes is a dishonest scheme, designed to rob and plunder the Treasury, and to misuse the money collected from the people by taxation. If I had had my way in framing this bill, very probably I should have eliminated some of the old projects that are scarcely worth the money spent upon them, and put in their stead new and more meritorious projects. But I did not have my way and I can not have my way. Now, because I can not have my way, I am not willing to destroy the whole system—a system that has been employed not only in America but in every civilized country beneath the stars, both in ancient and modern times, with the net result of positive good to the people of the respective countries where it has been tried.

Mr. President, I have not reached that point yet—and God forbid that I may ever reach it—where I shall feel that I have a corner on all the patriotism and wisdom in the Congress of the United States. It may be uncharitable on my part, but I can not refrain from a sneaking suspicion that every man who admits his own infallibility is not the true glitter that comes from the genuine gold. I am willing to join with my colleagues in an effort to work out, develop, and perfect, as nearly as we can, this bill. If I should conclude after the work is finished that the bad outweighs the good, then I shall do what I concede it to be the right of every other Senator to do—vote against the measure. But, after all, it is a matter of judgment rather than a question of moral turpitude.

Mr. President, I was very much impressed a few days ago with an address delivered in this Chamber by the venerable and honorable Senator from South Carolina [Mr. TILLMAN]. His long service in this body and his well-known devotion to the interests of the common people of America entitle anything that he might say to serious and respectful consideration. Senator TILLMAN has said a great many good things on the floor of the Senate in days gone by which challenged my admiration and commanded my highest approval. He said those things when it required courage to say them, and he did many things which it required the highest order of patriotic courage to do. For that reason I confess to a degree of disappointment when I heard him utter these words:

> We need the money so much for more important things that it is criminal, to my mind, to hesitate for one moment or discuss this bill at all. Think of it! Forty million dollars to be wasted and taxes to be heavily increased. That forty millions would build two battle cruisers. No one knows how many submarines it would build, and I can only guess how many airships and other things of that sort we could buy with it.

Mr. President, the Senator from South Carolina can not be more solicitous about the future welfare of this great Republic than I am. I yield to no man in my love of country and willingness to make a sacrifice in its interest. He and I may differ as to the methods, the extent, the time, and the occasion for preparation for defense; but about the ends to be served, I dare say, there is very little difference between us. I want an adequate navy, one capable of defending the rights of the American people against any power that may dare to violate those rights. And I think we have such a navy. Love for this Republic and patriotic concern for its future are not new impulses or novel passions. It is the common attribute of the American citizen, and has been from the formation of the Government to the present day. "Preparedness" has become a fad, and the much talk about it is rather a cheap method of advertisement. It is heard more from the lips of that character of our citizenship who in the past have shown less patriotism in thoughts and less altruism in action than any other class of our people.

Of course, I will not question the purposes or the loftiness of their motives; but the fact remains that many of this vociferous, opulent breed of militant patriots, famed for their much speaking, will be pecuniarily benefited by carrying out their suggested plans for "preparedness." Of course, it may be that pelf and patriotism, profits and "preparedness" are mere coincidents. It is not my province to judge. But if we are to prepare for war—which I myself do not think at all imminent—that fact will in no wise justify this Congress in failing to carry out the promises made to the people of America in our platform with reference to waterway improvements by cleaning out the streams, leveeing the rivers, and deepening the harbors.

I believe that a platform promise imposes an obligation that can not lightly be thrown aside, and I have never regarded a platform promise as molasses with which to catch flies or for the purpose of getting votes.

It is my good fortune, Mr. President, to represent in part in this Chamber a people who are vitally interested in the passage of this bill. There are several streams of minor importance within the limits of the State of Mississippi. The harbors on the Gulf coast afford access to the ships from every land, which come to our coast to bear away great cargoes of freight to the world's market. But the great item—the project of paramount importance to them in this bill—is the Mississippi River and the protection of the great Mississippi Delta, the most fertile section of our common country, inhabited by hundreds of thousands of patriotic, enterprising, happy people—people living behind the levee—and the preservation of whose homes depend upon the passage of this bill.

It has been said that the Mississippi River is the "drainage ditch" for more than one-half of this Republic in North America. The water that falls on 32 States finds its way to the sea through the channel of this wonderful stream. Of course, the people on the bank of the lower Mississippi can not afford—it is

a physical and financial impossibility—the expense of deepening the channel and leveeing its banks so as to hold this vast volume of water within the channel without Government aid. Mr. President, the Government of the United States alone is capable of solving that problem, and a failure on the part of the Congress at this session to take such action as the exigency and the magnitude of the problem demand will involve a betrayal of a sacred trust.

The residents of the great Delta of the Mississippi Valley, I am sure, Mr. President, will not listen with very much patience or approval to the suggestion made by the senior Senator from South Carolina [Mr. TILLMAN] when he suggests that it is of more importance that the money proposed to be appropriated by this bill be used for the protection of their homes and firesides from the devastation of the floods, should go to build battleships and other instruments of death, which, I know, are not needed now. With all due respect to the venerable and highly honored Senator, I think the suggestion is a little short of monstrous. It only shows to what extremes man may go when obsessed with some vague and indescribable apprehension of impending disaster. It is the effect of the policies of falsehood injected into the veins of the body politic by the wild advocates of preparedness. Since the days of John Law, with his Mississippi Bubble, I do not think a more palpable fraud has ever been attempted to be perpetrated upon a patriotic, intelligent people than is being attempted at this time by the interested advocates of "preparedness."

Mr. President, in my support of the measure before the Senate I trust I shall be able to rise above all sectional considerations, that the egotistical element may be wholly lacking in my conduct. I sincerely hope that I may be able to demean myself as an American Senator should act charged with the responsibility and the duty of conserving the interests of the Nation. While I know that I am not wholly free or exempt from the influences, environment, and the considerations of personal, selfish interests, I am going to try in this instance, as I have universally endeavored to do since I became a Member of this body, to rise above those distorting and warping influences and to live and act that broad, selfish altruism, which, to my mind, is the highest evidence of man's fitness for legislative duties. In being true to myself and the best and higher interest of my immediate constituents I can not be false to my colleagues and untrue to my country.

The time has arrived, I think, when the Senate should take action in this matter. Free and full discussion, exhaustive discussion, has been had; and now we owe it to the American people, our masters, to take definite and certain action.

But there is another snag in the stream that we have encountered, which I shall notice briefly. The erudite, far-seeing senior Senator from Nevada [Mr. NEWLANDS] has a scheme of marvelous magnitude, which he has, with the pertinacity of purpose that characterized the elder Cato in his antagonism to Carthage, urged upon the attention of the Senate of the United States. I trust, Mr. President, that I may at this juncture be permitted to pay to the honorable Senator the tribute of my respect and admiration. He is one of those splendid dreamers whose vision permits him to stand within the shadow of the night and look beyond it toward the coming light and see, far off, with trance-prophetic eye, the consummation of the centuries. Maybe he is just a little bit ahead of his time. I know that the American people can not afford or expect his wonderful plan, so marvelous in its conception, intricate in its details, and, to my mind, well nigh impossible of operation, to be put into effect at this time. So far-reaching, vast, and comprehensive is the system offered by the able Senator that he proposes by "cooperation and coordination" of some sort to take possession of the water from the time the mist in the heaven is condensed into the drop of rain, conduct it to the earth, harness it, control it, and direct its course until it becomes a part of the great restless, rolling sea.

He would extract the fertilizing qualities from the drop of rain and with it enrich the earth. He would use the kindly moisture to encourage the growth of the young and tender plants. He would hang the dewdrop upon the flower, and through the reflected rays of the sun study the colors of the rainbow with all its neutral tints. He would control the waterways of the land by impounding the rainfall, create the power that would generate the electricity to light the world, and turn the wheels of industry; he would direct the current and control the flow of the streams upon whose placid bosom the commerce of the nation might float; he would follow the water into the sea, and after he had directed it through all of its meanderings, he could then withdraw himself from the "madding crowd's ignoble strife," seek seclusion upon some tropical Morro, where he might sit with the tragic poet of old, and "listen to the multitudinous laughter of the sea," and peacefully, with infinite pride, contemplate the marvelous work of his wonderful scheme. A more ambitious undertaking never stirred the brain of man, and, I might add, no such scheme was ever accomplished.

Mr. President, nothing short of Omnipotence could carry out this scheme. The despot who built the Pyramids accomplished an inconsequential undertaking compared with the magnitude of this stupendous project. If some modern Sesostris wielded the scepter of absolute authority at Washington, and all the American people were his slaves, and that great ruler should be possessed of the vision of all the poets, the combined wisdom of all the philosophers, and the tested skill of all the engineers of ancient and modern times, I am persuaded that probably in the course of a century he might be able to carry out the tremendous undertaking proposed by the senior Senator from Nevada.

Of course, I am not entirely sure about the length of time it might require, but I am sure it would take at least a century to accomplish what the Senator from Nevada has in his mind. Not having in hand all of those influences and forces to employ, it seems to me, Mr. President, an unwarranted prodigality of time to consider further the Senator's pet project.

Let us pass this bill and conserve the lands of the great delta which are liable to destruction by devastating floods. Let us deepen the harbors, that the products of our fields, forests, and factories may be floated out to sea and carried to the peoples of the world who need them. Let us deepen the channels of the rivers, that our domestic commerce may be facilitated; that the consumer may be given cheaper freight rates; and the interests of the toilers of all America be promoted. I will go further: I shall be glad to cooperate with the Senators from the great West in carrying out the plans already inaugurated for the reclamation of the arid lands of the West that happy homes may be made for the homeless and that prosperity and abundance may be vouchsafed to our people.

The future of America is in the keeping of the country home. Free institutions find their enduring foundation upon the home, away from the congested centers—with that class of our people who live close to nature and nature's God, whose labor is remunerative, healthful, and inspiring. In the heart of the American farmer burns the unquenchable fire of patriotism which shall save this Republic from the corroding influences of sordid materialism which is eating out the hearts of the money lovers and stifling the speechless, longings of the heart of the indigent unfortunates who live in the congested districts.

Mr. SHEPPARD. Mr. President, before the vote is taken on the motion of the Senator from Iowa regarding the Brazos River, I think it proper that a brief answer should be made to his allegations.

I desire to direct the attention of the Senate to the recommendations of the engineer who examined the Brazos River, and on whose report the present project is based.

The examining engineer was Capt.—now Col.—Edgar Jadwin, one of the ablest members of the Engineer Corps. His report was practically a continuation of a report by Col. C. S. Riché, who initiated the preliminary examination, and who is one of the most brilliant members of the corps. Jadwin said:

> Having in mind the existing development of the valley, the fact that it lies in the center of the State, is traversed by three railroads, produces about one-third of the cotton crop of the State, and probably half the crop of the State passes through it now by rail; that Texas is the principal cotton State, producing an average of about 2,500,000 bales, worth about $50 per bale—

That was some 10 years ago. The cotton production of Texas is now somewhere between four and five million bales, worth about $50 a bale—

> that there is no water transportation in the section from Washington to Waco; that this improvement will put the section in water communication with the largest cotton port in the United States; the results obtained elsewhere where water competition has been afforded, the possibility of an extension of the improvement farther inland above Waco, if required, and the relatively low cost and the quickness with which the result can, with adequate appropriations, be obtained to Waco, it is evident that the proposed improvement is especially meritorious, and that the basic conditions show it to be a project worthy to be undertaken by the United States.

On the strength of that report, Congress inaugurated the present project, and provided for the erection of two locks and dams—two of the eight locks and dams which Capt. Jadwin said would be necessary in order to complete the project.

The territory tributary to the Brazos contains about 31,084 square miles, a territory nearly as large as Indiana, larger than South Carolina or West Virginia, and within 1,000 square miles of being the size of Massachusetts, Rhode Island, Connecticut, New Jersey, and Maryland combined. While this section is only about one-eighth of the entire area of Texas, it has more than a third of the population of the State, and produces one and

one-half million bales of cotton, which is more than one-third of the cotton crop of Texas, and nearly one-tenth of the cotton crop of the entire world.

Of course, Mr. President, no commerce of any respectable size can possibly develop on the river until the entire project has been completed, until the eight locks and dams have been constructed between the mouth of the Brazos and Waco, the head of navigation. Waco is a city of some 40,000 people. It has seven railroad trunk lines. Within a few months the interurban railway has been completed from the Red River section and Dallas. A pipe line for natural gas from the Mexia field has been constructed. Waco does $70,000,000 worth of wholesale business annually. It is the center of the most thoroughly populated section of Texas, and it is the largest inland cotton market in the world.

At the mouth of the Brazos, Mr. President, a deep-water port has already been established—a port that now has a minimum depth of 18 feet, and one of the largest fuel-oil concerns in the world is establishing extensive warehouses there. This concern has indicated its intention of barging its oil to Waco as soon as the river has been improved, and of building at Waco a storage plant with a capacity of 600,000 barrels. One of the largest sulphur deposits in the world is being developed near Freeport. The tonnage transported from that port to the markets of the world amounted to 53,133 tons in 1913, 104,281 tons in 1914, and 152,945 tons in 1915. Three steamships make regular calls at Freeport, at the mouth of the Brazos, each month, and do a large business. I shall give the Senate the names of some of the boats that are now operating between the mouth of the Brazos and the ports of the world.

They are the *Kennebec*, the *Honduras*, the *Algiers*, the *Frederick Luckenbach*, the *Wilhelmina*, the *Wm. P. Palmer*, the *Carolina*, the *Francis Hanify*, and so forth. Now, the improvement of the Brazos River will connect this important port with a large part of the interior of Texas and will put that important territory in touch with the markets of the world. I know of no waterway proposition that has greater possibilities than this Brazos River project.

Mr. THOMAS. Mr. President, may I ask the Senator if the town of Freeport, at the mouth of the Brazos River, has railway connections?

Mr. SHEPPARD. It has. The Missouri, Kansas & Texas Railroad, one of the large trunk systems of the Southwest, now has railroad connection with Freeport, and the other principal trunk lines of our section are preparing to make similar connection.

Let me say one other thing. The Senator criticized the fact that there was to be a depth of only 3½ or 4 feet from the mouth of the Brazos to Waco. That is an entirely sufficient depth for an extensive barge service. Why, Mr. President, on the Rhone in France, from Le Parc, near the Swiss boundary, to Lyon, a section 95 miles long, the navigable draft is only 1.3 feet, and yet the traffic on that section in 1905 was 160,000 tons. On the Rhone, from Lyon to Arles, a distance of 178 miles, the navigable draft is 3.3 feet; and boats of this draft on the Rhone to-day carry 400 to 500 tons and are from 400 to 430 feet long. The traffic on this section in 1905 amounted to 750,000 tons.

More than that, the Oder is one of the principal rivers of western Germany. It has six divisions: First, from its junction with the Neisse to Breslau, 46 miles, with a depth at mean low water of from 2.6 to 3 feet; second, from Breslau to Furstenburg, 185 miles, with a depth at mean low water of 3 feet; third, from Furstenburg to Kustrin, 38 miles, with a depth at mean low water of 3.3 feet; fourth, from Kustrin to the junction with the Finow Canal, 31 miles, with a depth at mean low water of 4.2 feet; fifth, from the Finow Canal to Stettin, 49 miles, with a depth at mean low water of from 5 to 8.7 feet; sixth, from Stettin to the sea, an estuary of 20 miles; total, 349 miles. The traffic on this river in 1905 was 4,200,000 tons; and of that amount, Mr. President, 1,107,000 tons were received and dispatched at Breslau, where the river in one direction has a depth of from 2.6 to 3 feet and in another direction of only 3 feet.

In order to show the possibilities of shallow-draft navigation, let me say, further, that of the 22,238 boats on German waters in 1905, 10,443 were boats carrying from 10 to 150 tons. It is evident that an inland barge traffic could be established on the Brazos with the greatest ease, and an inland waterway of tremendous benefit not only to Texas but to the entire Southwest developed.

Mr. THOMAS. Mr. President——

The VICE PRESIDENT. Does the Senator from Texas yield to the Senator from Colorado?

Mr. SHEPPARD. Yes, sir.

Mr. THOMAS. I should like to ask the Senator if he really believes that the business upon the waterways of France and Germany can be duplicated on the Brazos or any other river until the present methods of those countries in land transportation and the control of railways are established in this country?

Mr. SHEPPARD. I think so.

Mr. THOMAS. Does not the Senator know that if we should expend enough money on the Brazos to give it a depth of 10 feet, with the opposition of the railways to the waterways of the country, it would not get the traffic, and could not hold it if it did, and that any attempt to establish it to any serious degree would result not only in railway competition but in the practical destruction by the railways even of its potential business?

Mr. SHEPPARD. I do not think so, Mr. President.

Mr. THOMAS. Can the Senator name any stream, in Texas or elsewhere, on which there is a substantial and continued increase of water traffic where there is railroad competition?

Mr. SHEPPARD. Oh, yes; the waterway from Duluth to New York.

Mr. THOMAS. Oh, I said any small watercourse. I admit, of course, that the instance to which the Senator refers is one in which there is an increase in traffic; but the Senator knows that it is not necessary there to spend millions to get 2 or 3 feet of water. He also knows that there is communication from the upper regions of Lake Superior clear to the seaboard.

Mr. SHEPPARD. Not originally. They had to construct a part of that waterway through dry land. They had to connect Lake Ontario with the Hudson River by constructing a canal through the soil.

Mr. THOMAS. Yes; and also the Welland Canal through the soil, capable of accommodating enormous boats. The Senator knows that that is a part of a waterway which is substantial and which connects great bodies of water with each other and is not the expenditure of money upon a stream which leads into the interior part of the country where the railways dominate the traffic and where they always will dominate it until the Government shall reach out its strong hand and compel them to cooperate, just as they are required to cooperate in France and in Germany. It seems to me we are beginning this whole subject wrong side to. Let us get control of the railways and then, by virtue of that control, we will be enabled to make the same arrangement with reference to boat traffic and general traffic that is made in the case to which the Senator calls attention.

Mr. SHEPPARD. Why, Mr. President, the railroads will never dominate the traffic of the country if waterways are properly managed, because the railroads have not sufficient capacity to carry the traffic which this country is capable of developing. I would never advocate the improvement of waterways merely on the ground of its influence on railroad rates. I advocate the improvement of waterways primarily because they establish new and additional systems of transportation. Mr. James J. Hill said some years ago that it would require an expenditure of $5,000,000,000 a year for the next 5 or 10 years in order to enable the railroads to keep pace with the material development of which the country was capable.

Mr. President, in that fact may be found the prime necessity for waterways. We need the additional facilities of transportation afforded by water routes in order that the country may have its highest development and growth, a development and growth which can not materialize as long as transportation is confined to railroads with their limited capacity.

Mr. JONES. Mr. President, I hate to oppose any proposition in which my friend from Texas [Mr. SHEPPARD] is interested, but it does seem to me that this is one item in this bill that we can very well cut out at this time, at any rate.

I want to call attention to what the Senator from Iowa [Mr. KENYON] said, merely by way of emphasis.

We are not dealing in this amendment with the mouth of the Brazos River. We are not dealing with the situation that will be created when the project that was recommended by the engineers is completed. What we are dealing with is the improvement of the river from Old Washington to Waco.

Mr. SHEPPARD. Mr. President, I endeavored to show the desirability of connecting the port at the mouth of the Brazos with Waco by a barge line, and of enabling the interior of the State to utilize that port by means of the improvement of the Brazos River.

Mr. JONES. Oh, yes; I understood the purpose of the Senator. But, Mr. President, this appropriation will not make any connection that will be available for navigation. As a matter of fact, Congress has not yet approved or adopted the project that was recommended by the engineers. The engineers said that to get this depth of 3½ feet at certain times of the year

from Old Washington to Waco would require the building of eight locks and dams. It is expressly stated in the Engineers' report that Congress has never adopted this project. We have provided, however, for the construction of four locks and dams, and we have expended toward their completion something over a million dollars; and this appropriation is to be applied only upon the locks and dams that we have heretofore commenced constructing. They are not to begin upon any new locks and dams. So that even if the locks and dams which we have already commenced are finally completed, unless we take up the other four we will not have any navigation. We will not have any water-borne commerce.

Mr. SHEPPARD. Mr. President, I know the Senator would not intentionally misinform the Senate.

Mr. JONES. No; I would not. I just want the facts.

Mr. SHEPPARD. The examining engineer said that it would require eight locks and dams to secure this navigation from the mouth of the Brazos to Waco.

Mr. JONES. Oh, no; from Old Washington.

Mr. SHEPPARD. Well, from Old Washington to Waco.

Mr. JONES. Is that the mouth of the river?

Mr. SHEPPARD. That gives Waco connection with the mouth. The river is easily navigable from the mouth to Old Washington. No locks and dams are necessary between the mouth and Old Washington.

Mr. JONES. Oh, I understand that.

Mr. SHEPPARD. The river and harbor act of 1909 provided for a survey for the selection of sites for the additional locks and dams between Old Washington and Waco. At that time the work on Lock and Dam No. 1 had been begun. The survey was made, and the river and harbor act of 1910 carried an initial appropriation of $75,000 for Lock and Dam No. 8.

Mr. JONES. Yes.

Mr. SHEPPARD. If Congress provided for Lock and Dam No. 1 and Lock and Dam No. 8, and also provided for a survey to locate the intervening locks and dams, it certainly adopted the project.

Mr. JONES. Mr. President, the basis of my statement was this: In the report on the river and harbor bill in the House, submitted by Mr. SPARKMAN, it is said:

> This project has not been adopted as a whole——

Mr. SHEPPARD. That statement is evidently erroneous.

Mr. JONES. It goes on to say:

> But Lock and Dam No. 1 at Hidalgo Falls was authorized by the river and harbor act approved March 2, 1907; Lock and Dam No. 8 by the act approved June 25, 1910; and Locks and Dams Nos. 3 and 6 by the act approved July 25, 1912.

In other words, Congress has simply been making appropriations for different locks and dams within the limits of the project recommended by the engineers, but Congress itself has never yet finally adopted the entire project. Now, what the special reason was for adopting Lock No. 8, and beginning its construction before beginning the construction of Lock No. 6 or the other locks, I do not know; but the situation is just that way.

Mr. SHEPPARD. Mr. President, when the former Senator from Ohio, Mr. Burton, was conducting his famous filibuster against the river and harbor bill two years ago, he prepared a substitute containing those projects which evidently he deemed worthy, or he would not have included them in the substitute, and that substitute contained the following language:

> Improving Brazos River, Tex.: Continuing improvement from Old Washington to Waco by the construction of locks and dams heretofore authorized, $200,000.

The language of this clause shows that the project for locks and dams as outlined in the survey authorized in 1909 had been adopted, in the opinion of Mr. Burton. Furthermore, the fact that this clause was inserted by Mr. Burton shows that he considered the project worthy of prosecution. As a matter of fact, the present bill merely provides for beginning construction work on Locks and Dams Nos. 3 and 6, approved and authorized by the act of July 25, 1912, as quoted by the Senator from Washington [Mr. JONES].

Mr. JONES. While I have very great respect for the opinion of former Senator Burton, yet I take it that his judgment is not conclusive in matters of this character.

Mr. THOMAS. Mr. President, let me ask the Senator if his contention is not borne out by the fact that this bill makes provision for an instrumental survey of the Brazos River, and also for another survey, on pages 50 and 51, and whether that provision would have been made for a project which had been actually adopted by Congress?

Mr. JONES. I think that is true; and, as I understand from the Senator from Iowa [Mr. KENYON], provision was made in preceding bills for a resurvey of this river, the report upon which has not yet been submitted to Congress. If that is the case, then it seems to me that it is an added reason why we should leave out this appropriation.

We talk about the need for money and the need for economizing and the need for saving money. Here is an appropriation that will not accomplish anything unless this entire project is completed. We have directed a survey for the purpose of eliciting a further report to Congress. Why can we not very well just leave out this appropriation until we get the report on this survey, and then determine whether or not we are going to complete the project?

I do not say that this project ought not to be completed. I am not opposing the entire proposition. I am simply presenting the question upon the facts as they are now, as to whether or not we ought to put this item in the bill. The putting in of all of these eight locks may be a splendid thing, and I may be for it when the time comes to do that; but I do say that if we are going to do it, then we ought to do it just as quickly as possible. We have spent now over a million dollars on this project and it has not brought us one cent's worth of benefit.

Mr. SHEPPARD. It can not bring any benefit until the project is completed.

Mr. JONES. That is exactly it. If we are going to complete the project, we ought to provide for its completion, and instead of appropriating $200,000 here we ought to appropriate over a million dollars, which is necessary to put in every lock and dam that will make it available for navigation.

Mr. SHEPPARD. Then every other project the completion of which has not been provided for in this bill ought to go out also?

Mr. JONES. Yes; every one similarly situated, with the conditions the same as this, ought either to go out or provision ought to be made for its completion, one or the other. I am not saying that it ought to go out for the best interests of the Government, but it ought to go out or it ought to be completed, one or the other.

One of the sources of great waste in connection with river and harbor bills is that we commence a project which will cost a million or two million or three million dollars, and we dribble along year after year—I was going to say almost century after century—without appropriating the money that is necessary to complete it. The result is that it costs three or four times what it really would have cost had we in the beginning provided for it as we ought to have done.

That is the situation with reference to this proposition. If when the report on the survey comes in the engineers say that this project ought not to be completed, that it ought to be stopped, that the results will not be good, and Congress should accept that decision, then we will have wasted this $200,000 appropriation. If the report comes in and says it will be a good thing and we ought to do it, then we will have lost nothing. We can then make the appropriation, and, in my judgment, we should make an appropriation sufficient to complete the project, and complete it quickly.

We can lose nothing by cutting out this item. We may lose it all by leaving it in. It will not bring any good to commerce, becaused they say here, and the Senator has said, that there can be no commerce until the whole project recommended by the engineers is completed. Unless we are determined, notwithstanding any report that may come in on this new survey, that we are going to go on and complete this project, I say we ought to stop now and wait and see what that report is; and if we are determined to finish the work, let us appropriate whatever amount is necessary to construct every dam and get the commerce which will be developed from that project.

The VICE PRESIDENT. The question is on the amendment proposed by the Senator from Iowa.

Mr. KENYON. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. SHEPPARD. Mr. President, I do not think the exact form of the question is understood.

The VICE PRESIDENT. The question is on the amendment of the Senator from Iowa [Mr. KENYON] to strike out, on page 23, after line 20, the following words:

> Brazos River, Tex.: Continuing improvement from Old Washington to Waco by the construction of locks and dams heretofore authorized, $200,000.

The Secretary proceeded to call the roll.

Mr. DU PONT (when his name was called). I have a general pair with the junior Senator from Kentucky [Mr. BECKHAM]. In his absence, and not knowing how he would vote, I withhold my vote.

Mr. SAULSBURY (when his name was called). I transfer my pair with the junior Senator from Rhode Island [Mr. COLT]

to the junior Senator from Tennessee [Mr. SHIELDS] and vote "nay."

Mr. SMITH of Maryland (when his name was called). I have a general pair with the Senator from Vermont [Mr. DILLINGHAM]. In his absence, I withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER]. In his absence, I withhold my vote. If I were at liberty to vote, I should vote "yea."

Mr. UNDERWOOD (when his name was called). I have a pair with the junior Senator from Ohio [Mr. HARDING]. He is absent, so I withhold my vote.

Mr. WILLIAMS (when his name was called). I have a standing pair with the senior Senator from Pennsylvania [Mr. PENROSE], but I understand that I am at liberty to vote upon this particular amendment, and I vote "nay."

The roll call was concluded.

Mr. HITCHCOCK. On this vote I am paired with the Senator from New York [Mr. O'GORMAN]. If I were permitted to vote, I should vote "yea" and he would vote "nay."

Mr. UNDERWOOD. I transfer my pair with the junior Senator from Ohio [Mr. HARDING] to the junior Senator from California [Mr. PHELAN] and vote "nay."

Mr. MYERS. I have a pair with the Senator from Connecticut [Mr. MCLEAN] which, in his absence, I transfer to the Senator from Maryland [Mr. LEE], and vote "nay."

Mr. TILLMAN. I transfer my pair with the Senator from West Virginia [Mr. GOFF] to my colleague [Mr. SMITH of South Carolina] and vote "nay."

Mr. LIPPITT. I inquire if the Senator from Montana [Mr. WALSH] has voted?

The VICE PRESIDENT. He has not.

Mr. LIPPITT. As I have a pair with that Senator, I will withhold my vote.

Mr. SAULSBURY (after having voted in the negative). I transferred my pair with the Senator from Rhode Island [Mr. COLT] to the junior Senator from Tennessee [Mr. SHIELDS], who has since entered the Chamber and voted. I now transfer my pair to the junior Senator from New Jersey [Mr. HUGHES] and will allow my vote to stand.

Mr. TOWNSEND (after having voted in the affirmative). I have a pair with the junior Senator from Florida [Mr. BRYAN], but notwithstanding that I have voted because of an arrangement or understanding I had with him which permits me to do so.

Mr. HARDWICK (after having voted in the negative). I inquire if the Senator from Kansas [Mr. CURTIS] has voted?

The VICE PRESIDENT. He has not.

Mr. HARDWICK. I transfer my pair with the Senator from Kansas to the Senator from Arizona [Mr. SMITH] and will allow my vote in the negative to stand.

Mr. ASHURST. I rise to announce that my colleague [Mr. SMITH of Arizona] is unavoidably detained. He has been called to one of the departments on an important matter.

Mr. SMITH of Maryland. I transfer my pair with the Senator from Vermont [Mr. DILLINGHAM] to the Senator from Nevada [Mr. PITTMAN] and vote "nay."

Mr. GALLINGER. I have been requested to announce the following pairs:

The Senator from Maine [Mr. BURLEIGH] with the Senator from Arkansas [Mr. ROBINSON];

The Senator from North Dakota [Mr. GRONNA] with the Senator from Maine [Mr. JOHNSON]; and

The Senator from Massachusetts [Mr. WEEKS] with the Senator from Kentucky [Mr. JAMES].

The result was announced—yeas 28, nays 33, as follows:

YEAS—28.

Ashurst	Cummins	Kenyon	Smoot
Borah	Fall	Kern	Sterling
Brady	Gallinger	La Follette	Sutherland
Brandegee	Gore	Lodge	Taggart
Catron	Husting	Norris	Thompson
Clapp	Johnson, S. Dak.	Oliver	Townsend
Clark, Wyo.	Jones	Sherman	Wadsworth

NAYS—33.

Bankhead	Lea, Tenn.	Ransdell	Stone
Broussard	Lewis	Reed	Swanson
Chamberlain	Martin, Va.	Saulsbury	Tillman
Chilton	Martine, N. J.	Sheppard	Underwood
Clarke, Ark.	Myers	Shields	Vardaman
Culberson	Nelson	Simmons	Williams
Fletcher	Overman	Smith, Ga.	
Hardwick	Owen	Smith, Md.	
Lane	Poindexter	Smith, Mich.	

NOT VOTING—35.

Beckham	Dillingham	Hitchcock	Lee, Md.
Bryan	du Pont	Hollis	Lippitt
Burleigh	Goff	Hughes	McCumber
Colt	Gronna	James	McLean
Curtis	Harding	Johnson, Me.	Newlands
O'Gorman	Pittman	Smith, Ariz.	Warren
Page	Pomerene	Smith, S. C.	Weeks
Penrose	Robinson	Thomas	Works
Phelan	Shafroth	Walsh	

So Mr. KENYON's amendment was rejected.

Mr. CLARKE of Arkansas. Mr. President, I desire to say that it will be impossible to dispose of any other item in the bill this afternoon, and I ask that it be laid aside until 12 o'clock to-morrow.

I move that when the Senate takes a recess this afternoon it be until 12 o'clock to-morrow. There will be a meeting of the Committee on Commerce to-morrow morning, and that is the reason why I make the request.

The VICE PRESIDENT. Is there objection to the motion of the Senator from Arkansas? The Chair hears none, and it is agreed to.

MESSAGE FROM THE HOUSE.

A message from the House of Representatives, by J. C. South, its Chief Clerk, announced that the House had passed a bill (H. R. 9533) to provide a civil government for Porto Rico, and for other purposes, in which it requested the concurrence of the Senate.

ENROLLED BILLS AND JOINT RESOLUTION SIGNED.

The message also announced that the Speaker of the House had signed the following enrolled bills and joint resolution, and they were thereupon signed by the Vice President:

H. R. 10490. An act to prevent fraudulent advertising in the District of Columbia;

H. R. 12027. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war;

H. R. 12766. An act for making further and more effectual provision for the national defense, and for other purposes;

H. R. 14771. An act granting the consent of Congress to commissioners of Charlton County, Ga., and Nassau County, Fla., to construct a bridge across the St. Marys River; and

S. J. Res. 72. Joint resolution to provide for holding the Texas Bicentennial and Pan American Exposition in 1918.

PETITIONS AND MEMORIALS.

Mr. PHELAN presented a petition of the Brotherhood of St. Andrew of Los Angeles, Cal., praying for the enactment of legislation to prohibit interstate commerce in the products of child labor, which was ordered to lie on the table.

He also presented a memorial of sundry citizens of Sawtelle, Cal., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

Mr. COLT presented a petition of sundry citizens of Warren, R. I., praying for national prohibition, which was referred to the Committee on the Judiciary.

Mr. DU PONT presented petitions of sundry citizens of Wyoming, Harrington, and Port Penn, all in the State of Delaware, praying for prohibition in the District of Columbia, which were ordered to lie on the table.

Mr. GALLINGER presented a petition of the Chamber of Commerce of Boston, Mass., praying for the enactment of legislation to provide for the grading of grain, which was ordered to lie on the table.

Mr. WADSWORTH presented a memorial of sundry citizens of Buffalo, N. Y., remonstrating against sectarian appropriations, which was ordered to lie on the table.

He also presented memorials of sundry citizens of New York, remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which were ordered to lie on the table.

Mr. MYERS presented a petition of the Montana Branch of the Parent-Teacher Association, praying for the enactment of legislation to provide expeditious adjudication of pending State selections of school lands, which was referred to the Committee on Public Lands.

He also presented a petition of the Commercial Club of Terry, Mont., praying for the settlement of disputes between railroads and their employees by arbitration, which was referred to the Committee on Interstate Commerce.

Mr. THOMPSON presented a petition of the Commercial Club of Manhattan, Kans., praying for the establishment of engineering experiment stations in connection with land-grant colleges, which was referred to the Committee on Agriculture and Forestry.

He also presented a memorial of sundry citizens of Emporia, Kans., remonstrating against any further appropriations for the enforcement of the migratory-bird law, which was ordered to lie on the table.

He also presented a petition of the Rotary Club of Leavenworth, Kans., praying for the passage of the so-called Shields water-power bill, which was ordered to lie on the table.

Mr. TOWNSEND presented memorials of 960 farmers of Michigan, remonstrating against the enactment of legislation to prohibit interstate commerce in convict-made goods, which were ordered to lie on the table.

He also presented a memorial of sundry citizens of Jackson, Mich., remonstrating against the enactment of legislation to limit the freedom of the press, which was ordered to lie on the table.

He also presented a memorial of sundry citizens of Sebewaing, Mich., remonstrating against the action of Great Britain in prohibiting the sending of Red Cross supplies to Germany, which was referred to the Committee on Foreign Relations.

He also presented a memorial of the Board of Commerce of Detroit, Mich., remonstrating against the enactment of legislation to prohibit the use of stop-watch and labor-measuring devices in Government arsenals, which was referred to the Committee on Military Affairs.

Mr. LIPPITT presented a petition of 22 citizens of Providence, R. I., praying for national prohibition, which was referred to the Committee on the Judiciary.

REPORTS OF COMMITTEES.

Mr. SMITH of Maryland, from the Committee on the District of Columbia, to which was referred the bill (S. 5344) for the regulation of the practice of podiatry in the District of Columbia and for the protection of the people from empiricism in relation thereto, reported it without amendment and submitted a report (No. 480) thereon.

Mr. OWEN, from the Committee on Banking and Currency, to which was referred the bill (H. R. 13391) to amend the act approved December 23, 1913, known as the Federal reserve act by adding a new section, reported it with amendments and submitted a report (No. 481) thereon.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. COLT:

A bill (S. 6137) granting a pension to Mary E. Gilbert; to the Committee on Pensions.

By Mr. SHAFROTH:

A bill (S. 6138) granting an increase of pension to Hugh O. Neville;

A bill (S. 6139) granting an increase of pension to Charles Apple;

A bill (S. 6140) granting an increase of pension to Adolphus B. Capron; and

A bill (S. 6141) granting an increase of pension to Madeline A. Rowell (with accompanying papers); to the Committee on Pensions.

By Mr. LODGE:

A bill (S. 6142) granting an increase of pension to Eliza M. Flint (with accompanying papers); to the Committee on Pensions.

By Mr. MARTIN of Virginia:

A bill (S. 6143) granting a pension to David Noe; to the Committee on Pensions.

By Mr. DU PONT:

A bill (S. 6144) granting an increase of pension to Lydia C. Stevenson;

A bill (S. 6145) granting an increase of pension to Alexander Farris, jr.; and

A bill (S. 6146) granting an increase of pension to George L. Wait Wiltbank, alias George L. Wait; to the Committee on Pensions.

By Mr. HUGHES:

A bill (S. 6147) fixing the compensation of inspectors of customs, and for other purposes; to the Committee on Finance.

By Mr. GALLINGER:

A bill (S. 6148) to establish a horse-breeding station in the State of New Hampshire; to the Committee on Agriculture and Forestry.

By Mr. OLIVER:

A bill (S. 6149) for the relief of the McClintic-Marshall Construction Co.; to the Committee on Claims.

By Mr. KENYON:

A bill (S. 6150) granting an increase of pension to Daniel A. Ray;

A bill (S. 6151) granting an increase of pension to George Ellars; and

A bill (S. 6152) granting an increase of pension to Charles Blitz (with accompanying papers); to the Committee on Pensions.

By Mr. LA FOLLETTE:

A joint resolution (S. J. Res. 134) requesting the President to invite the Governments of Japan and China to join in the formation of an international commission to study the questions at issue between the Orient and the United States; to the Committee on Foreign Relations.

AMENDMENTS TO APPROPRIATION BILLS.

Mr. FLETCHER submitted an amendment proposing to investigate the grading, weighing, handling, and transportation of naval stores, the preparation of definite type samples thereof, and for the demonstration of improved methods or processes of preparing naval stores, etc., intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was ordered to lie on the table and be printed.

Mr. ASHURST submitted an amendment proposing to appropriate $100,000 for the elimination and eradication of the purple loco weed, the white loco weed, and other poisonous leguminous weeds in Arizona, etc., intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was ordered to lie on the table and be printed.

Mr. LODGE submitted an amendment proposing to appropriate $15,000 to enable the Secretary of Agriculture to cooperate with and make an exhibit at the next annual meeting of the National Dairy Show Association to be held at Springfield, Mass., during the fiscal year ending June 30, 1917, intended to be proposed by him to the Agricultural appropriation bill (H. R. 12717), which was ordered to lie on the table and be printed.

Mr. SMITH of Maryland submitted an amendment proposing to appropriate $16,000 for the improvement of New Hampshire Avenue NW., from Grant Circle to Oregon Avenue, in the District of Columbia, intended to be proposed by him to the District of Columbia appropriation bill (H. R. 15774), which was referred to the Committee on Appropriations and ordered to be printed.

THE COLUMBIA RIVER HIGHWAY.

Mr. CHAMBERLAIN. Mr. President, through the enterprise of the people of Oregon a magnificent scenic highway has been constructed along the south bank of the Columbia River from Astoria to The Dalles, a distance of more than 200 miles. The construction of this highway has involved an immense expenditure, contributed by the State and its citizens. World travelers declare this to be the greatest road ever built to meet the conditions of modern traffic. Gen. George W. Goethals, in speaking of it, said: "It is a splendid job of engineering and absolutely without equal for scenic interest in America." Other distinguished engineers have spoken of this great highway in the same complimentary terms.

Many thousands of our citizens will visit the Pacific coast during the present season as a part of their vacation and will have an opportunity to pass over and along one of the most beautiful rivers of the country. The changes which have come to the West since President Thomas Jefferson sent his confidential message to Congress that resulted in the sending of Lewis and Clark into the unexplored regions beyond the Rocky Mountains and down the Columbia River to the Pacific is truly wonderful; the land which President Jefferson spoke of as "That vast and fertile country which their sons are determined to fill with arts, with science, with freedom, and with happiness."

The governor of the State has set apart Wednesday, June 7, 1916, as a day for celebrating the formal opening of the Columbia River Highway, and the people of the State of Oregon are anxious to have an invitation extended to those mentioned in the resolution which I send to the desk and for which I ask that unanimous consent be given for its present consideration.

The VICE PRESIDENT. The Secretary will read the resolution.

The resolution (S. Res. 200) was read, as follows:

Whereas the people of Oregon have constructed a great highway, which extends from the wheat fields of eastern Oregon, "the Inland Empire," to the Pacific coast, passing through the Cascade Range and the Gorge of the Columbia; and

Whereas the Columbia River Highway is declared by world travelers to be the greatest road ever built to meet the conditions of modern traffic; and

Whereas the governor of the State of Oregon has declared Wednesday, June 7, to be the day set aside for celebrating its formal opening: Therefore be it

Resolved, That the President of the United States be, and he is hereby, authorized and respectfully requested, in such manner as he may deem proper, to invite the diplomatic representatives of foreign Governments with embassies or legations in Washington, D. C., to participate in celebrating this historic event.

The VICE PRESIDENT. Is there objection to the present consideration of the resolution?

The resolution was considered by unanimous consent and agreed to.

MR. SMOOT'S SUPPLEMENTAL RESOLUTION.

Mr. SMOOT. In order that there may be no question regarding appropriations to be made hereafter to pay the expenses of delegates to this celebration, I submit the following, and ask for its adoption.

The Secretary read the resolution (S. Res. 201) as follows:

Resolved, That no appropriation shall be granted at any time hereafter in connection with the celebration of the formal opening of the Columbia River Highway, to be held Wednesday, June 7, 1916.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the resolution is agreed to.

THE COASTWISE TRADE.

Mr. NEWLANDS. I ask to have printed as a public document the report of the Interstate Commerce Commission relative to corporate interests of railroads in vessels or steamship lines engaged in transporting freight between Atlantic and Pacific ports and in the coastwise trade of the United States. The cost, I will say, will be $92.26, according to the estimate of the Public Printer.

The VICE PRESIDENT. Is there objection to the request of the Senator from Nevada?

Mr. SMOOT. I object.

Mr. NEWLANDS. Then, I ask that the document be referred to the Committee on Printing, with a view to its publication.

The VICE PRESIDENT. Without objection, it is so ordered.

EXPERIMENT STATIONS IN ENGINEERING (S. DOC. NO. 446).

Mr. NEWLANDS. I ask unanimous consent to have printed as a public document certain correspondence, being a letter from Dr. W. R. Whitney, chairman of the committee on chemistry and physics of the United States Naval Consulting Board, and a circular letter dated April 29, 1916, written by Dr. Whitney, to various citizens throughout the country, extracts from replies of these gentlemen to Dr. Whitney, together with certain other matter relative to Senate bill 4874, proposing to establish experiment stations in engineering in State colleges of agriculture and the mechanic arts. The document will comprise about 40 pages and the cost will not be very much.

The VICE PRESIDENT. Without objection, it is so ordered.

RURAL CREDITS.

Mr. OWEN. I find that five conferees have been appointed on the part of the House on the rural-credits bill (S. 2986), and I ask that there may be added to the Senate conferees the Senator from North Dakota [Mr. GRONNA] and the Senator from Florida [Mr. FLETCHER].

The VICE PRESIDENT. Without objection, it is so ordered.

HOUSE BILL REFERRED.

H. R. 9533. An act to provide a civil government for Porto Rico, and for other purposes, was read twice by its title and referred to the Committee on Pacific Islands and Porto Rico.

EXECUTIVE SESSION.

Mr. STONE. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After 27 minutes spent in executive session the doors were reopened, and (at 5 o'clock and 25 minutes p. m., Wednesday, May 24, 1916) the Senate took a recess until to-morrow, Thursday, May 25, 1916, at 12 o'clock m.

CONFIRMATIONS.

Executive nominations confirmed by the Senate May 24 (legislative day of May 18), 1916.

PROMOTION IN THE ARMY.

MEDICAL CORPS.

Maj. William O. Owen, retired, to the grade of colonel in the Medical Corps, with rank from April 12, 1912.

JUDGE CIRCUIT COURT OF HAWAII.

James Wesley Thompson to be judge of the Circuit Court of the Third Circuit of the Territory of Hawaii.

POSTMASTERS.

CALIFORNIA.

Charles F. Evers, Fortuna.

KENTUCKY.

Nannie E. Butler, Elkton.
John R. White, Irvine.

LOUISIANA.

Albert Nunez, Arabi.
Lou E. Russell, West Monroe.

MISSOURI.

Thomas F. Benson, Sturgeon.
Hevner F. Hoover, Hardin.

NEW YORK.

Richard F. Hayes, Ticonderoga.
Florence L. Johnson, Elmsford.
John Lemmon, Churchville.
Timothy D. Mulcahy, Lawrence.
Benjamin B. Tooker, Center Moriches.
Wilber W. Wilcox, Lacona.

SOUTH DAKOTA.

D. C. Campbell, Wolsey.
G. A. Miller, Conde.
Frank E. Riley, Dupree.

HOUSE OF REPRESENTATIVES.

WEDNESDAY, *May 24, 1916.*

The House met at 11 o'clock a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

With profound faith and confidence in Thee, O God our heavenly Father, as the most potent factor in the affairs of men and of nations, we come to Thee in the fervency of prayer that we may feel sweeping through our souls Thy holy influence to guide us in all our transactions, that we may think well, act well our part in the affairs of life, and pass on our way rejoicing as integral parts of the great eternal plan; and Thine be the praise, through Him who taught us faith, hope, love. Amen.

The Journal of the proceedings of yesterday was read and approved.

LEAVE TO EXTEND REMARKS.

Mr. BORLAND. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD on the subject of the oil and gasoline situation.

The SPEAKER. The gentleman from Missouri [Mr. BORLAND] asks unanimous consent to extend his remarks in the RECORD on the subject of gasoline, and so forth. Is there objection?

There was no objection.

NAVAL APPROPRIATIONS.

Mr. PADGETT, from the Committee on Naval Affairs, reported the bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes, which was read a first and second time, referred to the Committee of the Whole House on the state of the Union, and, with the accompanying report (No. 743), ordered to be printed.

Mr. BUTLER. Mr. Speaker, I reserve all points of order.

The SPEAKER. The gentleman from Pennsylvania reserves all points of order.

Mr. PADGETT. Mr. Speaker, at the request of the minority I ask that they have until to-morrow to submit their views.

Mr. BUTLER. Until 12 o'clock.

Mr. PADGETT. You may have all day.

The SPEAKER. The gentleman from Tennessee asks unanimous consent that the minority have until to-morrow night to file their views. Is there objection?

There was no objection.

OREGON & CALIFORNIA RAILROAD LAND GRANT.

The SPEAKER. There is a special order for to-day, the California-Oregon Railroad land bill, H. R. 14864.

Mr. FERRIS. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the state of the Union for the consideration of H. R. 14864; and pending that I want to see if we can agree with the gentleman from Wisconsin [Mr. LENROOT] for time. Would two hours be agreeable for general debate?

Mr. LENROOT. I have applications for two hours on this side without using any time myself. I had hoped we might agree upon two hours on a side.

Mr. MANN. Why does not the gentleman let it run along? Both sides want to finish the bill to-day. I do not think there will be any difficulty about it.

Mr. FERRIS. I have no desire to cut anyone off. I know the Members from Oregon want to speak on this. It is a matter that is very vital to them. Of course, the gentleman from Wisconsin and the gentlemen from Oregon know that we practically must get through with this bill to-day. It is wedged in here between appropriation bills, and I think we ought to finish it.

Mr. MANN. I ask unanimous consent that the time for general debate be equally divided between the two gentlemen.

Mr. LENROOT. May I suggest to the gentleman from Oklahoma that we agree on not exceeding three hours. We will cut it down as much as possible.

Mr. FERRIS. I accept that suggestion. There is a disposition on the part of all of us to get this bill through. It is absolutely essential that we do so.

The SPEAKER. The gentleman from Oklahoma asks unanimous consent that the general debate be confined to not exceeding three hours—one-half the time to be controlled by himself and one-half by the gentleman from Wisconsin [Mr. LENROOT]. Is there objection?

There was no objection.

The motion of Mr. FERRIS was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the state of the Union for the consideration of the bill (H. R. 14864) to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon," approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon," approved May 4, 1870, and for other purposes, with Mr. GARD in the chair.

Mr. FERRIS. Mr. Chairman and gentlemen, I shall make only a short statement concerning this bill, expecting to consider it more in detail under the five-minute rule, where legislation of this kind is usually perfected and made. I think it is very proper and very necessary, however, that the House know something about what we are doing and something about what this bill is and what we propose to do.

By the acts of 1866, 1869, and 1870 Congress granted about 3,200,000 acres of land to the Oregon & California Railroad Co. upon five conditions. I will strip it of all details and get right down to the heart of the matter. The conditions were (1) that they should build the railroad, (2) that they should carry the Federal troops without charge, (3) that they should sell the land for a price not greater than $2.50 an acre, (4) to actual settlers, (5) in 160-acre tracts.

This occurred about 50 years ago. The act of 1866 was passed just 50 years ago, but there were two acts passed later, in 1869 and 1870, extending the time to build the railroad.

Mr. McCRACKEN. Within what limit of time was the railroad to be constructed?

Mr. FERRIS. There were two or three different lines. One was from Portland south to the California line, and one was from Portland or Astoria to McMinnville. In all, there were two or three different lines to be built. The latter road was not built.

Mr. McCRACKEN. Were those lines specified in the grants?

Mr. FERRIS. They were specified, where the road was to be built, and there was a grant of alternate sections for 20 miles on either side of the proposed railroads.

Mr. CANNON. All in Oregon?

Mr. FERRIS. A little of the land is in Washington, but practically all in Oregon, a very small part in Washington. I think only 150 acres.

The railroads were transferred from one concern to another, but finally they were built; not all of them, but where the railroads were not built the land was not granted. As time went along the railway people came before the Interior Department and got patents to the land, for these alternate sections, the patents, of course, containing these conditions, limitations, and restrictions.

For a time the railroad sold these lands at two and a half dollars an acre to actual settlers and in tracts of 160 acres in compliance with the grant; this was only covering a period of a few years. Then they totally abandoned these three conditions, paying no attention to them whatever. For example, they would sell 40,000 acres to a single lumber concern or to a citizen for a price of forty or fifty or sixty dollars an acre or any amount that they could get for the land. This went along in that way until 1908. In 1908 the Department of Justice, through a Mr. Townsend, who then had charge of this matter, began to complain that the railroad was not complying with the terms of the grant; that it was not selling the land for $2.50 an acre; that it was not selling the land to actual settlers or in tracts of 160 acres; and, in fact, was not selling it at all, but was holding it for speculation. The gentleman from Wyoming [Mr. MONDELL] was then the chairman of the Committee on the Public Lands. I was a member of the committee at that time. We reported and passed a joint resolution in 1908 in response to that appeal from the Oregon people authorizing and directing the Department of Justice to bring suit and cancel this land grant because of breach of the conditions of the grant itself. The Attorney General did bring suit, tried it, and carried it to the Supreme Court of the United States. A decision was entered December 9, 1915, granting an injunction for six months and virtually passing the whole matter up to Congress for appropriate action and disposition. That occasioned this bill and its presentation here to-day. The lower court, the trial court, Judge Wolverton, held a complete forfeiture of these lands to the Government by reason of the breach. On appeal the Supreme Court did not in all things affirm that decision, but did this: They granted an injunction for six months, a temporary injunction, during which time they passed the proposition up to Congress for Congress to take such action as it saw fitting. I think that is the language they used. The Department of Justice, acting in conjunction with Senator CHAMBERLAIN at the other end of the Capitol, drafted a bill dealing with this matter.

Mr. ALEXANDER. Will the gentleman yield?

Mr. FERRIS. Yes.

Mr. ALEXANDER. What did the Supreme Court hold with reference to these lands?

Mr. FERRIS. It is a very long decision and a very unique one, but in substance the Supreme Court held that these lands as they were being operated tended more to speculation than to settlement, and for that reason they granted an injunction against the sale or disposition of any of the lands or timber for six months, during which time Congress should take such action as it saw fit, further saying that we should give the railroad company, now the Southern Pacific, all that they were entitled to under the grant, intimating that that was $2.50 an acre. The Department of Justice and your committee so interpreted it and do so interpret it.

Mr. McARTHUR. Mr. Chairman, will not the gentleman explain to the members of the committee about this being an enforceable covenant?

Mr. FERRIS. I have just stated that the court did not hold a complete forfeiture, but said that the procedure under which the lands were being disposed of tended more to speculation than to settlement, and they therefore granted a temporary injunction for six months, during which time Congress should take such action as it saw fit.

Mr. BUTLER. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. BUTLER. How much land was conveyed by the Government to this railroad company?

Mr. FERRIS. Three million two hundred thousand acres.

Mr. BUTLER. How much land was disposed of?

Mr. FERRIS. About 800,000 acres was sold by the railway company, most of which in total violation of the terms of the grant.

Mr. BUTLER. And the balance of the land remains in the possession of the railroad company?

Mr. FERRIS. That is true; and we are seeking to recover it for the Government.

Mr. BORLAND. Do I understand that the decision of the Supreme Court leaves the title still in the railroad company?

Mr. FERRIS. Yes; it does not decree a complete forfeiture, but it authorizes Congress to deal with it as they shall determine proper under the circumstances.

Mr. BORLAND. How can Congress, by legislation, divest that title if it is still in the railroad?

Mr. FERRIS. The Supreme Court holds that Congress has authority to dispose of it, and therefore it has the power to resume title and appropriately deal with the matter. It should be remembered that the right of Congress to alter, amend, or repeal this act is also reserved in the law.

Mr. BORLAND. Will the gentleman put in the RECORD the Supreme Court decision?

Mr. FERRIS. I have it here. It is a part of the report.

Mr. BUTLER. Was it held to be a condition between the railroad company and the Government?

Mr. FERRIS. No; it does not hold that. It held that the title vested, but it is held to be an enforceable covenant, to which

the railroad company did not adhere. After stating the facts at great length, this is what the court said:

This, then, being the situation resulting from conditions now existing, incident, it may be, to the prolonged disregard of the covenants by the railroad company, the lands invite now more to speculation than to settlement, and we think, therefore, that the railroad company should not only be enjoined from sales in violation of the covenants but enjoined from any disposition of them whatever or of the timber thereon, and from cutting or authorizing the cutting or removal of any of the timber thereon, until Congress shall have a reasonable opportunity to provide by legislation for their disposition in accordance with such policy as it may deem fitting under the circumstances and at the same time secure to the defendants all the value the granting acts conferred upon the railroads.

If Congress does not make such provision, the defendants may apply to the district court within a reasonable time, not less than six months from the entry of the decree herein—

I might pause long enough here to say that that decree was entered December 9 last, and that the six months' period expires the coming 9th of June—

for a modification of so much of the injunction herein ordered as enjoins any disposition of the lands and timber until Congress shall act, and the court in its discretion may modify the decree accordingly.

Mr. BOOHER. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. BOOHER. The opinion of the court held that the conditions attaching to that grant were not a part of the grant, did it not?

Mr. FERRIS. I think not. Oh, no; the gentleman is in error about that. That was the contention of the railway and also some of the claimants, but the court held no such thing.

Mr. BOOHER. Did it not hold that it was simply an agreement on the part of the railroad company to do certain things?

Mr. FERRIS. No. That is the contention of certain gentlemen; but that is not a fair construction of the decision, nor is that the construction placed upon it by the Department of Justice.

Mr. BOOHER. I call the gentleman's attention to that because I saw a full-page advertisement in the newspapers stating that.

Mr. FERRIS. That is true; and I may say to the gentleman that that eleventh page in the Post was put in by one S. A. D. Puter, who had gone about the country selling these lands, that never belonged to him and for which numerous prosecutions have already been had and indictments and sentence served by quite a number of them.

Mr. BUTLER. Mr. Chairman, I will ask the gentleman what this land is worth on an average?

Mr. FERRIS. I think I can answer the gentleman fairly well. A stipulation was filed by the parties to the suit, agreeing to certain facts, in the Supreme Court, by the Department of Justice on one side and the Southern Pacific on the other, to the effect that the lands were worth upward of $30,000,000—that is, the timber and the land.

That has been corroborated by the Agricultural Department which sent cruisers out who say it is worth $50,000,000. The Department of Justice also made some extended investigation of the lands to ascertain their value.

Mr. BUTLER. And we propose to pay a million and a half for it?

Mr. FERRIS. We propose to give the railroad what the Supreme Court says we have to give them, which I think will be $2.50 per acre, of course, claiming an offset for the some $5,000,000 they have already had.

Mr. BUTLER. The Government gets back at least a million and a half?

Mr. CANNON. It is $2.50 an acre?

Mr. FERRIS. $2.50——

Mr. FESS. Will the gentleman yield?

Mr. FERRIS. I will.

Mr. FESS. I am trying to get information about it. I understand the company was to build a railroad. Was that railroad built?

Mr. FERRIS. Most of it. I think they provided one line of it.

Mr. FESS. The conditions upon which it was to be built have not been abided by?

Mr. FERRIS. They have not adhered to them and that was tried out in the Supreme Court.

Mr. MEEKER. Mr. Chairman, might I inquire what question the gentleman asked?

The CHAIRMAN. Will the gentleman kindly repeat his answer?

Mr. FOSTER. Will the gentleman yield?

Mr. FERRIS. I yield to the gentleman from Illinois.

Mr. FOSTER. As I understand from this bill, it provides 40 per cent shall go to the reclamation fund——

Mr. FERRIS. That is true.

Mr. FOSTER. And 20 per cent to schools and 30 per cent to building roads.

Mr. FERRIS. That is true.

Mr. FOSTER. So I understand from this bill that at least 10 per cent is supposed to go into the Federal Treasury after the Government has paid all these expenses.

Mr. FERRIS. Yes; but that does not quite state it all. Of course the 40 per cent that goes to the reclamation fund finally comes back to the Treasury. It is a revolving fund, and is only loaned to the settlers to irrigate with. That is not lost to the Government. If it was public land, under the law it would all go to the reclamation fund.

Mr. FOSTER. That is, it theoretically comes back.

Mr. FERRIS. Under the law it does come back. There is no theory about that. The Government takes mortgages on the land, which will enforce the repayment of this and all other funds.

Mr. FOSTER. Theoretically it does. Now, the Government practically gets nothing out of this.

Mr. FERRIS. Yes; 10 per cent on $30,000,000 is $3,000,000, and 10 per cent on $50,000,000 would be $5,000,000, so there would go into the Treasury at once, if the land is worth $50,000,000, $5,000,000.

Mr. FOSTER. But the Government under this bill has to pay back to the State of Oregon——

Mr. FESS. But all of that is taken out of the lump sum. The Government gets 10 per cent of the net after the Government has in all things been reimbursed.

Mr. FOSTER. How do they sell this land?

Mr. FERRIS. It provides it shall be sold immediately either for cash or in 10 installments, so they will have the money in 10 years.

Mr. FOSTER. Then it is the intention of the Government to immediately sell the timber?

Mr. FERRIS. The bill provides it shall be done.

Mr. FOSTER. Does the gentleman think that is a good policy for the Government to pursue right at this time?

Mr. FERRIS. Yes; I do, for this reason: In the first place, there is the contention made that seems to have considerable color, and appealed to the committee and to the Department of Justice a good deal, and that is that the railroad is entitled to have these lands settled within a reasonable time, and it was our thought that if we put these lands in forest reserves or made them anything like a Federal reserve, then that might involve the Government's rights, in the face of the Supreme Court decision. You see, the decision provides the railway is entitled to all the benefits of the grant, and we wanted to keep clearly within the decision.

Mr. FOSTER. How much timber is estimated to be on these lands?

Mr. FERRIS. The stipulation filed in the Supreme Court by the litigant parties was that there were upward of $30,000,000. The Department of Agriculture——

Mr. FOSTER. I asked how much timber.

Mr. FERRIS. I am speaking of the timber; and the Department of Agriculture estimates it to be worth $50,000,000.

Mr. LENROOT. It is about 40,000,000,000 feet.

Mr. FERRIS. Oh, the gentleman meant feet. About 40,000,000,000 feet. I thought the gentleman from Illinois wanted it in dollars.

Mr. FOSTER. So this bill will compel the Government to sell this 40,000,000,000 feet of lumber immediately?

Mr. FERRIS. Well, it is well safeguarded. It has the rights of the Government hedged about in every way. Nothing can be lost.

Mr. FOSTER. Does not the gentleman think to force a sale of 40,000,000,000 feet of lumber is not a good thing?

Mr. LENROOT. Will the gentleman yield?

Mr. FERRIS. I yield to the gentleman.

Mr. LENROOT. The gentleman will remember that there is a provision in the bill providing that this timber shall be sold as rapidly as reasonable prices can be obtained, based upon normal conditions.

Mr. FERRIS. We do not dump it on the market, but we authorize the Secretary to reject any bid that may come, and we make a provision for the appraisement and classification of these lands before they are sold at all, and we provide for a reclassification in the event one is needed.

Mr. BUTLER. Will the gentleman yield?

Mr. FERRIS. I will.

Mr. BUTLER. It has been 50 years since this grant was made?

Mr. FERRIS. Yes.

Mr. BUTLER. When did the railroad company cease to sell these lands, except in large pieces, of which the gentleman has spoken?

Mr. FERRIS. They have been selling them right up until recently. Of course, they have sold none since the decision, for it specifically enjoins any disposition of them.

Mr. BUTLER. Tell me whose effort is this; is it by the Government?

Mr. FERRIS. The gentleman did not hear my first statement.

Mr. BUTLER. I am very sorry. I was called to the door. I am always glad to hear the gentleman.

Mr. FERRIS. It was alleged that some of this land was being sold in total disregard of these conditions, and citizens of Oregon and the Department of Justice came before the Committee on the Public Lands in 1908 and, in response to the request of the Department of Justice, we passed a joint resolution, which I have in my hand, providing, authorizing, and directing the Department of Justice immediately to institute proceedings to recoup these lands and recover by reason of a breach of the terms of the grant.

Mr. BUTLER. Really, the State of Oregon initiated this?

Mr. FERRIS. The State of Oregon and the Department of Justice together. They came before us, too.

Mr. STAFFORD. Will the gentleman yield?

Mr. FERRIS. Yes.

Mr. STAFFORD. Does this bill clear up all litigated questions concerning the land involved in the original land grant?

Mr. FERRIS. We authorize a suit to be brought for an accounting cleaning up all differences, which we think will bring that about.

Mr. STAFFORD. Are there not some lands that will still be in dispute that will not be adjudicated under this bill or the provisions of this bill?

Mr. FERRIS. That may be. We only deal with the unsold land. There are some 15,000 people who have been duped and gold-bricked all over the United States. And the Supreme Court held they had no right. But there are certain other people who have bought lands in violation of the grant. We thought if we got back $40,000,000 or $50,000,000 worth of timber for the Government on unsold land that was probably as big a job as we ought to tackle at one time here. There will probably be some additional requests from the so-called executory contract class, but they are not on all fours with this class and do not really belong on this bill.

Mr. STAFFORD. There has been considerable mention in the public press about the interests of a former member of this House, a former governor of the State of Minnesota, who had large interests involved. I wish to know whether any provision in this bill covers those lands in which he is interested?

Mr. FERRIS. There is not.

Mr. STAFFORD. They are still in dispute?

Mr. FERRIS. Unless they can be settled in this provision in this bill for an accounting in this bill that we are presenting. We do not deal with that in this bill. We leave that question alone for the present. I do not think it belongs here at all.

Mr. STAFFORD. Will that be a matter for subsequent legislation?

Mr. FERRIS. It may be, or a matter for subsequent litigation. I do not know which. I will say to the gentleman from Wisconsin that when we tried to put this bill through everybody came in with every claim they ever had. They wanted everything adjusted on this bill. I wanted to bring to this House something that was easy to understand, something that was easy to accomplish. We have a bill here that is easy to understand, and by which it is easy to tell what we are trying to do with this 2,300,000 acres of land. The House can readily understand the numerous complications that would come in as to land that had been sold even outside of the terms of the grant. It is also true that most of them are confirmed by an act of Congress, anyway, passed in 1912. We are now dealing with the lands that are unsold. Gov. Lind came before the committee in a very frank and honest way, urging the committee to deal with his proposition. I do not say it is not sound, but I do say that this bill shall not be made a vehicle for everybody's scheme and everybody's trouble that happens to come along. If we had brought it in here cumbered by a lot of details, the House would probably have gone off debating some side issue and let the real prize of 2,300,000 acres get away.

Mr. BUTLER. What will become of the titles granted to purchasers prior to the institutions of proceedings in the court to restrain the company? The company was authorized to sell the land?

Mr. FERRIS. But on condition. They did not adhere to the conditions. Some of the lands had been conferred by special act of Congress passed in 1912.

Mr. BUTLER. The railroad company did not adhere to the conditions?

Mr. FERRIS. They totally ignored them.

Mr. BUTLER. I heard the conditions which the gentleman stated, coupled with this grant. Which of those conditions would involve the title?

Mr. FERRIS. The Supreme Court has just held——

Mr. BUTLER. I have not read the decision of the Supreme Court. You can not read everything. We depend on gentlemen like yourself, gentlemen who are well informed——

Mr. FERRIS. That is very good of the gentleman to say that. We are trying to do our best in this matter.

Mr. BUTLER. If I did not have to vote on the bill, I would not ask that question.

Mr. FERRIS. I am glad the gentleman asked the question.

Mr. STEPHENS of Texas. If this bill is passed, how much land becomes taxable to the State of Oregon? What benefit will it be to the State of Oregon? A complaint that has been made is this, that the land has been locked up and is not taxable, and it makes a great burden on the people of the State. I want to know if it will release that land so that it will become taxable for the benefit of the State?

Mr. FERRIS. Of course, the citizens of Oregon have been taxing this land while it was in the hands of the railways, and have been receiving taxes for it; so that there is a view in Oregon that these lands ought not to be taken back by the Government, because they will lose the taxes. I feel that is hardly a sound theory, because if the Government has the right under the Supreme Court decision to take $50,000,000 worth of property, it is easy to dispose of the land so that some community can tax it. This bill authorizes the timber to be sold and get all that we can for it. It then automatically authorizes the land, after the timber is cut and removed, to be homesteaded and passed on to the tax rolls and into private ownership along the line of the suggestion of the gentleman from Texas [Mr. STEPHENS].

Mr. STEPHENS of Texas. As I understand, under the present homestead laws of the United States.

Mr. FERRIS. With some modification.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. FERRIS. I will.

Mr. JOHNSON of Washington. The timber on the land is to be sold in large quantities?

Mr. FERRIS. In 40-acre tracts or multiples thereof.

Mr. JOHNSON of Washington. In large quantities?

Mr. FERRIS. Within the discretion of the two departments, the Department of Agriculture and the Department of the Interior.

Mr. JOHNSON of Washington. And the cut-over land is to be offered to homesteaders?

Mr. FERRIS. That is true. The land that is not timbered can be homesteaded now at $2.50 an acre.

Mr. JOHNSON of Washington. The gentleman stated that the people of Oregon have been homesteading the land, but the county had been receiving no taxes since this litigation commenced?

Mr. FERRIS. That is true.

Mr. BUTLER. Is the railroad company resisting this effort on the part of the Government to recover this land? Because, according to the gentleman's statement, this land is worth $50,000,000. It seems to me like a good deal of money.

Mr. FERRIS. Yes; and the railroad is resisting it. It contends that the conditions and covenants are *not binding*.

Mr. McARTHUR. Does not the railroad claim that it has the right to take the timber?

Mr. FERRIS. They claim they have the right to cut the timber. No member of the committee agrees to any such contention. It was also presented to the Supreme Court and they did not agree, but on the contrary enjoined them from disposing of any of it.

Mr. WINGO. I understood the gentleman to say that the only land that will be open to homestead will be the cut-over land.

Mr. FERRIS. No; the gentleman did not say that. Let me make that clear. The lands are divided by this bill into three classifications. First, water-power sites; second, timberlands; third, agricultural lands. Now, I will tell the gentleman how it was. The nontimbered lands are subject to homestead entry. Now, by the payment of $2.50 an acre—and they are worth it—in the timberlands we provide for the sale of the timber, and as soon as the timber is removed automatically they go to

homestead without $2.50 an acre. It was brought to our attention that it was very expensive to get the stumps out of the cut-over land, and we thought they ought not to be charged that much.

Mr. WINGO. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. WINGO. The tracts that contain 300,000 feet of standing timber are classed as "timbered land." If a tract has 290,000 feet of board measure that is classed as "nontimbered land" and may therefore be homesteaded?

Mr. FERRIS. That is true, if the gentleman's figures are right. Of course, that is 300,000 feet for each 40-acre tract, which would make 1,200,000 feet for a full 160 acres.

Mr. WINGO. If a tract has 350,000 feet of board measure that is called "timberland" and can not be homesteaded until the timber is cut?

Mr. FERRIS. That is true.

Mr. WINGO. To what extent does the cutting of timber go? Does that mean all merchantable timber in the opinion of the buyer?

Mr. FERRIS. Not at all. The Secretary of the Interior, acting in conjunction with the Department of Agriculture—and it is necessary to have both, because the Secretary of Agriculture has cruisers whom he may employ—authorize the sale by competitive bidding or otherwise, as they may deem proper, and the lands are not automatically subject to homesteading until the Secretary of the Interior causes a public proclamation to be issued to the effect that the merchantable timber is all removed. We think that is safeguarded pretty well.

Mr. WINGO. There is no provision made in the bill or under existing regulations that have been made, is there, by which a homesteader may homestead the land and pay an agreed price for the timber?

Mr. FERRIS. There is no provision of that sort, but we thought it was not practicable, and for this reason: The ordinary homesteader is not in any sense a lumberman, and the man who goes out to live on one of those claims would be ordinarily a poor man and he could not buy timber in quantities for logging purposes.

Mr. WINGO. The land has been denuded of its timber, and can not be homesteaded for timber because there is no timber on it; but the gentleman knows that in an ordinary country the homesteader needs some timber on the land for his farming purposes. Should there not be a provision somewhere in the bill by which the homesteader could obtain some timber? Who is responsible for that arbitrary classification of 350,000 feet being "timberland"? In other words, that lands having less than 350,000 feet of board measure are not "timberlands" and lands having 350,000 feet and over are "timberland." Who was it that set that standard?

Mr. FERRIS. Well, the gentleman knows that there can be a good deal of difference of opinion about any effective dividing line with respect either to timber or anything else. I will say to the gentleman that that was a compromise, based on the combined judgment of the Department of Agriculture, the Department of the Interior, and the Department of Justice and of every expert from whom we could get an opinion. The Department of Agriculture wanted that 250,000 feet to the 40 acres instead of 300,000. This seemed to us the just amount.

Mr. WINGO. Here is the thing I wanted to call the gentleman's attention to: "Merchantable" timber is the thing that should be considered, but in the bill the expression used is "growth of timber." I am sure, from the gentleman's knowledge of timberlands, and I think any man familiar with the subject knows, that the classification of land as "timberland" does not absolutely depend upon the stumpage in feet, but it is controlled largely, as well, by the character of the timber, and to a timberman such a classification as this is ridiculous on its face, because there might be a growth of 500,000 feet on a tract which still would not be called "timberland," because it is not merchantable timber.

Mr. FERRIS. Well, the gentleman may have a better idea of timber than I. I have lived in a country where, in many places, they have not sufficient timber from which to cut a switch to whip the children with.

Mr. WINGO. Yes; but the doubt I have in mind is that there will not be enough timber on these homesteads to whip a child with.

Mr. FERRIS. The gentleman may be entirely right about that. This bill is open to amendment, and when the time comes we will present the facts that were adduced in the hearings upon this bill, and it can be determined in accordance with the facts. I do not know whether this is the correct amount, but it is the best we could do with the combined judgment that we had.

Mr. BOOHER. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. BOOHER. Does not the gentleman know that it would be better to say "merchantable timber" rather than "growth of timber"?

Mr. FERRIS. Well, "growth" is restrictive, and it prevents the Government from being skinned. Now, the two gentlemen who are talking about timber are both practical men, and I will add my judgment to the two, making that of three practical men. The Government does not generally get its full dues on a timber proposition. It generally gets peeled. Those people out there, it may be depended upon, will get all that is coming to them.

Mr. BOOHER. Why would not the words "merchantable timber" be better to use as a term than the words "growth of timber"?

Mr. FERRIS. Well, the word "merchantable" is a word on which you can play back and forth, and with it probably weave the Government out of its money. We are spending a good deal of money and using a good deal of Government machinery to get this land back. What I am trying to do is not to give it all away; some one should look after the Government interests. I am trying to help the Government to get this land back, and I do not want to use loose terms, so that this land or timber can be frittered away.

Mr. BOOHER. Does not the gentleman think he ought to look somewhat, too, after the interests of the homesteader, the one who wants to go out there?

Mr. FERRIS. Yes. I have been a homesteader myself since the time when the gentleman from Missouri has, and I have proved up a claim in the last 15 years, and my heart goes out to the homesteader generally, who, I may say, does not have much music playing in his home during his meals.

Mr. BOOHER. But I do not want him to get more than is coming to him.

Mr. FERRIS. I lived in the gentleman's State for 23 years, and——

Mr. WINGO. Mr. Chairman, I, like the gentleman, want to protest against a loose expression. The gentleman is clearly in error, though, when he says "merchantable timber" is a loose expression. The term "growth of timber" is in fact a loose expression. My suggestion is that we protect the Government, not by loose expressions but by expressions that have a clearly defined and well understood meaning. To protect the Government and the homesteader who may enter the "cut-over" lands, the cutting of timber should be limited to "merchantable" timber.

Mr. FERRIS. If the gentleman thinks I have used a term that is not applicable I want to withdraw it. I do not pretend to know all about timber. We are presenting our best judgment with the facts we had.

Mr. RAKER. The question of merchantable timber was not involved; but in the testimony of experts before the committee the expression 300,000 feet board measure meant that they would investigate and that there should be at least 300,000 feet of timber on that land that could be used for sawing purposes, excluding pole timber, post timber, and such like as that, so that the homesteader would get the benefit of that; and this expression was the best that the committee could get from the experience of the men before the committee.

Mr. WINGO. May I ask the gentleman what the committee understand is meant by the words "board measure"?

Mr. RAKER. Timber that will be used by a sawmill.

Mr. WINGO. A sawmill may cut timber that is not merchantable.

Mr. RAKER. Anything that can be sawed up into merchantable timber.

Mr. WINGO. That is all I want to ask. We know what is meant by merchantable timber.

Mr. FERRIS. Now, Mr. Chairman, I do not wish to take any more time in a general statement. Does any member of the committee want to ask me anything?

Mr. COOPER of Wisconsin. I notice in the Washington Post of this morning a full-page advertisement signed by Mr. S. A. D. Puter. Who is Mr. Puter, and what does he represent?

Mr. BUTLER. Tell us that story again.

Mr. COOPER of Wisconsin. If the gentleman has already stated it, I do not ask him to repeat it.

Mr. FERRIS. I have a letter from the Department of Justice telling all about Mr. Puter. It is a photographic copy that was sent to me, telling me about those who operated with Mr. Puter. It is a very sad tale, which involves Mr. Puter and his connection with about 10 of his cohorts, some of whom were put in the penitentiary, some now refugees from justice, some now on trial,

and many of the cases are now pending. Some of the men are in Canada.

Mr. COOPER of Wisconsin. I think that is about all the information I require as to Mr. Puter.

Mr. BUTLER. Is Mr. Puter a State boarder at this time?

Mr. FERRIS. No! I think he is away from home at present, engaged in passing the Washington Post through the House Office Building filled with full-page advertisements against this bill.

Mr. ELSTON. Do the remarks that the gentleman has made concerning Mr. Puter relate to the methods that he and his associates have adopted with regard to putting in applications for the purchase of the lands or do they refer to previous transactions?

Mr. FERRIS. If I had the time I would like to read this letter from the Department of Justice. It will probably creep in here, I presume, before we get through. It begins as follows:

In re the Oregon and California land-grant frauds I have read the testimony given by Mr. S. A. D. Puter before the House Committee on Public Lands.

It goes on and tells about the transactions, a number of them. A number of Mr. Puter's associates are in Canada. They are indicted, and the department is trying to get them. A lot of them are being tried in San Francisco this month; nine of them have served terms in the penitentiary, and some of them are still there. They have sold lands all over the United States to innocent purchasers, lands that they did not own, lands to which they had no title, lands to which they never can acquire title; and the Department of Justice says that these men have collected about $2,000,000 from unsuspecting people and that they have about a million dollars of it now; and some of that money was spent to buy a page in the Washington Post this morning.

Mr. BUTLER. The railroad has nothing to do with Mr. Puter.

Mr. FERRIS. No; and I did not say it had.

Mr. BUTLER. Mr. Puter might assume to own anybody's land.

Mr. FERRIS. Yes; and these locators are selling or pretending to locate people on these lands to which they have no more right than they would have to go out and offer for sale stock in the House Office Building.

Now, Mr. Chairman, how much time have I occupied?

The CHAIRMAN. The gentleman has used 38 minutes.

Mr. FERRIS. I did not intend to use that much time, because the gentlemen from Oregon are vitally concerned in this bill and they want to speak. I did not want to curtail their time, neither did I want to consume but little time in debate. I reserve the remainder of my time.

Mr. LENROOT. I yield 45 minutes to the gentleman from Oregon [Mr. SINNOTT]. [Applause.]

Mr. SINNOTT. Mr. Chairman, I would like to have my attention called when I have occupied 30 minutes.

Mr. Chairman and gentlemen, it is my intention to discuss this bill only as it relates to and affects my State. But before going into that matter I desire to say that the general policy of the committee is approved in the State of Oregon. However, I will say that the people of Oregon are sorely disappointed in the details of this bill and in the manner in which it will affect the State.

Mr. Chairman, it is suggested in the report on this bill that the division of the proceeds "may seem exceedingly liberal to the State of Oregon." I am gratified to note that the sagacious chairman of the committee has sought to forestall any such inference.

It is generally thought that the State of Oregon is to receive 50 per cent of the proceeds of the sales under this bill. If the most cursory reading of the bill so hoodwinks anyone pretending to be at all familiar with the subject, then his knowledge of the bill is most superficial or the bill—

Is like a villain with a smiling cheek,
A goodly apple rotten at the heart.

The report of the chairman further states:

It must be remembered that the lands in question are now, and have been, subject to State taxation, but with the passage of this bill will be exempt from such taxation until disposed of by the Government.

This is indeed a most scant and deficient justification of Oregon's righteous claim. I am not criticizing the genial and accommodating chairman of the Public Lands Committee for not elaborating in his report on Oregon's claims and the great and incalculable damage my State has suffered on account of the railroad company's contemptuous disregard of the provisions of the granting acts; nor do I wish to complain because he has not set out in detail how the passage of this bill will further jeopardize the State's welfare. Our lovable chairman is a very busy man. I know his anxiety to get this bill before the House and to secure early consideration so that the six months' period fixed by the Supreme Court for action by Congress may not lapse. I realize the short time he had between the final action of the committee and the filing of his report—too short indeed to cover any but the legal features of the bill—so I do not complain. Doubtless the chairman felt that the members of the Oregon delegation would, to some extent, on the floor discuss the manner in which the State has been affected by the railroad grant and will be affected by the passage of this bill. For this reason I feel it incumbent on me to discuss these matters and to allay any apprehension that Oregon is too liberally treated.

By the granting act of 1866 every alternate section of land in a strip 40 miles wide and about 350 miles long was granted the railroad company. The amendatory act of 1869 provided that the granted lands should be sold to actual settlers in quantities not greater than 160 acres to each purchaser and for a price not exceeding $2.50 per acre. This provision was practically ignored by the railroad company. This grant was tantamount to a grant of a solid body of land 20 miles wide and 350 miles long. It lay across the most fertile part of the State of Oregon.

The area in gross of the grant was over 4,000,000 acres, an area one-third again as large as the State of Connecticut, which has an area of 3,084,800 acres; twice as large as the combined area of Delaware and Rhode Island, which together have 1,940,480 acres. The net grant which the railroad company was able to obtain was 3,207,356.73 acres, according to its own figures, an area still larger than the area of Connecticut.

Of this enormous area the railroad company prior to 1887 sold only 163,430.28 acres to actual settlers. All told to date, about 800,000 acres have been sold, the greater portion to timber interests. Of this amount over 370,000 acres sold to the large timber interests in violation of the settlers' clause of the granting acts were involved in the compromise suits under the 1912 compromise act.

By the granting acts this enormous area was withdrawn from the operation of the preemption and homestead laws. While similar lands in other public-land States were open to entry and settlement—were made productive, helped to add to the population, wealth, and development of the States in which they were situated—Oregon's wealth, development, and population were retarded by the railroad company's disregard and defiance of the terms of the act. All the while the administrative officers of the Government were apathetic spectators of the violation of the terms of the act.

A fertile area larger than the State of Connecticut withheld from settlement for the period of 50 years! Who can estimate the loss to my State? What monetary consideration can recompense us for the past mischief and damage? Further loss confronts us with the passage of this bill in lands withdrawn from taxation and settlement. The insinuation of something "extremely liberal" for Oregon in the division of the proceeds is dispelled when the situation and this bill are dissected.

Secretary Lane in his report, speaking of the settlers' provision, says:

The failure of the company to carry into execution this special provision of the grant was considered inimical to the interest of the settlers, the State, and the Nation, debarring one from valuable opportunities for the acquisition of a home and retarding the development of the other.

The Supreme Court, in its decision of the land-grant case, quotes with approval:

* * * Indeed, the very fact that injury is of public character and such that no damage could be calculated is an added reason for the intervention of equity.

And I say that the injury to my State by the loss of homes, of schools, and development is an injury that is incalculable. It has run on for 50 years; it can not be measured or be recompensed by any disposition of the granted lands. The loss and injury to Oregon is irreparable. Remember that the granted lands were dedicated to the settlement, to the progress, and development of Oregon. This purpose was frustrated.

Mr. STAFFORD. Will the gentleman yield?

Mr. SINNOTT. For a brief question.

Mr. STAFFORD. Can the gentleman give the committee information as to the proposition of these 2,300,000 acres that are agricultural lands suitable for homesteading, and how much is timberland and mineral land?

Mr. SINNOTT. The Commissioner of the General Land Office, Mr. Tallman, told the committee that 75 per cent of the lands were suitable for ultimate cultivation. My colleague Mr. HAWLEY, in whose district these lands are, told the committee that the major part could eventually be cultivated. He is very familiar with these lands, having surveyed a part of them, also having hunted over them.

Mr. JOHNSON of Washington. Does not the gentleman want the House to understand that if these lands had been in prog-

ress of settlement; that is, if they had gone to actual settlers during the last 50 years, the timber would have been cut off, the stumps pulled, and the land now the same as other magnificent agricultural land in Oregon and Washington?

Mr. SINNOTT. Certainly. I do not care to digress too much from my remarks at this time, but I will say that the Commissioner of the General Land Office informed the committee that 75 per cent of these lands were suitable and adapted for ultimate cultivation. Why, in the great Hood River Valley in my district, when I was a boy I saw quarter sections containing from 6,000,000 to 10,000,000 feet of timber, which quarter sections are now the orchard lands in the world-famous Hood River valley.

Mr. RAKER. Will the gentleman yield?

Mr. SINNOTT. Very briefly.

Mr. RAKER. The gentleman is now discussing the conditions that existed before the Supreme Court decision and before the action of the committee on these land grants.

Mr. SINNOTT. Certainly.

Mr. RAKER. I understand the gentleman's statement. His contention is that the only thing involved in the gentleman's complaint is that the committee has not gone far enough in the amount provided that should go to the State for roads and school purposes.

Mr. SINNOTT. That is one thing we complain of, and we also complain of the line of demarcation between the timber and the agricultural land, and a few other features that I expect to cover.

At the time of the grants both the even sections and the odd sections within the limits of the grant were open to preemption settlement at $1.25 per acre. The railroad company was given the odd sections, the Government retained the even sections. The granting act provided that the even-numbered sections should be raised in price from $1.25 an acre to $2.50 an acre. Thus the Government provided for its reimbursement for the grant. Again the Government recovered in the compromise suits, under the act of 1912, nearly $1,000,000, every dollar of which has gone into the Treasury of the United States. In free transportation for its troops and property the Government has received over $2,000,000.

The Government will receive many million dollars more under the provisions of this bill, all for lands which were devoted to the development of my State. This development has been defeated. The Government parted with its title to the grant lands, never expecting another dollar therefrom. The Supreme Court held that, with the exception of the settlers' clause, the grant was "unqualified." The court held, "There was a complete and absolute grant to the railroad company, with power to sell, limited only as prescribed." Had the Government not permitted the settlement clause to be ignored for years with impunity, the development of that section of the State would present a vastly different picture from what it does to-day. We in Oregon feel it is only equitable that, inasmuch as the Government has parted with its title to these lands to effect the settlement and development of Oregon—this object having been defeated—the proceeds of the lands should now be pursued and devoted to the original purpose of the granting acts; the progress and development of the State to the remedying, as far as mere money can remedy, a loss that can not be reckoned, that can not be recompensed.

My State has borne the entire loss and burden of the violated grant, the adverse conditions thereby entailed. Our industrial loss easily amounts to more than the entire value of the granted lands.

Mr. McCRACKEN. Will the gentleman yield?

Mr. SINNOTT. With pleasure.

Mr. McCRACKEN. The gentleman attributes the wrongs done to Oregon to the negligence of the Interior Department?

Mr. SINNOTT. The Interior Department has, to use the vernacular, "passed the buck" to the Attorney General's office, saying that it was not in their jurisdiction.

Mr. McCRACKEN. The fact remains, however, that it was within the province of the Interior Department, and had it given diligent attention to its duty the wrong done the State of Oregon would not have happened.

Mr. SINNOTT. I will state that Mr. Townsend, the attorney who tried the case for the Government, testified that he had consulted all the attorneys in the Interior Department, some 14 or 15, and they said that they had forgotten all about the terms of the grant.

Mr. LENROOT. Will the gentleman yield?

Mr. SINNOTT. Briefly.

Mr. LENROOT. Is it not a fact that the first action taken by the State of Oregon was a memorial to Congress in 1907, and within 12 months thereafter Congress did act?

Mr. SINNOTT. I am not prepared to answer that wholly in the affirmative. It would take me some time to explain this in detail and I expect to do it before we are through with the bill to-day. I will state this, however, by way of digression, that there was a resolution in Congress in 1886 to have these lands declared forfeited at the southern end of the grant, and Congress, although the Public Lands Committee reported favorably on that resolution, refused to act.

How does this bill purpose to right these wrongs? What reparation does it offer for arrested development in a strip of land 20 miles wide and 350 miles long, held in idleness in a wilderness for 50 years—held at prices that prevented the settlement and the peopling of Oregon?

The lands are now on the tax rolls paying a yearly tax of about $450,000. It is purposed to revest in the Government title to these lands to withdraw them all from the tax rolls, subject a small part of them to settlement, and in the far distant future sell the timber, and, after deducting several million dollars from the proceeds, give the counties for roads 30 per cent and the State for schools 20 per cent of the balance. The remaining 50 per cent is to go, 40 per cent to the reclamation fund and 10 per cent to the Treasury.

Mind you, on the passage of this bill $450,000 of yearly taxes will be lost. The time when we are to be recompensed for lost taxes alone is a matter of the greatest conjecture. If the theories of the administrative officers are given full scope it will be many decades before Oregon's proportion of the proceeds are returned to the State.

The timber is to be sold by the Secretary of the Interior and the Secretary of Agriculture, which means the Forestry Department. They are given practically carte blanche, their own sweet will, as to the time when they shall sell the timber.

The so-called regulations as to when the timber shall be sold are equivalent to leaving the matter to their discretion. What are their views, their theories about selling timber. I am going to get them from the record—from the officials who will have the matter in charge. Their views will afford us little approximation of how long a time the $450,000 yearly taxes will be withheld.

I am not quarreling with their views, but only calling them to your attention to show how long it may be before this matter is closed up and the State repaid for its lost taxes alone, not to mention any recompense contemplated for arrested development to the State.

Mr. Greeley, the assistant forester, who appeared before the committee, testified that 40,000,000,000 feet was a conservative estimate of the timber on the grant.

In his report on this bill the Secretary of the Interior says:

> The discretion given to the Secretary by this section to sell, for cash or on deferred payments, the timber on these lands, at such time and in such quantities as may seem best to him, is deemed by me absolutely essential to an effective discharge of the duty imposed by the bill. To order the immediate sale of such a vast quantity of valuable timber without any consideration as to the demands or needs of the market would, in all probability, not only result in a sacrifice of these particular lands of great value, but would disastrously affect the Government's disposition of matured timber in forest reservations, and very likely result in a demoralization of the lumber market. On the other hand, the requirement made in the proviso "that said timber shall be sold as rapidly as reasonable prices can be secured therefor in a normal market," is in harmony with the general scheme of the proposed legislation, viz, to subject the timber to taxation and the land to settlement as promptly as conditions will warrant. These conditions, however, can not be foreseen with sufficient accuracy to fix them in the shape of hard and fast statutory requirements.

The Secretary of Agriculture in his report to the chairman of the Senate committee on the original Chamberlain bill writes:

> The timber in private ownership in Oregon west of the Cascade Mountains is estimated, in the published reports of the Bureau of Corporations, at 348.5 billion feet. Privately owned timber in western Washington totals 270.5 billion feet. The aggregate in private ownership west of the Cascades in the two States is thus 619 billion, aside from 156 billion feet in the national forests.
>
> Although the lumber cut in the Northwest may increase rapidly, it is apparent that the great demand for immediate consumption will not strike this region until supplies of timber more accessible to the great centers of consumption are more easily exhausted. In addition, western Oregon is placed in an extremely unfavorable market condition owing to the fact that her present outlet by rail to the East is either north through or past the heavily timbered regions of Washington, or south through the almost equally well-timbered region of California. In consequence, the production of lumber in Oregon for a number of years has been practically at a standstill, and, while the rate of cutting will doubtless be materially increased as time goes on, it is obvious that vast quantities of privately owned timber must be held for many decades before it can be marketed as lumber.

The Secretary calls to our attention that it will be many decades before the now privately owned timber can be marketed as lumber. Further on in this report he states:

> Specifically, it is believed very strongly that the 40 or 50 billion feet of timber on the Oregon and California grant lands should not be sold except as is desired for immediate manufacture.

Assistant Forester Greeley testified before the committee:

Now, if the Oregon and California grant timber is to realize the value which has been placed upon it by the Department of Justice, it must, in my judgment, be sold under substantially the same requirements; that is, for immediate manufacture rather than for holding or speculation.

He further stated that—

the lumber industry out there now owns all the stumpage which it is able to carry

Mr. Greeley told us that the—

Secretary's recommendation is that the timber be sold as there is a demand for it for manufacture.

Again quoting Mr. Greeley:

Bringing this all down to the point, it is our suggestion that the timber on the Oregon and California lands be sold whenever there is a real demand for it for manufacturing purposes. Particularly, timber on agricultural lands ought to be disposed of as rapidly as that can be done.

There are now, as the Secretary of Agriculture informed us, 619,000,000,000 feet of timber in western Oregon and Washington and 128,000,000,000 feet in the Oregon national forests, a total of 747,000,000,000 feet. Mr. Greeley told the committee that this timber is being cut at a rate which has never exceeded 6,000,000,000 feet a year, and that the industry is carrying all the raw material which it can afford to carry. While I do not assent to these views, it makes no difference, for they will control the disposition of the timber.

Applying these economic theories announced by the two secretaries to the sale of timber, namely, considering the needs of the market, an industry now carrying all the timber it is able to carry—619,000,000,000 feet of privately owned timber, which the Secretary of Agriculture tells us "must be held many decades before it can be marketed as lumber," the greatest cut of any one year 6,000,000,000 feet—156,000,000,000 feet in the national forests, 40,000,000,000 feet on the grant lands, to be sold in a normal market, such as may not "disastrously affect the Government's disposition of matured timber in forest reservations," or to demoralize the lumber market. Sales of timber compatible with these views offer little hope that the present generation in Oregon will be made whole for the loss of $450,000 of yearly taxes, not to mention what we have already lost from the refusal to permit settlement. "Generations yet unborn" may see the final division of the proceeds; the present will not. We feel like exclaiming:

Keep not your kisses for my dead, cold brow,
The way is lonely, let me feel them now!

In Oregon we believe that the original bill, introduced by Senator CHAMBERLAIN, providing 40 per cent for the counties and 40 per cent for the State for public-school purposes is not more than the State is entitled to; that it will inadequately repay the State for arrested development and lessened population. I intend to offer an amendment for this 40–40 division.

Such a division can only partly atone for past injustice to Oregon on account of the illicit administration of the land grant.

Oregon is now the Nation's wood lot, with 13,148,941 acres of forest withdrawn from taxation. From this great untaxable area last year the State received the munificent sum of $49,000.

This bill puts 40 per cent of the proceeds of the land and timber into the general reclamation fund.

Oregon, with over 1,000,000 acres of arid land susceptible of irrigation, according to the reconnoissance of the Reclamation Service, has up to June 30, 1915, enriched the reclamation fund over $10,000,000 and has had returned but $3,758,812.32. Now, when we see further funds diverted to other States we are prone to cry out:

Quosque tandem, Catilena, nostra patentia abutere?
How long, O Catiline, wilt thou abuse our patience?

There are many features of the bill which I should like to comment on, but the limited time allotted to general debate does not permit. I shall try to discuss them when amendments are in order under the five-minute rule. A few features, particularly, I shall call to your attention now.

The State will never get more than one year's taxes from all this timber. It is doubtful if the State will even get that. The timber may be sold with payment in 10 annual installments. The bill provides for that, and that is most likely the way in which it will be sold. It is not to be taxed until patent is issued for the timber; patent is to be issued only on payment of the full purchase price, but patent may be issued on any legal subdivision when the full purchase price of the timber on such subdivision is paid. It will result from this that the purchaser, when he is ready to cut the timber from any particular subdivision, will pay the price of the timber on that subdivision and the same year will remove the timber. Assessments in Oregon are made as of March 1 of each year. A patent may be issued after March 1, and before the next March 1 comes all the timber could be cut.

The report of the Attorney General shows that the railroad company has received on account of the grant lands $3,500,000 in excess of what it is entitled to. If this claim of the Attorney General is found correct in the accounting suit provided for in section 7, this amount will be retained by the Government when it settles with the railroad company under the provisions of section 10. This amount will be treated as money already had and received by the railroad company.

Three million five hundred thousand dollars is equivalent to the payment for 1,400,000 acres at $2.50 an acre. The railroad company will not again be paid this amount. This $3,500,000 is retained in the Treasury of the United States. It is not treated as a part of the fund to be divided. The payment for 1,400,000 acres to the railroad company will not have to be made again. Yet section 10 of the bill takes no account of this fact, for it requires that before the proceeds of the sales are divided there shall be deducted therefrom $2.50 an acre for each acre of land revested. This deduction of $2.50 an acre is obviously made to enable the Government to settle with the railroad company. But why deduct $2.50 an acre for these 1,400,000 acres, or $3,500,000? The Government will not have to pay this sum to the railroad company. The railroad company has already received this amount. It has it in the $3,500,000 in excess of legal profits, and will be treated in the suit as money had and received by the railroad company. The Government will not have to pay it to the railroad company when settlement is made, so why take it out of the fund which is to be divided between the State of Oregon, the reclamation fund, and the Government?

We find the same incongruity in the matter of taxes. Under section 7 the taxes which should in law have been paid by the railroad company and which are to be advanced by the Government are to be treated as money had and received by the railroad company. The back taxes now amount to $1,565,458.88 (Mar. 1, 1916). Now, under the provisions of section 10, when settlement is had with the railroad company, this sum of $1,565,458.88, if found legally assessed, is to be retained by the Government. Yet section 10 also requires the deduction of these taxes from the proceeds of the sale before any division is made with the State and counties. The amount of these taxes withheld before division is to become the property of the Government. Thus the Government will be making a profit of 100 per cent for all it advances for taxes.

These two items, the excess of $3,500,000 and the taxes, amount to over $5,000,000, nearly 10 per cent of the highest valuation ever suggested for the grant lands.

By order of court, timber sales amounting to $190,000, payable in installments, were made. There are on deposit at Portland, Oreg., $90,000 from these sales and from condemnation suits. This amount and future payments by section 8 are vested in the United States.

This manipulation makes the 50 per cent division a delusion and a snare, for, instead of the State getting 50 per cent of the proceeds, the reclamation fund 40 per cent, and the Government 10 per cent, this division is not to be made until after the Government first gets a "rake-off" of over $5,000,000, not to count the $920,000 already received in the compromise suits.

Oregon's loss in settlement and population certainly is the Government's gain, to the tune of nearly $6,000,000, with a further 50 per cent division when the lands and timber are sold, amounting to an additional ten or fifteen million dollars.

No one need have any nightmare or apprehension over any "extremely liberal" consideration for Oregon in this bill. It falls far short of doing justice to the State. In equity and justice we are entitled to the full 40 per cent to the counties and 40 per cent to the school fund, as provided for in the Chamberlain bill, and that will not repay us for lands held in idleness for 50 years and now to be withdrawn from taxation for an indefinite period.

Our school fund is an irreducible fund. It is loaned on farm property; it in effect is a rural-credit fund. Every dollar allotted to the State is placed in this fund. The principal can not be drawn on; only the interest may be used for school purposes.

Some of these withdrawn lands are within port districts—municipal corporations organized under the laws of the State to improve ports and harbors. These port districts are improving the harbors on the Oregon coast in cooperation with the Government. They have put up dollar for dollar with the Government for that purpose. In all, these port districts have put up $2,000,000. They have bonded their lands to pay that sum. Their limit of indebtedness is 10 per cent of the assessed value of the property in the port district. Fifty per cent of the area

of Siuslaw and Umpqua port districts are in the area to be revested in the Government and withdrawn from taxation.

Many settlers settled on these lands thinking that the actual settlers' clause meant just what it said. A technicality, the lack of the definition of an actual settler in the granting act, the omission of proper regulations in the granting act exclude these settlers from any rights, although the Supreme Court says that their claims are supported by "appealing considerations." If worry and delay have not driven these settlers from the land since December 1, 1913, they may hold their lands if they do not contain more than 1,200,000 feet of lumber to the one-quarter section. If more, then they can only hold the 40-acre tract upon which their house or improvements are located. There was no timber restriction when they settled on the land; there should be none now if they are found to be settlers in good faith.

In homesteading these lands the bill fixes 300,000 feet of timber to the 40 acres as the line of demarcation between agricultural and timber land.

This would be fatal to the settlement of some of the best agricultural land in southern Oregon, according to the statement of the county court of Josephine County. M. J. Anderson, of Grants Pass, whom I have known nearly all my life, a man of intelligence and integrity, formerly a forest supervisor in Oregon, wrote to me. You will find his letter on page 537 of the hearings. He says, referring to a 1,000,000-foot timber classification, that "one ordinary Oregon tree per acre would throw the land out of agricultural class; six small 24-inch trees scattered about an acre, or such average over the 160 acres," would take the land out of the agricultural class.

I do not see how anyone knowing the facts in this matter, the past treatment, and what the future has in store for Oregon under this bill can reconcile them with the suggestion that the division of proceeds "may seem exceedingly liberal to Oregon." He can not do it unless he possesses somewhat the temperament of Warren Hastings, who, after listening to Burke's impeachment of the spoliation of India, said that when he considered his opportunities he was astonished or marveled at his own moderation.

Mr. Chairman, the adjustment of a land grant is ordinarily a prosaic subject with little sentiment in it; but, Mr. Chairman, when I am seeking justice for my State in this matter I can not suppress the sentiments surging in me when I think that these very lands were won and presented to the Government by the Oregon pioneers without any assistance from the General Government, but in the face of every discouragement and rebuff.

The Oregon country originally embraced with other lands the territory now in the States of Oregon, Washington, Idaho, and parts of Wyoming and Montana. The story of how the early Oregon pioneer saved for the United States this area is a thrilling tale full of romance and fascination. It is as the historian, Schafer, says, "A record of pathos, tragedy, and achievement not surpassed in any annals of our country." In the time at my disposal I can only give a bare outline.

By the treaty of 1818 the Oregon country was held in joint occupancy by England and the United States, free and open to the citizens of both countries. The powerful Hudson Bay Co. was England's representative in the Oregon country. A few intrepid American trappers, home builders, and missionaries were the sole guardians of our interests. The future ownership and control of this mighty empire was at stake—on the one side the colossal forces of the opulent and energetic Hudson Bay Co., backed by the wealth and encouragement of the British Empire; on the other the trapper, the pioneer home builder, and missionary, whose welfare gave our Government and foremost statesmen little concern.

Webster said in 1840:

> The ownership of Oregon is likely to follow the greater settlement, the larger amount of population.

Another statesman said:

> The ridge of the Rocky Mountains may be named as a convenient, natural, and everlasting boundary. Along this ridge the western limit of the Republic should be drawn and the statue of the fabled god Terminus should be erected on its highest peak, never to be thrown down.

Dayton is quoted as saying:

> God forbid that the time should ever come when a State on the shores of the Pacific, with interests and tendencies of trade all looking toward the Asiatic nations of the East, shall add its jarring claims to our distracted and already overburdened confederacy.

The Oregon pioneer despite this dismal foreboding determined to form a State on the shores of the Pacific. Our Government was reluctant to bring to an issue its claim of sovereignty. Another treaty of occupancy was entered into, again leaving the future dominion over the Oregon country to be decided by the settlement and occupation of the frontiersman and hardy pioneer.

The Hudson Bay Co. enforced the laws of England on all its agents and employees. The Oregon pioneers were in reality without a flag, a country, or laws which they could invoke for their own protection. They sent repeated petitions to Congress urging in most eloquent language that our Government take speedy and formal possession of the Oregon country. They called attention to the richness, the resources, and the extent of the territory. They wrote, "we flatter ourselves that we are the germ of a great State, that the territory will be populated, that Congress must say by whom." Their petitions were ignored or lightly considered.

George Himes, the historian, says, "Had Congress been relied on, Oregon would inevitably have become a dependency of Great Britain." Their petitions to Congress availed nothing. So the intrepid pioneers proposed to form a government of their own. They were importuned by the Hudson Bay Co. and English influences to form an independent government. Had they done this Oregon soon would have been an English colony, and the boys from Oregon, Washington, Idaho, and parts of Wyoming and Montana would now be fighting in the bloodstained trenches of France.

Or perhaps Oregon would have been taken into the Union as Texas was, reserving the public lands for the State, but their love for the Stars and Stripes was too intense. Instead of organizing an independent government they organized, by the bare majority of two votes over the English vote, a provisional government until such a time as the United States should extend its jurisdiction over them.

The provisional government at first was ignored and defied by the Hudson Bay Co. The numbers of Oregon pioneers were weak. They wrote and sent speakers to their friends, neighbors, and relatives in the States urging them to cross the plains and settle in Oregon to save the Oregon territory for the United States. The Hudson Bay Co. and the English interests did likewise for their Government, writing to their friends in Canada and England, urging the peopling of the Oregon territory by the Canadians and English.

The race for Oregon was on. The emigration of 1843, which Horace Greeley said "wore an aspect of insanity," on account of its seeming foolhardiness, and that of 1844, across the dreary plains "with sickness and death their traveling companions," brought an overwhelming number of American settlers into the Oregon country. The provisional government was perfected and made secure and the mighty power of the "mistress of the sea" was compelled to recognize our supremacy and sovereignty over the greater part of the Oregon territory. And thus, as Fred Holman, the president of the Oregon Historical Society, tells us—

> Without the aid, assistance, or protection of the United States, their daring patriotism in effect won an empire in extent for their country.

When we meditate, Mr. Chairman, upon the trials and sufferings of the Oregon pioneers, their virtues and achievements, we must conclude that the pioneers who won and conquered the Oregon country deserve to have their names inscribed on history's indelible scroll with the Pilgrim Fathers—the pioneers immortal. [Applause.]

Their children's children, not as mendicants asking alms, but as rightful heirs, demand that their heritage be administered in the fullest measure to upbuild their State and to promote their public schools.

For this reason, Mr. Chairman, all the granges, commercial bodies, and school districts in the State of Oregon have petitioned Congress that 40 per cent of the proceeds be allotted to the counties for roads and 40 per cent to the State for our public-school system. Thus and only thus will the purpose which the Supreme Court said Congress had in mind when passing the granting acts be fulfilled. [Applause.]

Mr. FERRIS. Mr. Chairman, I yield 10 minutes to the gentleman from California [Mr. RAKER].

Mr. RAKER. Mr. Chairman and gentlemen of the committee, I am going to yield enough of my time to ask the gentleman from Oregon a question, if he will tell the committee how he would dispose of these lands that are to be revested in the United States.

Mr. SINNOTT. I am not objecting to the disposition of the lands.

Mr. RAKER. That is what I am asking the gentleman; the only objection, then, the gentleman has to the bill is as to the disposition of the fund.

Mr. SINNOTT. If the gentleman had listened to my remarks he would know——

Mr. RAKER. I did, but the gentleman did not refer to that.

Mr. SINNOTT. I mentioned the division of the proceeds, I mentioned the timber classification, I mentioned the fact that there are certain settlers on the lands referred to by the Supreme Court which said that their arguments and claims presented "appealing considerations," and yet this bill absolutely ignores the great number of these people. They have but limited rights under the bill.

Mr. RAKER. I hope the gentleman will not take all my time. [Laughter.] Has he no further objection?

Mr. SINNOTT. If the gentleman will yield me an hour or so, I will mention several other objections. [Laughter.] There is another thing. You take out of the pot $3,500,000, and in addition to that you take $1,500,000 on the pretense that you are going to pay it to the railroad company, when you are not going to pay it to the railroad company, because that is to be deducted.

Mr. RAKER. Now, I can not yield any further. The gentleman is using up all of my time. [Laughter.]

Mr. SINNOTT. Does the gentleman want to ask me another question?

Mr. RAKER. Yes; but instead of answering the question, the gentleman is repeating his argument just made. [Laughter.]

I ask the gentleman what disposition he would make of the land, but he does not tell us, and still the arguments go back solely and entirely to the disposition of the fund. The committee, after extended hearings on this bill as well as by subcommittee, with the assistance of the Department of the Interior, the Department of Agriculture, and Attorney General's office, tried to do three things. First, prepare a bill so that the title might be revested in the United States; second, that they might dispose of the lands; third, that the accounts or the money due by the railroad company as well as that which is due them under the Supreme Court's decision might be adjusted. I also might incidentally say fourth, providing for the very thing the gentleman from Oregon refers to the settlers on the lands.

The bill provides for the revesting of the title, for the disposition of the lands, and it seems to me in the best method it could, not only for the Government but for the State of Oregon and the citizens who desire to obtain the lands; and further, it provides for free actual homesteaders that might have a claim on the land.

Mr. DUPRÉ. Mr. Chairman, will the gentleman yield.

Mr. RAKER. Yes.

Mr. DUPRÉ. Does it give them preferential treatment?

Mr. RAKER. Yes; it gives preferential treatment to those who have actually settled on the land, but there are 15,000 pretended claimants to the land, some of them living in Canada, some living in the Eastern and Western and in the Southern States, none of them ever having seen the State of Oregon, or been upon the land, who desire now to be recognized and have rights granted to timberland that is worth a great deal of money.

Mr. ELSTON. It is claimed by a good many that the title is already in the railroad, that this clause is in the nature of a covenant and not a forfeiture. What are the provisions of the bill respecting that?

Mr. RAKER. The railroad company is entitled to $2.50 an acre for the land, and is entitled to further consideration in that the land be disposed of. The Government revests the title and then pays the railroad company $2.50 an acre, to which it is entitled, and the land is then disposed of to the end that it may be put upon the market and used, all of it. The record shows from the Southern Pacific land agent, Mr. McAllister, who is familiar with the land, that 41 per cent of it has been cruised and the balance of it gone over casually; that only 15 per cent of this land can be used for agricultural purposes at the present time and that the rest is heavily timbered land. The same appears from the statement of the Forestry Service that practically 15 per cent is agricultural land and the rest of it is heavily timbered land, running from 5,000,000 to 20,000,000 board-feet measure per 160 acres of land. The committee, after providing for the disposition of the land, specifies the three clauses—power sites, timberland, which is then designated, if it does not contain over 300,000 board-feet measure, and the balance to be classified as agricultural land, and in that is the mineral land. The gentleman complained that the State of Orgeon will not get any consideration. The taxes up to the present time have been in the neighborhood of $1,500,000, paid to the State of Oregon by the railroad company. There are about $1,500,000 of taxes due to these counties, and the bill provides for the payment and the appropriation of money, to the end that the title may be clear and that the Government in handling it may not have any trouble with it. The homesteader who goes on the land pays $2.50 an acre, agricultural land, and he may enter the land as other public land is entered and it will be subject to taxation. All of the timber is placed in shape that it can be disposed of to the best interest of the Government and to the best interest to the State of Oregon, leaving only that which the gentleman from Oregon [Mr. SINNOTT] insisted upon should be retained in the bill and not disposed of for two years, namely, some 2,000 acres, or a particular water or dam site, or watershed to the city of Portland. All of the land and all of the timber will be placed under taxation as soon as it can be sold. The State and the counties will then receive their proportion of the taxes, and as the timber is sold it will be the same, and the land is placed back on the market for the purpose of permitting it to be homesteaded so that as rapidly as possible the land may be disposed of. The bill then provides that the Attorney General shall commence an action against the company and all of those who claim any interest in it, to adjust the matter between the railroad company, the lien holders, and the Government, so as to give them $2.50 an acre, their interest in this land for the entire tract of land, charging them up with the excess that has been paid for the sale of the land.

Something has been said and will be in regard to the resolution of 1912. The first one of 1908 authorized the Attorney General to proceed. He did proceed. Then there was a question as to whether or not he had power to dispose of the entire matter. In 1912 the Attorney General with his assistant appeared before the Committee on Public Lands urging the adoption of the resolution of 1912, permitting that department to compromise some 46 suits that had been begun against parties who were grantees of the railroad company, by their paying to the Government $2.50 an acre. The Attorney General stated before the committee that there might be with their influence and with the general feeling a question of losing the case. That was compromised. It was then provided that within a year where no suits were brought, as to those who had bought from the railroad company tracts of a thousand acres or under the statute of limitations would apply, and therefore it cleared the title to something like 400,000 acres of land in about 4,000 people. The bill as reported by the committee has covered the entire subject and should pass without opposition.

The CHAIRMAN. The time of the gentleman from California has expired.

[By unanimous consent, Mr. RAKER was granted leave to extend his remarks in the RECORD.]

Mr. LENROOT. Mr. Chairman, I yield 40 minutes to the gentleman from Oregon [Mr. HAWLEY].

Mr. HAWLEY. Mr. Chairman, on May 2, 1916, the Committee on the Public Lands of the House of Representatives reported favorably to the House H. R. 14864, relating to the Oregon and California land grant, commonly known as the Ferris-Chamberlain bill, for the disposition of certain large areas of land granted to certain railroads to aid them in the construction of roads in Oregon. The bill so reported becomes, of course, the basis for the action of this House to-day. I regret to say that the bill in its present form is a disappointment to our people and greatly defeats their reasonable expectation. Under the five-minute rule, when the bill is read for amendment, I expect to offer some amendments and to advance arguments in support of them, trusting that the House will, in its wisdom and its kindly consideration for our disadvantageous situation, modify some of the provisions of the bill materially in our favor. It is my intention at this time to state for the information of the House the essential facts in the case and the conditions that have arisen by reason of the grant, as well as to explain the reasons and purposes that moved Congress in the first instance to make the grant. I wish also to present for your consideration certain problems that our people will have to face under the proposed bill and the difficulties in which it places them, especially the people of the counties in which these lands are situated. This bill deals with the disposition of some 2,300,000 acres of lands. It faces the direct possibility of being rejected by the courts. It handicaps the development of a number of counties by largely reducing their tax rolls. I respectfully urge that it merits the careful and patient consideration of this great body of men.

Almost all of the lands in these grants are included in the district I have the honor to represent.

Any legislation should carefully provide against fraud or other improper practices, and I would not support this or any other legislation under which objectionable methods or corrupt practices may be possible.

I submit below the resolutions adopted by a most representative conference of citizens of Oregon. Delegates to this con-

ference were chosen by the county courts, commercial and agricultural organizations, by the governor, and otherwise:

Resolutions adopted by the Oregon State Land Grant Conference, State Capitol, Salem, Oreg., September 16–17, 1915.

Whereas the people of the State of Oregon, by their representatives, duly assembled at Salem, Oreg., September 16 and 17, 1915, have been brought together by a common inspiration to consider the material welfare of Oregon made imperative by the rendition of the opinion of the Supreme Court of the United States in the case of the Oregon-California Railroad Co. et al. v. The United States, popularly known as the land-grant case; and

Whereas in said case the Supreme Court has construed the acts of Congress of the United States approved July 25, 1866, as amended by the acts approved June 25, 1868, and April 10, 1869, and the act of May 4, 1870, to be not only laws but enforceable and continuing covenants; and

Whereas said acts contain conditions for the sale of the lands granted thereunder, requiring the said lands to be sold to actual settlers in quantities not greater than 160 acres and for sums not exceeding $2.50 per acre; and

Whereas the said conditions plainly imply an obligation upon the grantees in said land to sell said lands to actual settlers who comply with the conditions of said grant, and bring themselves within the conditions of said grant as actual settlers; and

Whereas it is apparent that the grantees in said grant by the acceptance of said grant plainly agreed to convey the said lands according to the terms of said grant to such settlers upon the payment of the amount specified in said grant, and to make such conveyance upon the full performance of the terms of said grant by said actual settlers; and

Whereas the Supreme Court in its opinion of June 25, 1915, held that Congress should have a reasonable opportunity to provide by legislation for the disposition of said lands in accordance with such policy as it might deem fitting under the circumstances and at the same time secure to the defendants in said cause all the value the granting acts conferred upon the said defendants, at all times keeping in view the policy which will insure actual settlement of the lands rather than speculation; and

Whereas the United States Government has heretofore created national forests within the State of Oregon, occupying approximately one-third of the area of the State of Oregon, and thereby militating greatly against the growth and development of the State of Oregon: Therefore be it

Resolved, That it is the sense of this conference that the Congress of the United States should enact laws defining and settling who shall be considered an actual settler under the terms of said acts, and what shall be considered an actual settlement, and requiring the grantees under said acts to perform the terms and conditions of said acts, and sell and dispose of said lands according to the true intent and purpose of said acts to such actual settlers; and be it further

Resolved, That we are unalterably opposed to any further increase of forest reserves in the State of Oregon; and lastly be it

Resolved, That we urge upon Congress the enactment of legislation which shall provide for the immediate sale of said grant lands in quantities of not greater than 160 acres to any one person and to actual settlers at a price not in excess of $2.50 per acre, and to provide against all fraud in the settlement and disposition of said lands.

Adopted September 17, 1915.

WM. I. VAWTER, *Chairman*.
C. C. CHAPMAN, *Secretary*.

OREGON & CALIFORNIA RAILROAD LAND GRANT.

Congress, by an act approved July 25, 1866, as amended by the acts approved June 25, 1868, and April 10, 1869, granted certain lands in Oregon as an aid in the construction of a railroad that was constructed from Portland south through the Willamette Valley on the east side of the Willamette River, through the Umpqua Valley and the Rogue River Valley to the southern boundary of the State. For each mile of construction the grantees were to receive the odd-numbered sections within place limits of 20 miles on either side of the road, or 12,800 acres for each mile of road constructed, in accordance with the terms of the grant. For lands lost to the grantees by reason of appropriation by others prior to the attaching of their right to any lands within the place limits they were given the right to select lieu lands within an indemnity limit of 10 miles on both sides of the place limits. Under this grant the grantees earned 3,821,901.8 acres.

Congress, by an act approved May 4, 1870, granted certain lands, under similar terms, as an aid in the construction of a railroad from Portland to Astoria and McMinnville, on the west side of the Willamette River. Under this grant 397,602.16 acres were earned.

Telegraph lines were to be built in connection with both roads.

The Southern Pacific Co. subsequently acquired both roads, and now owns and operates them. The granted lands were transferred to this company with the roads. The granting acts passed the title to the lands out of the Government, and nearly all the lands earned were patented to the grantees, to the amount of 2,894,295.23 acres. There are approximately 250,000 acres selected by the railroad not yet patented to it. The patented lands have been taxed for many years at an assessed valuation of both land and timber for county and State purposes. Under date of April 26, 1916, the Commissioner of the General Land Office advised me as follows by letter:

In reply you are advised that the estimated area of the land grant to the Oregon & California Railroad Co. under the act of July 25, 1866 (14 Stat., 239), commonly called the East Side Grant, is 3,821,901.8 acres, and that the estimated area of the grant to the Oregon & California Railroad Co. as successor to the Oregon Central Railroad Co. under the grant by the act of May 4, 1870 (16 Stat., 94), commonly called the West Side Grant, opposite the constructed portion of the road, is 397,602.16 acres, or a total of 4,219,503.96 acres. Patents have been issued to the company under said grants for 2,894,295.23 acres, leaving due to the company 1,325,208.73 acres. There are pending selections of the company amounting to approximately 250,000 acres.

THE PROVISOS.

While the granting acts gave the title to earned lands to the grantees, that title was not a fee simple of all the value of the land and its appurtenances, but appears to have been limited to a maximum interest of $2.50 for any acre, so far as any direct interest in the land is concerned. There is a further limitation also upon the power of alienation, set forth with great exactness of language.

The proviso in the act of April 10, 1869, reads as follows:

And provided further, That the lands granted by the act aforesaid (act of 1866) shall be sold to actual settlers only, in quantities not greater than one quarter section to one purchaser, and for a price not exceeding $2.50 per acre.

A proviso of similar import was included in the act of May 4, 1870.

By reason of the violation of the terms of these provisos by the railroad company in making sales and its refusal to make sales in accordance with their terms, and a decision of the Supreme Court of the United States upon these matters on June 21, 1915 (see 238 U. S. Repts., 393), the matter of these grants is now before Congress that Congress may make such disposition of them as the terms of the granting acts, the rights and interests of all parties concerned, and the decision above referred to will justify. And it is my belief that this Congress in enacting any legislation upon this subject, so vital to the welfare of the State, counties, and people of Oregon, should give force and effect to the intent of the former Congresses which passed the granting acts; that Congress at this late date should not deprive us of the value of a grant once made in good faith.

Prior to these grants, many grants were made by Congress to aid in railroad construction by which an unqualified title was given and no restrictions upon alienation imposed. The Supreme Court in its opinion, after referring to the grants made without restrictions and quoting from the record certain phrases characterizing the evils arising from such methods of making grants, says:

Informed by such experience, in substance is the contention, and solicited by petition and moved by the reasoning of some of its members, Congress changed its policy of unqualified bounty, and, while not refusing to contribute to the aid of great enterprises, sought to prevent the perversion of such aid to selfish and personal ends, and to promote the development of the country by the disposition of the lands to actual settlers.

And in making the grants now in question, Congress adopted the latter policy. The title passed to the grantees, with power to sell the lands under certain conditions at a maximum price of $2.50 for any acre; the proceeds were to be retained by the grantees and were in the nature of a bonus, which amounts to $32,000 for each mile of road constructed.

The purpose of this policy was twofold—to aid in the construction of railroads which would become parts of a great transcontinental system and to people of the country by requiring the lands to be sold to actual settlers only. The settlement and subsequent development of the lands was intended to be an aid to the railroads in providing traffic in passengers and freight, and to the State by peopling the new country and increasing the taxable area, from which both State and counties derive that financial resource which enable them to undertake and carry out their benificent purposes. Taking into consideration all the debates had when the grants were made by Congress, it is clear that both purposes were of equal importance and to be equally subserved. The Supreme Court recognizes these two purposes in its decision (416–417). The State of Oregon, and the counties in which these lands are situated especially, depending upon the good faith of the railroads and of the Government in carrying out the purposes of the grants, are more or less largely dependent upon the taxes derived from these lands for the maintenance of the common schools, the construction of roads, and the support of their other institutions. Congress divested the Government of all title to these lands, and they have been on the tax rolls for many years, paying State and county taxes upon their assessed valuations.

FAILURE OF THE RAILROAD TO COMPLY WITH THE PROVISOS.

The lands patented under the grants amount to some 2,900,000 acres, and the lands claimed as earned by the grantees but not patented to 250,000 acres, in round numbers. Prior to the institution of the Government's suit in 1908, some 820,000 acres had been sold by the grantees, of which 296,000 acres were sold in general conformity with the restrictive provisions and 524,000 acres without reference to them. Some 4,930 sales

were made for quantities not exceeding 160 acres, and 376 sales for quantities exceeding 160 acres, to one purchaser. The Supreme Court says that prior to May 12, 1887, 163,430.28 acres were sold to actual settlers in small quantities at prices slightly in excess of $2.50 per acre. The Attorney General states that prior to 1894 few sales were made in quantities greater than 160 acres to one purchaser. From the dates mentioned until 1903 no special attention was paid to the terms of the provisos, but lands were sold as purchasers appeared and in such quantities and at such prices as were agreed upon. The lands were withdrawn from market in 1903.

Two things resulted. The railroad company had made itself obnoxious to the law by its violations of the provisos prior to 1903, and after that date by its refusal to sell it obstructed the settlement and development of the lands and aroused the people of the State to demand that it obey the terms of the provisos. This demand had gained considerable strength in 1906, so that the Legislative Assembly of Oregon in 1907 memorialized Congress on the subject. There was also a constant and growing demand on the part of purchasers for the lands.

CONGRESS ACTS.

When the matter was submitted to Congress, Congress, deeming itself not prepared to pass upon the rights of the parties, gave them their day in court by the adoption, on April 30, 1908, of a joint resolution authorizing and directing the Attorney General of the United States to institute and prosecute any and all suits in equity, actions at law, or other proceedings to enforce any rights or remedies of the United States arising and growing out of the granting acts. Proceedings were brought in the United States District Court for the District of Oregon. This court held the lands for forfeiture to the United States. (See 186 Fed., 861–910.)

ACT OF AUGUST 20, 1912.

During the progress of the suit in the district court and pending action thereon it developed that in some patents issued to the grantees by the General Land Office the restrictive provisos were omitted. What proportion of the lands were so patented I can not now say. Purchasers of lands under patents issued without the restrictive provisos were not put on notice. Although everyone is supposed to know the law, the omission by a public official of an important provision from so formal a public document as a patent raised the question whether innocent purchasers were not relieved by the omission. Other patents recited the provisos or referred to them. Large areas of the lands, bought without reference to the restrictive provisos, were being productively used and considerable capital had been employed in their development. Reputable attorneys had passed favorably upon the abstracts of title.

It was the intention of the Department of Justice at first to ask for forfeiture of the lands sold in violation of the provisos as well as for forfeiture of the lands still unsold. A more careful examination, however, caused the department to suggest a different procedure. There were equities in its opinion in favor of the purchasers that did not exist in behalf of the railroad. Joining both parties in the suit for forfeiture might therefore have endangered the whole suit. The proposal was to proceed with the suit for forfeiture against the railroad, but to deal with the purchasers by legislation. Under the legislation the purchasers were divided into two classes—those who had purchased less than a thousand acres, against whom proceedings were not intended because of the great numbers of them, the difficulty in ascertaining their addresses, the expense, and the length of time it would take to try them, and after two years their title was to be incontestable; the second class consisted of those who had bought more than a thousand acres, who were to be allowed to come into court, confess judgment of forfeiture, and receive a patent upon payment to the Government of $2.50 per acre. The result of this legislation was to leave a clear-cut issue with the railroad over the provisos.

The Government has received nearly a million dollars from purchasers who confessed forfeiture and repurchased the lands under the conditions above stated.

BEFORE THE SUPREME COURT OF THE UNITED STATES.

The case was appealed by the railroad company to the Supreme Court of the United States. Decision was rendered by that body on June 21, 1915, which decision is reported in Two hundred and thirty-eighth United States Reports, page 393. The four parties which had appeared in the district court appeared before the Supreme Court. These were the railroad company, the Government, the cross-complainants, and the intervenors. The attorney general of Oregon appeared also in behalf of the interests of that Commonwealth. The cross-complainants were persons who had gone on the lands as actual settlers, each offering to pay to the railroad company $2.50 per acre for a quarter section of land. The intervenors were persons who had offered to purchase quarter sections at $2.50 per acre, without having become actual settlers on the lands. Sales were refused to both cross-complainants and intervenors.

The Government contended that the provisos were conditions subsequent, and that the railroad's disregard for and violation of them operated to work the forfeiture asked by the Government. The railroad maintained that the provisos were restrictive and unforceable covenants. The cross-complainants urged that the provisos created a trust for actual settlers and asked an enforcement of the trust. The intervenors gave the trust contended for a wider scope, so as to include all persons who desired to make actual settlement upon the lands. The attorney general of Oregon declared it to be to the interest of the State that the lands shall be "subject to settlement and improvement, as contemplated by the provisions of the grant, in order not only that those vast areas of the State may be improved, but also that the lands may not be withdrawn from taxation, thus depriving the State, and especially the 18 counties in which they are situated, of a large proportion of their resources from direct taxation."

The decision of the court is long and in many respects disappointing. Possibly it could not have been otherwise. While there were a number of issues involved, three stand out from a practical standpoint:

First. What were the provisos in effect?

Second. What was the extent of the railroad's interest in the lands under the grant?

Third. What was necessary to be done to secure the enforcement of the grant?

The court decided that the provisos were not conditions subsequent, as claimed by the Government, and, therefore, the forfeiture asked for was refused, but that they were covenants and enforceable, thus denying the railroad's contention. The court denied the claims of the cross-complainants and intervenors, with tears in its eyes, apparently upon the theory that the Government only could ask for the enforcement of the terms of the grant. In holding that the provisos constituted enforceable covenants, the court did not say whether or not they could be enforced by the courts, except by possible inference, but referred the matter to Congress for such action as it may be possible for Congress to take, without indicating what that action should be, except in an indefinite reference to the public interests.

The court enjoined the railroad company from selling any of the lands or timber thereon, and from the cutting and removal of any timber for a period of six months from the date of the entry of the decree by the district court, but after that date the company may apply for a modification of the decree so as to permit it to dispose of the lands and timber according to the terms of the provisos. With this application the court can deal as it thinks wise.

The decision does not determine what the total interest of the railroad is in the grant; it confirms the interest of $2.50 per acre for the land, but whether that is its entire interest is not stated; and in its reference of the matter to Congress it enjoins that "all the value the granting acts conferred upon the railroads" be secured to them. A more indecisive phrase than "all the value" could hardly have been chosen.

The court does not indicate what action Congress can take. What can be done is to be inferred or deduced from the decision and limited by whatever rights the railroads have acquired and can not be divested of. It is important that whatever legislation is enacted be valid in the courts. Litigation over the question of forfeiture by the courts occupied some seven years. Legislation enacted at this time, unless clearly within the power of Congress and properly providing for the rights of the grantees and their transferees, will be attacked by them. Their claim is substantially that they own the land, timber, and so forth, and can use or lease them, and are limited by the provisos only when they may at any time conclude to sell a tract of land. Their representatives appeared before the Committee on the Public Lands with a proposal to compromise for the sum of $10,000,000 additional to that already received by them from the grant from various sources. Legislation now enacted which would be contested in the courts over another period of years would be a disaster to us.

Referring again to the phrase used by the Supreme Court consisting of the words "all the value the granting acts conferred upon the railroads," their indeterminate and indecisive character is emphasized by the fact that the United States Court of Appeals at San Francisco, Cal., has within a few days certified

a list of questions to the Supreme Court, all of which I give below, but from which I now quote question 4:

Is the expression "all the value the granting acts conferred upon the grantees" or anything else in the decision of the Supreme Court contained to be taken as meaning that said grantees and their successors in interest have only an equity in the proceeds of the sales of the lands in question to the extent of the statutory selling price thereof?

Which is $2.50 per acre. These questions indicate the uncertainty in the minds of the appellate judges as to what the rights of the parties are under the decision. If the above question is to be answered in the affirmative, the legislation proposed in the pending bill has no ground to stand on.

QUESTIONS OF LAW CONCERNING WHICH THE COURT OF APPEALS DESIRES INSTRUCTIONS OF THE SUPREME COURT FOR ITS PROPER DECISION.

1. Was the decree of the District court of December 9, 1915, in accordance with the opinion of the Supreme Court?

2. If not, should the District court have made and entered its decree in the manner and form as proposed to it by the defendants in the decree submitted by them and set forth in the approved statement of facts?

3. During the continuance of the estate granted by the acts of Congress mentioned in the opinion of the Supreme Court, and while the grantees thereof and their successors in interest retain the same, have such grantees or their successors in interest, within the decision of the Supreme Court, the right to cut or remove or to authorize the cutting and removal of the timber thereon, or to remove or authorize the removal of mineral or other deposits therein or to sell the timber thereon or the mineral or other deposits therein, apart from the sale of the land bearing the timber or containing the mineral or other deposits, except as such right is suspended pending the congressional action referred to in the decision?

4. Is the expression "all the value the granting acts conferred upon the grantees" or anything else in the decision of the Supreme Court contained to be taken as meaning that said grantees and their successors in interest have only an equity in the proceeds of the sales of the lands in question to the extent of the statutory selling price thereof?

5. Does the decree of the district court conform to the mandate of the Supreme Court in the insertion in the second paragraph of such decree of the following: "And from selling any of the timber on said lands, or any mineral or other deposits therein, except as part of and in conjunction with the land on which the timber stands or in which the mineral or other deposits are found, and from cutting or removing or authorizing the cutting or removal of any timber thereon, or from removing or authorizing the removal of any mineral or other deposits therein, except in conjunction with the sale of the land bearing the timber or containing the mineral or other deposits"?

6. Does the decree of the district court conform to the mandate of the Supreme Court in failing to make provision for the termination of the injunction contained in the decree in the event that Congress shall make provision as therein provided?

SAN FRANCISCO, CAL., *May 12, 1916.*

STATEMENT OF PRESIDENT SPROULE.

In order that the House may have a statement of the position of the Southern Pacific Co. and the nature of the claim made by that company as the present owner of the grant, I submit a statement issued by President Sproule. This statement has been printed in circular form and also printed in the news columns of a number of papers. While I have had no communication with the company during the progress of this case, I presume the statement is authentic. I submit it simply for the information of the House:

The United States Supreme Court held that the company is the owner of the lands under the grant, with absolute title, subject only to the restriction that when it chooses to sell these lands it shall sell them only to actual settlers in parcels not exceeding 160 acres and at a price not exceeding $2.50 per acre. It reversed Judge Wolverton, who had held that because the company had sold these lands with the timber thereon in larger parcels than 160 acres and to persons not actual settlers and at prices exceeding $2.50 an acre the company forfeited its title to all the land unsold.

After receiving the grant the company offered the lands for sale in accordance with these restrictions, and in early times sold substantially all the lands that were suitable for settlement at prices not exceeding $2.50 an acre. But as the remaining lands were of a character not suitable for actual settlement, being timberlands in the mountains, it could not dispose of such lands by selling to actual settlers only, no such settlement being practicable.

Thereafter the company did make sale of timberlands in larger tracts than 160 acres to persons other than actual settlers and at prices exceeding $2.50 an acre. It was these sales that were made the foundation of a claim on the part of the Government that the company had forfeited its title to all the lands unsold, which claim was rejected by the United States Supreme Court.

In view of the decision of the Supreme Court, the company insists that being the owner of these timberlands, and under no obligation to sell them, and, in fact, it being impossible to sell them under the restrictions of the grant, it has the right of any other owner to dispose of the timber on those lands, just as it would dispose of any other crop produced by the land, at the same time admitting that when it comes to sell the land itself it must do so under the terms of the grant. The cutting of the timber from these lands is in fact a step toward making them fit for settlement, so they may be disposed of under the terms of the grant.

But the Government contends that the company shall not be allowed to realize more than $2.50 an acre for any of these lands, even though they may be worth many times that amount because of the timber thereon, and that, therefore, the company has not the right to dispose of the timber growing upon these lands. It is strange indeed that the Government should now maintain that the company has no right to the timber upon these lands, because for many years before coal was used as fuel it used this timber as fuel, without question, and the right to do this is clear, because the act of Congress granted the lands "to secure safe and speedy transportation of mails, troops, munitions of war, and public stores over the line of said railroad." Of course such object could not be accomplished without fuel to produce motive power.

And, further, this provision of the law implies that the road shall be maintained, and certainly the use of this timber for ties and lumber to be used in the construction and maintenance of the road would seem to be a matter beyond doubt.

Further, the Government, in the third section of the act, expressly granted the company the right to take timber from the Government sections of land adjacent to the line of road, and under section 10 it allowed the taking of timber from lands excepted from the grant by reason of being mineral. In view of this express grant to take timber from lands owned by the Government and not included in the grant, upon what pretext can the Government deny the company the right to take timber from the land granted to the company?

The facts show that the position of the Government, if carried out, would force upon the company a large financial loss; in other words, while the grant was one to aid the construction of a railroad, it would turn out to be, if the position of the Government is correct, the means only of producing a deficit for the grantee, and this appears from the following facts, stating in round figures:

Expense to the company of administering this grant	$1,372,000
It has paid taxes on these lands aggregating	2,758,000
Making total expense and taxes	4,130,000
The company's total cash receipts from all sources under this grant, including sales of lands, amount to	5,345,000.00
This leaves the company a net revenue from past transactions of	1,215,000.00
The lands of this grant heretofore sold aggregate (acres)	804,637.75
Which have yielded the company therefor an average net revenue for the lands sold per acre of	1.51

And further, this grant required the company to carry free for the United States its mails, troops, munitions of war, and public stores over this railroad without limit as to time. The value of this free transportation at regular rates which have been furnished the Government equals $2,084,467, which amount exceeds the receipts of the company under the grant by $868,641. It embraces the service between Portland and Roseville Junction, 664 miles.

From the experience of the past we may be certain that the company will be called upon to furnish the Government free transportation of the value of $75,000 per annum, and this is a perpetual obligation. Now, if we could sell every acre of the land at present unsold, viz, 2,400,000 acres, at the price of $2.50 per acre, this would yield $6,000,000, which would be used up in 80 years by the free transportation which we are bound to furnish the Government, leaving the company thereafter—for all the time—to furnish transportation to the Government without compensation.

But there is a considerable quantity of this land, at least 400,000 acres, which can not be sold at any price, hence the amount that could be realized by sales would be something like $3,000,000 or $4,000,000 at the utmost, from which expenses of administration and taxes must be deducted.

The company therefore insists upon its legal rights as the owner of these lands to dispose of the timber thereon; and any fair adjustment of this matter with the Government, considering all the facts, would not deny to the company this right—a right which in a similar transaction between private individuals would not be questioned for a moment.

THE INTEREST OF OREGON AND HER PEOPLE.

Prior to 1840 there had been some settlement in western Oregon, which, though not large in numbers, was excellent in character. After that date the call of the Great West was heard in all parts of the United States and elsewhere, and the numbers so increased that Congress admitted the State into the Union in 1859. The general character of its citizenship has always been of the highest quality. Its early communication with the world was by the long and dangerous roads across what was then known as the Great Desert and by the rivers to the sea. The territory was of great extent. The land was rich, fertile, and capable of sustaining a numerous people. All crops that flourish in the Temperate Zone thrive and produce abundantly. Congress made these grants to provide better means of transportation and to promote settlement. One road was to provide an outlet to the ocean at the mouth of the Columbia River, the other to connect with the great transcontinental railroads then being built from California to the East. There is no doubt but that Congress intended that these lands should pass into private ownership for purposes of development and to become a part of the taxable area for the support of the institutions of the State and its municipal subdivisions. We can see no reason now for changing the destination of the lands. We believe we are entitled to the full value of the grant as Congress intended to the same extent, for instance, as in grants of lands for school purposes. It makes no difference whether that value is of one kind or another, Congress granted to us whatever it contained to promote settlement and development after the railroad's claim had been satisfied. Eighteen counties in western Oregon have portions of these lands in them. They form a considerable proportion of the taxable area in several of them.

The table given below shows first the acreage of the grant lands in each county; then the total acreage of other lands taxed for county and State purposes; next the lands in forest reserves, as given by the Forest Service, and the lands in Indian reservations, as stated by the Indian Office; the fourth column gives the acreage of public lands under control of the General Land Office, which are additional to those in the preceding column; and the last column gives the total acreage, as given by the Oregon Blue Book, an official State publication. The acreage included in the brackets was obtained from a source other than the assessor's statement.

The withdrawal from taxation of the grant lands in these counties will be a serious matter for all of them. It is of especial concern to several which have very large acreages of the grant within their boundaries. The percentage of acreage that will be lost to taxation in five counties is as follows:

	Per cent loss.
Josephine	52.0
Jackson	36.6
Douglas	31.2
Lane	18.3
Coos	12.4

These serious reductions in the taxable area, with the consequent annual loss of taxes incident thereto, strongly support our contention for a more generous proportion of the proceeds derived from the proposed sales of the grant lands and timber than the pending bill provides.

County.	Oregon & California Railroad land according to county assessor.	Other taxed land according to assessor.	Reserved land as given by Forest Service and Indian Office.	Public land by General Land Office.	Total land by Oregon Blue Book.

[1] Indian lands, 817,896 acres. [2] Indian lands, 37,000 acres.

These lands, being the odd-numbered sections, are checkerboarded in with the even-numbered sections. This increases the cost and difficulty in constructing roads, maintaining schools, and other forms of development. Adding to this the great areas in forest reserves and other reserved lands, the difficulty is further increased. The forest lands are, of course, untaxed. The grant lands are now taxable, but settlement and development would increase their taxable value.

What I am insisting upon is this: The taxable status of these lands should not be changed to an untaxable status for any period whatever. As above shown, the counties have only a portion of their superficial area available for purposes of taxation. A certain and regular income from taxation is essential to their progress, and it might be said in the case of some of them, to their existence. To deprive them of this would be inimical to their welfare. In other words, by appropriate legislation enforce the terms of the grant.

It appears to me that if the policy of enforcing the terms of the grant were adopted, it would be possible, without encountering as many difficulties as will be involved in the adoption of any other policy, to provide for the disposition of these lands in accordance with the decision of the Supreme Court and conserve all legitimate interests in a proper way; that by so doing further litigation might be avoided; that the work of the counties would not be hindered, interrupted, and embarrassed, nor the lives of our citizens be embittered by the addition of unnecessary burdens of taxation.

There are scores of rural schools in these counties. The removal of the grant lands from the tax rolls will reduce the funds available for their support and impair seriously the educational advantages of thousands of children.

Congress made this grant to promote the settlement and development of a new and great Commonwealth on the Pacific coast, making it in such terms and under such conditions that it must inevitably become a part of the taxable area and the scenes of the operations of that great army of civilization and soldiers of the common good—the home builders who tame for the habitations of men the wild and vast unoccupied spaces of the primeval earth. This transformation is taking place. [Applause.]

Now, if another Congress, a half century later, because of no fault of Oregon or her people, but because the intermediate beneficiary—the railroad—has acted wrongfully, proposes to resume the grant and dispose of the same by sales, it should, acting as if for us, after discharging the claim of the grantees and reserving sufficient to reimburse the Government for the costs of administering upon the grant, deliver the remainder to us for our public uses, at least to the extent originally provided in the bill. We have done no wrong, been in no default, violated no law or condition, have proceeded as we ought to have proceeded, and ought not to be made to suffer.

Oregon and her people were the ultimate beneficiaries under the original grant, the railroad only an intermediate beneficiary with a limited interest. There is reason for proceeding against the intermediate beneficiary, yet under the decision of the Supreme Court it must be paid the full value of its interest. There is no reason for proceeding against the ultimate beneficiaries or depriving them of the proceeds of the grant further than to pay the claims above stated. We should receive full value also, and all that is done should be for our benefit and in our interest. Since it is now proposed to change the form of the grant its value should be paid to us, as above indicated.

Moreover Congress, when making the grant, took care of the interest of the Government. Prior to the grant these lands were for sale at $1.25 per acre. The act, while granting the odd-numbered sections, reserved the even-numbered sections, and provided that the price per acre for the latter should be not less than $2.50. This meant that the Government was to receive for the even-numbered sections under the grant as much as it would have received from all if the grant had not been made, and such additional amounts as the building of the railroad, the settlement of the country, and the establishment and maintenance of a civilized government in that section would add to the value of the even-numbered sections.

The conclusion is that since it is now proposed to change the arrangement, Congress ought to provide that the proceeds of the grant, after paying the charges above indicated, shall be paid to the State for its common-school fund, to the land-grant counties, and to the ports in proper proportions, at least according to the terms of the bill as originally drawn.

Mr. SINNOTT. Mr. Chairman, will the gentleman yield?

Mr. HAWLEY. Yes.

Mr. SINNOTT. I do not know whether the gentleman is going into the subject, but I understand he has been over these lands repeatedly, hunting and surveying, and that he knows more about the agricultural nature of the lands probably than anyone here. Does the gentleman intend to go into that matter?

Mr. HAWLEY. I will say in reply to the gentleman's question that in my judgment, having lived in that country all of my life, born there, large areas of this land involved in this suit are immediately capable of cultivation and settlement, and there are other large areas that can be added to them. What proportion that will be finally I can not tell, but it will be more than a moiety by a great deal, in my judgment.

Mr. SLOAN. Will the gentleman yield?

Mr. HAWLEY. I will yield to the gentleman for a question.

Mr. SLOAN. Will the gentleman state briefly what the present value of these unoccupied lands is, concerning which he has spoken as being fit for cultivation?

Mr. HAWLEY. The gentleman means the value per acre?

Mr. SLOAN. Yes, sir.

Mr. HAWLEY. It would altogether depend upon the character of the soil and location of the land, how close to market or other enterprises, how close to schools, and so many other conditions are involved that it would be almost impossible to tell. I can tell the general value of particular areas, but it would be difficult to fix a price per acre for land so widely scattered.

Mr. SLOAN. It would be greater approximately than $2.50 an acre?

Mr. HAWLEY. Yes. On the timber there is an assessed valuation of about $22,000,000, so I am informed by the tax officers. This is probably the value for market purposes at this time.

Mr. RAKER. Does the gentleman think the statement of McAllister——

Mr. HAWLEY. I did not hear the McAllister statement and consequently can not properly express an opinion upon that——

Mr. RAKER. Where it was said about 15 per cent of these lands was capable of being cultivated at the present time?

Mr. HAWLEY. The gentleman knows from his own experience that people go out on the public lands and find homes on lands that the railroad might not esteem fit for that purpose.

Mr. SINNOTT. Will the gentleman yield for a statement in answer——

Mr. HAWLEY. Yes.

Mr. SINNOTT. That 75 per cent of the land was susceptible of cultivation? That was the statement of the Commissioner of the General Land Office, and he got that information from the agent who went out and examined the land.

HARBOR IMPROVEMENT DISTRICTS.

Mr. HAWLEY. An illustration of the injury resulting from the removal of the lands from the tax rolls is found in the situation of districts organized under State law for the purpose of aiding the Government in the improvement of the waterways within the districts. These port districts are public corporations, with the taxing power and the authority to sell bonds. The ports have incurred a bonded indebtedness of over $2,000,000. Under authority of Congress, the War Department has received this money and has been and is using it in the construction of works of improvement duly adopted by Congress. These waterways will, of course, be open to the use of navigation generally, and the benefits arising from the improvements will not be confined to the localities which have contributed one-half to their cost.

There are a number of port districts in Oregon, but the following are specially interested in the pending legislation by reason of their including considerable areas of the grant lands in their districts—the ports of Nehalem, Tillamook, Siuslaw, Umpqua, Coos Bay, and Coquille. The ports did not anticipate the removal of these lands from the tax rolls. Such reduction will result in increasing the rate of taxation on the remaining lands. For instance, the port of Siuslaw has an assessed valuation of taxable property within its boundaries of $4,500,000, of which $1,408,685 consists of the valuation of grant lands, or over 30 per cent. Other ports will be similarly affected. I have here a statement which gives the details, and under the five-minute rule it is my intention to ask that the bill be amended to provide for the relief of the ports and will at that time explain their situation more fully.

It would be a travesty of justice if enterprising people who have undertaken to burden themselves for the public good should not be equitably provided for in the pending bill.

In the map on the easel the green represents the forest reserve in that portion of Oregon west from the backbone of the Cascade Mountains and on the Coast Range on the Pacific side. The red-checked spots represent the granted lands.

The CHAIRMAN. The Chair desires to inform the gentleman he has used 35 minutes.

Mr. HAWLEY. Very well. The white are either the lands in private ownership or public lands of the Government not yet appropriated.

Mr. JOHNSON of Washington. Will the gentleman yield for a question?

Mr. HAWLEY. I will.

Mr. JOHNSON of Washington. Has any real progress been made toward classification of the land on the large tract shown as forest reserves?

Mr. HAWLEY. Well, there has been some progress, but it seems to us to be slow.

Mr. JOHNSON of Washington. Not so as to invite any real settlement?

Mr. HAWLEY. Only settlement to a limited extent. The port of Siuslaw includes the land within the yellow lines here. I take this port because it will very clearly explain the situation. In this area there are $4,500,000 of assessed valuation. From the red-checked spots you can see the proportion of the grant lands within the port's boundaries. When that port was organized many years ago the land grants were being taxed under the county and State authority, and that port district was organized before there was any question of revesting title in the Government. The port had a right to expect that the grant lands would continue to bear a portion of the tax burden. The port has contributed to the improvement of the public harbor at Siuslaw about $325,000.

Mr. LA FOLLETTE. Will the gentleman yield?

Mr. HAWLEY. I will.

Mr. LA FOLLETTE. There is a railroad running out of that grant land down to the——

Mr. HAWLEY. From Eugene to the city of Marshfield—just recently constructed.

Mr. LA FOLLETTE. That gives two outlets instead of one for their products.

Mr. HAWLEY. Now, if compensation in this bill is not made to this port, which has contributed $325,000 for the improvement of a public harbor of the United States, expecting to pay the bonds issued to get this money from the proceeds of taxation of property within the port limits—if no provision is made for the relief of this port, the time will come in a few years when they will need to pay their bonds and the burden of taxes to accomplish that purpose will be very great. There is another reason. You see within these lines this area of green. That is a forest reserve—valuable timber which had no way of moving out to the markets of the world and consequently had practically no market prior to the improvement which is now approaching its completion.

There has been added to the value of these most favorably located forest lands an immense value by reason of the improvement of the waterway. They not only have rendered a public service in opening a waterway, to which they have contributed one-third of a million dollars, but have greatly increased the value of the property of the United States. At the proper time I propose to offer an amendment, which I trust this committee will approve.

Mr. MILLER of Pennsylvania. Will the gentleman indicate the lands in dispute?

Mr. HAWLEY. The red-checked ones.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. HAWLEY. For a question.

Mr. JOHNSON of Washington. Now, since this timber in the forest reserve near the port of Siuslaw is greatly increased in value through the development of that port, will not the placing in the market of a great quantity of timber right around the forest-reserve timber reduce the value of both and destroy the value of the forest reserves and keep all out of taxation?

Mr. HAWLEY. I have an answer to that which I have written out.

ACCRUED TAXES.

The bill proposes that there shall be advanced from the Treasury of the United States a sum sufficient to pay the taxes levied by the taxing powers in the counties in which the grant lands are situated, and which have now accrued and are liens upon the lands. For the years 1913, 1914, and 1915 such taxes are reported to aggregate over $1,300,000. These taxes are to be paid in order that the United States may obtain, and so be able to give to purchasers, an unencumbered title to the land and timber thereon. Nearly all the lands involved in this legislation have been patented to the railroad company and are clearly subject to taxation. The accrued taxes are a burden upon the lands and the title thereto and will so remain until paid. Resumption of title by the Government will not divest others of rights in the lands legally accruing and attaching thereto prior to the taking effect of the actual act of resumption. Whether the bill authorizes the payment of interest and the penalties fixed by law upon taxes that have become delinquent is not clear.

SETTLEMENT ON THE LANDS.

It was the intention of Congress when making the grant that the lands should pass as soon as possible into the possession of actual settlers. Congress has held the public land in trust for the people and has made the lands available for settlement and development. As a result, in every generation indomitable men and women have left the settled sections of the country, seeking homes on the frontier. The pioneers have been and are the advance guard of an ever-victorious army of civilization. Their willingness to undergo the privations, dangers, and hardships incident to the making of homes in a new country gradually but irresistibly extended our borders. That our country extends from sea to sea we owe to them. The pioneer spirit has been one of the most valuable characteristics of our people. Recognizing this fact, Congress devoted the lands in this grant to the settler, who has everywhere laid the foundations of the Republic. These lands should still be devoted to settlement. A family on every habitable portion of our land is the best guaranty of our future security and prosperity. Any tract of fertile and cultivable land will in a score of years or less be worth more and produce more than it will in a hundred or hundreds of years if left in a state of nature. While I do not think the bounties of nature should be wasted, I am for men, women, and children. [Applause.]

The bill does not provide for settlers who went on the lands in good faith and, after having spent considerable sums and time in making improvements temporarily, left them to earn more money for their improvement. Their absence is due to the refusal of the railroad to sell and the long continuance of the litigation. The date of settlement of those now on the lands should be fixed at a later date than the one given in the bill. Preference rights should be given to both these classes.

The chief purpose of the provisos was to provide for settlement upon the lands granted. The refusal of the railroad company to sell to the actual settlers is a material portion of the basis of the action against it. The actual settlers have a very strong case and claim for favorable consideration.

THE PROPOSED SETTLEMENT.

From the methods of disposing of this grant, the Committee on the Public Lands have chosen that of revesting title to the lands in the Government. This will operate to abrogate

the exclusive right of Oregon and her people. It provides for their sale, in part, and the division of the proceeds with others—strangers to the original grant. It risks prolonged litigation.

But I must not forget to state that the proposed legislation evidently proceeds upon the theory that the railroad company by reason of many acts in violation and in noncompliance with the terms of the grant has forfeited its right to manage the grant in its own interest and as the intermediary or agent for its disposal to those for whom it was originally ultimately intended. The refusal of the railroad to comply with the terms of the grant lies at the base of all the proceedings that have been had in reference to the grant—former proceedings as well as these.

That this matter is pending before Congress at all is due to the action of the people of Oregon. They waited many years and used all proper means to induce the railroad to comply with the terms of the grant. This being refused, they demanded the enforcement of the grant and their rights thereunder.

I earnestly call the attention of the Congress to the fact that when proceedings were instituted under the act of April 30, 1908, the Department of Justice made the demand for forfeiture the relief first asked for, contrary to the wish of the people of Oregon, who had caused the suit to be brought. The Supreme Court totally denied forfeiture as a judicial remedy. Whether it will uphold the relief asked for by the pending bill, of a related nature, is a very grave question.

The settlement proposed by the bill is to take the lands from the railroad and pay them $2.50 per acre for the lands still undisposed of. Whether this amount of $2.50 per acre is all the value that the railroad company has in the grant will still be left for the courts to determine. If the railroad's interest in the grant can be thus eliminated, the lands thus returned to the Government will be divided into three classes and disposed of as follows:

1. Power-site lands, withdrawn and held under conditions that amount to a permanent withdrawal, and their value is lost to the State, counties, and people of Oregon.
2. Timberlands, which is to include lands having a growth of timber of 300,000 board feet or over for each 40-acre subdivision, as estimated by the Government.
3. Agricultural lands, which consist of all lands not included in the previous classes.
4. Mineral entry, exploration, and disposition can be made on the timber and agricultural lands.
5. Any of the lands, however first classified, can be reclassified by the Secretary of the Interior whenever and as many times as he may desire.
6. Rights of way of all kinds for the removal of timber and for any length of time the Secretary of the Interior may fix are reserved over all classes of these lands when patented to purchasers or settlers.
7. When the merchantable timber on the lands in class 2—that is, the timberlands—has been removed the lands thus cut over will become subject to homestead entry without the payment of $2.50 per acre.

The timber on the lands classed as timberlands is to be sold by the Secretary of the Interior when in his judgment "reasonable prices can be secured therefor in a normal market," whatever that may mean, upon public competitive bids, to be paid for in cash or upon 10 yearly payments, in such quantities as the Secretary may think proper to offer. He can reject all bids. Large tracts of land may be divided into their smallest legal subdivisions at the request of purchasers which may result in the segregation of exceptional stands in such tracts for speculative purposes.

Buyers of timber receive a patent for the timber only, which must be removed within a specified term of years, and if any timber is not removed during the period specified the buyer loses it. It is proposed to make the timber so sold, separate from the land, taxable under the laws of the State.

The agricultural lands can be homesteaded by actual settlers who must pay $2.50 per acre for the lands; 50 cents to be paid when entry is allowed and $2 when final proof is made. Residence and cultivation for a period of five years is required. Final proof must be made within seven years from date of entry.

There are now upon the lands a considerable number of actual settlers, many of whom have been maintaining themselves upon the land for a considerable period and the others for a lesser time, but all of whom so far as my information extends are and have been acting in good faith. Under certain restrictions, such settlers as have resided upon the land since December 1, 1913, and have improved and cultivated it are given a preference right in making entry. I regret a more liberal provision was not made for the actual settlers. They have proven not only their own good faith, but also the agricultural character of the lands. It seems to me that in the case of no actual settler would justice be done, if he were dispossessed and another given the benefit of his toil and improvement, even if the date of his entry upon the land was later than that given in the bill, and I hope Congress will grant a more liberal provision for the settlers.

The last proviso in section 5 withholds from all forms of disposition for a period of two years relatively limited areas upon watersheds from which the cities of Portland, Oregon City, and Corvallis derive their municipal water supplies.

DISPOSITION OF THE FUNDS.

The moneys obtained from the sales of timber and of the agricultural lands are to be deposited in the Treasury of the United States and kept separate in a fund to be known as the "Oregon and California land-grant fund." The moneys so deposited shall be distributed as follows:

1. The railroad company shall be paid from this fund such a sum of money which added to that already received by it from previous sales shall together equal $2.50 per acre for every acre earned under the grant. How much this will be will require the suit provided in the bill to determine, but it will probably exceed $3,500,000. If land and timber have not been sold in sufficient amounts to provide this sum, or whatever sum may be found due the railroad company, at the end of 10 years the balance due shall be paid out of the Treasury of the United States and the Treasury reimbursed out of the first moneys received from the sales of lands or timber.
2. After the claim of the railroad has been paid, then the Treasury of the United States shall be reimbursed for the moneys advanced to pay the taxes accrued, as before explained.
3. When sales have been made in sufficient quantities to discharge the above two preferred claims, moneys thereafter received shall be divided as follows, yearly:
(a) Thirty per cent shall be paid to the treasurer of each county in which any of the grant lands lie for roads, highways, and bridges.
(b) Twenty per cent shall be paid into the common-school fund of the State.
(c) Forty per cent shall be paid into the general reclamation fund, and available for use anywhere in the United States.
(d) Ten per cent shall be paid into the general fund in the United States Treasury.

That is, one-half of the proceeds derived from the sale of the lands and timber on the grant after deducting the preferred claims shall be returned to the people of Oregon, and one-half taken elsewhere.

Before any county can receive any part of the funds in the yearly distribution, there must have been sold previously in such county enough land and timber of the grant both to pay $2.50 per acre for each acre resumed under this act by the Government and also to pay the accrued taxes as above explained.

In counties where sales are slow they will wait long for any returns into their treasuries. In counties where sales are made more rapidly they will share earlier. And the question of vital interest, especially to the counties which have any considerable bodies of these lands within their boundaries, is how long a period of years will elapse before they receive any appreciable amount from the division proposed above, and also how long it will be before they will be receiving from such division and from taxes on land and timber patented and returned to the tax rolls an amount equal to what they have been receiving from taxes. Good business policy requires a steady income for carrying on the business of the county. It seems to me that these lands should have been left on the tax rolls and that it was perfectly feasible to have worked out an effective and safe plan for the solution of the grant question on such a basis. Under the theory of this bill the grant lands become public property and the exclusive claim of Oregon is obliterated. Under the revestment theory Congress has a free hand and can do whatever it sees fit to do, now or at any time before the lands are sold.

Under no circumstances whatever should any of these lands be included in the forest reserves. There are now in the forest reserves in Oregon over 13,000,000 acres of land, or more than 20 per cent of the entire area of the State. The withdrawal of these vast areas is a great handicap in road building, in settlement and the education of the young, and upon our development generally. If for any reason, such as that of consolidation of areas, any of these lands are ever to be included in the forest reserves, it should not be done unless at the same time there should be returned to settlement and taxation an area equal in value and acreage.

There is held up before us a parade of certain sums that we may receive at some future time. But there will be an annual loss of taxes that to some of the counties at least will be very burdensome and for a period that will seem very long. Such loss of taxes will amount to millions under the most favorable view that can be taken of the working out of the method proposed in this bill.

The agricultural land will remain off the tax rolls for six years, at least, and probably for eight years, even if they were to be all taken at once. No one can tell how long the timber will remain unsold. There are no large mills operating south of Lane County east of the Coast Range of Mountains. The great body of the land lies south of this county. The sales of timber farther south in any considerable quantities will depend upon the future establishment of mills.

From over 13,000,000 acres of forest-reserve lands in Oregon the Forest Service sold some $200,000 worth of products, or

sales were made aggregating an average of about 1½ cents per acre during the last fiscal year. If this can be considered any criterion, even taking into consideration that the grant lands are somewhat more accessible, it will be a quarter of a century before enough has been received from them to discharge the preferred claims. The counties are now receiving some $435,000 from them yearly in taxes. The timber on these lands must be sold in competition with the hundreds of billions of feet of other timber on lands adjacent to these.

And some of the great departments which will have a voice in making sales have expressed the opinion that sales should proceed with great deliberation.

However, since the Committee on the Public Lands has reported this bill and it is now the basis of action for the House, I intend to offer some amendments to the bill when it is being considered under the five-minute rule and to support them by arguments, in the hope that the House in its wisdom may be induced to grant to the people of Oregon terms more favorable than those contained in the bill. The division proposed originally by the Department of Justice was that the counties should receive 40 per cent and the school fund of the State 40 per cent. This is a fairer division and, considering the great burdens placed upon the counties by this bill, a juster compensation. The 40 per cent for the common-school fund will increase a fund to which it has been the time-honored policy of our Government to contribute by grants of lands, and which increase is greatly needed.

If this legislation stands the test of the courts, it will give the Government a very great power over the welfare of a large portion of the State, and, in a measure, over the whole State. I earnestly urge that advantage should be taken of this opportunity to promote our welfare in the spirit of that former Congress, whose wisdom sought to make of Oregon, then far distant in time and space, a prosperous and populous State.

[Editorial from the Portland (Oreg.) Oregonian, Apr. 3.]

HOCUS-POCUS.

Let us examine once more the land-grant bill as prepared by the House Committee on Public Lands.

In determining the amount due the railroad it first provides for computing the gross acreage that inured to the railroad company under the terms of the grant. This is 3,182,169 acres, according to figures printed in the Supreme Court decision. To this acreage the $2.50 value due the railroad is to be applied. The result is $8,000,000 in round numbers.

From this are to be deducted amounts received through sale and various uses to which the grant was put by the railroad company. Such receipts net, according to the Supreme Court decision, were $2,495,094, or, say, $2,500,000, to preserve the round numbers.

There is also to be deducted approximately $1,000,000 in taxes, which will be advanced by the Government.

The net sum due the railroad company will therefore be about $4,500,000.

But all of the three million-odd acres is not to be put on sale. Title to that which has already been sold is apparently to be confirmed in the private holders. Lands unpatented to which the railroad company is entitled under the terms of the grant are not affected by the sale terms of the bill. Instead of three million-odd acres offered to settlement and industrial use the acreage will be only 2,075,616, not deducting water-power sites, which are subject to withdrawal. The probable offering will be about 2,000,000 acres.

The estimated value of this 2,000,000 acres as printed in the records in the case taken to the Supreme Court is $30,000,000. This is the sum that is to be subject to division among State, counties, reclamation fund, and Federal Treasury. Before distribution is made $2.50 per acre, or $5,000,000, is to be retained to pay the railroad company. Approximately $1,000,000 is to be deducted for taxes advanced by the Government and already taken out of the railroad's share. There will therefore be $24,000,000 to divide, of which the State school fund and the various counties will receive a total of $12,000,000.

The sum is well worth having, although the time of its full payment is bound to be remote. But observe what the Government gets. It charges the settlers $5,000,000 and pays the railroad company only $4,500,000. To the Government revert nearly 285,000 acres of unpatented land that would otherwise have gone to the railroad but which will become a part of the forest reserves or public domain. If these unpatented lands are worth the same as the remainder of the grant their value is $4,275,000. It also receives $12,000,000 as its share of the net receipts on lands sold.

It thus appears that the Government's profit on the land-grant transaction will be $16,775,000 and the State's $12,000,000. The bill purports to be a fifty-fifty division. It is hocus-pocus.

The CHAIRMAN. The time of the gentleman has expired.

Mr. JOHNSON of Washington. Mr. Chairman, I ask unanimous consent that the gentleman have five minutes more, not to be taken out of the allotted time.

Mr. FERRIS. Mr. Chairman, I object. We have to finish this bill to-day.

Mr. JOHNSON of Washington. There are not many Members present, and those who are present are interested, and the gentleman from Oregon is vitally interested.

Mr. FERRIS. Let me say to the gentleman I am giving away all of my time.

Mr. JOHNSON of Washington. I wanted some time on this bill. I do not think we will lose any time by letting the gentleman have the additional time.

Mr. FERRIS. The gentleman is not a member of the committee——

Mr. JOHNSON of Washington. Mr. Chairman, I withdraw the request.

Mr. FERRIS. I do not think the gentleman from Oregon [Mr. HAWLEY] will ask for additional time.

Mr. YOUNG of North Dakota. Mr. Chairman, I renew the request.

Mr. HAWLEY. Mr. Chairman, I appreciate the courtesy, but I think we ought to go on under the original arrangement.

Mr. LENROOT. Mr. Chairman, I yield such time as I have left to the gentleman from Oregon [Mr. MCARTHUR].

The CHAIRMAN. The gentleman yields 20 minutes to the gentleman from Oregon.

Mr. FERRIS. And I yield eight minutes to him.

The CHAIRMAN. The gentleman from Oregon [Mr. MCARTHUR] is recognized for 20 minutes.

Mr. MCARTHUR. Mr. Chairman, this bill is of great importance to the State of Oregon, as it provides for the disposition of 2,300,000 acres of land embraced in what is known as the Oregon & California Railroad Co. land grant. The general provisions of the bill have been fully explained by other speakers, but there are some points which I desire to discuss briefly. The original granting act and acts amendatory thereto provided that the railroad company should dispose of these lands to actual settlers in tracts not larger than 160 acres and at a price not to exceed $2.50 per acre. The original act was passed on July 25, 1866—nearly 50 years ago—and it was the intention of the Congress that the land embraced within the grant should go to the railroad company as an inducement to the construction of a railroad from California to the northern boundary of Oregon, and that the lands in question should be sold within a reasonable time and at a low cost as an inducement to settlement and development of the country.

It is fair to say that had the terms of the granting act been complied with by the railroad company within a reasonable time, the company's profits would not have been unusually large. The railroad company did, however, sell approximately 800,000 acres of the land in violation of the terms of the grant, but it has tenaciously held onto the remaining 2,300,000 acres and has thereby greatly retarded the development of western Oregon. During all the years up to 1908 the Federal Government took no definite action toward compelling the railroad company to live up to the terms of the grant, and all the while the land was becoming more valuable by reason of the development of the surrounding country and the growth and increasing value of the timber.

Inasmuch as the grant in question is now a highly valuable property, and inasmuch as the railroad company, according to the decision of the Supreme Court, has an equity of only $2.50 per acre in said grant, the following question naturally suggests itself: Who shall profit by this great increase in value? The Supreme Court has defined the railroad companys' equity. What are the rights of settlers of the State of Oregon and of the Federal Government in the premises? There is a great demand for the lands from persons who style themselves as "settlers," but is it fair to assume that Congress intended that these lands should be held for 50 years until they had greatly increased in value and then turned over to settlers for the paltry sum of $2.50 per acre? I, for one, do not believe that Congress ever intended that the railroad company should hold this land for such a long period of time or that quarter sections that have grown to the value of $15,000 to $20,000 should be sold at the figure named in the granting acts. A disposition of the lands in accordance with the terms of the original grant would doubtless be the means of enriching a large number of individuals—a few of them bona fide settlers, but a much larger number of them speculators. These speculators would follow the usual practice of the old days in the West and, after a brief residence and the securing of a patent, would sell the lands to other speculators or to large timber concerns. These speculators have been in league with shyster lawyers, demagogues, and candidates for public office, and many of them have been beguiled into putting up coin of the realm to pay the expenses of useless lawsuits and campaigns.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. MCARTHUR. I yield.

Mr. JOHNSON of Washington. That situation is going on in Oregon at this very day, is it not?

Mr. MCARTHUR. I believe it was last week. [Laughter.] I was born and reared in the West, in the State in which this

land grant is located, and I have seen the public domain looted by land thieves, timber thieves, and other parasites until the birthright of the people has passed from their control. I have seen the ruins of many a squatter's cabin—memories of the perjury and dishonesty of its former owner, who acquired and sold lands purely for speculative purposes. I have no quarrel with the bona fide settler, for it was he who made the great West and laid the foundations of a mighty empire. I would not by word or deed place a straw in the way of the honest homesteader or settler who is animated by a desire to have a home and to become a landowner. There is a wide difference, however, between the settler and the speculator. The one builds up the country, the other tears it down. The one leaves behind him a family, a home, schools, churches, villages, cities, institutions; the other leaves deserted cabins and burned stumps. I feel that the bill before us is designed to protect my native State from fraud and speculation, and for this, if for no other reason, I must support it. There are differences of opinion—honest differences—as to the power of Congress to pass legislation of this character, as it is ably contended by gentlemen of high standing and integrity that Congress has no power to alter the terms of the original granting act in respect to the disposition of these lands. I must, however, dissent from these views, and in so doing beg to refer to the language of the granting acts and to one of the concluding paragraphs of the decision of the Supreme Court of the United States in land-grant case (Oregon & California Railroad Co. *v.* United States, 238 U. S., 393), wherein the court said:

> This, then, being the situation resulting from conditions now existing, incident, it may be, to the prolonged disregard of the covenants by the railroad company, the lands invite now more to speculation than to settlement; and we think, therefore, that the railroad company should not only be enjoined from sales in violation of the covenants but enjoined from any disposition of them whatever, or of the timber therein, and from cutting or authorizing the cutting or removal of any of the timber thereon, until Congress shall have a reasonable opportunity to provide by legislation for their disposition in accordance with such policy as it may deem fitting under the circumstances and at the same time secure to the defendants all the value the granting acts conferred upon the railroads.

I therefore do not believe that it can be successfully argued that Congress can not legislate as to the disposition of these lands or that the courts will not uphold any proper act that may be passed.

We are here to legislate for the public weal—not for individuals or classes. The people of Oregon have large rights at stake in the matter before us. Our State has been hampered in its growth and development by the refusal of the railroad company to comply with the terms of the grant. An area larger than some of the Eastern States is to-day a howling wilderness as the result of the company's policy—a policy for which the Federal Government is responsible, because the proper officials failed to compel the railroad company to live up to the terms of the grant. In some of the southern Oregon counties the percentage of lands embraced within this grant is so large that development has been retarded. In some counties large areas are already withdrawn from the tax rolls by reason of being in forest reserves and, as a consequence, the burden of maintaining schools and roads and supporting the local government has fallen upon the shoulders of a few. To make matters worse, the railroad company has refused to pay its taxes on the grant lands since the forfeiture decree of the district court of the United States for the district of Oregon (reversed by the Supreme Court of the United States).

Mr. FERRIS. Mr. Chairman, will the gentleman yield for a question?

Mr. McARTHUR. I will.

Mr. FERRIS. I notice that there is a statement of facts before the Supreme Court that the lands are worth upward of $30,000,000. Is that a fair estimate?

Mr. McARTHUR. That is a pretty hard question to answer, Mr. Chairman, but a great deal depends upon the general conditions throughout the country and particular conditions affecting the timber market. Just now the timber situation is not what it should be, and the value of these lands is probably not as great as it would be if there were a greater demand for timber and greater activity in logging.

Mr. FERRIS. If the bill was enacted as it now stands, the State would get 50 per cent of the proceeds direct, would it not?

Mr. McARTHUR. It would get 50 per cent after certain deductions had been made.

Mr. FERRIS. It would get 50 per cent of the net?

Mr. McARTHUR. Yes.

Mr. FERRIS. The gentleman knows that there are a number of bills pending that propose to give land to the settlers, and under that the counties would not get a cent?

Mr. McARTHUR. The only people who would profit by these bills would be the speculators and the so-called settlers, who would get the land at comparatively small prices and sell it at high prices.

Mr. FERRIS. Does not the gentleman think that in adopting the views and policies of the bill that it would accomplish more for Oregon than anything else?

Mr. McARTHUR. My idea is that the bill follows the correct theory and presents a correct solution of the entire question.

In some of the counties along the coast the situation is even more serious, because large sections of the grant lie within the boundaries of certain port districts, which have been created by virtue of a general law of Oregon, and which have cooperated with the Federal Government in river and harbor development. The withdrawal of these grant lands from the taxing power of the port districts has been a serious blow to plans for river and harbor improvements; and unless this bill is amended to the end that a percentage of the proceeds be turned over to the port districts, the consequences will be serious. In fact, the validity of the outstanding bonds of certain port districts will be seriously imperiled by the removal of these lands from the taxing power of the districts, unless some provision is made for participation in the proceeds. Many of these ports have spent dollar for dollar with the Federal Government in river and harbor improvements, and have thereby made easier the facilities for commerce.

The pending bill provides that 30 per cent of the proceeds from the sale of these lands and their timber shall go to the counties in which the lands are located, to be used for the construction of roads, highways, and bridges; 20 per cent to the common-school fund of the State; 40 per cent to the reclamation fund, and 10 per cent to the general fund in the Treasury of the United States. I regret that the percentages allowed the county and State are not larger, for their growth and development have been arrested by the failure of the Federal Government to make the company live up to the terms of the grant. It is true that 40 per cent of the proceeds will go to the reclamation fund, but there is little prospect of this money being spent in Oregon. It has been suggested that, inasmuch as the land embraced within the grant originally belonged to the Federal Government, the State of Oregon should not be considered in the distribution; but in this connection permit me to say that the Federal Government never paid a dollar for the Oregon country, but acquired it by virtue of discovery and settlement; so when Oregon was admitted to the Union she turned over millions of acres of public domain to the Federal Government absolutely without cost.

The administration of this public domain, not only in Oregon but in the entire West, has until quite recently been fraught with much dishonesty. I mention all these matters not for the purpose of opposing the pending bill, but to emphasize the obligation that the Federal Government owes to Oregon and her people in connection with this entire question. For 42 years, from the passage of the original granting act, the Federal Government made no genuine attempt to compel the railroad company to live up to its agreement. Finally a suit was commenced and carried through to the Supreme Court of the United States, and now, 50 years after the passage of the original granting act, Congress is about to take over unsold lands and dispose of them in a manner that I for one believe to be proper. I approve of the theory of the bill before us and of the motives of the men who introduced it.

The Federal Government undoubtedly has the legal right to pay the railroad company its $2.50 per acre and take over the unsold portion of the grant, disposing of it or including it in a forest reserve. But has it the moral right to do so? Is it not true that the various counties and port districts have enjoyed the right to tax these lands, and would not their indefinite removal from the tax rolls become a serious burden to struggling communities? Would it be just and equitable to emasculate these communities in this manner? Some gentlemen will undoubtedly argue that Oregon is being overgenerously treated in this matter; but knowing, as I do, the heavy burden that many counties of the State have carried by reason of the land grant, I can not concur in these views. In fact, I feel that it will be many years before all the timber and land passes into private ownership, and it is safe to predict that some of the smaller counties are going to encounter more hardships.

Mr. FERRIS. Mr. Chairman, will the gentleman yield at that point?

Mr. McARTHUR. I will.

Mr. FERRIS. The Wolverton decision, which was in 1913, did designate a complete forfeiture, did it not?

Mr. McARTHUR. Yes.

Mr. FERRIS. And at that time the railroad quits paying taxes, and this bill proposes that the railroad pay those taxes up to date until it can be reimbursed by the sale of timber?

Mr. McARTHUR. That treats the counties fairly up to date; but what I am emphasizing is that they are going to have very hard times struggling along between the passage of the bill and until the land goes on the tax rolls.

I am sincerely hopeful that the timber and land will be disposed of with reasonable rapidity and that the county will be allowed to develop. Some of the land is fit for agriculture, and the bill provides that it shall forthwith become available for entry under the general provisions of the homestead laws. Other lands can be homesteaded after the timber is removed. The general character of the land is, however, nonagricultural. Much of it is heavily timbered, and there is a good amount of grazing or pasture land. There is room for the honest homesteader, and an opportunity for him and those who were on the land as homesteaders in good faith prior to December 1, 1913, will not lose their rights. The bill contains no comforting assurances for the speculator or professional land or timber locator, and the committee is wise in its decision that the proceeds over and above the railroad company's equity shall go to different public funds rather than into the pockets of parasites.

Demagogues and self-seekers have told the people of Oregon that they are being robbed of their birthright by the passage of this bill, and that the land and timber will go to the trusts and big corporations. These charges have been made solely for political effect and are thoroughly dishonest. The bill provides that the timber shall be sold by competitive bid and that the Secretary of the Interior shall have the right to reject any and all bids where he has reason to believe that the price is inadequate. It is inconceivable that the Secretary of the Interior would connive at the sale of lands for less than their value, and any suggestion to that effect is the product of a dishonest intellect.

The bill makes provision for protecting the water supply of Portland and other cities by providing that certain lands on the watersheds of streams, from whence came the water consumed by these cities, be withheld from entry for two years. This arrangement will give Congress ample opportunity to legislate for the further protection of the water supply of these cities. The subject can hardly be covered in the pending bill, although there are 11,360 acres of the grant lands in the Bull Run Forest Reserve—the source of Portland's splendid water supply.

In conclusion, Mr. Chairman, permit me to say that I am in favor of this bill because it authorizes the sale of this timber to the highest bidder under competitive bid; because it permits acquisition of agricultural lands at $2.50 per acre by actual settlers; because it protects the actual settlers who are now on the land in good faith; because it provides for early payment of the back taxes due the several counties in which the grants are located; because it does not contemplate the inclusion of this land in any national forest reserve; because it does equity to the railroad company by providing that the company shall receive $2.50 per acre, the amount specified in the grant; because it will safeguard the public interest against speculation and fraud; because it will put money into public roads and other improvements in the counties in which the grant lands are located; because it will put several millions of dollars into the irreducible school fund of the State, and, in brief, because it will protect the common interests of the great body of the people as against the selfish interests of a few hundred land and timber grabbers and professional locators. I must confess my dislike for some features of the bill, but I can not permit these objections to overcome my approval of the general plan of the measure and the public interests which will be conserved by its passage. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. FERRIS. What is the status of the time, Mr. Chairman?

The CHAIRMAN. The time allowed to the gentleman from Wisconsin [Mr. LENROOT] has expired, and the gentleman from Oklahoma [Mr. FERRIS] has 35 minutes remaining.

Mr. FERRIS. Mr. Chairman, I yield to the gentleman from Utah [Mr. MAYS] 10 minutes, or so much thereof as he may require.

Mr. MAYS. Mr. Chairman, an hour and 45 minutes have been occupied by the gentlemen from Oregon, and I believe we have received considerable information from their speeches. Unfortunately, however, no one of the three gentlemen has agreed with any other as to the proper policy that should be pursued in this bill. The gentleman from Oregon [Mr. SINNOTT] said that this bill was rotten at the heart. He seems to believe that things should be left as they were, unless his State gets all the proceeds. Throughout all of this time he has never brought in a bill that has sought to solve this problem that confronts us, and that the Supreme Court has said should be given legislative attention. The gentleman from Oregon [Mr. HAWLEY] has offered a bill which would not give the State of Oregon or the counties of Oregon one cent. It would all go, as the other gentleman from Oregon [Mr. McARTHUR] has stated, to speculators, who would buy this land at $2.50 an acre.

Mr. HAWLEY. Will the gentleman yield?

Mr. MAYS. I have only 10 minutes, but I will be glad to yield, however.

Mr. HAWLEY. The gentleman will remember that in the discussion before the committee, in answer to questions directly asked me, that was shown not to be the intention or the result.

Mr. MAYS. The gentleman did not speak loud enough so that I could hear what he said, but I have not time enough to yield further. I shall quote from the Supreme Court decision, which emphasizes the necessity for legislation here at this time. It says:

> If Congress does not make such provision—

That is, for the revestment of title and the disposition of these lands—

> the defendants may apply to the district court within a reasonable time, not less than six months from the entry of this decree herein, for a modification of so much of the injunction herein ordered as enjoins any disposition of the lands and timber until Congress shall act, and the court, in its discretion, may modify the decree accordingly.

Congress was given six months from the 9th day of December to act. That six months will expire on the 9th day of June next, and the Department of Justice has stated that unless Congress should act, undoubtedly the railroad company would apply for relief to the end that the decree be set aside and the injunction be dissolved, and in that case they say the Government would lose, at the agreed price that has been generally stipulated, the sum of more than $23,000,000. Many others have stated that this land was worth at least $60,000,000, on account of the timber upon it. The railroad company, of course, would like to keep it.

The gentleman from Oregon [Mr. HAWLEY] seems to believe that the railroad company ought to retain this land and do as they have done in the past—refuse to sell a single acre of it for years, and when they did sell any of it they did so in violation of the agreement or the provisions of the grant, under which they received the land, in parcels of as much as 40,000 acres to one lumber company, and the gentleman from Oregon would permit that kind of a system to continue to exist. I am glad to notice that the other gentleman from Oregon [Mr. McARTHUR] takes a fair and proper view of this matter. He believes that the State of Oregon should receive all that it is entitled to receive out of this bill. I believe that the chief objection that will be made to his bill will be that the State of Oregon and the counties of that State will receive more than they should receive. This bill as it is drawn first pays the back taxes of $1,500,000, then gives to the counties 30 per cent of this entire fund, 20 per cent to the State, and 40 per cent to the reclamation fund, which is a western proposition, of which Oregon in time will get its proper share, and 10 per cent will be turned over to the Public Treasury. Now, in all the other States whose public lands have been sold some 95 per cent, I believe, as a rule, has gone into the General Treasury and 5 per cent to the State. This, I believe, is more than fair treatment to the State of Oregon.

Something has been said here with reference to the executory contracts and the like. Claimants for 16,000 acres are here—their representatives are in the gallery now. They would like to get an amendment inserted in this bill to give these claimants preferred rights. But the Supreme Court has decided the question. The executory contracts that were entered into present a different proposition.

Mention was made a little while ago of Mr. John Lind, a former governor of Minnesota. I will give his experience in order to show something of the value of the land. Mr. Lind stated to our committee that in 1905 he purchased about 2,200 acres of timberland in that country for which he paid $10 an acre. He kept that land until 1910, and he sold it for $100,000 to the C. A. Smith Lumber Co. The C. A. Smith Lumber Co. gave him notes for $100,000, of which $40,000 was paid in cash, and $60,000 which he still holds for the 2,200 acres of land, the price being nearly $50 an acre. In answer to a question he stated that he did not receive enough for his land from the C. A. Smith Lumber Co. He has already received for his 2,200 acres $40,000 in money, and he has received interest since 1910 on $60,000. Yet he asks that the title to the 7,000 acres of land which the C. A. Smith Lumber Co. has assigned to him as security be guaranteed under this bill in order that he might have that much more value. It would be unfair to give to John Lind

or anyone else such a graft as that, and we have left that for future adjudication.

Mr. JOHNSON of Washington. Mr. Chairman, will the gentleman yield?

Mr. MAYS. Yes.

Mr. JOHNSON of Washington. Will the gentleman state whether it is also unfair to pass the land or the so-called title to the land to the C. A. Smith Lumber Co. either?

Mr. MAYS. I admit that; but two wrongs would not make a right. Some 40 individuals and corporations secured 400,000 acres of this land by special act of this Congress.

Mr. JOHNSON of Washington. Mr. Chairman, will the gentleman permit another question?

Mr. MAYS. Yes.

Mr. JOHNSON of Washington. Had it not been for these interveners who are to be shut out of any prospect of getting any piece of this land, would not the 3,000,000 acres have gone to the C. A. Smith Lumber Co.?

Mr. MAYS. No. The gentleman from Oregon [Mr. SINNOTT] stated that the Federal Government stood idly by and let the railroad company violate all these covenants without protest. What did the State of Oregon do through all this time, through all those 40 years? Senator CHAMBERLAIN stated before our committee that it was first called to the attention of the country in 1907 at a meeting over which he presided, when the president of the Southern Pacific Railroad Co., Mr. E. H. Harriman, stated that they intended to hold this land permanently—not to open it up for settlement or to sell it to settlers, but that they would need it in the future to make ties, and the like, and he would keep it. That was in 1907. That stirred up the matter. Through all the time the State of Oregon could be considered as guilty of laches in not bringing this to the attention of the Government.

Mr. CRAMTON. Mr. Chairman, will the gentleman yield?

Mr. MAYS. Yes.

Mr. CRAMTON. Is it not a fact, in the event that further legislation is not enacted subsequent to this bill to take care of contracts like the Lind contract, that Mr. Lind will have a contract pending yet with the railroad company which will insure him the title eventually to that land, and with no further payment to the Government?

Mr. MAYS. Mr. Lind has been guilty of violating the covenant. I can not say what the courts will decide in the future.

Mr. CRAMTON. He has a good contract with the railroad, and if the railroad retains the title to the land, then the railroad will be obliged to give him that land under the contract, and no payment will be made to the Government at all.

Mr. MAYS. That is the gentleman's own conclusion. I do not believe that the courts would so decided. But John Lind, when he bought, or the C. A. Smith Lumber Co., when they bought, 27,000 acres of land in violation of this grant, violated the covenant here under which the railroads secured the land, and I doubt whether any court would hold that that was a valid contract.

Mr. CRAMTON. But is it not a fact that the only thing that to-day prevents the railroad from performing its contract with John Lind is the injunction now pending and in force, and that in the absence of legislation by Congress within a reasonable time the court can dissolve that injunction, and when it is dissolved the company can proceed to perform its contract?

Mr. MAYS. There are entirely too many "ifs" in that proposition; any one of the "ifs" might defeat the gentleman's contention. However, the committee had this in mind, first of all, to revest title of 2,300,000 acres of this land unsold about which there was no dispute and to let these other little matters be settled in due course of time. If they want to bring suit, they may do so, and the Government will probably bring suit for an accounting with the railroad company. The railroad company by its own figures has received $5,600,000. They would like to receive the entire value of the timber. They urged the contention before us that the timber was separate and should be considered as separate and that they should be permitted to sell it and appropriate the proceeds to their treasury.

The CHAIRMAN. The time of the gentleman from Utah has expired.

[Mr. MAYS had leave to extend his remarks in the RECORD.]

Mr. FERRIS. Mr. Chairman, I yield 20 minutes to the gentleman from Wisconsin [Mr. LENROOT].

Mr. LENROOT. Mr. Chairman, I had hoped in general debate to discuss somewhat the very interesting proposition of the legal theory upon which this bill is based, but I can not do that and also discuss the only controverted proposition there is in the bill. I therefore shall reserve that discussion until we reach the section of the bill revesting the title in the United States. I want to address myself in the time I have to the contention made by the Representatives from the State of Oregon that this bill deals unfairly with them in the division of the proceeds that is provided in the bill.

I want to say at the very outset that the only criticism that can properly be held against the Committee on Public Lands in this respect is that it has been too liberal to the State of Oregon. [Applause.] I want to very freely confess that I think that extreme liberality has been due to the very persuasive arguments of the gentleman from Oregon [Mr. SINNOTT], a member of the committee, and the gentleman from Oregon [Mr. MCARTHUR]. The bill of Mr. HAWLEY proceeds upon an entirely different theory, and possibly the arguments of those gentlemen did make the Committee on Public Lands lean over a little too much in favor of the State of Oregon.

Now, the gentleman from Oregon [Mr. SINNOTT], in the speech that he has made this morning, speaks of the Government standing by as an apathetic spectator, permitting the railroad company to violate the terms of the grant.

Mr. Chairman, if there has been an apathetic spectator in this case that is subject to criticism it is the State of Oregon and not the Government of the United States. In 1907, for the first time, the State of Oregon officially took cognizance of the violation of the grant by the railroad company and sent a memorial to Congress, and within a few months thereafter Congress passed the act of 1908 directing the Department of Justice to bring an action in equity against the railroad company to forfeit the grant or secure compliance with its provisions.

There has not been an hour of delay on the part of the United States Government from the time that the State of Oregon asked the Government to proceed.

Further than that, he said that it was the duty of the Department of Justice to have proceeded in these matters. Now, in 1872, shortly after these grants were made, a trust company sought information from the then Secretary of the Department of the Interior as to the construction of the terms of these provisos—whether or not the railroad company would or could be permitted to sell these lands in quantities in excess of 160 acres to purchasers and at prices in excess of $2.50 an acre. The then Secretary of the Interior, Mr. Delano, replied that they could not do so, and that the Government in its construction of that act held that that was not permitted.

Again, in 1907, the matter came before the Department of the Interior, and Mr. Ballinger, then Commissioner of the Land Office, in a communication to a Member of the House of Representatives, expressed the view that "as soon as the title vested in the company (and it was his view that it had vested by the construction of the railroad), jurisdiction over the lands passed from the executive branch of the Government, and the enforcement of the provision (the sale of lands to actual settlers) rests with the courts, through appropriate action by either the settlers entitled to purchase or by the Government, acting through the Department of Justice."

He there holds that it was equally the duty of the State of Oregon and those interested in these grants to proceed in the courts as it was of the Department of Justice, and the most that the gentleman can say is that if there be dereliction, the dereliction is no more on the part of the Government than it is on the part of the State of Oregon. [Applause.]

Another contention made is that the State of Oregon has lost large sums of money in the development of the State through the failure on the part of the railroad company to live up to the terms of the grant. Now, Mr. Chairman, we had evidence before the committee in the hearings had upon this bill as to the character of the even-numbered sections of the lands which did go to patent and private ownership. You know that the odd-numbered sections were to go to the railroad and the even-numbered sections should be open to entry under the land laws at double the minimum price. If these lands would have built up the State, we would have a right to expect that the even-numbered sections would be devoted to agriculture and highly developed. But the testimony was that only a small percentage of the lands in private ownership has been developed; the timber has been cut off and they lie there waste, and the fact is that when we give it 50 per cent we give twice the sum more than they would have received if the land had been sold and the timber cut off and the land remained.

Now, what does the bill do for the State of Oregon? It gives Oregon, after paying off the railroad company and the taxes that are to be advanced out of the Federal Treasury, 50 per cent of the remainder, 30 per cent to go to the county for the construction of roads and bridges and 20 per cent to the State for common schools. In addition to that, we advance in this bill

$1,565,458 to the State of Oregon, or the counties in it, to pay off existing taxes, and that amount is at least double the amount that the State of Oregon is entitled to, and yet we are giving it to them here. These lands have been taxed by the State. There are three years' delinquent taxes; some of these lands have been assessed as high as $40 an acre, but the average is $8 or $10 an acre, when all the interest that the railroad company had in these lands, as admitted by everybody, was $2.50 an acre.

All that the State could equitably tax against the railroad company or against these lands was upon a valuation of $2.50 per acre, whereas the taxes that have been levied against them were three or four times that sum, and if these counties were getting what they were equitably entitled to, instead of $1,565,000 it would be less than $500,000.

Mr. SINNOTT rose.

Mr. LENROOT. I can not yield. We are making the State a clear gift in taxes of something like $1,000,000. What else do we do? We provide, then, that 50 per cent of the proceeds of these lands, after paying the full $2.50 an acre and reimbursing the Government for these taxes, shall be paid 50 per cent to the State of Oregon, 20 per cent to the school fund, and 30 per cent to the counties in which the timber is located. Now, what will that amount to? It was stipulated in the case in the Supreme Court that the value of this grant was upward of $30,000,000. The State forester of Oregon has estimated that there are 40,000,000,000 feet of merchantable timber upon these lands. The testimony is that that timber to-day is worth from 50 cents to $1.75 a thousand feet. Assuming that it is worth $1 a thousand, that is $40,000,000 for the timber alone, to say nothing of the value of the land. But assuming that we receive only $30,000,000 out of this grant, then what will Oregon receive? The counties will receive upon that basis $7,275,000, the State school fund of Oregon will receive $4,850,000, and the total to the State of Oregon on a $30,000,000 basis will be $12,125,000. Assuming that the grant is worth $50,000,000, upon that basis the counties in Oregon under this bill will receive $13,275,000, and the State will receive for its school fund $8,850,000, or a total of $22,125,000.

Now, what is the State of Oregon equitably entitled to receive from the Government out of the proceeds of this grant? The question is simple. The State of Oregon is entitled to receive only such sum as it will lose by the fact that the revested title to these lands is in the Government, and so long as the title remains in the Government these lands will not be subject to taxation. That is all the State is entitled to. But in this bill we provide that these lands, immediately as fast as this timber can be sold at reasonable prices upon a normal market, shall again go back into taxation. We provide that when the timber is sold and paid for the timber shall be taxed by the State of Oregon apart and separate from the land. So that all the State is entitled to receive is such sum as it will lose in taxes during this interim between the revesting of title and the going back of these lands again into private ownership.

Mr. MONDELL rose.

Mr. LENROOT. I can not yield. Now, what has the State of Oregon received in taxes during the past 40 years? That is a fair inquiry in determining whether this 50 per cent is an equitable division or not.

Up to and including 1912 the total taxes levied by the State of Oregon and all of its municipalities against all of the lands in this grant, including those sold and unsold while they were in the ownership of the Southern Pacific, was $2,752,599.31. We propose to pay them in this bill $1,565,458, making a total of $4,318,057, based upon the amount due March 1 last. In over 40 years Oregon has received in taxes, or has assessed as taxes against these lands, only $4,300,000. Under this bill, on a basis of $30,000,000 in value, it will receive over $12,000,000, and on a basis of $50,000,000 value it will receive over $22,000,000, or five times more than the taxes assessed against these very lands for over 40 years. And a considerable portion of these lands will at once become taxable again by the State of Oregon. I undertake to say that so far as loss of taxes is concerned, the division in this bill is twice too high instead of being too little.

Now, I want to say, too, that the division that we have provided for in this bill was a division over the protest of the Department of the Interior and the Department of Agriculture. The Department of Agriculture reported to our committee upon the first bill introduced that in its opinion there should be no division of the proceeds at this time, and none provided for until the claims of the railroad company and the taxes had been fully met. And the Department of the Interior in its report used this language:

> The timber as well as the lands will be subject to local and State taxation upon their disposition, and I do not know of any reason why the State and counties should receive such a large proportion of the proceeds of such sales.

I will say that the bill then provided for a division of 80 per cent to the State and counties, and 20 per cent to the Government.

Mr. SINNOTT. Will the gentleman yield?

Mr. LENROOT. Not now. The report of the Secretary of the Interior proceeds:

> The withdrawal of the lands from taxation will be to a large extent temporary, and while I have no objections to a provision that will fairly compensate the State and counties for losses incurred by reason of such temporary withdrawal of the lands from taxation, I can not approve of such a large donation of the proceeds.

Now—

> In any event, the amount that should go to the State and counties should be reduced by half; that is, should not exceed 20 per cent to the State and 20 per cent to the respective counties, under the conditions set forth in the bill.

In other words, the Secretary of the Interior recommends that a 40 per cent division to the State and counties would be a liberal one, while this bill which the gentlemen from Oregon criticize provides for a 50 per cent division.

Now, the gentleman from Oregon [Mr. HAWLEY] and the other gentlemen have complained because there are certain port taxes that are not taken care of in this bill. I want to say to the gentleman from Oregon that if he desires to offer an amendment that will provide for paying these port taxes out of the 30 per cent that we provide shall go to the counties, I do not believe the committee will have any very serious objection to it. This 30 per cent more than takes care of the port taxes and all other taxes that have been imposed or will be imposed, three times over, and it is most inequitable upon the part of these gentlemen to make any such complaints as they are making before this committee.

Mr. Chairman, as I said in the beginning, the only criticism that can be fairly lodged against this committee upon this question of the division of the proceeds is that the committee has been too liberal to the State of Oregon. The gentleman from Oregon [Mr. HAWLEY] in his speech talked about this grant "to us," implying the grant of these lands to the State of Oregon in comparing it to the grant of school sections. This grant was never to the State of Oregon. The State of Oregon never had a penny of interest in it, as it does in the grant of school lands or other grants, and if this grant had been disposed of under the terms of the proviso originally the State of Oregon would never have gotten a penny of this division, and the State of Oregon would never have gotten one tithe of what it has received in the past and what it will receive in the future under the terms of the bill. [Applause.]

Mr. FERRIS. Mr. Chairman, I feel just a little grieved to think that the gentleman from Oregon [Mr. SINNOTT], a man who had introduced no bill on the subject himself, a Member who had remained absolutely silent as to any initiative on the proposition of getting this land back, or his State anything, should—after the committee had agreed to pay deferred taxes to the amount of $1,500,000 and to grant to his State 50 per cent of the proceeds, over their own best judgment—come here and viciously criticize and attack the committee. In consequence of his actions here to-day, I feel some question as to his good judgment, for if his pro rata share of the funds are lost to-day it will be by reason of his lack of judgment. The gentleman from Oregon [Mr. HAWLEY] has introduced a bill which, if enacted into law, would not give the State of Oregon a penny, would not give the Government a penny, but would enable a lot of people out there who squatted on the land, and those who want to squat upon it, to get away with a lot of valuable timberland without paying anything for it. Some of this land has timber on it to the value of $20,000 to the quarter section. The gentleman from Oregon [Mr. HAWLEY] would, by his bill, have that homesteaded, and without one cent to the State or the Government. This is the sort of diligence two of the gentlemen have been exercising. They now come here to-day and assault the laches of the Government.

The gentleman from Oregon [Mr. MCARTHUR] has in good faith and earnestly tried to help the committee in the House and in the committee room in getting a bill through here that will do common justice to Oregon, or probably more than justice, and at least have some regard for the Government of the United States. The gentleman from Oregon [Mr. SINNOTT], I think, improperly assailed the Government of the United States for its alleged great laches and delays. What are the facts? Nothing could be more erroneous concerning the Government than a statement of that kind. The Government acted as soon as it was called to its attention—acted more expeditiously than anyone could properly expect it to act under the

circumstances—and it has recovered the land; and now comes the State of Oregon and wants practically all of the money.

The gentleman from Wisconsin [Mr. LENROOT] stated exactly what was in my mind and, I think, what was in the mind of nearly all of the committee. If the committee is subject to any criticism at all it is because we have been overgenerous to Oregon. The people of Oregon seem to think that this is their land. They seem to think that because the Federal Government comes in here and appropriates millions out of its pocket and sets the machinery of the Department of Justice in motion to recover this land, that it is parsimonious if it asserts any claim to the land at all.

Mr. GORDON. Why give all this land away to the State of Oregon? The gentleman is not here apologizing for this bill, is he?

Mr. FERRIS. Oh, I only have a minute or two, and I can not yield.

Mr. McARTHUR. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. I only have a minute or two, but I will yield to the gentleman from Oregon.

Mr. McARTHUR. Never mind; I will withdraw my request.

Mr. FERRIS. I did not know the bill was going to be attacked broadside. The real truth is that in less than a month from now the six months' period will expire, and if Congress does not make a showing of diligence the Government may lose $25,000,000 or $30,000,000. What has the gentleman from Oregon [Mr. SINNOTT] done about it? He is a good deal like the old maid who waited 25 years to be kissed. Finally the hired man threw her down and kissed her, and she said, "Thank God, it came at last, and without sinning." [Laughter.]

The gentleman from Oregon would like to lie around here and get twenty-five or thirty million dollars for his State against great protest on his part, and then blandly say I fought for more. Such procedure is hardly in keeping with the gentleman's usual good judgment. I do not think it just fair to the committee that was so generous to him. I do not dare say all of the things that ought to be said about what Oregon is getting out of this. If we did, they would throw Oregon down and take away what it is getting, and perhaps they will do it anyway. There are plenty of answers to everything that has been said here, and the committee hopes it will not have to make answers to all of it. There are plenty of answers to this page in the Washington Post, and we do not want to have to answer that. There are plenty of answers to bills introduced here which the Members themselves have withdrawn, and we do not want to answer them. Three great departments of the Government—the Department of Justice, the Department of Agriculture, and the Department of the Interior—are all behind the bill, and they think we are within the law and doing right. The Supreme Court decision authorizes us to do what we are doing. No minority report has been filed against what we are doing from a committee of 22 good men.

Mr. MADDEN. What about the old maid? Did she not file a protest?

Mr. FERRIS. Thank God, she found it without sinning, and that is what the gentleman from Oregon wants to do.

Mr. MOORE of Pennsylvania. Did the gentleman say "without sinning" or "without SINNOTT"? [Laughter.]

Mr. FERRIS. Oh, I said "without sinning." Mr. Chairman, I ask for the reading of the bill under the five-minute rule.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Be it enacted, etc., That the title to so much of the lands granted by the act of July 25, 1866, entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad in California to Portland, in Oregon," as amended by the acts of 1868 and 1869, for which patents have been issued by the United States, or for which the grantee is entitled to receive patents under said grant, and to so much of the lands granted by the act of May 4, 1870, entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon," for which patents have been issued by the United States, or for which the grantee is entitled to receive patents under said grant, as had not been sold by the Oregon & California Railroad Co. prior to July 1, 1913, be, and the same is hereby, revested in the United States: *Provided*, That the provisions of this act shall not apply to the right of way to the extent of 100 feet in width on each side of the railroad and all lands in actual use by said railroad company on December 9, 1915, for depots, sidetracks, wood yards, and standing grounds.

Mr. LENROOT. Mr. Chairman, I move to strike out the last word. This is the section that proposes to revest title in the Government to the unsold lands of this grant, and during the general debate a number of gentlemen made inquiries as to the theory upon which the bill was based. It was stated in response that it was based upon the direction of the Supreme Court in the decision rendered in the land-grant case last year, and it is in this language:

> This, then, being the situation resulting from conditions now existing, incident, it may be, to the prolonged disregard of the covenants by the railroad company, the lands invite now more to speculation than to settlement; and we think, therefore, that the railroad company should not only be enjoined from sales in violation of the covenants but enjoined from any disposition of them whatever or of the timber thereon, and from cutting or authorizing the cutting or removal of any of the timber thereon, until Congress shall have a reasonable opportunity to provide by legislation for their disposition in accordance with such policy as it may deem fitting under the circumstances and at the same time secure to the defendants all the value the granting acts conferred upon the railroads.

That is a clear expression of the Supreme Court of the power of Congress to revest in the United States the title to these lands; but Congress, of course, can not receive any power from the Supreme Court. All of the power that Congress gets over this or any other subject is from the Constitution itself.

And while the Supreme Court has made this broad general statement it must be assumed, of course, that in making it they had in mind some principle of law that would uphold the right of Congress to so revest title under the Constitution, and that is what I want to discuss for a moment.

Now, as has been said, there were two different grants, one in 1866, amended by the act of 1869, and the other by the act of 1870, to two different railroads but both of them finally merging into the Oregon & California Railroad Co., now owned by the Southern Pacific.

Out of these 2,300,000 acres all but 58,000 acres was granted by the act of 1866 and only 58,000 granted by the act of 1870. Now, the act of 1866 contained a section reserving to Congress the right to alter, amend, or repeal the act, and the act of 1869, which was amendatory of it, of course, carried with it that same power, but the act of 1870 had no such reserving clause in it.

Now, as to our power. So far as these lands are concerned that were granted under the act of 1866, which comprise all but 58,000 of the 2,300,000 acres, unquestionably under our right to alter, amend, or repeal we have the right to revest in the United States the title to those lands upon giving to the railroad company the full value of the grant, as the Supreme Court has said we must do in providing for their disposition. That we do in this act. So that as to all lands granted by the act of 1866, as we have provided for full compensation to the railroad, it seems to me there can be no question but that under the right to alter, amend, or repeal we have the power to do what is proposed to be done in this bill. As to the act of 1870, however, it did not contain the clause reserving the right to alter, amend, or repeal, and a different question arises.

The CHAIRMAN. The time of the gentleman has expired.

Mr. LENROOT. Mr. Chairman, I would ask for five minutes more.

The CHAIRMAN. The gentleman asks unanimous consent to proceed for five minutes. Is there objection? [After a pause.] The Chair hears none, and the gentleman is recognized for five additional minutes.

Mr. LENROOT. But there is another theory upon which this bill can be sustained, applied both to the act of 1870 and the act of 1866. The Supreme Court in its opinion several times referred to the fact that this grant, while it was a grant upon the part of the United States acting as a proprietor disposing of the public domain, it was also a law of Congress acting in its sovereign capacity as well as proprietor, and that law has been violated by the railroad company. The Supreme Court has said that there were two great purposes to be subserved by the grant—one to aid in the construction of the railroad, which was a great public benefit, and the proviso in relation to the sale of land to actual settlers not to exceed 160 acres and not to exceed $2.50 an acre was a provision in the public interest and a matter of public policy to secure the development and settlement of that great area of country. Now, it is clear as to that proviso that that was inserted to serve a public purpose. They have failed to comply with that, and therefore the public interest to be subserved by the proviso has failed, because the railroad company refused to carry it out. That public purpose then having failed, it is competent for Congress to accomplish that same public purpose in another way, and we propose to do it by retaking this title to these lands and giving to the railroad company the full value of the grant and securing the development and settlement of this country in the method that we provide in this bill. It is a public purpose to retake these lands under these circumstances, paying the railroad company for them, and then providing for the settlement of the country, as we do provide in the bill. And so, as to the land grant by the act of 1866 this bill can be sustained upon two theories—

the right to alter, amend, or repeal and the right to retake the land and paying the railroad for the full value for a public purpose. And as to the 58,000 acres of land granted under the act of 1870, it can be sustained by the latter proposition alone. [Applause.]

Mr. LA FOLLETTE. Mr. Chairman, I want to be heard in opposition to the pro forma amendment. Mr. Chairman, I have asked for this time for the purpose of making a few remarks in regard to what I consider to be an unwarranted attack by the chairman of the committee on a member of this committee, Mr. SINNOTT, of Oregon.

The gentleman from Oklahoma [Mr. FERRIS] seems to think Mr. SINNOTT was derelict in his duty because he did not introduce a bill on the California land-grant matter. His colleague from Oregon [Mr. HAWLEY], who represents the district, introduced a bill in the House, and his colleague from Oregon, Senator CHAMBERLAIN, introduced a bill in the Senate. Then why was it necessary for the gentleman from Oregon [Mr. SINNOTT] to introduce a bill to show he was interested in the Oregon land-grant matter? I think the records of our committee will show Mr. SINNOTT gave the matter as close attention as any other member of the committee, and was not in any way, shape, form, or manner derelict in his duty to his State or to his country. [Applause.] Mr. SINNOTT has the right to his opinion and has the right to express it in any fair way to the committee, and I can not help but think that when the gentleman from Oklahoma considers this matter he will expunge the remarks he made from the RECORD, and I think in a spirit of fairness he should do so.

Mr. FERRIS. Mr. Chairman, the gentleman from Oregon [Mr. SINNOTT] needs no defense at the hands of the gentleman from Washington [Mr. LA FOLLETTE]. No one here is more fond of the gentleman from Oregon than myself. I merely met argument with argument, and his argument was that the Government has been very derelict in its duty; and in my reply that the Government was not derelict—that if there be any dereliction at all it was himself, because he had introduced no bill at all on the subject—I merely stated the fact, which no one will or can deny. I did not intend to and was not, in stating plain facts, indecent or unfair, as suggested by the gentleman from Washington [Mr. LA FOLLETTE]. The gentleman and myself are on the same committee, and he knows that neither then nor now am I unfair to anybody.

The gentleman from Oregon [Mr. SINNOTT], after sitting all through the committee deliberations, after serving on the subcommittee that helped digest this bill, got up and said that the bill was rotten to the core, and did not back up his judgment by filing minority views. The gentleman from Oregon [Mr. SINNOTT] has been very solicitous and even very boisterous about getting a very large amount of this money for his State. Somebody here must at least see that the Government is not mistreated. It is not a pleasant task to defend the Government, but is certainly a very necessary one on this occasion.

The Government first gave the land to help Oregon get railroads. Now that a breach occurs and the Government must take it back, the State insists on all the proceeds.

Mr. RAKER. Mr. Chairman, the only reason why I rise at this time is to refer to the Attorney General's statement as to the power of Congress to act, which I will read later.

I want to say it seems that this little matter has risen, which it ought not to have done. The gentleman from Oregon [Mr. SINNOTT] is a lovable fellow, and for 10 days he was on the subcommittee having charge of this bill, which consisted of the distinguished gentleman from Wisconsin [Mr. LENROOT], the gentleman from Utah [Mr. MAYS], the gentleman from Washington [Mr. LA FOLLETTE], the gentleman from Oregon [Mr. SINNOTT], and myself. In addition to the work of the general committee, we gave 10 days of actual service, as much as we could, sometimes practically all day, with the various departments before us, and I was a little bit pained and a little disappointed at the gentleman from Oregon [Mr. SINNOTT] that he did not file minority views. As a matter of fact, the objection he has to the bill is as to the question of the amount of money that should go to the State. That is all. He did not mean—I know that he did not—that the bill is rotten to the core, because he made no offer of an amendment that would cover that, either in the committee or in the subcommittee. The districts of the gentleman from Oregon and mine join, and we reach hands across the border there, and I would not want to meet him out in the mountains for anything on earth and have him feel that we are trying to treat him otherwise than the best. I think the committee did go to its very utmost to assist the Oregon people because of the lovable character of our friend from Oregon. But still, you know, sometimes in consideration of a bill your overstep your bounds, and I am afraid that my friend from Oregon did that to-day, although he did not mean it.

Mr. BUTLER. I did not know that the gentleman charged indolence. He charged greediness.

Mr. RAKER. He said that the bill was rotten to the core. He did not mean that.

Now, in referring to the opinion of the Attorney General as to the power of Congress to act in this matter, it is stated in a few words. It says:

> The act of 1866, as we have seen, provides that Congress may at any time, having due regard for the rights of the railroad company, "add to, alter, amend, or repeal the act." This act affects the greater part of the lands involved. By the decision of the Supreme Court the rights of the railroad company are fixed at a sum not to exceed $2.50 per acre. Therefore Congress has the power to amend this act, provided it secures to the railroad company $2.50 per acre, that being the measure of its rights in the land.
>
> But, apart from this, the fact that the Supreme Court has referred the subject to Congress necessarily implies the power of Congress to deal with it along the lines of the court's opinion.

This bill accomplishes the disposition of the title by revesting it in the United States. The balance of the bill simply relates to the disposition of the land now or as early as it can be under the enactment of the law, and provides that if the railroad company is not satisfied by an agreement that can be had with the Attorney General they may go into a court of equity, and the Attorney General is directed, for the purpose of having the court fix and determine, so that the Government must pay the amount remaining up to the limit of $2.50 an acre for this land.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. FERRIS. Mr. Chairman, I ask unanimous consent that at the expiration of 30 minutes—25 minutes to be used on that side and 5 minutes to be used by some member of the committee—all debate on this section and all amendments thereto be closed.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that the time be extended 30 minutes—25 minutes to be used by the gentleman from Wisconsin [Mr. LENROOT] and 5 minutes by the gentleman from Oklahoma [Mr. FERRIS]—and that at the end thereof all debate shall be finished to this section.

Mr. FERRIS. That will fix them all up over there.

Mr. LENROOT. Mr. Chairman, I yield five minutes to the gentleman from Washington [Mr. JOHNSON].

Mr. JOHNSON of Washington. Mr. Chairman, some of the lands involved are in the district which I have the honor to represent. My interest in the quick settlement of the Oregon-California land grant, however, lies in the fact that I am Oregon's neighbor and well-wisher and because I want to see the lands in question disposed of as quickly as possible to small holders, and with the lands I would include the timber. I oppose this bill—all the sections of it. I can readily understand why the Members from Oregon do not stand against the bill in its entirety, a bill upon which the Public Lands Committee has labored hard and earnestly. The Oregon Members must know that if they develop much opposition the next move will be to throw this great tract of land into the forestry reserves, where it will be of even less value to the State than it is now. In my opinion the lands will be found in the forest reserve sooner or later anyway. Even if this bill passes, I doubt if we are going to see the astonishing spectacle of the Secretary of the Interior selling timber at wholesale in Oregon, stripping the land clean, and at his side the Secretary of Agriculture withholding timber from sale in the name of conservation. It is a fact that this land grant lies alongside a lot of forest-reserve land. For that matter, a lot of the granted land lies within the forest reserve.

I believe it will be a long, long time before the Government receives any $40,000,000 or $50,000,000 for the timber on these lands and before these counties come into any money from taxation. It will be a long, long time, too, before the stripped and denuded lands are occupied by homesteaders. The matter will go into the courts once more, and goodness knows when it will come out. What timber is sold will go to big timbermen.

Mr. Chairman, in this connection I desire to read from the twenty-fifth chapter of Matthew, as follows:

> A certain nobleman went into a far country to receive for himself a kingdom, and to return.
>
> And he called his servants and delivered unto each of them a talent, and said unto them, Occupy until I come.
>
> And it came to pass that when he was returned, having received the kingdom, then he commanded these servants to be called unto him that he might know how much every man had gained by trading.
>
> Then came the first, saying, Lord, thy talent hath gained ten talents.
>
> And he said unto him, Well done, good and faithful servant; because thou hast been faithful in a very little, I will make thee ruler over much.
>
> And the second came, saying, Lord, thy talent hath gained five talents.
>
> And he said likewise to him, Well, thou good servant, thou hast been faithful in a few things, therefore have thou authority over many things.

And another came, saying, Lord, behold, here is thy talent, which I have kept laid up in a napkin.

His Lord answered, and said unto him, Thou wicked and slothful servant, thou oughtest to have put my money to the exchangers, and then at my coming I should have received my own with interest.

Take thou, therefore, the talent from him and give it unto him which hath ten talents. For unto everyone that hath shall be given, and he shall have abundance; but unto him that hath not shall be taken away, even that which he hath.

That is a good parable to have in mind during eastern consideration of western development problems. In this particular case the railroad has been busy for 30 years kicking would-be settlers off of these lands. The timbermen, who secured large tracts from the railroad, when small settlers could not get a "hundred and sixty," have also kicked off all of the settlers or squatters they could find, either on the disputed sections or on some of the free sections, and now the Government—Congress, if you please—proposes with this bill to step in, kick the remainder off, and arrange things so that few others will get on that land within the lifetime of most of us here present.

The bill is going through, apparently. Desirable amendments will be voted down. Why? Because the Public Lands Committee has spoken? Because three great departments have decided what they think ought to be done. When they decide, this Congress acts.

Mr. SLOAN. What departments have told Congress what to do?

Mr. JOHNSON of Washington. This matter has been before the Agricultural Department, the Interior Department, and also the Department of Justice. All have reported, although the Agricultural Department falls into line rather reluctantly. It would like to take over the lands and the timber and conserve both for our children's children's grandchildren.

Mr. SLOAN. Does the gentleman mean to say that Congress will accept that mandate?

Mr. MONDELL. I feel quite sure that it will.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of Washington. Yes.

Mr. RAKER. Is not the gentleman sort of fearful over a thing that can never happen if the provisions of this bill are carried out and all the timber is sold as the bill directs?

Mr. JOHNSON of Washington. There are no "ifs" about it. The United States Government will be in the place of the railroad companies sooner or later, when this legislation goes through. But the matter will stay in the courts for years, in my opinion. There will be no taxes, and the dispute will go on and on, so that the land and the timber on it will finally wind up in the forest reserves.

To a considerable extent this is Oregon's affair; and yet the Oregon men are sharply criticized on this floor for doing and trying to take part in what will affect the future welfare of that State a great deal more than many of those who will vote on this measure can realize.

Mr. RAKER. Can the gentleman inform the House what kind of a bill can be passed to avoid any litigation and enable the Government to get what belongs to it?

Mr. JOHNSON of Washington. Yes; I think so, but not in 5 or 10 minutes. A few years ago land-hungry people were permitted to stampede into what was then the Indian Territory and grab lands free of charge. The pioneers of Oklahoma got their start that way, many of them. Other people will march into the Rosebud Indian Reservation in Montana this summer and get land. Still others will go to the Colville Indian Reservation in the State of Washington to get homestead land or to take their chances on getting some. This Oregon land was ceded away on certain terms. It was intended for settlers—homesteaders. They have not got it, nor will they. In my opinion they should have a real chance to get it.

Mr. RAKER. The gentleman would not propose that when they can not get enough land to build their cabins on.

The CHAIRMAN. The time of the gentleman from Washington has expired.

Mr. JOHNSON of Washington. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD at a later date.

The CHAIRMAN. Is there objection?

There was no objection.

Mr. MONDELL. Mr. Chairman, I shall not consume the time allotted to me as gentlemen on both sides have done in contributing to the campaign of the gentleman from Oregon [Mr. SINNOTT] by emphasizing his splendid and successful work on behalf of his State. I think they have clearly assured the gentleman from Oregon of reelection. He is entitled to it. I leave the matter right there.

I will, however, discuss some of the provisions of the bill. There are quite a number of us still here who were here on April 30, 1908, and remember the very pretty fight we had on that day, or a few days before that, in the passage of the resolution which became a law on that date, under which the Federal Government proceeded to seek a forfeiture of the Oregon and California land grants. Those of us who were then here, and particularly those of us who participated in that discussion, are, of course, more or less familiar with this general situation. The lower court found for the Federal Government, and, as I recall, brought in a decision forfeiting the grant. That decision was modified by the Supreme Court by a decision which, to my mind, speaking now as a layman and not as a lawyer, is not as clear and definite as it might be or as we hoped it would be.

The committee, which has proceeded under this decision of the Supreme Court to the consideration of the legislation now before us, has given a very great deal of time and attention to the matter, has called to its assistance the officials of the various Government departments that have to do with or have knowledge of these matters, and have brought in a bill which, after a very thorough and conscientious study, they believe is in accord with the decision of the Supreme Court and will best meet the situation and the conditions surrounding the lands of this grant.

I have some mental reservations with regard to the legislation. I am not altogether certain that under the decision of the Supreme Court it will be possible to revest the Federal Government in its title to these lands. I hope that it will be possible. The gentleman from Wisconsin [Mr. LENROOT], who is a very good lawyer—and I am no lawyer at all—smiles; he smiles in his confidence, but I have known very good lawyers before now who smiled and were certain, and yet did not find that the courts agreed with them. I hope that the legislation will stand the scrutiny of the courts. My regret with regard to it—and I am sure that it is the regret of all those who labored on the bill—is that it has not seemed possible to the committee to bring out legislation which would settle these questions without further litigation. I say this because I assume it is admitted by all who are familiar with the subject that we are simply providing for disposition of these lands after further and prolonged litigation. Beyond all question or controversy I assume the railroad company will contest the provisions of this bill. I am informed that the State of Oregon is also likely to contest the provisions of the bill.

Mr. LA FOLLETTE. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. Yes.

Mr. LA FOLLETTE. Can the gentleman conceive of any legislation that would have been reported out by this committee that would have been acceptable to the railroads and that would not have led to litigation, unless we had given them everything they wanted?

Mr. MONDELL. I want to say to my friend that I am not criticizing the committee. Personally I think I should have suggested legislation different from this, but I am going to support the legislation, brought in by the committee in good faith after consideration—after much more consideration than I have been able to give the matter since the Supreme Court decision.

But it is unfortunate that we must leave the matter, if we must, where it will take its long and tedious course through the courts before any conclusion is reached. Answering the question of my friend from Washington further, I wish to say I think it might have been possible to have brought in legislation without conceding everything that the railroad company demanded, without conceding anything improper or unwise, that would have settled the main questions involved without further litigation.

I am not entirely certain that such legislation as I have in mind would have been in all respects as satisfactory as the procedure that we now hope to follow under this bill will be if the matter is not too long delayed. There is a question, however, as to whether it might not have been better to have conceded some things to any early settlement of the matter rather than to have made provisions which are likely to prolong the agony for a good many years before we shall have a final settlement. This is particularly true in view of the fact that at the end of long and costly and tedious litigation we may find we have made no progress whatever. However, I make these statements not as a criticism, but simply as a suggestion of other ways in which the matter might have been approached.

Mr. LA FOLLETTE. Mr. Chairman, will the gentleman again yield?

Mr. MONDELL. Yes.

Mr. LA FOLLETTE. Does not the gentleman think, in view of the fact that this question is up to the Supreme Court itself, it would not be as long as it would be if it had to work itself up through the district court and then up to the Supreme Court at last?

Mr. MONDELL. I presume that the tests as to the provisions of this law will be brought, will be had in the local courts, and however the local courts deside the cases will undoubtedly be carried to the court of last resort. And it will take more than one suit, as the gentleman knows. It will take a variety of suits, because, as I understand it, the committee in bringing in this bill, in using the word "sold" in this section, does not intend to include the lands that were contracted for. Is that understanding correct?

Mr. LA FOLLETTE. Yes.

Mr. MONDELL. There must follow therefore the suits that will be brought in order to determine the rights and interests and equities of those who are interested in the 16,000 acres or more of land under contract. That could not perhaps have been avoided without provisions which would perhaps have been of doubtful wisdom; at least it would have subjected the committee to criticism. I beg to suggest, however, that I think the committee might have brought in a provision with regard to these contract lands which would not have been equitable, and which would have settled the matter much earlier than it will be settled under the conditions which will exist if this legislation is enacted. I realize, however, that that was not an easy matter to adjust.

Mr. LA FOLLETTE. Will the gentleman yield for a question?

Mr. MONDELL. Yes.

Mr. LA FOLLETTE. Does the gentleman think the suit that would be brought to settle the question as to those lands that have already been contracted for and are in controversy would have anything to do with the main question and the recovery of the unsold lands? It would only be incidental to the main purpose anyhow, and consequently I think that the decision to leave it out was wise.

Mr. MONDELL. Perhaps a suit of that sort was inevitable in any event, though I am not altogether certain as to that.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. LENROOT. I yield five minutes to the gentleman from Minnesota [Mr. VOLSTEAD].

Mr. VOLSTEAD. Mr. Chairman, I do not want to enter into any controversy with any gentleman, but I desire to make some suggestions in connection with this first section. It seems to me to be very doubtful that we have the power to reinvest in the Government the title to this land. The reasons suggested why we may do so are not persuasive. There are two provisions of our Constitution that may apply to this matter. One is the right to take property for public use. That right rests on necessity. I doubt very much that this is a public necessity in this case, and even if there is I do not believe that we comply with the necessary requirements in cases of that kind. We take it now, take it immediately. We pay for it 10 years hence. Is that a compliance with the Constitution, which requires that property shall only be taken upon compensation being paid therefor?

Then there is another constitutional provision which requires that this land must be taken under due process of law. Is it due process of law for us to act as judges in our own case and determine this whole matter by this act? In the lower court it was held that we had no right to demand a forfeiture. In effect you declare a forfeiture when you say that this land shall immediately revert to the Government. That land has vested in the railroad company. If this forfeiture is valid, what becomes of the railway mortgages? You can not forfeit the railway company's title without forfeiting these mortgages. You make no provision for their payment. Upon what theory can this be sustained? There are many questions still to be litigated. You proceed as though everything was plain, as if the railway company had forfeited the land. Why is not the company entitled to its day in court upon its right to have this land settled and upon the terms and conditions of sale?

Mr. LENROOT. I want to suggest that there is no forfeiture involved in this bill.

Mr. VOLSTEAD. My contention is that it is the same thing in effect, and that you can not avoid it by calling it a different thing. The company's interest is forfeited, though you make some provision for payment in part, a provision that the railway company has no power to enforce. I do not believe there is any necessity for reinvesting the Government with this title.

I believe that other means could have been provided that would have been strictly within the ordinary proceedings in law. We could have provided, for instance, that a receiver should hold and dispose of these lands or we might have provided machinery under which the railroad company could have been compelled to deed this land upon the happening of certain conditions that would have carried out the purpose of the grant. It seems to me it is unwise to take this extreme position. I am in thorough sympathy with this legislation. I think something of the kind ought to pass; but I feel that we ought to proceed along what we all recognize as safe and conservative lines, so that we will have as little litigation as possible. This bill will certainly invite a great deal of litigation, litigation that may make it necessary in years to come to pass further legislation in regard to it. If it does, settlement will be delayed, and those for whom the legislation is passed will suffer in the meantime. I am simply anxious to pass laws that we can sustain in the courts, laws that will be of advantage to the country and will carry out the views and purposes we have in mind. [Applause.]

The CHAIRMAN. The time of the gentleman from Minnesota has expired.

Mr. LENROOT. I yield five minutes to the gentleman from Oregon [Mr. SINNOTT].

Mr. SINNOTT. Mr. Chairman, a moment ago some captious criticism was directed against me for not having introduced a bill and also against the State of Oregon for not having obtruded itself into the department of government and put in motion the machinery to adjust this grant. As to the criticism of myself, I will not answer it. I hardly think the chairman of the committee meant that criticism in the way it sounded, and I do not propose to reply to it more than to say that a small part of these lands are in my district; that my colleague [Mr. HAWLEY] introduced a bill in the House and Senator Chamberlain introduced one in the Senate, and that I have been for the Chamberlain bill from first to last; that I have made no different fight on this floor to-day that I have been making continually in the committee, trying to represent my State and the views of the people of my State relative to this division. [Applause.] As to the criticism upon the State for not going into this matter sooner, I will say to you, Mr. Chairman, that the facts as to the violation of this grant were in the possession of the Government from the very day of the first violation up to the day of the last violation. These facts were not in possession of the State of Oregon, but the Government did know of these violations and did apathetically let them go on.

Mr. QUIN. When was the first violation?

Mr. SINNOTT. I will explain that. In 1872 the Secretary of the Interior rendered an opinion to the Attorney General, informing him that the position taken by the railroad company was erroneous. The Attorney General at that time tried to have that opinion suppressed. The records in the case show that the reports of all these sales were made by the railroad companies to the Secretary of the Interior. They show repeated violations beginning about the year 1892. Prior to 1892 there was no affirmative violation of the settlers' laws. That is, the railroad companies did not sell to anyone in quantities greater than 160 acres, but there were negative violations of that grant—that is, the railroad company refused to sell to actual settlers. The people of the State of Oregon were not aware of that fact. Evidence of those negative violations was not produced before the court deciding this matter. We only learned of that accidentally. The gentleman from Washington, sitting on my left [Mr. LA FOLLETTE], endeavored to buy some of these grant lands in the year 1878, and then the railroad company asked him $10 an acre for those lands. It was not until after 1892 that the sales to any great extent were made in quantities of over 160 years. We did not know of those sales in Oregon, but the department here in Washington knew of those sales and paid no attention to them. Indeed, the Forestry Department made an exchange for these same lands after 1897.

Mr. QUIN. Why did not they pay attention to it?

Mr. SINNOTT. It was not until 1897 that one of these deeds that conveyed a large amount of property was placed on record in Oregon. About that time the agitation commenced. Of course, the people are slow to act in such matters.

The CHAIRMAN. The time of the gentleman from Oregon has expired.

Mr. FERRIS. I have five minutes remaining, and I will yield the gentleman three minutes of it.

Mr. SINNOTT. The records before the Supreme Court show that the railroad company endeavored to suppress the information about these violations concerning the settlers' clause. Here is an extract from a letter from Charles W. Eberlein, the acting land agent of the railroad company dated February 19, 1904, to their chief counsel, Mr. Herrin in San Francisco. I will read one clause:

> I realize the necessity of not calling any more attention than is absolutely necessary to the provisions in our grant which are already giving us trouble.

That was the position of the railroad company, endeavoring to cover up this entire matter. We did not have the information in Oregon, but the information was on the departmental records here in Washington. When we did know it we acted with great diligence. We passed this resolution in 1907, and it is not until 1916, nine years after the passage of the resolution, that we get this matter adjusted.

I reiterate that it was not the duty of the State of Oregon, it was the duty of the Government of the United States to see that there was no violation of the grant.

The CHAIRMAN. All time for debate having expired on this section, the Clerk will read.

The Clerk read as follows:

SEC. 2. That the Secretary of the Interior, in cooperation with the Secretary of Agriculture or otherwise, is hereby authorized and directed, after due examination in the field, to classify said lands by the smallest legal subdivisions thereof into three classes, as follows:

Class 1. Power-site lands, which shall include only such lands as are chiefly valuable for water-power sites, which lands shall be subject to withdrawal and such use and disposition as has been or may be provided by law for other public lands of like character.

Class 2. Timberlands, which shall include lands bearing a growth of timber not less than 300,000 feet board measure on each 40-acre subdivision.

Class 3. Agricultural lands, which shall include all lands not falling within either of the two other classes:

Provided, That any of said lands, however classified, may be reclassified, if, because of a change of conditions or other reasons, such action is required to denote properly the true character and class of such lands: *Provided further*, That all the general laws of the United States now existing or hereafter enacted relating to the granting of rights of way over [illegible] permits for the use of public lands shall be applicable to all lands title to which is revested in the United States under the provisions of this act. All lands disposed of under the provisions of this act shall be subject to all rights of way which the Secretary of the Interior shall at any time deem necessary for the removal of the timber from any lands of class 2.

Mr. SINNOTT. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Amendment by Mr. SINNOTT: Line 24, page 4, amend by inserting after the word "of" the word "merchantable."

Mr. BOOHER. Will the gentleman permit me? If you will add the word "saw," you will perfect it. Unless you do that, you will include other things, like telephone poles and such.

Mr. SINNOTT. I will state that the term "merchantable timber" is very well known in the State. It is a term that the department has used.

Mr. BOOHER. Telephone poles are merchantable timber.

Mr. SINNOTT. Telephone poles are included in merchantable timber.

Mr. BOOHER. Then the gentleman wants to include that kind of timber under his amendment?

Mr. SINNOTT. Yes.

Mr. BOOHER. Has the department sold telephone poles as merchantable timber?

Mr. SINNOTT. I think they have been in the habit of selling telephone poles as merchantable timber.

Mr. STAFFORD. Mr. Chairman, I rise in opposition to the amendment. In the presentation of the case this morning the chairman of the committee said that there was some difference of opinion between the various departments as to the amount of timber that should be the basis of determination, whether it should be considered agricultural or timber land. I would like to press the gentleman a little further as to what was the minimum amount recommended by the department and what was the maximum amount, and particularly whether the department recommended limiting the character of the timber as merchantable.

Mr. LENROOT. The amount recommended by the department was 1,000,000 feet and another department recommended a greater amount, but the committee after hearing all the testimony and being extremely liberal to the State of Oregon, increased it to the amount named in the bill, 1,200,000 feet.

Mr. STAFFORD. The gentleman is speaking of a quarter section.

Mr. LENROOT. Two hundred and fifty thousand feet to a quarter was recommended by the department.

Mr. STAFFORD. And limited the timber to merchantable timber.

Mr. LENROOT. Yes; as we have it.

Mr. STAFFORD. But by this amendment you are making it more liberal to the people who wish to locate on the land.

Mr. LENROOT. Possibly.

Mr. LA FOLLETTE. The idea of making it 300,000 feet was to give greater opportunities to the farmer, the agriculturist. It only takes a few trees, in many cases, of the character of the trees in that section, that large timber, to make 300,000 feet. You can readily see that it would take a large lot of agricultural land away from settlement if the limit of timber per 40 is made too low, and it is to give more opportunity for homes that it was made a little more liberal than the 250,000 feet.

Mr. STAFFORD. How many feet of boards are in one of these trees?

Mr. LA FOLLETTE. I have seen any amount of trees that would make 30,000 or 40,000 feet.

Mr. STAFFORD. That is not the general character of timber I saw when I was in the Northwest last summer.

Mr. QUIN. How many trees are there on an acre?

Mr. LA FOLLETTE. It does not take many trees to make 1,000,000 feet in some localities.

Mr. STAFFORD. I do not think we should liberalize the provision made by the committee. The committee has gone beyond the recommendation of the department in increasing the amount of standing timber to determine whether it should be passed as agricultural or timber land. I think one criticism of this bill is, as has been stated by the gentleman from Oklahoma and by my colleague from Wisconsin, that it is too liberal to the people of Oregon and too little consideration of the welfare of the country at large.

Mr. LA FOLLETTE. This is not so much liberality to the people of Oregon as to the people of the entire country, the men who desire to get homes. They can get a homestead more advantageously if they have a larger amount of timber allowed on each 40-acre tract. There is any amount of these lands which are valuable agricultural lands. I think the utmost liberality should be allowed in providing that as much of this land can go into settlement and the making of homes as possible.

Mr. STAFFORD. Mr. Chairman, I have not much knowledge of western forest lands, but I have sufficient to know that these lands will be valuable for timber purposes, and when they are valuable for timber purposes they should be classified as timberlands and the rights of the Government protected along those lines. In this amendment you are going contrary to the recommendations of the Department of Agriculture and the Interior Department. You are taking away the benefits that will accrue to the Government by classifying these lands as merchantable timberlands. We have gone to the extent of 200,000 additional board feet to the quarter section by increasing the basis of classification as timberlands, and I do not think we should go any further. I can conceive of growing timber on these 40 acres which in a few years will be valuable as matured timber, and yet when you put in there the word "merchantable" you are virtually going to give to some of these settlers valuable timber rights not available to the public generally.

The CHAIRMAN. The time of the gentleman from Wisconsin has expired.

Mr. BOOHER. The gentleman then objects to giving the settler on these lands anything but the bare rocks and the hills that are there?

Mr. STAFFORD. Mr. Chairman, I ask unanimous consent to proceed for two minutes more.

The CHAIRMAN. Is there objection?

Mr. FERRIS. Mr. Chairman, reserving the right to object, I ask unanimous consent that debate on this section and all amendments thereto close at the expiration of 20 minutes.

The CHAIRMAN. Is there objection?

Mr. MONDELL. Does that mean the section?

Mr. FERRIS. Yes.

Mr. DAVENPORT. I desire to have five minutes to offer an amendment.

Mr. FERRIS. I counted the gentleman in.

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. The Chair desires to ascertain how the time is to be apportioned?

Mr. FERRIS. Five minutes to the gentleman from Oklahoma [Mr. DAVENPORT], five minutes to the gentleman from Missouri [Mr. BOOHER], five minutes to the gentleman from Mississippi [Mr. QUIN], one minute to the gentleman from Washington [Mr. LA FOLLETTE], and two minutes to the gentleman from Wisconsin. Does the gentleman from Wyoming desire time?

Mr. MONDELL. I do not desire to have any time.

Mr. FERRIS. And two minutes to the gentleman from California [Mr. RAKER].

Mr. STAFFORD. Mr. Chairman, in reply to the gentleman from Missouri [Mr. BOOHER] I desire to state that I am just as considerate of the welfare of the settler as anyone, but I do not believe that we should give to the settler timberlands under the guise of giving him agricultural lands. There is only one rule that this committee can consistently follow as to the determination of what are agricultural lands and what are timberlands, and that is the recommendations of the heads of the respective departments that have these matters in charge. The

departments say that they should be classified as timberlands with not less than 250,000 standing feet to the 40 acres, and yet the committee recommended 300,000 feet, and now you are going to go still further at the behest of these local people, and I am not blaming them for endeavoring to get all they can. I believe in conservation of our natural resources. I believe these timberlands should have a different rule applied to them from what is applied to agricultural lands; and who knows better about that, the head of the Forestry Service or we? I am willing to take the judgment of the Forestry Service in that regard, and not allow persons out there, under the guise of getting agricultural lands, to come in and locate virtually on timberlands.

Mr. LA FOLLETTE. Mr. Chairman, I simply want to say that in raising this amount from 250,000 to 300,000 the committee went upon the principle that the committees of the House and the Members of Congress should have some little initiative and not leave everything to the departments of the Government. [Applause.] We are having a little too much bureaucratic control in this Government at the present time; and I also want to say that I can not blame the gentleman from Wisconsin [Mr. STAFFORD] for taking the view of timberlands that he does. There is a vast difference between the toothpicks of Wisconsin and the mammoth trees of Oregon.

Mr. BOOHER. Mr. Chairman, I desire to offer an amendment to the amendment of the gentleman from Oregon [Mr. SINNOTT] by adding the word "saw" after the word "merchantable."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amend the amendment by adding, after the word "merchantable," the word "saw."

Mr. BOOHER. Mr. Chairman, I do not understand the argument of the gentleman from Wisconsin [Mr. STAFFORD]. He said that he was in favor of conservation, and yet he is in favor of a provision in this bill that would cut a whipstock off this land and sell it. He wants to sell the whole thing. I want this bill to give something to the settler who goes on the land. I want something left for the homesteader. I do not believe it is the object of this bill or the policy of this committee to sell all of the timber on the land. The departments have never indulged in it. They have always measured it as lumber, and they sell it board measure. This amendment is more restrictive. It is not as liberal to the timber purchaser as the gentleman wants to be. It restricts what may be cut off this land. It is a conservation measure. It leaves the timber that will not be saw timber standing on the land, so that the man who comes there and buys it from the Government or homesteads it may have some timber on his land. The gentleman says that timber may grow up and become valuable. Why not let the homesteader have it, then? The Government sells the saw timber in the first instance and gets all it is worth. It is paid for and the man comes there to make a home and he leaves a patch of this timber, and why should he not have a right to it?

Mr. LENROOT. Does the gentleman think that 160 acres having a stand of piling timber and telegraph poles worth $15,000 should be open to homestead?

Mr. BOOHER. Piling would be saw timber. You can not take a simple telephone pole or fence post and make saw timber of it. They do not use that kind of timber for piling in my country.

Now, I think this amendment I offer ought to be adopted. I believe the timber to be sold ought to be defined. I believe that the sale of that timber ought to be restricted instead of enlarged, and instead of making it merchantable timber make it merchantable saw timber, so there may be something left on the land for the people who hereafter may desire to homestead it. [Applause.]

Mr. RAKER. Mr. Chairman, I trust the amendment offered by the gentleman will not be allowed. It is intended to define as timberland where there is less than 300,000 feet of timber, board measure, per 40-acre tract. This is intended to mean that there is timber that will be cut according to the custom of the country for sawmill purposes, and when that amount of timber is estimated by the inspector on the ground to be less than the amount named then it is agricultural land. If it is more, it is timber land. The gentleman from Missouri [Mr. BOOHER] has put an amendment in here that will defeat the homesteader, of whom I am in favor, believing that he ought to have the telegraph poles, believing that he ought to have the piling, that he ought to have the timber that will make posts, whereas the amendment of the gentleman from Missouri will classify all of that kind of timber as merchantable saw timber, which they can do, and it will probably strip the land from the homesteader, whereas under the wording of the bill he can take the piling and the telegraph and telephone poles and the posts and clear the land and make it agricultural, and when he cuts these poles from the land he will get a revenue that will assist him in developing the land. That is what we want. I trust the committee will vote down the gentleman's amendment, because it is against the homesteader.

Mr. DAVENPORT. Mr. Chairman, I desire to offer an amendment on page 4, in line 14, after——

Mr. LENROOT. There is an amendment pending now.

Mr. DAVENPORT. But the time has been fixed. After the comma, following the word "agriculture," in line 14, page 4, I want to strike out the two words "or otherwise."

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 4, line 14, after the word "agriculture," strike out the words "or otherwise."

Mr. DAVENPORT. Now, Mr. Chairman, after the other amendment has been disposed of, I desire to address the committee.

Mr. QUIN. Mr. Chairman, I am in favor of the amendment offered by the gentleman from Missouri [Mr. BOOHER]. It strikes me that Congress certainly ought to get as much out of it as we can for the Government and at the same time leave this land in shape for the man who wants to homestead. I think this Congress is indeed fortunate to be able to vote for this bill. Out of 4,000,000 acres of land given to the Southern Pacific Railroad by Congress in 1866, land which belonged to all of the people of this Nation, all of which should still belong to the American people, there are about 2,000,000 acres in the State of Oregon which we are trying to get back, and it seems to me it matters little whether Oregon gets it all so that the United States Government gets enough to pay the expenses. Of all the fraudulent schemes that have ever been perpetrated I think the act of Congress that granted away all of these millions of acres of land—timber, oil, gold, and silver—to this railroad corporation heads the list. The Southern Pacific Railroad Co. has sold 800,000 acres of the land for over $5,000,000.

Under the Supreme Court decision we now have the opportunity to save the other 3,200,000 acres of land which, I think, was wrongfully granted to the railroad company. The evidence shows this land is worth $50,000,000. Some of it $200 per acre.

Think of it! Four million acres of land given to one railroad company, and we are now working around and squabbling over $2.50 an acre, and whether a whipstock or riding switch shall be cut off these acres of land which some homesteader may want. We are leaving the sublime and coming to the ridiculous. Let us pass this bill. If we do not get it through by the 9th day of June the railroad holds all the land. I do not care if the Government can not get it, let the State of Oregon get it. Let us be honest and let some part of the people of this Republic get this land. What is the use of quibbling around here about a telephone pole, about a whipstock, some $2 proposition, when we have only 15 days' time under the courts' decision to save 3,200,000 acres of land for the people? The Southern Pacific is not asleep. This bill has to pass the Senate after it leaves the House. Let us pass the bill and let the Government dispose of this timber so that the people can settle upon the land and build homes.

Why, if there is 40,000 feet of timber in one tree, as the gentleman from Oregon states, the Government ought to get this land and sell that timber and let it be manufactured into lumber to build up that country and let a lot of people who say they can not get enough to eat in the cities in these times of prosperity go to Oregon and go to work and raise products and feed the people. [Applause.]

I am not opposed to their having plenty of timber to build their fences with; whether the trees are a foot through or half a foot through or an inch through, we do not care. That is all right; whether one of these big trees makes 40,000 feet of lumber or whether it is a little tree that can be made into a post, I am in favor of the farmer who wants a homestead. [Applause.] If he can get a farm at 50 cents an acre paid down and $2 when final proof is made, it is a boon to him and the country. That is what the public domain is intended for—bona fide homesteaders. I have always condemned the acts of Congress in bygone years which granted all of these public lands to a few fellows who had a railroad charter.

Mr. JOHNSON of Washington. Will the gentleman yield?

Mr. QUIN. I have not time to yield. It seems to me that enough of these farmers could go out there and soon have more than my friends SINNOTT and HAWLEY, from that State as Representatives in Congress, if we pass this bill and give the people a chance to go there under the bill as drawn here. I do not want to see the State of Oregon get all of this money, but let us pass this bill as the committee has brought it here and get it through to the President to sign before the 9th day of

June [applause], so that the American Government can get what is coming to it.

After this case has gone all the way to the Supreme Court of the United States, has run the gauntlet, and obtained the information suppressed by the railroad company showing that fraud had been practiced and the grants of Congress violated, which the gentleman from Orgeon says was done by the railroad company in all these years—and I do not doubt that, for I know the methods of railroad corporations in dealing with the Government after the agents and servants of the people give them, through solemn acts of Congress, virtually all of the public domain in many of the States of this Republic, I am not surprised at the statement the gentleman makes when he said that this railroad company had violated the land-grant contract, which Congress had foolishly granted to the railroad company, in order to maintain this great landed right by suppressing information and keeping it from the Land Department, from the attorney general of the State of Oregon, and the Attorney General and the Secretary of the Interior of the United States. [Applause.]

It takes work to protect the interest of the people. The sharpers are always active and on the alert. There was some smooth work done when Congress was induced in 1866 to give all of those millions of acres of land to that railroad company. Let us work with all of our vigor to get as much as possible restored to the people.

Gentlemen, we now have the chance to get back 3,200,000 acres of fine land from one railroad company. Let us do our full duty by staying on guard day and night till this bill becomes a law. Future generations will rise up and bless the memories of the Congressmen who are now fighting the battle of the people in passing this measure. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. DAVENPORT. Mr. Chairman, the amendment that I offer is a proposition as to who shall classify these lands as timber, agricultural, or mineral lands. The first part of the section provides that the Secretary of the Interior, in cooperation with the Secretary of Agriculture, shall do this, and then the words "or otherwise" are thrown in. Now, I confess that if this land is as valuable as it has been represented to be, the departments having to do with the rights can cooperate in making these appraisements. The words "or otherwise" ought not to be in that provision, because it ought to be mandatory that the Department of Agriculture and the Interior Department, cooperating together, shall make that valuation and classification. I know, unless it is different from what it is in any other State of the Union where Government timberland is involved, there is going to be an effort made to have a lot of it classified as timberland, and I know that those interested in timber are going to do everything they can to have that classified for those who expect to bid on the timber. I believe the words "or otherwise" ought to be stricken out of this bill, and let it read that the Secretary of the Interior, cooperating with the Secretary of Agriculture, shall make this classification, and then have the two cooperating together make the classification. Then there can be no complaint made either by the State of Oregon or by the Government representatives if it is not properly done. I care not so much who buys this timber if it is possible to get it out of the hands of those who have been holding it for years, and who have been improperly holding it, as the court has decided. If you give half or more of it to the State of Oregon and the people, where they may get the benefit, I do not care for that. But I do say this, that if you are going to give any of that land to the homestead settler, where he may be permitted to make a home, there ought to be some restriction on the class of the timber to be taken from the land, and there ought to be something more than the bare ground left to him where he makes his homestead.

I lived for a time in a section of the South where they had iron works, and they went out in the forest and cut all the timber off the land in order to make charcoal. You could not get any settler to take that land, because it was barren and there was no timber to make improvements. And there ought to be some restriction as to the size of timber or the kind of timber that is to be taken off of this land. I think that could be easily remedied. Whether the timber shall be classed as telephone-pole timber, that will be a matter to be settled by the Government when they go on the land. If they do not, no man can tell who will classify it or know what the words "or otherwise" means.

Mr. FERRIS. Mr. Chairman, I yield three minutes to the gentleman from Michigan [Mr. FORDNEY].

Mr. FORDNEY. Mr. Chairman, I think to amend those class 2 lands would be a serious mistake. The language in the bill as it is proposed is too broad. If you have the words "saw timber or merchantable timber" inserted, merchantable timber would include everything on the land.

Now, it is provided in class 2 lands, where the timber does not exceed 300,000 feet to the 40 acres; that is, 1,200,000 feet to the quarter section—I venture to say that one-half of the land of that grant will not cut more than 1,200,000 feet of saw timber per quarter section.

Mr. COX. Would that be heavy timber?

Mr. FORDNEY. It would be heavy timber in the mountains.

Mr. COX. Would that be a heavily timbered tract?

Mr. FORDNEY. Yes. I will say that not more than half the lands would cut that much of timber per quarter section, unless you make it merchantable, so as to include fence posts and telegraph poles, and so forth. But merchantable saw logs on the Columbia River are limited to 16 inches at the top end of the log. Any log below that in diameter is not a merchantable log and is not supposed to be scaled, and the logger will get nothing for it. But as to fence posts or telephone poles or any other use you can put them to, it would make them merchantable. A great portion of those lands contain nothing but very large timber, and no small timber at all; and therefore, if you include the words "saw timber," you are going to take all the timber away from the homesteader and he will get nothing. I think it would be a great mistake to amend by either inserting "merchantable timber" or "merchantable saw timber." The language as it is seems to be correct.

Mr. FERRIS. Mr. Chairman, there are three amendments pending. I hope they will all be voted down, and I think the departments which have gone over this so carefully and spent so much time on it have reached a just conclusion about it. We had all of them with us in considering this bill, and they have had experience in lumber propositions and experience in formulating language, and I think if we put language in this bill with which we are not familiar it will harm the bill rather than do it good. My colleague [Mr. DAVENPORT] asks to strike out the words "or otherwise." I hope the amendment will not prevail, for these reasons: There are times when it would be a ponderous, cumbersome procedure, and would always force the two departments to act in the premises before any action can be taken. I hope they will be voted down.

The CHAIRMAN. The question is on the amendment of the gentleman from Missouri [Mr. BOOHER] to the amendment of the gentleman from Oregon, which the Clerk will report.

The Clerk read as follows:

After the word "merchantable," insert the word "saw," so that the words will read, "merchantable saw timber."

The CHAIRMAN. The question is on agreeing to the amendment of the gentleman from Missouri to the amendment of the gentleman from Oregon.

The amendment to the amendment was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Oregon.

The amendment was rejected.

The CHAIRMAN. The question is now on the amendment proposed by the gentleman from Oklahoma [Mr. DAVENPORT], which the Clerk will read.

The Clerk read as follows:

Page 4, line 14, after the word "Agriculture," strike out the words "or otherwise."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

Mr. SINNOTT. Mr. Chairman, I have another amendment to section 2.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Oregon [Mr. SINNOTT].

The Clerk read as follows:

Amendment offered by Mr. SINNOTT: Amend, line 24, on page 4, by striking out the words "three hundred" and inserting in lieu thereof the words "five hundred."

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 3. That the classification provided for by the preceding section shall not operate to exclude from exploration, entry, and disposition, under the mineral-land laws of the United States, any of said lands, except power sites, which are chiefly valuable for the mineral deposits contained therein, and the general mineral laws are hereby extended to all of said lands, except power sites: *Provided*, That any person entering mineral lands of class 2 shall not acquire title to the timber thereon, which shall be sold as hereinafter provided in section 4, but he shall have the right to use so much of the timber thereon as may be necessary in the development and operation of his mine until such time as such timber is sold by the United States.

Mr. SINNOTT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Oregon [Mr. SINNOTT] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SINNOTT: Amend line 3, on page 6, by adding, after the word "States," the following:

"*Provided, however*, That the Secretary of the Interior may reserve before sale for the operation of mines such timber as he may deem necessary."

Mr. SINNOTT. Mr. Chairman, the object of this amendment is to enable the Secretary of the Interior, in his discretion, to reserve timber that may be needed in small quantities for the operation of mines.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oregon.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

SEC. 4. That nonmineral lands of class 2 shall not be disposed of until the Secretary of the Interior has determined and announced that the merchantable timber thereon has been removed, and thereupon said lands shall fall into class 3 and be disposed of in the manner hereinafter provided for the disposal of lands of that class.

The timber on lands of class 2 shall be sold by the Secretary of the Interior, in cooperation with the Secretary of Agriculture, or otherwise, to citizens of the United States, associations of such citizens, and corporations organized under the laws of the United States, or any State, Territory, or District thereof, for cash or payment in not exceeding 10 equal annual installments with interest on such deferred payments as the Secretary of the Interior may prescribe, not to exceed 6 per cent per annum, at such times, in such quantities, and under such plan of public competitive bidding as in the judgment of the Secretary of the Interior may produce the best results: *Provided*, That said Secretary shall have the right to reject any bid where he has reason to believe that the price offered is inadequate, and may reoffer the timber until a satisfactory bid is received: *Provided further*, That upon application of a qualified purchaser that any legal subdivision shall be separately offered for sale such subdivision shall be separately offered before being included in any offer of a larger unit, if such application be filed within 90 days prior to such offer: *And provided further*, That said timber shall be sold as rapidly as reasonable prices can be secured therefor in a normal market.

Persons purchasing under the provisions of this section shall be given patents when the purchase price is fully paid conveying to them the timber and expressly reserving the land to the United States. The timber thus purchased may be cut and removed by the purchaser, his heirs or assigns, within such period as may be fixed by the Secretary of the Interior, which period shall be designated in the patent; all rights under said patent shall cease and terminate at the expiration of said period: *Provided*, That in the event the timber is removed prior to the expiration of said period the Secretary of the Interior shall make due announcement thereof, whereupon all rights under the patent shall cease.

No timber shall be removed until the issuance of patent therefore, but the Secretary of the Interior may, in his discretion, issue patents from time to time on any legal subdivision whenever the amount received on any bid is sufficient to pay the full purchase price of the timber on such subdivision.

All timber sold under this act shall be subject to the taxing power of the States apart from the land as soon as patents are issued as provided for herein.

Mr. LENROOT. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Wisconsin [Mr. LENROOT] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. LENROOT: On page 7, line 23, after the words "from time to time," insert the words "for the timber."

Mr. LENROOT. Mr. Chairman, this is simply designed to correct an omission which was called to the attention of the committee, but which was not corrected.

Mr. FERRIS. We accept it.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Wisconsin [Mr. LENROOT].

The amendment was agreed to.

Mr. BOOHER. Mr. Chairman, I desire to call the attention of the committee to line 6 on page 6. It says "and announced that the merchantable timber thereon has been removed." If that word "merchantable" remains in and it accomplishes the thing that the gentleman from California [Mr. RAKER] and the gentleman from Michigan [Mr. FORDNEY] say it will do, and if we put it in in another place it certainly should be stricken out here. According to the statement of the gentlemen and their arguments on the other motion to amend, that if the word "merchantable" be put in the bill, it would enable the department to sell everything on the land, and they could sell it all off and strip everything off the land.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. BOOHER. Yes.

Mr. RAKER. This comes now after the timber has been classified and put under the class of timberland and the man has cut off the timber that has been scaled to him, and the Government is then offering the land for homesteading.

Mr. BOOHER. I am not talking about time when it takes place or anything like that. I am talking about the word "merchantable," which, as these gentlemen have argued before, will take everything off the land and will not leave anything on the land for the homesteader. I move that the word "merchantable" be stricken out. I do that for the purpose of testing the gentlemen on that subject.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Missouri [Mr. BOOHER].

The Clerk read as follows:

Amend, page 6, line 6, by striking out the word "merchantable."

Mr. LENROOT. Mr. Chairman, if the amendment of the gentleman from Missouri [Mr. BOOHER] should prevail he will accomplish the very thing he seeks to avoid. As the language now stands, when the timber has been removed by the purchaser and the patent has expired there will still be timber remaining on the land. Then, although there is still timber remaining on the land, it will fall within class 3, providing the merchantable timber is removed. If not removed, it would not be open to homesteading if a stick of timber were left on the land.

Mr. BOOHER. Mr. Chairman, I am inclined to think that the argument of the gentleman from Wisconsin is right. That is the position the gentleman from Washington and myself took on the other amendment exactly, but the committee did not agree with us and did agree with the gentleman from Michigan and the gentleman from California when we undertook to put in the word "merchantable." Now, I think the word is right, but it is not right and proper to be there if we are to be governed by the vote of the committee on the prior amendment, the amendment to insert the word "merchantable," in line 24, on page 4.

Mr. STAFFORD. Mr. Chairman, I desire to be heard on this amendment.

Mr. Chairman, the phraseology of the bill is entirely in harmony with the idea of conserving the best interests of the Government and the best interests of the settler. It is not purposed to have timberland entirely denuded of all timber before it can be opened to entry after the timber has been once removed. The very purpose is that only after the merchantable timber has been removed, then and thereupon it becomes of that character whereby it is subject to entry under the homestead law. This is a conservation provision, and the amendment of the gentleman from Missouri [Mr. BOOHER] would really cause all the small growing timber to be stripped from the land before the timberland could be opened to settlement as agricultural land.

Mr. DAVENPORT. I should like to ask the gentleman from Wisconsin if he does not think we can choose a better word than "merchantable," if it is intended to be a definitive word, when the Secretary of the Interior has determined and announced that all timber heretofore sold has been removed from the land?

Mr. STAFFORD. Oh, no; I think the word "merchantable" is a proper one in this particular; and after listening to the timber expert of this House, the man who has more knowledge about timber than any other person in this body, the gentleman from Michigan [Mr. FORDNEY], I must say I think we are entirely too liberal in fixing the amount as 300,000 feet per 40 acres as the limit of timber on land opened to settlement as agricultural land. The gentleman from Michigan stated here, of his own knowledge, that one-half of the lands in this district would be included as agricultural lands; that valuable timberland will be open to homestead entry; and the rights of the Government will in no wise be conserved.

Mr. DAVENPORT. In the section classifying this land there is no definitive word saying what kind of timber shall be sold——

Mr. STAFFORD. I will answer the gentleman, because I anticipate his point. Every person who is acquainted with the operation of timberlands knows that the timber people do not cut down the small nonmerchantable timber, but leave that standing, and they cut down only that which is profitable or merchantable; and so when they proceed under this law they will go ahead and cut down the merchantable timber, leaving small trees standing, which will make it available for homestead entry as agricultural land.

Mr. DAVENPORT. Mr. Chairman, I desire recognition.

The CHAIRMAN. Does the gentleman desire to be heard on the amendment?

Mr. DAVENPORT. Yes; I am in favor of the amendment.

Mr. FERRIS. How much time is desired on the other side?

Mr. JOHNSON of Washington. I should like two minutes.

Mr. MONDELL. I desire to offer a substitute for the amendment.

Mr. FERRIS. Will five minutes be enough for the gentleman?

Mr. MONDELL. Yes.

Mr. FERRIS. I ask unanimous consent that at the end of 15 minutes debate on this section and all amendments thereto close.

Mr. LENROOT. We will not get through if the gentleman makes the time as long as that?

Mr. FERRIS. This is quite a long section, and I make the request on the section.

Mr. MONDELL. The gentleman does not mean to close debate on the entire section in 15 minutes?

Mr. FERRIS. Yes. We have got to finish this bill to-day.

Mr. MONDELL. That is, we have got to finish the bill to-day if we have time to discuss it.

Mr. LENROOT. The gentleman from Wyoming evidently is not aware of the fact that there was an understanding that the bill was to be finished to-day.

Mr. MONDELL. The gentleman from Wyoming is not going to stand in the way of doing anything in due and proper time, but the gentleman from Wyoming does not propose to be hurried along when there are matters here that need discussion.

Mr. FERRIS. We will give the gentleman time enough. I ask unanimous consent that all debate on this section and all amendments thereto close in 15 minutes. We will give the gentleman from Wyoming five minutes.

Mr. MONDELL. I have another amendment to offer to this section beside the amendment that I now propose to offer, and I should like to have five minutes on that.

Mr. FERRIS. Ten minutes on the two?

Mr. JOHNSON of Washington. I will give the gentleman two minutes.

Mr. DAVENPORT. I will give the gentleman two minutes of my time.

Mr. STAFFORD. I suggest to the gentleman from Oklahoma that he make it 20 minutes.

Mr. FERRIS. I ask unanimous consent that debate on this section and all amendments thereto be closed in 20 minutes.

The CHAIRMAN. The gentleman asks unanimous consent that at the end of 20 minutes' debate on this section and all amendments thereto be closed. Is there objection?

There was no objection.

Mr. JOHNSON of Washington. Mr. Chairman, I want only one or two minutes, to call attention to a difficulty that I think the two departments will get into. The Agricultural Department has a great selling service already organized in the Division of Forestry for the sale of timber. This bill provides for the sale of class 2 timber by the Department of the Interior. The ranking Republican member of the committee, Mr. LENROOT, tells me it will be sold in that way. My impression is that it should be sold by the Forest Service. I am not offering any amendments, because I do not think any of it will be sold for many years. I will take no more time.

Mr. DAVENPORT. Mr. Chairman, I still believe that the word "merchantable" in section 4 should not remain there, and that some other word or phrase defining the class of timber when it is announced that the class which has been sold has been removed should be incorporated. However, I do not expect to have anything to do with putting into effect that provision up there, and for that reason I am not going to insist, except to say to my friend the gentleman from Wisconsin [Mr. STAFFORD] that I do not know how they operate in the Northwestern States when they go to sell timber, but my experience has been that when they sell the poplar, white oak, walnut, or other timber in the South they cut everything from 6 inches up; and I think the same thing will be done there if you do not put in a limitation as to the size of the timber that they *shall* take from the land. I believe any man engaged in the lumber business, if there is not something to define to him what class of trees or saplings, to use the common expression, he shall take off the land, he will take everything that will make a fence post, as the gentleman from Michigan [Mr. FORDNEY] said, or anything that will make a fishing rod or anything else, if there is money in it for him to put it on the market. Therefore some kind of a definitive word should be used clearly to define the intent and what the Interior Department or the Forestry Department, whichever exercises the control, sells to him when he contracts for the timber, and not leave it to an indefinite decision, so that there shall be a lot of lawsuits and arrests and countercharges, such as have been going on for years and years in the timbered regions of the country.

Mr. COOPER of Wisconsin. Why not fix the size of the tree that may be cut?

Mr. DAVENPORT. That is what I suggest, that there ought to be some definitive word to fix either the size of the tree or the class of timber that shall be taken from the land.

Mr. MONDELL. Mr. Chairman, I think the views of the gentleman from Oklahoma are sound, and I propose to offer an amendment which I believe will meet his view of the matter, and remove from the bill a serious objection as the matter now stands. The provision of this section is that the land shall be disposed of when the Secretary has determined and announced that the merchantable timber thereon has been removed. Now, we give a good long time to purchasers to pay for this timber—10 years. We leave it entirely to the Secretary of the Interior to say how long a time they shall have for cutting the timber, and in the meantime the timber is growing. Who is to determine when the time comes that the timber which was sold is cut and the land ready to be entered under the law? It is very easy to remedy that. Strike out, in line 6, the word "merchantable," and in line 7 the word "thereon," and insert the words "sold as provided herein," so that the bill will read:

SEC. 4. That nonmineral lands of class 2 shall not be disposed of until the Secretary of the Interior has determined and announced that the timber sold as provided herein has been removed, and thereupon said lands shall fall into class 3 and be disposed of in the manner hereinafter provided for the disposal of lands of that class.

This will define definitely the timber that is to be removed before the land is open to homestead settlement.

Mr. COOPER of Wisconsin. How does it fix it definitely?

Mr. MONDELL. The balance of the section gives the Secretary authority to fix conditions under which the timber is to be sold, which would authorize him to describe, or even mark, the timber he actually does sell, and when that timber is cut the lands can be sold. If you leave the matter as it is now there is no way that the Secretary could determine when the time came that the timber he actually sold had been removed.

Mr. JOHNSON of Washington. It says, in line 11:

The timber thus purchased may be cut and removed by the purchaser, his heirs or assigns, within such period as may be fixed by the Secretary of the Interior, which period shall—

Is not that going to put the timber from the forest reserve to be sold by the Department of Agriculture in competition with the timber sold by the Department of the Interior under different conditions?

Mr. MONDELL. I do not know. I presume that is so, and it presents another troublesome question; but we are discussing an entirely different matter now. We are discussing a provision as to when land may be subject to homestead settlement.

Mr. RAKER. Will the gentleman yield?

Mr. MONDELL. For a question.

Mr. RAKER. I take it for granted that, although the gentleman is familiar with the cutting of timber, he is not familiar with the character of timber involved in this bill.

Mr. MONDELL. I think I am; I have been through this region somewhat. I have traveled somewhat over the land referred to here, and I have listened to a great deal of testimony on the subject.

Mr. RAKER. What I meant to say was that after the logging company has been over the land once, they do not go over it again, as they do in the East and the Southern States.

Mr. MONDELL. Unless you amend the bill, that is what they can do.

Mr. RAKER. It would not justify them.

Mr. MONDELL. Years after they have logged it off for the saw timber they might find it paid to go over it again for other classes of timber or material.

Mr. LENROOT. When the patent expires the right to the timber is then gone.

Mr. MONDELL. When the patent expires; but that is left to the discretion of the Secretary of the Interior, and the Secretary may make the period as long as he sees fit. Now, Mr. Chairman, I offer the following amendment:

The Clerk read as follows:

Amendment by Mr. MONDELL: Page 6, lines 6 and 7, strike out the word "merchantable" in line 6 and the word "thereon" in line 7 and insert in lieu thereof the words "sold as provided herein."

The CHAIRMAN. The question is as to the amendment.

The question was taken, and the amendment was rejected.

The CHAIRMAN. The question now is on the amendment offered by the gentleman from Missouri [Mr. BOOHER], which the Clerk will report.

The Clerk read as follows:

Amendment by Mr. BOOHER: Page 6, line 6, strike out the word "merchantable."

The question was taken, and the amendment was rejected.

Mr. MONDELL. Mr. Chairman, I gave notice I would offer two amendments to this section, but in the place of the second one I move to strike out the last word. I have come to the conclusion that the committee does not intend to allow the bill to be amended, no matter how fair, reasonable, wise, or proper the amendments may be.

This section is one that ought to be carefully considered. In my opinion it is a section very much more in the interest of the timber companies than in the interest of either the public, the State, or the settlers. I endeavored to get the committee to accept an amendment which would make it reasonably certain that when the timber which was actually sold was cut the settlers could obtain these lands; but the committee refused to accept it. The matter is left entirely with the Secretary of the Interior to say in what quantities the timber shall be sold, and he can sell all the timber to one individual if his bid or bids are the best offered. He can give a timber company just as long as he sees fit in which to cut the timber. The purchaser may apply his first or any deferred payment on a particular tract or subdivision of his purchase, so that he need make payments only on the particular tract or tracts of land which he proposes to cut from.

The purchaser can secure a patent to a particular tract by applying every payment that may be made to that particular tract, and, having done that, proceed to cut the timber on the tract, holding in reserve in the meantime all of the other tracts without cost or investment. I take it that the committee has given very careful consideration to the matter and has felt justified in bringing in legislation as liberal as this is to the timber owners and the timber cutters. It strikes me, however, as being very questionable. The communities have ground for complaint in that the timber may be used for years, at little cost to the purchasers from taxation. The time is left very uncertain except by expiration of the patent, when the lands may be made subject to homestead settlement.

In the last paragraph of page 7 of the bill it is proposed to issue patents to the timber. I intended to offer an amendment striking out the word "patent" wherever it appears and inserting the words "certificate of purchase," but I have come to the conclusion that it is idle to offer any amendments to the bill. This is the first instance, as far as I know, in American legislation where the word "patent" has been applied to anything except the transfer of a permanent right, title, or easement to land. I do not pretend to say that the issuance of a patent such as is proposed would cast a cloud on the title to the land, although I think that is altogether possible.

But I do not see why the committee saw fit to use the word "patent" when the words "certificate of purchase" is the phrase that would describe the transaction that takes place. I have been told that the committee wanted to be sure that the timber would be taxable. It is no more taxable when the title to the timber is conveyed under the word "patent" than it would be if conveyed under a proper designation. The word "patent" has heretofore in our legislation referred exclusively to either a fee title to land or a proprietary limited fee with a reservation of some mineral contained in the land. It never has been and, in my opinion, can not properly be applied to a transfer of timber.

Mr. TAYLOR of Colorado. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. Yes.

Mr. TAYLOR of Colorado. I think the idea in using the word "patent" was that the land might be taxable. The people out there are especially desirous of having this timber taxable, and I think that puts it in better shape.

Mr. MONDELL. The issuance of a patent to the timber would not make the land taxable. I can not believe the committee thought it would.

Mr. TAYLOR of Colorado. I am talking about the timber.

Mr. MONDELL. I said that was the argument, as I understood it, but it seems to me there is nothing to it. You do not make timber any more taxable than it would otherwise be by conveying it under a title and designation which does not properly apply to it. Timber will be just as taxable if sold under a certificate of sale as it would be under any other designation.

I have looked at all of the definitions of the word "patent" that I can find in the dictionaries. How that word can properly be applied to timber which it is proposed to cut down and take away I do not understand, but I shall not offer the amendment I intended because I do not think it is worth while. Let me make this further suggestion in the hope that elsewhere and before this bill becomes a law it may be considered.

The people of Oregon desire to tax this timber, the committee is anxious to assist in bringing about that desirable consummation. That could be promptly accomplished by issuing a certificate of sale when the sale is made and the first installment paid; such a transaction would pass title to the timber and render it taxable. Under the plan proposed by the committee, however, it is not contemplated that any evidence of title shall be issued until the so-called patent is granted. Under this plan purchasers for speculation could hold for 10 years by making deferred payments without paying taxes. That would be fine for the speculators but hard on the communities. If on the other hand the purchaser of a large area desired to cut timber but avoid taxes, he could apply his payments to one or more tracts and thus secure the so-called patent to those tracts, and proceed to cut from them, meanwhile hold the remainder without cost of investment or payment of taxes. All this is, of course, very fine for intending purchasers but it certainly is not good for the State and its communities. If the plan was devised to enable the State and its communities to secure taxes from the timber, it will certainly defeat its purpose.

It may be that these very liberal provisions for timber purchasers are deemed necessary in order to secure the best prices for the timber. If so, the committee should so state. That they have not is perhaps only another evidence of the fact that this measure is being hurried along too rapidly to have proper consideration or explanation.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. FERRIS. Mr. Chairman, what is the status of the time?

The CHAIRMAN. There still remains seven minutes of the time.

Mr. FERRIS. Mr. Chairman, I desire to consume only a couple of minutes. The gentleman from Wyoming [Mr. MONDELL] has long been a Member of the House, and for a long time was chairman of the Committee on the Public Lands. He knows a great deal about public-land legislation, and he can help us a great deal, and, of course, I know he wants to help us. However, I doubt if his construction of the sections is made in the light of the facts out there. This tract of land is not a bald, prairie homestead proposition. Some of these quarter sections of land have $20,000 worth of timber on a single quarter section. This land has been reserved and held from homestead for 50 years. It is not a proposition like going out into Wyoming and taking up a quarter section of land worth 25 cents an acre or possibly nothing. Safeguards, limitations, and restrictions have to be drawn around the opening of valuable timberland like this in order to avoid confusion, mistakes, errors, and I might also say graft.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. I can not yield. The gentleman has consumed 12 or 15 minutes of the 20 minutes allotted time. The gentleman complains that this is harshly dealing with the homesteader. It is not a homestead proposition. I have photographs of little shanties that they have put up, worth ten or twelve dollars apiece, where they have hardly cleared off enough land to set the shanty on. They are trying to acquire title to this valuable timberland by fraud, by deception, and with nothing but speculation in mind. This is no homesteader proposition.

Mr. SINNOTT. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. I can not yield. I am trying to present the views of the committee. The gentlemen can disagree with me; that is their right. The proposition is to dispose of this timber and get all we can out of it for the Government and for Oregon, in spite of the gentlemen from that State, and then let the land go to the homesteader. This is the proper way to proceed with it, I am sure.

Mr. COOPER of Wisconsin. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. COOPER of Wisconsin. Instead of the word "merchantable" why could you not define the diameter of the tree and the distance above the ground?

Mr. FERRIS. I think that would require too technical an examination. It would cost too much to make such a critical examination. It would consume the value of the land.

Mr. COOPER of Wisconsin. There is nothing technical about that. It is the simplest sort of a thing. The other way you leave it to a man to get anything he can, to make a dollar out of it if he can, and that is what he will say "merchantable" means.

Mr. FERRIS. Let us see what we do on that proposition. We first provide that two of the great departments of the Government shall carefully classify this land to determine what is timber and what is agricultural land, and then what? They sell it, and then there is a homestead proclamation issued by the Secretary of the Interior and another finding that all of the merchantable timber so sold is removed and then that land automatically goes into the agricultural class for homesteading. That is double protection for the Government, and I know those who believe that this land ought to be homesteaded; I know that those who believe that land worth $20,000 a quarter section ought to go to the homesteader, timber and all, do not agree with this proposition, but I do not agree with them on

any such course as that; I would not support a bill to carry on any such farce as that; that has been going on too long already.

Mr. MONDELL. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. MONDELL. The gentleman used language as to what would be done which is just exactly the language in the amendment that I offered which he declined to approve. He says that the Secretary is to certify when the timber so sold has been removed.

Mr. FERRIS. Yes.

Mr. MONDELL. That is what I wanted to define in the bill.

Mr. FERRIS. We have that.

Mr. MONDELL. The gentleman has not defined it.

Mr. FERRIS. We have.

Mr. MONDELL. He says when the merchantable timber is disposed of.

Mr. FERRIS. When the merchantable timber is disposed of the Secretary shall issue a proclamation. I know that we could weave in language here undigested; I know that we could change words here and there that would probably give away this timber, but I say to you that after the departments have put in months and months of consideration and after hearings when there were experts before us, we have concluded that it is dangerous to take words here and there and put in language that the department and the committee have rewritten and digested, making it so that it will not let anything get away from the Government.

Mr. COOPER of Wisconsin. May I ask the gentleman one question?

Mr. FERRIS. I yield to the gentleman.

Mr. COOPER of Wisconsin. It strikes me as a rather novel proposition to say it is dangerous for the Congress of the United States to add by way of an amendment anything to a bill that a committee and gentlemen at the head of bureaus of the departments have fixed upon.

Mr. FERRIS. Oh, no; the gentleman knows——

Mr. COOPER of Wisconsin. That is exactly what the gentleman said.

Mr. FERRIS. If I said that I was in error, because no gentleman here can believe any such thing as that. The gentleman has been so long a legislator, and such a useful one, I know he would rather risk a mature judgment on a technical question than a judgment that has not been carefully weighed. I know the gentleman believes that as a general proposition. It, of course, is not my purpose to set the committee up as infallible, but on technical matters that have received such unusual and such extended consideration I thought under those conditions I presented the correct method of procedure.

Mr. LENROOT. Mr. Chairman, the gentleman from Wyoming [Mr. MONDELL] is very much aggrieved because the committee does not see fit to accept an amendment that he offers. The gentleman ought to remember that this committee has spent weeks in the consideration of this bill and has gone over the language of this bill time and time again. That does not mean that this committee is infallible; that does not mean that this committee is not wrong; but it does mean that the committee has given careful consideration to every phrase that is put into this bill. With reference to his criticism, if the gentleman's amendment had been adopted let us see where we would have been with respect to this situation. The gentleman provided that when the merchantable timber had been sold——

Mr. MONDELL. I did not have the word "merchantable."

Mr. LENROOT. That when the timber sold had been removed that then there should be a homestead entry.

Mr. MONDELL. That is it.

Mr. LENROOT. Now, then, the timber is sold under the provisions of this bill; the purchaser may not remove all of that timber. There may be some of that remaining upon the land that was sold to him, and yet if the gentleman's amendment had been adopted after the patent had expired, not 1 acre of that could have been open to homestead entry and could have been put in class 3 so long as there was a tree remaining upon the land sold and included in the original patent to which title had gone and the expiration of the time of the patent came.

Mr. MONDELL. The gentleman knows perfectly well that the argument he now makes applies to the language as it stands in the bill just as much as it would to the language I propose.

Mr. LENROOT. The gentleman does not know that.

Mr. SLOAN. Will the gentleman yield for just a moment?

Mr. LENROOT. I do.

Mr. SLOAN. Would not this be a proper amendment: To add to line 9, on page 6: "*Provided*, That no timber shall be considered as merchantable timber where the tree diameter at 2 feet above the ground is less than 10 inches," or whatever the committee would think would be proper?

Mr. RAKER. Nine inches.

Mr. STAFFORD. Eight inches.

Mr. LENROOT. Possibly so, and yet at the same time even then if you put in a provision that it should not be considered unless it was nine inches in diameter, if there was timber upon it that was in excess of that and a few trees left upon it, yet we could not place that land in class 3 if there were a dozen trees left upon the quarter section in excess of nine inches in diameter at the bottom.

Mr. Chairman, the language in the bill, which merely provides when this land in class 2 shall fall into class 3, is proper as it stands notwithstanding the suggestion of the gentleman from Wyoming. The gentleman from Wyoming probably picked up this bill yesterday, has given it very slight attention to-day, and sitting here at his desk to-day offers amendments that he thinks are perfect. It may be so, but it ought not to be assumed that because he offers them that they are.

The CHAIRMAN. The time limit agreed upon has expired.

Mr. COOPER of Wisconsin. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The time for debate upon this amendment has expired. The pro forma amendment will be considered as withdrawn.

There was no objection.

Mr. SINNOTT. Mr. Chairman, I have an amendment which I desire to offer to this section.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Strike out of line 18, page 6, the words "at such," and strike out of line 19, page 6, the word "times," and insert in lieu thereof the words "as soon as practicable."

The question was taken, and the amendment was rejected.

The Clerk read as follows:

SEC. 5 That nonmineral lands of class 3 shall be subject to entry under the general provisions of the homestead laws of the United States, except as modified herein, and opened to entry in accordance with the provisions of the act of September 30, 1913 (38 Stat. L., p. 113). Fifty cents per acre shall be paid at the time the original entry is allowed and $2 per acre when final proof is made. The provisions of section 2301, Revised Statutes, shall not apply to any entry hereunder and no patent shall issue until the entryman has resided upon and cultivated the land for a period of five years, proof of which shall be made at any time within seven years from date of entry. The area cultivated shall be such as to satisfy the Secretary of the Interior that the entry is made in good faith for the purpose of settlement and not for speculation: *Provided*, That the payment of $2.50 per acre shall not be required from homestead entrymen upon lands of class 2 when the same shall become subject to entry as agricultural lands in class 3: *Provided further*, That during the period fixed by the Secretary of the Interior for the submission of applications to make entry under this section any person duly qualified to enter such lands who has resided thereon, to the same extent and in the same manner as is required under the homestead laws, since the 1st day of December, 1913, and who has improved the land and devoted some portion thereof to agricultural use, and who shall have maintained his residence to the date of such application, shall have the preferred right to enter the quarter section upon which he was so residing where such quarter section does not contain more than 1,200,000 feet board measure of timber, and where the quarter section contains more than the said quantity of timber such person may enter the 40-acre tract, or lot or lots containing approximately 40 acres, upon which his improvements, or the greater part thereof, are situated: *Provided further*, That a prior exercise of the homestead right by any such person shall not be a bar to the exercise of such preference rights: *And provided further*, That all of the following-described lands which may become revested in the United States by operation of this act, to wit: Township 1 south, range 5 east, sections 23 and 35; township 1 south, range 6 east, sections 3, 5, 7, 9, 17, 19, 29, 31, and 33; township 2 south, range 5 east, sections 1 and 3; township 2 south, range 6 east, sections 1, 3, 5, 7, 9, and 11; township 2 south, range 7 east, section 7; township 3 south, range 3 east, section 15; township 4 south, range 4 east, sections 11 and 13; township 4 south, range 5 east, sections 19 and 29; and township 12 south, range 7 west, sections 15, 21, 23, 27, 33, and 35, Willamette meridian and base, State of Oregon, shall be withheld from entry or other disposition for a period of two years after the approval hereof.

Mr. MONDELL. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 9, line 18, after the word "situated," insert "and such other contiguous subdivisions of said quarter section as are classified as lands of class 3."

Mr. MONDELL. Mr. Chairman, the section provides, on page 9, that any person duly qualified to enter these lands who has resided upon them shall have a preference right to entry on the quarter section he occupies, providing it does not contain more than 1,200,000 feet board measure of timber, and where the quarter section contains more than the said quantity of timber he may enter the 40-acre tract or lands containing approximately 40 acres upon which his improvements, or the greater part thereof, are situated.

It will be noted from the reading of this provision that if the quarter section exceeds the rate of 300,000 feet to the 40, or 7,500 feet to the acre, by a single foot board measure, the entryman is cut down from 160 to 40 acres. I do not think that is what the committee intended, and certainly is not fair. If you leave the language of the bill as it stands, providing that in such case the entryman may have the forty on which his improvements are situated and in addition to that other contiguous forties, provided they are classed as agricultural lands, you will do justice to the settler without allowing him timber in excess of the maximum.

I do not think that the committee intended to deprive such a settler of such of his lands as were of a character that would allow their entry as a homestead.

Mr. LENROOT. Will the gentleman yield?

Mr. MONDELL. Yes.

Mr. LENROOT. The gentleman's amendment appears to be very reasonable, except for one thing, in this, that he may not have to be a qualified entryman.

Mr. MONDELL. The entire provision is liberal in that respect. The gentleman knows that to be necessary, because in some cases people have settled on these lands who were not qualified entrymen. Let me make this suggestion: You have concluded to be liberal to all these people. Now, it is not fair to provide that some of these people must drop down to a single forty, provided some of the other forties are lands they could as entrymen select. Now, my amendment does not fly in the face of the provision of the committee limiting the amount of timber which a man may take; it simply provides a method by which if a settler be limited by the terms of the bill to the forty on which his improvements are situated and there are agricultural forties contiguous, he may also take them. That will allow those people who would be limited by the terms of the bill to 40 acres to secure in some cases 80 and in some cases 120 acres; otherwise you would reduce a man to 40 acres if by a single foot board measure his entire 160 acres exceeded the maximum of timber. It does not seem to me a fair proposition.

Mr. RAKER. As to the contention of the gentleman there will possibly be no objection; but really, as a matter of fact, under the law and under the language of the bill as it now stands the homesteader would have no right except upon the one forty, except as to the amount of time he has resided on it, because he has no claim to the balance if he has not resided on it; and if those three forties are in excess, so far as the time is concerned, and on the other side of his forty and the two forties and three forties are contiguous, then he could take that one forty and the other land beside that.

Mr. MONDELL. That condition may not exist. The entrymen may have settled upon the only tract in the locality that is only partially timbered, but the whole 160 acres may contain timber somewhat in excess of your maximum allowance. Now, that being the case, the provisions of the bill reduce him not merely within the limit of tolerance but reduce him to 40 acres, which is not a reasonable thing to do. It is all right to say, as the committee has, that in any event he shall have the 40 on which his buildings are situated, but he should also be allowed to have the other tracts if they are what we class as agricultural lands.

Mr. RAKER. The proposition is this: If there is an actual residence under the bill provided, he can make a claim, and he can run it beyond 160 acres, because he has a right to run it otherwise and there is no law to fix the boundary. But he is beyond the 40-acre tract which does contain 350,000 feet board measurement, and he can get that 40 acres anyhow, and if on the other side there is land that contains only 350,000 feet board measurement, he can take that, under the law, unless there is a prior claim to his land.

Mr. MONDELL. Will the gentleman yield?

Mr. RAKER. For a question.

Mr. MONDELL. The gentleman says if the settler was reduced down to the 40-acre tract he could, if there was agricultural land adjacent to him, take it as a homestead settler outside of this provision in this section. If you are willing to allow him to do that, why not allow him to do the same thing within the tract that he has originally selected? Furthermore, no one knows how these lands are to be opened to entry, and if you take from a settler his preference right he may never get an opportunity at that particular tract.

Mr. RAKER. The bill provides for it now. If land is in 40-acre lots contiguous to his original entry, he can, under this law, get them beyond question.

Mr. FERRIS. Mr. Chairman, I ask unanimous consent to close debate, and I ask for a vote.

The CHAIRMAN. The question is on the amendment proposed by the gentleman from Wyoming [Mr. MONDELL].

The question was taken, and the Chair announced that the noes seemed to have it.

Mr. MONDELL. Mr. Chairman, I ask for a division.

The committee divided; and there were—ayes 10, noes 17.

So the amendment was rejected.

Mr. HAWLEY. Mr. Chairman, I desire to offer an amendment.

Mr. FERRIS. How much time do you want?

Mr. HAWLEY. Three minutes.

Mr. FERRIS. Mr. Chairman, I ask unanimous consent that at the expiration of five minutes, three minutes to be used by the gentleman from Oregon and two by the committee, that debate close on this amendment.

The CHAIRMAN. The gentleman from Oregon [Mr. HAWLEY] offers an amendment, which the Clerk will report. And pending that the gentleman from Oklahoma [Mr. FERRIS] asks unanimous consent that debate on this section and on this amendment close in five minutes, three to be used by the gentleman from Oregon [Mr. HAWLEY] and two by the committee.

Mr. FERRIS. Mr. Chairman, I ask unanimous consent that at the expiration of 15 minutes, 5 to be used by the gentleman from Oregon [Mr. SINNOTT], 5 by the gentleman from Wyoming [Mr. MONDELL], and 3 by the gentleman from Oregon [Mr. HAWLEY] and 2 by myself, that all debate close on this section and amendments thereto.

The CHAIRMAN. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Oregon [Mr. HAWLEY].

The Clerk read as follows:

Page 9, line 1, after the word "further" in line 1, strike out the remainder of the line, and all of lines 2, 3, 4, 5, 6, 7, 8, 9, and the first three words in line 10, and insert in lieu thereof the following: "That, first, any person actually residing in good faith on not exceeding one-quarter section of such land prior to December 1, 1915, who has cultivated and improved the same upon his making application therefor within six months from the date of the passage of this act; and, second, any person who shall have made settlement in good faith upon not exceeding one-quarter section of such land at any time, cultivated and improved the same, and made application to purchase the same under the terms of the provisos in the granting acts prior to December 1, 1915, upon his resettling upon and asking application therefor within six months after the date of the passage of this act."

Mr. HAWLEY. Mr. Chairman, the purpose of this amendment is to accomplish two things. It changes the date from that given on line 7, page 9, to the date that I understand has been agreed on in another body, and which I think is fairer to the settler.

In the second place, it allows those who have made settlement on the land and made improvements, and have gone temporarily off by reason of lack of funds to seek employment, or discouragement because the suit continued seven years when they thought it would be a much shorter period, to return upon the land.

The general purpose of it is to let the man who has made the settlement, who has made the improvement, who has done the clearing, and built the houses and barns, and who has broken the soil and prepared it for cultivation, to have the benefit of his work rather than let somebody else have it. It seems to me the amendment is a reasonable one.

Mr. RAKER. Mr. Chairman, will the gentleman yield?

Mr. HAWLEY. Yes.

Mr. RAKER. Then, I would take it for granted from the gentleman's amendment, judging from some of these pictures here, where the land is worth $20,000, that those people could return and come in under this amendment?

Mr. HAWLEY. No. The gentleman is in error, because this settlement can only be made under the preceding portions of the bill, which limit the settlement to agricultural lands provided in the bill. They can only make settlements of the agricultural lands provided in the bill, just as was provided by the committee.

Mr. RAKER. If a man went there and built a cabin and stayed one day, and then went to Canada and returned, he could take out a homestead?

Mr. HAWLEY. I do not think it would be construed that that would mean cultivation and improvement.

Mr. LENROOT. Mr. Chairman, will the gentleman yield?

Mr. HAWLEY. Yes.

Mr. LENROOT. Did not the act of 1912 expressly provide that no rights should be initiated by anybody on these lands?

Mr. HAWLEY. I will say to the gentleman that whatever was done by one Congress can be changed by a succeeding Congress.

Mr. LENROOT. But those people had no equities, because they had notice that no rights would be recognized.

Mr. HAWLEY. It seems to me it would be justice that the man who has made improvements, cultivation, expended his money and his labor should have the benefit of it rather than some other person.

Mr. FERRIS. Mr. Chairman, I hope no one will be misled by the language of that amendment. That would open up a lot of things that I thought every one wanted to avoid. That would let in a lot of people that the Supreme Court has decided have no rights. I have not read it carefully, but I think it contains the elements of more mischief than appears on the face of it. Any amendment looking to a step of this kind would be harmful.

Mr. HAWLEY. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes.

Mr. HAWLEY. Absolutely none of those people that the gentleman refers to would be able to take advantage of this.

Mr. FERRIS. I have pictures here of houses that did not cost $12 to build, on a little clearing on these timberlands out there, where the timber is worth $20,000, and they are trying by a fictitious and spurious settlement to get hold of a lot of this timberland.

No one need be mistaken as to what they are trying to do or as to what they will do if such amendments as this are to be adopted.

Mr. HAWLEY. I do not think anything like that would be counted as settlement and cultivation. But if any one has settled on that land since December 1, 1913, he would come under this.

Mr. FERRIS. I think it will be worth while for gentlemen here to look at these pictures of these pretended settlements. The whole thing is pure fiction. This is not a common homestead proposition at all.

Mr. SINNOTT. Mr. Chairman, will the gentleman yield?

Mr. FERRIS. Yes; I yield to the gentleman.

Mr. SINNOTT. Is that a record of the pictures taken from the Supreme Court case?

Mr. FERRIS. Yes; that is it.

Mr. SINNOTT. Those, the gentleman will understand, were exhibits introduced by the railroad company to show that this land was not agricultural land.

Mr. FERRIS. They show the fictitious character of the proposition. Mr. Chairman, they are photographs. They are a part of the record. They show for themselves and they prove what I am saying. I ask for a vote.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Oregon [Mr. HAWLEY].

The question was taken, and the amendment was rejected.

Mr. MONDELL. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Wyoming offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MONDELL: Page 8, lines 13 and 14, after the word "and," strike out "$2 per acre when final proof is made" and insert "50 cents per acre per annum."

Mr. MONDELL. Mr. Chairman, this is an amendment that I assume no one will vote for, and yet every one should vote for it. The gentlemen of the committee will not want to vote for it, because it modifies their bill. The gentlemen from Oregon will not want to vote for it, because it requires the homestead settlers to continue to make payments yearly, instead of allowing them to wait seven years after they make entry, to make payment upon their lands. I think it would be very much better, both for the State of Oregon and its settlers—I am sure it would be better—if this provision were adopted. It is a very great mistake, as has been proven a multitude of times, to leave the major portion of the payment for homestead land until final proof is made. The settler, instead of becoming thoroughly and earnestly interested in his land as he makes small payments year by year, is very much inclined to hold his land in a speculative way, hoping to sell it to some one before he makes final proof or when he makes final proof, allowing the purchaser to pay the purchase price. We allow these settlers when they make entry to pay 50 cents an acre, and then allow them to live on their land seven years before making final proof and payment. It would be very much better to require them to make payments of 50 cents per acre per annum, in which event the place would be paid for at the end of five years. Now, Mr. Chairman, so much for that. This is an amendment that I do not expect will be adopted, although it ought to be.

But I want to take the minute or two that I have left to refer back to the last section, which really ought to have been discussed much more than it was. I have no doubt that the committee did the very best they could. I am sure the committee did not desire, in adopting the provisions of that section, to do an injustice to the State of Oregon in retarding settlement, or to be improperly liberal to the timber companies; but I am sure that the timber companies of the west coast, all of them, approve of every provision in this section, because it leaves with the Secretary of the Interior the question as to how much of this timber one individual or one company may buy and the time they shall have in which to cut the timber. All of the timber on all of these lands might be purchased by one individual or one corporation, and the Secretary of the Interior is left with carte blanche to decide how long the purchaser shall have in which to cut off the timber, and when the land shall be restored to entry.

Mr. RAKER. The gentleman does not want to misstate something that is provided for in the bill. On page 9 every piece of this land can be sold in tracts of 40 acres to whomever wants to buy it, and the Secretary of the Interior must sell it to men having small amounts of money, in tracts of 40 acres, if they want it.

Mr. MONDELL. I am not talking about the land. I am talking about the timber; and, furthermore, there is no such provision as the gentleman refers to on page 9 in regard to either land or timber.

Mr. RAKER. I mean the timber.

Mr. MONDELL. That is not true, so far as the timber is concerned, any more than it is true in regard to the land. Evidently the gentleman has not read the bill, because the provisions relative to the sale of timber are on pages 6 and 7 and provide that the Secretary may sell it at such times, in such quantities, and under such plans of bidding as he may in his judgment prescribe; and in the next section it provides that he shall fix the time for the running of the patent, shall determine how long these people are to have within which they may cut the timber. It may not be too liberal a provision, but it certainly is a very liberal provision, and if we should get a Secretary who was not entirely dependable we might regret it. It is true that on page 7 there is a proviso to the effect that under certain conditions the Secretary shall on application first offer any single subdivision applied for, but that does not essentially affect the situation.

The CHAIRMAN. The question is on the amendment proposed by the gentleman from Wyoming [Mr. MONDELL].

The amendment was rejected.

Mr. SINNOTT. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Oregon offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. SINNOTT: Amend, page 9, line 1, by inserting after the word "three," *"Provided further,* That any purchaser of timber being a qualified homestead entryman, or his assignee, being a qualified homestead entryman, on the issuance of a patent for the timber on any quarter section, or smaller legal subdivision of nonmineral land may, in the discretion of the Secretary of the Interior, enter said quarter section, or smaller legal subdivision thereof, in like manner as lands of class 2 are entered after the removal of the timber."

Mr. SINNOTT. Mr. Chairman, the object of this amendment is to enable a homestead entry to be made on timberland as soon as the timber is paid for and the patent is issued for the timber. Otherwise the land can not be entered until the timber is all cut and removed from the land. The object of this amendment is to enable anyone who is a qualified homestead entryman to enter 160 acres of timber and not be compelled to wait until the timber is removed. I have spoken to some members of the committee about it, but have not heard any objection to this amendment.

Mr. MONDELL. Mr. Chairman, I do not desire to take up the time of the committee in discussing this amendment unless the committee proposes to oppose it. I supposed the committee would accept it.

This amendment in effect authorizes a homesteader to also become the owner of the timber which is on his homestead by paying for it. Of course it is an amendment that is not in the interest of the timber companies; it has none of the elements of liberality to the great timber companies contained in the former section.

Mr. MCARTHUR. And will it not have the effect of getting the man onto the homestead quicker than the provisions in the bill?

Mr. MONDELL. Of course. This amendment is in favor of everybody except the timber companies. Without this the timber companies may hold the lands so long a time as may be fixed by the Secretary of the Interior.

Mr. COOPER of Wisconsin. Would the bill as now drawn permit the Secretary of the Interior and the Secretary of

Agriculture to sell all these lands to one or two great timber companies?

Mr. MONDELL. It would authorize them to sell all the timber on all the lands to one person or one company and to give them as long a period of time in which to cut the timber as the Secretary saw fit. I should be much afraid of such provisions, and if I were a member of the committee I would not approve of them.

Mr. FERRIS. The gentleman ought to state in response to the gentleman from Wisconsin that it is made compulsory on the part of the Secretary of the Interior to offer these lands in 40-acre tracts, so that the humblest citizen may bid and buy a tract as small as 40 acres.

Mr. COOPER of Wisconsin. And they are to be sold to the highest bidder?

Mr. FERRIS. Yes; certainly.

Mr. MONDELL. It is true that on page 7 there is a provision under which before offering the land in large units the Secretary shall on application offer separately the timber on any legal subdivision; but this would not prevent the selling of all the timber to one party if he was the highest bidder, and this provision is hedged about by a curious provision that the application for the small sale shall be made 90 days before an offer by the Secretary of the land in a larger unit. On page 6 of the bill it provides that the timber on the land can be sold by the Secretary of the Interior—

at such times, in such quantities, and under such plan of public competitive bidding as in the judgment of the Secretary may produce the best results.

Under those provisions the Secretary can sell the timber on every acre on all these lands to one individual or company, if that individual or company is the best bidder. The small man may bid, it is true, on the timber on a small tract, if he is alert and active enough to file his application 90 days before the tract is included in a large unit. Whether the small man would consider it worth his while to watch his chance to get in an application before the timber he desired was included in an offer of a large tract and bid against the large purchaser is a question.

The CHAIRMAN. The time has expired, and the question is on the amendment offered by the gentleman from Oregon.

The question was taken; and on a division (demanded by Mr. SINNOTT) there were 20 ayes and 30 noes.

So the amendment was rejected.

The Clerk read as follows:

SEC. 10. That all moneys received from or on account of said lands and timber under the provisions of this act shall be deposited in the Treasury of the United States in a special fund, to be designated "The Oregon and California land-grant fund," which fund shall be disposed of in the following manner: The Secretary of the Interior shall ascertain as soon as may be the exact number of acres of said lands, sold or unsold, patented to the Oregon & California Railroad Co., or its predecessors, and the number of acres of unpatented lands which said railroad company is entitled to receive under the terms of said grants and the value of said lands at $2.50 per acre. From the sum thus ascertained he shall deduct the amount already received by the said railroad company and its predecessors in interest on account of said lands as determined under section 7 of this act; and a sum equal to the balance thus resulting shall be paid, as herein provided, to the said railroad company, its successors or assigns, and to those having liens on the land, as their respective interests may appear. The amount due lien holders shall be evidenced either by the consent, in writing, of the railroad company or by a judgment of a court of competent jurisdiction in a suit to which the railroad company and the lien holders are parties. Payments shall be made from time to time, as the fund accumulates, by the Treasurer of the United States upon the order of the Secretary of the Interior: *Provided, however,* That if, upon the expiration of 10 years from the approval of this act, the proceeds derived from the sale of lands and timber are not sufficient to pay the full amount which the said railroad company, its successors or assigns, are entitled to receive, the balance due shall be paid from the general funds in the Treasury of the United States, and an appropriation shall be made therefor. After the said railroad company, its successors or assigns, and the lien holders shall have been paid the amount to which they are entitled, as provided herein, an amount equal to that paid for accumulated taxes, as provided in section 9 hereof, shall be deposited in the Treasury to the credit of the United States.

A separate account shall be kept in the General Land Office of the sales of land and timber within each county in which any of said lands are situated, and, after deducting from the amount of the proceeds arising from such sales in each county a sum equal to that applied to pay the accrued taxes in that county and a sum equal to $2.50 per acre for each acre of such land therein title to which is revested in the United States under this act, 30 per cent of the remainder shall be paid to the treasurer of the county for the construction of roads, highways, and bridges; 20 per cent shall be paid to the State in which the county is located for the establishment and support of common schools; 40 per cent shall be paid into, reserved, and appropriated as a part of the fund created by the act of Congress approved June 17, 1902, known as the reclamation act; and the balance remaining in said Oregon-California land-grant fund shall become a part of the general fund in the Treasury of the United States. The payments herein authorized shall be made to the treasurers of the States and counties, respectively, by the Treasurer of the United States, upon the order of the Secretary of the Interior, as soon as may be after the close of each fiscal year during which the moneys were received.

Mr. LENROOT. Mr. Chairman, I offer the following amendment.

The Clerk read as follows:

Page 13, line 5, after the word "lands," insert the words "which should be charged against it."

Mr. LENROOT. Mr. Chairman, a word of explanation with reference to the amendment. Section 7 directs the Attorney General to bring an action against the railroad company for an accounting, and to determine the moneys received by the railroad company from sales heretofore made, and also what portion should be charged against the railroad company as a part of the full value of the grant. This section provides for the payment to the railroad company but omits the expression "which should be charged against it." It reads:

From the sum thus ascertained he shall deduct the amount already received by the said railroad company and its predecessors in interest on account of said lands as determined under section 7 of this act; and a sum equal to the balance thus resulting.

In order to harmonize it this amendment should be inserted.

Mr. FERRIS. We accept the amendment.

The CHAIRMAN. The question is on the amendment.

The question was taken, and the amendment was agreed to.

Mr. LENROOT. I have a further amendment, Mr. Chairman.

The Clerk read as follows:

Page 14, line 21, after the word "Oregon," insert the word "and."

Mr. LENROOT. This is to harmonize the expression "Oregon and California."

Mr. FERRIS. We accept the amendment.

The question was taken, and the amendment was agreed to.

Mr. LENROOT. Mr. Chairman, I also offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 15, line 3, after the word "received," insert:

"*Provided*, That none of the payments to the States and counties and to the reclamation fund herein provided for shall be made until the amount due the Oregon & California Railroad Co., its successors or assigns, has been fully paid and the Treasury reimbursed for all taxes paid pursuant to the provisions of section 9 of this act."

Mr. FERRIS. Mr. Chairman, there is no opposition on the part of the committee to that amendment.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. FOSTER. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 14, line 12, at the end of the line, strike out the word "thirty" and insert the word "twenty."

Mr. FOSTER. Mr. Chairman, under the provisions of this bill the Government advances the money to pay the taxes which have been accumulating since suit was started upon these lands and which were not paid by the railroad company. Then it also provides that when all this is taken out of the expenses and everything else, 30 per cent shall go to the treasurers of the counties for construction of roads, bridges, and so forth, and 20 per cent to the State for schools. What I am getting at is that the United States Government, the Federal Treasury, shall have 20 per cent of the money—not more than that; but that instead of giving 50 per cent to the State, that we shall give 40 per cent to the State, 40 to the reclamation fund, and 20 per cent to the United States Treasury. I think it is nothing but fair that the Federal Treasury should get something out of the property it owns in the State of Oregon, and I submit that is a fair proposition. I think the people of the State of Oregon ought to be willing to accept that kind of a proposition. The Federal Treasury ought to get a little something from the proceeds of the sale of its own property.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Illinois.

The question was taken; and on a division, at the suggestion of the Chair, there were—ayes 29, noes 24.

Mr. MONDELL. Mr. Chairman, I regret to call the attention of the Chair to the fact that there is no quorum present.

The CHAIRMAN. The Chair will count.

Mr. MONDELL. If the committee is not going to stand by the bill, we will have to have a quorum present.

Mr. RAKER. Oh, the members of the committee stood by the bill, and there is no need of any such criticism.

Mr. MONDELL. The committee, on the one hand, stands against any sort of an amendment to the bill, and, on the other hand, whenever an amendment is offered that appeals to gentlemen on the committee they desert their own work.

Mr. RAKER. I do not think the committee is subject to that criticism.

Mr. ADAMSON. Mr. Chairman, I make the point that the gentleman from Wyoming did not make the point of order that there was no quorum present. I voted with him. He merely called the attention of the Chair to the fact that there might not be a quorum present.

The CHAIRMAN. The Chair understood that the gentleman did make the point of order that there is no quorum present.

Mr. MONDELL. Has the Chair announced the vote?

The CHAIRMAN. The Chair did not announce the count.

Mr. MONDELL. I am going to make the point.

Mr. FERRIS. I wish the gentleman would let us go through with the bill.

Mr. ADAMSON. I suggest that the gentleman ask for tellers.

Mr. MONDELL. Has the Chair yet announced the count?

The CHAIRMAN. The Chair has not yet begun to count. The Chair will ask the gentleman if he makes the point of order of no quorum?

Mr. MONDELL. Not as yet.

Mr. ADAMSON. Mr. Chairman, I ask for tellers.

The CHAIRMAN. The Chair will state that the Chair has announced the vote.

Mr. ADAMSON. Is it too late to demand tellers?

Mr. MONDELL. Mr. Chairman, I demand tellers.

Tellers were ordered, and the Chair appointed Mr. FOSTER and Mr. MONDELL to act as tellers.

The committee again divided——

Mr. COX. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. COX. What are we voting on here?

The CHAIRMAN. Voting upon the amendment offered by the gentleman from Illinois [Mr. FOSTER].

Mr. FOSTER. To give the Government 10 per cent more money; that is all.

The tellers reported there were—ayes 33, noes 32.

Mr. MONDELL. Mr. Chairman, I make the point of order there is no quorum present.

The CHAIRMAN. The gentleman makes the point of order there is no quorum present. The Chair will count. [After counting.] One hundred and one Members are present, a quorum.

So the amendment was agreed to.

Mr. CANNON. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 14, line 17, after the word "schools," strike out the semicolon of line 17 and all of lines 18, 19, and all of line 20, down to the word "act" in said line.

Mr. CANNON. That strikes out all of line 17 after the word "schools." Now, Mr. Chairman, I am not going to take much time in discussing this amendment. As I understand it the lands that are to come back to the Government are worth all the way from $30,000,000 to $250,000,000, just according to the guess that the man makes, and some guess $5,000,000, and possibly the last guess is the best guess. We have had all kinds of guesses. There is evidently a very considerable amount of land in Oregon that was granted to this railroad company under the conditions of the act, and it seems that as the railroad is to get $2.50 per acre for lands not sold that no one will be hurt.

Now, the effect of this amendment is, to see my colleague and go him better, this amendment strikes out these words:

Forty per centum shall be paid into, reserved, and appropriated as a part of the fund created by the act of Congress approved June 17, 1902, known as the reclamation act.

If this amendment should prevail, this would read, in line 21:

And the balance remaining in said Oregon-California land grant fund shall become a part of the general fund in the Treasury of the United States

If this amendment prevails, instead of 10 per cent being paid to the general fund of the United States, it will be 50 per cent. Now, it is true that under the reclamation act the proceeds of public lands as they were sold went into the reclamation fund on the theory that there would be a "round robin" going round and round and round. Suffice it to say, that it has not gone round sufficiently. [Laughter.] We have made a loan to the reclamation fund of $20,000,000. I have my views about when that will be paid back, but then if it only was $50,000,000—I believe I am conservative—which is it?

Mr. FERRIS. Thirty million to fifty million.

Mr. CANNON. Well, now, if this amendment is adopted, we will put $25,000,000 in the Treasury of the United States, and God knows we will need it by that time. [Laughter.] I mean exactly what I say; this amendment is not for buncombe. Well, but does that violate the spirit of the reclamation act? Nay, nay; for the reason that when the reclamation act was passed—and I recollect very well when it was passed—there was something of contest about it. The present Senator from Nevada [Mr. NEWLANDS] was in the House at that time, and he was a leader, very enthusiastic, and it was passed. I had the honor of being one who voted against it and was confronted with it many, many times. I have always been willing, if I had it to do over again, under all the conditions, I should vote against it again. But, outside of that, this land, claimed to be worth $50,000,000, was not in the mind of Congress when the reclamation act was passed. It was supposed to belong to—I do not know what the name of the railroad was—the California & Oregon. Well, there was a railroad there that was built, and the land was granted. What for? Just as under the leadership of Stephen A. Douglas, a great Senator from Illinois, in 1850, when the first land grant was made that ever was made in aid of railway construction of alternate sections for 6 miles on each side the track from Chicago to Cairo and Centralia to Dunleith.

Those lands were being located at that time with 70-cent military land warrants. The Government reserved the alternate sections as fast as that road was located and the alternate sections were gathered up at $2.60 per acre. Because while the country was largely unsettled, it was known that the lands were good and it was a question of markets. It was a question of population. Since that time Chicago has grown in population from less than 50,000 people to 2,500,000. Now, upon the theory that a railroad would develop the country this land grant was made. It had the restrictions referred to in the bill and report and provision. The railroad people did not comply. I shall certainly vote for the bill. It now not being within the sphere of the United States and not belonging to it at that time—nobody ever dreamed of it belonging to the United States—I think it is folly that after the United States has borne the burden and is still to pay money before this is settled, with perhaps a company or, I was going to say, a regiment in the employ of the Government, I think it is proper that this $25,000,000 should go into the United States Treasury. [Applause.]

Mr. FERRIS. Mr. Chairman, I ask unanimous consent to close debate on this amendment and all amendments to the paragraph in 25 minutes, 5 to be controlled by the gentleman from Colorado [Mr. TAYLOR], 5 by the gentleman from Wyoming [Mr. MONDELL], 5 by the gentleman from Oregon [Mr. HAWLEY], 5 by the gentleman from Oregon [Mr. MCARTHUR], and 5 by the committee.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that at the end of 25 minutes all debate on this paragraph and amendments thereto be closed. Is there objection? [After a pause.] The Chair hears none.

Mr. TAYLOR of Colorado. Mr. Chairman, in my judgment the committee made a very grave error in adopting the last amendment. I feel that that was an outrage upon the State of Oregon. The State is entitled to every dollar that this bill gives it. Now, if the House should adopt the amendment of the gentleman from Illinois [Mr. CANNON], we might about as well throw this bill into the wastebasket. If you are starting out to try to repeal the reclamation law, by violating not only the spirit of that law, but the entire course of legislation of Congress from 1902 down to this time, we of the West are in honor to our States bound to resist it in every way we can.

The Government of the United States has authorized the construction of some 32 Government reclamation projects. They now cover some 3,000,000 acres of irrigable land. There are, or will be, some 60,000 homes upon these projects. The conservationists of this country, of whom my friend from Illinois who sits at my right [Mr. FOSTER] is one, have succeeded in having withdrawn from settlement some 185,000,000 acres of the United States in forest reserves; something like 30,000,000 acres of supposed coal lands, and Heaven only knows how much more in power sites, oil lands, and otherwise, so the receipts from sales of public lands have been rapidly diminishing during recent years. Our receipts from the public domain have dwindled from about $10,000,000 down to about $3,000,000 a year. Now, if you take away the only means we have of completing those irrigation projects, you will commit one of the most outrageous wrongs and hardships that Congress has ever inflicted upon any people or any State. There is no semblance of justice in an amendment that would take away from the completion of these projects their only source of supply.

It is true we extended the period of payment from 10 to 20 years. We did that because the receipts were not sufficient to complete them sooner, and also because the people could not any sooner pay the enormous price they are compelled to pay for these lands. But that money is coming back. There is not a single project in the United States that has ever repudiated its obligation.

Mr. MADDEN. Will the gentleman yield?

Mr. TAYLOR of Colorado. I will.

Mr. MADDEN. Whatever would become of the reclamation revenues of this land if they came into the possession of the Government of the United States?

Mr. TAYLOR of Colorado. If the Government appropriated to itself and kept all the receipts from the sale of these lands, then, of course, we would not get any of that money. And if the Government kept the land and did not sell it we would get nothing. But, as a matter of fact, it is sheer nonsense to talk about $200,000,000. As a matter of fact, I think the most conservative and best estimates we have had made on that land is from $10,000,000 to $20,000,000.

Mr. TILSON. What is the difference between giving this number of millions, whatever it may be, and making a direct appropriation out of the Treasury? Why should we not appropriate just so many million dollars out of the Treasury to the reclamation projects?

Mr. TAYLOR of Colorado. The laws now set apart the proceeds from the sales of the public lands, and put them into that reclamation fund, and after they have been used once in that way they are all to be paid back into the Federal Treasury by the settlers upon the lands under these reclamation projects. The lands under these projects are utterly worthless without irrigation, and the Government is trying to bring about their irrigation and settlement for the development of the West. It requires an enormous amount of money to build those irrigation works, and they can only be built from the proceeds of the sale of the public lands, and that fund is getting smaller all the time.

Mr. TILSON. What connection has this land with the reclamation subject at all?

Mr. TAYLOR of Colorado. Well, after it is taken back from the railroad it becomes a part of the public land of the United States. If we declare it to be public land, the proceeds derived from its disposition go into the reclamation fund under the existing law, and thereafter they are paid back into the Treasury. It is being paid back now by some of the projects, and in a few years all of them will be paying back this money.

The CHAIRMAN. The time of the gentleman from Colorado has expired.

Mr. CARAWAY. Mr. Chairman, will the gentleman yield?

The CHAIRMAN. The gentleman's time has expired.

Mr. CARAWAY. I just wanted to know if a dollar of it would ever get back; that is all.

Mr. MONDELL. Mr. Chairman, the gentleman from Illinois [Mr. CANNON] proposes to repeal what is known as the reclamation law and deplete the reclamation fund, in so far as it applies or shall apply to the sums that may be received from the sale of these lands and this timber. I had the honor of presenting the reclamation bill to the House and of making the motion on which it passed the House.

The gentleman from Illinois says he did not vote for it. I want to say for the gentleman from Illinois that, as Speaker, he did use his influence to make it possible for us to consider the bill, so that whether he voted for it or not, he is entitled to great credit by reason of the fact that he did afford an opportunity for the consideration of the bill while he was Speaker of the House.

Mr. CANNON. Mr. Chairman, will the gentleman allow me?

Mr. MONDELL. I will.

Mr. CANNON. The majority always had the right to proceed in the House, and it was no part of my business to defeat it. [Applause.]

Mr. MONDELL. Well, in this particular case we never came to that test. The gentleman from Illinois, as Speaker, smoothed the way and made it possible to have the bill considered, and it became a law. It is working well. Under that law all the proceeds of the sale and disposition of the public lands flow into the reclamation fund. This bill modifies that provision somewhat by retaining for the State 50 per cent of these particular funds, and for the Federal Government 10 per cent, giving the reclamation fund only 40 per cent, where it would receive, except for this particular legislation, the entire proceeds.

The sum to be received from these sources will never mount up into the millions that have been mentioned by the gentleman from Illinois and others. By the time we shall have paid the State of Oregon the taxes due her and shall have paid the railway company the amount which is coming to the company on the basis of $2.50 an acre, and when we shall have provided for the care, sale, and disposition of the lands, the net sums received will be far below the juicy sums referred to. But whatever they are, it is right and proper that they should flow, as the receipts of other classes of public lands flow, into the reclamation fund.

Let me call the attention of the House to this fact: That if it had not been for the very earnest efforts of some of us here we would have never had these sums. The lands from which they are to be derived would be the property of the Oregon & California Railway Co., except for the efforts made by some of us to pass the resolution under which forfeiture suits were brought. I well remember how earnestly we were contested when we brought in a resolution authorizing the Federal Government to begin the suit that led to the situation which is now before us. There were a number of gentlemen who did not want that suit instituted. There were some who were perfectly willing that the railroad company should retain these values. We insisted that they were values that belonged to a certain extent to the people of the Union, and we pressed that resolution, which led to the Supreme Court decision under which we are now proposing to dispose of these lands. If we have secured by that action funds which otherwise would have flowed into the treasury of this great railway corporation, is that any reason why those funds should be diverted from the very meritorious uses which we have provided for such funds?

We are reclaiming and developing great areas of the West under the reclamation law, and if gentlemen will only be patient we shall have a return to the reclamation fund of the great bulk of the sums now invested in irrigation works. This year there has been returned to the fund over a million dollars, and in the year we are about to enter upon more than $2,000,000 will come into the fund from repayments. A great work is being carried on with a large measure of success.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. FERRIS. Mr. Chairman, how much time remains?

The CHAIRMAN. Fifteen minutes remain.

Mr. FERRIS. Mr. Chairman, I ask for a vote. Does the gentleman from Oregon [Mr HAWLEY] want any time on this?

Mr. HAWLEY. No; I do not want any time.

Mr. FERRIS. Then just a word, Mr. Chairman. I hope the amendment of the gentleman from Illinois [Mr. CANNON] will not be adopted. As the law now stands all of the proceeds of the sale of public lands go into the reclamation fund, to be loaned to farmers for the purpose of converting the arid West into habitable homes for the people. This bill puts only 40 per cent of the proceeds of this sale into the reclamation fund. The reclamation fund needs this amount. The different projects now under progress need it. If the amendment of the gentleman from Illinois [Mr. CANNON] prevails, nothing goes into this fund. It is an effort to strike down the irrigation law, and it should not be agreed to. I am sorry the distinguished ex-Speaker would want to strike down so useful and wholesome a law.

Mr. HILL. Will the gentleman yield for a question for information?

Mr. FERRIS. I yield to the gentleman from Connecticut.

Mr. HILL. In whom was the title to this land at the time the reclamation act was passed?

Mr. FERRIS. It was in the railroad, with some limitations and restrictive covenants that ran with the land.

The CHAIRMAN. The question is on the amendment of the gentleman from Illinois [Mr. CANNON].

The question being taken, the Chairman announced that the noes appeared to have it.

Mr. CANNON. I think I will just ask for a rising vote.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 18, noes 49.

Accordingly the amendment was rejected.

Mr. HAWLEY. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Oregon [Mr. HAWLEY] offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HAWLEY: Page 14, line 12, strike out the word "thirty," in line 12, and the remainder of the paragraph down to the period in line 23 and insert in lieu thereof the following: "Ten per cent of the remainder shall be paid into, reserved, and appropriated as a part of the fund created by the act of Congress approved June 17, 1902, known as the reclamation act; 30 per cent of said remainder of the proceeds arising from the sales of land and timber in the counties of Coos, Douglas, Lane, Tillamook, and Multnomah, in the State of Oregon, shall be paid to the treasurers of the said respective counties for the construction of roads, highways, and bridges, and for such other public purposes as the county authorities may direct, and 20 per cent thereof shall be paid to the proper officer of the respective port districts within the counties named, for the purpose of reducing the bonded indebtedness of such districts and for general harbor improvement, and, where there are more than one port district in any county, the county court of such county shall determine what portion of the fund shall be credited to the several port districts therein; 30 per cent of said remainder of the proceeds arising from the sale of lands and timber in the said named counties shall be paid to the State of Oregon for the establishment and support of common schools; 35 per cent of said remainder of the proceeds arising from the sale of lands and timber within counties other than the counties

of Coos, Douglas, Lane, Tillamook, and Multnomah shall be paid to the treasurers of the respective counties for the construction of roads, highways, and bridges, and for such other public purposes as the county court may direct, and 45 per cent thereof shall be paid to the State in which the respective counties are situated, for the establishment and support of common schools, and the entire balance remaining in said Oregon and California land-grant fund shall become a part of the general fund in the Treasury of the United States."

Mr. FOSTER. I reserve a point of order on the amendment.

The CHAIRMAN. The gentleman from Illinois reserves a point of order.

Mr. HAWLEY. When the bills were originally introduced in the House and Senate——

Mr. FERRIS. Mr. Chairman, is not debate closed?

The CHAIRMAN. No; there still remain 15 minutes.

Mr. FERRIS. Oh, no; I asked if anyone desired to use any time, and then I took a moment to close debate, and no one elected to use the remaining time.

Mr. HAWLEY. The gentleman from Oklahoma will recollect that I asked for five minutes when he asked to close debate on the pending amendment and paragraph.

Mr. FERRIS. That is true.

Mr. HAWLEY. And I did not want to take my five minutes on the other amendment. I wanted it on this one.

The CHAIRMAN. The Chair will recognize the gentleman from Oregon.

Mr. HAWLEY. Mr. Chairman, when the bills were introduced originally in the House and Senate, as drafted by the Department of Justice, in cooperation with some gentlemen of the two bodies, they provided 40 per cent for common schools and 40 per cent for the counties. I offer this amendment because of what virtually amounts to a universal demand from the people of the State of Oregon. They have felt that this proposed original division of 40 per cent for school purposes, which this will average up, and 40 per cent for the purposes of the political or municipal subdivisions, is a fair and just division, under the theory of this bill, and I would be derelict in my duty if I did not offer, even after the action already taken by the House, this amendment for your judgment, and ask you that, even after the extreme measure which you have taken—I speak it respectfully, but from our standpoint you will appreciate, of course, that it is rather extreme and unexpected—you will now take a different attitude and agree to the amendment I have just offered.

We have submitted, as fully as the time at our disposal would permit, our claims upon the proceeds to be derived from the disposition of the lands under the pending bill. Had greater opportunity been given for the consideration of the measure, we could have more fully elaborated the nature and justice of our claims.

The amendment I have just offered provides for the distribution of the funds as follows:

In counties in which there are no ports.	Per cent.
For the State school fund	45
For the counties	35
For the reclamation fund	10
For the Government	10

In counties in which there are ports.	Per cent.
For the State school fund	30
For the port districts	20
For the counties	30
For the reclamation fund	10
For the Government	10

This arrangement will give the State school fund on the whole practically 40 per cent. The Government has already received about $1,000,000 from the settlement under the act of 1912. Under this bill the Government will become a residual legatee and will receive a definite portion of the proceeds also, which, altogether combined, will give to the Treasury several millions of dollars. The reclamation fund will also receive under the amendment several millions. Our school fund is irreducible as to its principal sum, the interest only being used. I do not need to argue to this intelligent body of men the importance of public education. Since so great a portion of the State is Government land of different kinds, our power to raise money is greatly diminished in comparison with that of States whose whole areas are taxable.

The division we now ask would be a generous exhibition of a kindly interest in our welfare, and recognize what seems to me to be an indisputable and just right on our part. The ports have an exceptional status. Organized under State law, they have sold bonds, based upon the taxable area within their respective boundaries, and have paid the moneys received therefrom to the War Department, to assist the Government in the construction of works of river and harbor improvement on projects regularly adopted and approved by Congress. To reduce the taxable area at this time without making compensation in the bill would greatly increase the burden assumed by them and in a wholly unexpected manner. And by assisting in the construction of waterway improvements they have added a great deal to the value of the large areas of timber held by the Government and made accessible to market many billions of feet of the timber on them. By this the Government has received all that it ought reasonably to expect from the sales of land and timber on the grant within the port districts. As to the reclamation fund, Oregon has never received the apportionment of funds for the construction of reclamation projects within her boundaries we were entitled to under the law. An additional great contribution to that fund at this time, to be derived in the manner proposed in the bill, ought not to be made at our expense. The adoption of this amendment would do more substantial justice. Reclamation work is a national undertaking and should be supported from the general revenues. We are distant from the seat of government and have at present only a moderate population, but right and justice should not be made an attribute of time and numbers.

In the days before our flag had an undisputed right to float over the Oregon country stout-hearted American men and women, taking their goods in wagons and their lives in their hands, braved the continuous danger from hunger and thirst, desert and Indian, to establish homes in its vast unpeopled spaces. They carried with them the loves of men and women for homes and families, the fear of God, and the border of the Republic. Too far distant to expect protection from the Government, they provided for their own protection, made hospitable homes in growing neighborhoods, constructed churches, built schools, established justice, and by the bloodless contests of a better civilization won for the United States the Oregon country against the claims of the English Government. To them it is due that to-day the hem of Columbia's robe flows in the western winds coterminous with the boundary of the continent. But with others the contests were not bloodless. Some Indian tribes were insistent and dangerous enemies. No road was too long, hungry, or thirsty, or place too remote for the pioneers when the cry for rescue came to the scattered settlements. There was mounting in hot haste, shouted farewells, and men went to the front. During the Civil War period, at the request of President Lincoln and the Secretary of War, the State of Oregon undertook to maintain order and safety over an area of some 300,000 square miles. And maintain them we did. We raised troops from our scant population, sold bonds and equipped them out of our poverty, rescued wagon trains, protected the Government mails, saved Government property, and guarded settlements. This and others of our just claims have never been paid. Is there reluctance to-day in giving us a little of the value of the land that the courage and endurance of our pioneer men and women won and the blood of their brave sons preserved? What we have asked in the name of the people of Oregon to-day the history of the case and the merits of their cause amply justify. [Applause.]

Mr. FOSTER. I withdraw the point of order.

The CHAIRMAN. The gentleman withdraws the point of order which he reserved. The question is on the amendment offered by the gentleman from Oregon [Mr. HAWLEY].

The amendment was rejected.

Mr. HAWLEY. Mr. Chairman, I offer the following amendment.

The CHAIRMAN. The gentleman from Oregon offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. HAWLEY: Page 14, line 17, strike out the word "forty" and insert in lieu thereof the word "thirty," and, after the semicolon in line 20, page 14, insert the following: "10 per cent of said proceeds shall be paid to the State treasurer of the State of Oregon for the use of and to be apportioned between the now duly organized port district in which any of said lands are located in proportion to the assessed value of said lands within the respective port districts as shown by the 1915 assessment rolls, to be used by the port district authorities for the purpose of reducing the bonded indebtedness of the respective port districts and for general harbor improvement therein."

Mr. RAKER. Mr. Chairman, I reserve a point of order against the amendment.

Mr. HAWLEY. Mr. Chairman, how much of my five minutes remain?

The CHAIRMAN. Two minutes.

Mr. HAWLEY. Mr. Chairman, during the general debate the three Members from the State of Oregon presented the claims of the port. The lands in green [pointing to the map] indicate the forest reserve. The boundaries of the port districts are indicated by the yellow line. The grant lands are indicated by the red squares on the map, which also show the proportion the grant lands bear toward the total areas of the port districts. These districts were organized under State law. They have issued bonds and paid the money received from sales of bonds over to

the War Department, in accordance with existing law, for the improvement of waterways which had been adopted by Congress. For instance, the port of Siuslaw bonded itself for $325,000. One-third of the taxable area of that port will be taken by this bill from the taxable property of the port and will leave them only two-thirds of the present taxable area. They had a right to depend on it all remaining on the rolls, when they undertook their cooperative work with the United States, to aid in paying the interest and the bonds when they mature. Removing these lands from the tax rolls will increase the tax 50 per cent on the remaining land and make the burden very hard to be borne. It seems to me that these people who bonded themselves, denied themselves, put money into the Treasury of the United States for waterway improvement, should receive the favorable consideration of the House for their practical exhibition of public spirit, and that that consideration should be evinced by granting relief to the several port districts, based upon the taxable area lost to each port. This is what the pending amendment seeks to do. I offered a moment ago an amendment which reduced the payment to the reclamation fund to 10 per cent. That amendment was rejected. This amendment will give the reclamation fund 30 per cent and the port districts 10 per cent, and certainly the claims of the port districts are infinitely stronger and juster than any claim that can be advanced in behalf of the reclamation fund for any portion of the proceeds of the grant.

Under this amendment the division of the proceeds will be the same as that provided in the bill, with the exception that instead of 40 per cent being paid into the reclamation fund that 40 per cent will be divided into two parts and 30 per cent will go to the reclamation fund and 10 per cent to the ports.

The assessed valuation of the grant lands within the counties in which are port districts	$11,085,095
The assessed valuation of the grant lands in counties having no port districts	11,469,175
Total assessed value of the grant lands in the 18 counties	22,554,270
Deducting from this total the amount estimated as yet due the railroad company and the amount due the counties as accrued taxes	6,668,622
There will be left to be distributed proceeds to the amount of	15,775,648

On the basis of the figures furnished me and on the further assumption that the assessed valuation under the Oregon law, which requires assessment on the basis of the cash value, is the present selling value of the property, the amounts apportioned to the several funds, then, will be—

For the counties, 30 per cent	$4,732,694
For the State school fund, 20 per cent	3,155,129
For the port districts, 10 per cent	1,577,564
For the reclamation fund, 30 per cent	4,732,694
For the Federal Treasury, 10 per cent	1,577,564

If the grant should sell for more than is above made the basis of calculation, the items will be proportionately increased; and I wish to call to the attention of the House that it will be a long time before any considerable part of the funds estimated to be received by these several funds will be credited to them. If the grant contains 40,000,000,000 feet of timber, that timber must be sold in competition not only with the more than 500,000,000,000 feet of other timber in Oregon in public and private ownership, but in competition also with many hundreds of billions of feet of other timber on the Pacific coast.

Mr. RAKER. Mr. Chairman, I withdraw the point of order.

Mr. McARTHUR. Mr. Chairman, I agree with everything that my colleague [Mr. HAWLEY] has said about the port districts and the equity and justice of the present amendment which he has offered. The port districts were created by general law of the State of Oregon. Now we are coming along with this bill which proposes to remove a large area of the taxable property. It is like cutting off a man's leg and expecting him to go through life plowing and doing manual work. It is a hard proposition. Just a few moments ago the House struck down the provision for supporting the roads and bridges in counties from 30 to 20 per cent. I can hardly believe that the House acted with full knowledge of the situation. I hope the House will restore the original figures when it comes back for final action.

In the district of the port of Siuslaw—40 per cent of that particular district is covered by forest reserve on which the authorities of the county have no right to collect any taxes—we are now taking out of the area of this port district all the Oregon & California grant lands. For a great many years these lands will be under the ownership of the United States Government and not subject to local taxation. There is a very small part of the territory that is allowed to be taxed, and the port districts are going to suffer and be handicapped.

Mr. MEEKER. Will the gentleman yield?

Mr. McARTHUR. Certainly.

Mr. MEEKER. I did not understand the gentleman. Did he say "port" or "pork"? [Laughter.]

Mr. McARTHUR. There is no "pork" about the river and harbor propositions in the Northwest. They all went through the House without discussion. [Applause.]

Mr. FERRIS. Mr. Chairman, I was somewhat in error about the time; but now that these amendments have come in, I ask unanimous consent for one minute.

The CHAIRMAN. The gentleman has two minutes remaining.

Mr. FERRIS. Mr. Chairman, this bill provides for the payment of the delinquent taxes for Oregon. They have given them 40 per cent, after the amendment of the gentleman from Illinois was adopted, for the improvement of roads, schools, and bridges. Now come these two industrious Representatives from Oregon and out of this fund want to improve the rivers and harbors and ports. I do not know just where the demand on this fund is going to stop. I can not conceive where anybody in Oregon could have the courage to ask that a part of the proceeds of these lands be used for the improvement of rivers and harbors. I can not conceive of a constituency so ravenous as to ask for it, and I am sure the House will take little or no part in granting such a request. I know of no such generosity ever practiced by Congress upon any State, and there seems to be no end of the efforts that are being made to get the rest of it.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oregon.

The question was taken, and the amendment was rejected.

The Clerk read as follows:

SEC. 11. That the Secretary of the Interior is hereby authorized to perform any and all acts and to make such rules and regulations as may be necessary and proper for the purpose of carrying the provisions of this act into full force and effect; and any person, applicant, purchaser, entryman, or witness who will swear falsely in any affidavit or proceeding required hereunder or under the regulations issued by the Secretary of the Interior shall be guilty of perjury and liable to the penalties prescribed therefor.

* * * * * * *

Mr. SINNOTT. Mr. Chairman, I have an amendment I wish to offer.

The Clerk read as follows:

Amend, line 4, page 14, by inserting after the word "States" the following:

"The balance shall be paid to the distributees hereinafter mentioned, in the proportions hereinafter set forth and for the purposes hereinafter set forth: the amounts to be paid to the counties shall be divided among the counties in proportion to the present assessed valuation of the grant lands in each county."

Mr. SINNOTT. Mr. Chairman, it is generally supposed that this bill in its present form provides that the State will get 40 per cent. This is not correct. After paying the railroad company there will be a balance left of some $5,000,000 which goes into the Treasury of the United States. The State ought to be entitled to a share in whatever fund is left over after paying the railroad company and the taxes. Otherwise we do not get 40 per cent of the proceeds.

The CHAIRMAN. The time for debate on this section has expired, and the question is on the amendment offered by the gentleman from Oregon [Mr. SINNOTT].

The question was taken, and the amendment was rejected.

Mr. SINNOTT. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 14, line 17, after the word "centum," insert "to be expended in Oregon."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was rejected.

Mr. MONDELL. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 14, line 17, strike out the words "forty per cent" and insert the words "the balance remaining," and also strike out all after the word "act," in line 20, down to and including the word "States," in line 23.

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Wyoming.

Mr. MONDELL. Mr. Chairman, I would like to have one minute in which to explain the amendment.

The CHAIRMAN. All time has expired.

Mr. MONDELL. The amendment provides that the remainder, after paying the State of Oregon, shall go into the reclamation fund.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was rejected.

The Clerk read as follows:

SEC. 11. That the Secretary of the Interior is hereby authorized to perform any and all acts and to make such rules and regulations as may be necessary and proper for the purpose of carrying the provisions of this act into full force and effect; and any person, applicant, purchaser, entryman, or witness who shall swear falsely in any affidavit or proceeding required hereunder or under the regulations issued by the Secretary of the Interior shall be guilty of perjury and liable to the penalties prescribed therefor.

Mr. NORTON. Mr. Chairman, I move to strike out the last word. What protection, if any, is provided in the bill in case the United States Supreme Court should hold that the railroad company had the right to take the timber off the land? Would the United States, under the terms of this bill, still be required to pay the railroad company $2.50 an acre for the land without the timber?

Mr. FERRIS. Not at all. The Supreme Court has passed on that proposition. That was urged in the trial before the court. They made that contention both in their pleading and in their argument.

Mr. NORTON. I do not understand that the Supreme Court has held squarely upon that question.

Mr. FERRIS. I think so by inference. They wound up by saying that they granted an injunction for six months, during which time Congress could do anything with these lands that it wanted to, so long as it gave the railroad the benefit of the granting act.

Mr. LENROOT. May I suggest that in the event the Supreme Court should hold as the gentleman suggests this entire bill then falls?

Mr. NORTON. There will be no obligation on the part of the United States to pay the railroad company anything then under the terms of this bill?

Mr. LENROOT. No.

Mr. FERRIS. Not alone that, but in response to that contention the court specifically granted an injunction against selling and cutting.

Mr. NORTON. Granting an injunction would not mean for a certainty that the court would hold that the railroad company does not have the right to the timber on the land.

Mr. FERRIS. The injunction standing alone would not, but the language used in connection with it passed it up to Congress for Congress to act upon.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn and the Clerk will read.

The Clerk read as follows:

SEC. 12. That the sum of $100,000 be, and the same is hereby, appropriated, out of any moneys in the Treasury not otherwise appropriated, to enable the Secretary of the Interior, in cooperation with the Secretary of Agriculture, or otherwise, to complete the classification of the lands as herein provided, which amount shall be immediately available and shall remain available until such classification shall have been completed.

Mr. SINNOTT. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment by Mr. SINNOTT: Amend, page 15, by inserting, after line 21, a new paragraph as follows:

"Nothing in this act shall be construed as affecting the right of the State of Oregon to tax said lands."

Mr. SINNOTT. Mr. Chairman, I think the true theory of this bill ought to be, and also a correct interpretation of the decision of the Supreme Court is, that the Government may dispose of these lands; that the Government in so doing in a sense acts as the attorney—in fact, the agent—for the disposal of these lands; that the Government has no right to step in and revest in itself the absolute title to these lands, when in a sense it has only a temporary title for the purpose of conveyance, it may have the custody of these lands which the Government under this bill assumes, and not the actual title to the land which would enable the Government to withhold them from taxation. I do not believe it rests in the power of Congress to step into my State and withdraw lands from taxation in this manner. Congress may dispose of the lands because the railroad company has refused to do it, but Congress can not revest in the Government the absolute title to these lands, thus withdrawing them from taxation. This amendment which I have offered covers that idea.

Mr. FERRIS. Mr. Chairman, I ask unanimous consent that debate end in four minutes, and of that time I desire that I have two minutes and the gentleman from Wisconsin [Mr. LENROOT] two minutes.

The CHAIRMAN. The gentleman from Oklahoma asks unanimous consent that debate close in four minutes. Is there objection? [After a pause.] The Chair hears none.

Mr. LENROOT. Mr. Chairman, if this amendment should be adopted upon the theory that the State of Oregon is entitled to continue to tax this land, then we should strike out of the bill entirely the provision giving to the State of Oregon 50 per cent of the proceeds of those lands. They are not entitled to both, certainly. If they are entitled to tax, they are not entitled to the proceeds, and the proceeds are given to the State of Oregon to take the place of taxes, so there is no equity or justice in the contention made by the gentleman from Oregon.

Mr. MONDELL. Mr. Chairman——

Mr. FERRIS. Mr. Chairman, the gentleman from Wyoming has not any time. Debate was closed by unanimous consent at the end of four minutes—two minutes to be given to the gentleman from Wisconsin and two to myself. If the gentleman wants one minute of my time, I will give that to him.

Mr. MONDELL. I did not understand that debate was limited.

Mr. FERRIS. Debate was to be closed in four minutes—two to the gentleman from Wisconsin and two to myself.

The CHAIRMAN. By unanimous agreement, all debate was to close in four minutes.

Mr. FERRIS. Mr. Chairman, I only want to consume a moment's time. The gentleman from Oregon [Mr. SINNOTT]—this is just another effort to reach his hand into the crib and get all of this proposition, and, not content with that, he contends the Government has not the right to take back its own property, and he had advanced the novel theory here that the State of Oregon shall begin to tax Government property. No such proposition is known to the law or the Constitution; no such proposition can be recognized. They first secure a portion of the proceeds to compensate them for loss of taxes; they now come and want to tax Government land. Where will these requests end? I ask for a vote.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oregon.

The question was taken, and the amendment was rejected.

Mr. FERRIS. Mr. Chairman, I ask that the preamble be read.

The preamble was read, as follows:

Whereas by the acts of Congress approved April 10, 1869 (14 Stat. L., p. 239), and May 4, 1870 (16 Stat. L., p. 94), it was provided that the lands granted to aid in the construction of certain railroads from Portland, in the State of Oregon, to the northern boundary of the State of California, and from Portland to Astoria and McMinnville, in the State of Oregon, should be sold to actual settlers only, in quantities not exceeding 160 acres to each person and at prices not greater than $2.50 per acre; and

Whereas the Oregon & California Railroad Co., beneficiary of said acts, has violated the terms under which the said lands were granted by selling certain of said lands to persons other than actual settlers, by selling in quantities of more than one-quarter section to each person, by selling at prices in excess of $2.50 per acre, and by refusing to sell any further portions of such lands to actual settlers at any price, and in so doing has willfully violated the terms of the statutes by which the said lands were granted; and

Whereas in the suit instituted by the Attorney General of the United States, pursuant to the authority and direction contained in the joint resolution of April 30, 1908 (35 Stat. L., p. 571), the Supreme Court of the United States, in its decision rendered June 21, 1915 (238 U. S., p. 393), ordered that the Oregon & California Railroad Co. be enjoined from making further sales of lands in violation of the law, and that the said railroad company be further enjoined from making any sales whatever of either the land or the timber thereon until Congress should have a reasonable opportunity to provide for the disposition of said lands in accordance with such policy as Congress might deem fitting under the circumstances and at the same time secure to the railroad company all the value conferred by the granting acts; and

Whereas it was expressly provided by section 12 of the act of July 25, 1866 (14 Stat. L., p. 239), that Congress might at any time, having due regard for the rights of the grantee railroad company, add to, alter, amend, or repeal the act making the grant; and

Whereas the Oregon & California Railroad Co. and its predecessors in interest received a large sum of money from sales of said land for prices in excess of $2.50 per acre, and from leases, interest on contracts, etc.; and

Whereas the aforesaid granting acts conferred upon the said railroad company the right to receive not more than $2.50 per acre for each acre of land so granted: Therefore

Mr. FERRIS. Mr. Chairman, I move that the preamble be adopted.

The question was taken, and the preamble was adopted.

Mr. FERRIS. Mr. Chairman, I move that the committee do now rise and report the bill H. R. 14864 to the House with recommendation that the amendments be agreed to and that the bill as amended, with the preamble adopted, be passed.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. GARD, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 14864 and had directed him to report the same back to the House with sundry amendments and a preamble, with the recommendation that the amendments be agreed to, that the preamble be adopted, and that the bill as amended, with the preamble, be passed.

Mr. FERRIS. Mr. Speaker, I move the previous question on the bill, preamble, and amendments to final passage.

Mr. McARTHUR. Mr. Speaker, a parliamentary inquiry.

The SPEAKER. The gentleman will state it.

Mr. McARTHUR. Does this shut off a demand for a separate vote?

The SPEAKER. Oh, no; the Chair will put that at the right time.

The previous question was ordered.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed with amendments bill of the following title, in which the concurrence of the House of Representatives was requested:

H. R. 15005. An act to appropriate $200,000 for training the Organized Militia of any State, Territory, or of the District of Columbia.

The message also announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 6041. An act granting the consent of Congress to Jackson County, Miss., to construct a bridge across West Pascagoula River at or near Pascagoula, Miss.

ENROLLED BILLS PRESENTED TO THE PRESIDENT FOR HIS APPROVAL.

Mr. LAZARO, from the Committee on Enrolled bills, reported that this day they had presented to the President of the United States for his approval the following bills:

H. R. 12766. An act for making further and more effectual provision for the national defense, and for other purposes;

H. R. 12027. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war;

H. R. 10490. An act to prevent fraudulent advertising in the District of Columbia; and

H. R. 14771. An act granting the consent of Congress to commissioners of Charlton County, Ga., and Nassau County, Fla., to construct a bridge across the St. Marys River.

HOUR OF MEETING TO-MORROW.

Mr. PAGE of North Carolina. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow morning.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock to-morrow morning. Is there objection? [After a pause.] The Chair hears none.

OREGON & CALIFORNIA RAILROAD LAND GRANT.

The SPEAKER. Is a separate vote demanded on any amendment?

Mr. SINNOTT. Mr. Speaker, I demand a separate vote on what is known as the Foster amendment in section 10, whereby the amount was cut from 30 to 20.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them en grosse.

The question was taken, and the other amendments were agreed to.

The SPEAKER. The question is on the amendment suggested by the gentleman from Oregon [Mr. SINNOTT].

The Clerk will report the amendment.

The Clerk read as follows:

Page 14, line 12, strike out the word "thirty" and insert in lieu thereof the word "twenty."

The SPEAKER. The question is on agreeing to the Foster amendment.

The question was taken, and the Speaker announced that the ayes seemed to have it.

Mr. SINNOTT. Mr. Speaker, I demand a division.

The House divided; and there were—ayes 53, noes 60.

Mr. FOSTER. Mr. Speaker, I ask for tellers.

Tellers were refused.

Mr. FOSTER. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. The gentleman from Illinois makes the point of order that there is no quorum present. The Chair will count. [After counting.] One hundred and thirty-five Members are present, not a quorum.

Mr. PAGE of North Carolina. Mr. Speaker, I move a call of the House.

Mr. MANN. Oh, no. Move to adjourn.

The SPEAKER. The gentleman from North Carolina [Mr. PAGE] moves a call of the House.

Mr. CANNON. Mr. Speaker, it comes automatically.

The SPEAKER. That is exactly correct. The Doorkeeper will close the doors, the Sergeant at Arms will notify the absentees.

ADJOURNMENT.

Mr. KITCHIN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 6 o'clock and 5 minutes p. m.) the House adjourned until to-morrow, Thursday, May 25, 1916, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, a letter from the Secretary of War, transmitting, with a letter from the Chief of Engineers, reports on preliminary examination and survey of Pocomoke River, Md. (H. Doc. No. 1165); was taken from the Speaker's table, referred to the Committee on Rivers and Harbors, and ordered to be printed with illustrations.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, bills and resolutions were severally reported from committees, delivered to the Clerk, and referred to the several calendars therein named, as follows:

Mr. SIMS, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (S. 5841) to authorize the Perdido Bay Bridge & Ferry Co., a corporation existing under the laws of the State of Alabama, to construct a bridge over and across Perdido Bay from Lillian, Baldwin County, Ala., to Cummings Point, Escambia County, Fla., reported the same without amendment, accompanied by a report (No. 744), which said bill and report were referred to the House Calendar.

Mr. DILLON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 15322) granting the consent of Congress to the board of county commissioners of Traill County, N. Dak., to construct a bridge across the Red River of the North, reported the same with amendment, accompanied by a report (No. 745), which said bill and report were referred to the House Calendar.

He also, from the same committee, to which was referred the bill (H. R. 15318) granting the consent of Congress to the village and township of Hendrum, Norman County, Minn., and the township of Elm River, Traill County, N. Dak., to construct a bridge across the Red River of the North on the boundary line between said States, reported the same without amendment, accompanied by a report (No. 746), which said bill and report were referred to the House Calendar.

Mr. SIMS, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (H. R. 15682) granting the consent of Congress to Jackson County, Miss., to construct a bridge across West Pascagoula River at or near Pascagoula, Miss., reported the same without amendment, accompanied by a report (No. 747), which said bill and report were referred to the House Calendar.

Mr. DILLON, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (S. 5310) to authorize the county commissioners of Walla Walla and Franklin Counties, Wash., to construct a bridge across the Snake River between Pasco and Burbank, reported the same without amendment, accompanied by a report (No. 748), which said bill and report were referred to the House Calendar.

Mr. RUCKER, from the Committee on the Election of President, Vice President, and Representatives in Congress, to which was referred the bill (H. R. 15842) to revise, amend, and codify the laws relating to publicity of contributions and expenditures made for the purpose of influencing the nomination and election of candidates for the offices of Senator and Representative in the Congress of the United States, extending the same to candidates for nomination and election to the offices of President and Vice President of the United States, limiting the amount which may be expended, providing for the publicity of campaign expenses, and for other purposes, reported the same without amendment, accompanied by a report (No. 765), which said bill and report were referred to the House Calendar.

Mr. RAKER, from the Committee on the Public Lands, to which was referred the bill (H. R. 348) to establish the Lassen Volcanic National Park in the Sierra Nevada Mountains in the State of California, and for other purposes, reported the same with amendment, accompanied by a report (No. 749), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. O'SHAUNESSY, from the Committee on Interstate and Foreign Commerce, to which was referred the bill (S. 5910) authorizing the sale of the lighthouse reservation at Scituate, Mass., reported the same without amendment, accompanied by a report (No. 750), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. SHALLENBERGER, from the Committee on Military Affairs, to which was referred the bill (S. 3101) authorizing the Secretary of War to extend the lease issued under the act of August 23, 1912, entitled "An act authorizing the Secretary of War to lease to the Chicago, Milwaukee & Puget Sound Railway Co. a tract of land in the Fort Keogh Military Reservation, in the State of Montana, and for a right of way thereto for the removal of gravel and ballast material, reported the same without amendment, accompanied by a report (No. 751), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. PARK, from the Committee on Public Buildings and Grounds, to which was referred the bill (S. 5839) to repeal paragraph 4 of section 21 of the public buildings act, approved March 4, 1913, providing for the construction of a national archives building, reported the same without amendment, accompanied by a report (No. 753), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (S. 138) for the relief of the Ottawa Indian Tribe of Blanchards Fork and Roche de Boeuf, reported the same without amendment, accompanied by a report (No. 754), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

He also, from the same committee, to which was referred the bill (S. 4371) authorizing the Sioux Tribe of Indians to submit claims to the Court of Claims, reported the same without amendment, accompanied by a report (No. 755), which said bill and report were referred to the Committee of the Whole House on the state of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII, private bills were severally reported from committees, delivered to the Clerk, and referred to the Committee of the Whole House, as follows:

Mr. STEPHENS of Mississippi, from the Committee on Claims, to which was referred the bill (H. R. 13637) for the relief of T. J. Ball, reported the same with amendment, accompanied by a report (No. 752), which said bill and report were referred to the Private Calendar.

He also, from the same committee, to which was referred the bill (S. 3257) for the relief of Johnston-McCubbins Investment Co., reported the same without amendment, accompanied by a report (No. 756), which said bill and report were referred to the Private Calendar.

Mr. EDMONDS, from the Committee on Claims, to which was referred the bill (H. R. 8624) for the relief of Mary Bailey Pratt, reported the same with amendment, accompanied by a report (No. 757), which said bill and report were referred to the Private Calendar.

Mr. RUSSELL of Ohio, from the Committee on Claims, to which was referred the bill (H. R. 13785) for the relief of Sarah S. Plank, reported the same with amendment, accompanied by a report (No. 758), which said bill and report were referred to the Private Calendar.

Mr. LINTHICUM, from the Committee on Pensions, to which was referred the bill (H. R. 15957) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors, reported the same without amendment, accompanied by a report (No. 764), which said bill and report were referred to the Private Calendar.

ADVERSE REPORTS.

Under clause 2 of Rule XIII, adverse reports were delivered to the Clerk and laid on the table, as follows:

Mr. RUSSELL of Ohio, from the Committee on Claims, to which was referred the bill (H. R. 14345) to reimburse J. B. Patterson, postmaster at Lacon, Morgan County, Ala., for certain postage stamps stolen, reported the same adversely, accompanied by a report (No. 759), which said bill and report were laid on the table.

Mr. FOSTER, from the Committee on Claims, to which was referred the bill (H. R. 12433) for the relief of W. H. Cleere, reported the same adversely, accompanied by a report (No. 760), which said bill and report were laid on the table.

Mr. RUSSELL of Ohio, from the Committee on Claims, to which was referred the bill (H. R. 1960) for the relief of Bybee & Beard, of Lander, Wyo., reported the same adversely, accompanied by a report (No. 761), which said bill and report were laid on the table.

He also, from the same committee, to which was referred the bill (H. R. 10737) for the relief of Eli Pettijohn, reported the same adversely, accompanied by a report (No. 762), which said bill and report were laid on the table.

He also, from the same committee, to which was referred the bill (H. R. 12022) for the relief of the estate of Moses M. Bane, reported the same adversely, accompanied by a report (No. 763), which said bill and report were laid on the table.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, committees were discharged from the consideration of the following bills, which were referred as follows:

A bill (H. R. 6950) granting a pension to Anna R. Burket; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

A bill (H. R. 7675) granting a pension to Sara Gates; Committee on Pensions discharged, and referred to the Committee on Invalid Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, bills and resolutions were introduced and severally referred as follows:

By Mr. PADGETT: A bill (H. R. 15947) making appropriations for the naval service for the fiscal year ending June 30, 1917, and for other purposes; to the Committee of the Whole House on the state of the Union.

By Mr. HAY: A bill (H. R. 15948) to provide for the creation of a Council of Executive Information for the Coordination of Industries and Resources for the National Security and Welfare and for other purposes; to the Committee on Military Affairs.

By Mr. SIMS (by request): A bill (H. R. 15949) to prevent the nullification of State antigambling laws by international or interstate transmission of race-gambling bets or racing odds; to the Committee on Interstate and Foreign Commerce.

By Mr. STERLING: A bill (H. R. 15950) to amend an act entitled "An act to promote the safety of employees and travelers upon railroads by compelling common carriers engaged in interstate commerce to equip their locomotives with safe and suitable boilers and appurtenances thereto," approved February 17, 1911; to the Committee on Interstate and Foreign Commerce.

By Mr. TEMPLE: A bill (H. R. 15951) to provide for the purchase of additional ground and for erecting an addition to and making alterations in the Federal building at Beaver Falls, Pa.; to the Committee on Public Buildings and Grounds.

Also, a bill (H. R. 15952) to provide for the purchase of additional ground and for erecting an addition to and making alterations in the Federal building at Washington, Pa.; to the Committee on Public Buildings and Grounds.

By Mr. KIESS of Pennsylvania: A bill (H. R. 15953) authorizing the Secretary of War to donate one condemned cannon to the cemetery at Ulysses, Pa.; to the Committee on Military Affairs.

By Mr. SAUNDERS: A bill (H. R. 15954) to establish an experimental station in the State of Maryland or Virginia for the study of fish diseases and problems in the propagation of fish; to the Committee on the Merchant Marine and Fisheries.

By Mr. ADAMSON: A bill (H. R. 15955) extending certain privileges of canal employees to other officials on the Canal Zone and authorizing the President to make rules and regulations affecting health, sanitation, quarantine, taxation, public roads, self-propelled vehicles, and police powers on the Canal Zone, and for other purposes, including provision as to certain fees, money orders, and interest deposits; to the Committee on Interstate and Foreign Commerce.

By Mr. DAVENPORT: A bill (H. R. 15956) to repeal section 3 of the act of Congress, approved May 4, 1916, providing for an increase of the Corps of Cadets at the United States Military Academy at West Point; to the Committee on Military Affairs.

By Mr. SMITH of Idaho: A bill (H. R. 15958) to amend an act providing for the withdrawal from public entry of lands needed for town sites in connection with irrigation projects; to the Committee on Irrigation of Arid Lands.

By Mr. FARLEY: Joint resolution (H. J. Res. 227) authorizing the Secretary of War to accept on behalf of the United States funds for the construction of a lighting plant for the illumination of the Statue of Liberty, on Bedloes Island, New York Harbor; to the Committee on Interstate and Foreign Commerce.

By Mr. SMITH of New York: Joint resolution (H. J. Res. 228) in relation to the International Bridge in Niagara River; to the Committee on Interstate and Foreign Commerce.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. LINTHICUM: A bill (H. R. 15957) granting pensions and increase of pensions to certain soldiers and sailors of the Regular Army and Navy, and certain soldiers and sailors of wars other than the Civil War, and to widows of such soldiers and sailors; to the Committee of the Whole House.

By Mr. AIKEN: A bill (H. R. 15959) for the relief of J. Richard Earle; to the Committee on War Claims.

By Mr. BAILEY: A bill (H. R. 15960) granting an increase of pension to Harmon Blackburn; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15961) for the relief of Harrison Defibaugh; to the Committee on Military Affairs.

By Mr. BRITT: A bill (H. R. 15962) for the relief of J. C. Smathers; to the Committee on War Claims.

Also, a bill (H. R. 15963) granting an increase of pension to Wiley S. Roberts; to the Committee on Pensions.

By Mr. BRITTEN: A bill (H. R. 15964) for the relief of Frank Kinsey Hill, captain on the retired list of the United States Navy; to the Committee on Naval Affairs.

By Mr. COOPER of Wisconsin: A bill (H. R. 15965) granting an increase of pension to Emily F. Belden; to the Committee on Invalid Pensions.

By Mr. DOOLITTLE: A bill (H. R. 15966) granting an increase of pension to Clifford Jones; to the Committee on Pensions.

By Mr. DUPRÉ: A bill (H. R. 15967) granting a pension to Wiley Lawson; to the Committee on Pensions.

By Mr. FORDNEY: A bill (H. R. 15968) granting a pension to Honor K. Forman; to the Committee on Invalid Pensions.

By Mr. FULLER: A bill (H. R. 15969) granting a pension to Mary M. Gardner; to the Committee on Invalid Pensions.

By Mr. GRAY of Indiana: A bill (H. R. 15970) granting an increase of pension to John L. Swain; to the Committee on Invalid Pensions.

By Mr. HARDY: A bill (H. R. 15971) granting a pension to Esther Penick; to the Committee on Invalid Pensions.

By Mr. HOOD: A bill (H. R. 15972) granting a pension to Christopher M. Saunders; to the Committee on Pensions.

By Mr. HUMPHREY of Washington: A bill (H. R. 15973) granting an increase of pension to Simeon L. Coen; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15974) granting an increase of pension to Myra Church; to the Committee on Pensions.

By Mr. KINKAID: A bill (H. R. 15975) granting an increase of pension to William Cassman; to the Committee on Invalid Pensions.

By Mr. LAFEAN: A bill (H. R. 15976) granting an increase of pension to Casandra M. Bennett; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15977) granting an increase of pension to Margaret E. Feiser; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15978) granting an increase of pension to Elizabeth Bose; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15979) granting an increase of pension to Ellen Kipp; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15980) granting an increase of pension to Mary A. Garrety; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15981) granting an increase of pension to George Horn; to the Committee on Invalid Pensions.

By Mr. McANDREWS: A bill (H. R. 15982) for the relief of Edward F. Dunne, jr.; to the Committee on Appropriations.

By Mr. McCLINTIC: A bill (H. R. 15983) granting a pension to John Smith; to the Committee on Invalid Pensions.

By Mr. McLAUGHLIN: A bill (H. R. 15984) granting an increase of pension to Elgar W. Rose; to the Committee on Invalid Pensions.

By Mr. MATTHEWS: A bill (H. R. 15985) granting an increase of pension to Charles Hoff; to the Committee on Invalid Pensions.

By Mr. MOONEY: A bill (H. R. 15986) granting an increase of pension to Alexander Clark; to the Committee on Invalid Pensions.

By Mr. MOORES of Indiana: A bill (H. R. 15987) granting an increase of pension to Olive J. Boylan; to the Committee on Invalid Pensions.

By Mr. NEELY: A bill (H. R. 15988) granting an increase of pension to William H. Topp; to the Committee on Invalid Pensions.

By Mr. NORTH: A bill (H. R. 15989) granting an increase of pension to Henry M. Means; to the Committee on Invalid Pensions.

By Mr. OAKEY: A bill (H. R. 15990) granting an increase of pension to George Newschafer; to the Committee on Invalid Pensions.

By Mr. REILLY: A bill (H. R. 15991) granting an increase in pension to Mathew Kerwin; to the Committee on Invalid Pensions.

By Mr. RICKETTS: A bill (H. R. 15992) granting an increase of pension to Adam Funk; to the Committee on Invalid Pensions.

Also, a bill (H. R. 15993) granting an increase of pension to Thomas J. Gafford; to the Committee on Invalid Pensions.

By Mr. SLAYDEN: A bill (H. R. 15994) for the relief of Sam H. McCain; to the Committee on Claims.

By Mr. SMITH of New York: A bill (H. R. 15995) granting a pension to Wilhelmina Rohe; to the Committee on Pensions.

By Mr. TAGUE: A bill (H. R. 15996) granting a pension to James D. Winslow; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By the SPEAKER (by request): Memorial of St. Louis (Mo.) Medical Society, against Senate joint resolution 120, relative to members of Public Health Service; to the Committee on Interstate and Foreign Commerce.

By Mr. ASHBROOK: Evidence to accompany House bill 13055, for the relief of George W. Statler; to the Committee on Invalid Pensions.

By Mr. BAILEY: Petitions of James M. McGee, Duquesne Oil & Supply Co., and W. F. Weppner, all of Pittsburgh, Pa.; Mrs. Henry Villard, of New York City; Marine Manufacturing & Supply Co., of Pittsburgh, Pa.; Acheson Manufacturing Co. and F. W. Robertshaw, both of Rankin, Pa.; J. H. Niebman, J. B. Booth & Co., A. W. Corut, Louis Muerich, Campbell & Horigan, I. L. Scheriman Co., John Eichenlaub, Net Cabinet & Folder Co., Rasner & Dinger Co., Pennsylvania Door & Sash Co., Weber-Erickson-Bunting Co., M. M. McKinney, J. J. McKinney, H. B. McKinney, S. Keighley, and Charles R. Bryan, all of Pittsburgh, Pa.; Cornelius Donovan, Charles E. Buckley, Wilheim J. Donovan, Jay E. Whiting, Peter W. Valelaose, and A. H. Loeberman, all of New York, N. Y.; Heppenstall Forge & Knife Co. and Tranter Manufacturing Co., both of Pittsburgh, Pa.; John K. Thompson, Fred H. Briggs, Louis des Fuller, J. M. Moorehead, A. J. Nol, Julius Brill, R. M. Stoker, H. Woodmead, and A. W. Lake, all of Kansas City, Mo.; C. P. Powell, Thomas Powell, M. D., L. A. Wilkinson, A. T. Belchin, Mrs. Nora V. Dillavou, Le Roy Henry, M. D., E. E. Sherman, E. L. Horton, M. D., and Lewis Evans, all of Los Angeles, Cal., asking for the speedy passage of House bill 13281, which provides for amending the tariff so as to admit free the products of any American country which will admit our products free; to the Committee on Ways and Means.

Also, petition of J. E. Dilling, R. S. Isenberger & Son, Eichelberger, Earlenburgh & Co., J. P. Rearick, A. N. Johnson, L. C. Hansacker & Son, and W. O. Shubert, all of Martinsburg, Pa., for the passage of a bill imposing a tax on mail-order houses; to the Committee on Ways and Means.

By Mr. CAREW: Petition of Chamber of Commerce of Milwaukee, Wis., favoring Pomerene bill-of-lading bill; to the Committee on Interstate and Foreign Commerce.

By Mr. DALE of New York: Petition of John M. Nichols, of Ogdensburg, N. Y., favoring House bill 42, to establish probation system in Federal courts; to the Committee on the Judiciary.

Also, memorial of Congressional Union for Woman Suffrage, favoring woman-suffrage amendment; to the Committee on the Judiciary.

By Mr. DOOLING: Petition of convention of Mental Hygiene Societies of United States, favoring bill for division of mental hygiene in United States Public Health Service; to the Committee on Interstate and Foreign Commerce.

By Mr. FULLER: Papers to accompany a bill granting a pension to Mary M. Gardner; to the Committee on Invalid Pensions.

By Mr. GOODWIN of Arkansas: Papers to accompany House bill 15922, for relief of Idella White; to the Committee on Invalid Pensions.

By Mr. HELM (by request): Petition of citizens and members of Kentucky Quarterly Conference, Methodist Episcopal Church South, asking for enactment of temperance legislation; to the Committee on the Judiciary.

By Mr. HOOD: Petitions of sundry citizens of North Carolina, favoring amending the rural-credit bill; to the Committee on Banking and Currency.

By Mr. IGOE: Memorial of St. Louis (Mo.) Medical Society, against Senate joint resolution 120, relative to members of Public Health Service; to the Committee on Interstate and Foreign Commerce.

By Mr. JOHNSON of Washington: Petition of 47 citizens of Clarke County, Wash., against bills to amend the postal laws; to the Committee on the Post Office and Post Roads.

By Mr. KENNEDY of Rhode Island: Memorial of the Newport Humane Club, indorsing House resolution 137; to the Committee on Rules.

Also, memorial of Providence (R. I.) Chamber of Commerce, in favor of House bill 650; to the Committee on Interstate and Foreign Commerce.

Also, memorial of Providence (R. I.) Chamber of Commerce, in favor of Senate resolution 173; to the Committee on Naval Affairs.

By Mr. KETTNER: Petition of Mrs. W. L. Keeney, corresponding secretary La Mesa Woman's Club, San Diego, and Fred Moore, secretary Cooks, Waiters, and Waitresses Union, Local 402, San Diego, Cal., favoring House resolution 137, investigation of dairies; to the Committee on Rules.

Also, petition of E. L. Burroughs and 14 others of Niland, Cal., and L. R. Shutt, of Thermal, Cal., favoring House bill 9162, providing for 8-hour working day for railroad agents and telegraphers; to the Committee on Labor.

Also, petition of Trinity Lutheran Church, Otto C. A. Pautz, secretary, Santa Ana, Cal., and E. R. Wilson, Los Angeles, Cal., and one other, opposing war with Germany; to the Committee on Foreign Affairs.

Also, petition of Charles H. Stone, Ramona, Cal., and two others, protesting against increase in Army and Navy; to the Committee on Military Affairs.

Also, petition of E. S. Crumley, National City, Cal., protesting against House bills 6468, 491, and 8348; to the Committee on the Post Office and Post Roads.

By Mr. LOUD: Petition of Clara A. Osburn and members of the Union Literary Club, of Big Rapids, Mich., indorsing House resolution 137, referring to the manufacture and distribution of dairy products; to the Committee on Rules.

By Mr. MANN: Petition of citizens of Chicago, Ill., favoring passage of House bill 5792; to the Committee on Agriculture.

By Mr. NORTH: Petition of 19 voting citizens of Templeton, Pa., and of Methodist Episcopal Sunday School of Templeton, Pa., praying for nation-wide prohibition; to the Committee on the Judiciary.

By Mr. O'SHAUNESSY: Memorial of Rhode Island Branch of the Woman's Auxiliary to the Board of Missions of the Episcopal Church, against certain bills relative to some Indian tribes; to the Committee on Indian Affairs.

Also, memorial of Providence (R. I.) section, Council of Jewish Women, favoring investigation of dairy products; to the Committee on Agriculture.

By Mr. ROWLAND: Petitions of sundry citizens of the twenty-first district of Pennsylvania, favoring House bills 270 and 712; to the Committee on Ways and Means.

By Mr. STEPHENS of Texas: Memorial of Brotherhood of Texas Locomotive Firemen and Engineers, favoring the Burnett immigration bill; to the Committee on Immigration and Naturalization.

By Mr. STINESS: Papers to accompany House bill 15945, granting an increase of pension to William R. Smith; to the Committee on Invalid Pensions.

Also, petition of Providence (R. I.) Chamber of Commerce, favoring House bill 651, prescribing certain duties for carriers, subject to the act to regulate commerce; to the Committee on Interstate and Foreign Commerce.

Also, petition of Providence (R. I.) Chamber of Commerce, favoring Senate resolution 173, providing plans for the improvement of certain harbors for coast defense; to the Committee on Rivers and Harbors.

Also, petition of executive committee of the Rhode Island branch of the Woman's Auxiliary to the Board of Missions, opposing certain proposed Indian legislation; to the Committee on Indian Affairs.

Also, petititon of Newport (R. I.) Humane Club, favoring the appointment of Federal and State inspectors of food-producing animals and their products; to the Committee on Rules.

Also, petition of 21 voters of Providence, R. I., for national constitutional prohibition amendment; to the Committee on the Judiciary.

Also, petition of William H. Weitz, of Providence, R. I., favoring the passage of House bill 8828; to the Committee on Appropriations.

By Mr. SULLOWAY: Petition of Merrimack Lodge, International Order of Good Templars, of Manchester, N. H., favoring national prohibition; to the Committee on the Judiciary.

By Mr. TEMPLE: Twenty-nine petitions from members of churches and other organizations in Pennsylvania, favoring an antipolygamy amendment to the Constitution of the United States; to the Committee on the Judiciary.

SENATE.

THURSDAY, *May 25, 1916.*

(Legislative day of Thursday, May 18, 1916.)

The Senate reassembled at 12 o'clock meridian, on the expiration of the recess.

RIVER AND HARBOR APPROPRIATIONS.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

Mr. KENYON. Mr. President, I offer the following amendment, and on the amendment I ask for the yeas and nays, which will answer the purpose of a quorum call.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 23, at the end of line 25, in the item for Brazos River, Tex., insert the following proviso:

Provided, That no part of the said appropriation of $200,000 shall be expended until the report of the Army engineers upon the reexamination of said project, as provided for by the last Congress, shall have been reported to Congress; and if said report shall be unfavorable to the further progress of said project, then no part of said $200,000 shall be expended thereon.

Mr. KENYON. On that I ask for the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. TILLMAN (when his name was called). I have a pair with the Senator from West Virginia [Mr. GOFF]. In his absence I withhold my vote. I make this announcement for the day.

The roll call was concluded.

Mr. WILLIAMS. Feeling at liberty to vote on this item, regardless of my pair, I vote "nay."

Mr. CATRON. I am paired with the Senator from Oklahoma [Mr. OWEN]. I transfer my pair to the Senator from Vermont [Mr. PAGE] and vote "yea."

Mr. SMITH of Georgia (after having voted in the negative). I have a pair with the senior Senator from Massachusetts [Mr. LODGE]. I transfer that pair to the junior Senator from Illinois [Mr. LEWIS] and let my vote stand.

Mr. STONE (after having voted in the negative). I have a pair with the Senator from Wyoming [Mr. CLARK]. I transfer that pair to the Senator from Nevada [Mr. PITTMAN] and let my vote stand.

Mr. THOMPSON. I am paired with the senior Senator from Illinois [Mr. SHERMAN]. I understand that he would vote the same way that I would on this question. I therefore feel at liberty to vote. I vote "yea."

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Maine [Mr. BURLEIGH] with the Senator from Arkansas [Mr. ROBINSON];

The Senator from North Dakota [Mr. GRONNA] with the Senator from Maine [Mr. JOHNSON];

The Senator from New York [Mr. WADSWORTH] with the Senator from New Hampshire [Mr. HOLLIS];

The Senator from Massachusetts [Mr. WEEKS] with the Senator from Kentucky [Mr. JAMES];

The Senator from North Dakota [Mr. MCCUMBER] with the Senator from Colorado [Mr. THOMAS];

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS];

The Senator from Delaware [Mr. DU PONT] with the Senator from Kentucky [Mr. BECKHAM]; and

The Senator from Rhode Island [Mr. LIPPITT] with the Senator from Montana [Mr. WALSH].

The result was announced—yeas 31, nays 28, as follows:

YEAS—31.

Ashurst	Dillingham	Kern	Sterling
Brady	Fall	La Follette	Sutherland
Brandegee	Gallinger	Lane	Taggart
Catron	Harding	Martine, N. J.	Thompson
Clapp	Hitchcock	Norris	Townsend
Colt	Johnson, S. Dak.	Oliver	Warren
Cummins	Jones	Pomerene	Works
Curtis	Kenyon	Smoot	

NAYS—28.

Bankhead	Lea, Tenn.	Saulsbury	Smith, Md.
Chamberlain	Martin, Va.	Shafroth	Smith, Mich.
Chilton	Nelson	Sheppard	Stone
Clarke, Ark.	Overman	Shields	Swanson
Culberson	Poindexter	Simmons	Underwood
Fletcher	Ransdell	Smith, Ariz.	Vardaman
Hardwick	Reed	Smith, Ga.	Williams

NOT VOTING—37.

Beckham	Hollis	McLean	Sherman
Borah	Hughes	Myers	Smith, S. C.
Broussard	Husting	Newlands	Thomas
Bryan	James	O'Gorman	Tillman
Burleigh	Johnson, Me.	Owen	Wadsworth
Clark, Wyo.	Lee, Md.	Page	Walsh
du Pont	Lewis	Penrose	Weeks
Goff	Lippitt	Phelan	
Gore	Lodge	Pittman	
Gronna	McCumber	Robinson	

So Mr. KENYON's amendment was agreed to.

Mr. MARTINE of New Jersey subsequently said: Mr. President, on the vote upon the amendment of the Senator from Iowa [Mr. KENYON] I voted "nay." It was my desire to vote "yea." The result has been announced, but I ask unanimous consent that I may change my vote from "nay" to "yea."

The VICE PRESIDENT. Is there objection? The Chair hears none.

Mr. CLARKE of Arkansas. Mr. President, a parliamentary inquiry. What becomes of the amendment offered by the Senator from Iowa in view of the fact that the vote of the Senator from New Jersey has been changed?

The VICE PRESIDENT. It did not change the result. It increased the majority.

Mr. KENYON. It doubled it.

The VICE PRESIDENT. It doubled it.

Mr. MARTINE of New Jersey. I was only anxious to square myself on the matter.

Mr. REED. I offer the following amendment.

The SECRETARY. At the top of page 37, at the end of line 2, in the item for the Gasconade River, Mo., insert the following proviso:

Provided, That the dam near Heckmans Mill, at Pryors Bend, and any other obstruction to the flow of water at or near that point, shall be immediately removed, and so much of this appropriation as necessary may be expended for that purpose.

Mr. REED. Mr. President, that does not increase the appropriation at all, but it makes it available for a purpose for which it might not be available except for the amendment. The appropriation is not increased, and the work is at the same place. I have consulted with my colleague, and both of us hope that this amendment will be accepted.

Mr. TOWNSEND. Let the amendment be read again. I have not yet understood what the amendment is.

The Secretary again read the amendment.

The VICE PRESIDENT. The question is on agreeing to the amendment offered by the Senator from Missouri [Mr. REED].

The amendment was agreed to.

Mr. CLARKE of Arkansas. I ask unanimous consent that in the further consideration of the bill debate shall be limited to 10 minutes and shall be confined to real amendments that are offered in good faith and not mere technical amendments sometimes offered for the purpose of prolonging the period.

Mr. SMOOT. I wish to say to the Senator that I believe the Senator from Colorado [Mr. THOMAS] wishes to speak on the question of the recommittal of the bill.

Mr. CLARKE of Arkansas. We will make an exception in his favor.

Mr. SMOOT. Making an exception on the question of the motion to recommit, I have no objection to at all.

Mr. CLARKE of Arkansas. Very well.

Mr. POMERENE. The request of the Senator from Arkansas, I understand, is that debate be limited to 10 minutes. Does the Senator mean that debate upon each question shall be limited to 10 minutes or that each speaker may have 10 minutes?

Mr. CLARKE of Arkansas. No; that each speaker may have 10 minutes on each amendment. Let the Chair submit the request which I made to the Senate.

The VICE PRESIDENT. Is there objection to the request that from this time forward——

Mr. BRANDEGEE. Mr. President, I am in hearty sympathy with the Senator from Arkansas as to limiting debate as far as possible, but I have an amendment to offer which is an important one to my State. I think I could state the argument in favor of it in 10 minutes, but if other Senators should take my time, then I might have to answer them.

Mr. CLARKE of Arkansas. Each Senator is entitled to 10 minutes.

Mr. BRANDEGEE. If I use up my 10 minutes, and other Senators talked on the other side——

Mr. CLARKE of Arkansas. I suppose that in an exceptional case another unanimous-consent agreement might be granted.

Mr. BRANDEGEE. I will not object. I will throw myself upon the indulgence of the Senate in that case.

The VICE PRESIDENT. The proposed unanimous-consent agreement is that from this time forward speeches upon amendments shall be limited to 10 minutes save in the case of the motion to recommit.

Mr. SMOOT. No; just confine it to a limit of 10 minutes upon speeches on amendments that may be offered.

Mr. CLARKE of Arkansas. That is all right.

Mr. SIMMONS. Mr. President, there is one item in the bill which will be objected to, and I am afraid I will not be able to make the statement I desire to make in 10 minutes. I ask the Senator——

Mr. CLARKE of Arkansas. Then I withdraw the request. If the members of the committee do not sustain the chairman in his effort to facilitate the passage of the bill I will withdraw the request.

Mr. SIMMONS. If the chairman of the committee insists upon the request, I shall not oppose it. I was simply making a suggestion to him. Of course, if he wishes to withdraw the request——

Mr. CLARKE of Arkansas. I withdraw the request.

Mr. BRANDEGEE. Is it in order now to offer an amendment?

The VICE PRESIDENT. The bill is as in Committee of the Whole and open to amendment.

Mr. KENYON. Under the unanimous-consent order amendments are first to be offered to the text of the bill.

Mr. BRANDEGEE. I know that, but I saw that the Senator from Missouri [Mr. REED] offered an amendment, and I supposed the bill was open to amendment.

Mr. KENYON. We have not passed on amendments to the text as yet.

Mr. BRANDEGEE. I am perfectly willing to wait. I asked if it was in order and I was informed that it was. Are there yet amendments to the text of the bill to be offered?

Mr. KENYON. There are.

Mr. BRANDEGEE. I withdraw it, then, for the present.

Mr. SHAFROTH. I desire to offer an amendment.

The VICE PRESIDENT. That is not yet in order.

Mr. SHAFROTH. Very well, then, I will withhold it. The clerks can just keep it at the desk.

Mr. KENYON. Mr. President, I move to strike out, on page 24, the language beginning with the word "for," on line 11, the remainder of line 11, and all of lines 12, 13, 14, 15, and 16, down to and including the word "improvement."

The VICE PRESIDENT. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. On page 24, beginning in line 11, it is proposed to strike out the following:

For improvement by the construction of Locks and Dams Nos. 3 and 5, $250,000: *Provided*, That no part of the latter amount shall be expended until the city of Dallas or other local interests shall have contributed the sum of $50,000 toward the improvement.

Mr. KENYON. Mr. President, that is a motion to strike out the provision for the appropriation of $250,000 for locks and dams. I want to place in the RECORD, for reflection by those who in the future may want to study the Trinity River, two or three observations of the Army engineers. I will say, before passing to that, that this is a project for 37 locks and dams, at a cost running into many millions of dollars—I think it is safe to say $10,000,000—and that we have already spent over $2,000,000 on this stream. On page 938 of their report the Army engineers say:

The river above tidal action is a narrow stream with a low-water depth insufficient for even light-draft navigation.

And, on page 939, they say:

From the manner in which appropriations have been made for the improvement of the Trinity River, it has been held that the entire project outlined in House Document No. 409, Fifty-sixth Congress, first session, has never been adopted in its entirety by Congress, but that only such locks and dams have been authorized as have been specifically appropriated for. The report in question contemplated the construction of 37 locks and dams with incidental dredging and other open-channel work, at an estimated cost for a 6-foot navigation of $4,650,000 and $280,000 annually for maintenance after completion.

Five of these locks have been completed, but others have been specifically appropriated for, and two others have been authorized.

Mr. CLAPP. Will the Senator pardon an inquiry?

Mr. KENYON. The Senator from Minnesota objected a little while ago that we were not getting along fast enough.

Mr. CLAPP. But we are now dealing with the bill. We were then dealing with a question of unanimous consent, which usually takes much longer to decide.

What I want to ask the Senator is, what relation this proposed appropriation bears to the utility, present or prospective, of the work that has been accomplished by the money already expended?

Mr. KENYON. I will explain that from the engineers' report as I go along. I will quote from that.

Mr. LODGE. Let me ask the Senator from Iowa, before he begins on that, whether this is the river on which some years ago it was recommended that there should be artesian wells dug in order to supply a flow of water?

Mr. KENYON. I understand this is the river on which Col. Riché recommended the sinking of artesian wells in order to get water; and from the dryness of this stream, I think the Senator will see that perhaps that would be a wise thing to do. I hope, however, that my argument will not be interrupted hereafter by any such interrogations.

The engineers say:

The amount expended on this project to the end of the fiscal year was $2,062,262.42, of which $1,823,595.06 was for original work and $238,667.36 for maintenance.

The engineers further say:

Effect of improvement: Owing to the fact that the river is not yet navigable to Dallas, the only place at which it can come into active competition with the railroads, no effect on freight rates has been produced.

The commercial statistics of this wonderful stream are as follows:

Commercial statistics: The commerce transported during the calendar year 1914 consisted mainly of logs in rafts and of merchantable timber, with a small amount of cotton and other farm products.

Amounting in 1914 to the stupendous sum of 12,610 tons on an investment of over $2,000,000! The Army engineers further observe:

All of the above tonnage, except the rafting of logs, originated at or below Liberty, Tex. In addition, during the calendar year 1914, 20 bales of cotton and 300 passengers were carried by the light-draft gasoline boat *Commodore Duncan* between Dallas and Lock and Dam No. 2.

As to one of the locks, the engineers' report, on page 944, says:

The only lockages made during the year were 4 at Lock and Dam No. 1. The only navigation in this section was that by the small gasoline tug *Commodore Duncan*, which made a few trips, carrying 300 passengers and 20 bales of cotton, between Dallas and Locks and Dams Nos. 1 and 2.

Mr. President, that is a fine proposition upon which to be voting away money out of the Public Treasury, especially in view of the fact that a survey is now being made on this river. It is true, it is an instrumental survey, as the Senator from Texas [Mr. SHEPPARD] has observed, which is for the purpose of finding out the exact number of locks and dams that are necessary to carry the mighty commerce of this river.

In volume 2 of the engineers' report, on page 2684, is an analysis of this commerce, which shows that of the 12,610 tons of commerce, 4,804 were saw logs by raft, 5,700 were lumber, and 1,000 tons were cordwood. But progress may be observed, as the engineers state, on page 2685 of volume 2, and they then say:

A maneuver boat was constructed for the dam, paving was placed behind the land wall of the lock, a portion of an old cofferdam was removed, a boundary fence was constructed on the lock side of the river, the reservation was graded and cleared, and the lock tender's house ceiled. At Lock and Dam No. 4 a barn and chicken house were built and a well dug.

These are the kind of serious reports that we get on a proposition on which we have spent over $2,000,000—that there is no commerce—and on which we are in the future to spend a great deal more. Mr. President, it seems to me, in view of the suggestion we have heard——

Mr. NORRIS. Does the Senator say that part of the improvement was the digging of a well?

Mr. KENYON. It was the digging of a well, but not an artesian well.

Mr. NORRIS. How deep was the well dug?

Mr. KENYON. The report of the engineers does not state.

Mr. NORRIS. What was the object of digging the well?

Mr. KENYON. I am not prepared to state. I suppose it was for the lock tender.

Mr. SUTHERLAND. For what was the well dug—to furnish water for the project or for the chickens?

Mr. SMITH of Michigan. Or was it in order to reach a subterranean stream?

Mr. KENYON. I regret that these facetious interruptions should occur in such a very solemn matter as this. This river, it was stated at the last election in Texas between the "wets" and the "drys," was the only thing that went dry in Texas. [Laughter.]

Mr. NORRIS. Was the well dug in the stream proper or at some place adjacent thereto?

Mr. KENYON. I shall have to refer the Senator from Nebraska to the engineer's report. I really do not want to dwell on that any longer than necessary. I merely want to suggest at this point that the Trinity River seems almost like a description that Zimmern has given in The Greek Commonwealth as to some of the rivers of Greece. He states:

If rain falls in this torrential manner, its effect must naturally be marked in the behavior of springs and rivers. Indeed, it is due to this that Greece possesses practically no rivers, in our sense of the word, at all. As the Admiralty Pilot remarks, with ill-concealed irony, "The rivers that empty into the Ægean Sea are more deserving of notice from their classical associations than from their commercial importance."

That may be true likewise of the Trinity River.

In winter Greece has torrents; in summer, dry stony beds, with perhaps a trickle in the middle; but rivers such as we know, which flow, in the Greek phrase, "equal themselves with themselves," all the year round, are unknown. Some of the larger streams are deep enough to bathe in during the summer, but the majority could be mistaken by the unwary traveler for an unusually rough road or sometimes, when there are oleanders in blossom there, for a very neglected garden. One of the lawsuits in Demosthenes turns upon the question whether a certain piece of ground was a watercourse, a public highway, or a private garden.

That is equaled only by some streams that we have been hearing about in this debate.

Mr. President, I have not been facetious about this matter; I have tried to be very serious. It seems a good place to stop here and save a little money by letting this matter wait at least until the surveys are completed by the engineers. I do not care to take any more time on it. I will simply ask for a vote.

Mr. LANE. Mr. President, I should like to ask the Senator, if he will allow me, what is the total cost contemplated, if this project is completed?

Mr. KENYON. I am not prepared to say that an estimate has been made, although, likely, there has been. It is a project that never has been adopted in its entirety by Congress. We simply appropriate year by year for different locks and dams, and we have appropriated now over $2,000,000.

Mr. LANE. Have the engineers made an estimate of the total cost?

Mr. KENYON. I think they have. Their estimate is $4,650,000.

Mr. LANE. Has anybody estimated as to what amount of commerce or tonnage this river would open up if the improvements were completed?

Mr. KENYON. The Senator will find that as to all of these projects there is just about to be discovered some great mine, or large factories are about to be started, so that the commerce is to be perfectly tremendous.

Mr. LANE. Mr. President, this is the joke item in the bill; it sort of hits the Senate on its funny bone when it is mentioned, and yet at the same time there may be some reason in it. If, by completing the project, a large commerce could be opened up, it might prove to be a justifiable expenditure. I have not heard that side of the question argued. I know that Texas is a very rich country.

Out in Oregon there is a stream, for opening the mouth of which to the ocean Congress has appropriated money so that vessels may come in and go out of it. Vessels do come in and go out; yet between the upper and lower harbors there is a sand bar, forming an obstruction which should be removed, and until it is removed no commerce can be developed above that obstruction. There are millions of feet of the finest timber we have on the Pacific coast in that neighborhood which can not get to the sea on account of it.

It is not a matter to laugh about; it is a serious question to the people who live there, who are denied access to the ocean by an obstruction which, if removed, would allow them to market their products. I am wondering if back of this item, after all, there may not be some merit. It is made fun of. I have spoken of it to the people, and yet we have in Oregon one stream that is in pretty much the same condition, and we can not get the obstruction removed, for the reason that no commerce has ever gone below it. Neither steamers nor sailboats can get over the obstruction. They could climb a tree as quickly. It is unjust to those people in Oregon that that condition should be allowed to continue; and I was wondering

if there were not, aside from the funny part of this item and the facetious aspect of it, back of it and behind it a kernel of truth and justice. If there is, we ought to take cognizance of it.

That is the reason why I asked the questions of the Senator from Iowa. It may be that ultimately this improvement would bring about a saving of money, if a commerce can be opened by an expenditure not in excess of a proper amount. If that is the case, the subject ought to be given some serious consideration, and I bespeak that for it.

Mr. SHEPPARD obtained the floor.

Mr. JONES. Mr. President, if the Senator from Texas will allow me, I desire to occupy a few moments and to make a few suggestions which the Senator might wish to answer. I will therefore, with the Senator's permission, say a word or two now.

Mr. SHEPPARD. Very well.

Mr. JONES. The pending amendment provides:

For improvement by the construction of Locks and Dams Nos. 3 and 5, $250,000.

That looks as if the locks would be completed with this appropriation, but they will not be. We are not appropriating more than about half enough to complete these locks. If we are going to complete them, we ought to appropriate the money that is necessary to do the work; otherwise, we are not only going to make the cost greater but we may waste all of the appropriation.

This is what the engineers of the War Department say about what we ought to do, if we do anything. I quote from page 941 of their report:

If the project is to be continued, Locks and Dams Nos. 3 and 5 are the logical ones to be next undertaken—

That is what we are undertaking—

They are estimated to cost $300,000 each. It is very desirable that, when authorized, provision should be made for their entire completion.

Mr. CLAPP. Mr. President, will the Senator pardon a question?

Mr. JONES. Certainly.

Mr. CLAPP. It strikes me that we ought to have some light on this subject if it is obtainable, and so I should like to know what relation the proposed expenditure bears to the question whether there is salvage left in the expenditures we have already made? I do not know whether the engineers report shows that or whether the Senator is in a position to state it; but it does seem to me that we ought to take into account the money we have put into this project and the question of whether it will be wasted if no more is expended, and then the question of whether it will be a profitable enterprise to go on and put enough more in to make that which we have put in of some value.

Mr. JONES. Mr. President, as bearing on that, I want to read a little bit more from the report. On page 939 the engineers say that the original project as reported upon contemplated the construction of 37 locks and dams at a cost which is estimated at $4,650,000 and $280,000 annually for maintenance after completion. They make the statement that Congress has never formally adopted the full project, but has simply authorized from time to time the construction of locks. Referring to the work which has already been done, they say this:

In the original report it was planned that five locks and dams should be located in section 1, but as a result of further investigation it has been found necessary to increase the number to six, with an auxiliary dam at Parsons Slough, about 22 miles below Dallas.

I call the attention of the Senate now to this:

During the course of construction it has also been found that the original estimate of cost was inadequate, and that on account of the manner in which the appropriations have been made, the inaccessibility of certain of the localities at which work has been directed by Congress, and the general increase in prices, it is now known that the ultimate cost of the entire project will be largely increased.

In other words, if we continue this project to completion, as recommended in the early report, it will cost largely more than $4,650,000; but they say——

Mr. CLAPP. As I understand, we have already put about $2,000,000 into this project. That is what I understood from the Senator from Iowa.

Mr. JONES. That is correct; we have put in up to June 30, 1915, on new work $1,830,595.06, and for maintenance $238,067.36. Here is a comparative statement of the commerce——

Mr. CLAPP. I do not think the commerce is a fair argument.

Mr. JONES. I thought the Senator wanted some information as to that feature.

Mr. CLAPP. No; what I want to know is—and that is where these reports seem to me to be so often defective—what relation the proposed continued expenditure bears to that which we have already made, and whether what we have made will be lost if we do not go on, and whether, in view of the entire cost, it is wiser to lose what we have put in, or to try and save that by spending more. These reports, it seems to me—and I am not criticizing the reports—do not throw much light upon that inquiry.

Mr. JONES. I will say to the Senator that there is not very much information here along that line.

Mr. CLAPP. No.

Mr. JONES. But I think this is significant, and I think this ought to be taken into account in determining whether we are going to go on with this work now or wait just a little while. We have provided for another survey of this stretch of the river, so as to get possibly the very information that the Senator is anxious to have; and here is what the engineers say in the report:

The report, in accordance with which the work authorized is being done, was based upon a survey authorized in the river and harbor act of March 3, 1899, for which purpose only $7,000 was appropriated. In view of the fact that it was necessary to carry this survey over more than 500 miles of river, it is apparent that the work could not be done with sufficient thoroughness to enable an accurate estimate to be made. To remedy this defect the river and harbor act approved July 25, 1912, authorized the making of an accurate instrumental survey of Trinity River, following the recommendation of the Chief of Engineers in his annual report for the fiscal year ending June 30, 1911. This survey is nearly completed, but no estimate of cost of the completion of the entire plan of improvement has yet been made.

It seems to me that we could very wisely withhold this appropriation for the building of these new locks until that report comes in. It will not only give us a detailed and more accurate estimate, a more reliable estimate of what the cost will be, but it will very likely furnish information meeting the suggestions to which the Senator has just referred.

Mr. CLAPP. Yes, Mr. President; I think myself that while it throws no light presently upon the inquiry, it may in the end answer the inquiry. It strikes me that there is a great deal of force in the Senator's suggestion that that is the true way to get the answer to the inquiry—first to get this additional survey.

Mr. JONES. It seems that way to me, and that is the only reason why I am led to vote against this amendment now. Just as in the case of the item yesterday, I may be in favor of the proposition in the end. I may think it is a good thing. There may be facts disclosed, such as the Senator from Oregon referred to, showing that this project, even if it does cost four, five, or six million dollars, is a good one and a wise one from a governmental standpoint. But here we are confronted with this situation: We have authorized a survey. There is almost ready a report that will give us what ought to be reliable information, not only with reference to the cost of it but with reference to the benefits that will come from it; and, furthermore, the appropriation we make in this bill will not complete what we propose to do. It only provides for one-half of what these two locks and dams will cost. If we are going to provide for Locks 3 and 5, we ought to provide the entire amount necessary to construct them; otherwise, they are going to cost more than they ought to cost.

The engineers do say in their report that if we only provide for one year's work, then we should provide $150,000 for each lock and dam that is appropriated for. In this bill we provide that no part of this $250,000 shall be expended until the city of Dallas shall have contributed $50,000. That makes $300,000. It makes $150,000 for each of these locks. They will cost $600,000; and the engineers say that they consider it very desirable that the whole amount necessary to complete these locks shall be appropriated if we decide to build them at all.

It seems to me that for those two reasons it would be the wise thing to leave this item out of this bill at this time. As I said, I do not take my position because of opposition to the project generally. I want to consider the project when the estimates come in. All these suggestions about the dryness of the river, and all that sort of thing, have no weight with me in the consideration of this matter; but I do think that in the interest of economy it would be wise action by Congress now to leave this item out of the bill.

Mr. LANE. Mr. President, I think the amendment offered by the Senator should go further. It should amend the item so as to call for a showing to the Senate and to the Congress as to the economic conditions of the surrounding country, and whether or not the expenditure will be ultimately beneficial and worth the cost. That should accompany it. They come in here, with the most meager information, with an appropriation to remedy a condition which proves nothing to us, and gives us no facts—just a mere appropriation.

It might be that a full showing of conditions surrounding the project might make it a justifiable and a meritorious appropriation; but we do not have the information, and it becomes a joke, and maybe it is a joke.

It may be that facts can be shown and made of record which will justify it. No commerce can develop upon a stream that is obstructed, or has obstructions in it over which navigation can

not pass either up or down the river. I know that. Everybody knows it. Everybody that has ever cleaned out a ditch knows that you must remove the obstruction, or you can not get drainage or irrigate your land. It applies to rivers in the same way, and there will be and can be no commerce until the obstructions are removed, although there may be none afterwards; but it ought to be and should be shown to the Senate that the chances or the facts are that the commerce is there after the expenditure of the people's money has been made for opening up the channel.

I think that is due the Senate, and with me it is a matter of experience. I know streams which have no traffic and have plenty of water both below and above an obstruction, and there never will be any commerce until that obstruction is removed. There can not be. It is a physical impossibility; and because there is no commerce the stream is condemned, and unjustly condemned. That is not a fair way of reasoning upon it. But if the traffic is behind the obstruction, and the commerce is there awaiting an outlet, then it is justifiable to make a reasonable expenditure, and it is not a laughing matter. It may be a most serious matter for the people who live above the obstruction in the stream.

As I say, I have laughed about this item many times, too, and the joke about their having to dig artesian wells; but we have one such stream in my own State that I know of personally, and that is no laughing matter, when the truth is known. I do not think it is fair, and I do not think it should be urged that because no commerce has passed up and down this stream on account of this obstruction, none ever will.

Mr. SHEPPARD. Mr. President, the preliminary report of the engineer, on the basis of which the first appropriation for the Trinity River was included in a rivers and harbors act, concluded by saying that the engineer considered 4-foot navigation of the Trinity River from Dallas to the mouth to be not only advisable but urgently necessary, and that it would accomplish much good for many people. It was shown in that report that there were approximately 10,000,000 acres of timber along the Trinity, comprising oak, ash, cottonwood, cedar, elm, bois d'arc, walnut, pecan, hickory, pine, and cypress, whose value was estimated at $50,000,000 whenever river transportation should be established. It was also shown that there were extensive deposits of coal, iron, and clays along the river or within easy reach, and also that there were extensive deposits of building material, such as stone, gravel, and so forth. A statement from the Weather Bureau was quoted to the effect that the territory tributary to the Trinity River had a rainfall about the same as Massachusetts, New York, New Jersey, Connecticut, Missouri, Wisconsin, Michigan, and Ohio. It was also shown by that report that the 15 counties bordering on the river on each side—namely, Dallas, Kaufman, Ellis, Henderson, Navarro, Anderson, Freestone, Leon, Houston, Madison, Trinity, Walker, San Jacinto, Polk, and Liberty—had an area of 8,813,440 acres, of which over 1,200,000 were already in cultivation in 1900, and a population of about half a million. It was also shown that at least 75 per cent of these lands was capable of a high state of cultivation, and could produce a million and a half bales of cotton, 750,000 tons of cotton seed, 70,000,000 bushels of corn, 10,000,000 bushels of oats, 3,000,000 bushels of wheat, and other products in proportion.

The commercial importance of Dallas, the city at the head of navigation on the Trinity, was demonstrated by figures of a most convincing nature. The population of Dallas at that time was 65,000, and its volume of wholesale trade was about $30,000,000 in value. To-day the estimated population of Dallas is over 130,000, and its volume of trade $211,000,000 in value. A million and a half bales of spot cotton are now handled in the Dallas market. Dallas has 9 railways and 5 interurban railways radiating in 18 different directions, with 85 passenger trains and 10 gas-electric motors in and out daily, and with 156 daily interurban trains carrying 4,000,000 passengers annually.

On the basis of that report, Congress made the initial appropriation for the Trinity River. The bill in which that appropriation was embodied failed in the Senate on account of the speech of the Senator from Montana, Mr. Carter, which will be recalled by many Senators here to-day, I am sure.

In the next river and harbor bill an appropriation for the Trinity was again made, and when the matter came up for discussion in the House Mr. Burton, of Ohio, the chairman of the committee, delivered the following remarks in reference to the Trinity:

> We have not included in the bill any new projects for locks and dams except the Trinity River, in the State of Texas, where we have appropriated or authorized $750,000, part for general improvements and part for the construction of locks and dams. I am frank to say to the committee that on first examining this project I did not think favorably of it, but I gave it a good deal of consideration. The committee called before them the engineers having the improvement in charge, and it seemed to us that an expenditure of this amount was justified. The river is easily capable of improvement. It has stable banks, and the construction of locks and dams is a comparatively easy problem. There is a great amount of traffic in prospect both from the source to the mouth and from the mouth toward the source. In this particular it differs from many other rivers, where the bulk of the traffic must necessarily be one way. Great quantities of cotton and grain will be carried toward the mouth, and from the mouth toward the source timber and building material for the large expanse of prairie tributary to Dallas toward the north.

In that bill, Mr. President, provision was made for another examination of the first section of the Trinity River—the section near Dallas—with a view to determining specifically whether there was a sufficient water supply. The engineer who made the preliminary examination authorized in 1899 had made some reference to the advisability or possibility of using artesian wells along the banks of the first section as an aid to navigation. It was partly on account of this statement that in the bill of 1901 provision was made for another examination by a special board of engineers to determine this particular question of a sufficient water supply, and the report of the special board was favorable to the continuance of improvement on the first section. The board held that navigation of from six to seven months' duration could be obtained on section 1 with six locks and dams, at an expense of $918,000, and that in some years there might be eight months' navigation.

I shall state that it was developed at the hearings in the House in connection with the present measure that another investigation was recently made of this section, that observations were taken of weather conditions at stated periods; and that the result of the investigation was that there were sufficient rainfall and sufficient water supply in section 1. There has never been any question as to sufficient rainfall or sufficient water supply below section 1, for the reason that an important tributary of the Trinity joins the river about 60 miles below Dallas—that is, below section 1.

The people of Dallas themselves have expended over a million dollars, directly and indirectly, in connection with this project while it has been in progress. I want to quote here from a letter sent me by the secretary of the Dallas Chamber of Commerce on June 25, 1914:

> DEAR SIR: We are sending you to-day by special delivery a separate package containing data with reference to the Trinity River gauge readings. Take those with the explanations and the first 18 pages of Duncan & Cowart's argument, and it will enable you to substantiate all that is stated therein.
>
> We desire, however, if necessary, to have you impress upon the Senate and the conference committee that the people of Dallas, in their anxiety to improve the river so that they may have navigation, have not hesitated to open their pocketbooks and aid in the great enterprise. By public subscription their first paid $66,000 to the Government, which was expended by direction of the Government's engineers on Lock and Dam No. 2 and on Parsons Slough. They have also paid for the sites for nine locks and dams more than $20,000—in round numbers about $90,000. The people of Dallas and Dallas County have spent by bond issues more than $800,000 for the purpose of building two high bridges or viaducts and constructing four steel turn bridges, so that boats can readily pass up and down the river without obstruction or delay. They have secured about 30 acres of land on the river front in the city of Dallas for wharves, etc., the value of which is some $60,000 or $70,000. They have also voted an indebtedness of some $700,000 for diverting the sewage from the river, so that sewage disposal will not interfere with any kind of river navigation. Work is already commenced on the same and will be completed within the next two years. The people have also subscribed a fund of $50,000 for the purchase of boats and barges; one boat has already been bought and another will be secured as soon as possible. So it will be seen that the people of Dallas, in their eagerness and enthusiasm to secure the navigation of the Trinity, have already spent and are spending $1,800,000, which is more than the appropriations that have been made by Congress for the improvement of the river. We believe the amount appropriated by Congress to date is about $1,700,000.
>
> That there will be a great commerce on the river can not for a moment be denied. The wholesale trade of Dallas has increased from $40,550,000 in 1900 to $211,458,000 in 1913. The number of loaded cars of freight handled in Dallas are more than 220,000 annually, or more than 600 every day.

Mr. President, it will be observed that the appropriation carried in the present bill is conditioned on a contribution by the people of Dallas of $50,000. Let me say further that the people of Dallas have also made a proposition to Congress that they will contribute $3,000,000 if the Government will agree to complete the project. Certainly, gentlemen, a project in which the people near the river have such confidence is entitled to the serious consideration of Congress.

Let me say further that the locks and dams provided for in this bill are Nos. 3 and 5 on the first section. Locks and Dams Nos. 1, 2, 4, 6, and 7 have already been constructed. The construction of these two locks and dams is necessary to the completion of the first section. Without them the six locks and dams already in existence there are absolutely useless. It would indeed be a great waste of money to cause the project to stop here when the first section has been so nearly completed. The

first section is the most difficult section from the standpoint of navigation.

Mr. GALLINGER. Will the Senator permit me?

Mr. SHEPPARD. Certainly.

Mr. GALLINGER. At some previous time when this matter was under discussion my attention was called to the fact that the locks had not been constructed consecutively, that No. 1 and then perhaps No. 3 had been constructed. I think the Senator himself just stated that they are not consecutively constructed.

Mr. SHEPPARD. Almost consecutively. I have just said to the Senate that of the nine locks and dams on the river seven have been constructed on the stretch between Dallas and a point on the river some 50 or 60 miles below Dallas. The locks and dams provided for in this bill are needed to complete that particular section. Locks 1, 2, 4, 6, and 7 have been practically finished. Locks 3 and 5 are provided in this bill.

Mr. GALLINGER. Ordinarily would not Locks 3 and 5 have been built before 6 and 7 had been built? Why was it that they skipped, that they built a lock and then left a place for the construction of a lock at some other time lower in its order than those that were constructed?

Mr. SHEPPARD. I am unable to inform the Senator. I think perhaps it was due to the fact that the engineers thought the locks and dams at first constructed would probably be sufficient.

Mr. GALLINGER. That would be an explanation if that had been in the mind of the engineers.

Mr. SHEPPARD. Most of these locks and dams are in the same congressional district. There could be no question of their distribution simply to accommodate different congressional districts, as has been suggested by the Senator from Iowa [Mr. KENYON] heretofore.

Mr. GALLINGER. I asked the question, the Senator will understand, for information. I have no personal knowledge and I have no engineering skill, but it did strike me when it was presented at some previous time as being rather singular that the locks had not been built consecutively; that is all.

Mr. RANSDELL. Mr. President, in order to have the record clear in this case in regard to the artesian wells which have been alluded to several times, I should like to read very briefly from the report of Capt. C. S. Riché, now Col. Riché, made to Gen. Wilson, then Chief of Engineers, December 23, 1899. I think we ought to know exactly what was said about these artesian wells. It is right interesting reading. He makes a very favorable report, let me say, upon the improvement of the Trinity River, and that report was transmitted to Congress by Gen. Wilson, with a favorable report recommending that the work be done. I quote from page 4 of this document, House Document No. 409, Fifty-sixth Congress, first session. He says:

Periods of drought, however, would interfere with navigation to such an extent as to prevent the river from becoming a commercial factor of much importance unless such additional measures were adopted as would secure a navigation which would be practically continuous during all seasons of the year. For this purpose it will be necessary to canalize the river by means of locks and dams, which, by holding the water in a series of steps or pools, would greatly prolong the period of navigation. With the addition of an artificial water supply in the upper reaches of the river, to be obtained by storing surplus water during the wet season—

That is one method. Now let me call the attention of the Senator from Iowa to that—

or by sinking additional artesian wells, or by a combination of the two methods, it will be possible to obtain a navigation which will be continuous at all seasons, except possibly for a short period during years of excessive drought.

The character of Trinity River and its geographical location will permit an improvement, as above outlined, to be made without excessive cost. The river for the greater part of its length is narrow, its banks are generally high, and, except in the lower reaches, remarkably stable and free from erosion. Good foundations exist also at all the sites where locks and dams are likely to be needed. The cost of these locks and dams, therefore, will be less than on many other streams where such favorable conditions do not exist.

Mr. POMERENE. Mr. President——

Mr. RANSDELL. Will the Senator kindly let me read the extract, and then I will yield in just a moment?

Mr. POMERENE. Certainly.

Mr. RANSDELL (reading)—

Again, the question of a special artificial water supply for navigation purposes is not of such supreme importance as might at first be supposed. In the watershed of the river numbers of artesian wells have already been driven, and many more are being driven every year. These wells furnish a steady supply of water for the river, irrespective of weather conditions, and the time is not remote when they will supply enough water to permit navigation by means of a system of locks and dams to continue through an extended drought.

Now, I ask the especial attention of the Senate to this clause:

Taking one year with another, however, the dry season is generally in the summer, when the movement of crops is not in progress, and the wet season generally begins in the fall and continues until late in the spring, covering the months of the year when transportation facilities are most needed. Ice will interrupt navigation only during exceptional temperature conditions, which are very rare indeed, and which will never be other than of brief duration.

I now yield to the Senator from Ohio.

Mr. POMERENE. It occurred to me that that portion of the report of the engineers which the Senator has read is rather indefinite in this, that it does not state how many artesian wells have been drilled or how many would be required in order to provide the necessary flow; neither does it show to what extent the flow has already been increased by the artesian wells that have already been sunk, nor the extent to which it could be increased by the sinking of other artesian wells. I wondered if the Senator had any more explicit information upon that subject.

Mr. RANSDELL. I do not understand that this report says that the artesian wells are absolutely necessary. It says that water might be stored during the wet season, or you might get a supply from artesian wells. I will state to the Senator that I understand since this report was made, in 1899, a special board has made an examination of the subject and has determined that there is plenty of water from the usual rainfall to fill the pools in the wet season so full as to maintain a reasonable supply of water during the dry season.

I wish to make this observation also. Senators, in speaking about the low-water period on the southern rivers we must not forget that on the northern rivers and on the Great Lakes, for instance, there is a long period of ice. The Great Lakes, which have the greatest commerce in this country, are closed for navigation from four to four and a half months of every year by being frozen over—at least the harbors are frozen. We have only from seven and one-half to eight months' navigation on the Great Lakes and on the rivers in the northern portion of the country. And on the Erie Canal in the State of New York, where they are now spending $150,000,000 to perfect their canal system, they have navigation for only about eight months.

The low-water period on the southern rivers does not last more than three or four months. So, Senators, let me remind you that even if we did have a low-water period of about four or five months, when we could not do any transportation of goods, we would be in no worse fix than our friends in the northern portion of this country. No one contends that the low-water period on the Trinity River would last more than four to five months out of any year.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER (Mr. CHILTON in the chair). Does the Senator from Louisiana yield to the Senator from Ohio?

Mr. RANSDELL. I gladly yield.

Mr. POMERENE. There is, of course, a good deal of force in what the Senator says in regard to the obstruction of navigation during the freezing period in the North, but I have been particularly interested in the suggestions which have been made with regard to artesian wells. Can the Senator state to what extent artesian wells have been resorted to in order to furnish the necessary flow to make rivers navigable?

Mr. RANSDELL. Not a gallon of water has ever been obtained from an artesian well in any of the waterway projects of our country that I have ever heard about.

Mr. POMERENE. Is that true elsewhere?

Mr. RANSDELL. I have never heard of it in other countries. It may be true elsewhere, but I have never heard of it. It certainly is not true in the United States, so far as I know. It was stated incidentally by Capt. Riché as one means of getting additional water for the Trinity if it was desired, and I thought that the Senate was entitled to know exactly what had been said on the subject, because it is much misunderstood. Lots of the trouble we have had in this world comes from ignorance. We do not understand the proposition before us, and, not understanding it, we get a wrong idea about it.

Mr. POMERENE. That being so, does it not occur to the Senator that when an engineer has resorted to the extreme suggestion of saying that the navigability of the river could be increased by sinking artesian wells it rather reflects upon the wisdom of large expenditures along the river under those circumstances?

Mr. RANSDELL. I think, if the Senator please, that this engineer was referring to only a very low-water period of the river. He was only saying that if it was desired to make assurance doubly sure and prevent any interference with navigation on the river even in time of extreme drought so that the river could certainly and surely be navigated for 365 days out of every year, possibly it would be well to put in artesian wells.

But he did not advocate putting them in. He simply said that it might possibly be done.

Now, here is a more recent report, which I should like to read from very briefly:

On December 8, 1903, Brig. Gen. Gillespie, Chief of Engineers, submitted with his concurrence the report of the Board of Engineers authorized by act of June 13, 1902, to examine into the advisability of attempting to secure eight months' navigation on section 1—

That is section 1 of the Trinity River—

with an expenditure of $550,000. The board held that navigation of from six to seven months' duration could be obtained on section 1 with six locks and dams, at an expense of $918,000, and that in some years of unusual rainfall this might give eight months' navigation.

As I understand it, there was not a word said in that report about artesian wells.

Now, I wish to read just a very little more from the report of this engineer, Capt. Riché, the man who spoke about artesian wells, to show you how he feels in regard to this project. I imagine that he is entitled to have his conclusions read as long as the things he said are criticized. He states on page 7:

I am convinced, therefore, that the existence of Trinity River in navigable condition from Dallas to its mouth, even for but 8 or 10 months in the year, would radically reduce present railway rates in all the northern and eastern portions of Texas, and that this reduction of rates would be effected to a gradually diminishing degree for long distances in all directions. The Commercial Club of Dallas, in their statement, estimate that the annual saving to the people consequent upon the improvement of the river would be $9,830,000. Even if the saving should be but one-tenth of that sum the improvement would be eminently advisable.

Then he goes on to discuss it. I will ask to insert it all without reading

The PRESIDING OFFICER. Without objection, it is so ordered.

The matter referred to is as follows:

The reduction of freight rates would mean that the railways would, as at present, carry the bulk of the traffic, and that but a relatively small portion of it would actually be transported on the river, but the improvement of the river would accomplish its main purpose when the railway rates were lowered, and the ever-present possibility of serious water competition would be an automatic check upon excessive charges.

Competition among the various railway companies may be said to have ceased, so far as its effect in reducing rates is concerned. Tariff agreements prevent any serious rate cutting, and water competition appears to afford the only available relief.

Mr. RANSDELL. Capt. Riché says in conclusion:

All things considered, therefore, and in view of the fact that south and west of Red River the railways in the interior are at present entirely unchecked by water competition, I am of opinion that the improvement of Trinity River for a 4-foot navigation from Dallas to its mouth is not only advisable, but urgently necessary, and that it will accomplish much good for many people.

Very respectfully, your obedient servant,

C. S. RICHÉ,
Captain, Corps of Engineers.

Mr. POMERENE. Mr. President——

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Ohio?

Mr. RANSDELL. I would be glad to yield.

Mr. POMERENE. When the Senator speaks of the effect water navigation has upon traffic rates it interests me very much. The next question that occurs to me is to what extent this may influence the rates and whether or not rates could be reduced in other ways. As a student of the commerce of the country, I have always referred to Texas with a great deal of pride in the effort that she made to control railroad rates. I recall that Texas was, I think, the pioneer State when it came to railroad-rate regulation in this country. If the commission in Texas has the power to control these rates, assuming for the sake of argument that the railroad rates are exorbitant, why could not the commission so regulate those rates as to bring them within reasonable bounds?

Mr. RANSDELL. I will answer that by reading another extract from the report of the same Capt. Riché, page 8:

It is claimed in some quarters, however, that railway rates can be reduced in other ways than by water competition and that national or State railway commissions can force rates down whether water competition exists or not. That this state of affairs does not obtain at present can be seen by reference to the statement of the Dallas Commercial Club to the effect that twice in recent years has the Texas Railway Commission been successfully enjoined in the United States courts from attempting a reduction of a small per cent of the railway tariffs, the railways establishing in the litigation that any reduction was confiscatory, the original and accrued cost of the railways, as represented by their stock and indebtedness, and not their present value, apparently being the basis from which is computed the reasonable profit of which they can not legally be deprived by national or State railway commissions.

Failing efficient regulation of rates by railway commissions, it is sometimes suggested that a solution of the problem can often better be obtained by the construction of a Government railway rather than a Government waterway, and the subsequent hauling on this railway of freight and passengers by the Government at cost or less than cost price. As an abstract problem in dollars and cents, this may frequently be the case, but the consideration of such a proposition opens up such an array of possible consequences that the time does not seem ripe, and perhaps never will be ripe, for the Government to undertake this method of controlling rates.

Water competition, therefore, appears to be the only practicable way of reducing and controlling freight rates in this section of the country, and the improvement of Trinity River will effect this result to a large degree. Nor will the consequent reduction of rates be in any way disastrous to the railways; on the contrary, its ultimate effect will benefit them greatly. Reduced rates mean new industries, additional land under cultivation, and great increase in population. As a result, the passenger and freight traffic of the railways will be so greatly increased in volume that their profits will be steadier and more certain. As a general proposition, the railways which are financially the most stable come well within the zone of influence of the rate-regulating effect of efficient waterways.

Mr. POMERENE. Mr. President, assuming the soundness of the logic of the engineers, then it must follow as a consequence that if you had the greatly reduced rates due to river navigation you are going to destroy these railroads.

Mr. RANSDELL. I do not know that that would follow at all. It would perhaps so develop the country that the railroads might carry high-class freights. I will state that on and adjacent to the Erie Canal, in New York, there are six railroads paralleling the canal, and that is the most prosperous part of the State. It is said that 90 per cent of the population and 85 per cent of the wealth of the State of New York lie in an area 5 miles on either side of the Erie Canal—a great waterway which was completed in 1825 and which has been operating ever since. It is a well-known fact——

Mr. THOMAS rose.

Mr. RANSDELL. Let me complete my statement, and then I shall be glad to yield to the Senator.

It is a well-known fact that the greater the competition the better and more prosperous are the railways. Mr. President, there is no portion of this country where the railways are more prosperous than along the Hudson River, along Long Island Sound, and along the Great Lakes. There they have the keenest water competition. The water rates are very low, the railroad rates are low; and there has been a tremendous growth of populous, wealthy cities on the Lakes—they have grown by leaps and bounds, very much more rapidly than cities like Cincinnati and St. Louis, which are located on unimproved rivers. On the Hudson, likewise, they have grown in the same way as they have on Long Island Sound. There has been such a rapid development of commerce of every kind, both of merchandise and of passenger freight, that not only have the people of those favored localities got the benefit of the cheaper rates, but the railroads also have prospered greatly. So, if the Trinity River had been improved and there had been great prosperity resulting from the cheap rates there, the railroads would have derived some of the benefit.

In connection with my remarks about the Trinity River—and I then shall yield to the Senator from Colorado [Mr. THOMAS]—I wish to introduce here a letter from Mr. J. R. Babcock, who is the assistant to the president of the Chamber of Commerce of the city of Dallas, Tex. It is dated February 19, 1916, and is addressed to Mr. S. A. Thompson, secretary-treasurer of the National Rivers and Harbors Congress. I quote an extract from it, and I ask especially the attention of Senators to this letter. It is from Dallas, and it is very recent, Senators. Mr. Babcock says:

Your favor of February 9 arrived while I was in Washington appearing before the Rivers and Harbors Committee. In consequence of that visit, the Rivers and Harbors Committee has recommended $50,000 for open-channel work and $250,000 for Locks and Dams Nos. 3 and 5, we proposing to put up $50,000 in cash for this portion of the work.

We made a further proposition that, if Congress would appropriate $3,000,000, we would raise $3,000,000; this $6,000,000 to complete the canalization of the Trinity River forever and all time to come, placing the Trinity on its proper basis.

Senators, does any reasonable man believe that those wise, far-seeing business men of Dallas, the queen city of Texas, one of the most enterprising cities of this Nation, after expending, as I will show later in this letter, something like $1,681,000 to develop their water front and to assist in developing their river, would spend another $3,000,000 of their own money if it was going to be thrown away? Would they throw away something like $5,000,000? Oh, no; that is unreasonable. Those people have faith in the improvement, and it would do great good if we should make it.

Mr. Babcock further says:

Answering your particular questions, Dallas has paid for the sites of nine locks and dams $20,000; gave $66,000 in cash to start the work; has bought 32 acres of river front for wharfage; has built two high bridges and four steel turn bridges so that boats can pass, $800,000; has spent $25,000 in the purchase of tow boats, and built two 100-ton barges; is spending $700,000 to make same navigable by sewage diversion, etc., making a total of $1,681,000. If we are able to reduce rates by way of the river to the Gulf as much as 5 cents per hundred pounds, it will mean a saving to the city of Dallas of $9,000 per day.

Now I ask your attention to this statement:

We have on file a list of 44 steamboats which operated on the Trinity River from 1865 to 1878, the smallest tonnage of any one of

them being 65 tons, the largest being 480 tons. At that time the water rate on cotton was $1 a bale to Galveston; it is now $2.75 per bale.

Think of that! In the days when there were very few, if any, railroads I presume there was water enough then to operate boats for a number of months in each year, and the rate on cotton was a dollar a bale. Now, with nine railroads running in there, with every boat driven off the river, the people of that section—and Dallas is the basic point for fully a million bales of cotton—the people there pay $2.75 per bale.

What did the famous Texas Railroad Commission do for them? It reduced the rate 25 cents a bale. The former railroad rate was $3, and the Texas commission was only able to reduce it 25 cents per bale.

Senators, if we improve this river properly and make it navigable for 8 or 9 months in each year those people will again get their cotton carried at $1 per bale.

Mr. JONES. Mr. President, I wish to ask the Senator from Texas [Mr. SHEPPARD] a question. It may be that he answered it awhile ago when I happened to be out of the Chamber. If he has done so, I shall not ask him to go over the matter further. I merely want to ask, If these two locks and dams were completed and the rest of the project were not taken up, what would be the benefit to navigation?

Mr. SHEPPARD. It would give us several months' navigation on the river in each year.

Mr. JONES. Would that be of great benefit to commerce?

Mr. SHEPPARD. Undoubtedly it would be a benefit to commerce. It would enable boats to operate from Dallas to the Gulf.

Mr. JONES. And they would operate?

Mr. SHEPPARD. They would operate, as I imagine from the statement which has been read here.

Mr. THOMAS. Mr. President, I merely wish to inquire of the Senator from Louisiana [Mr. RANSDELL] what has become of that wonderful traffic existing some forty-odd years ago upon this river, before any improvements were put in by Congress?

Mr. RANSDELL. I presume it is now carried on the nine railroads that run into Dallas; but they are carrying cotton now. I will say to the Senator, at $2.75 a bale, while when the boats used to carry the cotton they carried it at a dollar per bale. That is the evidence. Personally I know nothing about it.

Mr. THOMAS. Is there not just as much water in the river now as there was then?

Mr. RANSDELL. But the boats were driven off, I may say to the Senator, by railroad competition at certain points. After driving the boats off the river, the railroads put up their rates.

Mr. THOMAS. Let me ask the Senator from Louisiana if we can drive the boats back by improving the river without destroying the railroads?

Mr. RANSDELL. I think that can be done; I think we ought to regulate those railroads somewhat; and I want the Senator from Colorado to help pass laws to regulate them.

Mr. SHEPPARD. Mr. President, let me state also that before the advent of the railroads the periods of high water were uncertain. The uncertainty of those periods, however, did not interfere with navigation. Since the advent of the railroads certainty is demanded more than ever; that is an element demanded now that was not demanded at that time. In consequence, the people, not knowing when the river would be navigable, preferred to use the railroads.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Iowa [Mr. KENYON].

Mr. KENYON. On that I ask for the yeas and nays.

Mr. SHEPPARD. I suggest the absence of a quorum, Mr. President.

The PRESIDING OFFICER. The absence of a quorum being suggested, the Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Bankhead	Fall	Lodge	Smith, Mich.
Borah	Fletcher	Martin, Va.	Smoot
Brady	Gallinger	Martine, N. J.	Sterling
Brandegee	Hardwick	Myers	Swanson
Broussard	Hitchcock	Newlands	Taggart
Chamberlain	Hollis	Norris	Thomas
Chilton	Hughes	Poindexter	Tillman
Clapp	Johnson, S. Dak.	Ransdell	Townsend
Clark, Wyo.	Jones	Saulsbury	Underwood
Clarke, Ark.	Kenyon	Shafroth	Vardaman
Culberson	La Follette	Sheppard	Walsh
Cummins	Lane	Shields	Warren
Curtis	Lea, Tenn.	Simmons	Williams
Dillingham	Lewis	Smith, Ariz.	
du Pont	Lippitt	Smith, Md.	

The PRESIDING OFFICER (Mr. CHILTON). I make the same announcement in regard to the absence of my colleague [Mr. GOFF] as on the last roll call.

The PRESIDING OFFICER (Mr. LEWIS in the chair). Fifty-eight Senators having answered to their names, a quorum of the Senate is present.

Mr. KENYON. Mr. President, I had asked for the yeas and nays when the absence of a quorum was suggested. I do not know whether the Chair announced that the yeas and nays were ordered. If not, I renew my request for the yeas and nays.

The PRESIDING OFFICER. The yeas and nays having been demanded by the Senator from Iowa, is the demand seconded?

The yeas and nays were ordered.

Mr. LODGE. I inquire what is the question? Is it on a motion to strike out?

The PRESIDING OFFICER. The question is on the amendment of the Senator from Iowa [Mr. KENYON], which the Secretary will state.

The SECRETARY. On page 24, line 11, after the numerals "$50,000," it is proposed to strike out the following:

For improvement by the construction of Locks and Dams Nos. 3 and 5, $250,000: *Provided*, That no part of the latter amount shall be expended until the city of Dallas or other local interests shall have contributed the sum of $50,000 toward the improvement.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary proceeded to call the roll.

Mr. MYERS (when his name was called). I transfer my pair with the Senator from Connecticut [Mr. MCLEAN], in his absence, to the Senator from Maryland [Mr. LEE] and vote "nay."

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER]. I transfer that pair to the junior Senator from Wisconsin [Mr. HUSTING] and vote "yea."

Mr. TILLMAN (when his name was called). I am paired with the Senator from West Virginia [Mr. GOFF], and therefore withhold my vote.

Mr. LODGE (when the name of Mr. WEEKS was called). I desire to announce that my colleague [Mr. WEEKS] is absent from the city and is paired with the Senator from Kentucky [Mr. JAMES].

Mr. WILLIAMS (when his name was called). In view of my pair with the senior Senator from Pennsylvania [Mr. PENROSE] and in view of the fact that I do not know just how he feels about this particular item I will withhold my vote.

The roll call was concluded.

Mr. CLARK of Wyoming. I have a general pair with the senior Senator from Missouri [Mr. STONE], who has been called from the Chamber. I transfer that pair to the Senator from Vermont [Mr. PAGE] and vote "yea."

Mr. DU PONT. I have a general pair with the Senator from Kentucky [Mr. BECKHAM]. As he is absent and as I do not know how he stands on this question I will withhold my vote.

The PRESIDING OFFICER. Will the Senate indulge the Chair to say that he is requested by his colleague [Mr. SHERMAN] to announce that he has been called from the Chamber upon necessary business, and is paired?

Mr. LODGE (after having voted in the affirmative). I notice that my pair the senior Senator from Georgia [Mr. SMITH], is absent. I transfer that pair to the Senator from Illinois [Mr. SHERMAN] and will let my vote stand.

Mr. GALLINGER. The Senator from Maine [Mr. BURLEIGH] is detained on account of illness. He is paired with the Senator from Arkansas [Mr. ROBINSON]. I ask that this announcement stand for the day.

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from North Dakota [Mr. GRONNA] with the Senator from Maine [Mr. JOHNSON];

The Senator from New York [Mr. WADSWORTH] with the Senator from New Hempshire [Mr. HOLLIS]; and

The Senator from New Mexico [Mr. CATRON] with the Senator from Oklahoma [Mr. OWEN].

The result was announced—yeas 29, nays 31, as follows:

YEAS—29.

Borah	Gallinger	Martine, N. J.	Thomas
Brady	Gore	Norris	Thompson
Clapp	Harding	Oliver	Townsend
Clark, Wyo.	Jones	Overman	Walsh
Cummins	Kenyon	Smoot	Warren
Curtis	La Follette	Sterling	
Dillingham	Lippitt	Sutherland	
Fall	Lodge	Taggart	

NAYS—31.

Ashurst	Hardwick	Nelson	Simmons
Bankhead	Hitchcock	Pittman	Smith, Ariz.
Brandegee	Hughes	Poindexter	Smith, Md.
Broussard	Lane	Ransdell	Smith, Mich.
Chamberlain	Lea, Tenn.	Reed	Swanson
Clarke, Ark.	Lewis	Shafroth	Underwood
Culberson	Martin, Va.	Sheppard	Vardaman
Fletcher	Myers	Shields	

NOT VOTING—36.

Beckham	Hollis	Newlands	Sherman
Bryan	Husting	O'Gorman	Smith, Ga.
Burleigh	James	Owen	Smith, S. C.
Catron	Johnson, Me.	Page	Stone
Chilton	Johnson, S. Dak.	Penrose	Tillman
Colt	Kern	Phelan	Wadsworth
du Pont	Lee, Md.	Pomerene	Weeks
Goff	McCumber	Robinson	Williams
Gronna	McLean	Saulsbury	Works

So Mr. KENYON's amendment was rejected.

Mr. KENYON. Mr. President, on page 25, line 1, I move to strike out "$474,000" and insert "$259,000." On line 3, I move to strike out "$499,000" and insert "$284,000"; and I wish to indulge in a word of explanation.

This is the proposition of the Ouachita River, to which I have heretofore referred. This bill carries $499,000 for this river. The part of that for open-channel work up to Camden is $25,000. My motion does not go to that part of the bill, but to the part reading:

Continuing improvement by the construction of locks and dams heretofore authorized, $474,000.

I am aware that the Army engineers in their report for 1915, which I think was made up some time in September, did state that the sum of $474,000 could be expended; but in a report subsequent to that time they suggested an appropriation of $234,000. My amendment is to carry out that suggestion, adding thereto the $25,000 for the open-channel work which the Army engineers have recommended.

Of course we have voted into this bill projects that were condemned by the Army engineers. This is one of the projects resurveyed under the act of last Congress, and it can not be said, I think, that the Army engineers' reports are for a condemnation of the project; but they are for this apparent modification, at least, in the amount of money. We have spent upon this stream approximately $2,700,000. Deducting sand, gravel, and logs for the year 1914, the commerce will not amount to over 32,000 or 33,000 tons.

This is a river which is perhaps somewhat distinguished because the able senior Senator from Louisiana [Mr. RANSDELL] was born along the banks of this river somewhere; and in a statement before the House committee on the 2d of February, 1916, he said—no; I am wrong about that. The Senator was born on the banks of the Red River, he states.

Mr. RANSDELL. Yes.

Mr. KENYON. But this river, being near the Red River, shares in that fame and distinction.

The Senator from Louisiana, in his argument before the House committee, said:

This report of the engineers shows we receive no benefit whatsoever from what has been done, because the chain has not been completed; there are intervening links, and we have only about 8 or 9 inches of dependable depths of water in the river.

Here is a project on which we have expended $2,700,000 and are going on with more locks and dams in a project that will involve millions more; and the Senator who is the great authority in this country on rivers and harbors says that we have only about 8 or 9 inches of dependable depths of water in the river.

Let me put in the RECORD one or two other things from the Army engineers' reports.

We have had previous projects on this river running back into the seventies, and under those projects we have expended $614,802.19, as appears from page 956, volume 1, of the Army engineers' reports. It is there said:

The present project is based on plan contained in House Document No. 448, Fifty-seventh Congress, first session, which proposes to obtain a navigable depth of 6½ feet at low water from the mouth of Black River, La., to a point about 10 miles above Camden, Ark., a distance of 360 miles, by the construction of nine locks and movable dams * * * at an estimated cost of $4,876,654.35.

I wish the Senators who are going to vote on this proposition would observe this fact. The Army engineers say, on the same page:

From the manner in which the appropriations have been made for this improvement it has been held that the project has never been adopted in its entirety by Congress.

This is the third item "hand running" this afternoon involving the expenditure of millions of dollars on projects that have not been adopted in their entirety by Congress. Of course that does not make any difference. This delightful throwing away of public money is to continue.

Locks 2, 4, 6, and 8 have been authorized; in the case of Nos. 3 and 7 the sites have been acquired, and there remain unprovided for Locks and Dams 1, 5, and 9.

I also desire to place in the RECORD the following on page 957 of the Engineer's reports:

The amount expended on the existing project prior to the beginning of the fiscal year was for original work $2,279,021.33 and for maintenance $251,562.14, a total of $2,530,583.47.

What is the condition at the end of the fiscal year, after the expenditure of these moneys?

The project for constructing locks and dams—

The engineers say—

is 46¾ per cent completed. Maintenance by snagging work will have to be continued indefinitely. Locks and Dams Nos. 4, 6, and 8 have been completed and are in operation, but as the pools are not continuous, little benefit has been obtained. The maximum draft that can be carried at low water over the shoalest part of the section under improvement is 8 inches. The total expended under the existing project to the end of the fiscal year was $2,447,936.32 for new work and $267,121.67 for maintenance, a total of $2,715,057.99.

And 8 inches of water! It is fine business, Mr. President. Anybody objecting to this kind of a proposition wants to go in the crank class at once and join the "uplifters"!

On page 958 of volume 1 of the engineers' reports I find the following, under the head of "Commercial statistics":

These statistics were compiled for the fiscal instead of the calendar year, because the former more nearly coincides with the commercial year, and the period of navigation ordinarily closes in June.

In 1913 the commerce was 48,222 tons; in 1914, 64,874 tons; in 1915, 70,619 tons.

The freight carried during the last fiscal year consisted of lumber and logs, farm products, and general merchandise.

I propose to show, further on in the engineers' reports, that, taking out the sand and the gravel and the logs and the lumber, the commerce will not exceed 32,000 or 33,000 tons.

Further, the engineers say in volume 2, page 2693:

The U. S. snag boat *Jos. E. Ransdell* began work at Jonesville, La., October 22, 1914, and continued snagging in these streams until February 16, 1915, after which operations were suspended on account of high water.

And here is the great work that this snag boat did:

Snags pulled	1,711
Stumps pulled and destroyed	830
Leaning trees cut	2,151

That seems to have been from Camden to the mouth of the Black River, a distance of 350 miles. Then snagging operations were suspended, and they began work again and continued operations to Jonesville, a distance of 83.9 miles, and they did work as follows along there:

Snags cut and destroyed	715
Shore snags cut	1,871
Logs removed from channel	378
Leaning trees cut	4,540
Trees girdled	69

On page 2699 of volume 2 of the engineers' report is a statement of the commerce on this stretch, which I will ask to have inserted as a part of my remarks, if there be no objection.

The PRESIDING OFFICER. The Chair hearing no objection, there is none.

The matter referred to is as follows:

Freight traffic.

Articles.	Amount. In customary units.	Amount. In short tons.	Valuation.	Average haul or distance freight was carried.	Rate per ton-mile.
				Miles.	*Cents.*
Cotton	9,776 bales	2,934	$469,443	177	1.41
Cotton seed	93,929 sacks	7,046	197,288	177	.83
Grain	21,694 sacks	1,551	62,040	177	.53
Provisions	125,069 packages	6,213	931,950	177	1.40
Hides	122 bundles	9	4,117	183	2.06
Cattle	847 head	338	54,080	183	2.63
Hogs	6,158 head	616	98,560	183	1.34
Staves	326,000	4,655	37,240	219	.54
Lumber	225,000 feet b. m.	509	8,907	177	.70
Timber rafted	2,503,000 feet b. m.	7,515	37,595	100	(1)
Timber barged	4,739,000 feet b. m.	18,956	37,912	60	1.01
Crossties	42,673	3,444	20,484	100	.33
Shingles	1,771 bundles	65	2,620	177	1.05
Sand and gravel	7,190 cubic yards	8,768	1,078	4	(1)
Lime and cement	3,376 barrels	337	6,752	50	1.00
Hay	5,963 bales	446	5,352	183	.99
Poultry	728 coops	55	16,500	183	1.83
Machinery		145	30,000	70	4.61
Miscellaneous	70,174 packages	7,017	1,032,550	183	2.34
Total		70,619	3,074,465		

[1] No rate given.

Mr. KENYON. Of the short tons for the year—70,619—it appears that 4,655 are staves, 509 lumber, 7,515 timber rafted, 18,956 tons timber barged, 3,444 tons crossties, and 7,017 tons packages of various kinds. Deducting, as I have said, those matters which do not require great depth or great channels to float them, it leaves a commerce of about 30,216 tons.

Under the act of the last Congress the Army engineers made a reexamination of this stream and filed their report April 1, 1916. It is an illuminating document. I am not going to take

the time to read it all or many parts of it. I just wish to refer here and there to parts of this document. It seems that there were two projects, according to the report of Col. Black, set forth on page 2 of this document. I will say that the document is House Document No. 979.

One provides in part for the construction of eight locks and dams with a view to securing a channel 6½ feet deep from the mouth of Black River to a point 10 miles above Camden, Ark., while the other provides for removing snags, leaning trees, and other obstructions between Camden and Arkadelphia. In addition, the removal of obstructions below Camden is continued under an earlier project. Locks and Dams Nos. 4, 6, and 8 have been completed and are in operation; Nos. 2 and 3 are under construction. * * * Funds on hand are sufficient to complete No. 2, but it is estimated that an additional amount of $234,000 will be required to complete No. 3, and $1,804,000 to complete Nos. 5, 7, and 9. The district officer is of opinion that the resources of the adjacent country are sufficient to justify further work on the lock and dam project to and including Lock and Dam No. 8, but that the building of No. 9 should be postponed until the development of traffic on the canalized river indicates the necessity of its construction, * * * and that the project for open-channel improvement above Camden should be abandoned.

Col. Black says:

After due consideration of the above-mentioned reports, I concur in the views of the division engineer and the Board of Engineers for Rivers and Harbors, and therefore report that it is deemed advisable to discontinue the project for improvement of Ouachita River between Camden and Arkadelphia, and to modify the project for improvement below Camden to provide for the completion of Locks and Dams Nos. 2 and 3, and their operation when completed, and continuing the operation of Nos. 4, 6, and 8, together with such snagging as may be necessary to facilitate navigation up to Camden. An appropriation of $234,000 should be provided in one sum for completion of Lock and Dam No. 3.

They recommend the completion of Locks and Dams Nos. 2 and 3. They say they have money on hand for the completion of Lock No. 2 and that $234,000 is necessary for the completion of Lock and Dam No. 3. My amendment adds to that $25,000 for the open-channel work, which they have recommended.

This is the last report of the Army engineers on this subject, coming very late in the time of the present Secretary of War. I have heretofore referred to the situation above Camden. I am not going to spend any time on that.

I think, Mr. President, this is all I have to say about the Ouachita River.

Mr. RANSDELL. Mr. President, I am somewhat interested in the Ouachita River project, and I am glad to explain to the Senate something about it. The project was begun in 1902 after a very elaborate survey extending over a period of several years. The original document is No. 448, Fifty-seventh Congress, first session. I read from that report, on page 3:

By following the construction of Nos. 4 and 6 by the construction of Nos. 2, 3, and 8 the navigation would be improved so as to give between 3 and 4 feet all the way up to Camden, and the ultimate depth of 6½ feet could then be secured by building Nos. 1, 5, 7, and 9.

In 1902 the project was adopted and Locks 4 and 6 were provided for and appropriation made for them. In the act of March 2, 1907, Locks 2 and 8 were provided for. The act of June 25, 1910, provided for the acquisition of sites for Locks and Dams Nos. 3 and 7, and in the act of July 25, 1912, provision was made for the construction of Locks and Dams Nos. 3 and 7.

The original project, Mr. President, called for nine locks and dams to give a minimum depth of 6½ feet at low water from the mouth of the river to the city of Camden, a distance of about 360 miles. A subsequent change in the plans did away with the necessity of Lock No. 1, so we are not to consider it. Provision has already been made for carrying on the work on six of the remaining locks and dams. Locks 2, 4, 6, and 8 have been completed. Locks 2 and 4 are below the city of Monroe, La.; 6 and 8 are north of that city and in the State of Arkansas; 7 and 9 are also in the State of Arkansas. Lock No. 5 is in Louisiana.

The locks already provided for by Congress are 2, 3, 4, 6, 7, and 8. Four of those have been completed. One, No. 3, is very nearly completed, and the site has been acquired for Lock No. 7, and work authorized to proceed thereon.

The project for Lock No. 7 has been formally adopted. The controversy at this time is only in regard to Locks 5, 7, and 8, because the engineers themselves insist that the work should go on below the city of Monroe to complete Lock 3, which will give a completed river up to that city.

In the stretch between Monroe and Camden, Locks 6 and 8, let me repeat, have already been finished and are of practically little or no value until the other three, 5, 7, and 9, are finished.

The proposition in this last report of the engineers is to make no provision for 5 and 9 and to abandon or rather discontinue any work on Lock 7, which was formally adopted in the act of 1912, which authorized work to proceed thereon, and made appropriation therefor.

This is an entirely different proposition from recommending against a project which Congress has never adopted. This has been adopted, let me repeat, at least as to Locks and Dams 6, 7, and 8, and a great portion of the work actually finished on that stretch of the river, 6 and 8 being already completed, and 7 actually authorized. The site of No. 7, as I understand it, has been acquired. I believe the site has been acquired; I am not positive.

Now, they say after spending upward of a million dollars to finish 6 and 8, and after Congress having in the most formal manner authorized the work on 7, it is inadvisable at this time to continue the work on that stretch of the river between Monroe and Camden.

Mr. President, I can not understand that kind of reasoning. I admit that Congress has never at any time formally adopted the whole project for eight locks and dams between Camden and the mouth of the Ouachita, but in three separate acts, aye, in four separate acts, it has adopted in the most formal manner and provided for six of these locks and dams, and five of them are practically completed, four actually completed, and one very nearly finished.

Mr. BRANDEGEE. Mr. President——

Mr. RANSDELL. Now the engineers propose to have us abandon the work north of Monroe.

The PRESIDING OFFICER. Does the Senator from Louisiana yield to the Senator from Connecticut?

Mr. RANSDELL. I will very gladly yield.

Mr. BRANDEGEE. Suppose all nine locks are completed, what is the estimated depth of water that it is expected to get in the river?

Mr. RANSDELL. Six and a half at minimum low water. There are many stages of the river when it is very much more than that, but that will be the minimum at extreme low water.

Mr. BRANDEGEE. In brief, what reason does the engineer give for recommending that further development be abandoned there?

Mr. RANSDELL. It is not at all satisfactory to me. I will have to read it to you to tell you just what they do recommend.

Mr. BRANDEGEE. I do not want the Senator to devote a lot of time to reading the entire report unless he wants to do it. I did not know but that he could tell me whether they recommended the abandonment of it because they did not think the commercial advantage would be commensurate with the outlay.

Mr. RANSDELL. As I gather from the report, the Senator has correctly stated that at this time it would not be justified by the possible commercial benefits to continue the work up to the city of Camden.

Mr. CLARKE of Arkansas. If the Senator will permit me, let me read a single paragraph, a short one, to show just what the report is based on, found on page 11 of the report on new surveys. It is an excerpt from the report of Col. Townsend, whose headquarters are at St. Louis, known as the division engineer. He designates by numerals his different proposals. When he comes to this particular matter he says as follows:

5. Above Monroe work has not been begun on three of the dams.

Two of them have been completed on that stretch of the river. It contemplates in all five dams and two of them have been completed.

5. Above Monroe work has not been begun on three of the dams, whose estimated cost is $1,804,000, and as it is considered doubtful if any material shipment of sawed lumber would be brought about by the canalization of this portion of the river, it is recommended that their construction be deferred until the influence of the improvement below Monroe has been determined, work being confined to operating the existing locks and dams and snagging.

It is a political recommendation. It is not based on actual conditions. He says, "Let us try out those that are below Monroe and two above that place." We will then let the river go along, gapped up by these dams and narrow and shoaly stretches, absolutely useless. It would isolate the whole country above that.

Mr. BRANDEGEE. Will the Senator state about what total sum has been expended on that entire project?

Mr. RANSDELL. Something like $2,700,000.

Mr. BRANDEGEE. That is the estimate of the entire project if completed?

Mr. RANSDELL. A little over $2,000,000 additional is required to finish it.

Mr. CLARKE of Arkansas. One million six hundred and fifteen thousand dollars is the estimate, in addition to the $500,000 which this bill carries.

Mr. RANSDELL. I should like to say, Mr. President, that as a general proposition I do not favor the adoption by Congress of any project which has not been reported upon favorably by the

Engineer Corps. If this were before us as an original proposition and we had never acted upon it I would not stand here advocating it. But the measure was favorably reported a great many years ago. In February, 1902, a favorable report was made on this project; and Congress, as I said, has from time to time adopted and made provision for extending the work on several of these locks and dams—six in all.

Now, the Senator from Iowa says we have never adopted it formally; we never adopted it as a whole. I do not understand that we have adopted as a whole any of the big waterway projects of the country, except those where we make provision for the completion at one time, and that would be the wise plan. But we certainly have adopted three locks north of Monroe; we certainly have completed two locks north of Monroe. We could not have done it more completely.

As was so well said by the able Senator from Washington [Mr. JONES] two or three days ago, there is a vast distinction between making an appropriation for a project which has never met the approval of the Engineer Corps and refusing to follow the advice of the Engineer Corps when they recommend the abandonment of a project that was formally adopted years ago and is in process of construction. It is a very different thing; and that is what they are recommending now as to that part of the Ouachita improvement north of Monroe.

After adopting Lock No. 7 in 1910 and readopting it in 1912, work has been delayed on it for some reason, and no money seems to have been spent on it; but after it has been adopted for six years the engineers now say let us stop it, do not go on with it at all, and allow Locks 6 and 8, which have cost over a million dollars, to remain unused and go to ruin.

Is it any wonder that we do not get good results from our waterways system, Mr. President, when we carry on the work in such a desultory way? This project was begun, let me repeat, in 1902—14 years ago—and it is not quite half finished yet. What business man could avoid having his friends send him to an insane asylum if he proceeded with his ordinary business in that manner? And yet that is the way Congress has done not only in regard to the Ouachita, but in regard to many other waterway projects throughout the Nation. We began the improvement of the Ohio River in 1876 with a project to give it 6 feet at minimum low water. About 12 or 14 years ago we changed that to 9 feet, and it is nothing like half finished yet. More than a third of a century has passed and the Ohio River project is not one-half complete.

I do not know why that has been our policy, but I want to call the attention of the United States Senate to this remarkable fact: Wherever there has been a harbor on the Lakes, on the Gulf, or on any of the oceans it has been put under a continuing contract and promptly finished. Harbors are railroad terminals. Railroads run up alongside the wharves and docks in the harbors and discharge their cargo into the boats in the harbor, and the boats in turn transfer their cargo to the railroads. Harbors are complements of railroads. They are adjuncts to railroads; they are the supplements and helpers to railroads. The harbors, let me repeat, have been promptly finished in the very best way. I always gave my vote in favor of them, because I know it has been beneficial to the commerce of the country to have great, deep harbors like that at Boston, for instance. I was in Congress when we changed that project from 30 to 35 feet. Evidence was produced subsequently showing that as a result of that improvement there had been a reduction of nearly 50 per cent in the ocean freight rates because of the greater size and depth and carrying capacity of the vessels which used a 35-foot harbor. I felt as a representative of the South that my people were going to get the benefit of cheapened ocean freight rates for their cotton because of this deepened harbor. I felt that the grain grower on the distant plains of Dakota would get a like benefit from the deepening of that harbor. I have nothing to say against it; on the contrary, I approve it heartily.

But, I repeat, whenever harbors were under consideration we gave them all that was needed, on the Great Lakes, on the ocean, and on the Gulf, and they are adjuncts to railroads. Wherever waterways became the competitor, the rival of the railway, which a river like the Ohio is, which a river like the Missouri is, which a river like the upper Mississippi and the lower Mississippi is, like the Ouachita is, the Red is, the Arkansas is, the Tennessee is, and a number of other rivers—when it comes to that kind of a proposition we have pursued a piecemeal policy. We have kept the work going on forever and ever and ever, never completing, never finishing it. I do not know the influences back of this policy, but I state facts. If there is any doubt about them, I will lay the cases before you.

Again, referring to the wonderful Ohio River, having its head at Pittsburgh, whose commerce equals the combined commerce of the five great cities of New York, London, Liverpool, Antwerp, and Hongkong, the greatest freight-producing center on the globe, it is a river which, even in its present bad condition, carries over 13,000,000 tons of freight annually. That river has been under improvement for more than a third of a century, and it is not half finished. If we are going to have the policy which some men are advocating here I doubt if it ever will be finished.

Senators, if you are in favor of legitimate river and harbor improvements, then let us place great projects like the Ohio, the upper Mississippi, the Missouri, the Tennessee, and the Ouachita on the continuing-contract plan and see what benefits we will get therefrom.

Mr. BRANDEGEE. Mr. President——

Mr. RANSDELL. Just one word, please, then I will gladly yield. The only river I know of of any significance that has been completely improved in this country is the Black Warrior-Tombigbee system, which was improved by means of locks and dams, the work extending over a period of more than 22 years. It was completed last spring, and already there has been an enormous increase in the freight carried thereon, and the railroad rates on pig iron from Birmingham to Mobile have already been reduced from $2.75 to $1.75 per ton as a result of that improvement. Here is a river which has been really improved. Now, what is going to be the result? We can not tell yet, but the increase in river freight has already been material, and railroad rates in adjacent territory have been reduced very much.

I now yield to the Senator from Connecticut.

Mr. BRANDEGEE. I think there is a good deal of ground for the criticism made by the Senator as to the wavering policy of Congress about these matters, but why does not the committee put a provision in the bill that a river improvement shall be carried on by continuing contract, as the Senator says the harbor improvements are carried on?

Mr. RANSDELL. It is right hard to answer that question. The gentleman who made such a desperate attack on this bill two years ago, ex-Senator Burton, from Ohio, was for many years chairman of the Rivers and Harbors Committee of the House, and more responsible during the 10-year period when he was chairman than any other Member of the American Congress for the present policy of river and harbor improvements. During his incumbency it seemed impossible ever to get a continuing contract for a river. We got a number of continuing contracts for harbors. In the act of 1907, as I recall, we gave the Great Lakes, the Sault Ste. Marie, and the Detroit River, which are the connecting links between the Great Lakes about $13,000,000 in one contract. We placed a number of big harbors under the continuing-contract system. Senator Burton said that that was the greatest river and harbor bill ever passed by the American Congress. I believe he is pretty nearly right. It was a good one. I had a very humble part in making it, and I claim no credit whatsoever for it; but it was impossible to put the Ohio, or any other river which competed with railroads, on a continuing contract. I was very glad to get a provision for two little locks and dams on the project for the Ouachita. Here is the provision for the Ouachita in that nearly perfect act of 1907:

> Improving Ouachita and Black Rivers, La. and Ark.: Continuing improvement by the construction of Lock and Dam No. 2, near Catahoula Shoals, La., and Lock and Dam No. 8, near Franklin Shoals, Ark., in accordance with the plan in House Document No. 448, Fifty-seventh Congress, first session, and for maintenance, $200,780.

There was a continuing contract authorized for $368,823 to prosecute work on the Ouachita.

Let me say to the Senator from Connecticut in further answer to his statement that when Mr. ALEXANDER, of New York, became chairman of the Rivers and Harbors Committee we adopted the plan of annual river and harbor bills. We used to have them every three years. We tried to adopt, in a formal manner, some of our great river projects with the understanding that appropriations would be made for them every year. The exigencies of the Treasury seemed to be such that we could not very well in one bill take on $20,000,000 for the Missouri, $63,000,000 for the Ohio, and large sums for many other rivers. The size of the projects seemed to preclude that, but it would have been the wise plan, and I should like to see such a plan adopted and would gladly vote for it. I should like to pick out several of the most important of our great rivers and put them under the continuing contract.

Mr. BRANDEGEE. I was going to suggest that the former Senator from Ohio is no longer a member of the Committee on Commerce and the Senator from Louisiana is. If the Senator would like to see this done, I wonder whether he has made any terrific effort in committee to get it done.

Mr. RANSDELL. I have attempted for years, I will say to the Senator, to get such a policy as that adopted. I have talked with the different chairmen of the Rivers and Harbors Committee. The Senator knows that river and harbor bills originate in the House and how hard it is for us to make any very material changes in the bills that come from the House. I have never known just how this could be done; the condition of the Treasury, I say, has always prevented it, but I should like to see some such plan adopted.

Mr. President, I do not wish to take up more of the time of the Senate. I want again to call the attention of this body to the unwisdom of beginning a work like that on the Ouachita and carrying it on for many years and then abandoning it, and I certainly hope that no such policy in regard to this project will be adopted.

Mr. CLARKE of Arkansas. Mr. President, it is quite unfortunate that a matter of this magnitude must be debated and its fate determined when there are just a handful of Senators here; less than a dozen. In looking around I find while there are but few here they are among the most intelligent and high-minded Members of this body, and I shall therefore venture to make a few words of explanation of this item, because I think the Senators now here are a fair sample of the fairness and intelligence of the Senate.

As has been said this project was adopted in 1902. Congress has in the intervening years appropriated all the money that has been recommended for it. Just why that comparatively small project has not been completed is a matter that never has been explained, and upon its face it fairly discredits the officers in charge of the matter. It has been permitted to drag along without any official explanation. The only explanation I have received when personal application was made to at least one officer in charge was to the effect that the water was too high, that they could not work to the best advantage at times.

The matter went along as one of the recognized and adopted projects of the Government until the passage of a river and harbor act under circumstances fully known to every Senator here in which a provision was incorporated that directed the reexamination of certain projects and in doing so the following language was employed in this act, approved March 4, 1915:

SEC. 14. That the following projects now under improvement shall be reexamined, in accordance with the law for the original examination of rivers and harbors—

Bear that in mind—

with a view to obtaining reports whether the adopted projects shall be modified or the improvement abandoned.

The statement has been made here that the project was not adopted. It is declared to be adopted by the act of Congress of 1915.

Among the streams mentioned in the list which follows is the Ouachita River. The matter was referred to the district engineer, Capt. Harold C. Fiske, and he recommended that there was nothing the matter with the project except that Lock No. 9, which is in the vicinity of Camden, might be omitted for the present; but he recommended the continuation of the project, including every one of the locks provided for except No. 9, which he said might be postponed to a later day. That report went to St. Louis, to the division engineer's office, when it was considered by Col. Townsend, the same officer who made these recommendations in the Arkansas River case. He did not pretend to go into details nor to make any recommendation to Congress that was based upon specific objections to that particular route, but he did as he did in the Arkansas River case. He undertook to become the adviser of Congress. He did not survey the project or examine it as an original project would have been examined, but ventured to express an opinion that it ought to be abandoned until there had been a trial made of the lock and dam south of Monroe, La. Congress invited no such opinion from him. He was not expected to constitute himself the adviser of Congress in matters of policy. He was asked to state what the condition of these projects was with reference to whether or not they should be continued.

Now, take this particular project. It calls for nine locks. Six of them have been completed—four of them down the stream or to the east of Monroe, La., and two between Camden and Monroe. The two above Monroe are so related as to become absolute obstructions in the stream. They are not connected with anything. If a boat adapted to the natural capacity of the river were to undertake to pass down that river, it must be burdened with the task of going through those two locks, thus delaying the trip and adding to the expense of it without doing any possible good. Why that particular method of construction was adopted is one of the things, I think, which would be involved in a full explanation of the situation.

Capt. Fiske's recommendation was a very favorable one for the project. He is the local engineer who examined it in person and who has charge of it as part of his daily work. His report is comprehensive and is unconditionally favorable to the continuation of the work, except as to Lock No. 9, which is in the immediate vicinity of Camden, Ark. When his report went before Col. Townsend, in St. Louis, that officer said:

However, below Monroe the construction of the locks and dams has progressed to such an extent that they can not be abandoned without the works already built causing serious obstructions to navigation.

If the four locks below Monroe constitute serious obstructions to navigation, why would not the two between Camden and Monroe likewise constitute serious obstructions to navigation there?

As the district officer estimates that they can be completed for an additional appropriation of $234,000, and the commerce which does not consist of timber products is generally confined to the lower portions of the river, the completion of Dams Nos. 2 and 3 is recommended.

Well, the colonel is a very eminent man in his profession. He is a growing man. His importance in connection with these waterway problems is growing all the time; and he has come to a place now where he feels that his advice is worth something to the people, notwithstanding the fact that he may go outside of his professional obligations and his professional employment.

Another reason why there is no commerce between Camden and Monroe is that the river is obstructed with two unnecessary dams. If the others are never to be built, the two that are there now should be torn away.

Then comes the fifth clause of his schedule of recommendations, which reads as follows:

Above Monroe work has not been begun on three of the dams, whose estimated cost is $1,804,000, and as it is considered doubtful if any material shipment of sawed lumber would be brought about by the canalization of this portion of the river it is recommended—

What?

That their construction be deferred until the influence of the improvement below Monroe has been determined—

That is exactly the thing that Congress determined when it adopted the project; in other words, the proposition submitted to Congress was not merely to provide for the canalization of the river from Monroe out to the mouth. That is a mere stretch of it that does not reach into the most populous part of the region served by that river.

It is recommended that their construction be deferred until the influence of the improvement below Monroe has been determined, work being confined to operating the existing locks and dams and snagging.

I submit in fairness that Col. Townsend was not asked for any such opinion as that. The project was adopted to consist of nine locks. It was intended to provide river connection with Camden, Ark., which is a railroad center. To stop the project where it is now would be not only an absolute waste of money, but it would be a destruction of the utility of the entire project.

There is nothing new brought out in his report; there is nothing based upon personal information; it is altogether a question of opinion as to the policy that should be adopted. It is not a recommendation in the technical sense of the term, because he was not commanded to make such examination as he would make if the project had originally been sent to him.

Let us suppose that when a new project had been remitted to the engineers' office he had sent back a report consisting of nothing more than the statement contained in clause 5 of his communication. How little attention Congress would have paid to it is a matter within the knowledge of all of us. I do not think he ought to have any more right to destroy an existing project by the mere expression of an opinion than he would to install one that he happened to be favorable to. The reason of things, the facts upon which the improvement is based, are submitted to Congress, and whatever questions of wisdom or policy are involved Congress itself must pass upon.

To show that this Board of Engineers, when they came to make their estimates, had no particular confidence in that report, or that Congress would share his view about it, they recommended the $474,000, which this bill carries.

On page 282 of the report of the committee, in giving the estimate for the year, it is stated:

Amount recommended by department for improvement and maintenance, 1917, $499,000.

Now we are confronted with a case where a project which has been under way for 14 years has reached a point where, instead of being of any benefit to navigation, it is absolutely an obstruction. Then, upon the mere waving of an officer's hand, we are to abandon the whole thing and leave the river in a worse condition than that in which it was originally found. I do not believe Congress is going to do any such thing. The Committee on Rivers and Harbors of the House did not take that view; the House of Representatives did not take that view; the Committee on Commerce of the Senate did not take that view;

and I have every reason to believe that the Senate will not take that view.

Mr. KENYON. Mr. President, may I ask the Senator what the amount above the $234,000 and the $25,000 additional for open-channel work is to be used for?

Mr. CLARKE of Arkansas. I beg the Senator's pardon; I did not hear him.

Mr. KENYON. The engineers in their last report recommend an appropriation of $234,000 to complete Lock and Dam No. 3. They also recommend, in a previous report, in September, 1915, $25,000 for open-channel work. When you add those two together, what is the difference between the resulting sum and the amount named in the bill to be used for?

Mr. CLARKE of Arkansas. That is the amount necessary to complete the other two locks.

Mr. KENYON. The engineers do not recommend the completion of the other two locks.

Mr. CLARKE of Arkansas. Locks 5 and 7. Col. Townsend recommends the continuance of locks 2 and 3. The only difference between his comment and the actual report of Capt. Fiske is that Capt. Fiske says that they ought to go on with all four of them.

Mr. RANSDELL. Mr. President, may I interrupt the Senator to say that it is not meant to complete them all? It is stated on page 958 of the report of the Chief of Engineers:

Lock and dam construction, continuing construction of Locks and Dams Nos. 3 and 7—

It is not designed really to complete them.

Mr. KENYON. I have been basing my remarks on the report of last March, and it seems to me from the report dated March 31, 1916, that there was very clearly a recommendation for $234,000 to complete Lock and Dam No. 3. They had on hand enough money to complete No. 2. Does the Senator from Arkansas understand that there are other locks and dams which would be taken care of by this extra amount?

Mr. CLARKE of Arkansas. Yes; two additional locks provided for, namely, Locks 5 and 7. It is perfectly obvious that the river is in such condition that it can not be abandoned without a complete acknowledgment of the fact that the engineers in recommending the improvement in the first place were absolutely profligate and without any justification whatever.

It might be well to say just a word about the action of the engineers in continually reversing themselves in recent times in reference to the recommendations to Congress. It may be that they were too liberal in the beginning; it may be that they did not know what they were talking about when they recommended things that would not stand the test of practical experience; but, no matter what the cause may be, they are practically running amuck on all the projects which they have ever recommended in the South and West. No reason is given for it, except that the western rivers are no longer useful for commerce and that not one of them ought to be improved until the Mississippi River is actually used for commerce. There is a better boating stage of water on the Mississippi River now than it ever enjoyed in its past existence, but they point to it, and they say when the boats run up and down that river it will be time enough to talk about improving these other rivers. Why did they not say that to start with, and stop all this business? If they had brains enough to comprehend a broad system with its necessary connections, why did they not say so? They have gone along and expended millions of dollars in partially completed projects, and now, to cover their retreat and to justify a different condition that has come about under their very liberal system of making recommendations, they propose things to Congress which the conscience and intelligence of Congress will not permit it to do.

It may be that there never was any reason why this Ouachita project should be adopted. Many years were devoted to its examination, to a history of the country, the possible outcome, and to the sources of tonnage that might be produced. All that was gone into for years. It was a locality where river improvements were peculiarly adapted to the situation. The river runs east and west from about the center of the State of Arkansas. There were no railroads in the vicinity, and the river was the chief artery of commerce. It was patronized every day in the year. In the meantime several systems of railroads have crossed the river at right angles and divided it up into reaches, one terminating at Monroe, and another at Camden, Ark. There is not any reason now why that river should not be completed so as to make it a part of the transportation system that grows out of the splendid facilities of the railroad at Camden. The Ouachita River should be improved to that point.

I find in this bill many things that I would not put there, but Ouachita River is not one of them. This lock and dam system ought to be extended up to Camden. That is at the end of another reach of the river. Then, whether it should be carried west of there is another question. No money has been expended; no work has been done. It might be tested out with reference to those two units to determine whether or not the Government is called upon to make further expenditure of its money in that locality; but there can be no difference of opinion amongst people who will look the whole situation over as to the propriety of retaining the particular appropriation provided for in this bill.

Mr. KENYON. Mr. President——

Mr. RANSDELL. Mr. President, may I be allowed just one word before the Senator from Iowa begins? I understood the Senator to say that a considerable portion of the commerce on that river was sand and gravel. I have an itemized statement of the commerce, which appears on page 2699 of the report of the Chief of Engineers for December last. I will not attempt to read it, but I should like to put it in the RECORD. It consists of cotton, cotton seed, grain, provisions, hides, cattle, hogs, staves, lumber, timber rafted, timber barged, crossties, shingles, sand and gravel, lime and cement, hay, poultry, machinery, and miscellaneous, a total of 70,619 tons, valued at $3,074,465—a very considerable commerce on a river the improvement of which is not half finished.

Mr. KENYON. Mr. President, I have no quarrel with that statement. My suggestion was that staves, lumber, timber rafted, timber barged, and sand and gravel hauled about 4 miles, comprise 40,403 tons of the 70,619 tons. I do not care to take any more time; but I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER (Mr. CATRON in the chair). The question is on the amendment proposed by the Senator from Iowa [Mr. KENYON], on which he demands the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. MYERS (when his name was called). Announcing the same transfer of my pair as heretofore, I vote "nay."

Mr. SIMMONS (when his name was called). I have a general pair with the junior Senator from Minnesota [Mr. CLAPP]. He is absent, but, under an arrangement with him, I am permitted to vote on this item of the bill, and I vote "nay."

Mr. THOMAS (when his name was called). Announcing the same pair and transfer as heretofore, I vote "yea."

Mr. UNDERWOOD (when his name was called). I have a general pair with the junior Senator from Ohio [Mr. HARDING]. In his absence, I withhold my vote.

Mr. WILLIAMS (when his name was called). I have a general pair with the senior Senator from Pennsylvania [Mr. PENROSE]. I am informed that, if he were present, he would vote for the bill and with the committee upon all of the committee amendments. I therefore feel myself absolved from the pair when I vote the same way as the Senator from Pennsylvania would vote if present. I ask that this announcement may stand for the remainder of the day without my repeating it. On this amendment I vote "nay."

The roll call was concluded.

Mr. UNDERWOOD. I transfer my pair with the Senator from Ohio [Mr. HARDING] to the Senator from Indiana [Mr. KERN] and vote "nay."

Mr. MYERS (after voting in the negative). The Senator from Maryland [Mr. LEE], to whom I transferred my pair, having entered the Chamber, I now transfer my pair with the Senator from Connecticut [Mr. MCLEAN] to the Senator from Nevada [Mr. PITTMAN] and will allow my vote to stand.

Mr. STONE. I inquire if the Senator from Wyoming [Mr. CLARK] has voted?

The PRESIDING OFFICER. He has not.

Mr. STONE. I transfer my pair with that Senator to the Senator from California [Mr. PHELAN] and vote "nay."

Mr. DU PONT. I have a general pair with the junior Senator from Kentucky [Mr. BECKHAM]. As he is absent from the Chamber, I will withhold my vote.

Mr. SMITH of Maryland. I have a general pair with the Senator from Vermont [Mr. DILLINGHAM]. In his absence I withhold my vote.

The roll call resulted—yeas 13, nays 34, as follows:

YEAS—13.

Borah	La Follette	Smoot	Warren
Cummins	Lane	Sutherland	
Gore	Norris	Thomas	
Kenyon	Pomerene	Thompson	

NAYS—34.

Bankhead	Clarke, Ark.	Jones	Lodge
Brandegee	Culberson	Lea, Tenn.	Martin, Va.
Broussard	Fletcher	Lee, Md.	Myers
Chamberlain	Hughes	Lippitt	Nelson

Oliver	Shafroth	Smith, Ga.	Underwood
Overman	Sheppard	Smith, Mich.	Vardaman
Poindexter	Shields	Stone	Williams
Ransdell	Simmons	Swanson	
Reed	Smith, Ariz.	Taggart	

NOT VOTING—49.

Ashurst	Fall	Lewis	Sherman
Beckham	Gallinger	McCumber	Smith, Md.
Brady	Goff	McLean	Smith, S. C.
Bryan	Gronna	Martine, N. J.	Sterling
Burleigh	Harding	Newlands	Tillman
Catron	Hardwick	O'Gorman	Townsend
Chilton	Hitchcock	Owen	Wadsworth
Clapp	Hollis	Page	Walsh
Clark, Wyo.	Husting	Penrose	Weeks
Colt	James	Phelan	Works
Curtis	Johnson, Me.	Pittman	
Dillingham	Johnson, S. Dak.	Robinson	
du Pont	Kern	Saulsbury	

The PRESIDING OFFICER. On the question of the amendment offered by the Senator from Iowa [Mr. KENYON] the yeas are 13, the nays are 34. The following Senators are present but have not voted: The Senator from Maryland [Mr. SMITH], the Senator from Delaware [Mr. DU PONT], and the Senator from New Mexico [Mr. CATRON]. The amendment is rejected.

Mr. KENYON. On page 12, line 6, I move to strike out "$1,000,000" and insert "$200,000." This is in the item for the improvement of the inland waterway from Norfolk to Beaufort Inlet. I only want to say about this project that it seems to be the heart or one link of a great intercoastal waterway from Boston down to the neighborhood of Mexico City. It is a proposition involving altogether an expenditure of about $5,400,000. Under the apportionment provision of the act of the last session of Congress $400,000 was allotted to this project. The Government has been making excavations with its own plant, and it has also been having excavations made by contractors. It has always seemed to me that this is one of the most indefensible propositions in the whole bill. There were originally, as I understand, two canals. The Government purchased this bankrupt canal for $500,000.

The commerce, as appears from the Engineer's report, on page 2329, of volume 2, amounted in the year 1914 to 229,047 tons. Of that logs constituted 48,900 tons; lumber, 34,178 tons; piling, 44,000 tons; wood, 29,252 tons; ties, 1,347 tons; staves, 3,369 tons; and one other item of that nature of 2,045 tons, making a total of 163,091 tons of that class of traffic. Deducting that from the total traffic, 229,047 tons, leaves 65,956 tons as about the traffic through this waterway of materials that need extra work on the waterway in order that they may be carried.

The Engineer's report, volume 1, page 486, shows that—

> The average cost of the work with Government plant was $0.043 per cubic yard, place measurement. The average contract price was $0.0752 per cubic yard, place measurement.

So the contract price was nearly double the price it has cost the Government to do the work itself. I read from the views of the minority of the House Committee on Rivers and Harbors on page 12, as follows:

> Col. Taylor stated to the committee that private contractors charge nearly double the cost for Government dredging. He further stated that $200,000 would keep the Government dredging crews busy during the year.

My proposition is to strike out "$1,000,000" and insert "$200,000," which is the amount Col. Taylor says can be used by the Government in doing the work itself for the coming year. I am not going to move to strike out the whole item, because I realize that such a motion would be absolutely impossible of success. I assume also that the motion I now make will probably be unsuccessful, but there ought to be more of a chance to cut this appropriation to $200,000, which is sufficient to carry on the work of the Government, and not leave it at $1,000,000, a large part of the money to be expended under private contract.

Mr. SIMMONS. Mr. President, this is, in my judgment, one of the most important items in this bill, and one of the most meritorious items. It is an item in which, in a local way, one-third of the people of my State are interested. In a general way all of the people of my State are interested; but it is not a local or State matter alone, it is an interstate matter, and every great commercial port, from Boston to Jacksonville, Fla., is deeply interested in this particular item.

I do not think there is anywhere in this country, outside of the Great Lakes, a finer system of waterways than are to be found in the eastern Carolinas, lying between Norfolk and Beaufort. This system comprises a considerable number of connecting sounds. The surface area of all of those sounds constitutes a body of water of something over 3,100 square miles, and emptying into this magnificent system of connecting sounds, skirting the Atlantic Ocean but separated from it by a narrow sand bank, there are 10 or 12 rivers. Some of these rivers are very large streams. The largest one, I believe, is the Neuse River, which runs by the town in which I live. That stream is 350 miles in length. It flows by the capital of the State. It flows by the important cities of Goldsboro, Kinston, and the town in which I live, Newbern. Where I live the river is about a mile and a half wide. That is about 35 miles from its mouth. It stretches out until it is 7 or 8 miles in width.

The Roanoke River, a famous river in this country, rising in the State of Virginia and flowing through North Carolina, also empties into these sounds; the Tar, the Pamlico, the Pasquotank, the Chowan, and, as I say, a number of other important rivers.

This whole system of waterways comprises 2,500 miles of navigable water. I wish I could have the attention of the Senator from Iowa to this statement. This whole system of inland waterways, covering an area of 3,100 square miles, to say nothing about the tributary rivers, comprises 2,500 miles of navigable waterways; and until recently that system was landlocked, except through two privately owned canals that I shall hereafter mention, and could be used only for the purpose of accommodating purely local traffic.

In 1907 Congress appropriated $550,000 to connect the southern end of this system of sounds with Beaufort Inlet. That canal has been constructed. It is now completed. It is 10 feet in depth and 90 feet in width. That canal has afforded the people along those rivers and along those sounds an outlet to the ocean south of Hatteras; but that is not the direction in which their commerce goes, and the outlet, while of local value, is chiefly valuable as a connecting link in the complete inland route from Norfolk to Beaufort. There was no outlet whatever northward except two privately owned, shallow and narrow canals, one of them about 9 feet in depth, and the other 8 feet in depth. It was through those canals, and only through those canals, until this outlet to Beaufort was completed, that the commerce of this 2,500 miles of navigable inland water could reach the ocean. It is through those two canals, and only through those two canals to-day, that the commerce of this magnificent inland system of waterways can reach the ocean to the north.

In 1912, carrying out the project for an inland waterway from Beaufort to Norfolk, the southern end of that route having been completed by the digging of a canal costing $550,000, Congress decided to purchase one of these privately owned canals, and to deepen it and widen it so as to make it of sufficient size to accommodate economical vessels of commerce, especially barges. Up to that time the commerce going through these canals had annually paid in tolls something over $100,000, and last year the commerce that went through those canals paid in tolls something over $100,000.

The Senator from Iowa says that there is very little commerce upon the canal which the Government has purchased and is now improving and constructing. As the Senator says, there was last year only 229,000 tons, as against a very much smaller tonnage in 1912. The commerce has really very much increased in that canal since 1912. In 1912 there were only 90,000 tons going through that canal. With the slight improvement that the Government has made, in 1914, 229,000 tons went through that canal; but the Senator overlooks the fact that during these years, 1913 and 1914, the Government was actively engaged in work upon this canal, the Government dredge at one section of the canal and the privately owned dredges at another section of the canal, thus obstructing it and making it difficult of passage. The Senator further overlooks the fact, as stated in the reports, that the governing depth of that canal was only about 8 feet, while it was 9 feet in the other canal.

The commerce that went through the other canal, the toll canal, in 1914, amounted to 347,000 tons. Every dollar's worth of that would have gone through the Government-owned canal if it had been in a state of completion, or in a state sufficiently complete to accommodate it adequately and safely.

Mr. KENYON. Mr. President, I should like to ask the Senator if it is not true that there was a great deal more commerce in the canals 20 years ago than there is now?

Mr. SIMMONS. In those two canals?

Mr. KENYON. Yes.

Mr. SIMMONS. Twenty years ago?

Mr. KENYON. Twenty years ago.

Mr. SIMMONS. I am not able to answer the Senator with respect to that inquiry.

Mr. KENYON. I think that is the fact.

Mr. SIMMONS. But I can say to the Senator that I know as a matter of personal knowledge that the commerce upon those inland waterways has enormously increased, and the boat traffic upon those inland waterways has enormously increased in recent years. Now, the fact is—and I am intimately ac-

quainted with these facts—that only a part of the commerce of those waters has ever gone through either one of these canals, and that is because they were toll canals. In recent years a railroad has been constructed from Norfolk, Va., to Beaufort Harbor, running through many of the important towns lying along the streams that empty into these sounds, and I know as a fact that boats are loaded upon these rivers and taken to these large towns and the freight transshipped by rail to Norfolk, traveling a distance over the water that would be nearly as great as if they had gone directly to Norfolk, the northern market of that section of the country. I think I can say to the Senator that with a free canal, the local traffic through the canal will be doubled.

Mr. KENYON. But, as I have the figures, in 1909 the Report of the Chief of Engineers shows that through the Dismal Swamp Canal there went something like 400,000 tons, and through the other some 200,000 tons. I do not quote the figures exactly, but about that.

Mr. SIMMONS. The tonnage through both of the canals in 1914 was 603,000 tons.

Mr. KENYON. How does the Senator account for the tremendous decrease in the commerce since that time?

Mr. SIMMONS. I have just stated to the Senator that there has recently been constructed a railroad that runs from Norfolk to Beaufort, and the commerce of this country goes to Norfolk. That is the northern market for it; and that road being completed, instead of carrying it to Norfolk by boat, they take it to these towns and there deliver to the railroads. But I said to the Senator that the haul they have to make to reach these towns in some instances is nearly as great as the haul to Norfolk by boat, and they would go to Norfolk directly by boat if it were not for the fact that when they get to the strip of land through which these canals are cut they have to pay tolls.

The engineers have made it perfectly plain, and others who have written to me upon the subject—large mill owners, large transporters of commodities—have written me that they can not use this canal in its present condition, although free, and they prefer to pay tolls and do pay tolls on the other canal rather than to take the risk of long delays and of the difficulties of operating vessels through a narrow canal where there are two sections of it under improvement and obstructed by dredges and other boats incident to that kind of work.

Mr. HARDWICK. Mr. President, if the Senator from North Carolina will permit me, I should like to say to the Senator from Iowa that many of the most prominent business men in Savannah, Ga., are wiring me that their freight rates, present and future, and the arrangements that they are making to transport heavy freights from the eastern ports down to Savannah, and even ports below that, are entirely dependent upon this project, and that it is an absolute necessity to carry on this project and to carry it to its completion if they are to get reasonable freight rates on that kind of products.

Mr. SIMMONS. The Senator is right. I have a great many telegrams on the subject myself, some of which I will read into the RECORD. All the commercial cities along our eastern coast are deeply interested in this inland route; and why are they deeply interested in it?

Let me call the attention of the Senator from Iowa to the fact that the most profitable and economical way of transporting or carrying freight known to man is by the barge system. There is a tremendous barge commerce north of Chesapeake Bay all the way up the Atlantic coast. There is, however, no barge commerce between the northern Atlantic ports and the southern Atlantic ports below Norfolk, because when they reach Norfolk and start down the coast right abreast of this system of sound waters that I have described they encounter the dangerous capes of Hatteras and Lookout, recognized as the graveyards of the Atlantic coast, one of them being admittedly the most dangerous point upon the Atlantic coast, making it necessary for vessels to go out to sea probably 50 or 75 miles from shore in order to avoid its dangers.

On account of that I say that there is not now any traffic from the North Atlantic ports to the South Atlantic ports by barges, the cheapest method of transportation, and the one now largely used for coastwise trade of our northern seaboard.

This route, when finished, will constitute an inland route from Chesapeake Bay to Beaufort Inlet, passing inland both Cape Hatteras and Cape Lookout, and making barge transportation between the North and the South Atlantic seaports perfectly feasible. The only coastwise trade between the northern ports and the southern ports south of Norfolk is now carried on in large steamers. It has to be carried on in large steamers. It can be carried on neither in barges nor in small steamers. Of course, the Senator will readily see that there will be a vast difference if we can introduce this barge method of transportation between the south and the northern ports of our seaboard, not only because it is cheaper but because the rates of insurance are much less.

Mr. President, the Congressman from the first congressional district of North Carolina, Mr. SMALL, who is a member of the Committee on Rivers and Harbors of the House, caused the clerk of that committee to make a thorough investigation with a view to ascertaining what was the joint commerce carried over these two canals, and he reported the items. He reported that the joint commerce carried over those two canals in 1914 was of a value of $603,000. Now, I want to call the attention of the Senator from Iowa to the fact—and I want him to listen to this—that $603,000 is no index of what the commerce through those canals, even in their present condition, would be in a normal year. If the Senator will examine all the rivers in North Carolina and in the South, he will find that in 1914 there was a tremendous dropping off in the commerce of those rivers; but there was no greater falling off in the water commerce in 1914 in the South than there was in the railroad commerce in that section of the South during that year. It is a well-known fact that nearly every railroad running through the South, especially the through lines, had a most remarkable decline in its tonnage and in its passenger traffic during 1914. Why? Simply because the South happens to be, unfortunately, largely a one-crop country. We raise chiefly cotton, and we rely chiefly upon cotton. In 1914 the price of cotton went down to 5 and 6 cents a pound; and while, of course, the amount of cotton produced was approximately the same, the result of the decline in price was a general demoralization of the whole business of that section, resulting in the most tremendous contraction in the commerce of that section that we have ever known and I hope ever will know.

But, Mr. President, I am not here insisting upon this inland waterway system as a purely local institution. It did not have its inception as a local institution, although our people bore the burden—and it was a burden—of $100,000 a year tolls in order to get the products along this 2,500 miles of navigable water to the sea for years and years. It has risen above the dignity of a local matter and it has become a part of a nation-wide system.

The commerce I have been talking about up to this time was the local commerce. It was purely local up to 1915. In 1915 a barge traffic from Philadelphia and from Baltimore and from Norfolk—chiefly from Philadelphia, however—began in that section. How did that begin? I have a letter here from Mr. Frye, written to Congressman SMALL, which I will put into the RECORD. I will not read it. I believe he is the treasurer or the president of the Southern Transportation Co., of Philadelphia. He went down to the ports south of Beaufort and entered into arrangements with the shippers of that section to put on a line of barges to be operated through this inland canal. He put them on and started to work. That was in 1915.

Here is a telegram that I have from him, received yesterday. I had seen in the papers and I had read in Mr. Frye's letter the statement that he had made that arrangement with the shippers south of Beaufort Inlet, and that he had started in 1915 this barge line, but that he expected at the time he started it that in a short time this Chesapeake & Albemarle Canal would be so far completed that his barges could use it.

Mr. SMALL, the Congressman from the first district, where these waters chiefly lie, got into communication with Mr. Frye yesterday and told him I wished to know how many barges he was operating now. In reply to Mr. SMALL's talk with him over the telephone, Mr. Frye sent me last night this telegram from Philadelphia, Pa.:

F. M. SIMMONS,
United States Senate, Washington, D. C.:

Please give your active support to the item of appropriation of $1,000,000 toward the further construction of the Norfolk to Beaufort Inlet waterway as now carried in the river and harbor bill. Of our fleet of nearly 100 barges, we are now operating about 45 barges to North Carolina points, using the Lake Drummond Canal.

This is the Dismal Swamp Canal—

Paying a high rate of toll, our boats not being able to carry full cargoes on account of the limited draft of 9 feet of water. We understand the million-dollar appropriation will complete the Government free waterway between Norfolk and Albemarle Sound this year, giving early relief to the North Carolina shippers at much lower rates of freight, and, consequently, a larger volume of business to us. We can not now use the Government canal, and the North Carolina shippers can not get any benefit whatever from it until this link, Norfolk to Albemarle Sound, is fully completed.

Mr. President, I wish to put in the RECORD the whole of the letter to which I have heretofore referred, written by Mr. Frye, for the Southern Transportation Co., to Hon. JOHN H. SMALL,

House of Representatives, on March 27, 1915. I want to read just a little portion of it:

We are now very much handicapped in carrying commerce between the North and the South, as we are obliged to pay canal tolls to the Lake Drummond Canal & Water Co. for all of the cargoes passing through the canal, and all of our barges are limited to a 9-foot draft in passing through the canal. We have persistently tried to develop this barge traffic under the adverse conditions which we must at present encounter in using the inland waterway Norfolk to Beaufort, eliminating Hatteras, only because we have been anticipating the early completion of the Norfolk and Beaufort waterway. We do not receive a fair profit—

And so forth. I will not read that part of it.

We are now operating a fleet of 95 barges, 15 steam tugs, and more than half of the barges are equipped for sea service. We wish to state emphatically that unless we can see early relief in the way of the completion of the Norfolk-Beaufort Inlet waterway, enabling our barges to use the free waterway with a draft of 11 or 12 feet we must withdraw our boats from the South Atlantic trade.

Mr. President, bear in mind that the distance between Norfolk and Beaufort is 186 miles by this inland route. It is over 300 miles around the coast. There is already a 10-foot depth from Beaufort Inlet to the southern terminus of the canal the Government is now improving and for which this appropriation is desired. That is to say, for a distance of one hundred and thirty-odd miles on this route there is now a 10-foot canal; and if this link is finished—and the engineers say it can be finished for a million dollars—we will then have a free waterway, without the expenditure of any more money whatsoever, of 10 feet depth from Norfolk to Beaufort.

Of course to make it 12-foot depth throughout will require an additional amount. As soon as this link is completed it will cost only $1,000,000, and we will have 10 feet of free waterway from Norfolk to Beaufort, making it possible to carry on a barge and other commerce, avoiding the dangers of Hatteras.

Now, Mr. President, there is one other thing I wish to say, and then I will conclude. I have thought it proper, and I believe now it was proper, for me to make a somewhat detailed explanation of this matter. The Senator says it will cost less for the Government to do this work. In making the estimate of what it costs the Government, they do not include anything either for interest or depreciation of plant and equipment. It is just as if some one presented a contractor with a dredge and its equipment and all its subsidiary and auxiliary tubs and boats. If the Senator will take the statement of the engineers—and I have it and I will put it in the RECORD if you desire—he will find that were all these items of cost included the average cost to the Government of dredging would be about 8 cents per cubic yard. That is the general average cost, calculated upon the same basis of cost as is calculated by private contractors.

But the Senator wishes to reduce this appropriation to $200,000 because that is the amount which would be required to operate the Government plant. He does not wish any part of this work done by private contract. If the Senator has his way about this matter it will take about 10 or 12 years to finish up the work, as against three years by the usual method. I thought the Senator had always been an enemy of dribbling appropriations. I thought the Senator had stood here on the floor and championed the making of appropriations sufficiently large to complete meritorious works as quickly as possible in order that the public might get the benefit of the work speedily. Here is a work of national importance, and yet the Senator wants that work to be spread out over about 10 years, when it might be completed in two or two and a half years.

Mr. KENYON. I should like to ask the Senator if an appropriation of $1,000,000 will not complete the work?

Mr. SIMMONS. Yes; $1,000,000 will complete the work on this link and immediately give a free waterway 10 feet deep between, connecting Chesapeake Bay and Beaufort Inlet.

Mr. RANSDELL. Mr. President, I wish to submit a few remarks on this subject in a general way. I wish to call attention to the fact that there seems to be the same kind of opposition to the improvement of this intercoastal canal that there is to the improvement of the rivers of this country *which are the competitors of railroads*. I do not know whether or not there is anything peculiar in that, but the same kind of opposition has developed to this intercoastal canal. I have been up and down the proposed intercoastal canal in person and I was very much impressed by it.

I wish to call attention to a report of the Committee on the Merchant Marine and Fisheries of the House on the investigation of shipping combinations (under House resolution 587, 62d Cong., 2d sess., vol. 4, p. 483), in which it is stated that—

In the entire Atlantic and Gulf coastwise trade (exclusive of all inland waterway and purely local carriers) 28 lines, representing 235 steamers, of 549,821 gross tons, furnish the line service. Of this number of lines 10 are railroad owned and represent 128 steamers, of 340,084 gross tons, or 54.5 per cent of the total number of steamers in the trade and 61.9 per cent of the tonnage. Seven lines, operating 71 steamers, of 175,971 gross tons, in the coastwise trade, belong to the Eastern Steamship Corporation and the Atlantic, Gulf & West Indies Steamship Lines, and represent in the aggregate nearly 30 per cent of the total number of steamers and 32 per cent of the tonnage. Combining the two interests, it appears that the railroads and two Atlantic-coast shipping consolidations control nearly 85 per cent of the steamers and nearly 94 per cent of the gross tonnage engaged in the entire Atlantic and Gulf coastwise trade. Attention may be called again to the fact that very few of the routes between any two ports on the entire Atlantic and Gulf coasts are served by more than one line.

Mr. President, this report shows that a very considerable percentage of the coastwise vessels plying on the Atlantic coast are railroad owned or practically railroad controlled.

This canal, if it is constructed, Mr. President and Senators, will come into competition with railroads on the land and with railroad ships on the sea. It will have railroads on the east and railroads on the west, and who will be the beneficiary if construction on this intercoastal canal is stopped? Will it be the American people who are going to get the benefit of cheaper water transportation? Will it be the farmers on the little streams along the Atlantic coast, for there are many of them where small boats can run and get into that canal, or will it be the railroads who own these Atlantic coastwise boats, which, if there be no intercoastal canal, would carry the commerce on their own rail and water lines? It is unnecessary for me to answer that question.

I wish to read just a very brief extract from a speech delivered by a disinterested party—ex-Chief of Engineers William H. Bixby—before the National Rivers and Harbors Congress, December 9 to December 11, 1914. He is one of the ablest men in the United States. I think his original home was somewhere in New England. He certainly does not belong to the southern intercoastal canal section of the Union. This is what he says, speaking of the merits of waterways in general:

The waterway is a great developer of the country. When I was on duty on the south Atlantic coast from 1884 to 1891 there were some 12 or 15 little rivers down there that were being improved, and some of the newspapers attempted to ridicule many of these rivers by calling them creeks.

We hear that same old song now; these rivers are called creeks to this day by the critics of this bill both in and out of Congress. Gen. Bixby continues:

We took out their snags and sunken trees so that the boats could ascend these little rivers freely in springtime when the farmers wanted to bring fertilizer up into the country, and in the fall when the farmers wanted to get their goods to market.

I suppose some of those rivers did not have more than 8 or 10 inches of water in the summer season. I have no doubt that was the minimum on some of them, but Gen. Bixby said they furnished good boating in spring when the farmers wanted to carry out their fertilizers and in the fall when they wished to carry their produce to market. He continues:

At the time we started that improvement there had been very little farming and town development in that part of the country. When the waterway improvement was ended there it was found that for every thousand dollars that Uncle Sam had expended on these streams there was a new development of $20,000 worth of goods annually carried on those streams for every $1,000 once spent upon them.

That looks like a pretty good investment, Mr. President.

The new commerce thus developed was commerce between that country and northern coast cities, extending also to Milwaukee, Chicago, Duluth, St. Louis, and even to towns in Iowa—

The State of the Senator who is trying so hard to kill this bill—

and all these cities and towns and the surrounding country were benefited by the opening up of those little waterways. The annual profits on this new tonnage of manufactured and transported articles was 100 per cent of the total cost of the waterway improvements.

That is no waterway booster, Mr. President. It is the ex-Chief of Engineers, who has no interest to misrepresent things, even if you assume, as I think some of the speakers have assumed, that Senators here are endeavoring to misrepresent facts in favor of their own projects. Let me repeat:

The annual profits on this new tonnage of manufactured and transported articles was 100 per cent of the total cost of the waterway improvements. Wherever the United States can make 100 per cent a year for 10 years by taking hold of such improvements, as was secured in this particular case, I hold that we are idiots if we do not find some way of getting the money to carry them on.

The same is true about a great many of the other projects.

Just a word now about the waterway that runs out into the State of the Senator from Iowa. I wish to read very briefly a paragraph from the recent report of the Board of Engineers for Rivers and Harbors on their reexamination of the Missouri River. It speaks of the establishment of a boat line between Kansas City and St. Louis. Then it goes on:

10. The company has taken steps to remedy certain conditions that have contributed largely to the decline of river transportation. It has secured the establishment of terminal facilities at Kansas City and at East St. Louis, having rail connection at both places and mechanical devices for the transfer of freight. It has entered into joint traffic

arrangements for the interchange of freight with connecting carriers, both rail and water, and is now handling commerce on through bills of lading.

Yes; Mr. President and Senators, that boat line on the Missouri River can give shippers a through bill of lading from all that western country to any point on the Atlantic seaboard, or anywhere in the United States. Listen to the reduction in rail rates. I will come to that in a moment:

It receives and delivers goods in cars on shippers' sidings, paying switching charges within certain limits, transferring to and from the boat, assuming carriers' risk in lieu of marine insurance, and transporting between terminals, all at a rate of 80 per cent of the corresponding rail rate.

That reduction affects the enormous commerce between the Mississippi River and the western section of this country. There is a colossal commerce in the vicinity both of St. Louis and Kansas City. If boats are carrying freight at 80 per cent of the railroad rate on the Missouri River in its present undeveloped condition, where there are snags, sand bars, and many obstructions to impede commerce, what will that river do when it is completed under the existing project? Yet, I understand that that river is to be taken out of the bill if votes enough can be had to do it.

Again let me ask, Mr. President and Senators, who will be the beneficiary if we cease to improve the Missouri River? Will it be the people of Missouri, Kansas, Nebraska, Iowa, and all that splended western section who now get the benefit of having their freights carried at 20 per cent less than the railroad rate, or will it be the railroads that will immediately put up their rates 20 per cent higher if we cease to improve the Missouri?

Mr. SMOOT. Mr. President, I have listened to the remarks made by the Senator from Louisiana [Mr. RANSDELL] and the Senator from North Carolina [Mr. SIMMONS] upon this project in hopes that I could learn something that would justify me in voting for the million dollars provided for the project in the bill. But I have not heard anything that would change my view in the matter, nor has there been anything said that would change in any way the report that has been made by the engineer upon this project, and upon that report I base my opinion.

I have no desire to strike from the bill a single cent of an appropriation where upon the showing of the engineers it is necessary and would be of profit to the commerce of the country in which the river or canal is located. The Senator from Louisiana in this particular case refers to railroad competition, and says that on account of improvements upon inland waterways railroad rates are kept down, and even though the rates have been reduced, the water rate is at present 20 per cent less than the rail rate. If that is true and are the actual conditions existing, I can not for the life of me see why it is that commerce upon this canal has decreased so rapidly in the last 20 years.

I notice in a statement which was made by Senator Burton in the Senate debates found in the RECORD of September 3, 1914, on page 16015, he said:

Twenty-four years ago, when your channels were shallow, when your tolls were imposed, the traffic on these two routes—

The Beaufort and the Dismal Swamp—

was more than four times as much as it was in 1912. It is flying to a refuge which is not safe, it is leaning on a broken reed, to say that it is because a railroad was built there or some boats were bought off. If the traffic was shifted to the railroads, it was because that was the more convenient and economical way of carrying the freight; and no removal of tolls on canals, no enlargement from 9 or 10 feet to 12 feet in depth, no expenditure of $5,400,000, is ever going to bring back what has been lost to those channels. It is a chimera, it is a waste of public moneys, to attempt it.

This project, Mr. President, calls for $5,400,000. In fact, I may say that it is a part of an inland waterway scheme and we can not tell how much the cost will be. We may spend the $5,400,000 and then find ourselves with a project only half completed.

The Senator from North Carolina tried to make it appear that it is wasteful to expend the amount of money required for a project extended over a long term of years. I grant that, Mr. President. That is one thing in the river and harbor bills we pass which is most objectionable to me. I would very much prefer to see the rivers and harbors of our country improved and completed the same as they are in Germany, and the expenditure required not spread over a long series of years. Our practice is to spend a little this year, then an interval of one year in which nothing is done, and then the following year a little more is appropriated, and many times the money so appropriated is required to place the river in the same shape it was the year before, and such appropriations are absolutely wasted. It is a waste of money and it is not a proper way to improve our rivers and harbors. I believe it would be better for this country to adopt projects that we absolutely know will increase the commerce of the country and complete them just as soon as money will do it rather than to try to spread the money that we appropriate all over the country with little result to any project.

I notice in regard to this project that the commerce for 1914 was 229,047 tons. But included in that tonnage we find: Logs, 46,900; lumber, 34,176 tons; piling, 44,000 tons; staves, 3,369 tons; ties, 1,252 tons; wood, 31,297 tons; or a total of 162,996 tons of floating commerce. Apart from these there were only 66,061 tons of commerce.

Mr. SIMMONS. If the Senator will pardon me, during that year the Government-owned canal was obstructed by the construction work going on there, and it could only be used for that kind of commerce. The other kinds of commerce went chiefly by the parallel tolls canal.

Mr. SMOOT. I do not want to take the time of the Senate to go back into the years preceding 1914, but I want to say to the Senator that there would be very little difference in the amount of commerce upon the river in 1913. I think in that year it was a little more than in 1914.

Mr. SIMMONS. I did not catch the point of the Senator's statement.

Mr. SMOOT. I accept the last statement of the Senator as being true; but I am speaking of the project as a whole and not for any one year. The amount of commerce that is carried has never justified the amount of money expended upon the project.

I wish to say to the Senator, if ex-Senator Burton was correct in his statement, that during the year 1912 the commerce was only one-fourth of what it was 20 years before on this very project.

Mr. SIMMONS. Certainly the Senator did not hear the statement I made. Ex-Senator Burton referred to a period when that section had to rely very largely upon water transportation. Since then railroads have been constructed.

Mr. SMOOT. I recognize why the commerce has decreased. I recognize it is caused by railroad competition, and we go right along appropriating large sums of money for maintaining projects, for deepening a channel, and for widening the same, and we know before we appropriate the money that it is impossible to increase the commerce. We must recognize that railroads are going to take the business as long as our laws are the same as they are to-day. The railroads, before regulation, drove commerce from the rivers in Germany; the railroads can and do it in every country until the law regulates what class of commerce shall be carried by water and what class shall be carried by rail.

Mr. OVERMAN. That will apply to every other proposition in the bill.

Mr. SMOOT. Certainly. I called the attention of the Senate to that before. I do not criticize this item particularly upon that basis any more than I criticize the other items I have spoken of.

Mr. BRANDEGEE. The Senator, then, will vote, I assume, against any river improvement anywhere in the country.

Mr. SMOOT. No. The Senator is wrong in assuming that. The Senator from Louisiana quoted from Brig. Gen. William H. Bixby as being the highest authority upon the improvement of our rivers and harbors. Let me quote what he said in his address delivered before the National Rivers and Harbors Congress, Washington, D. C., December 7, 1911, and I approve of what Gen. Bixby says in this statement:

If the United States shall establish a good standard line of water communication between all the States along the coast and through the Great Lakes and up the interstate rivers, it would seem as if it would be nothing more than fair for each individual State to assume to itself the responsibility of the extension of this general system to all connecting waterways and smaller tributaries so far as they may lie within the individual State.

Mr. President, if we confined ourselves to that class of improvement of harbors and rivers I would not object, but we go away beyond that.

Mr. BRANDEGEE. I have myself some doubt as to the merit of the policy of the internal-waterway development. The country has been heretofore committed to it. If what the Senator from Utah says is correct, to wit, that after you develop these waterways the railroads are still going to keep the business, it is perfectly evident that there are many projects where every dollar put in is utterly thrown away. Is that not so, I ask the Senator from Utah?

Mr. SMOOT. Of course it is so, and particularly on what may be called the smaller streams in a State; but I will say to the Senator that, taking rivers that reach the ocean, rivers that are navigable, there is an advantage to the Government of the United States in improving those and keeping them open to navigation, because of the fact that the United States Government itself may want to use those rivers in case of war.

Mr. BRANDEGEE. I know that; but I mean from the standpoint of reaching the object desired by the Senator from Nevada [Mr. NEWLANDS], for instance, which he so eloquently

described in his speech on his project the other day on the floor here, to wit, that these inland streams will teem with commerce and that they will get their share of the business, even competing against the railroads. That is the theory on which I supposed we were appropriating for the development of these rivers. The Senator from Utah, if I understand his position, thinks that is a waste of money; that these internal waterways can never be made to compete with the railroad systems.

Mr. SMOOT. That is my belief, Mr. President; but I want to say, in behalf of the Senator from Nevada, that is not his position, as I understand it. The Senator from Nevada, however, is now here and can explain his own position.

Mr. NEWLANDS. Mr. President, if the Senator from Utah will permit me, I will say that I regard the moneys that are now being spent upon the small streams under the present system as practically wasted.

Mr. SMOOT. That is what I understood the Senator to say.

Mr. NEWLANDS. But I favor a system that will involve a study and investigation of all the waterways of the country, including not only the navigable portions, but the source streams, the tributaries, with a view of artificializing them all so as to make them useful for commerce. If that scheme is carried out, and if a plan and system such as has been carried out in France, in Germany, in Austria, and in Russia is pursued we shall be amazed at the extent to which these small streams can be utilized for commerce itself; but unless we determine to enter upon this plan of operation in a big and comprehensive way I regard the present system of detached work here and there, without a general plan, as an absolute waste of money.

Mr. SMOOT. That is what I understood the Senator to say in his speech yesterday.

Mr. President, I am not going to say very much more upon this project, and shall then leave it for the Senate to decide. I take it for granted, though, in reading the report of the engineers that they almost looked with a microscope to find some reason why the Government of the United States should continue to spend money upon this project. I find in House Document 591, Sixty-second Congress, second session, on page 27, a dissertation on the military value of this 12-foot canal along the sands. Col. Black, the present Chief of Engineers, on page 27, says:

> For the movement of troops water transportation affords many advantages over rail. * * * To move a division of troops it will take 12 ships of 20-foot draft or 22 ships of 16-foot draft.

Well, Mr. President, I wondered how it was possible to have ships with a draft of 20 feet to move troops, or even ships with a draft of 16 feet, in a canal that is only 12 feet deep. I can not for the life of me see why that should be considered as a reason for appropriating money for its improvement.

Mr. GALLINGER. The ships would have to be on rollers, of course.

Mr. SMOOT. There is no proposition to deepen this canal to 20 feet nor even to 16 feet. Why the question of transporting troops in ships of a draft of 20 feet or 16 feet is considered, I can not conceive.

Mr. SIMMONS. Mr. President, will the Senator from Utah permit me to interrupt him?

Mr. SMOOT. Certainly.

Mr. SIMMONS. In the final report signed by Black, Abbot, Sanford, Patrick, and Raymond, they say:

> The military importance of such a waterway likewise has been the subject of numerous reports—

That is, a 12-foot project—

> It will furnish a ready means for the transport of troops and supplies along a portion of the seacoast and a sheltered interior route for torpedo boats, destroyers, and submarines.

Of course, such a waterway would have to be over 12 feet in depth to accommodate larger vessels.

Mr. SMOOT. Not only that, but it seems to me that it would be out of the question to try to transfer troops over this canal, because they could be moved very much more quickly over the railroads, and besides there is no particular place on the canal for them to land. I will say to the Senator that from the report it looks to me as though this is a far-fetched proposition, trying to make it appear that this improvement would be of any advantage to the Government of the United States for the transportation of troops.

Mr. SIMMONS. I want to ask the Senator this question: Does his argument, made a little while ago in favor of the railroads against waterways, apply to coastwise trade, or does it apply to interior trade?

Mr. SMOOT. It does not apply to the coastwise trade, Mr. President, because of the fact that seagoing ships, long hauls, cheaper maintenance, and operation are involved in our coastwise trade.

Mr. SIMMONS. Then the Senator from Utah, regarding this as a purely local project, has overlooked the fact that the main reason for the project is that it will furnish a link in our coastwise trade, which will afford protection against Hatteras and Lookout. Will the Senator let me read just a little paragraph or two from the report of Gen. Black and these four other eminent Army officers about this matter?

Mr. SMOOT. I have no objection to the Senator doing that, Mr. President.

Mr. SIMMONS. This report says:

> While the opening of the Norfolk-Beaufort link in the inland waterway would no doubt result in a very substantial saving in freight charges, just what would be the amount of such saving it is not so easy to predict. The board has examined with care all the statements heretofore submitted by commercial bodies and others and has checked the figures given therein as thoroughly as possible. After a study of these statistics the 1902 board—

That was the first board. This project has not been examined by one engineer, but it has always been examined by boards of engineers—

> The 1902 board estimated that the annual saving in freight charges on "through" freight which would be carried between the termini of this portion of the waterway would probably not be less than $600,000. In view of the possible development of free inland waterways north and south of the Norfolk-Beaufort section, the board believes this estimate of the probable saving to be a conservative one.

A little further on it is stated:

> It has been shown above that the existing commerce, although handicapped by the small depth in the canals south of Norfolk, actually pays in tolls to the owners of these canals no less than $100,000 annually. Making free the waterway between Norfolk and Albemarle Sound will result in saving this sum at once, while if this free waterway is given the dimensions recommended herein, there seems to be no doubt that there will be a substantial increase in this commerce and that the actual saving may be, at the least calculation, twice the amount now paid in tolls, or some $200,000.
>
> An annual saving of this sum capitalized at 3 per cent would amount to over $6,000,000, about twice the estimated cost of constructing that portion of the waterway which will connect the Elizabeth River at Norfolk with Albemarle Sound and considerably more than the estimated cost of the entire waterway from Norfolk to Beaufort.
>
> Add to this—

That is the local—

> almost certain annual saving any saving which might be effected on through freight which would follow this route in preference to taking the outside passage around the Capes and also any saving on the local traffic which would be developed along the waterway south of Albemarle Sound, and it seems certain that the resulting total benefit to commerce will be enough to warrant the statement that as a mere business proposition the construction of the inland waterway from Norfolk to Beaufort is fully justified.

Mr. SMOOT. Mr. President, perhaps I had better answer that quotation by referring to another positive estimate made by the engineers on another project as to the amount of commerce that could be developed if certain improvements were made. I refer to the Rehoboth waterway of Delaware. In House Document No. 823, Sixtieth Congress, first session, on page 5, Gen. Smith reports upon this project. In the same document, on page 9, Maj. Flagler, an Army engineer, estimated that $4,500,000 in commerce would follow the canal, and that "the amount would be doubled within 10 years"; in other words, this is the major's conclusion.

> I believe the above statements to be fairly accurate in quantities, but somewhat inflated in values, which are throughout the highest market rate. I think it safe to say that the region affected by the Lewes Canal has a present commerce, import and export, of $9,000,000 per year; that half of this would follow the canal, and that the amount would be doubled within 10 years.

Yet, Mr. President, what do we find? We find that after the lapse of seven years from the date of that report the commerce has reached the enormous quantity of 4,928 tons, with a value of $67,122, or less than 2 per cent of the estimate.

Mr. THOMAS. Is the project completed?

Mr. SMOOT. The project is completed so far as the money that was appropriated could bring its completion about.

Mr. RANSDELL. Will not the Senator be kind enough to state when that project was completed? I am under the impression that it is not completed yet, though I am not positive. That, however, is my impression.

Mr. SMOOT. I will say to the Senator that they are spending money on the project now for maintenance. I will also say to the Senator that it is hard to say when any project will ever be completed, because of the fact that the appropriations continue year after year. It is almost the same as a provision which, when it once appears in an appropriation bill, never gets out.

Mr. RANSDELL. If I am correctly informed——

Mr. THOMAS rose.

Mr. RANSDELL. Will the Senator permit me to conclude?

Mr. THOMAS. Certainly.

Mr. RANSDELL. If I am correctly informed, there is a railroad bridge on that canal beyond which boats can not pass. They can come up to the bridge, but never have been able to

get past it. Hence the canal has never been used except up to this bridge. Perhaps I am confused on that, but that is my recollection. If the Senator from Delaware is here I hope he will correct me if I am wrong; but I do not think I am.

Mr. SMOOT. There is no such thing as that in the report; and I will say to the Senator from Louisiana that this is the first time I ever heard of it. I really believe the Senator is confused on the project.

Mr. RANSDELL. Perhaps I am mistaken, but I will look it up and see. I think there is a bridge there, beyond which the canal can not be used.

Mr. SMOOT. That may be true——

Mr. THOMAS. Mr. President, I should like to ask the Senator from Utah how much more it will be necessary to appropriate for the completion of that canal and entirely wipe out this small, insignificant remaining tonnage?

Mr. SMOOT. Mr. President, I profess to understand mathematics fairly well, but really the question of the Senator from Colorado is one greater than I can solve either by arithmetic, algebra, or geometry.

Mr. THOMAS. Does not the Senator think there would be the inevitable consequence of continued appropriations, if one may judge by results attending previous ones?

Mr. SMOOT. Of course, if we are to judge by the commerce which is carried on rivers mentioned in the bill, not only this project but 50 others, the more money we appropriate for them the less commerce there is upon them. Therefore, Mr. President, whenever there is a project of this kind, I believe it is the part of wisdom to stop appropriating public money for what may be termed improvements upon it. The argument has been made several times to-day, now that we have started upon a project and have spent a million dollars or $500,000 upon it, it would be a total waste of money if we did not continue to spend more money on it. It has always been a rule of mine in life that where I have made a bad investment I will take my first loss and quit rather than to send good money after bad. I think that principle ought to apply in a great many of the rivers for which we keep on appropriating and which have a commerce which is growing less and less every year.

Furthermore, if there was any advantage to the Government in any way in improving these creeks there would be some justification for continuing the appropriation, but the Government of the United States will never have a boat within hundreds of miles of many of these creeks at any time in its history, and there is no advantage to commerce in any way nor to the Government of the United States in continuing the waste of money on them. To keep appropriating money for projects of this kind, it seems to me, is almost criminal; it is certainly a waste of public funds, and I certainly hope that the amendment offered by the Senator from Iowa will prevail.

Mr. KENYON. Mr. President, on that amendment I ask for the yeas and nays, if there is to be no further discussion upon it.

Mr. LODGE. I desire to ask the Senator from Utah, before he takes his seat, where the troops that are to be carried over this improved waterway will start from and where they will go?

Mr. SMOOT. In the engineers' report there is no definite statement as to that; but I referred to the fact that I did not know where they would start from or where they would land.

Mr. LODGE. Where do they begin?

Mr. SMOOT. Well, they would have to be brought on a railroad from some point, transferred to tugs or light boats, and landed somewhere—the Lord only knows where. I can not conceive of any such argument as that ever being made to bolster up a project of any kind.

Mr. KENYON. I ask for the yeas and nays on the amendment.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. HARDWICK (when his name was called). I transfer my pair with the junior Senator from Kansas [Mr. CURTIS] to the Senator from New Jersey [Mr. HUGHES] and vote "nay."

Mr. SMITH of Maryland (when his name was called). I have a general pair with the Senator from Vermont [Mr. DILLINGHAM], but I have his permission to vote on this bill, and I vote "nay."

Mr. THOMAS (when his name was called). I transfer my pair with the senior Senator from North Dakota [Mr. MCCUMBER] to the junior Senator from South Dakota [Mr. JOHNSON] and vote "yea."

Mr. UNDERWOOD. I transfer my pair with the junior Senator from Ohio [Mr. HARDING] to the Senator from South Carolina [Mr. SMITH] and vote "nay."

The roll call was concluded.

Mr. MYERS. I transfer my pair with the Senator from Connecticut [Mr. MCLEAN] to the Senator from Nevada [Mr. PITTMAN] and vote "nay."

Mr. CLARK of Wyoming (after having voted in the affirmative). I inquire if the senior Senator from Missouri [Mr. STONE] has voted?

The VICE PRESIDENT. He has not.

Mr. CLARK of Wyoming. I have a general pair with that Senator, which I will transfer to the Senator from Vermont [Mr. PAGE] and allow my vote to stand.

Mr. CATRON. I inquire if the Senator from Oklahoma [Mr. OWEN] has voted?

The VICE PRESIDENT. He has not.

Mr. CATRON. I have a general pair with that Senator, and therefore withhold my vote.

Mr. SMITH of Georgia (after having voted in the negative). I am informed that the senior Senator from Massachusetts [Mr. LODGE] has not voted. I transfer my pair with him to the junior Senator from California [Mr. PHELAN] and will let my vote stand.

The result was announced—yeas 20, nays 35, as follows:

YEAS—20.

Borah	Gore	Norris	Taggart
Brandegee	Husting	Pomerene	Thomas
Clark, Wyo.	Kenyon	Shafroth	Thompson
Cummins	La Follette	Smoot	Walsh
Gallinger	Lane	Sutherland	Warren

NAYS—35.

Ashurst	Hardwick	Nelson	Smith, Ariz.
Bankhead	Jones	Oliver	Smith, Ga.
Broussard	Lea, Tenn.	Overman	Smith, Md.
Chamberlain	Lee, Md.	Poindexter	Smith, Mich.
Chilton	Lewis	Ransdell	Sterling
Clarke, Ark.	Lippitt	Reed	Swanson
Culberson	Martin, Va.	Sheppard	Underwood
Fall	Martine, N. J.	Shields	Vardaman
Fletcher	Myers	Simmons	

NOT VOTING—41.

Beckham	Gronna	McLean	Smith, S. C.
Brady	Harding	Newlands	Stone
Bryan	Hitchcock	O'Gorman	Tillman
Burleigh	Hollis	Owen	Townsend
Catron	Hughes	Page	Wadsworth
Clapp	James	Penrose	Weeks
Colt	Johnson, Me.	Phelan	Williams
Curtis	Johnson, S. Dak.	Pittman	Works
Dillingham	Kern	Robinson	
du Pont	Lodge	Saulsbury	
Goff	McCumber	Sherman	

So. Mr. KENYON's amendment was rejected.

Mr. HUSTING. Mr. President, I stated yesterday that I would move to recommit this bill to the Committee on Commerce, with instructions. I was asked to defer that motion until it could be ascertained what shape the bill would assume. It appears now that the motions to strike out are defeated, and consequently there is every indication that the bill as now recommended by the committee will be the bill upon which the Senate will vote. For that reason, I consider this a proper time to make the motion to recommit the bill.

Mr. BRANDEGEE. Mr. President——

Mr. SHAFROTH. Mr. President, there are other amendments to be offered to the bill. I have one which I think ought to be adopted, and if adopted it seems to me Senators ought to vote for the bill. That is a provision that 20 per cent shall be contributed by each one of these localities in order to have the appropriation take effect; and I should like to have that voted upon before the Senator moves a substitute for the bill.

Mr. HUSTING. With all deference to the Senator, I feel that this is a good time to offer the motion to recommit.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. Does the Senator from Wisconsin yield to the Senator from Connecticut?

Mr. HUSTING. I do.

Mr. BRANDEGEE. I simply wanted to state to the Senator that this morning I offered an amendment, and then withdrew it to allow the House text to be voted upon; and I expect to offer that amendment. I do not wish to make any suggestions to the Senator about when he shall make his motion, that is his affair; but if the Senator cared to defer his motion until a vote had been taken upon my amendment, I wanted to let him know that I was going to offer it. I can offer it just as well after his motion has been voted on, however, if he prefers to make his motion now.

SEVERAL SENATORS. Suppose the bill is recommitted.

Mr. BRANDEGEE. If it is recommitted, I do not care anything further about the bill.

Mr. RANSDELL. Let us have a vote on it now.

Mr. HUSTING. I shall submit the motion now, and leave it to the Senate, at the proper time, to vote on it.

Mr. BRANDEGEE. I did not understand what the Senator said.

Mr. HUSTING. I say, I will submit the motion now, and leave it to the Senate, if it desires, to vote upon it.

Mr. VARDAMAN. I move to lay the motion to recommit on the table.

Mr. SHAFROTH. I hope the Senator will not ask for a vote until these other amendments are disposed of.

Mr. VARDAMAN. Mr. President, I move to lay the motion to recommit the bill on the table.

The VICE PRESIDENT. The Senator from Wisconsin offers a motion which will be stated by the Secretary.

The SECRETARY. That the pending bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain works on rivers and harbors, and for other purposes, be recommitted to the Committee on Commerce, with instructions to report back a bill appropriating not to exceed the sum of $20,000,000.

The VICE PRESIDENT. The Senator from Mississippi [Mr. VARDAMAN] has moved to lay this motion on the table.

Mr. CLARKE of Arkansas. Mr. President, I should like to address an inquiry to the Senator from Mississippi. We have been proceeding here along a line that permitted reasonable debate on all propositions presented. If any Senator desires to debate the motion to recommit, I think the motion to lay it on the table ought to be withdrawn.

Mr. VARDAMAN. If any Senator wants to debate it, I shall very cheerfully withdraw my motion. My understanding was that no Senator desired to debate it.

Mr. CLARKE of Arkansas. Let us have a vote directly on the motion to recommit.

Mr. THOMAS. Mr. President, I desire to be heard on the motion to recommit.

Mr. VARDAMAN. I withdraw the motion to lay it on the table, then.

AMENDMENT REQUIRING 20 PER CENT CONTRIBUTION.

Mr. SHAFROTH. Mr. President, I want to say to the Senator from Wisconsin that I believe the amendment which I propose to offer has a virtue in it that ought to determine to a large extent whether or not this bill should pass. This amendment provides for adding to the bill a new section, to read as follows:

That each of the appropriations herein made shall become available only in the event States, counties, cities, or individuals shall pay into the Treasury as part of the same 20 per cent of the amount thereof: *Provided, however,* That the provisions of this section shall not apply to those items requiring contributions from other sources.

Mr. President, we have had a discussion of this bill extending over many days. I have found rising upon one side Senators of the highest integrity, asserting that the project under discussion is an unworthy one and should not be approved. Yet, when called upon, the Senator from the State where the improvement is to be made emphatically states that it is one of the best provisions in the entire bill. We who are not members of the committee find it impossible to go into these matters from the standpoint of full information by reading the evidence taken with relation to these items; consequently it seems to me that we ought to put each project to a test as to whether or not these enterprises are meritorious. If we provide that there shall be a contribution in behalf of each of these improvements to the extent of 20 per cent of the amount appropriated before the appropriation shall become available, that will work a determination as to whether there is any "pork-barrel" appropriations in this bill. The acid test is when the pocketbooks of individuals are touched. If they respond, the appropriation is meritorious. If not, it is generally unworthy.

Mr. MARTINE of New Jersey and Mr. CHAMBERLAIN addressed the Chair.

Mr. SHAFROTH. If they are willing to subscribe, then it seems to me my judgment as to the character of the improvement should be set aside, because I believe that when men will go into their own pockets, or counties will go into their own treasuries, or cities will go into their own treasuries for the purpose of putting up a substantial amount for the project, it means that there is merit in the enterprise, and consequently it ought to be adopted.

Mr. CHAMBERLAIN. Mr. President, may I interrupt the Senator?

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Oregon?

Mr. SHAFROTH. I yield to the Senator.

Mr. CHAMBERLAIN. I want to ask the Senator if he will not go a step further and refund to the States that have paid dollar for dollar for all Government appropriations the amount that they have contributed?

Mr. SHAFROTH. No; I will not.

Mr. CHAMBERLAIN. Oregon has paid dollar for dollar for nearly every improvement the Government has made.

Mr. SHAFROTH. Yes; that is true, and that is unfortunate; but the difficulty is that unless you have some provision of this kind which puts the enterprises upon a different basis it is not fair——

Mr. MARTINE of New Jersey. Mr. President——

Mr. HARDWICK. Mr. President, may I make a suggestion to the Senator?

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Georgia?

Mr. SHAFROTH. I do.

Mr. HARDWICK. There is a good deal of merit, I think, in the Senator's suggestion in a general way, but how in the world is he going to work it out? How wide is the territory on each side of a river that would be called on to contribute? Where does the line of contribution end and where does it begin? The Senator would have to work that out; and it is a pretty difficult question, it seems to me.

Mr. SHAFROTH. Oh, Mr. President, that is no difficulty whatever, because the amendment does not limit contributions to owners of land on the borders of the river. There is no provision as to who shall contribute. People who are interested may contribute. Cities that are interested may contribute. Individuals may contribute. It is not to be an assessment upon the land abutting on the stream. Nothing of that kind is intended by this amendment; but it is provided that those people who say that an enterprise is a good one and is going to be of some value to the people of the United States, and particularly of advantage to their section, must raise a certain percentage of this money in order to get the Government to expend this large appropriation on the enterprise.

Mr. President, we are doing that directly in the case of the good-roads measure. Nobody has suggested that the United States Government should build these roads altogether out of its own treasury. We say that we will build the roads, provided the States, the counties, and the individuals combined contribute at least an equal amount. It might be that it would be proper even to increase the amount specified in this amendment from 20 to 50 per cent; but it seems to me that there ought to be an effort to make communities, people, and cities specially benefited contribute something out of their own moneys, thereby showing their good faith in the assertion that these improvements that are specified here are worthy objects.

Mr. BRANDEGEE, Mr. SMITH of Michigan, and Mr. MARTINE of New Jersey addressed the Chair.

The VICE PRESIDENT. Does the Senator from Colorado yield to the Senator from Connecticut?

Mr. SHAFROTH. I yield to the Senator from Michigan.

Mr. SMITH of Michigan. Mr. President, I should like to ask the Senator from Colorado who would pay this 20 per cent in a situation such as this:

The St. Clair River, which runs along the Canadian and the Michigan line, with a commerce of $885,000,000 a year, asks for an additional channel because the present channel can not accommodate the traffic. It is dangerous. There is an estimate of $83,000 in this bill for that extra channel. It is a channel that is as important to Minnesota, Wisconsin, and the Northwest as it is to Michigan, and I was almost going to say that it is as important to Canada as it is to us. On what theory would that 20 per cent be levied? Certainly not against the city of Port Huron, along whose water front this channel must be built. The Senator is running into great difficulty with his proposition, and I am afraid has not given his usual care and thought to the suggestion which he makes.

Mr. SHAFROTH. I see no difficulty in that case—none whatever.

Mr. SMITH of Michigan. Where would the Senator put it?

Mr. SHAFROTH. I will explain to the Senator just where I think it ought to be put. This is an open contribution. The benefit is to the ships that go through there, and these ship companies can contribute to that measly $83,000. The persons who make the shipments also can contribute with relation to it. Wherever there is a benefit there ought to be a contribution; and the measly sum of $83,000 would not be wanting long in contributions by persons who are interested in getting the channel there if it is a meritorious enterprise.

Mr. SMITH of Michigan. Then the Senator would pass the hat among all the shippers and the shipowners to pay for great national improvements, as vital to the consumers as well as the

producers and the carriers, who in most instances are entirely unrelated to this waterway?

Mr. SHAFROTH. No; I would not. I would simply say: "Gentlemen, you can get this if you will contribute 20 per cent; but if you do not believe in it yourselves to the extent of making a contribution to that extent, why, then, we will decline to make the appropriation."

Mr. SMITH of Michigan. Yes; but the whole country is interested in that waterway.

Mr. SHAFROTH. That is the reason why it should be so much easier to do it. Where you have such great resources, such great capital, it ought to be a very easy matter.

Mr. SMITH of Michigan. The entire country is interested in it. Is the Government to plead poverty and lack of interest in a great improvement of that character in order to establish the virtue of the project?

Mr. SHAFROTH. No, sir; it is not pleading poverty. It is just testing the question as to whether or not you people believe that these enterprises which you are undertaking are worthy; and it makes the acid test, as it were, when it comes to the question of going down into the pockets of the companies, individuals, or persons who are benefited by the commerce.

Mr. MARTINE of New Jersey and Mr. WILLIAMS addressed the Chair.

Mr. SMITH of Michigan. There is one more question I should like to ask the Senator. Take the case of the improvement of the East River in New York: Upon whom would the 20 per cent be levied, when it appears here that the Navy and the Government are to be benefited more than any individual or municipality? An injury to one battleship passing from the Brooklyn Navy Yard through the East River between Governors Island and the Battery would cost the Government more money than that entire improvement would involve. The test proposed by the Senator from Colorado would be very difficult of execution and is inequitable when applied to many of these projects. The two instances which I have cited are not exceptional; there are many others in the bill of similar character, and unless the Senate proposes to abandon all river and harbor improvements this amendment ought not to be adopted. There are undoubtedly many appropriations which could with propriety be based upon local contributions for a fair share of the cost, but in the very nature of things such a rule can not be applied indiscriminately.

Mr. SHAFROTH. The Government would contribute 80 per cent of it for that benefit, and consequently there would be no trouble. The Government would be paying an undue proportion even then; but you can not fail to get a contribution of that kind from the great city of New York and by other persons who may be interested. It seems to me that it is a very easy way of testing the question as to whether or not these enterprises are meritorious.

Mr. WILLIAMS. Mr. President——

Mr. GALLINGER. Mr. President, I rise to a point of order.

Mr. SHAFROTH. I yield to the Senator from Mississippi.

Mr. GALLINGER. I rise to a question of order.

The VICE PRESIDENT. The Senator from New Hampshire will state the question of order.

Mr. GALLINGER. There is so much confusion that we can not understand what is going on, and I think the Senator from New Jersey [Mr. MARTINE] ought to be granted permission to explain this matter.

Mr. WILLIAMS. Am I recognized?

Mr. SHAFROTH. I yield to the Senator from New Jersey.

Mr. WILLIAMS. I thought the Senator yielded to me.

Mr. SHAFROTH. I will yield to the Senator from Mississippi in a minute. The Senator from New Jersey rose first.

Mr. MARTINE of New Jersey. Mr. President, I want to hold up to the Senator from Colorado and to the Senate of the United States the glorious example of the little Commonwealth of New Jersey. We are asking for some little appropriations in this bill for some great rivers and for some other streams that are only dignified by the name of creeks. The New Jersey Legislature have passed a resolution insisting that they would ask for no appropriations for the rivers or harbors of New Jersey unless the cities and the contiguous territory should pay at least 50 per cent, so we go you 30 per cent better than your 20 per cent.

Mr. SHAFROTH. I am very glad of the example of New Jersey.

Mr. MARTINE of New Jersey. We believe that the rivers and harbors are one of the great blessings of the great Jehovah to our country, and we believe it is our duty and the duty of the Government of the United States to maintain and preserve and improve these things, and as an evidence of the faith that is in us we have passed the resolution that I have mentioned.

Mr. SHAFROTH. The legislature of the Senator's State has simply recognized the fact that that State gets a direct benefit, and for that reason his people are willing to contribute their share.

Mr. MARTINE of New Jersey. We get not only a direct benefit, but we feel that we get an indirect benefit. The city of Elizabeth, if you choose, or Jersey City, or Newark, or Paterson, or Passaic, may get a direct benefit; but the hills of Sussex, clear up and far beyond, reap the splendid prosperity and the glorious hope that we all do in the prosperity of our little Commonwealth.

Mr. WILLIAMS. Now, Mr. President——

Mr. SHAFROTH. I yield to the Senator from Mississippi.

Mr. WILLIAMS. Mr. President, I am not so much interested in the proposition that the locale should pay 20 per cent as I am interested in the question as to who shall pay back the surplusage over 20 per cent that the locale has already contributed. Upon the Mississippi River we have contributed about $4 from the beginning of the improvements down to now for every dollar that the United States Government has contributed. I have paid a great deal of that in taxes myself in the Yazoo Delta. Does the Senator's proposition involve paying back the difference between the 80 per cent that we paid and the 20 per cent the Senator thinks we ought to have paid?

Mr. SHAFROTH. Oh, no; but we think the rule ought to be different. Instead of relying, as heretofore, upon voluntary contributions, it ought to be a condition as to whether or not you can avail yourselves of the provisions of the bill; and it seems to me that that will constitute a test as to whether or not it is a meritorious measure.

Mr. WILLIAMS. Mr. President, if we are to be subjected to an acid test, and that is to be a test of equity, anybody coming into a court of equity must bring equity with him; and if the Senator makes the demand that the locality must pay 20 per cent, then those localities that have paid 80 per cent ought to have 60 per cent refunded to them.

Mr. SHAFROTH. No; because they did it voluntarily, without any imposition or requirement upon the part of the United States Government; and the Senator knows very well that whenever taxes are paid without protest you can never recover them back.

Mr. NEWLANDS. Mr. President——

Mr. WILLIAMS. They did not pay it voluntarily. They paid it because, if they had not paid, they would have been destroyed by the great national river. It was just as much compulsion as anything in the world ever was.

Mr. SHAFROTH. There is no compulsion upon the part of the United States Government. Consequently there is no moral obligation upon the part of the United States Government to refund that money.

Mr. NEWLANDS. Mr. President——

Mr. WILLIAMS. There may or may not be. I do not think there is any moral obligation upon the part of the locality to pay 20 per cent; but if there be, then there is also the reciprocal moral obligation upon the part of the United States to reduce it to 20 per cent, and keep it down to that figure.

So far as I am concerned, if you adopt the 20 per cent proposition the people of the Mississippi Valley will be delighted, provided you make the United States pay back the 80 per cent while you are making our people pay the 20 per cent.

Mr. NEWLANDS. Mr. President——

Mr. SHAFROTH. Let me answer the statement of the Senator from Mississippi. He thinks that there ought to be a refund upon the part of the Government of the United States. This contribution which has been made by the States bordering upon the Mississippi Valley has been a voluntary contribution upon their part, prompted no doubt by benefits received, and consequently there is no obligation whatever upon the part of the Government to make a refund. But here comes a line of action to be applied to all of the appropriations; and by reason of its being applied to all of the appropriations you will find that it not only cuts the amount which the United States Government must appropriate under this act to the extent of $8,000,000 or $10,000,000, but it will also be a guarantee that every project that is entered upon as the result of putting up that 20 per cent will be a genuine enterprise.

Mr. WILLIAMS. Mr. President, for the sake of the argument I am willing to "let the dead past bury its dead" if the Senator will put his proposition in such shape as that all appropriations for the Mississippi River shall be paid 80 per cent by the United States Government and 20 per cent by the local authorities for all time hereafter to come.

Mr. SHAFROTH. No, Mr. President; that is not involved. Each individual appropriation will arise, and the question will

naturally present itself to every Senator here, "Is this a meritorious enterprise that is presented?"

Mr. NEWLANDS. Mr. President, will the Senator let me make a suggestion?

Mr. SHAFROTH. Yes, sir; I will let the Senator make a suggestion, although it breaks the continuity of my argument.

Mr. NEWLANDS. The suggestion is this: That the project to which the Senator from Mississippi refers is one for the reclamation of swamp lands through the construction of levees, and not a proposition relating to the development of commerce; and that in such a case it is obvious that the entire cost of the reclamation ought to be levied upon the lands, as it is with reference to the arid lands of the West, where every dollar expended is recovered from the land itself; and that this case does not come within the class of projects for the promotion and development of commerce.

Mr. WILLIAMS. Mr. President——

Mr. SHAFROTH. I yield to the Senator from Mississippi.

Mr. WILLIAMS. First, all the engineers agree that levees improve navigation; secondly—just one moment more. I hate to disturb the Senator from Colorado; but does the Senator from Nevada really intend to convey to the country the idea that the West is paying the irrigation tax and that anybody with common sense ever expects the Government to get it back?

Mr. NEWLANDS. Why, of course, we are paying it, and we expect to pay it back, and the law requires the payment back of every dollar.

Mr. WILLIAMS. Oh, yes; but how much has been paid back? Moreover, you want the balance of us to pay in advance.

Mr. NEWLANDS. Then I maintain, Mr. President, that commerce on the lower Mississippi would be better off without levee building than with it.

Mr. WILLIAMS. In that opinion you differ with the Mississippi River Commission and all the distinguished engineers of America. Now, Mr. President——

The VICE PRESIDENT. Does the Senator from Colorado further yield to the Senator from Mississippi?

Mr. SHAFROTH. I yield to the Senator from Mississippi.

Mr. WILLIAMS. If the Senator from Nevada will agree, now, that the locality shall be subjected to even 20 per cent of the cost of irrigation in the West, now, beforehand—not ultimately and doubtfully and certainly never to pay—I imagine that nearly everybody from the Mississippi Valley who has ever voted for an irrigation project would be ready to close with his proposition. Nobody except the Senator from Nevada really expects that there ever will be paid back into the United States Treasury the immense amount of money that the United State Government has devoted to irrigation in the West; and if it ever comes to the point where the law is sought to be enforced there will be a bill here, possibly offered by him, releasing settlers from their payments. I think the Senator from Nevada knows that as well as I, or better than I. But if it is agreed that in all these irrigation projects in the West the community must put up 20 per cent before the United States Government advances the balance of it, that will be a new doctrine sounding from the West, and will be very welcome to a great many of us who want to "get in on the ground floor."

I voted for these irrigation projects in the West. I have not voted for them upon the narrow ground that is now being presented, both by me and by the Senator from Colorado and by the Senator from Nevada, but I have voted for them upon the broad national ground that under modern circumstances of civilization there is a degree of collectivism that must be carried through in order to give efficient Government to all parts of the Union. That collectivism applies in a tenfold degree to the great national river, or as Calhoun, strictest of strict constructionist, called it, the great American inland sea. I dare say that in the very next bill carrying an irrigation project, if it is proposed that no money shall be spent by the United States Government until after the locality has put up 20 per cent, the Senator from Nevada will be found opposing it.

Mr. NEWLANDS. Mr. President——

Mr. SHAFROTH. Mr. President, the Senator has said that I will have to look up a precedent somewhere else. I want to call his attention to the fact that there is precedent after precedent in this very bill, and I will read him one:

Provided, That no part of the latter amount shall be expended until the city of Dallas or other local interests shall have contributed the sum of $50,000 toward the improvement.

There is a direct requirement of contribution upon the part of the city of Dallas before a single dollar of the appropriation which is provided here can be obtained. Not only that, but there are 8 or 10 similar provisions in this bill. One of them provides that they shall pay into the Treasury a certain large amount, and, unless they do so, that the improvement shall not be started. Eight or nine provisions make that condition; and in my amendment, after requiring this 20 per cent contribution, I make this proviso:

Provided, however, That the provisions of this section shall not apply to those items requiring contributions from other sources.

Mr. LEWIS. Mr. President——

Mr. SHAFROTH. I yield to the Senator from Illinois.

Mr. LEWIS. I should like to ask the Senator from Colorado if his amendment contemplates that each State through which an enterprise goes shall pay 20 per cent? Or does the Senator assume that in the case of enterprises passing through four or five States 20 per cent shall be gathered from all the States through which the enterprise goes?

Mr. SHAFROTH. Oh, Mr. President, I provide that the contribution shall be made, and we are not particular as to where it comes from. They will find the way. The city of Chicago has done this very same thing.

Mr. LEWIS. Then, I call the attention of the Senator, if he will permit me, to the fact that as the amendment now stands the Missouri River or the Mississippi River passing through five States, each paying 20 per cent, all would pay 100 per cent, and there would not be a cent then left for the Federal Government to pay at all.

Mr. SHAFROTH. Oh, no; that does not apply. It is a question of 20 per cent of the entire appropriation made. Consequently, if there are 10 States, it is only 2 per cent, as a matter of fact, against each State, if it is levied in that way.

Mr. LEWIS. I wanted to catch the Senator's idea as to how he expected to apply his amendment.

Mr. SHAFROTH. Mr. President, we can not help but realize the fact that there are appropriations made in every——

Mr. OLIVER. Mr. President, a parliamentary inquiry.

The VICE PRESIDENT. The Senator from Pennsylvania will state it.

Mr. OLIVER. What is the proposition before the Senate at the present time?

The VICE PRESIDENT. The motion of the Senator from Wisconsin [Mr. HUSTING] to recommit the bill to the Committee on Commerce.

Mr. OLIVER. Then I make the point of order that this discussion at this time is out of order.

Mr. THOMAS. Mr. President, I understood——

The VICE PRESIDENT. The point of order will have to be overruled. The Senate of the United States rarely discusses the question.

Mr. CLARKE of Arkansas. Mr. President, if the Senator from Colorado will yield to me at this time, I ask that the bill may be temporarily laid aside, in order that we may arrange for a recess. I understand that it is the purpose to hold an executive session at 5 o'clock, and that hour has about arrived.

Mr. SHAFROTH. I yield for that purpose.

The VICE PRESIDENT. Without objection, the bill will be temporarily laid aside.

EXECUTIVE SESSION.

Mr. STONE. Mr. President, I move that the Senate proceed to the consideration of executive business.

The motion was agreed to, and the Senate proceeded to the consideration of executive business. After five minutes spent in executive session the doors were reopened.

PETITIONS AND MEMORIALS.

Mr. GALLINGER presented the petition of A. H. Overman, of Westmoreland Depot, N. H., praying for the enactment of legislation to provide for the grading of grain, which was ordered to lie on the table.

Mr. SMITH of Michigan presented a memorial of the ministers of the Lutheran South Michigan Conference, held at Detroit, Mich., remonstrating against the severance of diplomatic relations between the United States and Germany, which was referred to the Committee on Foreign Relations.

He also presented a memorial of sundry citizens of Flint, Mich., remonstrating against the enactment of legislation to limit the freedom of the press, which was referred to the Committee on Post Offices and Post Roads.

He also presented a memorial of sundry citizens of Flint, Mich., remonstrating against the enactment of legislation for compulsory Sunday observance in the District of Columbia, which was ordered to lie on the table.

He also presented petitions of sundry citizens of Michigan, praying for national prohibition, which were referred to the Committee on the Judiciary.

BILLS AND JOINT RESOLUTION INTRODUCED.

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. FLETCHER:

A bill (S. 6153) for the relief of Frank A. Kopp; to the Committee on Claims.

By Mr. CHILTON:

A bill (S. 6154) for the relief of Dr. Charles Lee Baker; to the Committee on Military Affairs.

By Mr. BRANDEGEE:

A bill (S. 6155) granting an increase of pension to Alma I. Austin (with accompanying papers);

A bill (S. 6156) granting an increase of pension to Annie Jain Bump (with accompanying papers);

A bill (S. 6157) granting an increase of pension to Mary E. Button (with accompanying papers);

A bill (S. 6158) granting an increase of pension to Catherine L. Commerford (with accompanying papers);

A bill (S. 6159) granting an increase of pension to Anna M. De La Forgue (with accompanying papers);

A bill (S. 6160) granting an increase of pension to Ellen Hopper (with accompanying papers);

A bill (S. 6161) granting an increase of pension to Annie K. Lamphere (with accompanying papers);

A bill (S. 6162) granting a pension to Hannah C. Leary (with accompanying papers);

A bill (S. 6163) granting a pension to Mary J. Lynch (with accompanying papers);

A bill (S. 6164) granting an increase of pension to Mary A. Marble (with accompanying papers);

A bill (S. 6165) granting an increase of pension to Charles H. Minson (with accompanying papers);

A bill (S. 6166) granting a pension to Annie L. Kelly Nichols (with accompanying papers);

A bill (S. 6167) granting an increase of pension to Caroline M. Osborn (with accompanying papers);

A bill (S. 6168) granting an increase of pension to Sarah E. Parrott (with accompanying papers);

A bill (S. 6169) granting an increase of pension to Charles A. Potter (with accompanying papers);

A bill (S. 6170) granting an increase of pension to Ada Roberts (with accompanying papers);

A bill (S. 6171) granting an increase of pension to Edwin D. Sweet (with accompanying papers);

A bill (S. 6172) granting an increase of pension to Adelaide F. Thomas (with accompanying papers); and

A bill (S. 6173) granting an increase of pension to George O. Whitman (with accompanying papers); to the Committee on Pensions.

By Mr. DU PONT:

A bill (S. 6174) granting a pension to Alexander Farris, jr.; to the Committee on Pensions.

By Mr. CHILTON:

A bill (S. 6175) granting an increase of pension to Thomas B. Williams (with accompanying papers); to the Committee on Pensions.

By Mr. THOMPSON:

A bill (S. 6176) granting an increase of pension to James E. Bresett (with accompanying papers); to the Committee on Pensions.

By Mr. POMERENE:

A bill (S. 6177) for the relief of Frank Kinsey Hill; to the Committee on Naval Affairs.

A bill (S. 6178) to exempt from taxation certain property of the Congressional Club in Washington, D. C.; to the Committee on the District of Columbia.

By Mr. NEWLANDS:

A joint resolution (S. J. Res. 135) to create a commission to investigate the standardization of time in the United States and its territorial possessions; to the Committee on Interstate Commerce.

RESTORATION OF PEACE.

Mr. LEWIS. Mr. President, I submit a resolution and ask that it may lie on the table.

The resolution (S. Res. 202) was ordered to lie on the table and to be printed, as follows:

Whereas the present war involving Europe has, up to the present time, sacrificed to death, disaster, or general destruction 10,000,000 human beings and has forced an outlay and expenditure of money exceeding $20,000,000,000, all to the desolation of countries and to the destruction of civilization; and

Whereas the conflict at this time gives no promise of absolute victory or absolute defeat to either of the forces engaged in the combat, and each of the principal combatants having indicated desire for peace; and

Whereas it is necessary for the best uses of the world that peace be had among the contending forces at the earliest possible moment and upon terms that may make for permanent peace, and which shall remove the possibility of revival or renewal of conflict born of any sense of disappointment or defeat upon the part of either or any one of the combatants: Therefore be it

Resolved, That the President of the United States is requested—unless to him such appears incompatible with the public interests of the United States—that he suggest through proper channels that the United States mediate between the combatants by tendering the proposition that the combatants at the earliest moment convenient to the situation in which they are placed declare a truce and either withdraw the armies from the field or hold the same in nonaction, and in the meantime each of the countries engaged in the combat choose a neutral country as its representative, thus creating a board of arbitration made up of the chosen neutral countries; the said board to have a member for each of the countries engaged in the conflict, with the President of the United States, or a representative of such chosen by him, to serve as referee. That this board be the tribunal before which the combatants shall at a time appropriate to their immediate necessities, present the demands or the claims which each regards as necessary to the acceptance of peace. That the said commission or arbitration board shall after the said propositions have been submitted settle upon such terms as in all the circumstances would appear equitable to all parties, leaving to the future the remedying of any omission which might be endured or accepted by any one of the combatants in the general solution presented by the commission; be it further

Resolved, That the said proposition is suggested by the Senate to the President of the United States to present to the combatants as an expression of the desire of the United States for world peace, and not as any expression of favoritism or partiality to any one of the combatants engaged at present in the European conflict.

FOREIGN-BUILT DREDGES.

Mr. LIPPITT. Mr. President, I enter a motion to reconsider the vote by which the Senate on yesterday passed the bill (S. 4797) to amend an act entitled "An act concerning foreign-built dredges," approved May 28, 1906, and I ask that the House of Representatives be requested to return the bill to the Senate.

The VICE PRESIDENT. Without objection, it is so ordered.

RAILROAD EMPLOYEES.

Mr. NEWLANDS. Mr. President, I desire to have printed as a public document the report of the United States Board of Mediation and Conciliation on the effects of arbitration proceedings upon rates of pay and working conditions of railroad employees. The estimated cost for printing the report will be $3,529.91. I ask that the report be referred to the Committee on Printing for action.

The VICE PRESIDENT. Without objection, it is so ordered.

PRESIDENTIAL APPROVAL.

A message from the President of the United States, by Mr. Sharkey, one of his secretaries, announced that the President had on this day approved and signed the following act:

S. 5221. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent relatives of such soldiers and sailors.

RECESS.

Mr. STONE. I move that the Senate take a recess until 11 o'clock to-morrow morning.

The motion was agreed to; and (at 5 o'clock and 5 minutes p. m., Thursday, May 25, 1916) the Senate took a recess until to-morrow, Friday, May 26, 1916, at 11 o'clock a. m.

NOMINATIONS.

Executive nominations received by the Senate May 25 (legislative day of May 18), 1916.

PROMOTIONS IN THE ARMY.

MEDICAL CORPS.

Lieut. Col. Henry S. T. Harris, Medical Corps, to be colonel from May 23, 1916, vice Col. John L. Phillips, who died May 22, 1916.

Maj. James M. Kennedy, Medical Corps, to be lieutenant colonel from May 23, 1916, vice Lieut. Col. Henry S. T. Harris, promoted.

Capt. William H. Moncrief, Medical Corps, to be major from May 23, 1916, vice Maj. James M. Kennedy, promoted.

CAVALRY ARM.

First Lieut. George A. F. Trumbo, Cavalry, unassigned, to be captain from May 21, 1916, vice Capt. Wallace M. Craigie, Thirteenth Cavalry, retired from active service May 20, 1916.

Second Lieut. George S. Patton, jr., Eighth Cavalry, to be first lieutenant from May 23, 1916, vice First Lieut. Albert H. Mueller, Tenth Cavalry, detached from his proper command.

COAST ARTILLERY CORPS.

First Lieut. Henry T. Burgin, Coast Artillery Corps, to be captain from May 21, 1916, vice Capt. Charles L. J. Frohwitter, retired from active service May 20, 1916.

First Lieut. Nathan Horowitz, Coast Artillery Corps, to be captain from May 21, 1916, vice Capt. James Totten, detached from his proper command.

Second Lieut. George W. Easterday, Coast Artillery Corps, to be first lieutenant from May 21, 1916, vice First Lieut. Henry T. Burgin, promoted.

Second Lieut. George B. Gorham, Coast Artillery Corps, to be first lieutenant from May 21, 1916, vice First Lieut. Nathan Horowitz, promoted.

INFANTRY ARM.

First Lieut. Robert G. Peck, Seventh Infantry, to be captain from May 24, 1916, vice Capt. Frederick W. Benteen, Twelfth Infantry, retired from active service May 23, 1916.

Second Lieut. Robert Coker, Third Infantry, to be first lieutenant from May 16, 1916, vice First Lieut. John F. Curry, Fifth Infantry, detailed in the Aviation Section, Signal Corps.

Second Lieut. William F. Hoey, jr., Twelfth Infantry, to be first lieutenant from May 20, 1916, vice First Lieut. Henry H. Arnold, Third Infantry, detailed in the Aviation Section, Signal Corps.

Second Lieut. John H. Stutesman, Twenty-third Infantry, to be first lieutenant from May 24, 1916, vice First Lieut. Robert G. Peck, Seventh Infantry, promoted.

MEDICAL CORPS.

The first lieutenants of the Medical Reserve Corps herein named for appointment as first lieutenants of the Medical Corps, United States Army, each to rank from the date set opposite his name:

William Frederick Rice, May 8, 1916, vice First Lieut. George G. Divins, Medical Corps, honorably discharged March 25, 1914.

Edward Allen Noyes, May 9, 1916, vice First Lieut. Bert R. Huntington, Medical Corps, honorably discharged March 27, 1914.

Charles Woodward Riley, May 10, 1916, vice Capt. George D. Heath, jr., Medical Corps, retired from active service April 15, 1914.

Charles George Sinclair, May 11, 1916, vice Capt. John L. Shepard, Medical Corps, promoted April 23, 1914.

Charles George Hutter, May 12, 1916, vice Capt. Edwin D. Kilbourne, Medical Corps, resigned May 22, 1914.

Frederick Hensel Petters, May 13, 1916, vice Capt. Joseph O. Walkup, Medical Corps who died June 1, 1914.

Clarence Searle Ketcham, May 14, 1916, vice First Lieut. Charles R. Castlen, Medical Corps, resigned July 1, 1914.

Robert Parvin Williams, May 15, 1916, vice Capt. William L. Keller, Medical Corps, promoted July 4, 1914.

Edwin Brooks Maynard, May 16, 1916, vice First Lieut. Howard L. Hull, Medical Corps, resigned February 5, 1915.

Harvard Clayton Moore, May 17, 1916, vice Capt. Charles C. Billingslea, Medical Corps, promoted May 9, 1915.

Arden Freer, May 18, 1916, vice Capt. Harry S. Purnell, Medical Corps, resigned June 1, 1915.

Paul Adolph Schule, May 19, 1916, vice First Lieut. John S. C. Fielden, jr., Medical Corps, resigned September 1, 1915.

John Stuart Gaul, May 20, 1916, vice Capt. Henry L. Brown, Medical Corps, who died April 14, 1916.

WEST VIRGINIA.

Stanhope McClelland Scott, Terra Alta.

WISCONSIN.

Christian F. A. Mau, West Salem.
Frank E. Poll, Almond.
Henry B. Taylor, Iola.

HOUSE OF REPRESENTATIVES.

THURSDAY, *May 25, 1916.*

The House met at 11 a. m.

The Chaplain, Rev. Henry N. Couden, D. D., offered the following prayer:

Our Father who art in heaven, have mercy, we beseech Thee, upon us, and forgive our transgressions; create within us clean hearts and renew a right spirit within, that with unbiased judgment and a broader sweep of vision we may see clearly the way and walk with unfaltering footsteps therein; that we may satisfy our own longings and strive to measure up our lives to the life of the world's great Exemplar, that Thy kingdom may come and Thy will be done in all our hearts. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE.

A message from the Senate, by Mr. Waldorf, one of its clerks, announced that the Senate had passed bill of the following title, in which the concurrence of the House of Representatives was requested:

S. 4797. An act to amend an act entitled "An act concerning foreign-built dredges," approved May 28, 1906.

The message also announced that the Senate had passed the following order:

Ordered, That Mr. FLETCHER and Mr. GRONNA be added to the conferees on the part of the Senate on the disagreeing votes of the two Houses on the amendments of the House of Representatives to the bill (S. 2986) entitled "An act to provide capital for agricultural development, to create a standard form of investment based upon farm mortgage, to equalize rates of interest upon farm loans, to furnish a market for United States bonds, to provide for the investment of postal savings deposits, to create Government depositories and financial agents for the United States, and for other purposes."

ENROLLED BILL SIGNED.

Mr. LAZARO, from the Committee on Enrolled Bills, reported that they had examined and found truly enrolled bill of the following title, when the Speaker signed the same:

H. R. 12843. An act granting pensions and increase of pensions to certain soldiers and sailors of the Civil War and certain widows and dependent children of soldiers and sailors of said war.

SENATE BILL REFERRED.

Under clause 2 of Rule XXIV, Senate bill of the following title was taken from the Speaker's table and referred to its appropriate committee, as indicated below:

S. 4797. An act to amend an act entitled "An act concerning foreign-built dredges," approved May 28, 1906; to the Committee on the Merchant Marine and Fisheries.

LEAVE TO PRINT.

Mr. DYER. Mr. Speaker, I ask unanimous consent to print in the RECORD a petition addressed to the Speaker and signed by a number of Members of this House with reference to House resolution 235.

The SPEAKER. The gentleman from Missouri [Mr. DYER] asks unanimous consent to have printed in the RECORD a petition signed by certain Members.

Mr. DYER. It is very short, Mr. Speaker, and it is in support of House resolution 235, which asks Great Britain to use humane and present-day civilization treatment in dealing with the revolution in Ireland.

Mr. FOSTER. I suggest to the gentleman that he put it through the basket.

Mr. FITZGERALD. What is the request, Mr. Speaker?

Mr. DYER. The petition is addressed to the Speaker of the House, and——

Mr. FITZGERALD. I object, whatever it is.

The SPEAKER. The gentleman from New York objects.

Mr. BUCHANAN of Illinois. Mr. Speaker, I ask unanimous consent to have printed in the RECORD a resolution unanimously indorsed by the Chicago Federation of Labor in regard to the parade in Chicago to be held on the 3d of June.

The SPEAKER. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD by printing a set of resolutions from the Federation of Labor in Chicago——

Mr. BUCHANAN of Illinois. And by inserting an article and editorial from the Chicago Day Book.

The SPEAKER. And by inserting an article and editorial from the Chicago Day Book. Is there objection?

There was no objection.

Mr. RAKER. Mr. Speaker, I ask unanimous consent that I may have inserted in the RECORD two short resolutions.

Mr. COX. What do they relate to?

Mr. RAKER. One is by the Oleta Suffrage Club, of California, and the other is by the Women Voters' Conference.

Mr. COX. I have no objection.

Mr. FITZGERALD. Mr. Speaker, I do not believe we should get into the practice of printing in the RECORD the resolutions of all these very desirable organizations.

Mr. MANN. Considering the fact that the gentleman from California [Mr. RAKER] was absent when we had a vote on the subject the other day, I think he ought to be permitted to square himself this morning. [Laughter.]

Mr. RAKER. Oh, no; I was not absent.

The SPEAKER. Is there objection?

Mr. CANNON. Mr. Speaker, pending the request, I want just half a minute.

The SPEAKER. The gentleman from Illinois [Mr. CANNON] asks unanimous consent to proceed for half a minute. Is there objection?

There was no objection.

Mr. CANNON. Mr. Speaker, I hope that the House—if necessary, by a concurrent or joint resolution—will take into consideration this matter of printing in the RECORD. The RECORD ought to record what happens in the House in a space where it can be found, and if we are to print speeches and resolutions not directly related to the proceedings of the House they ought to be printed separate and apart from the CONGRESSIONAL RECORD. I have not anybody in mind in particular when I say that, and I do not mean to reflect upon anybody. I have not asked permission myself to print things of that kind. [Applause.]

Mr. RAKER. Mr. Speaker, I ask unanimous consent that I may proceed for one minute.

The SPEAKER. Is there objection to the request of the gentleman from California to proceed for one minute?

Mr. MADDEN. Reserving the right to object, Mr. Speaker——

Mr. DYER. I object.

The SPEAKER. Objection is made. Is there objection to the request of the gentleman from California to extend his remarks in the RECORD?

Mr. MADDEN. Reserving the right to object, I would like to ask the gentleman a question.

Mr. DYER. I object.

The SPEAKER. The gentleman from Missouri [Mr. DYER] objects.

BUREAU OF ENGRAVING AND PRINTING.

Mr. FITZGERALD. Mr. Speaker, I ask unanimous consent to have considered House joint resolution 214, to enable the Bureau of Engraving and Printing to do certain work that is very imperative.

The SPEAKER. The gentleman from New York [Mr. FITZGERALD] asks unanimous consent for the present consideration of the resolution which the Clerk will report.

The Clerk read as follows:

Joint resolution (H. J. Res. 214) increasing the number of sheets of customs stamps and of checks, drafts, and miscellaneous work to be executed by the Bureau of Engraving and Printing during the fiscal year 1916.

The SPEAKER. Is there objection to the present consideration of that resolution? [After a pause.] The Chair hears none. The Clerk will report it.

The Clerk read as follows:

Resolved, etc., That the limitation in the sundry civil appropriation act for the fiscal year 1916 as to the number of delivered sheets of customs stamps and of checks, drafts, and miscellaneous work to be executed by the Bureau of Engraving and Printing is increased from 239,000 and 1,600,500 to 289,000 and 2,101,000, respectively.

The SPEAKER. The question is on the engrossment and third reading of the House joint resolution.

The House joint resolution was ordered to be engrossed and read a third time, was read the third time, and passed.

On motion of Mr. FITZGERALD, a motion to reconsider the vote whereby the House joint resolution was passed was laid on the table.

AUTHORIZATION OF FLEET SUBMARINES.

Mr. PADGETT. Mr. Speaker, I wish to ask unanimous consent for the present consideration of the bill H. R. 13670, the submarine bill that I had up the other day.

The SPEAKER. The gentleman from Tennessee [Mr. PADGETT] asks for the present consideration of the bill of which the Clerk will report the title:

The Clerk read as follows:

A bill (H. R. 13670) amending an act entitled "An act making appropriations for the naval service for the fiscal year ending June 30, 1916, and for other purposes," relating to the authorization of fleet submarines.

The SPEAKER. Is there objection?

Mr. MADDEN. Reserving the right to object, Mr. Speaker, I would like to ask the gentleman from Tennessee how long has it been since these submarines were authorized?

Mr. PADGETT. They were authorized last March.

Mr. MADDEN. They were authorized last March by the Congress?

Mr. PADGETT. Yes, sir.

Mr. MADDEN. Is the contract about to be awarded?

Mr. PADGETT. It was advertised for, and they could not get any bids under the limitations imposed by the act.

Mr. MOORE of Pennsylvania. Mr. Speaker, reserving the right to object——

Mr. PADGETT. I promised the gentleman in charge of the District appropriation bill that we would not interfere with them.

Mr. MADDEN. I will ask the gentleman from Tennessee, Was this last March or a year ago last March?

Mr. PADGETT. Last March a year ago.

Mr. MADDEN. A year ago last March?

Mr. PADGETT. Yes.

Mr. MOORE of Pennsylvania. Will the gentleman explain the purpose of this bill?

Mr. PADGETT. The naval appropriation bill required that these submarines should be of 25 knots speed if possible, but with a minimum of 20 knots. They advertised for bids and could not get a guaranty above 19 knots, and this is to make the minimum 19, and 25 if possible. That is all there is in it.

The SPEAKER. Is there objection?

There was no objection.

Mr. PADGETT. Mr. Speaker, there is a correction of a word, in line 3, "provision" instead of "provisions."

The SPEAKER. The Clerk will report the amendment.

The Clerk read as follows:

Page 1, line 3, strike out the word "provisions" and insert the word "provision."

The amendment was agreed to.

The bill as amended was ordered to be engrossed and read a third time, and was accordingly read the third time and passed.

On motion of Mr. PADGETT, a motion to reconsider the last vote was laid on the table.

OREGON & CALIFORNIA RAILROAD LAND GRANT.

Mr. PAGE of North Carolina. Mr. Speaker, a parliamentary inquiry. Is the amendment to the bill in charge of the gentleman from Oklahoma (H. R. 14864) now pending as unfinished business?

Mr. WINGO. It is, with the previous question ordered.

The SPEAKER. That is correct. When the House broke up last night there was an amendment pending, offered by the gentleman from Illinois [Mr. FOSTER] to the California-Oregon Railroad bill, on which the previous question had been ordered.

Accordingly the House resumed consideration of the bill (H. R. 14864) to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from the Central Pacific Railroad, in California, to Portland, in Oregon," approved July 25, 1866, as amended by the acts of 1868 and 1869, and to alter and amend an act entitled "An act granting lands to aid in the construction of a railroad and telegraph line from Portland to Astoria and McMinnville, in the State of Oregon," approved May 4, 1870, and for other purposes.

The SPEAKER. The Clerk will report the pending amendment offered by the gentleman from Illinois [Mr. FOSTER].

The Clerk read as follows:

Page 14, in line 12, strike out the word "thirty" and insert "twenty."

The SPEAKER. The question is on agreeing to the amendment just read.

The question was taken; and on a division (demanded by Mr. FOSTER) there were—ayes 60, noes 72.

Mr. FOSTER. Mr. Speaker, I make the point of order that there is no quorum present.

The SPEAKER. Evidently there is none. The Doorkeeper will lock the doors, the Sergeant at Arms will notify absentees, and the Clerk will call the roll.

The question was taken; and there were—yeas 128, nays 167, answered "present" 10, not voting 129, as follows:

So the amendment was rejected.

The following pairs were announced:

For the session:

Mr. SCULLY with Mr. BROWNING.

Mr. LIEBEL with Mr. ROWLAND.

Until further notice:

Mr. STEVENS of Minnesota with Mr. SWIFT.

Mr. MORRISON with Mr. HUMPHREY of Washington.

Mr. HULBERT with Mr. SIEGEL.

Mr. THOMAS with Mr. DEMPSEY.

Mr. KINCHELOE with Mr. WHEELER.

Mr. ROUSE with Mr. MADDEN.

Mr. CANTRILL with Mr. LANGLEY.

Mr. CONRY with Mr. EMERSON.

Mr. MAHER with Mr. HUSTED.

Mr. FLYNN with Mr. GRIEST.

Mr. PATTEN with Mr. SNELL.

Mr. DALE of New York with Mr. HASKELL.

Mr. HENRY with Mr. JOHNSON of South Dakota.

Mr. COADY with Mr. WALSH.

Mr. DOOLING with Mr. DALE of Vermont.

Mr. FARLEY with Mr. MCCULLOCH.

Mr. MCGILLICUDDY with Mr. MORIN.

Mr. CAREW with Mr. MUDD.

Mr. CANDLER of Mississippi with Mr. FAIRCHILD.

Mr. EAGLE with Mr. SMITH of Minnesota.

Mr. HUMPHREYS of Mississippi with Mr. WOOD of Indiana.

Mr. HAMILL with Mr. WILLIAMS of Ohio.

Mr. SEARS with Mr. KIESS of Pennsylvania.

Mr. WALKER with Mr. PETERS.

Mr. LOFT with Mr. SNYDER.

Mr. GLASS with Mr. SLEMP.

Mr. LITTLEPAGE with Mr. SUTHERLAND.

Mr. POU with Mr. TREADWAY.

Mr. ADAIR with Mr. PRATT.

Mr. GANDY with Mr. RODENBERG.

Mr. COLLIER with Mr. MOONEY.

Mr. BARKLEY with Mr. DRUKKER.
Mr. GALLIVAN with Mr. ANTHONY.
Mr. WILSON of Louisiana with Mr. MILLER of Minnesota.
Mr. STEDMAN with Mr. HUTCHINSON.
Mr. SABATH with Mr. LEHLBACH.
Mr. OGLESBY with Mr. GRAY of New Jersey.
Mr. JONES with Mr. GILLETT.
Mr. BUCHANAN of Texas with Mr. FOCHT.
Mr. HART with Mr. COPLEY.
Mr. MORGAN of Louisiana with Mr. GOULD.
Mr. RUSSELL of Missouri with Mr. GARDNER.
Mr. O'SHAUNESSY with Mr. HICKS.
Mr. CASEY with Mr. GUERNSEY.
Mr. LEWIS with Mr. MCFADDEN.
Mr. WHALEY with Mr. CHIPERFIELD.
Mr. GODWIN of North Carolina with Mr. AUSTIN.
Mr. DRISCOLL with Mr. CHANDLER of New York.
Mr. MCLEMORE with Mr. KEARNS.
Mr. RIORDAN (for rule on District of Columbia bill) with Mr. WARD (against).
Mr. GALLAGHER with Mr. WINSLOW (commencing May 22, ending May 27, inclusive).
Mr. BRUCKNER with Mr. BENNET (ending June 20, 1916).
Mr. CLARK of Florida with Mr. FULLER (commencing May 8, until further notice).
Mr. SHERLEY with Mr. LONGWORTH (ending May 29).
Mr. BURKE with Mr. GREENE of Vermont (ending June 2).
Mr. WM. ELZA WILLIAMS with Mr. KING (commencing May 24, ending May 27, 1916).
Mr. SPARKMAN with Mr. BARCHFELD (commencing May 24, ending June 10).

Mr. BROWNING. Mr. Speaker, I voted "no." I am paired with the gentleman from New Jersey, Mr. SCULLY. I therefore withdraw my vote and answer "present."

Mr. LANGLEY. Mr. Speaker, I voted "no," but I have a general pair with my colleague, Mr. CANTRILL, and I withdraw that vote and answer "present."

Mr. HUMPHREY of Washington. Mr. Speaker, I have a pair with the gentleman from Indiana, Mr. MORRISON. I voted "no." I withdraw that vote and answer "present."

Mr. SLOAN. Mr. Speaker, inadvertently I answered the call of the name of the gentleman from New York, Mr. ROWE.

The SPEAKER. Does the gentleman know that Mr. ROWE is not here?

Mr. SLOAN. I do not; but I do not want my answer to stand for him.

The result of the vote was then announced as above recorded.

The SPEAKER. A quorum is present, the Doorkeeper will open the doors. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time, and was read the third time.

The SPEAKER. The question is on the passage of the bill.

Mr. MANN. Mr. Speaker, I ask that that be taken by a rising vote.

The question was taken by a rising vote, and the Speaker announced that there were 186 ayes and 6 noes.

So the bill was passed.

On motion of Mr. FERRIS, a motion to reconsider the vote whereby the bill was passed was laid on the table.

DISTRICT OF COLUMBIA APPROPRIATION BILL.

Mr. PAGE of North Carolina. Mr. Speaker, I move that the House resolve itself into Committee of the Whole House on the state of the Union for the further consideration of the bill H. R. 15774, the District of Columbia appropriation bill.

The motion was agreed to.

Accordingly the House resolved itself into Committee of the Whole House on the state of the Union, with Mr. FERRIS in the chair.

The CHAIRMAN. The House is now in Committee of the Whole House on the state of the Union for the consideration of the bill of which the Clerk will read the title.

The Clerk read as follows:

A bill (H. R. 15774) making appropriations to provide for the expenses of the government of the District of Columbia for the fiscal year ending June 30, 1917, and for other purposes.

Mr. PAGE of North Carolina. Mr. Chairman, when the House rose at the time it last had the bill under consideration there was a unanimous-consent agreement that when the House met this morning we would revert to the first section of the bill. Under that agreement, I ask that the Clerk read the first section.

The Clerk read as follows:

Be it enacted, etc., That hereafter all appropriations made for the support of the government of the District of Columbia, including all sums appropriated in any general appropriation act indicated to be paid out of the District of Columbia revenues and amounts to pay the interest and sinking fund on the funded debt of said District, shall be paid out of the revenues of the District of Columbia to the extent that the same shall be sufficient therefor and the remainder out of any money in the Treasury not otherwise appropriated.

Mr. MANN. Mr. Chairman, I move to strike out the last word.

Mr. PAGE of North Carolina. Before the gentleman proceeds under his pro forma amendment, it is evident that we shall have some discussion on these two paragraphs, and I would like to arrange for the time under the five-minute rule.

Mr. MANN. I moved to strike out the last word because the Clerk was going to read the second paragraph, which would have prevented amendment to the first paragraph. The gentleman from Massachusetts [Mr. TINKHAM] intended to offer an amendment.

Mr. TINKHAM rose.

Mr. MANN. I withdraw my pro forma amendment.

Mr. TINKHAM. I offer the following amendment: Strike out the entire paragraph after the enacting clause, from line 3 to line 8, inclusive, on page 1, and from line 1 to line 3, on page 2.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Strike out all after the enacting clause, including line 3, page 1, to line 3, on page 2.

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. MANN. Mr. Chairman, I move to strike out the last word of the amendment.

Mr. PAGE of North Carolina. Mr. Chairman, at this stage of the proceeding, I would like to arrange with the gentleman on the other side as to how much time shall be consumed in debate on these two paragraphs with all amendments thereto. I suggest to gentlemen that we have had a great deal of debate on this subject.

Mr. MANN. Let us have the debate on this first paragraph first.

Mr. COOPER of Wisconsin. Will the gentleman permit an interruption?

Mr. PAGE of North Carolina. I yield to the gentleman from Wisconsin.

Mr. COOPER of Wisconsin. Has the gentleman from North Carolina offered his amendment as to the funded debt?

Mr. PAGE of North Carolina. Yes; I offered it as it applied to this section, and I shall offer it at another place to perfect it.

Mr. HUMPHREY of Washington. Will the gentleman yield?

Mr. PAGE of North Carolina. Yes.

Mr. HUMPHREY of Washington. I wish the gentleman would explain in a word or two just what this amendment does.

Mr. PAGE of North Carolina. That will be explained when we get into the discussion; I am trying to fix the time for debate.

Mr. DAVIS of Minnesota. Mr. Chairman, it has been suggested by the chairman of the committee that we consume one hour in the discussion of the amendment and the principle contained in the first paragraph—that is, the first paragraph of the first section of the bill. The second paragraph has not been read. I was very favorable to this proposition, because I know that considerable discussion has already been had on this proposition for the last 10 years. I do not think that anything new can be said. However, I will consent to 1 hour and 10 minutes' debate on this paragraph.

Mr. PAGE of North Carolina. That is agreeable to me. How does the gentleman want the time divided?

Mr. DAVIS of Minnesota. Half of the time to be controlled by the gentleman from North Carolina and the other half by myself.

Mr. PAGE of North Carolina. Mr. Chairman, I will make that request for unanimous consent that all debate on the first paragraph of the bill and all amendments thereto be closed in 1 hour and 10 minutes—one half of the time to be controlled by myself and the other half by the gentleman from Minnesota [Mr. DAVIS].

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that debate on this first paragraph be confined to 1 hour and 10 minutes—one half of the time to be controlled by the gentleman from North Carolina [Mr. PAGE] and the other half by the gentleman from Minnesota [Mr. DAVIS]. Is there objection?

Mr. SMALL. Mr. Chairman, reserving the right to object, I would like to know if I can have a little time?

Mr. PAGE of North Carolina. Mr. Chairman, I will try to accommodate the gentleman and do my best. I have 35 min-

utes at my disposal. I shall do the best I can; and, of course, I shall be disposed to give my colleague time.

Mr. SMALL. Unless I can get some time I shall have to object.

Mr. PAGE of North Carolina. Then, Mr. Chairman, I move that all debate on this paragraph and all amendments thereto close in 1 hour and 10 minutes.

Mr. SMALL. Mr. Chairman, in lieu of that motion I ask unanimous consent that there be 1 hour and 20 minutes of debate.

The CHAIRMAN. Does the gentleman from North Carolina accept that proposition?

Mr. PAGE of North Carolina. Mr. Chairman, I have made the agreement with the other side. I will do the best I can to accommodate the gentleman, but I insist upon my motion.

The CHAIRMAN. The question is on the motion of the gentleman from North Carolina that all debate on this paragraph and all amendments thereto close in 1 hour and 10 minutes.

The motion was agreed to.

Mr. MANN. Mr. Chairman, I ask unanimous consent that the time be equally divided between the gentleman from North Carolina [Mr. PAGE] and the gentleman from Minnesota [Mr. DAVIS].

The CHAIRMAN. Is there objection?

There was no objection.

Mr. PAGE of North Carolina. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. RAINEY].

Mr. RAINEY. Mr. Chiarman, when this paragraph was under consideration on Wednesday last, in commenting upon the amendment proposed by the chairman of the committee my colleague from Illinois [Mr. MANN], usually so accurate in his figures and in his conclusions, expressed surprise that the joint committee investigating the fiscal relations between the District of Columbia and the Federal Government should have made a distinction between paying the interest and the principal of the funded debt and other expenditures of the District, and he insisted that the matter was a mere matter of bookkeeping which a $50-a-month clerk ought to understand. The gentleman is absolutely correct so far as this bill is concerned and so far as all appropriation bills are concerned where the Government's contribution amounts to at least one-half of $975,000 and half of the interest on the funded debt.

If it should ever happen that the Government's contribution should be less than this, the Government would be in the position of repudiating its obligations if the method suggested by the gentleman from Illinois were adopted. This debt accrued between 1871 and 1874, and long before the organic act of 1878 the half-and-half principle as to the payment of the funded debt and the interest upon it was recognized by the Congress. In a long series of appropriation bills it was recognized; in messages submitted to Congress by Presidents of the United States it was recognized. Finally, in 1914, the Comptroller of the Treasury in an exhaustive opinion assembling all of these facts reached the conclusion that the Federal Government had agreed and stood obligated to pay one-half of the funded debt and one-half of the interest upon those bonds as they accrued. The contribution of the Government to-day in this bill is apparently smaller than it has been in recent years. Suppose a tax upon intangibles should be imposed here in the District in the future, and an inheritance tax; suppose the contribution of the people who live here should exceed eleven or twelve million dollars in any one year, should amount to as much as Congress felt like appropriating for District expenditures, should amount to as much as the commissioners recommended and submitted estimates for. In that event the Federal Government would not be compelled, if we repealed entirely the act of 1878 and the obligations, written and unwritten, which the Federal Government has assumed, to pay one-half of the funded debt and one-half of the interest on the funded debt. I am not discussing the proposition as a question of abstract right; but if the Federal contribution should ever be less during the next six or seven years than $975,000 and half the interest upon the public debt, the Federal Government would be in the position of having repudiated to that extent its obligations, and, therefore, this is not merely a matter of bookkeeping; it may not be a matter of bookkeeping.

We can not tell what Congress hereafter may do, but the gentleman from Massachusetts [Mr. TINKHAM], who has been arguing this matter upon the floor here and in the newspapers, insists that without the amendment offered by the committee the Government would be in the position, might be in the position some time in the future, of repudiating its obligations, and the gentleman from Wyoming [Mr. MONDELL] takes the same position, and as lawmakers, protecting the obligations of this Government, especially when it undertakes to pay a part of the amount due upon issues of bonds and interest thereon, it is necessary for us——

The CHAIRMAN. The time of the gentleman from Illinois has expired.

Mr. PAGE of North Carolina. Mr. Chairman, I yield the gentleman more time.

Mr. MANN. Mr. Chairman, would the gentleman have time to yield for a question?

Mr. RAINEY. Yes; I will be glad to yield.

Mr. MANN. Does the gentleman refer to the obligation of the Government to the bondholders or the obligation of the Government to the District of Columbia?

Mr. RAINEY. I am referring to the amendment the committee made, which my colleague insisted was not necessary at all, was a mere matter of bookkeeping, and it may be a matter of bookkeeping as long as the Government's contribution is as much as it is in this bill, and it will be of course in the future as long as the Government contributes more than the amount I have indicated.

Mr. MANN. The gentleman spoke about repudiating obligations of the Government. Does he mean obligations to the District or obligations to the bondholder?

Mr. RAINEY. The obligation that the Government has assumed to pay one-half of these bonds out of the National Treasury.

Mr. MANN. Obligations to whom—the bondholders or to the District?

Mr. RAINEY. Obligations to whoever owns these bonds and presents them for payment.

Mr. MANN. They are not interested if they are paid. They do not care where the money comes from if the bonds are paid.

Mr. RAINEY. But the citizens of the District are interested, and the Government has assumed obligations to them in this connection. The people who live in the United States are interested. The citizens of the District want to keep their contracts, and the United States Government ought to keep its contracts, and we have made this amendment in order that the United States Government may keep its contracts.

Mr. MANN. Is not the same obligation in the act in reference to the bonded indebtedness also in reference to the current expenses? Does not the same act provide that the Government shall pay half?

Mr. RAINEY. The conclusion the committee reached in that particular was that the citizens who live here ought to pay as much for public purposes as they would pay if they lived in any other comparable city; the conclusion we reached in our report was that they ought not to pay any more, but they ought to pay as much.

LIBERAL APPROPRIATIONS FOR THE NATIONAL CAPITAL.

The gentleman from Massachusetts [Mr. TINKHAM] and other gentlemen on both sides of the House insist that there ought to be liberal appropriations for the National Capital, and for that reason they support the half-and-half plan of contribution—the Government to pay half of the expenses of conducting the District of Columbia, the people who live here to pay the other half. Liberal appropriations for the National Capital do not mean necessarily that the half-and-half plan of contribution should be continued. If we matched dollars in this bill, the bill would carry a million dollars more than the amount of the estimates submitted by the commissioners. This state of affairs is brought about by the fact that during the next fiscal year there will be collected from the citizens of the District more money in taxes than ever collected before, over $8,000,000. We could not use $16,000,000 this year, or anything like that amount, without making most extravagant, unnecessary, and indefensible appropriations. The bill we are considering now already carries $600,000 more than any other bill ever reported out by the committee. At this stage the bill is larger than it ever has been. Every amendment which adds an appropriation will be added to the sum the General Government appropriates. When it comes to a matter of liberal appropriations for the National Capital this bill, as far as it has gone, is the most liberal bill ever suggested by any committee of the House. It is hardly possible that any newspaper in the District of Columbia will call attention to this fact. The people who live here would be happier and the matter would be better presented by the newspapers if this phase of the situation were fairly presented.

PEOPLE WHO LIVE HERE NOT TAX DODGERS.

According to the best available data, the people who live here are not tax dodgers, as has been intimated more than once on this floor, and they are at the present time contributing their full share toward the payment of the expenses of the District of Columbia; they are contributing, according to the best available data, substantially what they would contribute if they lived in

any other city of comparable size. The unusually large amount that will be contributed next year by the people who live here is due to the fact that under the present administration the assessed value of real estate in the business section of Washington and in the more important residence sections has been materially increased, and more taxes will be collected from personal property than ever before. The assessment now in progress has not reached the small-homes sections of the city. It may be that the assessed value of real estate in the small-homes sections will be substantially diminished or it may remain substantially as it is.

There is no complaint with reference to the new assessment in Washington so far as it has gone. The taxpayers will willingly and readily pay the amount the assessment will require them to pay.

CITIZENS PAY FAIR SHARE OF MUNICIPAL EXPENSES.

The gentleman from Kentucky [Mr. JOHNSON] called attention to Bulletin No. 126 issued by the Bureau of the Census in an effort to show that the citizens of Washington were greatly favored over the citizens of other cities, and were contributing for public purposes out of their pockets only about half as much as the citizens of other cities.

Bulletin No. 126 will not, in my judgment, sustain the position taken by the gentleman from Kentucky. The best way to arrive, from this bulletin, at the contribution of the citizens who live here for public purposes is to examine the item "General property taxes," contained in table No. 1, which will show that citizens who live in Washington contributed in 1913 for public purposes over $5,000,000. In this table are grouped 19 cities of comparable size, containing from 300,000 to 500,000 inhabitants. In 1913, when these figures were made up, the citizens of Washington contributed in gross more than the citizens of any of these cities contributed except six, and of these six every one of them contained a much larger population than Washington except Minneapolis, and the contribution, however, of the citizens of Minneapolis in general property taxes was, in 1913, only slightly larger than the contribution made by the citizens of Washington. This same table shows that the per capita levy of property taxes in Washington was $16; it will be larger next year. Eight of these nineteen cities had in that year per capita levies of between $14 and $18, and the per capita levy in Washington seems to have been in 1913 a fair average per capita levy for a city in this group of comparable cities. Of course the levies in San Francisco and Los Angeles were much larger, but in those cities, in all probability in that year, payments were being made for municipal improvements unusually extensive.

THE NEGRO POPULATION.

In estimating the burdens placed upon the taxpayers of Washington there ought to be taken into consideration the fact that more negroes live here than in any other city in the United States. Ninety-four thousand four hundred and forty-six negroes live here, 28½ per cent of the total population. New York comes next, with a little over 91,000, and Baltimore next, with a little over 84,000, but New York and Baltimore are not comparable in size with Washington. The negro population in a city is not regarded as a tax-paying proposition. Their holdings upon which taxes can be assessed are small, indeed. This situation therefore increases far beyond $16 the per capita contribution of the white citizens of Washington who pay taxes. I therefore submit that the statistics contained in Bulletin No. 126, upon which the gentleman from Kentucky relies, show that the people who live here contribute substantially as much for public purposes as they would contribute if they lived in some other city comparable in size to Washington.

As far back as 1835 Senator Southard, of New Jersey, chairman of a joint committee to investigate this very subject, reported in effect that Washington was being developed as a Nation's capital on a most stupendous scale, and that the people who live here ought not to be compelled and could not be expected to pay the expenses of maintaining in a proper scale of magnificence the Capital City. The attempt of the District of Columbia from 1871 to 1874 to level the hills, lift the city out of the mud, and pave the streets resulted in the tremendous indebtedness of which the Government agreed to pay half. The Government is paying half of the bonds as they fall due to this day. The amount remaining of the original indebtedness of $30,000,000 is small, and Washington carries the smallest debt of any city at all approaching it in size in the United States, the indebtedness here now being only about $6,000,000. At the present rate of payment—$975,000 per year—in a comparatively few years the debt will be entirely wiped out.

The time will, in my judgment, never come when the District of Columbia will be self-sustaining. It ought not to be self-sustaining. The people of the United States expect it to be maintained as at present, the most magnificent and most beautiful capital in all the world.

WASHINGTON COMPARED WITH BALTIMORE.

In this connection it may be interesting to compare the city of Washington with the nearby city of Baltimore. Washington had a population in 1913 of 348,000; Baltimore had a population in that year of 572,000. The streets and avenues in Washington have now been practically extended to the District boundary, and there is embraced in the city of Washington 60 square miles, while in the city of Baltimore with its 234,000 more population there are only 30 square miles of territory. There are in Washington substantially as many square yards of pavement as there are in the much larger city of Baltimore. The best type of pavement is the asphalt pavement, and there is in Washington 3,964,000 square yards of asphalt pavement; in Baltimore there are only 750,000 square yards of asphalt pavement. In Washington there are 543 miles of sewers; in Baltimore there are only 77 miles of sewers.

The situation therefore is this: If the people who live in Washington were compelled to pay for building and maintaining the pavements here as they are compelled to pay for building and maintaining the pavements in Baltimore, the citizens of Washington would be charged with building and maintaining 21.41 square yards of paved streets per capita, while the citizens of Baltimore would be compelled to build and maintain only 12.80 square yards of paved streets per capita. For each 100,000 of population in Washington there would be charged 166.12 miles of sewers; for each 100,000 of the population of the much larger city of Baltimore there would be charged only 13.82 square miles. All this is due to the magnificent distances which prevail here, the parking spaces, the tremendously large and magnificent public buildings and the grounds which surround them. The population per square mile of territory in Baltimore is 17,000; in Washington the population per square mile is only 5,801.

A brief examination of such comparisons as these indicates the reason for the Government's contribution. The citizens of Washington ought not to be expected and never will be expected under these circumstances to pay the entire expenses of maintaining this magnificent Capital City. Every citizen of the United States has an interest here. Citizens come here from all parts of the Union and throng the streets of Washington every day in the year. I have never seen one of them who did not experience a feeling of pride in the beauty and grandeur of the Capital of the wealthiest Nation in all the world. [Applause.]

Mr. DAVIS of Minnesota. Mr. Chairman, I yield five minutes to the gentleman from Wisconsin [Mr. COOPER].

Mr. COOPER of Wisconsin. Mr. Chairman, I will answer the gentleman from Illinois [Mr. MANN] by quoting from the opinion of Comptroller Downey, of the Treasury, on the exact point raised by the gentleman's question. On page 344 of the first volume of the hearings of the Joint Select Committee on Fiscal Relations I find this excerpt from the comptroller's opinion:

"2. To restore the credit of the District of Columbia, make acceptable to creditors of the District 3.65 bonds by a guaranty of payment, and assume the to-be-determined equitable proportion to be contributed by the United States toward the expenses of the District, the United States covenanted with the holders of these bonds that it would provide, by taxation on the property within the District, a portion of the revenues necessary to pay the interest on and principal of these bonds, and that it would provide the other portion, to be determined, by appropriation out of the revenues of the United States."

Later he said:

"As to one half of this debt, the United States undertook with the bondholders, in effect, that the District would pay it out of its revenues from taxation, and as to the other half, it promised the bondholders that it would appropriate it out of the Treasury. The original pledging clause did not make certain these proportions. They might ultimately be seven-eighths out of the District revenues and one-eighth out of the revenues of the United States. So far as the bondholders were concerned, it was the pledge of the United States to provide the necessary revenues, which was effective, and, so far as they were concerned, an undertaking on the part of the United States that it would provide all the funds necessary out of District revenues derived from taxation would have been equally effective. In other words, the United States as guarantor, in terms, for the payment of all of this debt would have been just as acceptable to the bondholders as the United States as guarantor of an unascertained part and as a promisor to pay of the other part. If, then, that was all the United States was to be as to all the debt, either to the bondholders or as between it and the District, why might it not as easily and effectively have been so stated?"

* * * * * * *

"The United States undoubtedly assumed, so far as the bondholders were concerned, that it would pay one-half of this debt."

Now, in January, 1876, two years before the enactment of the act of 1878, which established the half-and-half plan, Senator Thurman, of Ohio, one of the country's great lawyers, said in the Senate:

"This act contemplated that the General Government should pay a proportional part of the expenses of government within this District and that proportional part of it was supposed would be ascertained by the joint committee that was to frame a permanent form of government for the District; and here is a pledge that the Government of the United States will pay that proportional part. What it should be was not determined by this act; it was to be the subject of investigation; but whenever found, here is the pledge that the Government would, by payments out of the Public Treasury of its proportional part of the expenses of government in this District, contribute to pay the interest on these 3.65 bonds and provide a sinking fund for the liquidation of the principal."

Now the proportional part to be paid by the National Government, to quote the language of former Senator Thurman, was not determined by the act to which he was making specific reference, but two years later, in June, 1878, Congress enacted the half-and-half law, and fixed the proportion of the District funded debt to be paid by the Government at 50 per cent thereof. The joint select committee of the two Houses of the present Congress, of which committee the gentleman from Illinois [Mr. RAINEY], the gentleman from Ohio [Mr. GARD], and I were members, reached the same conclusion as did the comptroller concerning the payment of the funded debt. But the joint select committee also found that as a matter of logical reasoning it is impossible to reach a conclusion that all of the other expenditures for District purposes should be in accordance with the so-called half-and-half plan. We declared in our report that when the residents of this District are taxed as their fellow citizens in other cities with which Washington is fairly comparable, are taxed, they pay all that they ought to pay to the United States, and that the United States ought in justice to pay all of the balance necessary to properly develop and maintain this Capital City of a great Nation. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. PAGE of North Carolina. Mr. Chairman, I yield five minutes to my colleague from North Carolina Mr. SMALL.

Mr. SMALL. Mr. Chairman, I hesitate to disagree with the committee, which evidently have given consideration and study to the matter of fiscal relations between the United States and the District of Columbia. We all agree that Congress has exclusive jurisdiction of the District of Columbia. Congress, in exercising that jurisdiction, ought to be governed by the same motives as if it were legislating about matters in which their particular States or districts are concerned. To my mind, I would not be willing to impose such an indefinite method of raising revenues upon my State in the matter of local taxes as is proposed by this paragraph.

Mr. PAGE of North Carolina. Will the gentleman yield?

Mr. SMALL. I will.

Mr. PAGE of North Carolina. Simply for a question. Is there any question of taxation involved in this paragraph? I claim that there is not.

Mr. SMALL. This paragraph, it is true, does not purport to amend existing law as to the rate or subject of taxation or as to the machinery for its collection. To come to the point, Mr. Chairman, that I had in mind: Under existing law the United States and the District each pay one-half of the appropriations for the maintenance of the District government. It is proposed in this bill to pay all appropriations out of the District revenues until they are exhausted and to pay the deficiency out of the Federal Treasury. If assurance could be given of the stability of the law fixing the subjects and rate of taxation in the District, much of the objection to this new plan would be removed; but there can be no such assurance. I do not wish to disparage the temper, the intelligence, or the motives of Congress, but my observation, I think, justifies the statement that this House does not always give that deliberation and consideration to affairs in the District here as they do to general legislation affecting the country as a whole. The District would become an experiment station, as it were, for every variety of theory of fiscal government. Year after year, at each recurring session, every impracticable theorist will be free to offer a new experiment in taxation. Different subjects and methods of taxation will be attempted to be introduced. The machinery for the collection of taxes will be changed.

This is becoming a great municipality. It is true that the fathers intended it for the seat of government and to retain control over it, but at the same time it is a great city and ought to be treated as a city. Men have investments here. We encourage business of various kinds here; and yet what sort of invitation do we offer? The possibility at each session of Congress of a change in the rate and subjects of taxation and the proportion which is to be paid by the people of the United States and by the people of the District.

Everyone agrees that the United States should contribute toward the revenues of the District, and I do not concede that it is impossible to lay down a fixed proportion. If one-half is too much, make it less. Why, according to this proposition——

Mr. GARD. Will the gentleman yield?

Mr. SMALL. Certainly.

Mr. GARD. Has the gentleman any information to give to the House as to what the proportion should be?

Mr. SMALL. The gentleman was a member of the joint commission to consider this subject and, I have no doubt, industriously studied the evidence submitted to them. If that evidence was not sufficient, they should have sought evidence that would have been sufficient to have fixed upon a definite proportion; and because they failed to comply with the direction of Congress in this respect, I do not approve their report or conclusions.

Permit me to summarize the contentions I have endeavored to present. It is admitted that the Federal Government should contribute a fair proportion toward the revenues of the District for the maintenance of its government and to meet the annual appropriations made by Congress. I contend that it is of the very essence of fairness that this proportion should be fixed and definite. Neither the joint commission appointed at the last session of Congress to consider this subject nor the Committee on Appropriations in this bill have met this condition. The paragraph under consideration in this bill does not in express terms repeal the half-and-half law of 1878, but seeks to accomplish its repeal by inference. It provides that appropriations made by Congress for the District shall be paid out of the revenues of the District until they are exhausted, and that the deficit shall be paid out of the Federal Treasury. Let us anticipate the future and observe how this plan will work. It must be remembered that Congress alone has the power to fix the subjects of taxation and the rate of taxes. Doubtless there will be Members of Congress at each session who will contend that the District is not raising sufficient revenue, and there will be constant agitation for adding to the subjects of taxation. At the same time others will doubtless seek to increase the rate. While it is now admitted that the Federal Treasury should bear a proportion of the revenues for the District, there will doubtless be some who will contend either that this contribution should be decreased or reduced to a minimum. We have had many illustrations in the past of Members from villages or rural sections seeking to apply their own provincial theories of government in the administration of the affairs of the District. While the joint commission enjoin generous appropriations and emphasize the necessity of making the seat of Government one of the beautiful capitals of the world, their fine words will soon be forgotten under the exigencies of practical and provincial politics. We are simply paving the way for making our National Capital the football of provincial and impracticable theorizers in municipal government.

The CHAIRMAN. The time of the gentleman has expired.

Mr. DAVIS of Minnesota. Mr. Chairman, I yield five minutes to the gentleman from Illinois [Mr. MANN].

Mr. MANN. Mr. Chairman, just a word on this subject. My colleague says that unless we continue to pay one-half of the funded debt out of the General Treasury we will be repudiating our obligations. I ask him to whom he made the obligations. The bondholders do not care where the money comes from. We are not repudiating any obligation to the bondholder if his bonds and interest are paid. He can not complain. And if it be said that we are repudiating our obligation to the District—and I think we are—it equally applies to the payment of the expenditures for current expenses. Because in the same law is the obligation fixed that the Government pays one-half of the running expenses out of the General Treasury and one-half of the funded debt and interest out of the General Treasury.

I think we have the right and the power at any time to change our fiscal relations with the District of Columbia as we please. I think we ought to treat them fairly. I am opposed to the repeal of the half-and-half proposition. I believe it is wiser and better for us to say that on account of this being the Capital of the country, on account of the great number of buildings and public lands which the Government owns in the District of Columbia, in order that we may continue to be proud of the Capital of the country, we may well say we will pay one-half of the expenditures in the District out of the General Treasury. But the gentlemen say that will raise too much money. That does not frighten me. I think we can expend it very profitably.

It has been cited here, for instance, that tax levies in various cities are over $2 a hundred on the actual valuation and only $1 a hundred on the actual valuation here. If that be the case, we ought to continue our present system as an example. There is not another city in the country that is as well taken care of, as well cleaned, that has as good streets, that has as good municipal government as the District of Columbia. And gentlemen say that it costs less per capita here and less in actual taxation here than it does in other cities, even if you combine what the District contributes and what the General Government contributes. I would take the extra money which is not now appropriated, and I would buy new parks. I would provide for the future. I would develop the park system that we have now. I would make a place where the people could meet and enjoy themselves. They do not have much opportunity for that now. Why, even in the city of Chicago, which is new, and more or less an over-grown village, we would be ashamed if in our park system we did not better provide for the people in the parks than they do in Washington. I would finish up the improvements along the Anacostia River, make drives and places where the people could go. I would develop the new park over here east of the railroad tracks into a great gathering place for the people. I would add to Rock Creek Park. I would add to the "Zoo" in Rock Creek Park, where the people of the whole country go. There are many, many things where we can profitably expend money for years to come. [Applause.]

The CHAIRMAN. The time of the gentleman has expired.

Mr. PAGE of North Carolina. Mr. Chairman, I yield five minutes to the gentleman from Arkansas [Mr. CARAWAY].

Mr. CARAWAY. Mr. Chairman and gentlemen of the committee, I know that the section under discussion does not deal with the tax rate, and yet all here so treated it, and so will I. I spent two years as a member of the Committee on the District of Columbia. I heard nothing but complaints and pleas for special privileges by the citizens who came before that committee while I was a member of it. There are a good many confusing laws with reference to taxation in the District. In the first place, real estate within the city proper is taxed on two-thirds of its real value, at $1.50, or, really, a dollar rate. The part of the District outside the city is taxed $1 on two-thirds of its value, or two-thirds of a dollar. This is all the burden of taxation that is borne by the residents of the District of Columbia for all purposes. In return they get a magnificent park system; they get, according to the statement of the gentleman from Illinois [Mr. MANN], the best-kept and best-lighted and cleanest city in the world. All these at a tax rate less than one-half of the property tax on the property of the constituents of any Member who has a seat in this House. All intangible personal property is wholly exempt.

And there is another rather unique scheme that I have seen availed of on several occasions here and that is on your tangible personal property a mortgage is placed, and to the extent of this mortgage it is exempt from all taxes.

I recall one rather wealthy citizen of this District—in fact, an extremely rich man—who was getting ready to go to Paris with a string of race horses, placed a mortgage of $40,000 on his household furniture. The only object was to exempt $40,000 worth of his property from taxation. It worked, and he went happily. That is not all. Let us take, for instance, the people who live along these broad streets. They tell you that the burden of caring for the streets is heavy because the streets are so broad. They get a compensation for this. Everybody's front yard—that is, with but a few exceptions—is not his property at all.

There are streets in this town where the average width of the property between the building line and the sidewalk line is from 20 to 25 feet. If it is 25 or 30 feet, and the lots are 20 feet in width the man has from 500 to 600 square feet of property that belongs to the Government, yet he is permitted to fence it in and exercise exclusive ownership of it. It did not cost him a cent. It is exempted from taxation. He pays nothing for it, nor does he pay tax on it, as you and I must do if our children have a front yard in which to play. In the street where I now live the average width of the lot is 20 feet; the depth from sidewalk to building line is 30 feet, so each owner has 600 square feet, so far as the use of it is concerned, that never costs him a cent, and it is not assessed for taxes against him. At the back of their lot they have 200 square feet which they are permitted to use in the same way, so that every man's lot has 800 square feet of land, worth at least $1.50 a square foot, over which he exercises exclusive ownership, but which never costs him anything and on which he pays no taxes. It belongs to the Government, yet the lot owner has an exclusive use of it, free both of cost and taxes. Yet they tell you they are overtaxed, and want your people and mine to bear a heavier burden that they may bear none at all.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. DAVIS of Minnesota. Mr. Chairman, I yield five minutes to the gentleman from Ohio [Mr. LONGWORTH].

The CHAIRMAN. The gentleman from Ohio [Mr. LONGWORTH] is recognized for five minutes.

Mr. LONGWORTH. Mr. Chairman, for a good many years I have heard this proposition debated pro and con, and I have given particular attention to this debate. I have tried to weigh as judicially as I could the various arguments in favor of the abolition of the so-called half-and-half plan, but I can not come to any other conclusion than that by so doing we would not be taking a step in advance, but, on the contrary, would be taking a step backward.

Since 1878 it has been the policy of this Government to divide equally with the District of Columbia the cost of its maintenance, and during that time and under that method Washington has developed from comparative insignificance into one of the most beautiful, one of the most dignified, capitals in the world. Its progress has been noteworthy. But I do not believe our ambitions as legislators should stop at that. We should aim, as I believe is the desire of the people we represent, to stop at nothing short of making Washington the capital of capitals, the fitting majestic seat of government of the greatest of the Nations.

The method pursued for the last 40 years, nearly, has gone far in that direction. Why should we change it now? It has been said in this debate that the people of our districts are being overtaxed for the development and upkeep of the National Capital. It is proposed in this bill to reduce their share of the expense from 50 to 30 per cent, to reduce it in actual cash from about $6,000,000 to about $3,500,000. That is a saving, if you please. But to me it is too insignificant to talk about. If you divided it up among all the people of this country, it would amount to about 2½ cents apiece, and I do not believe that the American people will begrudge this pittance to the beautification and the upkeep of the Capital of the United States.

Our duty in reference to matters concerning the government of the District of Columbia is exceptional, because it is twofold in its nature. We must represent not only the people of the States and the districts that send us here but we must also represent the people who live here, and from whom, because of the fact that they can not speak for themselves, there can be no comeback. It is therefore peculiarly our duty to be scrupulously careful lest, merely because we have a giant's strength, we shall use it like a giant. Statesmen are often too prone, I think, to use Washington as a legislative experiment station. They are too often prone, I think, to attempt to impose upon this particular portion of the American people, and against their protest, laws which they would hesitate to impose upon another portion endowed with the power to translate a protest into retribution. The Capital of the Nation is the last place in the country which should be selected by any legislator to "try it on the dog."

It can not in the long run accomplish any useful purpose to hamper, as I fear that this proposition will at least tend to hamper, the development of Washington. Money spent here is well spent. I can not think that the American people are disposed to haggle over the amount. On the contrary, I believe that posterity will be satisfied with nothing less than that Washington shall be, not in size, perhaps, but in the beauty of its parks and public places and in the dignity of its monuments and buildings, the most impressive and majestic capital that the world has ever known.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. LONGWORTH. I will ask unanimous consent, Mr. Chairman, to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Ohio asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. DAVIS of Minnesota. Mr. Chairman, I yield five minutes to the gentleman from Wyoming [Mr. MONDELL].

The CHAIRMAN. The gentleman from Wyoming is recognized for five minutes.

Mr. MONDELL. Mr. Chairman, the act of June 11, 1878, provided for what is known as the half-and-half plan between the District of Columbia and the Federal Government. There has been more or less dissatisfaction with regard to that plan for a number of years past, culminating in the appointment of the Joint Select Committee whose recommendation was made

to the House and Senate a short time ago—several months ago, in fact.

In the ordinary course of legislative business it would have been the duty of the Committee on the District of Columbia to take cognizance of that report and bring in legislation in harmony with that report, in so far as the findings of the report met their judgment. That committee did not do so, and the Committee on Appropriations, in making up its bill, concluded that it was its duty to legislate in the matter.

There are a number of objections to that form of procedure: First, the Committee on Appropriations has no jurisdiction over legislation of this character. It could not, in the nature of things, give the matter the consideration to which it is entitled. Furthermore, the Committee on Appropriations did not bring in legislation in harmony with the report of the Joint Select Committee. It simply provided that in the future the District revenues should be used, and whatever was necessary over and above that to meet the expenses of the District should be paid out of the Federal Treasury.

This is not the time, this is not the place, to amend the half-and-half plan, either in accordance with the report of the joint select committee or in any other way. It is the duty of the Committee on Appropriations to provide for the expenditures of the District, to bring in its bill, and to bring in the bill in accordance with the law as the committee finds it. Therefore I am against this provision, not that I am unalterably opposed to any change of the half-and-half plan. I think it is possible that we may work out a change from that plan. But I am opposed to a provision such as is contained in this bill, which does not settle the matter, because it does not settle it wisely. It does not legislate upon it in detail, does not follow the plans outlined by the joint select committee, and in my opinion it does not or ought not to meet with the judgment or approval of the membership of the House.

In due time, if this provision goes out of the bill and the bill is otherwise amended, this bill will be in accordance with the existing law relative to the fiscal relations between the District and the Federal Government, and in due course of time the District Committee can bring in a bill modifying those relations as it sees fit. The House can then pass upon that question in a fair, orderly way. It occurs to me that, of all people, the members of the joint committee, whose recommendation is not fairly carried out by this legislation, should oppose it, and that we should all of us oppose it, on the ground that it has not had fair consideration, is not presented to the House by the committee having jurisdiction over the subject, and is not a wise or definite settlement of the question.

Mr. PAGE of North Carolina. Mr. Chairman, I yield five minutes to the gentleman from New York [Mr. FITZGERALD].

Mr. FITZGERALD. Mr. Chairman, those who are opposed to changing the fiscal relations between the District of Columbia and the United States will oppose this provision in the bill. Those who believe that there should be a change in the fiscal relations will favor it. It is idle to talk about modifying the present fiscal arrangements by the consideration of a separate bill. Whoever has been in Washington long enough to find his way from one end of Pennsylvania Avenue to the other knows that such a bill has not the slightest chance of being considered in one body of the Congress.

What is proposed here is very simple. It contemplates that under a fair system of taxation, with a very considerable volume of taxable, intangible property eliminated from taxation, revenue shall be raised in the District of Columbia; that the sum raised each year shall be appropriated to the payment of the sums necessary to maintain the District government in a suitable manner; and that if any additional sums be required they shall be paid out of the general funds of the Treasury of the United States. That is the whole proposition.

Some objection is made to it because the joint commission in its report said that there should be adopted a definite policy of liberal appropriations. That can not be done simply by a resolution to that effect. The definite policy of liberal appropriations is expressed in the annual appropriation bill, and if the Congress be dissatisfied with the recommendations for appropriations, if the Congress believes the appropriations recommended are too great or too small, this is the time to make the changes necessary in the amounts to be appropriated.

Mr. TINKHAM. Mr. Chairman——

The CHAIRMAN. Does the gentleman from New York yield to the gentleman from Massachusetts?

Mr. FITZGERALD. For a question. I have not much time.

Mr. TINKHAM. Does not the abolition of the half-and-half plan leave each District appropriation bill in succeeding Congresses at the mercy and the caprice of each Congress, thereby making the appropriations for the District less definite and less regular than under the half-and-half plan?

Mr. FITZGERALD. Oh, no; there is nothing to that contention. If it were not that I do not want to be discourteous I would say that it was just balderdash. Every appropriation bill is at the mercy and caprice of Congress. Regardless of the amount of revenue raised in the District of Columbia, Congress can appropriate what it sees fit. For years during my service in the House of Representatives, when the District of Columbia was unable to raise a sum sufficient to equal one-half of the money that Congress determined should necessarily be expended for the support and in the improvement of the District of Columbia, Congress advanced out of the Federal Treasury, as a loan to the District, money in excess of the revenues raised by the District. But the appropriations can not be at the caprice of Congress. There are certain fixed and definite charges in the conduct of a municipality which can not be lessened in any substantial way. The police department, the fire department, the school system, the park system, the upkeep of streets, the extensions of sewers and streets, all must be carried on and will be carried on regardless of what the revenues of the District may be.

This is an equitable provision. It does justice to the residents of the District, so far as the taxing laws at present permit, and does justice to the people of the United States. If all of the available property that ought to be taxed were brought within the taxing system the Federal Treasury would be called upon for very little contribution, and even then no injustice would be done to the residents of the District of Columbia. [Applause.]

Mr. PAGE of North Carolina. Will the gentleman from Minnesota use some of his time?

Mr. DAVIS of Minnesota. I yield five minutes to the gentleman from Connecticut [Mr. OAKEY].

Mr. OAKEY. Mr. Chairman, if all of the taxable property in all of the communities of the United States were equitably reached by the taxgatherer the burdens of the people would be very much less than they are at present. However, from some considerable experience in tax levying, I am inclined to think that the taxpayers of the District of Columbia are, indeed, let off easily. I can see no extreme tax burden from a levy of what in our country we call 15 mills, or $1.50 a hundred, with an assessment on a two-thirds valuation of tangible property.

However, this city is just a little different in regard to taxation and its fiscal considerations than most cities, because of the fact that it is a capital city, that it is filled with exempted property, and that certain kinds of industry and business are at least prevented from coming here.

Mr. Chairman, I am one of those who believe in a liberality in regard to District appropriations. I am one of those who believe that the residents of this city ought to be enfranchised. I believe they ought to be represented in this body and the one across the way. I like what has been said here about the future home of our Capital City. I believe the American people will be more inclined to be liberal, to be generous with the appropriations that we may make, to make this our municipal national home as beautiful, as picturesque, and as artistic as possible. I like what is said about the improvement of our beautiful parks, our great buildings, and our memorials. I want to see them extended and beautified, so that this will become indeed the most beautiful city in the world. I want to see that bridge that I have heard so much about, from the Imperial Capital City to the silent city of our heroic dead; that this city indeed, bearing the honored name of Washington, occupying such a beautiful place as it does, shall become the pride of all our people. And I think, Mr. Chairman and my colleagues, in conclusion, that these matters pertaining to our interest should be considered in the open forum of the Committee on the District of Columbia. I think that is the place where these things should be considered and presented to this body, rather than through the doubtful, the mysterious, and I am afraid dangerous policy of an appropriation rider. [Applause.]

Mr. PAGE of North Carolina. Mr. Chairman, will the gentleman from Minnesota [Mr. DAVIS] consume the remainder of his time? There will be only one more speech on this side.

Mr. DAVIS of Minnesota. How much time have I remaining?

The CHAIRMAN. The gentleman has 10 minutes.

Mr. DAVIS of Minnesota. I yield five minutes to the gentleman from Ohio [Mr. FESS].

Mr. FESS. Mr. Chairman, my interest in this particular item is not because I am temporarily a resident of the Capital City, but rather because as a citizen of the State of Ohio I am

interested in the Capital City never becoming less in its importance or in its beauty than it now is. I feel that at times we approach this subject with too much regard to the city itself without reference to its being the Capital. I frequently hear mention of the low taxation rates here. I think that all of us will agree that we must not think of this city just as we would of the city in which we live.

Mr. GORDON. Just why; that is what I would like to know.

Mr. FESS. The reason I have is that the Capital City should be a model city in every feature that pertains to a modern city. We ought to have a model school system that would serve as an example for all the schools in the United States. It ought to have a model street system as an object lesson for all the cities in the United States. It ought to have a model hospital system of a municipal character to serve as a standard for all the hospitals found in any city in the United States. We ought to strive to make this city an object lesson to the country in all the things that stand for efficiency in administration, beauty in street, in park, in all that serves the artistic taste of our people.

Mr. FITZGERALD. Does the gentleman think that the city in which we live ought not to have a model system?

Mr. FESS. I do not mean that they ought not to have a model system, but I am sure that the Capital City is the place necessarily where we ought to expect to find the highest reach of efficiency and achievement of any place in the world.

Mr. FITZGERALD. How will that be affected by people who have not a model system contributing to a reasonable extent in the upkeep of the city?

Mr. FESS. I am not married to any particular plan of half and half other than I want to be assured that a system that has continued for 30 years upon a certain plan of expenditure outlined by the authority of the Government will not be interrupted. We are not going to stop that plan, I trust; but it looks as though we are going to refuse to bear our share of the burden and place it on the District. That is, if we continue the plan that is in view—and I hope we will not only continue it but improve upon it—we should be free to bear the additional burden. I think the park system should be improved far beyond what it now is. The city of Boston has a more beautiful park system than we have here. There are many other cities which have a more ambitious system than in the Capital City. I do not think that ought to be. I think the highest reach in art of every sort ought to be in this city, if for no other reason than that it is the model city of the world, and if we are going to continue supreme authority of Congress in the Capital City we ought to realize that we ought not to put an additional burden on the people here, who do not have any voice in what they are to bear.

Mr. HOWARD. Will the gentleman yield?

Mr. FESS. Yes.

Mr. HOWARD. Does not the gentleman think that in addition to all the model things, we ought to have here the most model system of taxation as to equity and justice and the manner of collecting it?

Mr. FESS. In other words, you would say that if there is a city somewhere in the country that has a lower rate of taxation than this city we ought to have it here.

Mr. HOWARD. I do not. I am talking about the system.

Mr. FESS. What I am talking about is that if this is the Federal Government system we must not be niggardly about it; we must be benevolent, not only to the people of the city but in a degree that this is our Capital City, and we want to make it the most beautiful place in the world. [Applause.]

Mr. DAVIS of Minnesota. Mr. Chairman, I yield five minutes to the gentleman from Kansas [Mr. CAMPBELL].

Mr. CAMPBELL. Mr. Chairman, the only thing I have to say in concluding what is to be said in behalf of the plan that has been in vogue here since 1878 is that the commission found that we were obligated to the bondholders because we entered into a contract with them that we would pay one-half and the District one-half of the District debt and that we should continue it.

The House will to-day say we must keep our contract with the bondholders, and properly so, on recommendation of the commission. But, upon the other hand, under the organic act we have undertaken to carry out a plan for a great city, with schools, hospitals, parks, streets, sidewalks, sewer system, water system, health department, inspections and regulations of every character. We have builded a Capital City upon an extensive plan, and we have paid half of that expense out of the Public Treasury. After we have laid out the plan for expenditures it is now proposed that the Government of the United States withdraw from the contract and no longer pay its share, its half of maintaining the expenses of the Capital of the Nation. The people of the District of Columbia must tax themselves to keep up the Nation's Capital on the plan on which we have started it. We say to the District people: "We legislate for you, but you will pay the burden of the expense. Of course if you are unable to tax yourselves to pay all, we will make up the difference." Mr. Chairman, we start in on this plan by paying about one-third and the District two-thirds. It is stated that there are $8,000,000 in revenue raised by the District this year. Every dollar should be expended, and we should cover every dollar of it in additions to the parks and streets and schools and hospitals. We should pave Pennsylvania Avenue from here to the White House, so that a man who rode over it in an automobile would not think he was riding on a rough sea.

Mr. FITZGERALD. It has only been paved within a year.

Mr. CAMPBELL. Then the paving contractor ought to make his work good.

Mr. FITZGERALD. We can not pave the street every year.

Mr. CAMPBELL. It ought to have been better paved, so that would not be necessary. Then, too, there are many streets in the city not properly lighted.

Mr. FITZGERALD. Where?

Mr. CAMPBELL. Nineteenth Street from Pennsylvania Avenue north and south and Twentieth Street from Pennsylvania Avenue north and south. There are 100 blocks in this city where people live and pay taxes where the streets are not properly lighted. There are many things the Capital of the Nation requires that may not be required in other cities.

Mr. GORDON. Name some of those cities; name one.

Mr. CAMPBELL. The standard of streets and parks and of beauty required by your people when they come here. They are disappointed when they come here and do not find what they saw when they were in Berlin, Paris, or Petrograd. They expect to find in the Capital of their country better streets, better parks, better surroundings than in any capital of any nation on earth, and they have a right to. The people of the country are not penurious about these matters. It is only their Representatives here who make a show of economy by lack of proper appropriations for the Nation's Capital. [Applause.]

Mr. PAGE of North Carolina. Mr. Chairman, I yield five minutes to the gentleman from Ohio [Mr. GARD].

Mr. GARD. Mr. Chairman, that which is before this committee now is simply a plain business proposition. We have heard a great deal about the so-called organic act and about the development of the city of Washington. Concerning the development and continuance of the city of Washington as a beautiful city and as a city fit in every way to be the Capital of this great Nation, I am sure everyone here is in accord, but there is a great deal of noise made about this so-called organic act which has no basis in merit. The truth of the matter is this, that that which is called the organic act, the act of 1878, was simply passed because of a then existing necessity. At about that time the city of Washington had many civic improvements. The streets were being rebuilt and paved, sewers and water extensions were being put in, and the city of Washington was being transformed from a town into a city. Naturally a great expense attached thereto, and the city at that time found itself unable to cope with this additional expense, whereupon the act of 1878, this so-called half-and-half contribution, was suggested as a temporary expediency in order to help the District of Columbia and more particularly help the city of Washington.

As time has gone on, as the city of Washington has developed from a town into a city, as the taxable assets have increased, as the population has increased, there no longer exists any reason for the continuance of this half-and-half contribution. There is absolutely no reason why the Government should contribute dollar for dollar to the expenses of maintaining the municipal government in the city of Washington and in the District of Columbia.

Mr. TINKHAM. Mr. Chairman, will the gentleman yield?

Mr. GARD. For a question.

Mr. TINKHAM. Are not the taxable assets being reduced each year by the Federal Government taking property, are not the streets being increased, and are they not having much more money spent upon them because of their breadth, because this is the National Capital, and is not this Congress passing legislation continually to prevent industrial establishments coming here?

Mr. GARD. Mr. Chairman, I decline longer to yield. A time may come when additional space will be needed by the General Government, and if such time does come then the General Government is still in a position through its acts of Congress to afford all necessary relief to the District of Columbia and the city of Washington. I will say that this is the only town in the United States, necessarily the only town, where any sum of

money is contributed from national finances toward carrying on the expenses of the municipal government. This is the plain business proposition: The tax rate here is fixed and it is certain, and that is all that is asked from the residents of the District. The Federal appropriation for local expenses is $3,600,000 in this bill, over $2,000,000 in another bill, in all over $5,500,000, and now if the half-and-half plan is continued as some gentlemen want, it would mean that the Government contribute under this bill, instead of $3,600,000, $8,300,000, which nobody says they have any need for and nobody wants. That is the plain business proposition. There can be no defense in the system of taxation of piling up unnecessarily at the expense of all of the people of the United States a sum of money which is not needed and not even asked for by those who have knowledge of municipal needs. [Applause.]

Mr. PAGE of North Carolina. Mr. Chairman, without any criticism and with great commendation for the members of the special committee investigating the fiscal relations between the United States Treasury and the District of Columbia, had I been a member of that commission I should have reached a slightly different conclusion from that reached by them.

There is no other spot, large or small, within the boundary of the United States bearing the same relationship to the Nation as does the District of Columbia, set aside by mandate of the Constitution as the seat of government, to be directly and immediately under the control of the Congress, in order that there might be no conflict of authority.

The city population and private ownership of property are merely incidental and in no degree change the national character of the District nor the national obligation to maintain and control it. The very fact that it is a national city, the Capital of a great Republic, makes it an attractive place of residence. It does not follow, however, that the person whose necessity or preference brings him here should be exempted from the usual and ordinary obligations of citizenship, nor should he be penalized by being required, because of his residence, to contribute more largely to the support of the Government than do those citizens living elsewhere under the flag.

In my judgment much confusion exists in the minds of Members of Congress attempting to deal with this question, for the reason that they think of Washington as a municipality and undertake to compare it with other cities incorporated under States laws and constituting a part of the State in which they are located.

This same thought is uppermost in the minds of those who reside here, ignoring or forgetting the peculiar relationship to the Nation of that territory embraced within the District of Columbia.

There is nothing local about it. It is the one national city.

The resident property owner is not a citizen of Washington or the District of Columbia in the same sense that I am a citizen of North Carolina. By choice he relinquishes his rights of municipal or State citizenship when he elects to permanently reside within the District and becomes a citizen of the Nation exclusively.

Mr. FESS. Mr. Chairman, will the gentleman yield?

Mr. PAGE of North Carolina. Yes.

Mr. FESS. Is there not a little difference there? The residents of Baltimore, for example, have some voice in the Government.

Mr. PAGE of North Carolina. It was intended that the residents of this District should never have a voice or a vote.

Mr. FESS. And for that reason should the tax rate be as high as where the resident does have a voice and a vote?

Mr. PAGE of North Carolina. I do not think that we compensate any of those people from whom we take the franchise anywhere else by lowering the rate of taxation.

Mr. FESS. I am assuming that we will not give the franchise. I am not in favor of that, but I am in favor of taking more of the burden ourselves.

Mr. PAGE of North Carolina. He enjoys the same right of protection to his person and property, the same advantages of schools, hospitals, and other conveniences that people living elsewhere enjoy, and should make his contribution to the general fund that other people must contribute to obtain these advantages—this and nothing more.

Therefore I believe that an assessment and tax levy should be made upon privately owned property within the District of Columbia in like amount and at a like rate as is placed upon the property of people living in other places enjoying like benefits, and every dollar so collected should be paid, not into a supposed municipal treasury but into the Treasury of the United States to the credit of "miscellaneous receipts."

Then the first paragraph of this bill should read: "The following sums are hereby appropriated, out of any money in the Treasury not otherwise appropriated, for the support of the government of the District of Columbia for the fiscal year ending June 30, 1917, and for other purposes."

No divided obligation or responsibility, no quarreling over percentages, but a National Capital supported, enlarged, beautified by the whole people from the Common Treasury, the pride of the Nation, in time the marvel of the world, and a constant joy to all those who reside in it.

I believe that this paragraph should be adopted, and that the man who votes to have this old, inadequate fiscal policy continued is voting against the interest, and the best interest, of the Capital of his Nation. [Applause on the Democratic side.]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Massachusetts [Mr. TINKHAM].

The question was taken, and the Chair announced that the ayes seemed to have it.

Mr. TINKHAM. Mr. Chairman, I demand tellers.

The CHAIRMAN. Those in favor of ordering tellers will rise and stand until counted. [After counting.] Seventeen; not a sufficient number, and tellers are refused.

So the amendment was rejected.

The Clerk read as follows:

The following sums are appropriated out of the revenues of the District of Columbia to the extent that they are sufficient therefor and the remainder out of any money in the Treasury not otherwise appropriated in full for the following expenses of the government of the District of Columbia for the fiscal year ending June 30, 1917, namely:

Mr. MONDELL. Mr. Chairman, I make the point of order against this paragraph that it is a change of existing law, not made in order by the special rule, and does not come within any of the exceptions to the general prohibition against legislation on all appropriation bills laid down in Rule XXI.

Mr. PAGE of North Carolina. Mr. Chairman, the first paragraph of the bill having been made in order and having been adopted by the committee, it seems to me that it necessarily follows that the language contained in the second paragraph, to make the application of the first paragraph, is in order. I frankly confess that had I considered this question, to make assurance doubly sure, I might have included it within the rule. I do not think that the gentleman's point of order is well taken.

Mr. MONDELL. Mr. Chairman, the gentleman in charge of the bill, who is a good parliamentarian, does not deny the force of the point of order, but he presents for the consideration of the Chair a new, novel, and curious theory, unknown heretofore to parliamentary law, to wit, that a rule having made one part of a section in order, the balance of the section is made in order by reason of the adoption of that rule. Now, I submit to the Chair that is not sound reasoning. The question as to whether or not this paragraph is subject to a point of order depends solely and wholly on the paragraph itself, unaffected by anything that precedes or follows it. Now, if the Chair will indulge me, I want to make this observation: If the gentleman in charge of the bill had insisted that this paragraph was in order under the Holman rule, he might at least have had some excuse for that argument. It is not, however, in order under the Holman rule, as the Chair, who, I have no doubt, is familiar with the rule, very well knows. The Holman rule is as follows:

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law, unless in continuation of appropriations for public work and objects as are already in progress. Nor shall any provision in any such bill or amendment thereto changing existing law be in order, except as being germane to the subject matter of the bill shall retrench expenditures by the reduction of the number and salary of the officers of the United States, by the reduction of the compensation of any person paid out of the Treasury of the United States, or by the reduction of amounts of money covered by the bill.

Now, this paragraph does not accomplish any of those objects. It does not, therefore, come within the provisions of the Holman rule. There is, it is true, a proviso to the Holman rule which provides that upon the report of a committee or a joint commission authorized by law, or the House, or the House Members of any such commission, having jurisdiction of the subject matter an amendment germane to the subject matter of the bill which shall retrench expenditures is in order. But this is not presented by a committee having jurisdiction of the subject matter. It was presented by the Committee on Appropriations that has no legislative jurisdiction in this regard.

Now, to come back to the genesis of the thing. Let me call the attention of the Chair to the fact that the act of 1878 very clearly and definitely provided for the payment of these appropriations, one-half out of the District treasury and one-half out of the Treasury of the United States. That is the law; it has never been superseded, modified, or amended. Now, it is proposed in an appropriation bill, presented by a committee having no jurisdiction over the legislation, to modify and change that

provision of law. It can not be done in this way, Mr. Chairman.

Mr. CRISP. Mr. Chairman, I desire to present this thought to the Chair in passing upon the point of order, and it seems to me the point of order is not well taken. It is a rule of this House—and if the Chair desires it I can cite several authorities on this subject—that where a provision is in an appropriation bill, and that provision itself is not in order, it is in order to further amend that proposition by other germane legislation—legislation that as an original proposition would itself be out of order. Now, the House has refused to strike out of this bill the first section, which repeals the act of June 11, 1878, and provides that the revenues raised from the District of Columbia shall first be used. Now, the paragraph of the bill to which the gentleman from Wyoming lodges a point of order is the natural logical sequence of the first paragraph of the bill, which is in order under the special rule. It seems to me that the paragraph in question is germane, relates to and necessarily follows the first paragraph, and therefore is in order.

Mr. MONDELL. Mr. Chairman, I am very much surprised at the line of argument made by the gentleman from Georgia [Mr. CRISP], who is a splendid parliamentarian. We all know that a provision not in order under the rules, if not objected to or if made in order by a special rule, may be further amended. That is true; there is no question about that. But that is not the situation at this time. While the first paragraph was under discussion, made in order by the special rule, it would have been entirely in order to have offered this paragraph as an amendment, as a proviso. It certainly would have been in order to have amended that paragraph with any amendment that was germane to it, but nothing of the sort was done. That paragraph was disposed of. The House has acted upon that matter; it is out of the way; it is no longer before us; and we are now on an entirely different and distinct proposition. It seems to me it is not necessary to argue this further point with the Chair, but, if the Chair will allow me, let me illustrate how illogical the argument of the gentleman from Georgia is. These two paragraphs do not, as a matter of fact, relate to the same matter. One is a change in existing law for all future time. The other, the one now before us, is a provision relative to the appropriations contained in this bill.

Mr. PAGE of North Carolina. Will the gentleman allow me an interruption?

Mr. MONDELL. Certainly.

Mr. PAGE of North Carolina. The gentleman's last statement is unquestionably true and showing its close relationship to the paragraph already accepted by the House and made in order it uses the same language as to how the money shall be expended.

Mr. MONDELL. But surely my friend will not contend—I am sure he will not contend—that the matter having been made in order by a special rule and disposed of, you can thereafter bring in other matters that are subject to a point of order on the theory that they have some relation to what has already been disposed of by the House.

Mr. HOWARD. Mr. Chairman——

Mr. MONDELL. Just let me suggest to the gentleman what that would lead him to. Under that theory we could continue to the end of the bill and add all sorts of amendments on the theory that one paragraph in the bill having been made in order and disposed of another paragraph germane to the subject matter of the paragraph thus made in order is in order thereafter simply because it relates in a way to the same general subject. It is a most extraordinary theory that making one paragraph in order by a special rule makes in order thereafter every proposal of legislation that in the remotest way relates to the same general subject.

Mr. HOWARD. Mr. Chairman, if the Chair will bear with a parliamentary tenderfoot for a moment, I have one suggestion I desire to offer. The point of order raised by the gentleman from Wyoming [Mr. MONDELL], in my judgment, is not good for this reason, that the second paragraph, and its relation to the first paragraph, made in order by the rule, simply does this. It simply carries into effect, so far as the provisions of the first paragraph are concerned, the provisions of the first paragraph as applicable to the appropriations in this bill. They are inseparable for this reason, that the first paragraph abolishes what is now known as the half-and-half plan. It says how the revenues of the District of Columbia shall be applied, how much shall be paid out of the Treasury, and the second paragraph says that the application of the first paragraph to the appropriations carried in this bill shall be done in like manner.

In other words, it would be the height of legislative folly to hold the first paragraph in order and to hold the second paragraph out of order, because the law contained in the first paragraph could not possibly be administered without the following paragraph that is incorporated on page 2 of the bill. Therefore they are inseparable. One is obliged to follow, as the gentleman from Georgia [Mr. CRISP] says, as a sequence to the other.

Mr. MONDELL. I appeal to the gentleman's own excellent judgment to show how illogical his proposition is. He is assuming that the first paragraph, having been made in order and having received an affirmative vote, is law. It is not anything of the kind. It is simply an expression of opinion on the part of the committee. The law still stands and will stand until both bodies of Congress and the President have, acting together under the Constitution, changed it, and it does not change the situation because a certain thing was made in order under the rule.

Mr. HOWARD. Will the gentleman state how this second paragraph, then, will be in any different situation than the first paragraph if we do the same thing to the second paragraph that we did to the first paragraph, namely, express an opinion about it? They are on all fours.

Mr. MONDELL. The difference between the two paragraphs, I will say to my friend, is that the Committee on Rules, or whoever it was made up the rule, "slipped a cog," if I may use that expression. They should have covered both paragraphs by the rule. They failed to do it. That is not my fault. I am taking advantage of the fact that they did not provide in their rule to accomplish that which they sought to accomplish, and they can not come in here now and plead the "baby act" that, having brought in a certain provision which otherwise would have been out of order, thereafter they may propose and have considered all sorts of propositions out of order if they tend to relate to the same general subject.

The CHAIRMAN. The gentleman from Wyoming makes a point of order on the language on page 2, from line 4 to 10, inclusive, asserting it to be a change of existing law, and asserting it not to be one of the exceptions made by the Holman rule or any other exception in the rule; also asserting that it is not made in order by the special rule. Of course an examination of the special rule discloses that it is not made in order by reason of the special rule. The Chair thinks, however, that inasmuch as the paragraph against which the point of order is lodged merely contains a repetition of the language in the first paragraph plus the necessary words "of appropriation," necessarily appropriating the money to carry that into effect——

Mr. MONDELL. Before the Chair goes further, will he allow me just a moment? I do not want to see the Chair go wrong on as important a matter as that. The Chair seems to have it in mind that this paragraph simply follows the former paragraph and really is surplusage. That is not true. The first paragraph provides that "hereafter all appropriations made for the support of the government of the District of Columbia," and so forth, and this paragraph provides that "the following sums are appropriated out of the revenues of the District of Columbia." They are two very different and distinct matters. It might be held that if this item went out entirely the former paragraph would accomplish what is sought to be accomplished in this paragraph. I do not think it would. The two things are entirely dissimilar in their character and in what they seek to accomplish.

The CHAIRMAN. The Chair thinks that the language on page 4 just referred to merely consists of a repetition of words already made in order and the necessary language carrying into effect and appropriating money provided for in the first paragraph. While the Chair does not claim to be infallible, neither does he think that he is the last word on the subject of rules; he does think the paragraph under discussion to be ancillary and a necessary incident thereto. The Chair thinks there is no question that it would be in order as an amendment to the former paragraph, having in mind that the first paragraph was made in order by the special rule. Hence the Chair overrules the point of order.

Mr. SMALL. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

The CHAIRMAN. The Clerk will read.

Mr. PAGE of North Carolina. Mr. Chairman, I call the attention of the Chair to the fact that the bill has been read down to and including line 11 on page 22.

The CHAIRMAN. The gentleman is right about that. The Clerk will read.

The Clerk read as follows:

Repave with asphalt the roadway of Fourteenth Street NW., from Pennsylvania Avenue to F Street, 70 feet wide, $7,500.

Mr. TINKHAM. Mr. Chairman, I desire to make a point of order against the appropriation in lines 8 to 10.

The CHAIRMAN. On what page?

Mr. TINKHAM. On page 23, just read. Under Rule XXI, section 2, it says:

No appropriation shall be reported in any general appropriation bill, or be in order as an amendment thereto, for any expenditure not previously authorized by law.

As I understand the law, no street can be widened without authority of Congress. If that is so, then this appropriation is subject to a point of order, as it is an expenditure not previously authorized by law.

Mr. HOWARD. Mr. Chairman, I do not think the point of order made by the gentleman from Massachusetts is well taken for this reason. Under the existing law, as found in section 77 of the District Revised Statutes, with which I presume the gentleman is not familiar, or he would not have made this point of order, the commissioners are given this power. I do not think this has ever been repealed, except possibly there has been a limitation and restriction placed upon it. But this is the general fundamental law that has been under the revision of the courts of the District of Columbia:

The board of public works shall have entire control of and make all regulations which they shall deem necessary for keeping in repair the streets, avenues, alleys, and sewers of the city, and all other works which may be intrusted to their charge by the legislative assembly or Congress.

Now, in the appropriation bill of 1907 this provision is contained:

For work on streets and avenues in Appendix A—

And so forth, which I will not read, and then they go on and name some streets, and continue:

Provided, That hereafter no street or avenue in the District of Columbia shall be paved less in width than the width now provided by law, except upon express authority of Congress, upon estimates to be submitted to Congress by the Commissioners of the District of Columbia.

Now, there is absolutely no inhibition on widening streets, but the inhibition in the statute, which is the existing law, is that they can not make them narrower.

Now, here is the proposition on Fourteenth Street, from Pennsylvania Avenue to F Street, as contained in the present bill: The sidewalk on the west side—and that is what the gentleman from Massachusetts [Mr. TINKHAM] is probably trying to protect here from disturbance—is alongside the hotel property. They have a sidewalk there 36 feet wide, and they occupy all that space under the sidewalk, which is very valuable to them, under this street, and they do not want their permissions disturbed. The roadway on Fourteenth Street from F Street to G Street is 70 feet wide, and by some hook or crook this particular privileged character in the District of Columbia has gone out on the west side of this street, from Pennsylvania Avenue up to F Street, and taken in 36 feet of sidewalk. The commissioners, in an attempt to straighten Fourteenth Street, to make the roadway the same width all the way up from Pennsylvania Avenue, have asked an appropriation for restoring this street along that block to its proper width; they have asked so much money to make this street 70 feet wide.

Now, the point of order made by the gentleman from Massachusetts [Mr. TINKHAM] is that there is no legislative authority for it. The legislative authority distinctly says that these commissioners can not make a street narrower. Now, they have the authority to do the reverse of it, to wit, to widen a street; and here is the law. I would like to have the gentleman answer that.

Mr. JOHNSON of Kentucky. Will the gentleman yield there?

Mr. HOWARD. Yes.

Mr. JOHNSON of Kentucky. Is this one of the wide streets that is a burden to them?

Mr. HOWARD. Yes; I suppose this is one of the wide streets that is a burden to them.

Mr. MADDEN. Mr. Chairman, will the gentleman yield there for a question?

Mr. HOWARD. Yes.

Mr. MADDEN. What is the ordinary sidewalk width along Fourteenth Street in other places?

Mr. HOWARD. I can only give the gentleman information as to the other side of the street.

Mr. MADDEN. I suppose they have a uniform width, except at that place?

Mr. HOWARD. Yes; 70 feet is the usual width of the roadway.

Mr. MADDEN. There must be a uniformity of width in the sidewalk everywhere?

Mr. PAGE of North Carolina. No; there is not everywhere. It varies on different streets.

Mr. MADDEN. On that particular street?

Mr. PAGE of North Carolina. Without attempting to be absolutely correct, I think on most of the streets it is about 12 feet.

Mr. MADDEN. Then I suppose all above 12 feet is an encroachment on the street?

Mr. PAGE of North Carolina. Yes.

Mr. HOWARD. I will say to the gentleman that the sidewalk on that street, on the west side, where the roadway of Fourteenth Street runs into the sidewalk, is 36 feet wide. Now, that is the widest sidewalk of which I have any knowledge in the District of Columbia.

Mr. MADDEN. What I was trying to get information on is what is the width of the sidewalk at every place else except at this place?

Mr. HOWARD. It is 20 feet.

Mr. MADDEN. Then they are 20 feet in excess?

Mr. HOWARD. Yes; they are 20 feet in excess. The committee wanted to straighten Fourteenth Street by taking off that width from this sidewalk.

Mr. EVANS. Mr. Chairman, may I ask the gentleman a question?

Mr. HOWARD. With pleasure, sir.

Mr. EVANS. Is it not a fact that about all of Fourteenth Street, along there, that is not occupied by the sidewalk is occupied by taxicabs?

Mr. HOWARD. Yes. That is the very reason why the commissioners want to straighten that funnel down to the Avenue for traffic. Of course, that applies to the merits of it. I would like to defend the committee's action in the matter and commend the good judgment of the District Commissioners, but that does not apply to the parliamentary situation.

Mr. MADDEN. The commissioners are not seeking to widen the street, but are simply seeking to widen the roadbed?

Mr. HOWARD. Yes; to widen the roadbed. They are not going to tear down anybody's playhouse.

The CHAIRMAN. The gentleman from Massachusetts [Mr. TINKHAM] makes a point of order against the language on page 23, lines 8 to 10, inclusive, on the ground that it is legislation added on an appropriation bill in contravention of paragraph 2 of Rule XXI. The gentleman from Georgia [Mr. HOWARD] presents a law here in which there is an inhibition against narrowing streets. The Chair thinks he would have to go a long way to prove that that would authorize the widening of the street, and the Chair is inclined to sustain the point of order, and does sustain it.

Mr. JOHNSON of Kentucky. It is not a proposition to widen the street. It is a proposition to widen the roadbed to the extent that they have legally the right to widen it.

Mr. HOWARD. Mr. Chairman, it is an incident. It does not change the width of the street. From building line to building line across that street the distance is not changed an atom, but by this provision we simply desire to cut off some of the sidewalk and restore it to the street or roadway where it is now being usurped by a certain concern, which makes the roadway along this particular block 20 feet narrower than the roadway along the rest of the street. We simply want to lower the sidewalk to the roadbed. That is all. It is not narrowing; it is not widening. It is doing nothing but lowering the sidewalk and making a roadway for vehicles instead of a sidewalk for pedestrians.

Mr. TINKHAM. Mr. Chairman, there is no such explanation in the bill.

Mr. HOWARD. In other words, if we had asked for the removal of an obstruction out of the street, which we have specific authority here to do under the law, we would probably have reached this matter in another way, because of the fact that the street in this block—that is, the roadway——

The CHAIRMAN. If any property owner transgresses upon or extends his private holdings out upon the public thoroughfare, is there not a criminal statute under which he can be proceeded against for obstructing the street?

Mr. HOWARD. I do not know about that; and I will admit that if we wanted to go in and tear down a wall or encroach upon private property for the purpose of widening this street, the point of order of the gentleman from Massachusetts [Mr. TINKHAM] would be good.

Mr. JOHNSON of Kentucky. But we do not want to go beyond our own property.

Mr. HOWARD. But under the law of the land the streets from building line to building line are the property of the United States Government. In the Van Ness case (4 Pet., 232) the United States Supreme Court squarely decided, in an opinion by Justice Story, that the United States had "an absolute, unconditional fee simple" in the streets and public squares of the city under the conveyance by the original proprietors.

There was elaborate argument by eminent counsel, including Taney, afterwards Chief Justice of the United States, for Van Ness, and Daniel Webster and William Wirt and Attorney General Berrien on the other side.

The case of Smith *v.* Washington (28 How., 135), decided in 1857, which has been quoted as modifying the opinion in the Van Ness case, did not pass upon the Van Ness case or the question involved in it; and the Supreme Court, since the Smith case, has repeatedly approved the Van Ness case. (See Steamboat Co. case, 109 U. S., 672, and Morris *v.* United States, 174 U. S., 196.)

Under the Van Ness decision the United States could close or sell any of the streets and reservations in the original city of Washington. As Representative Garfield said in the House June 19, 1876:

> They (the fathers) went even further. They went so far as to arrange that the fee simple of the streets of the Federal city should be exclusively and only in the Government; and, so far as I know, it is the only city on the globe that owns the fee simple to every foot of the streets in it. We could build a block of buildings all the way from the western front of our Capitol to the Treasury, filling Pennsylvania Avenue from side to side, if we chose to do so, because we own every foot of the ground

Now, we do not want to encroach on the rights of anybody. We want to do a certain thing with our own property—to widen the roadway 20 feet to make it conform with the width of the street so far as that street runs through the city.

Mr. JOHNSON of Kentucky. And we ask for nothing but the money to do it with.

Mr. HOWARD. The street is 70 feet wide, except upon this particular block; and on account of the congestion of the traffic the commissioners wish to change this width, to take 20 feet of sidewalk and apply that 20 feet of sidewalk to 20 feet of roadway. That is the simple proposition.

Mr. JOHNSON of Kentucky. Mr. Chairman, if you will permit me to say it, no authority is asked to change a law or to make a law. They are asking for $7,500 to do work upon a roadway that belongs to the Federal Government, established long ago. In the beginning the lawmakers chose to make the roadway narrower. Now they ask for the money—and for nothing else except the money—to build the roadway upon property which has already been set aside for street purposes.

The CHAIRMAN. The Chair will ask the gentleman if this requires the purchase of any new property at all?

Mr. JOHNSON of Kentucky. None at all.

The CHAIRMAN. The property that is proposed to be paved already belongs to the Federal Government?

Mr. JOHNSON of Kentucky. Absolutely.

The CHAIRMAN. Who occupies it now?

Mr. PAGE of North Carolina. It is occupied by the sidewalk. When they originally paved the roadway of Fourteenth Street in this block between Pennsylvania Avenue and F Street, instead of paving it to the full width of 70 feet, as they did north and south of it, the commissioners paved it 50 feet wide, and made the sidewalk wider. We merely propose, by widening the pavement, to take the city's property that is now used as a sidewalk with which to widen the roadway and make it conform to the width of the roadway both north and south of this block.

Mr. JOHNSON of Kentucky. Just to transfer from sidewalk to driveway; that is the only difference.

The CHAIRMAN. What does the gentleman from Massachusetts [Mr. TINKHAM] say about that?

Mr. TINKHAM. Mr. Chairman, I say that the condition of the street as it now exists is in accordance with law, and that no change can be made in that street without new legislative action, and that this is legislative action which is asked, and therefore is subject to a point of order.

Mr. HOWARD. Will the gentleman from Massachusetts yield for a question?

The CHAIRMAN. The Chair wishes to ask the gentleman from Massachusetts where is the authority that authorizes these sidewalks to be laid by private parties upon Government property? Has the gentleman that authority?

Mr. TINKHAM. I have not the authority right in hand, but I understand the sidewalks are properly there by permission of the District government, and that is not denied.

Mr. HOWARD. I will say to the gentleman that there never was any such permit.

Mr. JOHNSON of Kentucky. If there was, it was illegally done.

Mr. HOWARD. If there was any such permit, it was void, because they had no authority to grant it. I want to say that I have diligently investigated this matter for three weeks, and I have all the law there is upon it, and that there is no such provision in existence as the gentleman from Massachusetts states.

Mr. MADDEN. Mr. Chairman, I have no interest in this thing, except to see the tangle straightened out. I think it is within the power of the committee to decide whether the roadway on a given street shall be a certain width or some other width. If the commissioners decide that it is wise to create a uniform width of roadway upon a given street, it is within their power to do that. I assume that they have granted permits to the owners of certain property to encroach upon the roadway of the street within this block; but such permits when granted, as they frequently are in all cities, are granted on condition that they are revocable at the pleasure of those who granted them. There is no doubt about that, and when the person to whom the permit is granted accepts the privilege and acts under it, he acts with the distinct understanding that he is doing it at the pleasure of those who granted the permit.

Now, it can not be said that it is not within the power of the District of Columbia to pave a street to a width of 30 feet or 40 feet or 50 feet or 60 feet, or whatever width they may choose to pave it. It frequently happens that they make a very narrow roadway, and the reason why they do it is because they want to economize. They do not want to impose upon the Treasury the immense burden that would be required by the paving of a wide roadway. On residential streets, for example, it frequently happens that the roadway is only 25 or 30 feet wide, while on business streets it is 50, 60, 70, or 80 feet wide, depending on the width of the street, and it is nearly always uniform on a particular street.

Mr. BUTLER. What is the width of that street, may I ask the gentleman?

Mr. MADDEN. I understand the width of the roadway is 70 feet, except at this point.

Mr. HOWARD. And 50 feet at this point.

Mr. MADDEN. And 50 feet at this point.

Mr. HOWARD. Between Pennsylvania Avenue and F Street it is 50 feet wide, and all the rest of the way it is 70 feet wide.

Mr. MADDEN. I do not think we are doing anything in this provision except to appropriate the money to do that which we already have the authority to do.

The CHAIRMAN. The Chair is ready to rule. A moment ago, when the Chair started to sustain the point of order, he was under the impression that this necessitated the acquirement of new land and the doing of something other than the paving of land that now belongs to the Government. As I now understand the situation, however, it seems to be uncontroverted either by word of mouth or by the existing law that this amendment only authorizes the pavement of a street that now belongs to the Government. It seems to be true part of the street is not at this time used by the Government as a roadway, and it is apparently true that some sort of a permit has heretofore been issued, although nothing definite is here presented to so show. Either that or else a trespass is being committed by the private owners who have built the sidewalk out into the street and are temporarily occupying the same. But, be that as it may, such permit if any there be, even if acted upon, does not rise to the dignity of law; hence this provision repeals no law and therefore does not bring this provision within the rule. The Chair therefore overrules the point of order. The Clerk will read.

The Clerk read as follows:

> For repaving the roadway of B Street NW., from Seventh Street to Ninth Street, on plans to be approved by the commissioners: *Provided*, That the one-half cost of paving said roadway between the north side thereof and a line 20 feet therefrom and parallel thereto between the west building line of Seventh Street and the east building line of Ninth Street shall be assessed against the Washington Market Co. and collected as provided herein for assessments for paving roadways on streets herein authorized to be paved or repaved, $22,000.

Mr. JOHNSON of Kentucky. Mr. Chairman, I move to strike out the last word for the purpose of saying that the history of the Washington Market Co. is very wonderful. It had its origin in one of the most monumental pieces of graft that ever went out of the American Congress. That bill was lobbied through Congress by the then Sergeant at Arms of the House. The bill is singularly peculiar in its very first words of the charter, which incorporated a lot of people who never did and never expected to put the charter into effect. They never intended to put into execution the charter, but they did intend and it followed that it was put into execution by Members of Congress, represented by Mr. Ordway, the then Sergeant at Arms of this body. The capital stock was subscribed largely by Members of Congress and those who were then in control of the government of the District of Columbia.

At that time the stockholders in the Washington Market Co. were the very highest officers in the District of Columbia, and they made a trade between the District of Columbia and the Washington Market Co. by which the District of Columbia was discriminated against and the stockholders of the Washington Market Co. were benefited. The trail of this corporation through its early existence was marked by corruption and fraud, by the destruction of private property of the poor. It has been marked by the torch of the incendiary, and it has been further marked by the destruction of human life.

Mr. Chairman, I ask unanimous consent to extend my remarks upon this subject.

The CHAIRMAN. Is there objection to the request of the gentleman from Kentucky?

There was no objection.

The Clerk read as follows:

The Secretary of the Interior is authorized and directed to transfer to the commissioners for use as a public highway so much of the United States reservation on Nichols Avenue, and designated as parcel 243, one, as may be necessary to open Nichols Avenue with a width of 110 feet from its westerly line as now established.

Mr. JOHNSON of Kentucky. Mr. Chairman, I reserve a point of order against the paragraph.

Mr. PAGE of North Carolina. Mr. Chairman, I can not controvert the point of order that this is not authorized by existing law; but when I drew the rule making certain provisions in order on the bill I did not think this of enough importance to include it. I want to say to my friend that before we allowed this item to go into the bill the subcommittee went out and made a personal examination of this situation with a view of making the avenue meet the purposes for which it was laid out, and this item seemed necessary. We were assured that it was not resented, but acquiesced in, by the National Government. It will be a considerable hardship to the people living in this section if the item goes out, and since it does not meet any opposition from the National Government, the owner of the land, I hope the gentleman will withdraw his point of order.

Mr. JOHNSON of Kentucky. Mr. Chairman, in view of the explanation made by the gentleman from North Carolina, I withdraw the point of order.

The CHAIRMAN. The Chair desires to call the attention of the gentleman from North Carolina to the word "one," in line 19, page 24. Is that correct?

Mr. PAGE of North Carolina. Yes, Mr. Chairman; that is the description given as it relates to this plot.

The Clerk read as follows:

Northwest. Thirteenth Street, Florida Avenue to Clifton Street, pave, $6,700.

Mr. PAGE of North Carolina. Mr. Chairman, I offer the following committee amendment.

The Clerk read as follows:

Committee amendment: Line 10, page 25, insert "Northwest. Champlain Street, Florida Avenue to Kalorama Road, pave, $10,500."

Mr. MONDELL. Mr. Chairman, I shall not oppose the amendment, but I rise to express the hope that before we get through with these appropriations the chairman of the subcommittee will offer many amendments of this sort, taking care of the roadways that are not provided for in the bill. The District Commissioners, in my opinion, and I have given some little attention to their estimates, were careful in making up their estimates for the coming fiscal year, were anxious to provide only for those roads that required immediate care and attention, and my opinion is that they did not estimate for anything that is not needed. And yet in this matter of suburban roads the committee has reduced their estimate from $284,000 in round numbers to $174,000, or $110,000. It is true this amount is an increase over the amount appropriated last year, but that is true because the amount appropriated last year was scandalously inadequate. This year the committee seems to have been fearful that it would depart too radically from its too parsimonious attitude last year. As I understand it, these roads are improved out of the revenues of the District and not charged against the abutting proprietors. Is that true?

Mr. PAGE of North Carolina. They are charged against the abutting proprietors under what is known as the Borland amendment.

Mr. MONDELL. Yes; if it is a permanent roadway.

Mr. PAGE of North Carolina. If it is asphalt.

Mr. MONDELL. But they are not in most cases permanent roads.

Mr. PAGE of North Carolina. No.

Mr. MONDELL. Is it not true that a considerable portion of these roads will be improved out of funds of the District?

Mr. PAGE of North Carolina. They will not if the gentleman from Wyoming and other gentlemen will support the provision made in order on this bill under the rule to include not only asphalt but macadam and all permanent pavements under the provision of the Borland amendment.

Mr. MONDELL. Let me call my friend's attention to the lack of logic in his attitude.

Mr. PAGE of North Carolina. The gentleman from North Carolina makes no special pretense of being logical.

Mr. MONDELL. Or consistent.

Mr. PAGE of North Carolina. Not always.

Mr. MONDELL. He being a member of the Democratic Party, which he honors, I think that is a true confession. [Laughter.] If the amendment which the gentleman refers to is not adopted, and it is not yet, these suburban roads would mostly be built out of public revenues not chargeable to abutting proprietors, and it seems to me it is the wise and proper way to build suburban roads.

Mr. PAGE of North Carolina. Under that provision, if we confine the part payment to abutting property owners on suburban roads, the very street which my amendment provides for, if the amendment be adopted, which will be paved with asphalt running due north from Florida Avenue, would be classed as a suburban road, and the property in the middle of the city enjoying all the benefits of property on the one side of Florida Avenue would be exempt from any participation in the payment and that on the other side would have to participate. Is that logical?

Mr. MONDELL. Mr. Chairman, I admit that there are exceptions to all good rules. It takes exceptions to really prove a rule, it is said, but in the main it is not fair to charge a suburban holder with a road built past his property intended not so much for his use as for the use of the general public in getting from the city out onto the main roads in the country. That is the purpose of these suburban roads in the main; many of them do not add materially to the value of the property. But that was not what I was intending to discuss, but rather this proposition, that under the law as it now exists these roads would largely be built out of the revenues of the District. If the committee is endeavoring to bring itself in line with its new theory of cutting down expenditures so that the Federal Government will pay as little as possible, then the reduction of this estimate might be logical, but if the gentleman expects his amendment to become law and the property owners are to be called upon to pay for this improvement, then why should not we provide for all of these improvements? If the people are to pay for them, as the gentleman thinks they should, why did you not approve them if they are really needed? Why cut out a number of these roads when it is to be assumed the property owner is in favor of the improvement, and the property owner, if the amendment prevails, pays? It seems to me that is not a logical position for the gentleman to take, if he expects the amendment to be adopted, so that the property owners will pay for the work. Why not have the work done? It is not going to cost the Government anything in the long run.

Mr. PAGE of North Carolina. Mr. Chairman, in reply to the gentleman's criticism of the committee as to the meagerness of this appropriation, let me say that last year we appropriated $118,700 for the suburban roads in the District of Columbia. The present bill carries $284,450, or an increase of more than 120 per cent. I do not think that is very slow progress.

In answer to the gentleman's other inquiry as to why, if we expect the amendment in this bill requiring the abutting property owners to pay a certain part for the paving of these suburban roads to be adopted, we do not include the whole amount as estimated by the commissioners, the gentleman and the committee must remember that there is a limitation upon the ability of the organization to accomplish within a year more than a certain amount of work, and your committee thought that if we gave them twice as much work to do during the next fiscal year and twice as much money with which to do it they would probably accomplish it within the life of the appropriation, while if we gave them more they would not. That is all I have to say about the proposition.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

Northeast. Ord Street, Kenilworth Road to Forty-fourth Street, grade and improve, $2,900.

Mr. PAGE of North Carolina. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

After line 4, on page 26, insert:
Southeast. Portland Street, Nichols Avenue to Fourth Street, grade, $10,500.

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

Under and in accordance with the provisions of subchapter 1 of chapter 15 of the Code of Law for the District of Columbia, within six months after the passage of this act, the commissioners are authorized and directed to institute in the Supreme Court of the District of Columbia a proceeding in rem to condemn the land that may be necessary for the extension of Seventeenth Street NW., from Kenyon Street to Irving Street, with a width of 90 feet, said extension to be in direct line with Seventeenth Street as it now exists north of Kenyon Street: *Provided, however,* That the entire amount found to be due and awarded by a jury in said proceedings as damages for and in respect of the land to be condemned for said extension, plus the costs and expenses of the proceeding hereunder, shall be assessed by the jury as benefits;

There is appropriated out of the revenues of the District of Columbia an amount sufficient to pay the necessary costs and expenses of the condemnation proceeding taken pursuant hereto and for the payment of the amounts awarded as damages, to be repaid to the District of Columbia from the assessments for benefits and covered into the Treasury to the credit of the revenues of the District of Columbia;

Mr. MONDELL. Mr. Chairman, I want to ask the chairman of the committee with regard to this paragraph relative to the widening of Seventeenth Street, from Kenyon to Irving, to 90 feet. Did the committee feel that it was necessary, in widening that street, to widen it to the extent of 90 feet? That will be a very expensive procedure, it seems to me.

Mr. PAGE of North Carolina. If the gentleman is acquainted with the locality, and I think he is——

Mr. MONDELL. I am familiar with it.

Mr. PAGE of North Carolina. The representation to your committee was that this street should be widened at this place into Irving Street to the full width as provided on the highway plan. The gentleman understands that this includes not the roadway, but the sidewalks as well—that it is from building line to building line, as it is laid out on Seventeenth Street.

Mr. MONDELL. The street is now very narrow?

Mr. PAGE of North Carolina. Yes.

Mr. MONDELL. It ought to be widened?

Mr. PAGE of North Carolina. I think so.

Mr. MONDELL. But is there not an apartment house on one side? If the street is to be widened in line with the extension of Seventeenth Street, it would cut into that apartment house, would it not?

Mr. PAGE of North Carolina. No. I am assured by the engineer commissioner that it will not interfere with any property now constructed or any building line that has been established, and the apartment to which the gentleman refers is farther up on Seventeenth Street than this particular part. There is not a building on either side of this proposed extension of Seventeenth Street from Kenyon to Irving Street. That is over what was a few years ago a very deep ravine, which has been filled up by a dump. This fill is still extending down toward Rock Creek Park, and a communication into Irving Street can now be made over the dump.

The Clerk read as follows:

In all, $174,950.

Mr. PAGE of North Carolina. Mr. Chairman, I ask unanimous consent that the Clerk may be given permission by the committee to correct this total and other totals affected by amendments offered.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that the Clerk be given authority to correct totals. Is there objection?

There was no objection.

The Clerk read as follows:

To carry out the provisions contained in the District of Columbia appropriation act for the fiscal year 1914, which authorizes the commissioners to open, extend, or widen any street, avenue, road, or highway to conform with the plan of the permanent system of highways in that portion of the District of Columbia outside of the cities of Washington and Georgetown, there is appropriated, payable entirely from the revenues of the District of Columbia, such sum as is necessary for said purpose during the fiscal year 1917.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. I want to ask the chairman of the subcommittee just what necessity there is for the last sentence of this paragraph, "payable entirely from the revenues of the District of Columbia," in view of the provisions of the first section of the bill? These sums are all to be paid out of the revenues of the District of Columbia, and I assume that this is simply a relic of the former fiscal plan.

Mr. PAGE of North Carolina. Mr. Chairman, we left this language in because the first section of this bill was not at that time adopted by the committee. If this bill is enacted into law as it now stands, I agree with him that this should be stricken out, and if the gentleman cares to offer an amendment to that effect——

Mr. MONDELL. Oh, no.

Mr. PAGE of North Carolina. I do not think we ought to strike it out now, and I merely want to give the gentleman the assurance that before the bill does become a law, providing the first section is kept in, we will endeavor to make this language in each instance conform to the first section of the bill.

The Clerk read as follows:

The authority given the commissioners in the District of Columbia appropriation act approved March 2, 1907, to make such changes in the lines of the curb of Pennsylvania Avenue and its intersecting streets in connection with their resurfacing as they may consider necessary and advisable is made applicable to such other streets and avenues as may be improved under appropriations contained in this act: *Provided,* That no such change shall be made unless there shall result therefrom a decrease in the cost of the improvement.

Mr. TINKHAM. Mr. Chairman, I desire to make a point of order against the section, lines 24 and 25, page 29, and lines 1 to 8, page 30, just read, as being new legislation not authorized in the special rule.

The CHAIRMAN. What has the gentleman from North Carolina to say about that?

Mr. PAGE of North Carolina. Mr. Chairman, this provision has been carried in several appropriation bills in this same language. I do not know, in fact I am inclined to think that does not make it in order simply because it has been carried year after year in appropriation bills, but this is not new to this appropriation bill. It has been carried in others, and no objection has been raised to it. The gentleman from Massachusetts in making the point of order will not effect the purpose that he had in view when he made the other point of order. It does not change any existing law, however, that I know anything about. I know of no law contrary to the provisions of this bill.

The CHAIRMAN. Does the gentleman from Massachusetts insist upon his point of order?

Mr. TINKHAM. No; Mr. Chairman, I do not.

The CHAIRMAN. The gentleman withdraws the point of order, and the Clerk will read.

The Clerk read as follows:

Repairs to suburban roads: For current work of repairs to suburban roads and suburban streets, including the purchase of four motor cycles, and one truck at a price not exceeding $1,000, in lieu of four motor cycles and one truck to be exchanged, and including maintenance of motor vehicles, $150,000.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. I shall not offer an amendment increasing this item to the amount of the estimate of the District Commissioners, but I simply rise to suggest that even though we do halt the work of new surfacing, we should at least give what the District Commissioners ask for the purpose of keeping the suburban roads in condition. I am not one of those lucky people who own an automobile, or at least not one of those who have one at this time, but I am told by my friends who have that the suburban roads of the city are not in good condition at this time, and I am of the opinion that all of this money is needed. I am sorry the committee did not see fit to allow the full estimate.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn.

There was no objection.

The Clerk read as follows:

For painting the ironwork and repairing the fenders of the bridge, $10,000.

Mr. MONDELL. Mr. Chairman, I offer an amendment as a new paragraph.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

After line 13, on page 31, insert the following as a new paragraph: "For preparation of plans for the construction of a bridge to take the place of the existing Calvert Street Bridge, $10,000."

Mr. PAGE of North Carolina. Mr. Chairman, I make a point of order against the amendment. I will reserve it if the gentleman wishes me to do so.

Mr. MONDELL. Mr. Chairman, the item is subject to a point of order. However, I rise to ask the chairman of the subcommittee why the committee did not allow this item? I understand that a new bridge at Calvert Street is very badly needed. I am told that the old bridge is dangerous. I know that several years ago the District Commissioners issued orders which were in force for some time very greatly restricting traffic across that bridge. It is not safe and very unsightly, and it seems to me we ought to begin to make preparations for a new bridge there.

Mr. PAGE of North Carolina. Mr. Chairman, in answer to the gentleman's question as to why the subcommittee did not allow this item for plans for the construction of a new bridge at Calvert Street, I will say that the knowledge of the members of the subcommittee and the knowledge of other Members of the House is to the effect that a very few years ago we built a very expensive, very handsome bridge over Rock Creek Park on the line of Connecticut Avenue——

Mr. MANN. Rock Creek.

Mr. PAGE of North Carolina. Rock Creek, soon to be part of Rock Creek Park, and those two bridges on the northerly end are almost exactly at the same place. The present bridge at Calvert Street was constructed, not by the city but by the street railway company, entirely for the use of the car line out to Chevy Chase some years ago. It was never intended that that bridge should be a highway for traffic, and there is a very grave question in the minds of the gentlemen who compose this subcommittee as to whether or not we should build another expensive bridge so near to the million-dollar Connecticut Avenue Bridge, and whether the matter of traffic warrants the expenditure at that place. My own judgment is that at this time it does not; that the street-car company having constructed this bridge, using it almost exclusively, if it is a little weak or a little unsafe they might repair it, it being used for street car purposes, and so we do not think it is wise to expend this money at this place.

Mr. MADDEN. Will the gentleman yield for a question?

Mr. PAGE of North Carolina. I yield to the gentleman.

Mr. MADDEN. Does the gentleman think it never would be wise to build it?

Mr. PAGE of North Carolina. I think possibly at some time it would be wise; yes. I think with the increase of traffic going in that direction it is possible that at some time there should be a bridge at Calvert Street.

Mr. MADDEN. I understand there is in contemplation the extension of Calvert Street to the west of Connecticut Avenue.

Mr. PAGE of North Carolina. Yes; I think if it was opened up that would increase the necessity for this bridge at this point. But it has not been opened up. And there is, as the gentleman knows, a constant development of that section of the city, and when it becomes popular enough and a sufficient amount of traffic I think the time will come for the building of a bridge.

Mr. MADDEN. If you take Sundays and holidays now, the traffic to Chevy Chase Lake is very heavy.

Mr. PAGE of North Carolina. Very recently, as the gentleman knows, the Connecticut Avenue Bridge has been closed for repairs.

Mr. MADDEN. The stoppage of the other bridge on account of repairs is only temporary and only for three or four weeks.

Mr. PAGE of North Carolina. I insist on the point of order.

The CHAIRMAN. The point of order is sustained, and the Clerk will read.

The Clerk read as follows:

Rock Creek main interceptor: For completing construction of the Rock Creek main interceptor from P Street to Military Road, $50,000.

Mr. MONDELL. Mr. Chairman, I intended to offer quite a number of amendments to the bill covering items that were estimated for by the commissioners and not allowed by the committee, but I have no desire to take up the time of the committee unnecessarily and will not do so further than to call attention to these items as we reach them. The District Commissioners estimated $30,000 for land for sewage-treatment work, and called attention to the fact that it was important and in their opinion essential that the city should begin the development of a sewage-treatment plant, and that we should at least make a beginning this year by purchasing this land.

I am sure the committee gave attention to this matter, but they do not seem to have considered it of sufficient importance to have allowed it. I would like to have the view of the chairman of the subcommittee on that point. The engineer commissioner made a pretty strong statement in regard to it. If the committee really had any reason for disallowing this item further than that they were trying to economize, I would be glad to know it. The argument as made before the committee was very strong, and, it seems to me, convincing, that this amount was needed for the establishment of this sewage-treatment plant.

Mr. PAGE of North Carolina. Mr. Chairman, there was no probability of the beginning of the construction of this sewage-treatment plant at any time in the near future, because of the building of the mains that we are providing in this bill. There is not the slightest probability in the world that the lands that they need will increase in value. The probability is, judging by some real estate I have known in the District of Columbia, by deferring this we can buy cheaper than we can now. It was not a pressing necessity at all, and I want to say to the gentleman from Wyoming [Mr. MONDELL] that this subcommittee—and I can speak for myself—still has a slight regard for the Treasury of the United States, and I did not see any necessity for appropriating money for a project that was not at this time a necessity and that we would not lose money on by deferring.

The CHAIRMAN. Without objection, the pro forma amendment will be withdrawn, and the Clerk will read.

The Clerk read as follows:

Dust prevention, cleaning, and snow removal: For dust prevention, sweeping, and cleaning streets, avenues, alleys, and suburban streets, under the immediate direction of the commissioners, and for cleaning snow and ice from streets, sidewalks, crosswalks, and gutters, in the discretion of the commissioners, including services and purchase and maintenance of equipment, rent of storage rooms; maintenance and repairs of stables; hire, purchase, and maintenance of horses; hire, purchase, maintenance, and repair of wagons, harness, and other equipment; allowance to inspectors and foremen for maintenance of horses and vehicles or motor vehicles used in the performance of official duties, not to exceed for each inspector or foreman $20 per month for a horse-drawn vehicle, $25 per month for an automobile, and $12 per month for a motor cycle; purchase, maintenance, and repair of motor-propelled vehicles necessary in cleaning streets; purchase, maintenance, and repair of bicycles; and necessary incidental expenses, $290,000, and the commissioners shall so apportion this appropriation as to prevent a deficiency therein.

Mr. LIEB. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Indiana offers an amendment, which the Clerk will report.

The Clerk read as follows:

On page 33, line 3, strike out the figures "$20" and insert in lieu thereof "$25."

The CHAIRMAN. The question is on agreeing to the amendment.

Mr. PAGE of North Carolina. Mr. Chairman, I want to say to my friend from Indiana and to the committee that running through this bill for prior years there have been diverse amounts appropriated in various departments for the upkeep of motor cycles, horses and buggies, and motor-driven vehicles furnished by the employees, running in this instance all the way, I believe, from $20 to $30 a month as applied to horses and vehicles. The commissioners recommended to the committee in their estimates at this session of Congress that these prices be made uniform through all the various departments of the District of Columbia, and we have made them uniform, recommending in every single department, even with the superintendent of schools, that he should be allowed the same as one of these inspectors, for a horse and buggy, $20 a month. The evidence before the committee was to the effect that they could maintain a horse for this price, and I do not think that one exception should be made in one section of the bill, applying to one department, whereas to the other departments no amendment has been offered, and likely will not be offered, and destroy the uniformity running all through the bill.

Mr. STAFFORD. As I understand the policy of the committee in making the recommendations, it is to have a uniform allowance made to all of the users of these motor vehicles, and not keep an account of their individual items of expenditure?

Mr. PAGE of North Carolina. That is done in every department of the District government. It is made uniform in this bill as applying to all the departments of the Government and all employees of the Government who furnish their own means of transportation, whether it is a motorcycle or a horse and buggy or an automobile.

Mr. STAFFORD. Do I understand you extend it to others than are provided for in this bill?

Mr. PAGE of North Carolina. We have not extended it at all. We have made it uniform to those who formerly had it.

Mr. LIEB. Mr. Chairman, the amount heretofore paid is $27.50, and it has been reduced in this item to $20, while on the other hand with the motor vehicles it is $25, and they should let these men have the same. Now, I have evidence here that the horse hire amounts to $27.50. They can not afford to keep a horse at any less than that amount and keep up a buggy, too, and I believe that my amendment should prevail and make it uniform at $25, the same as given to the owners of the motors. I think it is unjust to put these men at $27.50.

The CHAIRMAN. The question is on agreeing to the amendment.

The question was taken, and the amendment was rejected.

Mr. MAPES. Mr. Chairman, I move to strike out the last word.

The CHAIRMAN. The gentleman from Michigan moves to strike out the last word.

Mr. MAPES. Mr. Chairman, I would like to ask the chairman of the committee if this is the item from which the commissioners get their allowance for the pay of the men who clean the streets?

Mr. PAGE of North Carolina. Yes, sir; this is the item.

Mr. MAPES. What compensation do they receive?

Mr. PAGE of North Carolina. I think the compensation of the men on the streets now runs from $1.50 a day—none of them less than that—up to $1.75, and some of them $2 a day.

Mr. MAPES. There has been some complaint, I think, about the little pay which they receive, and the answer of the commissioners, as I understand it, has been that the lump-sum appropriation which they receive for that purpose did not allow them to pay any more than they were paying.

I have heard it rumored that the committee was going to report an item which would allow the commissioners to increase the pay of these street cleaners. Is that correct?

Mr. PAGE of North Carolina. I will say, Mr. Chairman, in reply to the gentleman, that the subcommittee, after investigating this matter, found that these people were paid just as much here for like service rendered as they were paid in any other similar city, although a few of the larger cities had a scale of wages averaging perhaps a little higher, but that these people were paid here for this service on a par with cities elsewhere of like size. If the gentleman will keep his eyes open and observe, he will notice that these people do not overwork themselves.

Mr. MAPES. The committee has not recommended any increase?

Mr. PAGE of North Carolina. No; the committee has not recommended any increase, so far as it would allow them to pay an additional scale of wages all the way through. No; we have not. We have increased the amount $10,000 over the appropriation for the current year. We do not direct, of course, how the commissioners shall spend this money. They could increase the wages of some of these lower priced men under this lump-sum appropriation. We have increased it $10,000.

Mr. MAPES. Is it true that these men receive on an average less than $1 a day?

Mr. PAGE of North Carolina. I have no information as to that. Under the schedule furnished us by the Commissioners of the District of Columbia, $1.50 is the minimum wage of these men. There is no wage less than $1.50.

Mr. MAPES. Does the gentleman know whether or not they lose a great deal of time on account of bad weather and other things.

Mr. PAGE of North Carolina. I am not informed as to the number of days they are able to make in a week, but I should say that from the climate we have in Washington from March until December they are not forced to lose any time on account of weather conditions any more than similar employees are in other cities forced to lose time.

Mr. MAPES. Does the gentleman think these men would come under the Nolan bill, requiring that all Government employees receive $3 a day?

Mr. PAGE of North Carolina. I think it would be an outrage on the Treasury of the United States to be obliged to pay these men $3 a day for the work they perform.

Mr. MONDELL. Mr. Chairman, the question of increasing the compensation of the lowest paid employees of the District government and of the Gevernment generally is one that has been considered very carefully by the subcommittees of the Committee on Appropriations this year. There is no question but that the Federal Government is paying less for certain classes of work than some of the States, municipalities, or private employers are paying. That is true, not in all cases; but it is true in quite a number of cases, particularly in the case of laborers or mechanics.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. MONDELL. Yes

Mr. COX. Will the gentleman put in the RECORD what class of employees the Government is underpaying, as compared with States and municipalities, and where?

Mr. MONDELL. Well, I do not know that I will have time to do that, but I will say to my friend that there are quite a number of such cases in the Government service, by and large, although generally I think the Government pays quite as well as private employers do for the same class of work.

Mr. DENISON. Mr. Chairman, if the gentleman will yield, I will answer the question which the gentleman from Indiana has asked. Will the gentleman yield for a moment?

Mr. MONDELL. Yes.

Mr. DENISON. The custodians of some of the Government buildings and the elevator men and the watchmen in a number of different places in the Government service are paid less than those who are engaged in similar service for private people.

Mr. PAGE of North Carolina. Mr. Chairman, in reply to the gentleman who has just made that observation, he no doubt realizes that this bill does not appropriate for any of the employees of the Government of the United States in the District of Columbia, but only for employees in the service of the government of the District of Columbia, and there are only a few of these buildings to which these appropriations apply.

Mr. COX. I suppose the gentleman takes into consideration, does he not, the fact that Government employees do not work by far the number of days in the year that private citizens in other municipalities work? For instance, they have a Saturday afternoon during three or four months each summer and they have 30 days' leave of absence and 30 days' sick leave, and all the holidays. They work only about 247 days in a year, and they work the enormous length of time of six and one-half hours a day.

Mr. MONDELL. It is true, Mr. Chairman, that Government employees mostly do have vacations with pay, which employees of private individuals and corporations do not have in all cases; but it is also true, as has just been stated by the gentleman from Illinois [Mr. DENISON], that certain classes of employees of the Federal Government, and among them notably those having charge of public buildings, are paid less than men doing the same class of work and working the same number of hours employed by municipalities and by private employers in many cities of the country. There is no question about that. That matter was developed in the hearings had before the Committee on Appropriations, and particularly before the subcommittee having charge of the sundry civil bill.

There is another matter that has been brought to our attention and that renders important this matter of increasing the pay of these low-paid employees of the Federal Government, and that is the continual increase in the price of living.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. MONDELL. Mr. Chairman, I ask unanimous consent that I may have five minutes more.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to proceed for five minutes more. Is there objection?

There was no objection.

Mr. MONDELL. A great deal was said about the high cost of living several years ago. It was quite a campaign slogan, and certain gentlemen on the other side of the aisle had those words constantly on their lips and rolled them as a delicious morsel under their tongues, and projected them upon all of the audiences they could get before them. But they have entirely forgotten that there is such a thing as the high cost of living, although it is a fact that the cost of living has increased more in the last two years than it did in the 12 or 15 years preceding, and that it is higher now; not only actually higher, but higher in proportion to salaries and wages than it ever has been in the history of the country. Now I yield to the gentleman from Texas.

Mr. DAVIS of Texas. If the gentleman will allow me, I just want to suggest that hereafter under Democratic prosperity we are going to reverse the expression, and to say not the high cost of living, but the cost of high living.

Mr. MONDELL. Whenever Democratic prosperity is ushered in—we have heard a great deal about it, but most of us have not seen much of it—whenever that time comes it may be all right to reverse the statement, but in the meantime it is a very serious matter. Now, I am not charging, as our friends on the other side charged two years ago, that their party is responsible for the very great increase in the cost of living within the last two years. They have sins enough to answer for, Heaven knows, without being charged up with that. But it does present a very serious situation when we take into consideration the large number of people employed by the Federal Government who receive less than $1,000 a year, less than $900 a year, from $540 to $1,000 a year. Personally, I should have been very glad indeed if we could have brought in, on all of our appropriation bills, appropriations that would have authorized increases of all of these low wages and salaries, at least everything below $1,000 a year. We do not know how long this condition of the high cost of living is going to continue. We all feel it, and it is particularly hard on those people who are receiving small salaries and small incomes, not only in private employment, but under the Federal Government. This is certain, that if the present cost of living proves to be permanent, then within a very short time we must increase the salaries and wages of a very large number of people employed by the Federal Government in order to make it possible for them to live decently.

Mr. DENISON. I will state in this connection that the Committee on Labor, of which I happen to be a member, has reported to the House favorably a bill fixing the minimum wage for all employees of the Government and of the District of Columbia at $3 per day. That bill has been reported to the House, and the

gentleman from Wyoming [Mr. MONDELL], as well as other Members, will have a chance to express their views on that question when that bill reaches the House, which we hope will be at this session.

Mr. MONDELL. I do not care to express any opinion with regard to that at this time. I do not think we ought to be extravagant with the public money or to pay larger salaries and wages in Government employment than are paid in well-paid private employments. But the cost of living in a decent way has so advanced as to render it necessary, if we are going to do justice by these people employed by the Federal Government, to increase their salaries and their pay very considerably. Everybody feels it, but those who are hardest hit and entitled to first consideration are the humble but faithful folks receiving the very lowest salaries and wages.

Mr. BUCHANAN of Illinois. Mr. Chairman, I ask unanimous consent to proceed for two minutes out of order.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to proceed for two minutes out of order. Is there objection?

There was no objection.

Mr. BUCHANAN of Illinois. Mr. Chairman, I feel called upon to express my appreciation and gratitude for the confidence and respect that have been shown to me by my colleagues in the House, in spite of the erroneous, libelous statements in the big daily newspapers of the country and the fraudulent indictment in the southern district of New York, and I propose now to show the illegal and fraudulent character of that indictment against me and others, for the benefit of Members of this House. Therefore I ask unanimous consent to extend my remarks in the RECORD by inserting a brief compiled by Hon. H. Robert Fowler, a former Member of the House, who was a most faithful servant of the common people in the House. I believe the Members of the House ought to know something about the fraud that is being practiced by men holding Federal office at the present time.

The CHAIRMAN. The gentleman from Illinois asks unanimous consent to extend his remarks in the RECORD by printing a certain brief. Is there objection?

There was no objection.

The brief referred to is as follows:

ARGUMENT BY HON. H. ROBERT FOWLER.

In the Supreme Court of the District of Columbia, Justice Ashley M. Gould, presiding.

Henry B. Martin et al. v. Maurice Splain, United States marshal. Habeas Corpus.

A REMOVAL PROCEEDING IS JUDICIAL AND NOT MINISTERIAL.

It is now well settled that, in passing upon an application for removal, the court must determine (1) whether the indictment charges an offense against the United States, (2) whether there is probable cause for believing the accused guilty of the offense charged, (3) whether the court to which the accused is sought to be removed has jurisdiction of the same. A careful examination of the indictment will enable the court to determine the first of these requirements, but additional testimony may be required to enable him to settle the other two.

The power and duty of preliminary courts in removal proceedings under section 1014, Revised Statutes of the United States, have been often misconstrued by such courts as conferring upon them a ministerial duty instead of the exercise of an important judicial function. It is ordinarily said that the indictment furnishes prima facie evidence of probable cause, and in one case—Tinsley *v.* Treat (205 U. S.)—the lower court held the indictment conclusive evidence; but this holding, however, was reversed by the Supreme Court in a well-considered opinion by Chief Justice Fuller. At page 29 of the above case he said:

> It has been repeatedly held that in such cases the judge exercises something more than a mere ministerial function, involving no judicial discretion. He must look into the indictment and ascertain whether an offense against the United States is charged, find whether there was probable cause, and determine whether the court to which the accused is sought to be removed has jurisdiction of the same. The liberty of the citizen and his general right to be tried in a tribunal or forum of his domicil imposes upon the judge the duty of considering and passing upon these questions.

While it has been frequently held that the indictment need not be judged with technical precision and nicety, yet in every case in which the question has arisen it has been definitely held that the finding that an offense against the United States is properly charged in the indictment is an absolute essential.

This is illustrated in the case of Haas *v.* Hinkel (216 U. S., 462), wherein the court stated the objection that the indictment thereunder mentioned did not charge an offense against the United States, and said, at page 479, "Do the counts which charge a conspiracy to defraud the United States charge any offense?" And in the case of Pereless *v.* Weil (157 Fed. Rep., 419), we find a comprehensive statement of the law upon the subject, as follows:

> In the proceeding it is necessary to determine whether the offense against the United States has been committed and whether there is probable cause to believe the defendant guilty. * * * Under the sixth amendment to the Constitution there is also a question whether the petitioning defendants shall be removed for trial to the district in which the indictment was found and whether the district court of that district has jurisdiction of the offense charged in the indictment.

Upon consideration the court found that the indictment did not charge an offense against the United States, so the defendants were discharged. In the case of United States *v.* Greene (137 Fed. Rep., 618), at page 660, the court says:

> A void indictment—that is, one void on its face for the reason it does not charge the commission of a crime—is not prima facie evidence to an intelligent court or charge of anything except that the person who directed and the grand jury that found it made a mistake. It will be a sad day for the cause of justice when it is decreed by Congress or the courts that a citizen may be removed from Maine to California for trial on a void indictment. That question may be determined by the court where the arrest is made, for it is jurisdictional.

Section 761 of the Federal Revised Statutes, dealing with habeas corpus questions, provides as follows:

> The court or justice shall proceed in a summary way to determine the facts in the case by hearing the testimony and argument and thereupon to dispose of the party as law and justice require.

In passing upon this statute, the Supreme Court, in the case of In re Neagle (135 U. S., 1), said:

> This, of course, means that if he is held in custody in violation of the Constitution or law of the United States, or for any act done or omitted in pursuance of law of the United States, he must be discharged.

Bailey on Habeas Corpus, page 66, lays down the same doctrine.

In the case of Henry *v.* Henkel (235 U. S., 219), which was a habeas decision, the court said:

> No hard and fast rule has been announced as to how far the court can go in passing upon the questions raised in a habeas corpus proceeding.

In the case of Brown *v.* Henkel (194 U. S., 73) Justice Brown, in an able opinion on extradition, said:

> It may be considered that no such removal should be summarily and arbitrarily made. There are risks and burdens attending it which ought not to be needlessly cast upon any individual. These may not be serious in a removal from New York to Brooklyn, but might be if the removal was from San Francisco to New York. And statutory provisions must be interpreted in the light of all that may be done under them. We must never forget that in all controversies, civil or criminal, between the Government and the individual the latter is entitled to reasonable protection. Such seems to have been the purpose of Congress in enacting section 1014, Revised Statutes, which requires that the orders of removal be issued by the judge of the district in which the defendant is arrested. In other words, the removal is made a judicial rather than a ministerial act.

In the case of Tillinghast *v.* Richards (225 Fed. Rep., 234), decided July 27, 1915, the commissioner held the defendant for removal, but he was discharged by the court in a habeas corpus proceeding, in which the court said:

> If a rule of pleading is adopted which permits a constructive presence to be alleged in the same terms as an actual presence, and this upon a foundation of a bare allegation that an act apparently isolated was done in pursuance of a plan with which it has no apparent connection, then the prima facie effect of an indictment as evidence of probable cause is entirely destroyed. * * * A pleader should not be permitted to allege isolated acts, and the court required, upon his mere allegation that they were done pursuant to the conspiracy, and without the slightest idea whether this is true or not, to take the pleader's word instead of himself seeing whether the act alleged was relevant or not. * * * He must find in the facts alleged and not in the pleader's conclusions as to logical construction of facts.

From this opinion, which is one of the very latest on this subject, and the other opinions above cited, and still others of a like character which might be cited, we are forced to the conclusion that before the indictment will be held as prima facie evidence for removal it must follow the common-law rule—that the substance, nature, and manner of the crime must be laid positively and not by way of recital. Recitals and conclusions of the pleader will not be accepted as true by the court. The court must find in the facts alleged and not in the pleader's conclusions as to the merits of the indictment as evidence of prima facie cause for granting removal.

In habeas corpus proceedings for removal the decisions of the Federal and Supreme Courts are not harmonious as to what the indictment must contain in order to furnish evidence of probable cause; yet the latest decisions of the Supreme Court furnish us a reasonably safe guide. In the case of Pierce *v.* Creecy (210 U. S., 400) Justice Moody, in delivering the opinion of the court, laid down the rule that the indictment, in order to constitute a sufficient charge of crime to warrant extradition, must show that the accused has been substantially charged with crime.

In the case of Henry against Henkel, Two hundred and thirty-fifth United States, page 230, Justice Lamar delivered the opinion of the court. George G. Henry, a member of the bank-

ing firm of Solomon & Co., of New York, had been called before the congressional Committee on Banking and Currency, in pursuance of a resolution to investigate and report upon the financial affairs and activities of the national banks, in which he testified that his bank had paid $8,215,262 for $22,500,000 worth of preferred and common stock of a California oil company. After detailing the manner of allotting the stock among a group of four New York banks, consisting of his bank, Lewisohn Bros., Hallgarten & Co., and another bank not named, he said that 12½ per cent of this oil stock had been allotted to persons whose names he refused to disclose. He was indicted in the District of Columbia for contempt of Congress. Removal proceedings were instituted in New York City to bring him to the District of Columbia, which resulted in a habeas corpus proceeding finally reaching the Supreme Court. After citing several important cases, Justice Lamar concluded by saying:

These cases do not, of course, lead to the conclusion that a citizen can be held in custody or removed for trial where there was no provision of the common law or statute making an offense of the case charged. In such cases the commitment court would have no jurisdiction, the person would be in custody without warrant of law, and therefore entitled to his discharge.

Citing Greene against Henkel, 142 United States, page 249.

These two decisions disclose the fact that the Supreme Court makes it obligatory upon the pleader to set out the offense against some statute before extradition will be granted. If, upon a careful examination of the indictment, it is found that any essential element necessary to constitute the offense sought to be alleged is omitted, the court will discharge the prisoner.

In the Tillinghast case, supra, the defendants were indicted for a conspiracy to defraud the United States by omitting to place on colored oleomargarine the statutory required stamp of 10 cents a pound. The indictment was returned in the southern district of New York and charged the defendants with being engaged in the manufacture of oleomargarine at Providence, R. I.; numerous overt acts were charged in the indictment as to secret purchases in New York City of many of the ingredients used in the manufacture of oleomargarine. It was also charged that these secret purchases were followed up by secret shipments and secret manufacture of said product, but the omission of the required revenue stamp is charged to have taken place at Providence, R. I. On application for removal at Providence, R. I., after hearing much evidence the commissioner held the defendants for removal. On a writ of habeas corpus District Judge Brown, in a lengthy opinion, held that the defendants were entitled to their discharge for the reason that the indictment did not charge that the offense was committed in the southern district of New York. One of the ingredients purchased in New York was palm oil. In passing upon the sufficiency of the venue the court said:

The purchase of palm oil, its shipment, payment for it, etc., may be acts to effect the object of manufacturing colored oleomargarine; but they can not possibly affect the removal of oleomargarine without payment of the tax, unless by some connection which does not appear and which is not inferable from what is alleged. These are, for all that appears, nonculpable acts, from which no intent to defraud can be inferred, and which can not support a finding of probable cause.

From the consideration of this matter it clearly appears that in removal proceedings it is a prime essential that the indictment on which the removal is asked be sufficient on its face to show that an offense against the United States has been committed, and it follows as of course that unless the commissioner who is charged with the duty of inquiry in that behalf is advised of an offense against the United States, sufficiently charged on the face of the indictment, he has no alternative to discharging the defendant.

THE INDICTMENT IN THE CASE AT BAR DOES NOT CHARGE AN OFFENSE AGAINST THE UNITED STATES.

It is the policy of the law to surround the accused with the highest degree of caution and circumspection, so that the innocent may escape the punishment sought to be inflicted by wrongful accusation. One of the wisest of these safeguards is found in the fifth amendment to the Constitution, which provides that:

No person shall be held to answer for a capital or otherwise infamous crime, unless on a presentment or indictment of a grand jury * * *.

The indictment grew up with the civilization of England, and is a milestone in the history of the development and growth of the common-law jurisprudence of that country.

The injunction placed on the common-law indictment requires that every element necessary to constitute the offense must be charged in the indictment with that degree of clearness, positiveness, and certainty as to enable the court to see, from the face of the indictment, that if the elements charged in the indictment were proven to be true as charged in the indictment the offense charged would inevitably follow. This is the yardstick of measurement for every Federal indictment which finds its way into the courts of the United States. In the case of Pettibone *v.* United States (148 U. S., 202), in an able opinion Chief Justice Fuller said:

The general rule in reference to an indictment is that all material facts and circumstances embraced in the description of the offense must be stated, and that if any essential element of the crime is omitted, such omission can not be supplied by intendment or implication or by way of recital. * * * This indictment does not in terms aver that it was the purpose of the conspiracy to violate the injunction referred to, or to impede or obstruct the due administration of justice in the circuit court; but it states as a conclusion from the previous allegation that the defendants had conspired, by intimidation, to compel the officers of the mining company to discharge their employees, and the employees to leave the service of the company, a conspiracy which was not an offense against the United States.

In the case of the United States *v.* McAndrews & Forbes Co. (149 Fed. Rep., 630) the court there said as to an indictment for a conspiracy:

An indictment for conspiracy should describe something that amounts to a conspiracy conformable to the rule of the common law as, perhaps, modified by general Federal statute.

Let us compare the rule of common-law pleading as laid down by one of the eminent English writers with the requirement set forth in the above able opinions. From Hakwins's "The Pleas of the Crown," fourth edition, 1762, book 2, chapter 25, of indictments, section 59, page 226, we quote the following:

That regularly every indictment must either charge a man with some particular offense or else with several such offenses, particularly and certainly expressed, and not with being an offender in general, for no one can well know what defense to make to a charge so uncertain or to plead it either in bar or abatement of a subsequent prosecution; neither can it appear that the facts given in evidence against the defendant on such general accusation are the same of which the indictors have accused him; neither can it judicially appear to the court what punishment is proper for an offense so loosely expressed. And upon this ground it hath been adjudged that an indictment is insufficient which only charges a man in general with having spoken divers false and scandalous words against J. S., being mayor of such a place, or with being a common defamer, vexer, and oppressor of many men, * * * or with being a common deceiver of the king's people, or with being a common publisher of the king's secrets, or with being a common evildoer, or with being a common conspirator and such like. It is holden in a note in Fitzherbert's Abridgment that an indictment for conspiracy in general is good, but this is made quaere by the reporter of the yearbook, from which the said note in Fitzherbert's is taken, and is denied to be the law both by Brook and Rolle, nor do I anywhere find the least reason offered to distinguish this from other cases above mentioned. Also it is holden by Sir Edward Coke that the ancient form of indictment charging men with having, as heretics and traitors and infestors of the highways, conspired and conferedated, etc., to destroy the Catholic faith, and having daily published false and seditious writings, etc., were utterly insufficient, and yet such indictments seem to have been frequent, as were also indictments charging men in general, as insidiatores viarum and depopulatores agrorum, which words took the benefit of clergy from the persons indicted before the statutes of Fourth H., 4, 2, by which it is enacted that these words shall no more be put into indictments, nor if they be shall have such effect as to take from the persons indicted the benefit of clergy; and this statute in this respect seems to be an affirmance of the common law, which seems generally to disallow such uncertain indictments, as appears from the reasons and authorities set forth.

SEC. 60. That the charges must be laid positively, and not by way of recital, and that the want of a direct allegation of anything material in the description of the substance, nature, or manner of the crime can not be supplied by any intendment or implication whatever.

By a few quotations from some of the other leading cases dealing with the sufficiency of the charges in the indictment it will be seen that this English author laid down the rule now followed by both the Federal and Supreme Courts of the United States, and that all indictments which do not conform to these rules are fatally defective and are not sufficient to require the defendant to be placed on trial.

The following is taken from the opinion of Foster *v.* United States (178 Fed. Rep., 165):

An indictment is fatally defective if an essential element of the crime intended to be charged is omitted.

In the case of United States *v.* Post (133 Fed. Rep., 852) the following rule is laid down:

All indictments require direct, positive, and affirmative allegations of every point necessary to be proven.

The Federal court holds, in the case of John Reardon & Sons (191 Fed. Rep., 454), that—

It is never sufficient to charge in an indictment that an act is illegal, but something must be alleged which the court can see on the face of the indictment is illegal if the facts are proven.

The common-law rule for indictment for conspiracy does not require an overt act to support a conviction. The Federal statute, section 5440, changed this rule, by requiring an overt act to be charged in the indictment and proven. As the Sherman law omits the requirement of such overt act and fails to define what is required to constitute a conspiracy under its provisions we are compelled to go back to the requirements of an indictment for a common-law conspiracy, and as it was not a crime to restrain trade and commerce at common law we must resort to the common law applicable to other conspiracies made criminal at common law for a guide in passing upon the sufficiency of

an indictment under this antitrust law. Section 60, quoted from Hawkins, supra, appears to lay down the correct rule as to what an indictment at common law for a conspiracy must contain, which is quoted again:

The charge must be laid positively, and not by way of recital, and that the want of a direct allegation of anything material in the description of the substance, nature, and manner of the crime can not be supplied by any intendment or implication whatever.

We must conclude from the decisions above quoted, and from the various decisions, both of the Federal and Supreme Courts of the United States, dealing with indictments for conspiracy under the Sherman Act, that the common-law rules governing the sufficiency of such indictments must be invoked in determining the sufficiency of all indictments for conspiracy under the Sherman Act.

THE INDICTMENT.

Now let us turn to the indictment in this case and apply these well-known and highly established rules as a test of its merits as evidence in this case. All that part of the indictment down to the words "and the grand jurors aforesaid, upon their oath aforesaid, do further present that upon the 1st day of May," and so forth, is a mere recital, not of facts but of things supposed to exist, without being able to give the name of a single person, copartnership, association, or corporation in the business recited, to wit, the manufacture and transportation of munitions, or to locate either definitely or indefinitely the location of a single manufacturing plant so engaged, or transportation line, either by rail or water, so engaged, either in intrastate, interstate, or foreign trade or commerce, but, on the other hand, the pleader winds up this recital with a frank confession that the grand jury does not know the names of the supposed manufacturers of munitions, nor the names or locations of their supposed manufacturing plants, nor the names of the supposed shippers of munitions, nor the names of the supposed transportation lines and the names of the routes of the supposed shipments, nor the kind of commodities supposed to have been shipped, nor the amount of any supposed shipment, nor the point of origin or of destination. If the grand jury failed in procuring evidence of the existence, location, or transportation of such commerce, how was it possible for them to learn that there had been a conspiracy to restrain such unknown commerce?

The question naturally arises, how could the grand jury know that any person, copartnership, association, or corporation had been engaged in the manufacture of munitions during the time indicated in the indictment, or that munitions had been sold or delivered to any point in America and shipped to any port in any foreign country without having had some person who, under oath, was able to and did testify of his own knowledge, giving names of the persons, firms, companies, and corporations, with the names and locations of the manufacturing plants, and the names of the interstate transportation lines, the routes taken, the commodities transported, the States crossed, and the destination ports reached, together with the names of the companies engaged at this end of the line in the supposed foreign commerce, and the ocean transportation lines engaged in the supposed foreign commerce. Without such evidence it is impossible for the grand jury to say upon their oath that any foreign trade and commerce had been carried on during the time, or any portion of the time, attempted to be charged in this indictment. Hence it follows that it was impossible for them to know of any alleged conspiracy for the restraint of such commerce.

Certainly the pleader can not expect the court to believe that such trade and commerce existed during the time set out in the indictment, first, because the grand jury frankly says it did not know of any such commerce at the time of their return of the indictment; secondly, there is nothing in that part of the indictment from which the court may determine the truth of such recitals, all of which have been condemned by both the Federal and Supreme Courts of the United States, and the recent decision in the Tillinghast case, supra, repudiated such recitals, declaring that they were not worthy of consideration as evidence.

The right of the grand jury to use the term "To the grand jurors unknown" is a privilege and arises from the necessity of the case and should never be abused. In the case of United States *v.* John Doe (122 Fed., 964) the grand jury indicted a Chinese in this language: "John Doe, a Chinese person whose true name is to the grand jurors aforesaid unknown," charging him with the offense of aiding the illegal landing of Chinese persons in the United States. The court held that the indictment, on its face, showed that the name "John Doe" was fictitious only, and that the grand jury did not know and were unable to identify the person they were indicting, and held the indictment void for insufficiency of description.

In the case of United States *v.* Rhodes (212 Fed., 517) the grand jury indicted Rhodes for concealing "goods, wares, and merchandise," alleging that the "character, kind, and particular description of which is to the grand jurors unknown." The court held that such language is permissible only when the grand jury can not obtain a knowledge of the facts. On the hearing the evidence showed that the grand jury did know the character and kind of goods concealed, so the court discharged the defendant. The case of Naftzger *v.* United States (200 Fed. Rep., 494) upholds this rule.

Immediately following the language, "are not known to the grand jurors aforesaid," we find the following remarkable statement: "And are so numerous as to preclude their enumeration in this indictment." A most astounding disclosure, a flat contradiction of a want of knowledge on the part of the grand jury, for how could the grand jury know that the number of the manufacturing plants of munitions and their names and locations, and the transporation companies, the names thereof, the names of the owners and operators thereof, the character and quantity of the commodities shipped in foreign commerce were "so numerous as to preclude their enumeration in the indictment, without first having had some reliable evidence before them upon which to base such a statement"? This is impossible; and when compared with the statement disclaiming a want of knowledge of such things, a statement made under oath, it is patent on its face that the indictment is a snare and a delusion, stamping it as a miserable fraud, unworthy of belief. It is a desecration of the sanctity of an oath, and a brazen invasion of the dignity of a high court of justice. Under the rules of pleading, this part of the indictment is good for nothing, except to expose the lack of good faith, necessary in the presentation of every indictment in a court of record.

We now reach what is known as the charging part of the indictment, which states, after naming the defendants:

Each of whom well knew the facts as to said foreign commerce hereinbefore stated and alleged.

Then after stating the situs of the supposed offense the indictment continues as follows:

Unlawfully did knowingly and willfully engage in a conspiracy to restrain the aforesaid foreign trade and commerce * * * and to prevent the transportation of said articles in said foreign trade and commerce.

This part of the indictment fails to charge any offense, for the reason that it does not charge that an offense has been committed, to wit, a conspiracy to restrain foreign trade and commerce. It attempts to appropriate what appeared in the former recitals, all of which failed to state facts from which the court could see from the face of the indictment that there was any such foreign trade and commerce in existence at the time named in the indictment or at any time within the last three years. "The said foreign commerce," the "aforesaid foreign trade and commerce," "the said foreign trade and commerce" are the terms in this part of the indictment which the pleader relies upon as a compliance with the rules of pleading. The pleader is required to state distinctly and definitely some specific trade and commerce against which the conspiracy was directed, and in the light of that part of the former recital, which declared under the oath of the grand jury that they did not know the name and location of any munition plant engaged in manufacturing munitions for foreign trade and commerce and that they did not know the name of any transportation company engaged in foreign trade and commerce nor the transportation routes used for foreign trade and commerce, how can the court say that the statements in the charging part are any more definite and clear than those to which it would refer in the former recitals? This part of the indictment, the chief and all-important part, is required by all the rules of common-law pleading to set out in clear and unmistakable terms every element and ingredient of which the offense is composed, which embraces the substance, nature, and manner of the crime.

In the case of United States *v.* Cruikshank (92 U. S., 542) the indictment sought to charge the defendants with conspiring to deprive colored citizens of certain legal and constitutional rights, and in the charging part it was charged that the defendants conspired to hinder and prevent certain-named colored citizens in the free exercise and enjoyment of "every, each, all, and singular the rights granted them by the Federal Constitution," without specifying any particular right. In passing upon the indictment the court said, this—

is too vague and general to charge an offense under the act of May 31, 1870, section 6, making criminal the banding or conspiring together with intent to hinder or prevent the enjoyment or exercise of a right or privilege granted or secured by the Federal Constitution or laws.

The statute referred to in this case is very similar to the conspiracy clause in the Sherman Act in that neither requires an overt act to complete a right of action. If the one requires the indictment to state definitely and distinctly the name of a specific right against which the conspiracy was directed in order to

constitute a charge of conspiracy, it would seem that equal particularity should be required in stating the names of the munition, manufacturing, and transportation companies in this indictment. Suppose the names of the colored citizens had been omitted instead of the particular right, and it had been charged generally that a large number of colored citizens, somewhere located in the United States, had been hindered from exercising the right of franchise at an election for a Member of Congress at a place certain on a day certain, would anyone contend for a moment that the last indictment charged an offense any more definitely and clearly than the indictment condemned by the Supreme Court in the above case?

The next six or eight lines of the indictment contain a statement that the quantity sought to be restrained, the time, place, and number of articles was to be no more than the defendants "might thereafter be able to do"; and then follows a statement that the restraint of the manufacture of munitions was directed against "such of said articles and in such ways and at such times and places as they might be able so to do." All of which is a mere conclusion of the pleader and has no more weight in the indictment than if it had been omitted entirely.

The next paragraph is among the most novel in the history of criminal pleading. What shall we think of an indictment which begins by trying to charge a conspiracy to restrain foreign commerce at a particular time in munitions of war, and after blundering along like a lost man in a forest, it suddenly breaks off by saying that the "conspiracy was not confined to any particular articles, times, places, ways, and means," but it was "intended at any time or place, and by any ways and means, some of which were not definitely determined upon," all of which indicates a most wonderful accumulation of information, the possession of much of which could be had only by the unlocking of the secret chambers of the minds of the defendants, and then success would depend upon whether the defendants were in possession of such knowledge.

"Not confined to any particular articles" is broad enough to include all the articles in the world. "Not confined to any particular time or place" includes all time and all places in the world. There seems to be no limitation. But the real ludicrous portion of the composition, after assuming such a wide range of definite and general knowledge, is found in the following extract from the indictment:

> And the particular articles, times, places, and means determined upon by the defendants are not known to the grand juror aforesaid.

Yet, just a few lines above this statement, the grand jury, upon its oath, was able to inform the court and the defendants that some of the ways and means were not determined upon, indicating that some others had, but when all this is followed by a disclaimer under oath we reach a climax in doubt and wonder. Yet in the next sentence we are informed by the grand jury, under oath, that divers means and methods were intended to be used by the defendants, and our wonder deepens, and we are at a loss to know how it is that the grand jury was able to emerge so suddenly from total darkness, as to the ways and means, into the clear sunlight of knowledge, sufficient to inform us that divers ways and methods were intended to be used, and then following up this statement with six specific ways and means which it had learned so suddenly. But this is in keeping with the whole indictment. It violates more rules of pleading than any indictment I ever saw, and what I have said as to the conclusions of the pleader's vague and misty statements "to the grand jurors aforesaid unknown" heretofore, I now urge against this portion of the indictment and insist that it is good for nothing except to show a lack of good faith in the presentation of the indictment. It bristles with inconsistencies from the beginning, sufficient to destroy it, but it is further loaded down by recitals of indefinite matter, having no logical connection, all of which are vague conclusions of the pleader.

I now come to the consideration of the six ways and means which are recited in the indictment to effect the supposed conspiracy, the first five of which deal with strikes and walkouts in the supposed munition plants and transportation lines supposed to be engaged in foreign commerce. The third and fourth embrace all that is in the first and second, but go further by reciting the supposed means agreed upon by the defendants for carrying into effect strikes and walkouts in the supposed munition plants and transportation lines. Number five differs only in that the heads of labor organizations were to be appealed to as a means of creating strikes and walkouts.

Bearing in mind the well-accepted doctrine that the statute does not apply unless the restraint complained of produced a direct effect on the foreign commerce and not merely indirect, which doctrine is laid down in one of the most recent cases for conspiracy under the Sherman Act (United States *v.* Patten, 225 U. S., 542), I think we can dispose of this part of the indictment with clearness and certainty. Summing up these charges and taking them in their fullness, they amount to no more than this: That the defendants agree to inaugurate an educational campaign for the purpose of crystallizing public sentiment against the manufacture and shipment of war materials to foreign belligerent countries, hoping thereby that those engaged in such business would quit, and that the means agreed upon were the following: Inducing by solicitation, persuasion, and exhortation, and by circulating through the mails, through the public press, and by distribution of literature, such as telegrams, circulars, pamphlets, letters, and newspaper articles. No matter from what angle we examine the language used in reciting the ways and means, it can amount to no more than what is indicated above.

To hold to the contrary would be an invasion of three of the most important, original, and superlative rights of men, none of which depend upon any law made by man, and all of which antedate all human law. The freedom of speech, the freedom of the press, and the right to assemble peaceably are fixed rights, coextensive with human civilization, and as enduring as the mountains or stars. To deny workingmen the privilege of quitting their jobs at will would destroy the force and effect of the thirteenth amendment to the Constitution and revive the ante bellum practice of involuntary servitude. Voluntary servitude is the universal rule in America, and the obligation to work for others depends, as a rule, upon contract; and a termination of such contract, even before the terms of the contract have been complied with, has never been held to be a violation of the antitrust law; neither has it ever been held that peaceable persuasion by word or by writing has been a violation of this act.

The first amendment to the Constitution provides that—

> Congress shall make no laws abridging the freedom of speech or of the press or the right of the people peaceably to assemble and petition the Government for a redress of grievances.

All of the means specified in the six paragraphs of this indictment are invulnerable and immune from assaults or abridgment by legislative enactment or decisions of the courts. They were bulwarks of freedom long before the Sherman law was born.

To hold that it is a conspiracy under the Sherman Act for two or more to agree to try to induce workmen to quit their work in munition plants or transportation lines engaged in moving munitions in foreign trade and commerce by exhortation, persuasion, and solicitation, or to agree to do the same by means of newspaper articles, telegrams, letters, pamphlets, and circulars, would be to hold that Congress has a right to pass a law abridging the freedom of speech and the freedom of the press, and also to abridge the right of people to peaceably assemble for the purpose indicated in the indictment, and it is upon such allegations that the Government relies as evidence to support their claim for removal, which is wholly insufficient.

There is nothing in the indictment, from which the court can see for himself that if all the workmen in munition plants and munition transportation business, located in the United States and elsewhere, should have been moved by the agencies enumerated to quit in a body that the result of such action would in any way restrain foreign commerce at all. So far as the allegations in this indictment are concerned the places of all such workmen might have been readily filled without any restraint whatever to the production or transportation in foreign commerce of all the munitions referred to in the indictment.

This is well supported by the law as is evidenced by a late decision in the case of United States against North Pacific Wharves & Trading Co., Fourth Alaska, page 583, which was an indictment for a conspiracy to monopolize the trade in coal at Skagway, Alaska.

Lyons, district judge, delivered the opinion, saying:

> The indictment charges the North Pacific Wharves & Trading Co. was the owner of all the wharves in Skagway, excepting the Pacific coast wharf, which was owned by the Pacific Coast Co.; that the North Pacific Wharves & Trading Co. entered into an agreement with the Pacific Coast Co. whereby the latter agreed to close its wharf as a public wharf and to permit only the North Pacific Wharves & Trading Co., E. E. Billinghurst, and E. J. Shaw to use the same for storing purposes. In consideration whereof the North Pacific Wharves & Trading Co. agreed to pay the Pacific Coast Co. 25 cents per ton wharfage on all coal passing over the wharf owned by the North Pacific Wharves & Trading Co., and further agreed to ship all of its coal to or through Skagway on boats owned by the North Coast Steamship Co., which is alleged to be a subsidiary corporation of the Pacific Coast Co.

The reasoning of the court was based upon the failure of the indictment to charge that the wharf business was sufficient to support more than one wharf or that the conditions were such that no other person or company could engage in the wharf business at Skagway.

The court also says:

The facts charged in the indictment do not warrant an inference that the carrying out of the alleged agreement in the indictment would in any way restrain trade. * * * The indictment should state facts, from which it must be inferred trade will be restrained or competition stifled. If every fact charged in the indictment were proved to a mathematical certainty, no jury or court would be warranted in saying that such a conspiracy would substantially restrain trade or would result in a monopolization of any particular business.

Before the court can say that foreign commerce in munitions would have been restrained if the things recited in the indictment should happen, he must be compelled to reach such conclusion from the matters and things recited in the charging part of the indictment, for, under the decision of the case of Tillinghast against Richards, supra, of July 27, 1915, the court is compelled to "find in the facts alleged and not in the pleader's conclusion as to the logical construction of facts." If the courts were compelled to rely upon the truth of the matter recited in the indictment by the pleader, and accept his conclusions as true, the habeas corpus proceedings would be a mere matter of form, and amount to no more than the exercise of a ministerial act.

Under such practice any old indictment, although it might amount to no more than a scrap of paper, would be accepted as prima facie evidence, on an application for removal to any court in which the indictment was returned, regardless of its distance away from the home of the defendant. Thanks to the courts that such is not the practice. They have declared repeatedly that such proceedings contemplate the exercise of a high judicial function on the part of the court, wherein evidence may be heard to aid the court in determining the questions raised by the pleadings so that justice may be dealt out the same as in other cases.

We now come to the consideration of No. 6 of the specific ways and means attempted to be charged in the indictment which recites "that divers other means and methods not specifically determined upon by the defendants" were agreed upon for the purpose of carrying into effect the supposed conspiracy. This would not only be a very uncommon thing to do, but when supplemented by the words "to be decided upon by them as occasion might arise" justifies us in concluding that the grand jury had before it no evidence on which to base this charge.

The grand jury was unable to learn any of the names of the unknown means and methods, not determined upon by the defendants, but it did learn that the defendants were to decide upon these unknown "means and methods" * * * "as occasion might arise," and that all of them were "calculated in furtherance of and to effectuate the object of the supposed conspiracy."

It is difficult to say how the grand jury were able to say upon their oath that there were unknown "divers other means and methods not specifically determined upon," and that they were to be decided upon at some unknown time and under some unknown circumstances, and that they were all "calculated" to consummate the "object of said conspiracy." As a rule such a statement in an indictment is worthless, but in this indictment it is very valuable, for it indicates a total want of information on the part of the pleader, and discloses a mechanical effect on his part to construct the indictment without evidence, and at the same time to conceal from the court and the defendants the real conditions under which he labored. Were it perfect in every other respect the use of the word "calculated" would destroy it as an element of pleading, for the courts have often condemned the use of such words and styled them as conclusions of the pleader. In the case of United States *v.* Patten (187 Fed., 664); same (U. S., 226, 525), this word was used in an indictment for conspiracy and was condemned as a mere conclusion of the pleader, and when considered with the other parts of the sentence it is evident that the pleader could not possibly have arrived at any intelligent conclusion.

I pass the concluding paragraph of the indictment for the reason that if the charging part fails to charge an offense against the United States it can not draw any aid or support from the closing part.

To sum up the important defects in this indictment is now the object of counsel. What are the defects which cause it to sink below the level of prima facie evidence of probable cause? When stripped of the recitals and conclusions of the pleader, we have left the charging part only, which, after setting out the names of the defendants, the time and the place, continue as follows:

Unlawfully did knowingly and willfully engage in a conspiracy to restrain the aforesaid foreign trade and commerce.

Is this language sufficient to charge a conspiracy under the Sherman Act? If not, then the defendants should be discharged. Let us put it to the test of the decision of the Supreme Court in the case of United States against Cruikshank, in 92 United States, page 542. We have seen that Cruikshank and others were indicted for a conspiracy to prevent negro citizens from the free exercise and enjoyment of "ever, each, all and singular, the rights granted them by the Federal Constitution," without specifying any particular right. In passing upon the question as to whether the indictment contained any charge for such conspiracy, Chief Justice Waite, in delivering the opinion of the court, said that the charge—

Is too vague and general to charge an offense under the act of May 31, 1870, section 6, making criminal the banding or conspiring together with the intent to hinder or prevent the enjoyment or exercise of a right or privilege secured or granted by the Federal Constitution or laws.

The failure of the Cruikshank indictment to charge an offense against the Federal statute was its failure to charge the specific right against which the conspiracy was directed. The names of the parties, to wit, the negroes who were entitled to the specific right, were properly set out, but the Chief Justice held the indictment void and discharged the defendants because it failed to set forth the specific right necessary to constitute the offense.

But the indictment now before the court is doubly defective, because it fails to set out in proper terms the names of the parties and the specific right they were entitled to under the law.

In other words, it is a general rule that the name of the thing against which the conspiracy is directed must be set out specifically and accurately in the charging part of the indictment. This is not done in this indictment.

The specific location of the munition plants and the names of the owners thereof, the specific commerce, with the names of the specific owners and the names of the specific transportation lines used in facilitating such commerce, and the names of the specific companies owning or operating the same are entirely absent from the indictment, which reveals a total failure to charge the offense of a conspiracy under the Sherman law.

Recalling the case of United States against McAndrews & Forbes Co., supra, which lays down the doctrine that—

The Sherman Act is not directed against an abstraction. * * * Its prohibition is not directed against a state of mind, but against a state of facts. * * * An indictment for conspiracy should describe something that amounts to a conspiracy, conformable to the rules of pleading at common law.

A doctrine uniformly adhered to by both the Federal and Supreme Courts of the United States in passing upon indictments for conspiracy in habeas corpus proceedings. Measured by this rule the indictment before us sinks far below the level of prima facie evidence of probable cause.

In support of this doctrine we also cite the following cases:

In re Neagel, 135 U. S., 1 supra; Pettibone *v.* United States, 148 U. S., 202, supra; Tillinghast *v.* Richards, 225 Fed., 234, supra.

The indictments in the above cases were much less defective in substance than the present indictment, and yet the defendants were discharged by the courts in habeas corpus proceedings.

The statute of Illinois, section 659, provides that "any two or more persons who shall conspire or agree falsely and maliciously to charge or indict, or cause to procure to be indicted, any person for a criminal offense shall be fined not exceeding $1,000 and confined in the county jail not exceeding one year."

Who would contend that the offense of such conspiracy was charged in an indictment which alleges that A and B, on a day certain, at a time certain, unlawfully and willfully conspired to falsely and maliciously charge a person of a criminal offense without stating the specific name of the party against whom the conspiracy was directed and the character of the crime said to be charged against him?

Under the United States Criminal Code, section 37, formerly section 5440, the Joplin Mercantile Co. et al. were indicted for conspiracy substantially as follows:

The defendants (naming them) did unlawfully conspire together to commit an offense against the United States of America, to wit, to unlawfully, knowingly, and feloniously to introduce, and attempt to introduce, malt, vinous, spirituous, and other intoxicating liquor into the Indian country, which was formerly the Indian country and now is included in a portion of the State of Oklahoma, and into the city of Tulsa, Tulsa County, Okla., which was formerly within and now a part of what is known as the Indian country and into other parts and portions of that part of Oklahoma which lies within the Indian country.

Then followed the allegation of overt acts of delivering intoxicating liquor to the express company at Joplin, Mo., to be shipped to Tulsa, Okla.

Justice Pitney, in this case—226 United States, page 535—in delivering the opinion of the court said:

The clause of the indictment which sets forth the conspiracy does not in terms allege, as a part of it, that the liquor was to be brought from without the State of Oklahoma, nor does this clause refer, for light upon its meaning, to the clause that sets forth the overt act; we do not

think the latter clause can be resorted to in aid of the averments of the former * * * for this reason, among others, it seems to us, as here, the averment respecting the formation of the conspiracy refers to no other clause for certainty of its meaning—it should be interpreted as it stands. We therefore think the court of appeals properly treated this indictment as not charging that the liquor was to be introduced from without the State and correctly assumed in favor of the accused that the design attributed to them looked only to intrastate commerce in intoxicants.

Citing Britton *v.* United States (108 U. S., 199), in which latter case the court held that the indictment did not charge any offense.

There were two Federal statutes prohibiting the shipment of intoxicating liquor into the Indian country, one of which prohibits the shipments from points within the State of Oklahoma into the Indian country, while the other prohibited the shipment of such liquor from without the State of Oklahoma and into the Indian country. Now had there been but one statute on this subject, to wit, the statute prohibiting the shipment of intoxicating liquor without the State of Oklahoma into the Indian country, this indictment would not have charged any offense against the defendants for the reason that it omitted one of the essential elements to constitute the offense, to wit, a charge of the shipment of intoxicating liquor named in the indictment from without the State of Oklahoma into the said State and into the Indian country.

The defendants in an indictment for a conspiracy to restrain interstate or foreign commerce can be convicted only for a conspiracy to restrain such business of the party or parties specifically named in the indictment. And if the indictment charges a generic conspiracy to restrain such commerce without setting out specifically the names of the person or persons owning and conducting such commerce, it fails to charge a conspiracy and is therefore void.

The above proposition is well supported by the authorities. In the Cash Register case, Patterson against United States, 26 Federal Reporter, page 616, 30 defendants, owners and directors of the National Cash Register Co., were indicted in three counts, one of which was for a conspiracy to restrain the interstate commerce in cash registers of 32 cash register companies specifically set out in the indictment by the names and location of each of said companies. The indictment specifically set out 11 separate paragraphs of distinct and unlawful ways and means by which the conspiracy was to be carried into effect. Judge Cochran, in the United States Circuit Court of Appeals for the Sixth Circuit, March 13, 1915, in passing upon the sufficiency of the conspiracy count in the indictment, said:

> As we have seen, the charge of the count is of a conspiracy against the competitors who are named and is limited thereto, its underlying thought is that there was a generic conspiracy against all competitors and that this conspiracy took specific direction against the competitors named as they came into existence, and continued against them as long as they remained in existence. In the second item of the introductory statement, where those competitors are named, it is alleged that they are all the competitors known to the grand jurors, which as much as says that if the others had been known they would have been named also. This could only have been on the basis that there was a generic conspiracy against all competitors. The effect of this consideration is merely to relieve the court of any claim of duplicity. It is the tie that binds. It did not render the defendants subject to conviction on the generic conspiracy so presupposed. In spite of it, they were only subject to conviction for the conspiracy against the competitors named.

The indictment must set out definitely the names of the party or parties against whose business the conspiracy is directed, otherwise it is void.

Patterson against United States, 222 Federal Reporter, page 623, says:

> When, however, we turn to the first count we do not find any of the competitors named therein as having carried on business during the three years preceding the indictment * * * the competitor, then, whose business it is alleged the defendants secured by the use of these means are incapable of identification. It is not those who in fact carried on the business during the three years, but those which the first count mentioned as then carrying on the business, and it does not mention which of them so did. We see no escaping from the conclusion that the count on this ground is void for uncertainty.

Where an indictment mentions several whose business has been restrained, but fails to single out those whose business was restrained during the three years next prior to the finding of the indictment it is bad.

Ibid., 624, says:

> The first count no more mentions which of them carried on business before the three years than it does those which did so during the three years. On this ground the count is bad.

THE WAYS AND MEANS CHARGED IN THE INDICTMENT ARE NONCULPABLE AND SANCTIONED BY LAW.

So far we have considered the indictment as to its sufficiency from a standpoint of pleading, and we have discussed its weakness with reference to the material allegations necessary to constitute a charge of an offense against the statute. Now we come to the consideration of its sufficiency from an entirely different standpoint.

CLAYTON ACT.

On October 15, 1914, what is known as the Clayton Act became a Federal law, section 6 of which declared—

> That the labor of a human being is not a commodity or article of commerce. Nothing contained in the antitrust laws shall be construed to forbid the existence and operation of labor, agricultural, or horticultural organizations, instituted for the purposes of mutual help, and not having capital stock or conducted for profit, or to forbid or restrain individual members of such organizations from lawfully carrying out the legitimate objects thereof, nor shall such organizations, or members thereof, be held or be construed to be illegal combination or conspiracies in restraint of trade, under the antitrust laws.

For all intents and purposes this is an amendment to sections 1 and 2 of the Sherman law, and acts as an exemption of farmer and labor organizations and the members thereof from its operations. If such exemptions had appeared in the original Sherman Act, there is no doubt but what this indictment would be fatally defective on account of its failure to set up such exceptions. It will be noted that the indictment failed to reveal the special business or organization to which all these defendants belonged, to wit, Labor's National Peace Council. Had it done so, as it should in fairness to the defendants, it would have enabled the court to see from the face of the indictment that the defendants were exempt under the provisions of section 6 of the Clayton Act.

The effect of section 6 of the Clayton Act is to define the Sherman law as applied to farm and labor organizations. This being true, the jurisdiction of the court for the southern district of New York is raised as completely by the pleading in this case as though the Clayton Act had repealed the Sherman law in toto. However, it may be claimed by some that this part of the Clayton Act is unconstitutional in the light of the case of Connolly *v.* Union Sewer Pipe Co. (184 U. S., 540), which declared unconstitutional an antitrust act of the State of Illinois. This statute sought to exempt all farm products, including live stock, in the hands of the producers from the operation of its provisions. It also provided for the repudiation of contracts in violation of its terms. The suit arose over the collection of a note claimed to have been executed in violation of the terms of the act. The Supreme Court held the Illinois statute unconstitutional for the main reason that it violated section 1 of the fourteenth amendment to the Constitution, which provides that—

> No State shall make or enforce any law which shall abridge the privileges or immunities of citizens of the United States.

It will be remembered that the State of Illinois in passing this act was hedged about by the above constitutional limitations, which, if exceeded, would subject the law to be dealt with by the courts in harmony with such constitutional provision.

It will also be remembered that the income-tax law of 1894 was declared unconstitutional by the Supreme Court because it violated paragraph 4, section 9, of Article I of the Constitution, which requires that—

> No capitation or other direct tax shall be laid unless in proportion to the census or enumeration hereinbefore directed to be taken.

But after the passage of the sixteenth amendment, giving Congress unlimited power to levy an income tax, the Underwood law of 1913 imposed a graded income system, which made discriminations clearly and unmistakably, leaving all incomes of $3,000 of unmarried people and all incomes of $4,000 of the heads of families free and exempt from such taxation, yet the Supreme Court in a recent decision upheld its constitutionality.

Now, when we examine the constitutional power which gives Congress the right "to regulate commerce with foreign nations, and among the several States, and with the Indian tribes," we find that it is without limitation, which distinguishes the Clayton Act entirely from the antitrust law of Illinois in that the one, the Clayton law, is a Federal act passed by Congress under a constitutional power without limitation, while the Illinois act was passed by the Legislature of Illinois under a constitutional limitation.

Who will say that in exempting labor, agricultural and horticultural organizations from the operation of the antitrust laws, including the Sherman law, is any greater discrimination than the new income-tax law exempting all incomes below a certain amount from any taxation whatever? Both of these laws were passed by Congress under constitutional powers similar, to wit, without limitation.

In the case of Loewe *v.* Lawler (208 U. S., 224) Chief Justice Fuller, in delivering the opinion of the court, said, among other things:

> Records of Congress show that several efforts were made to exempt by legislation organizations of farmers and laborers from the operation of the act, and that all these efforts failed, so that the act remained as we have it before us.

It seems reasonable that a fair construction of this language of the Chief Justice indicates that Congress might, by appropriate act, exempt such organizations from the operation of the Sherman law, without violence to any constitutional provision. However this may be, it remains that section 6 of the Clayton Act is the law of the land until it has been repealed by either an act of Congress or by a decision of the Supreme Court in a direct proceeding to test the question of its constitutionality, and the courts of the land in the discharge of their official duties will take judicial notice of such law.

By a further examination of the Clayton Act we find that the last paragraph of section 20 directly sanctions all the ways and means enumerated in this indictment. That paragraph reads as follows:

> And no such restraining order or injunction shall prohibit any person or persons, whether singly or in concert, from terminating any relations of employment, or from ceasing to perform any work or labor, or from commending, advising, or persuading others by peaceful means to do so; or from attending any place where any such person or persons may lawfully be, for the purpose of peacefully obtaining or communicating information, or from peacefully persuading any person to work or abstain from work, or from ceasing to patronize or employ any party to such dispute, or from recommending, advising, or persuading others by peaceful and lawful means so to do. Or from paying or giving to, or withholding from any person engaged in such dispute, any strike benefits or other moneys or things of value, or from peaceably assembling in a lawful manner and for lawful purposes, or from doing any act or thing which might lawfully be done in the absence of such dispute by any party thereto; nor shall any of the acts specified in this paragraph be considered or held to be violations of any law in the United States.

This list of exceptions include every ways and means recited in the indictment and charged to have been agreed upon by the defendants to aid them in carrying into effect the supposed conspiracy, and the last clause of this paragraph declares emphatically that the doing of all the acts and things enumerated in the indictment shall not be held to be violations of any of the laws of the United States.

This provision of the Clayton Act is universal in its application, and makes no exemption whatever, dealing with all alike and giving all like and equal opportunities under its provisions, and it can not be held to come within that class of laws which are passed under constitutional limitations and which make exemptions contrary to such limitations. Such as are dealt with by the Supreme Court in the Connolly case, supra, and the decision of the Supreme Court holding the old income-tax law of 1894 unconstitutional.

Applying the doctrine that courts will take judicial notice of all Federal statutes, it is to be presumed that in passing upon these questions the courts will not only take into consideration the provision above referred to in the Clayton Act, but that they will also take into consideration the doctrine laid down in the case of In re Neagle (135 U. S., 1) supra, wherein it was decided in construing section 761 of the Federal statute dealing with writs for habeas corpus, that—

> This, of course, means that if he (meaning the defendant) is held in custody in violation of the Constitution or of a law of the United States, or for any act done or omitted in pursuance of the law of the United States, he must be discharged.

After a careful examination of the different parts of this indictment we are driven to the conclusion that its author undertook to set up a wholly imaginary case. The entire absence of the names of those corporations who are engaged in the manufacturing and transportation of munitions of war for foreign belligerent countries emphasize this idea to the point of certainty. This entire trade is confined to a very few giant concerns under the control of J. P. Morgan & Co. as the agent of such foreign traffic, which can be enumerated on the fingers of one hand, to wit, the United States Steel Corporation, the Armor Trust, the Bethlehem Steel Co., the Du Pont Powder Trust, the Remington Arms Co., now owned by the Midvale Steel Co., and the transportation is controlled by the Joint Traffic Association—official classification committee—and the Ocean Steamship Pool.

If the business of any of these companies had been threatened or interfered with by the defendants, it would have been very easy for the pleader to have presented such evidence to the grand jury, as the chief offices of all these corporations are located in the city of New York, within gunshot distance of the United States attorney's office. If he was unable to secure such evidence, so vital to the validity of the indictment, how was it possible for him to secure any real evidence of the alleged conspiracy to restrain either the manufacture or transportation of the products of these great concerns?

Labor's National Peace Council was in touch with 6,000,000 men, yet it will be remembered that not one single overt act is charged in the indictment as a means to effect the supposed conspiracy. It is reasonable to conclude that if such acts had been known to the pleader he would have inserted them in the indictment. We must therefore conclude that the grand jury was unable to learn of any such acts during the entire four months of its sitting. We are driven to the further conclusion that the conspiracy must have been a very weak and harmless one if, during the entire eight months it was alleged to have been in operation, it was unable to do any single overt act to accomplish its supposed purpose. As we have already clearly shown that the ways and means enumerated in the indictment are wholly nonculpable in character and expressly sanctioned by the highest law of the land, how can anyone doubt that these defendants and their organization, Labor's National Peace Council, as its name indicates, was anything but a lawful and peaceable educational propaganda to aid in keeping this country out of war?

The fact that a charge of impeachment had been made in Congress against the United States attorney two weeks before this indictment was returned must have acted as a high incentive to prompt him to extraordinary efforts for revenge; and as the former United States district attorney, Henry A. Wise, of the southern district of New York, has recently testified that the grand jury of this district is nothing but a "rubber stamp" in the hand of the United States district attorney, it was all the more easy for him to secure the return of this fraudulent indictment without evidence.

All citizens of the United States have a right to oppose any act, deed, trade, profession, or business illegal in character or affecting the public morals, especially if they menace the general welfare of the country. If foreign commerce in munitions was being conducted in violation of the Federal statutes or international law, such as shipping high explosives on vessels carrying passengers, or lending money by the Government to belligerent countries to be used against any country or countries with which we are at peace, in order to promote such foreign commerce, then the American people, either singly or collective, had a right to protest against such business by any and all of the ways and means set up in this indictment.

If the substance of the speeches and writings recited in the indictment had been disclosed by the pleader, as was done in the Cash Register case, supra, it would have revealed that they were directed to the various branches of the executive department and to Congress in the interest of preserving "a friendly and impartial neutrality," to keep this country out of war, and to prevent the violation of Federal statutes and international law, and that in all cases in which they were used with labor and farmer organizations that each was done as an appeal for assistance in this peace propaganda in which Labor's National Peace Council was interested.

To extend the operation of the Sherman Act to the activities of such organizations as are enumerated in the indictment would be to establish a rule so universal and dangerous in its operation that it would destroy the collective energies of all benevolent and educational organizations which are directed against vicious and immoral habits and customs. Churches, temperance unions, and other moral organizations have been making for more than a half century an active campaign against the use of intoxicating liquor as a beverage, and no one will contend but what they have been successful and have materially restrained both the manufacture and interstate and foreign commerce of such liquors. In many instances their use has been entirely blotted out.

Yet, it would be a crime against civilization were such organizations even checked in their operations in the interest of humanity. An effort to extend the operations of the Sherman law for this purpose would meet with the universal condemnation of the public, and justly so, because it is well known that the excessive use of intoxicating liquor materially affects the general welfare of the Republic. What is true with reference to the activities of temperance organizations in the interest of man is true with reference to many other organizations which seek to elevate the standing of public morals.

This leads us back to the doctrine which has been universally adhered to by the courts, that the restraint of the interstate or foreign commerce must be direct and not indirect. There is scarcely any business, trade, or occupation which, if checked or stopped, would not in a measure lessen the production of either the crude or finished product and indirectly affect the interstate or foreign commerce flowing therefrom. The refusal of the farmer to produce farm products or lessen the acreage in any commodity, or the failure of any workman on the farm to execute, in a skillful way, the cultivation of the crop or crops, would, in a measure, affect the quantity of the farm products, and thereby lessen the interstate and foreign commerce in such products. We can readily see that the framers of the Sherman Act had in mind one great object, and that was to enact a law to prevent the direct restraint of interstate and foreign commerce and not to impede the activities of the citizen

in his daily work or the activities of organizations in the interest of mankind.

The following is the indictment:

DISTRICT COURT OF THE UNITED STATES OF AMERICA FOR THE SOUTHERN DISTRICT OF NEW YORK.

"At a stated term of the district court of the United States of America for the Southern District of New York, begun and held in the city and county of New York within and for the district aforesaid, on the first Tuesday of September, in the year of our Lord 1915, and continued by orders of the said court dated, respectively, the 2d day of October, 1915, the 28th day of October and the 1st day of December, 1915, and by adjournment to and including the 28th day of December, 1915.

"SOUTHERN DISTRICT OF NEW YORK, *ss:*

"The grand jurors of the United States of America within and for the district aforesaid, on their oath present that heretofore, to wit, during the year 1915, and for some time prior thereto, and up to and including the date of the filing of this indictment, a large number of individuals, copartnerships, and corporations, hereinafter called 'manufacturers' were engaged in various States in the United States in the producing and manufacture of munitions of war, and of military and naval stores, and of rifles, cannon, and other weapons of war and parts thereof and appliances used in connection therewith; shells, cartridges, projectiles, gunpowder, and other explosives and other ammunition, parts thereof, materials used in the manufacture of and appliances used in connection therewith; locomotives, cars, automobiles, aeroplanes, and other vehicles of transportation, parts thereof, and appliances used in connection therewith; building and railroad materials and other articles of many kinds, all of which were of a character adapted for use in war on land or at sea; that the said manufacturers so produced and manufactured said articles for the sole purpose of immediate sale and shipment in trade and commerce with Great Britain, France, Russia, Italy, and other foreign nations; that the said manufacturers were engaged in the business of delivering and shipping said articles to persons, partnerships, corporations, and organized bodies of men from the State in which they were so produced or manufactured to and through the port of New York and other ports of the United States and thence to said foreign countries; and that divers persons, partnerships, corporations, and organized bodies of men other than said manufacturers were also engaged in so delivering, shipping, and transporting such articles from States of the United States to said foreign countries; that the said manufacturers and other persons, partnerships, corporations, and organized bodies of men so engaged in foreign trade and commerce, as aforesaid, employed large numbers of men both in the producing and manufacture of said articles and in the selling, shipping, and transporting of them in the aforesaid foreign trade and commerce and said articles were continuously moved in said foreign trade and commerce; that the said articles, when it was necessary or convenient so to do in order to bring them to a suitable port for shipment, were continuously moved from one State of the United States to other States; that all of the names and localities of said manufacturers and said other parties so engaged in foreign trade and commerce, as aforesaid, and the times, amounts, and routes of such shipments and transportations are not known to the grand jurors aforesaid and are so numerous as to preclude their enumeration in this indictment.

"And the grand jurors aforesaid, upon their oath aforesaid, do further present that on the 1st day of May, in the year 1915, and continuously thereafter, until and including the date of the filing of this indictment, Franz Rintelen, alias Fred Hansen, alias Miller, alias Muller, alias Edward V. Gasche, alias Edward V. Gates; David Lamar, alias Lanauer, alias David H. Lewis; Frank Buchanan; Jacob C. Taylor; H. Robert Fowler; Frank S. Monnett; Herman Schulteis; and Henry B. Martin, hereinafter called the 'defendants,' and divers others persons, whose names are to the grand jurors unknown, each of whom well knew the facts as to said foreign commerce hereinbefore stated and alleged, at and within the said southern district of New York and within the jurisdiction of this court, unlawfully did knowingly and willfully engage in a conspiracy to restrain the aforesaid foreign trade and commerce and to restrain, hinder, and prevent the transportation of said articles in said foreign trade and commerce so far as, and at such times, places, and as to such of said articles and in such ways as they might thereafter be able so to do, and to restrain, prevent, and hinder the producing or manufacture of said articles for the sole purpose of restraining, preventing, and hindering the shipment and transporting in foreign trade and commerce of such of said articles and in such ways and at such times and places as they might be able so to do; that the purpose and object of said conspiracy was not confined to any particular articles, times, places, ways, and means, but the said defendants conspired and intended, at any time or place, and by any ways or means (some of which were not definitely determined upon by said defendants) to restrain, prevent, and hinder such shipments in foreign trade and commerce; and the particular articles, times, places, ways, and means determined upon by said defendants are not known to the grand jurors aforesaid; that among the divers means and methods by which the objects of said conspiracy were intended by the defendants to be accomplished were the following:

"1. Instigating and causing strikes and walkouts among the workmen employed at the plants and factories of the aforesaid manufacturers, so as to prevent and hinder the aforesaid manufacture, and thereby to restrain the shipping and transportation of said articles in said foreign trade and commerce.

"2. Instigating and causing strikes and walkouts among workmen and employees of said persons, partnerships, corporations, and organized bodies of men other than said manufacturers engaged in foreign trade and commerce as aforesaid employed in the shipping and transporting of said articles, so as to restrain the said shipping and transporting thereof in said foreign trade and commerce.

"3. Inducing by solicitation, persuasion, and exhortation, and by the preparation, sending, mailing, and distribution of circulars, pamphlets, letters, telegrams, newspaper articles, and other printed and written matter the aforesaid workmen to quit the employment of the aforesaid manufacturers, and thereby to restrain, hinder, and prevent in whole or in part the operation of said plants for the purpose of restraining the shipment and transportation of said articles in said foreign trade and commerce.

"4. Inducing by solicitation, persuasion, and exhortation, and by preparation, sending, mailing, and distribution of circulars, pamphlets, letters, telegrams, newspaper articles, and other printed and written matter the aforesaid workmen to leave the employ of the aforesaid persons, partnerships, corporations, and organized bodies of men other than said manufacturers engaged in said foreign trade and commerce as aforesaid for the purpose of restraining, hindering, and preventing in whole or in part the shipping and transporting of said articles in the aforesaid foreign trade and commerce.

"5. Bribing and distributing money among divers officers and persons in charge and control of various labor organizations to induce the said officers and persons in charge and control of said labor organizations to cause the members of said organizations who were or might be employed by the said manufacturers or by the said other persons, partnerships, corporations, and organized bodies of men engaged in foreign trade and commerce as aforesaid to leave their employment and to bring about strikes and walkouts among the said members of the said labor organizations, and thereby to restrain, prevent, and hinder, in whole or in part, the producing and manufacture and the expected shipment and transportation in said foreign trade and commerce of said articles.

"6. By divers other means and methods not specifically determined upon by said defendants, but to be decided upon by them as occasion might arise, all calculated in furtherance of and to effectuate the object of said conspiracy.

"And so the grand jurors aforesaid, upon their oath aforesaid, do say and present that the said defendants, Franz Rintelen, alias Fred Hansen, alias Miller, alias Muller, alias Edward V. Gasche, alias Edward V. Gates; David Lamar, alias Lanauer, alias David H. Lewis; Frank Buchanan; Jacob C. Taylor; H. Robert Fowler; Frank S. Monnett; Herman Schulteis; and Henry B. Martin, and said divers other persons whose names are to the grand jurors unknown, on the said 1st day of May, in the year 1915, and continuously thereafter to and including the date of the filing of this indictment, at and within the southern district of New York and within the jurisdiction of this court, in the manner and form aforesaid set forth, unlawfully did knowingly and willfully engage in a conspiracy in restraint of the aforesaid trade and commerce with the aforesaid foreign nations, against the peace of the United States and their dignity, and contrary to the form of the statute of the United States in such case made and provided. (Act of July 2, 1890, 26 Stat., 209.)

"H. SNOWDEN MARSHALL,
"*United States Attorney.*"

(Indorsed:) 8-295. United States district court. The United States *v.* Franz Rintelen, alias Fred Hansen, alias Miller, alias Muller, alias Edward V. Gasche, alias Edward V. Gates; David Lamar, alias Lanauer, alias David H. Lewis; Frank Buchanan; Jacob C. Taylor; H. Robert Fowler; Frank S. Monnett; Herman

Schulteis; and Henry B. Martin. Indictment. Conspiracy in restraint of foreign commerce. Act of July 2, 1890 (26 Stat., 209). H. Snowden Marshall, United States attorney. A true bill, Albert J. Daly, foreman. United States District Court for the Southern District of New York. Filed December 28, 1915.

December 29, 1915, David Lamar pleads not guilty; bail, $5,000.

December 29, 1915, Jacob C. Taylor pleads not guilty; bail, $5,000.

December 29, 1915, Frank S. Monnett pleads not guilty; bail, $5,000. Fourteen days to withdraw.

January 4, 1916, Buchanan pleads not guilty; bail, $5,000. January 20 to withdraw.

January 11, 1916, filed motion to make more definite and certain, etc. Quash as to Monnett.

January 12, 1916, filed demurrer of Lamar. Plea of not guilty withdrawn.

Mr. TAGUE. Mr. Chairman, I should like to ask the chairman of the committee or some member of the committee whether I understood him correctly when he said that the laborers in the street department of this city are paid on an average less than $1.50 a day or $1.50 a day.

Mr. HOWARD. The minimum wage scale is $1.50 a day. That is one grade. Then there is a grade of $1.75 a day, and a certain portion of these laborers are paid as high as $2 a day. I will say to the gentleman that this conforms favorably to the salaries paid all over the United States in the street-cleaning departments by the different municipalities. Hardly any cities pay any higher wage than that.

Mr. TAGUE. Mr. Chairman, I desire to offer an amendment.

The CHAIRMAN. The gentleman from Massachusetts offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. TAGUE: At the end of line 10, on page 33, insert the following:

"*Provided*, That the pay of laborers in the street department shall be not less than $2 per day of eight hours."

Mr. HOWARD. Mr. Chairman, I make a point of order on the amendment.

The CHAIRMAN. The gentleman from Georgia makes a point of order.

Mr. HOWARD. I will reserve it if the gentleman from Massachusetts desires to be heard.

Mr. TAGUE. Mr. Chairman, I was rather surprised when I learned that the city of Washington was paying to the men in its street department $1.50 per day, a rate of wage that, to my mind, is not at all in keeping with the standards of living of this day. Mr. Chairman, in every city that I have had anything to do with, and in my own State, the street laborers are paid more than $2 per day for eight hours' labor, and especially the city I have the honor in part to represent, we pay our street laborers not less than $2.50 a day for eight hours' work, give them Saturday afternoon holiday and a vacation during the summer time. When I hear on this floor that men in this city are compelled to work for $1.50 a day, with wet days taken out of their wage, making their wage a great deal less, I think it is time for this Congress to make some provision for a fair wage for these men in order that they and their families may live. I do not believe that $1.50 a day is a living wage. I do not believe that we have any right as legislators in this Congress to ask men to work on highways for such a wage or to work for wages that will not permit them to bring up their families in a proper manner and give them sustenance and a livelihood. With that idea I have offered this amendment. I am sorry the point of order is raised here, because, when sustained, the men will not get the benefit of my amendment. Before the bill is passed I am going to put in an amendment somewhere in this bill that will bring about a fair rate of wage for these workingmen in the employ of the Government of the United States. I believe it is an indictment against the United States to think that a man would be asked to work for the meager wage of $1.50 a day; that does not permit him to provide in a proper manner a living for himself and his family.

Mr. REAVIS. Mr. Chairman, I sincerely trust that the point of order against the amendment offered by the gentleman from Massachusetts will not be insisted upon. The statement made by the chairman of the committee that these laborers upon the streets were paid in accordance with the average wage which prevails in other cities scarcely meets the situation, to my mind. It is not a question of whether other cities pay a like wage, but it is a question as to whether or not we pay a living wage. It seems to me that in the city of Washington an intermittent employment—not an everyday employment, because there are days when by reason of the inclemency of the weather they can not work—an employment at $1.50 a day is not a fair compensation to a sober and industrious man. It seems to me, in this day and age, if this Congress is going to act in harmony with humanitarian principles, principles of fair play that are obtaining more and more throughout the world, it at least ought to be willing and able to pay these men enough for their labor to keep them and their families in comparative comfort. I have just as much regard for the Treasury of the United States as any other Member on the floor, but I have too much regard for this Congress and this country to be willing to pay a man a wage which is insufficient to support his family and educate his children. That can not be done on $1.50 a day in this city.

I think the time has come when those who by accident of birth or by environment have a little the best of it in life's battle ought to be willing to assume a little of the burden and help in some measure to care for the more unfortunate of their brothers. It seems to me that this Government can not afford to be so niggardly with its money, can not afford to guard the Treasury of the United States to an extent that will deprive sober and industrious laborers of the opportunity to labor at a wage that will support their families in some sort of decency and comfort. I sincerely hope that the point of order will be withdrawn.

Mr. DENISON. Mr. Chairman, I will state that an investigation of the time that these men actually work on the streets and reported to the Committee on Labor shows that they make an average through the year of just 98 cents a day for the time they are working. Investigation further shows that the men who work on the streets, many of them, have to partly depend for a living on the labor of their wives, who go out and perform other classes of labor to help the family. Many of them have to depend on charity to help get clothes for their families. That evidence has been submitted to the committee at this session. I think that the gentleman from Georgia, who usually claims to be a friend of the laboring men, ought not to make the point of order. The committee could not do a better thing than to accept the amendment offered by the gentleman from Massachusetts.

Mr. HOWARD. Mr. Chairman, before renewing the point of order I want to say that the policy of the committee is to make these bills as economical as we can in view of the circumstances. There is one phase of this case that I want to state before renewing my point of order. I reiterate that the salaries paid to the street-cleaning force of the city of Washington is as high as the salary paid for the same manner of work in all of the large cities of the United States.

Mr. MADDEN. I beg the gentleman's pardon, but that is not true of Chicago, where the wages are $2.25 and the highest is $2.75.

Mr. JOHNSON of Kentucky. And the highest here is $4.

Mr. MADDEN. But that is not for laborers.

Mr. HOWARD. The wage scale is stated by the commissioners to run from $4 down to $1.50 a day. Now, let us see what class of laborers are getting $1.50 a day. There is not a Member on the floor of this House that has not noticed these old fellows around town, men 65 to 75 years of age, hobbling around the streets picking up paper, or with a little broom pushing a little cart.

The Government of the United States, through the commissioners, give preference to these old fellows that are liable to become chargeable to the District, at $1.50 a day. The higher class of workmen get $2 a day, 86 of them, and 312 of them get $1.75 a day. I can show you an old man at the foot of the Capitol, an old Confederate soldier, 75 years of age, on the pay roll of the District, and he could not make 50 cents a day in any place on earth.

Now, the arms of the Government have been opened, and these old men have been taken in and given a position that pays $1.50 a day and keeps them out of the poorhouse. If you increase the wages what will be the result? There will be 150 or 200 strong bucks that will come in here and jostle these old fellows out of their jobs. They can not retain the positions at those wages. I am in favor of as high a wage scale as the gentleman from Nebraska or the gentleman from Illinois or anybody else. But the taxpayers of the District of Columbia must be taken into consideration. The Government of the United States does not contribute all of this money, and we must look upon this District government here as at least a quasi municipality.

The CHAIRMAN. The time of the gentleman from Georgia has expired.

Mr. HOWARD. Mr. Chairman, I renew the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. STAFFORD. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amendment by Mr. STAFFORD: Page 33, line 10, at the end of the paragraph insert the following:

"*Provided*, That no part of this appropriation shall be paid to any laborer engaged in street-cleaning work at less than $2 a day for not more than eight hours work."

Mr. PAGE of North Carolina. Mr. Chairman, I make the point of order against that.

Mr. STAFFORD. Mr. Chairman, it is well known that in the consideration of appropriation bills limitations on appropriations are always in order, and it is always within the authority of the House to restrict and limit the scope of an appropriation. Otherwise Congress would not have that control over appropriations which is its right. The amendment proposed is a pure limitation upon the expenditure of this appropriation, namely, that the executive officials are not authorized to expend any of this fund for this designated character of work——

Mr. PAGE of North Carolina. Mr. Chairman, will the gentleman allow me to make a suggestion to him and to the Chair? Under the guise of a limitation you can not change the law any more than you can in any other way under the rules of the House.

Mr. STAFFORD. But there is no law to-day limiting the scale of wages to be paid to these men.

Mr. PAGE of North Carolina. No; but there is a lump-sum appropriation——

Mr. STAFFORD. Ah, the gentleman admits away his case. If there had been a law limiting the wages to be paid to these men, then there might be some basis for the gentleman's contention, but he admits that there is no law except this lump-sum appropriation. I go back to my original premise and state that Congress has the right to determine how this fund shall be utilized. We can say that it shall not be utilized in the payment of the laborer unless he receives $2 for not more than eight hours' work.

Mr. PAGE of North Carolina. Mr. Chairman, I beg to submit that this is not a limitation within the rules of the House. It is a direction and not a limitation, and it does not decrease the appropriation and therefore can not come within the rules of the House as a limitation upon an appropriation bill. So far as I am concerned, I am ready to have the Chair rule.

The CHAIRMAN. The Chair is ready to rule. In order to come within the Holman rule, the Chair thinks that it would have to show upon its face a reduction, and the Chair thinks it does not do that.

Mr. STAFFORD. But, if the Chair will permit me, it is not the purpose to bring this within the Holman rule. Long before that rule was established the rule of limiting an appropriation was well recognized. There is precedent after precedent recognizing the right of the House to put a limitation upon an appropriation.

Mr. MEEKER. Would it be a limitation the way that is stated—to pay not less than $2 for more than eight hours' work?

Mr. MADDEN. That would be the condition under which they are allowed to expend the money.

The CHAIRMAN. The Chair thinks this is a proposition creating a new law and a new scale of wages, not permissible on an appropriation bill, and the Chair therefore sustains the point of order.

Mr. STAFFORD. Mr. Chairman, I move to increase the amount carried in the bill from $290,000 to $310,000, and I ask to be recognized on that proposition.

The CHAIRMAN. The gentleman from Wisconsin offers an amendment, which the Clerk will report.

The Clerk read as follows:

Page 33, line 8, strike out "$290,000" and insert "$310,000."

Mr. STAFFORD. Mr. Chairman, in the last year's appropriation act we appropriated in this item $280,000. The commissioners recommended an increase of $42,000 for the sole purpose of increasing the wages of these poorly paid street laborers from $1.50 to $1.75 and of those receiving $1.75 to $2 a day. What has the committee done toward carrying out that beneficent and humanitarian recommendation? It has brought in here a meager recommendation of $10,000, which will permit of no increase substantially in the wages of these laborers. What kind of a government are we going to have in the District when the members of the legislating committee decline to consider the recommendations of the commissioners that have this matter in hand, who recognize the need of increasing the wages of these men? It is no wonder that we have the Committee on Labor coming in here with an omnibus bill seeking to increase the salaries of all employees to a minimum of $3 per day. I say that anyone who wishes to see a fair living wage paid will vote for this amendment, though I think you can hardly consider that a living wage when you provide for an increase of wages of street laborers from $1.50 to $1.75 and from $1.75 to $2. I challenge the statement of the gentleman from Georgia [Mr. HOWARD] when he says that in other cities of like size the minimum wage is the same as is paid in this city. I can not speak for other municipalities, but we have heard here instances cited by the gentleman from Massachusetts [Mr. TAGUE] where, in Boston, the wage is $2.50 a day; by the gentleman from Illinois [Mr. MADDEN], where the minimum wage in Chicago is $2.25 and runs up to $2.75. In my home city the minimum wage, according to an ordinance passed some years ago, is $2. Why should we be niggardly toward these men? It was the policy of the subcommittee in the preparation of the legislative, executive, and judicial appropriation bill to raise the pay of most of those who receive $600, $700, $800, and $900 so that they could provide adequately for their families. I am not rising here to make any demagogic appeal, but I think we should, regardless of the recommendations of the committee, provide funds whereby the commissioners can carry out what everybody must admit is only a fair proposal of increase, namely, to increase the wages of those receiving $1.50 a day to $1.75 a day and those receiving $1.75 to $2 a day.

Mr. HOWARD. Will the gentleman yield?

Mr. STAFFORD. I yield.

Mr. HOWARD. Does the gentleman insist that the minimum wage here of the class of people I have specified as employed under this provision is not adequate pay?

Mr. STAFFORD. Yes; the commissioner himself, in testifying before your committee, stated that he wants to increase these men from $1.50 to $1.75.

Mr. HOWARD. I just want to ask the gentleman this question: If the gentleman believes that, and he has always believed it, and kept on believing it, why, in the name of common sense, did the gentleman and the gentlemen on that side want to heap all of these increases on Democratic appropriation bills when you had 16 years in which you did nothing in this regard?

Mr. STAFFORD. In answer to that statement I want to say to the gentleman that, so far as my conduct has been concerned on the legislative committee, I was not in favor of increasing salaries if they were above $1,200 a year, and I voted consistently here in the House to sustain the chairman of the committee against those increases, but on those below $1,200, where the salaries were not sufficient to provide for a man to support a home, I voted consistently to raise those salaries. My position is entirely consistent.

Mr. TAGUE. Mr. Chairman, I hope the amendment of the gentleman [Mr. STAFFORD], who has just spoken, will pass. Mr. Chairman, we sit here as Members of this Congress and say we are appropriating a sum sufficient to keep life and limb together of the poor old laborer who works around the Capital. In this great country of ours we read in the papers daily of our great wealth and how rich we are, and yet we are telling these men——

Mr. BUCHANAN of Illinois. Will the gentleman yield?

Mr. TAGUE. In just a minute—we are telling these men, faithful servants, veterans of the Army, who it has been said are unfit to earn more than 50 cents a day, that that is all they can have. Why, Mr. Chairman, at this time and in this Congress, I believe, it is the duty of every Member of Congress to see to it that some provision is made to provide for these men. I said in my city we give $2.50 for eight hours' labor. We give them Saturday afternoons. We give them two weeks' vacation in the summer, and when they get old and are unable to perform their duties my city pensions them at a dollar a day. [Applause.]

Mr. BUCHANAN of Illinois. Will the gentleman yield right there?

Mr. TAGUE. I will.

Mr. BUCHANAN of Illinois. Our friend from Georgia [Mr. HOWARD], who has always been in sympathy with the laboring people, opposes this on the ground that there are some old men working. That does not apply about other cities. I know in the city of Chicago, where the wages of the common laborer are $2.25 to $2.75, there are old men there who perform work, efficiently able men, just the same as there are here, so that is no argument against giving a living wage scale.

Mr. HOWARD. If the gentleman will permit, what I wanted to convey by that statement was this, that those who get this minimum wage scale are a class of people, old men, who can not readily find employment on account of some decrepitude or age, who come in contact with the high class of laborer who gets $2 a day.

Mr. BUCHANAN of Illinois. The idea I want to convey is that the same thing applies to the other cities where they pay more for the common labor, $2.50 a minimum wage for the same kind of labor the gentleman speaks of.

Mr. TAGUE. Mr. Chairman, I realize the gentleman from Georgia and all of the Members of this House want to give the men in the employ of the city a fair compensation for their labor, and here is our opportunity. Let us raise this appropriation; let us give them something that is fair. One dollar and fifty cents a day! No man can live on that at this time and take care of himself and family. It is all right to say they perform no labor; but they do, and they must live. They must live as well as any of us. I believe $2 a day is little enough and too little to supply the wants of life for these men. I said at the beginning I was surprised to think that such a condition could prevail in this country and in this city, and if it is the condition, then the sooner this Congress and the Nation can get down to the question and take care of them in their old age by appropriating money that will provide for them, the sooner this country will be better off. If we are going to have good citizens, we must give men a living wage. If they are going to bring up families to amount to anything in the future, we must provide them with a wage sufficiently large to enable them to secure the necessities of life. One dollar and fifty cents a day, or, as one Member said, 98 cents a day, paid to some men in this department, is not sufficient. I believe, Mr. Chairman, it is a disgrace and a blot upon the good name of this country, and I for one, as a Member of this House, want to see this rectified. I hope the chairman of this committee will accept this amendment and let the men in the street department in the city of Washington, whether it is governed and controlled by two distinct factions or satisfies the wishes of two distinct factions, so that it will become the law and give these men what they should get and rightfully deserve. [Applause.]

Mr. MEEKER. Some one has well said:

> Methods are many; principles are few.
> Methods often vary; principles never do.

We are discussing here a method of paying men who are employed to do a certain line of work at a reasonable, decent wage. Because of storm and rain there are many days when these men can not work, and we "take it out" on them. We want men to do this work and we offer them the munificent (?) salary of $1.50 a day on nice days, but when it rains they are losers and not Uncle Sam.

I really think I have never felt so ashamed of the policy of our Government as when I had my attention called a few months ago, out in my home city, to the fact that men and women out there were working for this Government at the rate of less than 98 cents a day. And yet we are passing laws to force corporations and employers of labor into all sorts of terms. The old-age pension system and the compensation laws that we are passing are forced upon employers of labor, but as to ourselves, when we come to where we can do as we please as employers of labor in the name of the Government, we dodge the responsibility. I do not see how any man could oppose a wage scale of $2 a day, when the weather permits employment, when we make the laborers stand the loss when it rains. I think a principle is involved here, and it is simply this: Can we look the men of this country squarely in the face when we say that we are giving $1.50 a day if it does not rain. Back in Indiana on the farm I knew a man, who was a sort of a skinflint, who used to say to his boys, "It is too wet to work on the farm to-day and so we will grease the harness." Uncle Sam says here in the District of Columbia, "It is too wet to work on the streets and you will go without your pay."

Now, gentlemen, let us be ordinarily, decently fair. If these men are old men, if they have people dependent upon them so that they can not work elsewhere at odd jobs, so much the more should we manifest some generosity, but I can not be persuaded that $2 a day is a generous wage when a man stands the loss because of bad weather. We have voted millions away here this year, and the men who voted them away will have to do more explaining than those who voted against doing so. When we get down to the man on the street we become "economical."

I hope this amendment will pass.

Mr. PAGE of North Carolina. Mr. Chairman, I ask unanimous consent that all debate on this paragraph and amendments thereto close in 10 minutes.

The CHAIRMAN. The gentleman from North Carolina asks unanimous consent that at the expiration of 10 minutes all debate on all amendments to this paragraph be closed. Is there objection?

There was no objection.

Mr. COOPER of Wisconsin. Mr. Chairman, this reminds me of the many other times during my service here when this subject, or a similar one, has been before the House. I say now, substantially, what I have said on other occasions, that it is altogether wrong for the United States Government, the richest Government in the world to-day, the richest Government the world has ever seen, to force people who work for it to indulge in cutthroat competition in order to get a job. Of course it has the power to say, "You work for 98 cents a day or for $1.50 a day or we will get somebody else to work for us." And the poor man takes the starvation wage. But the Government ought not to use such a power. One dollar and fifty cents a day in Washington in these times of extraordinarily high prices does not enable a man to pay running expenses, clothe himself and his family, feed them, keep them warm in winter, and pay the doctor.

It is the duty of the United States Government to say "We will pay to every man who works for this Government a living wage. We can afford to do it, and in honor we ought to do it." That is the attitude the United States Government should take. Any other attitude is wholly unbecoming. It would be unbecoming for a very rich private corporation or a very rich employer to say to a poor man applying for work, "We can get somebody else to work for 90 cents a day," and then on the man replying "I have a wife and children to support; I must take that or starve, and I will work for 85 cents a day, though it will hardly keep body and soul together," for the corporation or other employer to say, "All right; you get the job." As the gentleman from Missouri [Mr. MEEKER] suggested, the Government says, "We will give you 98 cents a day while it is pleasant weather." Last year it rained in southeastern Wisconsin practically all of the time for six or seven weeks. It was the longest rainy season that I remember. If some such downpour as that should occur where these miserably paid, fair-weather men with families to support are employed by the Government it would leave them to starve.

The United States Government ought to be a model employer. It ought to pay a living wage. It can afford to pay, and is in honor bound always to pay, a living wage.

Mr. PAGE of North Carolina. Mr. Chairman, I am not opposing this amendment as one who is opposed to paying a living wage for the rendering of a service. I know that I agree with my colleague on the committee [Mr. HOWARD] in the statement he made earlier in this discussion, that a great many of these people who are employed in the street-cleaning department of the city of Washington, for which they receive a compensation of $1.50 a day, would not likely receive this employment if the wage were made higher. They are not vigorous, able-bodied men, able to go out in the competitive labor market of this city or any other and make a living for themselves. They are given an opportunity by the governing board of this city to earn $1.50 a day at light, easy work, with short hours of labor, and have the satisfaction of knowing that they are sustaining themselves, without placing themselves upon the charity of this city. Now, these gentlemen who want to put this wage at $2 a day, or at some other price higher than the present wage, if they succeed in voting this amendment onto this bill, will in all probability put half of those old men who are now employed, largely as charity, rendering some service, light as it is, upon the cold charity of this city, without possibly ample opportunity to take care of them by the appropriations made and the facilities afforded.

I am not going to be placed in the position of opposing the man who is a wage earner. I was once a wage earner myself. I started as a boy working for a wage, and I know what the man who has to work for a living has to endure. But I stand and maintain here that it is infinitely better for a large class of these people to be given an opportunity to retain their self-respect by their own labor to make their own living, than to be thrown upon charity. Many of them would have their hearts broken if they were thrown upon the charity of this city or upon any other charity. I am not here saying that every man should not receive all the wages he deserves. I am not opposed to any man receiving all the wage he can get, provided he gives in return for that wage an equivalent in work. But I believe in this instance, instead of helping the wage earner who is employed in the street-cleaning department of this city, if you vote this amendment in the bill, in all probability, as I honestly believe, instead of rendering him a service, you will do him a hurt.

Mr. DENISON. Mr. Chairman, will the gentleman yield?

Mr. PAGE of North Carolina. Yes.

Mr. DENISON. Can the gentleman state when there has been an advance in the District here in the wages of the men who clean the streets?

Mr. PAGE of North Carolina. I can not answer that. I am not pretending to say.

Mr. DENISON. Can the gentleman state when he has been in favor or when he ever will be in favor of increasing the wages of these people?

Mr. PAGE of North Carolina. If the gentleman will put it on the basis of an able-bodied man doing the work of an able-

bodied man, I would do it now. But I am not willing to throw out of employment a large number of men of the particular class who, by my own observation and experience, I know happen to be employed in the service.

Mr. DENISON. Mr. Chairman, will the gentleman yield further?

Mr. PAGE of North Carolina. Yes.

Mr. DENISON. If the reason the gentleman has given is good for not increasing the wages of these people now, is that a good reason for not ever increasing their wages?

Mr. PAGE of North Carolina. Yes.

Mr. DENISON. What is the reason?

Mr. PAGE of North Carolina. I will say now that this city has not made sufficient provision for taking care of that class of people that live in it, and I am one of those who believe that it ought to make provision for taking care of its old and feeble and sick and decrepit. I hope the day will come very soon when it will do that.

Mr. BAILEY. Mr. Chairman, will the gentleman yield for a question?

Mr. PAGE of North Carolina. Yes.

Mr. BAILEY. Are these particular laborers themselves asking for an increase?

Mr. PAGE of North Carolina. I can not answer as to that. I have no information on that.

Mr. DENISON. I will answer that question, if the gentleman will permit. Some of these men have been before the Committee on Labor, and they have told pitiful stories of the small wages they are receiving.

Mr. PAGE of North Carolina. I can not mention anybody who is receiving a salary, from the humblest laborer up to the gentleman who is receiving on this floor $7,500, who does not want that amount increased. Mr. Chairman, I call for a vote.

The CHAIRMAN. The time of the gentleman from North Carolina has expired.

Mr. REAVIS. Mr. Chairman, did the gentleman from Wisconsin [Mr. STAFFORD] consume all of his time?

The CHAIRMAN. The gentleman from Wisconsin and the gentleman from North Carolina [Mr. PAGE] consumed 10 minutes.

Mr. REAVIS. Mr. Chairman, I ask unanimous consent to proceed for three minutes.

The CHAIRMAN. The gentleman from Nebraska asks unanimous consent to proceed for three minutes. Is there objection?

There was no objection.

Mr. REAVIS. Mr. Chairman, I do not know the character of the men who are employed on this street work at $1.50 a day. I do not know whether they are old, crippled, sick, and objects of charity or not. But I do know this, that this Government can not afford to take the labor of any man at a price that will not permit him to keep soul and body together. [Applause.] I do know this——

Mr. PAGE of North Carolina. Mr. Chairman——

Mr. REAVIS. I can not yield; I have but three minutes.

Mr. PAGE of North Carolina. I gave time to the gentleman because I refrained from objecting to his request for unanimous consent.

Mr. REAVIS. I yield to the gentleman.

Mr. PAGE of North Carolina. I wanted to ask the gentleman if he knew anybody whose soul and body had parted because of this wage?

Mr. REAVIS. I do know this, and the chairman of the committee knows it, that there is no man at this day and age and under existing circumstances who can support himself and his family in the city of Washington by intermittent labor at $1.50 a day; and this Government can not afford, I care not how old its employees may be, to hold them down to a wage that will not permit them to support their families.

Mr. GARRETT. Mr. Chairman, will the gentleman yield?

Mr. REAVIS. Yes.

Mr. GARRETT. What has the gentleman to say with reference to the suggestion made by the gentleman from North Carolina [Mr. PAGE] and the gentleman from Georgia [Mr. HOWARD], to the effect that if these wages are increased, many of these men who are now working will be thrown out of employment, and therefore it would be an unkindness to them rather than a kindness to increase the wage?

Mr. REAVIS. Whether or not these men are thrown out of employment is dependent entirely upon the sense of justice of the commissioners who employ them, and the commissioners who are charitable enough to give employment to these old men surely would not be brutal enough to throw them out of employment when their wage was increased to a living wage. I do not believe that that condition would obtain. [Applause.]

The CHAIRMAN. The question is on agreeing to the amendment offered by the gentleman from Wisconsin [Mr. STAFFORD].

The question was taken, and the chairman announced that the "noes" appeared to have it.

Mr. STAFFORD. A division, Mr. Chairman.

The CHAIRMAN. A division is demanded.

The committee divided; and there were—ayes 26, noes 27.

Mr. STAFFORD. Tellers, Mr. Chairman.

Tellers were ordered; and the chairman appointed Mr. PAGE of North Carolina and Mr. STAFFORD to act as tellers.

The committee again divided; and the tellers reported—ayes 33, noes 25.

So the amendment was agreed to.

Mr. EVANS. Mr. Chairman, I ask unanimous consent that I may extend my remarks in the RECORD.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. TAGUE. Mr. Chairman, I ask unanimous consent to extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Massachusetts [Mr. TAGUE] asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. FESS. Mr. Chairman, I make the same request.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Disposal of city refuse: For collection and disposal of garbage and dead animals; miscellaneous refuse and ashes from private residences in the city of Washington and the more densely populated suburbs; collection and disposal of night soil in the District of Columbia; payment of necessary inspection, allowance to inspectors for maintenance of horses and vehicles or motor vehicles used in the performance of official duties, not to exceed $20 per month for each inspector for horse-drawn vehicles, $25 per month for automobiles, and $12 per month for motor cycles; fencing of public and private property designated by the commissioners as public dumps, and incidental expenses, $179,945.

Mr. MONDELL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The gentleman from Wyoming, a member of the committee, offers an amendment, which the Clerk will report.

Mr. MONDELL. I offer an amendment as a separate paragraph.

The Clerk read as follows:

Amendment offered by Mr. MONDELL: On page 33, insert at the end of line 25 the following as a separate paragraph:

"Garbage reduction plant: The commissioners are authorized to acquire by purchase or condemnation a site or sites, and to use any land belonging to the District of Columbia which is suitable, in the discretion of the said commissioners, to enter into contracts for the construction of the necessary buildings thereon, to purchase the necessary machinery, tools, equipment, including motor and other vehicles, horses, supplies, personal services, and incidentals, required for municipal collection and disposal of city refuse, in general accordance with plans and specifications prepared under the authority contained in the District appropriation act for the fiscal year 1915, all of which shall be ready for operation on or before July 1, 1918, at a total cost not to exceed $885,900, of which $300,000 is appropriated and made immediately available.

Mr. JOHNSON of Kentucky. Mr. Chairman, I make a point of order against that amendment.

Mr. MONDELL. Will the gentleman withhold his point of order just a moment?

Mr. JOHNSON of Kentucky. Yes; I will withhold it.

Mr. MONDELL. Mr. Chairman, the Engineer commissioner of the District called attention to the importance of this item at this time in these words:

There is this reason for the initial appropriation at this time: If we do not get it this year we will have to look forward to a postponement of possibly three years, for the reason that our existing contract began on the 1st of July, 1915, and will expire on the 1st of July, 1918. Now, we deliberately made a three-year contract, because we knew it would require that time for the completion of this report and the construction of the municipal plant.

Municipal garbage plants are coming to be quite common in the country, and it seems to me that there are many arguments in favor of such a plant in the District of Columbia. It is true that no legislative provision has been made for such a plant as this, and in making the point of order I hope the chairman of the District Committee will promise us that very soon that commitee will bring in the necessary legislation.

Mr. JOHNSON of Kentucky. Mr. Chairman, I am not in the frame of mind now to make such a promise, and am entirely satisfied I will not be in that frame of mind later on, for the reason that I recently saw in a New York newspaper that that city now proposed to sell its garbage and make a profit out of it without handling it at all; and I have seen other articles

more recently, copied in the papers from other parts of the country, showing that this subject is now being investigated, and it is believed by many that municipally owned garbage plants will not be needed at all, that the soap manufacturers and the fertilizer manufacturers will buy all this stuff and pay a profit for it. Therefore, Mr. Chairman, I make the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. MADDEN. I move to strike out the last word. I should like to ask the gentleman from North Carolina a question. I notice that in this paragraph of the bill provision is made for payment for the removal of dead animals. In all large cities of the country they get paid for the privilege of removing dead animals. Why do we not do that way?

Mr. PAGE of North Carolina. I think the number of dead animals here is very small, and the subject has not been of enough importance for anyone to make a bid to take those dead animals away. I believe they are not removed by the same people who have charge of the city pound.

Mr. MADDEN. They get paid for doing it, however.

Mr. PAGE of North Carolina. Yes; they are paid for the service.

Mr. MADDEN. In all other large cities in the United States they pay the municipality for the privilege of doing it.

Mr. PAGE of North Carolina. I think so, and I think the time may come very soon when there will possibly be dead animals enough here to make it worth while.

Mr. MADDEN. Yes; to make soap and glue.

Mr. PAGE of North Carolina. I do not know of any soap or glue factory in this vicinity.

Mr. JOHNSON of Kentucky. I can not understand why this has not been done long ago. If I remember correctly, the Commissioners of the District of Columbia have been offered $3 apiece for dead horses, while they pay $2 apiece for having them hauled away.

Mr. MADDEN. The usual price paid for the privilege of removing a dead horse is $5 a head; and if the commissioners have been offered $3 a head, I see no reason why they should pay $2. Those who made the offer of $3 must have had some means of disposing of them at a profit or they would not have offered the $3.

Mr. JOHNSON of Kentucky. A good horse hide is worth $3 anywhere on the market.

Mr. MADDEN. Surely, Mr. Chairman, it seems to me there ought to be a provision made in this section of the bill requiring the commissioners to sell the privilege of removing dead animals, instead of paying some one for removing them. I just want to call attention to this.

Mr. CAMPBELL. May I inquire of the gentleman from North Carolina or the gentleman from Kentucky where the soap factory is that could take these animals?

Mr. PAGE of North Carolina. I said I did not know of any.

Mr. CAMPBELL. I was just wondering where these dead animals could be sold.

Mr. MADDEN. They can be made into glue.

Mr. CAMPBELL. Where is the glue factory?

Mr. MADDEN. They can soon fix one. It does not require much money.

Mr. CAMPBELL. The policy of the city of Washington is to prevent the establishment of soap factories and glue factories.

Mr. MADDEN. They could go across the river into Virginia or out here into Maryland. It does not take much capital to start one.

Mr. CAMPBELL. There are no soap factories here now.

Mr. JOHNSON of Kentucky. One will be built if we change this policy.

Mr. PAGE of North Carolina. Mr. Chairman, I want to say that my only personal experience with a dead animal was a dog that weighed possibly a pound and a half, and if I had paid 5 cents for each time that I used the telephone in an effort to have the dog carried off I would have paid $5 in getting him removed.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Bathing beach: Superintendent, $600; two watchmen at $480 each; temporary services, supplies, and maintenance, $2,250; for repairs to buildings, pools, and upkeep of grounds, $1,400 to be immediately available; in all, $5,210.

Mr. JOHNSON of Kentucky. Mr. Chairman, I make a point of order as to the new office created—two watchmen for bathing beach, $480.

Mr. PAGE of North Carolina. It is clearly subject to a point of order. I do not know that I can induce the gentleman to withdraw it. He says I can not.

The CHAIRMAN. The Chair sustains the point of order.

Mr. PAGE of North Carolina. I offer the following amendment.

The Clerk read as follows:

Amend, on page 34, line 6, by striking out the word "two" and inserting the word "one."

The amendment was agreed to.

Mr. PAGE of North Carolina. Now, Mr. Chairman, the word "watchmen" should be changed to "watchman," and the word "each," in line 7, be stricken out.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

In line 6 change "watchmen" to "watchman," and in line 7 strike out the word "each."

The amendment was agreed to.

The Clerk read as follows:

For construction of two swimming pools, shower baths, appurtenances, and equipment on sites to be selected by the commissioners, $7,500.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word. The committee has done fairly well in the matter of the playgrounds and swimming pools considering the estimates of the commissioners, although the committee allowed $7,000 less than the estimates. My opinion is that the commissioners were themselves rather too modest and moderate in their estimates, and certainly everything they estimated for should have been allowed. This city needs more playgrounds; it needs better care of playgrounds; and above all things it needs more public swimming pools.

I have stated here a number of times that this city has less provision for swimming pools than any city in the United States of its size, and that is true. The Capital of the United States ought to set an example to the balance of the country in this regard. And yet we have practically nothing in the way of public swimming pools except a makeshift affair down here in Potomac Park, where the boys in the swimming time are thick as mosquitoes in Jersey. The numbers there are so great that it is impossible for them to enjoy the facilities as they should, and it is practically impossible for a boy to learn to swim for there is not room enough. The city is hot and uncomfortable in the summer time, and we ought to provide for bathing and swimming facilities in abundance. We have not even made provision along the Potomac for bathing facilities. There is not a point along the Potomac River anywhere within reachable distance of the city where a boy can go in and bathe without being arrested and carried off to the station house. Recently the officer in charge of public buildings and grounds has tried to provide for the boys by opening some pools up in Rock Creek Park. That is the best we have at this time.

Mr. FESS. Will the gentleman yield?

Mr. MONDELL. Certainly.

Mr. FESS. Last year some of the playgrounds had to be closed because there were not facilities to keep them open.

Mr. MONDELL. That is true, we have been niggardly in the extreme in the appropriations for the care of playgrounds and for public bathing beaches and pools in the city.

The pro forma amendment was withdrawn.

The Clerk read as follows:

Public convenience stations: For maintenance of public convenience stations, including compensation of necessary employees, $13,000.

Mr. MONDELL. Mr. Chairman, I offer the following amendment as a new paragraph.

The Clerk read as follows:

New public convenience stations: F, G, and Ninth Streets NW., $20,000; Wisconsin Avenue and M Street NW., $18,000; Fifteenth Street and New York Avenue, $25,000.

Mr. PAGE of North Carolina. To that, Mr. Chairman, I make a point of order.

Mr. MONDELL. Will the gentleman reserve the point of order for just a moment?

Mr. PAGE of North Carolina. Well, since the gentleman from Wyoming has not said anything, I will reserve it.

Mr. MONDELL. Mr. Chairman, I want to ask my genial friend why he did not allow the estimates of the commissioners?

Mr. PAGE of North Carolina. I can explain it. One item which has been estimated for, also estimated for in former estimates, at Ninth and F Streets, is very seriously objected to, and if I had known that the gentleman was going to offer this amendment I would have brought the letter from the Secretary of the Interior opposing it. The fact is that that is a very crowded intersection of streets. The streets themselves are narrow and the Patent Office employees are immediately connected with the place that was sought to be used, and your committee does not believe that that is a proper place for a station. The same thing applies exactly to the proposed station at New York Avenue and Fifteenth Street. If the gentle-

man knows any more crowded district in the city of Washington than that, I would like to have him mention it. The Treasury Department protested just as vigorously against it as did the Secretary of the Interior against the other, and while there may be some need from a public standpoint of a station somewhere in these localities, certainly these are not the places, in the judgment of the committee.

Mr. MONDELL. The gentleman agrees with the commissioners that these are localities where stations are needed, and if the station should not be located just at the particular point suggested by the commissisoners it should be located somewhere in the immediate vicinity. It seems to me that we do not get anywhere by simply declining to make any appropriation for the stations because some one occupying a public building does not feel disposed to approve of it. The stations are needed somewhere in these locations.

Mr. PAGE of North Carolina. Let me remind the gentleman that there was a location made two or three years ago for the establishment of a station at Ninth and F, and we repealed it because it was not a practical place for it there, in the judgment of Congress itself.

I think there is a solution of this problem, and I have personally talked this over with the engineer commissioner. In the narrow streets and the crowded intersections like these proposed it seems to me it would be impossible to place these stations underground even, without seriously interfering with the traffic. I think a plan can be worked out and will be worked out to take care of the situation.

Mr. MONDELL. I am simply calling attention to these matters in the hope that a plan will be worked out. We have been agitating them for years. The necessity for them is apparent to all, and we should not delay forever because there is some slight disagreement as between the commissioners and those in the departments.

Mr. PAGE of North Carolina. I agree with the gentleman, and I think it will be worked out.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

ELECTRICAL DEPARTMENT.

Electrical engineer, $3,000; assistant electrical engineer, $2,000; inspectors—1 $1,000, 4 at $900 each; electrician, $1,200; 2 draftsmen, at $1,000 each; 3 telegraph operators, at $1,000 each; repairmen—expert $1,200, 3 at $900 each; telephone operators—3 at $720 each, 5 at $540 each, 1 $450; electrical inspectors—1 $2,000, 1 $1,800, 1 $1,350, 4 at $1,200 each; cable splicer, $1,200; clerks—1 $1,400, 1 $1,200, 2 at $1,125 each, 1 $1,050, 1 $750; assistant repairmen—2 at $620 each, 2 at $540 each; laborers—1 $630, 3 at $600 each, 2 at $540 each; storekeeper, $875; in all, $49,515.

Mr. JOHNSON of Kentucky. Mr. Chairman, I make the point of order against the increase in the salary in line 24, page 38, where the salary is increased from $2,500 to $3,000.

Mr. PAGE of North Carolina. Mr. Chairman, it is clearly subject to the point of order. If he will withhold it for a moment——

Mr. JOHNSON of Kentucky. I withhold the point of order.

Mr. PAGE of North Carolina. We had quite a discussion a while ago in reference to the wages paid to these more or less infirm and old and decrepit men who work on the streets of the city of Washington. The subcommittee having this bill in charge does not believe that an electrical engineer competent to take charge of the electrical department of the municipality of the District of Columbia can be employed or one that is being employed in a position of like responsibility, requiring the skillfulness, anywhere else that I know of at a salary of $2,500. Believing that skilled men in this position should be paid this amount, the committee increased it from $2,500 to $3,000.

Mr. JOHNSON of Kentucky. My objection is that this particular individual is entirely too "skillful."

Mr. PAGE of North Carolina. If the gentleman will allow me. I want, in justice to the members of this committee and to myself and for the members of the subcommittee, to say that this subcommittee has not appropriated for any individual. I have not the slightest idea of the name of the man, or his age, or where he came from, or who he is. That has nothing to do with the increase in the appropriation.

Mr. JOHNSON of Kentucky. I have that information, Mr. Chairman. During the last Congress Senator SMITH of Maryland brought complaint to the House District Committee which at that time was investigating and inquiring into the official conduct of some of the officers of the District of Columbia, and a clear case was made out, where this gentleman had prepared some specifications so artistically that it became necessary to accept the highest bid instead of the lowest for the lamp posts now on Pennsylvania Avenue from the Peace Monument to the Treasury Building; and, because of that artfulness, he compelled the District of Columbia and the United States Government, upon the half-and-half plan, to pay, if I remember correctly, something like five or six dollars difference for every post that was purchased. I do not believe, in view of that kind of thing, that the salary of this individual ought to be increased.

Mr. PAGE of North Carolina. Mr. Chairman, I would like to ask the gentleman if he communicated this information to the Commissioners of the District of Columbia, who have charge of the employment of this man?

Mr. JOHNSON of Kentucky. I did, and I am sorry to say that they did not take any action concerning him that I now recall. They held up the contract pending the inquiry of the House District Committee, and they were fully conversant with the inquiry that was going on, and I can positively state that they know absolutely and certainly that this contract was drawn—that the bids were asked in such a "skillful" manner that the contract as they construed it was awarded to the highest bidder instead of the lowest.

Mr. DUPRÉ. Does the gentleman think that because certain Representatives may be delinquent in the discharge of their duties that the salaries for those particular districts should be abolished?

Mr. JOHNSON of Kentucky. Yes; I favor that proposition, and that is the law right now. I now make the point of order.

The CHAIRMAN. The Chair sustains the point of order.

Mr. PAGE of North Carolina. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Page 35, line 24, strike out "$3,000" and insert "$2,500."

The CHAIRMAN. The question is on agreeing to the amendment.

The amendment was agreed to.

The Clerk read as follows:

Assistant directors of music, drawing, physical culture, domestic science, domestic art, kindergartens, and penmanship, seven, at $1,300 each: *Provided*, That the assistant director of penmanship, who shall be an instructor in the normal school and an assistant director in the grades, shall be placed at a basic salary of $1,300 per annum and shall be entitled to an increase of $50 per annum for five years.

Mr. MONDELL. Mr. Chairman, I offer the following amendment, which I send to the desk and ask to have read.

The Clerk read as follows:

Amend, page 40, by inserting after line 10 the following as a new paragraph:

"Vacation schools and playgrounds. For the proper care, instruction, and supervision of children in the vacation schools and playgrounds, and directors, supervisors, teachers, and janitors of vacation schools and playgrounds may also be directors, supervisors, teachers, and janitors of day schools, $7,000."

Mr. HOWARD. Mr. Chairman, I make the point of order against that.

Mr. MONDELL. Mr. Chairman, the item is not subject to the point of order, as the gentleman very well knows. I hope that the committee will accept this item. I think the committee overlooked the item. The gentleman from North Carolina [Mr. PAGE] thought there was not any such item in the estimates.

Mr. HOWARD. It certainly would not be in order, if it was in order at all, at this particular point, because this is for the salary of school-teachers. The whole paragraph is devoted to that. If it be in order at all, it would be in order at the end of line 5 on page 41.

Mr. MONDELL. I would just as soon offer it at some other point.

Mr. HOWARD. I hope the gentleman will withdraw and offer it at some other point.

Mr. MONDELL. I do not know that it makes any difference if it is going into the bill, however.

Mr. HOWARD. It comes now right in the very middle of the classification of these teachers.

Mr. MONDELL. I am willing to withdraw it for the time being.

The CHAIRMAN. The gentleman withdraws the amendment, and the Clerk will read.

The Clerk read as follows:

Hereafter in assigning salaries to teachers of public schools in the District of Columbia no discrimination shall be made between male and female teachers employed in the same grade and performing a like class of duties; nor shall it be lawful to pay, or authorize or require to be paid, from any of the salaries of such teachers any portion or percentage thereof for the purpose of adding to salaries of higher or lower grades; and no such teacher shall be employed as, or required to discharge the duties of, a clerk or librarian.

Mr. STAFFORD. Mr. Chairman, I reserve a point of order on the paragraph.

Mr. ABERCROMBIE. Mr. Chairman, I desire to offer an amendment.

Mr. HOWARD. Mr. Chairman, I would like for the Chair to dispose of the point of order.

Mr. STAFFORD. I wish to inquire what was the purpose of the committee in making this paragraph permanent legislation?

Mr. HOWARD. The purpose was to avoid repeating it year after year. It has been carried in the current bill for several years.

Mr. STAFFORD. I wish to inquire whether it is the established policy of the committee to have the same salaries paid to teachers here in the District of Columbia, regardless of sex, for performing the same grade of work?

Mr. HOWARD. That is the policy and that is the provision in this law.

Mr. STAFFORD. I know it is the provision. I assume that in some cities male teachers receive a higher salary than those paid to females, and I question whether sufficient consideration has been given to that phase of the subject so as to make it permanent law by the addition of the word "hereafter."

Mr. HOWARD. The gentleman is probably familiar with the classification of the different grades in which teachers are put here and the different processes through which they go in reaching certain grades and salaries, and in the grouping of the teachers the committee has put them in a certain classification, starting with the lowest and going to the highest. There is no distinction made between the salaries of male and female teachers. Female teachers of one grade get as much as a male teacher in the same grade.

Mr. STAFFORD. Was it the purpose of the committee in putting in this mandatory provision that there should not be any distinction in pay?

Mr. HOWARD. I can only say to the gentleman that that is the identical language that has been carried in current bills for the last 5 or 6 years—well, more than 10 years. I will state to the gentleman this is for the purpose of saving printer's ink and printing and repetition. We just simply put the language in and make it permanent law.

Mr. STAFFORD. There has been no question in the committee as to the wisdom of having the same salary paid to teachers regardless of sex? I will withdraw the point of order.

Mr. HOWARD. As far as I am concerned, I believe that a woman who is as capable a teacher as a man ought to get the same money; and the committee feels the same way.

Mr. STAFFORD. That is the general principle; but we all know that male teachers have families dependent upon them, and it is necessary to pay them a higher salary than is paid to females.

Mr. HOWARD. Salaries in this day and generation are not based on that proposition at all.

Mr. STAFFORD. That is the rule obtaining in private business establishments as well as in municipalities in the employment of teachers and in other grades of work.

Mr. Chairman, as this has been carried for 10 years, I will not press the point of order on the word "hereafter," and withdraw it.

Mr. HOWARD. I thank the gentleman.

The CHAIRMAN. The point of order is withdrawn.

Mr. ABERCROMBIE. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 42, line 19, after the word "librarian," insert the following as a new paragraph:

"Interchange of teachers: That the superintendent of schools of the District of Columbia is authorized, with the approval of the board of education of said District, to provide for the interchange of efficient teachers with other school systems for periods not exceeding one year in each case: *Provided*, That not exceeding 20 teachers shall be on interchange service at one time: *And provided further*, That each teacher so interchanged shall be paid her regular salary by the school system in which she is teaching at the time the interchange is arranged: *And provided further*, That service of teachers of the public schools of the District of Columbia under this provision shall count as regular service in the District of Columbia."

Mr. HOWARD. Mr. Chairman, I reserve a point of order against the amendment.

[Mr. ABERCROMBIE addressed the committee. See Appendix.]

Mr. HOWARD. Mr. Chairman, in the temporary absence of the chairman of the subcommittee, I will be obliged to insist on the point of order.

The CHAIRMAN (Mr. FOSTER). The point of order is sustained.

The Clerk will read.

The Clerk read as follows:

Miscellaneous: For rent of school buildings, repair shop, storage and stock rooms, $15,000.

Mr. MONDELL. Mr. Chairman, I offer the amendment which I withdrew a moment ago and which is at the Clerk's desk—an amendment for an appropriation for vacation schools.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Amendment offered by Mr. MONDELL: Page 47, after line 2, insert as a new paragraph the following:

"Vacation schools and playgrounds: For the proper care, instruction, and supervision of children in the vacation schools and playgrounds, and directors, supervisors, teachers, and janitors of vacation schools and playgrounds may also be directors, supervisors, teachers, and janitors of day schools, $7,000."

Mr. HOWARD. Mr. Chairman, I make a point of order against the amendment.

Mr. MONDELL. Mr. Chairman, the amendment is not subject to the point of order.

Mr. HOWARD. I will make this statement to the gentleman, that there is no provision of law for vacation schools. This creates new law.

Mr. MONDELL. There is no provision of law for any particular kind of schools. There is a provision of law for schools. Some of the schools are held in the daytime and some at night, and these particular schools happen to be held during the time when the other schools are in vacation. If the gentleman will withhold his point of order for just a moment——

Mr. HOWARD. I withhold the point of order.

Mr. MONDELL. I would like to explain this matter to him and the committee. It is a matter that we ought to have cared for long ago in the District. Some years ago those in charge of the District school system realized the necessity for summer or vacation schools for the purpose of helping those students who for one reason or another needed a little help in order to keep them in their grades. President Blair, of the school board, said, in regard to this matter, in the hearing before the subcommittee:

Mr. PAGE, that is to get away from the provisions that have to be made now of raising money to support that summer playground work through the contributions of outside people and to keep away from the provision of the law which prevented any improper use of the schools. The amount of that work is growing. We are now giving instruction in the summer time, so that children who are back in one, two, or even more subjects which prevents their promotion from one grade to another, but who ought to go on because of their age or ambition, can be given some special instruction in the summer time. We are taking care of that kind of children by looking after them, giving them instruction, and preparing them to go on in the fall on the certificate of these teachers, and then it is also playground work. Mr. Thurston, have you a detailed statement of that?

Mr. THURSTON. I have not here, but the sum we are asking for is approximately the sum spent last year from private contributions. There were between five and six thousand children accommodated on the different playgrounds, both for industrial work and study and for organized play.

Sometimes children are inevitably absent owing to their own illness or on account of illness in the family. Some children are slow in some one study or another. Those children need help in vacation time so that they may not lose the entire year.

We have been doing this work in years past by voluntary subscription. It so happens we have in our family four "hostages to fortune" who are attending the schools here. This is what occurred: In order to keep these vacation schools going—and all the teachers and many of the scholars are interested in them—they make all sorts and kinds of efforts to collect money through the children. My youngsters have been selling tickets to picture shows. They have been importuned and invited to bring contributions, to do various things, in order to make a little money to help raise this $7,000 for these vacation schools and for the care of the playgrounds.

The gentleman from Georgia [Mr. HOWARD] is going to say that what is now being done in this respect, in soliciting contributions in the schools, is contrary to law.

Mr. HOWARD. I was not going to say that.

Mr. MONDELL. He might have said that.

Mr. HOWARD. I did not have it back in my head, because I knew it was contrary to law.

Mr. MONDELL. It is contrary to law. I am not complaining of the teachers. My children have been glad to make their small contributions, but there are many children who are attending the public schools who can not afford to do it, just as it was stated here at the time we prohibited that sort of thing. We do not want to embarrass children who can not afford to contribute, and yet there is such value in these schools that people are anxious to contribute. Let me ask my friend whether or no he thinks that in this Capital City of the Nation we should go on asking the children of the public schools to collect pennies and earn dimes in one way or another in order to keep this very useful branch of the public-school service going?

Mr. HOWARD. Does not the gentleman think this, that if they would teach during the teaching period instead of on

Wednesday morning allowing all the children to go to the moving-picture shows and distracting their attention for the whole day from their studies, that there would be no necessity for these vacation schools, and that they could use that period for developing their physical condition?

Mr. MONDELL. The gentlemen could easily get a rise out of me on that question of improper dismissal and adjournment of public schools, but that is aside the mark. Say that they do sometimes dismiss the schools without sufficient reason.

Mr. HOWARD. They do it.

Mr. MONDELL. For insufficient and for very flimsy reasons and for no good reason at all. If that be so, the occasions are not frequent enough to make any particular difference in the scholarship of the pupil and his ability to keep up with his classes.

These vacation schools have come to be recognized as an important part of the school systems everywhere; not only here, but elsewhere, and they will be kept up. The question is whether they are to be kept up by penny contributions of the children and by all these various and sundry questionable devices that have been resorted to, or whether we shall appropriate for them.

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. MONDELL. Mr. Chairman, I ask unanimous consent to proceed for two minutes more.

The CHAIRMAN. Is there objection to the gentleman's request?

There was no objection.

Mr. MONDELL. There is a very important part of this work that my friend from Georgia [Mr. HOWARD] will appreciate. I think he thoroughly appreciates all the purposes of the vacation schools, but the part of these expenditures that is used for the purpose of promoting industrial education and industrial exhibits in the playgrounds in the summer time is especially important. In fact, nothing more important can be provided for under our school system. It is a small sum, and it is a sum that will be expended for a good and worthy purpose. We ought to provide for it instead of continuing, as we have done for years in this unjustifiable way, to compel the people of the District to support it more or less by voluntary contributions.

Mr. FESS. Mr. Chairman, would the gentleman from Georgia withhold his point of order?

Mr. HOWARD. Yes; with pleasure.

Mr. FESS. I think there is a feature in the vacation school that ought not to be lost sight of. Our exacting courses of study throughout all the school systems of the country, and especially here, require a certain standard in order to get into the high school, and then a certain standard is required in the freshman year to get into the sophomore year, and then in the junior year, and then in the senior year for graduation; and if because of some lapse, either in study or circumstances that can not be controlled a pupil falls out, there is danger that unless the pupil can make up on the work on which he fell short during the year he will not be able to go on and reach graduation.

I have realized that for years. A parent's chief desire is to keep his child in school rather than have him drop out in the early stage. If for any reason not under his control he drops out and finds no way to go on with his own class, he will almost certainly drop clear out. This common occurrence grows out of the exacting character of our courses of study, and none of us would change them, but frequently it is very hard upon the individual pupil. I do not refer to the indolent or constitutionally careless pupil, but to the delinquent, whose lapse may not be his fault. The vacation school would offer a splendid opportunity to cure that feature.

Then, it seems to me that every father and mother are up against the situation that for three months in the year the children have nothing to do, and those three months are the times of idleness—a situation bad enough for adults, but especially important to a child when considered in its possibilities, since somebody has said, "When one is idle there is work for the evil one"; and it seems to me that there ought to be some way by which those who are worthy and unable to remain in the school regularly ought to be able to find the time during vacation to do the work in which they are deficient. This is only one of the important items of the proposed amendment of the gentleman from Wyoming.

Mr. HOWARD. Mr. Chairman, will the gentleman yield right there?

Mr. FESS. Yes.

Mr. HOWARD. Of course, the gentleman is aware of the fact that the teachers of the District of Columbia are paid by the year and not by the term. Therefore, without the expenditure of any money, this situation could be met very easily by simply increasing the school term and requiring the teachers to remain here on their jobs and earn a year's pay by teaching the vacation schools. That would be one way to meet the situation, would it not?

Mr. FESS. That would be one way, but it would hardly be fair to the teacher to do that, and I would not favor putting the suggestion into operation.

Mr. HOWARD. It would be as fair for the teacher as for the child.

Mr. FESS. Of course, it is for the benefit of the child that we want to keep the school open at all.

Mr. HOWARD. It would be as much benefit to the child to continue at school during the vacation as it would be to let the child enjoy a vacation.

Mr. FESS. I believe that three months of idleness in any instance is not a desirable thing for the child. I hope that some time in our system of education we shall not have that waste of time.

Mr. COX. Mr. Chairman, will the gentleman yield?

Mr. FESS. Yes.

Mr. COX. The gentleman is a great educator, and I think he is the father of several children. I undertake to say that after the gentleman's children arrive at a reasonable age they do not know what a vacation is, and the gentleman finds some desirable employment for his children. Is not that true?

Mr. FESS. I will say to the gentleman that personally I know not what a vacation is. I have always been employed in some way during the summer season, and was never hurt by the necessity of such employment. As for children, the average family in our smaller as well as larger towns find it very hard to employ their children's time in the summer. It would be very much better could we have vacation schools. For myself I aim to see that my children are in the summer school. However, it is not so easy with the family not identified with educational work.

Mr. COX. Some people have told me that during vacations they have employed teachers to continue the instruction of their children.

Mr. FESS. That is the case in a very great number of instances.

The CHAIRMAN. The time of the gentleman from Ohio has expired.

Mr. DUPRÉ. Mr. Chairman, I would like to have the gentleman from Georgia [Mr. HOWARD] indicate in a word how many unauthorized items are appropriated in this bill?

Mr. HOWARD. I will refer the gentleman to the gentleman from North Carolina [Mr. PAGE] who is in charge of this bill.

Mr. DUPRÉ. Then I will ask the gentleman from North Carolina. Approximately how many unauthorized items are appropriated for in this bill?

Mr. PAGE of North Carolina. I could not answer that question offhand, but there are not a great many.

Mr. DUPRÉ. A hundred?

Mr. PAGE of North Carolina. I could not say.

Mr. DUPRÉ. Four or five hundred?

Mr. PAGE of North Carolina. I should say not more than a hundred.

Mr. REILLY. Mr. Chairman, will the gentleman yield?

Mr. HOWARD. Yes.

Mr. REILLY. Has there been any request from the educational authorities of the District for appropriations for vacational schools?

Mr. HOWARD. I do not recall. This was included in the estimates, but there was no insistence upon it on the part of the authorities when this provision was discussed in the hearing before the subcommittee.

Mr. REILLY. There are vacational schools now conducted in the city by means of contributions as outlined by the gentleman from Wyoming [Mr. MONDELL]?

Mr. HOWARD. Yes; and the teachers are being paid for those months out of public funds.

Mr. REILLY. The fact of the matter is the teachers everywhere have a certain school year, and you would not expect the teachers to give their time for the whole school year unless they were paid for it.

Mr. HOWARD. The uniform system is that the teachers are paid by the month, and when vacation comes they lose their salaries. I want to say this to the gentleman, that from my investigation of the schools in the District of Columbia the teachers in Washington are paid the best salaries in the specific grades of any teachers in the United States except in one city. The children in the District of Columbia are taught under the most favorable conditions that I know anything about. The cost

of constructing school buildings is $10,000 a room, and that is more, I know, than in any city in the country.

Mr. FESS. Will the gentleman yield?

Mr. HOWARD. Yes.

Mr. FESS. I think the whole country would commend the movement that made it possible here for teachers to be paid for the 12 months; there are not many places where that is done.

Mr. HOWARD. I have no objection to that. Now, in regard to the playgrounds proposition. I have some views about the playground situation here, and I think it is an opportune time to express them. I realize that children in the congested city centers should have some place to play, but I believe they have got more ground for play in the city of Washington to the square foot than any other city in the country. They have hundreds of acres in Rock Creek Park, the Mall, and all the squares for playgrounds. I believe the playground system costs the parents of these children $150,000 direct taxes, in doctors' bills, because if there ever was a source of spreading contagious diseases, like measles, scarlet fever, and diphtheria, and every other disease of childhood on earth, it is letting the children congregate around a little cement wash hole that has 10 gallons of water pouring into it a minute and 10 gallons running out, where they all jump into it and swim at one time. If one has the measles or scarlet fever they all get it.

Mr. PAGE of North Carolina. Will the gentleman yield?

Mr. HOWARD. Yes.

Mr. PAGE of North Carolina. Has the gentleman heard of the German invasion—that the German measles has actually broken out in the camp at Chevy Chase?

Mr. HOWARD. Yes; I heard it this afternoon, and that they were going to break up the sanitation camp. I could have broken it up long ago if I had had a peck of healthy mice and let them go out there about half past 7 in the evening. [Laughter.] But now, talking about these playgrounds. They are a magnificent depository for these gadabout mothers that associate with their children only when they are in bed. When they want to go off to spend the day, if they want to go to whist parties, they bundle up the kids and send them to the playgrounds, and there they find a stalwart matron, who will take care of them while their mammas go to the movies. [Laughter.] The result and the practical effect of it is that it is unwholesome.

Mr. CALDWELL. Will the gentleman yield?

Mr. HOWARD. Yes.

Mr. CALDWELL. Does not the gentleman think that the ladies have the hardest end of the game anyhow, no matter how you fix it up?

Mr. HOWARD. Well, I used to think so.

Mr. FESS. Will the gentleman yield?

Mr. HOWARD. Yes.

Mr. FESS. Does the gentleman think we had better stop the schools?

Mr. HOWARD. No; but I do think that the parental influence ought to be thrown around the children some time during the day. I make the point of order.

Mr. MONDELL. Mr. Chairman, I would like to be heard on the point of order. This committee is clearly authorized to appropriate for schools in the District. There is no law on the statute book fixing the hours or the terms of the school. The time of terms or sessions can be changed any time by the board of education. Under these items the board can provide that the school term shall begin earlier, or extend later, as they see fit. There is no law on the subject, and we are making no law on the subject. We are not changing existing law and not providing new law. If this appropriation is granted it would make it possible to continue the schools, some of them, for a month or so longer than they would otherwise be in session. It would also keep certain playgrounds open a few weeks longer than they are now kept open, and during that time they would make exhibits of the industrial work of the children.

This is an appropriation for a work in progress, a work under the supervision and jurisdiction of this committee. It is not a change of existing law, because there is no law on the subject as to the time when the schools shall be in session. It is not new legislation, because it does not definitely fix a time for session of the schools. Therefore it is in order.

Mr. PAGE of North Carolina. I was going to call attention to the fact that there is no authority of law for vacational schools, or schools of this character contemplated in the amendment.

The CHAIRMAN (Mr. FOSTER). The Chair is ready to rule. The Chair thinks there is no law now fixing what are called vacation schools. If that were the only provision it would be sufficient; but this also provides for playgrounds, and that, too, is subject to a point of order.

Mr. MONDELL. On what ground?

The CHAIRMAN. There is no law providing for playgrounds, as the Chair understands.

Mr. MONDELL. Oh, certainly; there is an appropriation for playgrounds in this very bill.

The CHAIRMAN. If there is any law, the Chair will be glad to have it shown to him.

Mr. MONDELL. The bill contains appropriations for playgrounds.

The CHAIRMAN. The Chair understands that, but there is no law, as the Chair understands it, providing for the establishment of playgrounds and the employment of these teachers.

Mr. JOHNSON of Kentucky. Mr. Chairman, I think I can throw a little light on this subject. For a great many years I made a point of order against the playgrounds, as I am sure my friend in the chair will remember. Finally a compromise was reached by which the playgrounds were to be paid for out of the District revenues, and during the past few years the matter has been allowed to drift along in that way, without any law whatever on the subject.

The CHAIRMAN. The Chair remembers that very distinctly, and for that reason he believes the amendment to be out of order. If there is any law authorizing it, the Chair will be glad to have it called to his attention.

Mr. MONDELL. Mr. Chairman, I offer an amendment in lieu of the amendment that I previously offered. I offer an amendment, "For maintenance of vacation schools, $7,000."

The CHAIRMAN. The gentleman from Wyoming offers an amendment, which the Clerk will report.

The Clerk read as follows:

Amend, on page 47, in line 2, by adding the following:
"For maintenance of vacation schools, $7,000."

Mr. PAGE of North Carolina. I make a point of order against the amendment.

The CHAIRMAN. The Chair sustains the point of order.

The Clerk read as follows:

For purchase of United States flags, $800.

Mr. MONDELL. Mr. Chairman, I desire to ask unanimous consent to offer at this point an item providing for the enforcement of the child-labor law.

The CHAIRMAN (Mr. FERRIS). What is the gentleman's request?

Mr. PAGE of North Carolina. The gentleman from Wyoming asks unanimous consent to offer the amendment at this place, and I do not object to his offering it.

The CHAIRMAN. The gentleman from Wyoming asks unanimous consent to offer an amendment, which the Clerk will report.

The Clerk read as follows:

Amendment offered by Mr. MONDELL: Amend, on page 49, line 3, by inserting the following as a new paragraph:
"Child-labor law: For the enforcement of the provisions of the act 'To regulate the employment of child labor in the District of Columbia,' approved May 28, 1908, namely, for two inspectors, at $1,200 each, $2,400: *Provided*, That the existing provision of law requiring the detail of two privates of the Metropolitan police force for the enforcement of said act is repealed."

Mr. PAGE of North Carolina. Mr. Chairman, I reserve a point of order.

The CHAIRMAN. The gentleman from North Carolina reserves a point of order.

Mr. MONDELL. Mr. Chairman, I do not think the item is subject to a point of order.

Mr. PAGE of North Carolina. I am sure that the gentleman, with his excellent knowledge of parliamentary law, knows that it is subject to a point of order.

Mr. MONDELL. What is the point of order, Mr. Chairman?

Mr. PAGE of North Carolina. The point of order is that the gentleman's amendment creates an employment that is not provided by law—two inspectors. The law now expressly provides that two police officers shall fill these positions.

Mr. MONDELL. Mr. Chairman, the act of May 28, 1908, to regulate the employment of child labor in the District of Columbia provides that no child under 14 years of age shall be employed or permitted to work in the District of Columbia in any factory, workshop, mercantile establishment, and so forth, and goes into considerable detail in regard to the employment of children in the District of Columbia. I do not understand what further legislation than that would be required to make it in order for the Appropriation Committee to appropriate to carry out the law by providing the proper officers.

Mr. COX. Does that act require the detailing of two policemen to enforce it?

Mr. MONDELL. No; that act does not require the detailing of two policemen. If the point of order is with respect to the

detailing of two policemen, I will drop that part of my amendment.

Mr. PAGE of North Carolina. Not only the detailing of two policemen, but the gentleman's amendment carries a provision for new employments that are not authorized by law, because the law specifies these two policemen shall be detailed for this service.

Mr. MONDELL. Let me make this suggestion to my friend. I do not think the item is subject to the point of order, but I want to remind the gentleman that it was his impression that this item was in the bill.

Mr. PAGE of North Carolina. It was, and I was going to make that explanation.

Mr. MONDELL. He is in favor of it personally.

Mr. PAGE of North Carolina. I might be induced to be in favor of it. I want at this point to say what I said privately to the gentleman from Wyoming yesterday, when he offered this amendment. I assured him that the item was in the bill and that was my impression. The truth is, that a man's memory is a pretty good one that can lay a bill of this size, and with as many items, aside for two months before it is called up on the floor of the House after having been completed in subcommittee and trust his memory at all; but after having made that statement my attention was called to the fact and an examination showed that my memory was at fault. I hastened to say so to the gentleman from Wyoming. One of the things that made me think so was that at one time during the hearings I was personally favorably impressed, but the subcommittee did not include the item.

Mr. MONDELL. Mr. Chairman, the District Commissioners made a very strong plea for this item. They called attention to the fact that an ordinary policeman is not particularly qualified to perform this sort of duty. What they need is some one, preferably in civilian costume, to go about where children are or are likely to be employed, and keep track of matters of employment and enforce this statute.

As a matter of fact, the statute has not been properly enforced. These officers can not properly enforce the statute. The commissioners realize that. They need these two men on the force; they need them for other work; and, in addition to that, they need people to enforce this law who are specially trained for that sort of thing. Why agonize over a child-labor law, get all worked up with regard to the matter, take the time of the House to pass the bill, and have impassioned speeches made on both sides relative to the importance of legislation of this kind, call attention to the pitfalls and snares constantly before the youthful worker and to the infinite harm that is done physically and morally by the employment of young people, and then fail, decline, or refuse to provide reasonable means and forces for the enforcement of the law?

The CHAIRMAN. The time of the gentleman from Wyoming has expired.

Mr. PAGE of North Carolina. Mr. Chairman, I request time in order that I may ask the gentleman from Wyoming if he has any evidence that the child-labor law in the District of Columbia is not being enforced?

Mr. MONDELL. I think the statement made before the committee is very excellent evidence. The men who have been detailed to enforce the law have done the best they could. Attention was called to the fact that it was difficult, well-nigh impossible, for these men to properly enforce the law.

Mr. PAGE of North Carolina. Mr. Chairman, I think that if the gentleman would read carefully the hearings on this item he would discover that the chief incentive behind those making the recommendation was that they wanted these two policemen released from this employment in order that they might be assigned somewhere else. There certainly was no evidence before the committee that the law was not being enforced.

Mr. MONDELL. Mr. Chairman, if I had the time—and I have not—to read this statement by Commissioner Brownlow, I would do so; but I shall put it in the RECORD. I think it will show that the commissioner does not believe it is possible to properly enforce the law and properly safeguard the children with the help that they now have. He suggests the importance of putting this law on the same plane as the eight-hour law with respect to females.

Mr. PAGE of North Carolina. Mr. Chairman, I would suggest to the gentleman from Wyoming that the commissioner whose testimony he has quoted, and for whom I have the highest regard and closest friendship, is the one who is in charge of the detailing of the Metropolitan police. Naturally enough, he wants his policemen somewhere else and engaged otherwise than in enforcing the child-labor law, and I must insist on my point of order.

Mr. MONDELL. Mr. Chairman, the statement of Commissioner Brownlow in regard to the child-labor law, to which I have referred, is as follows:

CHILD-LABOR LAW.

Mr. PAGE. Mr. Brownlow, if these inspectors under the eight-hour law were to observe a violation of the child-labor law under present conditions, would they take cognizance of it, or do they confine themselves entirely to their own work?

Mr. BROWNLOW. I think they are looking after the women very largely, and in most of the places where they are operating there are not any such violations. The inspection as to the child-labor law, of course, is very rigid on the part of these two men, in conjunction with the people with whom they work at the board of education, who give out the permits to children. In connection with the child-labor law the law says that so far as theatrical employments are concerned any one commissioner can issue a permit. So that that law has been honored more in the breach than in the observance—I mean, so far as the spirit of the law is concerned—although the exceptions were perfectly legal and people who wanted permits for a child to appear in a theatrical performance simply came to one of the commissioners and got a permit, and sometimes those applications were for children as young as 2 or 3 years. We turned them down in cases like that, but it is a common thing to have applications for children 4 or 5 years old.

As long as the children who were performing here as actors only came to the vaudeville theaters or with an occasional play like the Blue Bird, or something like that, it did not amount to much. But of late, in the last eight or nine months, there have sprung up in these 5 and 10 cent moving-picture houses all over the District and in the outlying eastern and southern parts, especially, Friday night amateur nights and Charlie Chaplin contests and any number of things in which these children were given tickets. Sometimes they were paid by being given so many tickets so they could come back every night for the rest of the week. I heard of several cases of little children who were hanging around where some man who was the ticket agent was getting them to take part, or some fellow playing the piano at one of these places would make the request, and I heard a great many complaints, and it got so that these requests for these children under age which came to the commissioners, instead of being two or three a month, as it used to be when they came to the regular theaters, began coming in at the rate, especially on Fridays, of sometimes as high as 10 a day, and one day I believe I had nearly 20. The commissioners then passed a resolution of the board that after January 1, 1916, giving two months' notice, such permission would not be granted to any child under 14 years of age.

Mr. PAGE. In the general enforcement of the laws of the District by the members of the Metropolitan police force, is there any effort made by them when on duty to enforce this law?

Mr. BROWNLOW. The child-labor law?

Mr. PAGE. Yes.

Mr. BROWNLOW. The two officers who have this work have the cooperation of the police force, and Maj. Pullman has called the attention of the captains and lieutenants to it and urged them to aid in the work in every way. However, their work is outside. The policeman does not go inside of the establishments, as a rule, unless he is called in.

Mr. NEWMAN. That is, a policeman in uniform?

Mr. BROWNLOW. Yes; a patrolman is an outside man. He is going along the streets and it is not his business to do that; in fact, if he goes into a place and stays very long we discipline him for it.

Mr. PAGE. In the event this item you are asking for here were granted and sufficient inspectors were appointed to enforce this law, would they have the active cooperation of the Metropolitan police force?

Mr. BROWNLOW. They would, indeed, just as we give these female-labor law inspectors cooperation in every way they ask for it, by assistance in watching, and so forth, at such times as they can.

Mr. SLEMP. Are there any so-called sweatshops at all around the city of Washington?

Mr. BROWNLOW. Not in the generally accepted sense, to amount to anything.

Mr. SLEMP. I mean are there a lot of factories making shirts and clothing, and so forth?

Mr. BROWNLOW. Not in the sense of clothes making or artificial flower making, which are the things we usually talk about when we talk about sweatshops. There are some paper-box factories where wages are far below what any minimum wage law would fix, I have understood. I have not looked into that very closely.

Mr. SLEMP. They come under the general system of inspection?

Mr. BROWNLOW. Yes; and of course the eight-hour law is enforced and they do not employ children. The effect of this child-labor law has been largely to eliminate that trouble here. Of course, the school authorities have been quite liberal in granting permits to newsboys, which they can do. I mean, they have done it where the requirements were lived up to and the child was in school. But we believe that with sufficient inspectors who can go in and stay and who will not have other duties, they would be better than policemen. Of course, these policemen have no duties connected with the police force. They do all the clerical work and they do nothing but this work.

Mr. PAGE. Do they wear the regular uniform?

Mr. BROWNLOW. They do not wear any uniform and they have an office and do the clerical work and also this inspection work. They have no connection with the police force whatsoever, except they are paid through it, and they are members who can not be dismissed except by the trial board and have all of the advantages of policemen, but perform none of the duties of policemen.

Mr. SLEMP. I doubt if you have enough force to take care of this situation.

Mr. BROWNLOW. You mean with two inspectors?

Mr. SLEMP. Yes.

Mr. BROWNLOW. I think in a town of this kind, where the industries are not so very many and where they are easily spotted, I think two would be enough. They are doing good work, but I would prefer to have civilians, and frankly, I would prefer to have somebody who had a little different social point of view from that of a man who has come up from the police force; a man who would not only enforce the law, but would have a sympathetic understanding of what we are trying to do and would enforce the law and at the same time would take into consideration the interests of the children.

Mr. PAGE. Mr. Brownlow, this is a change of existing law and is one of those items we have gone into very fully because of the interest we take in it, but it will be subject to a point of order.

Mr. BROWNLOW. Yes.

The CHAIRMAN. The Chair thinks very clearly it is subject to the point of order for two causes: First, it creates a new position and new legislation, and, secondly, it seems to repeal existing law. Therefore the Chair sustains the point of order.

The Clerk read as follows:

Buildings and grounds: For an eight-room addition, including an assembly hall, to the Elizabeth V. Brown School (Chevy Chase), $80,000.

Mr. TILSON. Mr. Chairman, I offer an amendment, which I send to the Clerk's desk.

The CHAIRMAN. The Clerk will report the amendment.

The Clerk read as follows:

Page 50, after line 14, insert:
"For an eight-room building on the site purchased for the purpose between Eighteenth and Twentieth Streets and Monroe and Newton Streets NE., said building to be so constructed as to make it easily possible to extend the same to a 16-room building, $90,000."

Mr. PAGE of North Carolina. Mr. Chairman, I reserve a point of order against the amendment.

Mr. TILSON. Mr. Chairman, as the father of a growing family, both in size and numbers, it is quite natural that I should feel a deep interest in the matter of sufficient school buildings. Every progressive city is careful to see that the growth of its school buildings keeps pace with the growth of the city or the number of children to be accommodated in its schools. Cities that have not done this have found themselves in the situation of not being able to take care of their children in the schools or of having to increase their indebtedness largely at one time in order to catch up with what they have lost by their failure to build as they went along.

Now, there has been some regular and systematic building in this city. Last year the amount appropriated for school buildings and grounds amounted to, as I remember, $766,000, and the estimates this year amount to almost that amount—$738,000, I believe—and yet only a little over $200,000 was brought in by this committee.

If we do not face the situation squarely and appropriate an adequate amount each year, we shall fail to keep up with the procession. We shall find ourselves a little later on in the position of having to authorize a great many school buildings at one time or be unable to take care of the children. It seems to me that we ought to build such a number of schoolhouses each year and acquire such a number of sites as will keep pace with the increasing needs of the city. I have proposed one additional building in the amendment I have offered. This particular building has been recommended by the commissioners and included in their estimate made to the Committee on Appropriations.

Mr. CHAIRMAN. Does the gentleman from North Carolina insist on his point of order?

Mr. PAGE of North Carolina. Mr. Chairman, since the gentleman has discussed this question in connection with this particular item, I will say that it was included in the estimate submitted by the school board, through the commissioners.

There is a question in my mind, and a very serious question in the minds of the subcommittee who visited this location, as they did every other proposed construction in the District of Columbia, so that at first hand we might have the information upon which to act intelligently. The site has been purchased on this location, and at some time, unquestionably, it will be necessary to construct a building somewhere in this suburb of the District of Columbia. At the present time your subcommittee did not think the need was sufficient, nor was there any danger of such a growth in the number of children in this locality as to make the committee do what my friend has suggested, get behind in the construction of these buildings. So far as I am personally concerned, rather than construct this building I would very much rather have made an appropriation for the construction of a new building, a wooden building, not very far removed from this, with about 100 pupils in it. I think that a very much more crying necessity than this. Your committee has tried, and I think that the bill for the current year and the bill for the preceding year, made up by practically this same subcommittee, will bear evidence of the fact that they have taken ample care of the expansion of the educational system in the construction of buildings in the District of Columbia.

It is not worth while, my friend, to spend the money to build a house to stand out in a section where—I can say to my friend not very far removed when this new school building shall be upon it; not so large as this—the population did not meet the expectation of those who appropriated for this building. This is in advance of the population of the section in which it is proposed to be built.

Mr. TILSON. The commissioners seem to think it was not in advance.

Mr. PAGE of North Carolina. I know the commissioners were particularly obsessed with this one particular building, because they have got a magnificent lot in area and they want to build on it; but the committee was not so impressed with the necessity at this time for the construction of this building.

Mr. TILSON. Will the gentleman yield to me a moment?

Mr. PAGE of North Carolina. I will.

Mr. TILSON. I have already introduced another amendment for the purchase of a site. I think we ought not to let that matter drop.

Mr. PAGE of North Carolina. We have a site.

Mr. TILSON. This was in the northwest, one that was recommended, between Tenth and Eleventh Streets; the purchase of a site somewhere in that locality.

Mr. PAGE of North Carolina. When we reach that I will take it up and discuss it with the gentleman.

Mr. TILSON. It is not in this bill. We can not take it up now.

Mr. PAGE of North Carolina. I insist on my point of order, Mr. Chairman.

The CHAIRMAN. The Chair sustains the point of order, and the Clerk will read.

The Clerk read as follows:

The total cost of the sites and of the several and respective buildings herein provided for, when completed upon plans and specifications to be previously made and approved, shall not exceed the several and respective sums of money herein respectively appropriated or authorized for such purposes.

Mr. MONDELL. Mr. Chairman, I move to strike out the last word.

I desire to call attention to the fact that the committee has reduced the estimate of the commissioners for school buildings about $500,000. I shall not offer amendments covering the differences, or any part of it, because I am not altogether certain that all the buildings and grounds estimated for are needed. I am not thoroughly informed as to the relative necessity or urgency of the various projects. But this certainly can be said well within the truth, that the District Commissioners either fail to understand the District, over which they preside, and are woefully and criminally ignorant of its needs—they are criminally wasteful in their recommendations with reference to the people's money—or the District Committee has failed to do its duty in making appropriations.

I desire to say that I believe the commissioners do understand thoroughly the needs of the District. I believe they were careful and reasonable and conservative in their estimates. That being true, the District Committee certainly does not appear to have performed its duty to the District when it has reduced this item by about half a million dollars.

Mr. PAGE of North Carolina. Mr. Chairman, in reply to the gentleman's criticism, I want to call his attention to the fact that one of the largest items submitted was in connection with the new Eastern High School that is authorized in this bill and the reappropriation made of the unexpended balance for the purchase of the site. They estimated an appropriation of $150,000. After consultation with the commissioners it was perfectly apparent if we appropriated the money that they could not expend it for the fiscal year for which it was appropriated, and we merely reappropriated the unexpended balance of the last year for the purchase of the site, which amounts somewhere to between $30,000 and $40,000, and which will enable them to begin the work on the building.

Mr. MONDELL. How about the $350,000?

Mr. PAGE of North Carolina. There is this school building, carrying somewhere in the neighborhood of $100,000 to-day, in this section, where the subcommittee did not believe the time had come to construct a building. I do not recall the item, but there were some others, not for a building, I think, but for the purchase of grounds. These items omitted were for the purchase of grounds in connection with the buildings already constructed in the district where in the estimation of the commissioners there was not sufficient room around the school buildings, and those items make up a considerable amount. The only school building I recall is the one for which the gentleman offered an amendment a moment ago. That was the only one we omitted. The other was for grounds adjacent to the building, and the other for $150,000 not appropriated, as an additional appropriation.

Mr. MONDELL. Was there not an estimate for an additional amount for the Powell School?

Mr. PAGE of North Carolina. It was not estimated for. That is my recollection. It has already been done. We have appropriated, and that building is going up now. There was a defi-

ciency appropriation carried in one of the urgent deficiency bills.

Mr. MONDELL. Let me ask the gentleman a question. Does he think the commissioners were reckless in their estimates?

Mr. PAGE of North Carolina. Oh, no. I think they were mistaken, that is all, as to when they needed this money. They certainly did not need the $150,000 for the Eastern High School for the fiscal year to which this bill applied. Now, the only real question of difference between the estimates of the commissioners and this committee reporting the bill is the building out at Eighteenth and Monroe Streets in the northeast in the suburb covered by the amendment just offered by the gentleman from Connecticut, to which I made the point of order. The other is for ground and the items I have mentioned.

Mr. MONDELL. Of course, not subject to the point of order, but the gentleman made it.

Mr. PAGE of North Carolina. The gentleman has chided me, or rather complimented me, by referring to my knowledge of parliamentary law. I have always regarded the gentleman from Wyoming as being somewhat of a "parliamentary shark." I could cite the gentleman to numerous decisions of this House in which a building of any character is subject to a point of order unless it is authorized by law.

Mr. MONDELL. At any rate, the Chair ruled that way.

Mr. PAGE of North Carolina. He did, and he ruled properly.

The CHAIRMAN. The Clerk will read.

Mr. FESS. Mr. Chairman, I wish to inquire of the gentleman in charge of the bill, what is the status of the Central School building—the big high school?

Mr. PAGE of North Carolina. The final appropriation has been made, the building is practically completed, and it will be opened at the fall session in September.

Mr. FESS. Mr. Chairman, I would like to say a word of compliment for the manner in which the schools are cared for in this District.

Mr. PAGE of North Carolina. So far as it applies to me, I appreciate it.

Mr. FESS. It applies to this committee and those who are supporting the gentleman and his committee. I know that the schools of Washington are pointed to throughout all the country as of very high grade from every standpoint. So far as the rating of salaries is concerned, while I do not think it is as high as it ought to be, it is a very good rating in comparison with salaries in other places; and in regard to the manner of payment of those salaries, looking to an employment for a period of 12 months instead of 9 months, or, if preferred, the school period paid in 12 equal payments, it is an unusually wise and judicious arrangement.

Mr. PAGE of North Carolina. It is certainly liberal.

Mr. FESS. Yes; liberal, if you want to put it that way. However, the sum total for the year may not be much greater than if paid for the lesser period. In that respect it is not a case of liberality. It is wrong to have a system where any group of people are employed only nine months in a year, with three months of the year not occupied and subjecting the persons employed to an expense of such a character that it is usually greater when not employed than when employed. I want to compliment the committee on the schools, and particularly on that feature which eventually, I think, will be followed throughout the country. Then there are other features which do not seem to be popular here, but which, I think, are very valuable, such as the longevity method of paying the teachers. I think that is a well-recognized principle.

I wanted to say that much because it seems that much that has been said has been in opposition. I wanted to say this, the opposition that comes to many items which are at times strenuously contested may not be necessary, and at times seems unwarranted, but it is made because we want to get better results. Of the various buildings already erected and now building, many of them are such in character of architecture and equipment as befits this great Capital.

The organization of the school system is designed to secure the very best results. The entire divorcement of the system from party or municipal politics is the one crowning and commendable feature which distinguishes these schools from many in the country, and is a guaranty of a high degree of efficiency.

The hearty response of Congress to all the needs of the most modern features of the most modern school system, from the kindergarten to the normal school, including all the intermediary adjuncts, making provision for all the various demands of modern high-school education, properly places these schools on a high plane.

The provision for the night schools, which in a degree answers the call for the part-time vocational school, is another valuable step. The playground feature and the vacation school must be better cared for.

Mr. PAGE of North Carolina. I am very much obliged to the gentleman, and I hope the gentleman from Wyoming [Mr. MONDELL] will read those remarks in the RECORD, as the gentleman did not listen to them during their delivery.

Mr. FESS. If in the future the playgrounds are a little better cared for, I think the country will compliment those in authority who are responsible for them. I desire to repeat what I said earlier in the day, that this city must be so up-to-date in every line of achievement that the citizenry of the Nation, as it visits the Capital, can see here the best example of what ought to obtain in a city of any place in the world.

It is not the residents of the District that I have in mind, but the people of our Nation.

It ought to be so that any man or group of persons desiring to visit the most up-to-date modern school of the world would immediately think of Washington as the place to find it. This should be true in every phase of education.

It should be so in all expert work in every line of human endeavor, whether of architecture, of art, of science, of landscape gardening, of city beautifying, of administrative efficiency—here is the one place where the country has a right to turn for its model. This is why I am opposed most strenuously to the change this bill proposes. This is a national object and must be kept so and must not be saddled upon the District.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

Appropriations in this act shall not be paid to any person employed under or in connection with the public schools of the District of Columbia who shall solicit or receive, or permit to be solicited or received, on any public-school premises, any subscription or donation of money or other thing of value from pupils enrolled in such public schools for presentation of testimonials or for any purposes other than for the promotion of school athletics, including school playgrounds, school gardens, school publications, and commencement exercises of high schools.

Mr. MONDELL. Mr. Chairman, I desire to amend, on line 23, after the word "playgrounds," by inserting the words "vacation schools."

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from Wyoming.

The Clerk read as follows:

Amend, on page 51, line 23, by inserting after the word "playgrounds" the words "vacation schools."

Mr. PAGE of North Carolina. Mr. Chairman, I reserve a point of order. I do not know that I shall make it, however.

Mr. MONDELL. Mr. Chairman, I submit this amendment in order that the school-teachers of the District shall not be compelled to continue to break the law. They do ask contributions for these vacation schools, and so long as the committee does not see proper to appropriate for the vacation schools we ought not to make them lawbreakers every time they do solicit subscriptions.

Mr. PAGE of North Carolina. Mr. Chairman, I shall not insist on the point of order.

The CHAIRMAN. The point of order is withdrawn. The question is on agreeing to the amendment.

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

The Clerk read as follows:

FIRE DEPARTMENT.

Chief engineer, $3,500; deputy chief engineer, $2,500; 4 battalion chief engineers, at $2,000 each; fire marshal, $2,000; deputy fire marshal, $1,400; 2 inspectors, at $1,080 each; chief clerk, $1,800; clerk, $1,200; 38 captains, at $1,400 each; 40 lieutenants, at $1,200 each; superintendent of machinery, $2,000; assistant superintendent of machinery, $1,200; 27 engineers, at $1,200 each; 27 assistant engineers, at $1,100 each; 2 pilots, at $1,150 each; 2 marine engineers, at $1,200 each; 2 assistant marine engineers, at $1,100 each; 2 marine firemen, at $720 each; 40 drivers, at $1,150 each; 40 assistant drivers, at $1,100 each; 223 privates of class 2, at $1,080 each; 44 privates of class 1, at $960 each; hostler, $600; laborer, $600; in all, $571,680.

Mr. CALDWELL. Mr. Chairman, I offer an amendment.

The CHAIRMAN. The Clerk will report the amendment offered by the gentleman from New York [Mr. CALDWELL].

The Clerk read as follows:

Amendment by Mr. CALDWELL: On page 57, after line 16, insert as a new paragraph the following:

"*Provided*, That no member of the uniformed force of the fire department shall be required to remain on duty more than 14 hours in any one day, except in case of an emergency, and except upon one day in each two weeks when there shall be a shift of platoons."

Mr. JOHNSON of Kentucky. Mr. Chairman, I make a point of order against that amendment.

Mr. CALDWELL. Will the gentleman withhold his point of order?

Mr. JOHNSON of Kentucky. I will say to the gentleman that there is a bill before the Committee on the District of

Columbia now that is likely to be reported out soon, covering this question.

Mr. CALDWELL. Will the gentleman withhold his point of order a moment?

Mr. JOHNSON of Kentucky. Yes; I will withhold it.

Mr. CALDWELL. Mr. Chairman, I have been looking into this question for some years. It is a very vital question in the city of New York, and we have had it under discussion many times. I do not care to take up the time of the committee at this time, but I would like to extend my remarks by putting in the RECORD an argument that I made upon this subject the last time it was presented in New York.

The CHAIRMAN. The gentleman asks unanimous consent to extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. DILL. Mr. Chairman, I did not know that this amendment was to be proposed, and I recognize that the point of order made by the gentleman from Kentucky [Mr. JOHNSON] will be sustained. However, I desire to take this opportunity to declare myself in favor of the double-platoon fire system for the firemen of the District of Columbia. I understand this question is now pending before the committee, and I most earnestly hope a bill providing for the double-platoon system will be favorably reported to the House. [Applause.]

Some of our western cities have tried this double-platoon system and it has worked well. It has made it possible for firemen to live like other men. It has enabled him to be at home with his family sufficiently long for his children to become acquainted with him. He finds himself a man among men, and not merely a part of a fire machine which is kept in a fire station practically all of the time.

In my home town of Spokane I had a part in establishing the system, and it worked well for one year, but in a wave of taxation retrenchment the people voted it down by a small majority. The net result is, though, that our firemen have days off more frequently than formerly; and I feel certain when the question is again voted upon by the people they will decide in favor of the double platoon. I shall not take further time of the committee now, but will have more to say when the bill for the change of system comes before the House. [Applause.]

Mr. JOHNSON of Kentucky. Mr. Chairman, I renew the point of order.

The CHAIRMAN. The point of order is sustained. The Clerk will read.

The Clerk read as follows:

For repairs to apparatus and motor vehicles and other motor-driven apparatus, and for new apparatus, new motor vehicles, new appliances, employment of mechanics, helpers, and laborers in the fire-department repair shop, and for the purchase of necessary supplies, materials, equipment, and tools: *Provided*, That hereafter the commissioners are authorized, in their discretion, to build or construct, in whole or in part, fire-fighting apparatus in the fire-department repair shop, $15,000.

Mr. JOHNSON of Kentucky. Mr. Chairman, I reserve a point of order on the paragraph, for the purpose of getting an explanation of it. I am apprehensive that that is the beginning of a factory.

Mr. PAGE of North Carolina. Mr. Chairman, the evidence before the subcommittee preparing this bill was to the effect that with the constant addition of motor-driven fire-fighting apparatus there were necessarily a number of men employed to keep this apparatus in repair; that if these men were to be kept employed it would be necessary that this authority be enlarged to the extent that they might put together some of these appliances and to reconstruct apparatus that has been worn; that would hardly be covered by the word "repair." There is no increase of employment, and it is merely an effort to keep employed these men who must be kept there. I hope the gentleman will not make his point of order.

Mr. JOHNSON of Kentucky. I should like to ask the gentleman from North Carolina if he will agree to take out the word "hereafter" at the bottom of page 57?

Mr. PAGE of North Carolina. Mr. Chairman, that was put in, as the gentleman knows, for the reason that we do not care to carry these paragraphs in the bill every year. I see the gentleman's point, that if this does not meet expectations it might go out more easily if the word "hereafter" is stricken out. I am sure it will not do any harm, and I will agree to the amendment if the gentleman will withdraw his point of order.

I move to amend by striking out the word "hereafter" in line 24, page 57.

The CHAIRMAN. The gentleman from North Carolina moves to strike out the word "hereafter" in line 24, page 57.

The amendment was agreed to.

Mr. JOHNSON of Kentucky. I withdraw the point of order.

The CHAIRMAN. The gentleman withdraws his point of order, and the Clerk will read.

The Clerk read as follows:

Health officer, $4,000; assistant health officer, $2,500; chief clerk and deputy health officer, $2,500; clerks—1 $1,400; 5 at $1,200 each, 4 at $1,000 each, 1 $720; sanitary inspectors—chief, $1,800, 8 at $1,200 each, 2 at $1,000 each, 2 at $900 each; food inspectors—chief, $1,600, 5 at $1,200 each, 6 at $1,000 each, 5 at $900 each; chemist, $2,000; assistant chemist, $1,200; assistant bacteriologist, $1,200; skilled laborers—1 $720, 1 $600, messenger and janitor, $600; driver, $600; poundmaster, $1,400; laborers, at not exceeding $50 per month each, $2,400; in all, $65,140.

Mr. JOHNSON of Kentucky. Mr. Chairman, I make a point of order against the increase of the salary for the poundmaster. He has a sinecure down there anyhow, and to pay him more than $1,200 is an imposition on the taxpayers of the District.

Mr. PAGE of North Carolina. Mr. Chairman, I concede that it is clearly subject to a point of order. We increased it because up to a few years ago the poundmaster was paid $1,500.

Mr. JOHNSON of Kentucky. In my judgment he ought not to be paid more than $600.

The CHAIRMAN. The point of order is sustained.

Mr. PAGE of North Carolina. Mr. Chairman, I offer an amendment to insert $1,200 in the place of the $1,400 stricken out.

The amendment was agreed to.

The Clerk read as follows:

Probation system: Probation officer, supreme court, $2,000; assistant probation officer, $1,200; stenographer and typewriter and assistant, $800; police court—probation officer, $1,500; assistant probation officer, $1,200; contingent expenses, $500; in all, $7,200.

Mr. COX. Mr. Chairman, I reserve a point of order on that paragraph. This is a new position, "assistant probation officer."

Mr. PAGE of North Carolina. There is one new one. It is an absolute necessity. The number of children that are turned loose on probation has reached a point where it needs an additional probation officer. If this is not agreed to, you might as well turn them loose without any supervision.

Mr. COX. How many probation officers are there?

Mr. PAGE of North Carolina. I understand there are about 50 children to one officer.

Mr. COX. How many probation officers are there?

Mr. PAGE of North Carolina. This is for the court, and not for the juvenile court. There is only one, and we give him an assistant.

Mr. JOHNSON of Kentucky. It developed in the juvenile-court bill that every child required about seven officers.

Mr. PAGE of North Carolina. That was in connection with the house of detention, and that statement would not bear examination.

Mr. JOHNSON of Kentucky. I think the statement was correct.

Mr. PAGE of North Carolina. I can produce evidence to the gentleman that it was not correct.

Mr. COX. Mr. Chairman, I think the gentleman from North Carolina has made out a good case, and I withdraw the point of order.

Mr. ABERCROMBIE. Mr. Chairman, I ask unanimous consent to revise and extend my remarks in the RECORD.

The CHAIRMAN. The gentleman from Alabama asks unanimous consent to revise and extend his remarks in the RECORD. Is there objection?

There was no objection.

Mr. PAGE of North Carolina. Mr. Chairman, I move that the committee do now rise.

The motion was agreed to.

Accordingly the committee rose; and the Speaker having resumed the chair, Mr. FERRIS, Chairman of the Committee of the Whole House on the state of the Union, reported that that committee had had under consideration the bill H. R. 15774, the District of Columbia appropriation bill, and had come to no resolution thereon.

HOUR OF MEETING TO-MORROW.

Mr. PAGE of North Carolina. Mr. Speaker, I ask unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow.

The SPEAKER. The gentleman from North Carolina asks unanimous consent that when the House adjourns to-day it adjourn to meet at 11 o'clock a. m. to-morrow. Is there objection?

There was no objection.

ADJOURNMENT.

Thereupon, on motion of Mr. PAGE of North Carolina (at 5 o'clock and 59 minutes p. m.), the House adjourned until to-morrow, Friday, May 26, 1916, at 11 o'clock a. m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of Rule XXIV, a letter from the Secretary of the Treasury, transmitting copy of a communication from the

Acting Secretary of the Navy, reporting that the Navy Department has considered, ascertained, adjusted, and determined that the sum of $5 is due Maximiliano Trompez, of Macoris, Dominican Republic, for damages for which a vessel of the United States Navy was responsible (H. Doc. No. 1166); to the Committee on Appropriations and ordered to be printed.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS.

Under clause 2 of Rule XIII,

Mr. TILLMAN, from the Committee on the Public Lands, to which was referred the bill (H. R. 15117) for the relief of John Steagall, reported the same with amendment, accompanied by a report (No. 766), which said bill and report were referred to the Private Calendar.

CHANGE OF REFERENCE.

Under clause 2 of Rule XXII, the Committee on Invalid Pensions was discharged from the consideration of the bill (H. R. 1586) granting a pension to William L. Brown, and the same was referred to the Committee on Pensions.

PUBLIC BILLS, RESOLUTIONS, AND MEMORIALS.

Under clause 3 of Rule XXII, resolutions were introduced and severally referred as follows:

By Mr. TAGUE: Resolution (H. Res. 247) authorizing the transportation of mails on naval vessels; to the Committee on Foreign Affairs.

By Mr. SHACKLEFORD: Resolution (H. Res. 248) providing for the consideration of H. R. 7617; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS.

Under clause 1 of Rule XXII, private bills were introduced and severally referred as follows:

By Mr. BELL: A bill (H. R. 15997) granting an increase of pension to Samuel M. Higgins; to the Committee on Pensions.

By Mr. CALDWELL: A bill (H. R. 15998) granting an increase of pension to Friederika Serini; to the Committee on Invalid Pensions.

By Mr. CARLIN: A bill (H. R. 15999)) to correct the military record of Asbury Scrivener; to the Committee on Military Affairs.

By Mr. COADY: A bill (H. R. 16000) granting an increase of pension to Charles B. Reed; to the Committee on Invalid Pensions.

By Mr. DIXON: A bill (H. R. 16001) granting a pension to Orin Marshall; to the Committee on Pensions.

Also, a bill (H. R. 16002) granting an increase of pension to Jacob Green; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16003) for the relief of the heirs of David H. Fish, deceased; to the Committee on Claims.

By Mr. EAGAN: A bill (H. R. 16004) granting an increase of pension to Maria Murphy; to the Committee on Invalid Pensions.

By Mr. HAYES: A bill (H. R. 16005) granting an increase of pension to John T. Wallin; to the Committee on Invalid Pensions.

By Mr. LAFEAN: A bill (H. R. 16006) granting an increase of pension to Annie Wagner; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16007) granting an increase of pension to Catharine Bupp; to the Committee on Invalid Pensions.

By Mr. MURRAY: A bill (H. R. 16008) to enroll Robert Underwood; to the Committee on Indian Affairs.

By Mr. NEELY: A bill (H. R. 16009) for the relief of Dr. Charles Lee Baker; to the Committee on Military Affairs.

By Mr. PADGETT: A bill (H. R. 16010) for the relief of certain enlisted men of the United States Navy; to the Committee on Naval Affairs.

By Mr. PORTER: A bill (H. R. 16011) granting an increase of pension to Frank Cole; to the Committee on Invalid Pensions.

Also, a bill (H. R. 16012) granting an increase of pension to Eva E. Steele; to the Committee on Invalid Pensions.

By Mr. PRATT: A bill (H. R. 16013) granting a pension to Louise Humphrey Thayer; to the Committee on Invalid Pensions.

By Mr. RUSSELL of Ohio: A bill (H. R. 16014) for the relief of Godfried Ziegler; to the Committee on War Claims.

By Mr. TAYLOR of Arkansas: A bill (H. R. 16015) granting a pension to Louisa Amanda Hays; to the Committee on Invalid Pensions.

PETITIONS, ETC.

Under clause 1 of Rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

By Mr. BAILEY: Petitions of V. G. Fullman, Miller Saw-Trimmer Co., William F. Blars, Gem Manufacturing Co., and Keystone Printing Co., all of Pittsburgh, Pa.; James M. Rea, Harry Brant, Kingsley Brant, J. F. Smith, and William Herdon, all of Savannah, Mo.; Standard Sanitary Manufacturing Co., Pittsburgh, Pa.; Frances M. Kane, Philadelphia, Pa.; B. B. & B. Trunk Co., Pittsburgh, Pa.; Charles F. Dole, Jamaica Plain, Mass.; C. F. Holdship, Pittsburgh, Pa.; Albert E. Jenkins, New York City; Alfred J. Walker and James J. Lyons, New Jersey; J. S. Manning, Elizabeth, N. J.; Graham McAdam, John Hartner, and Edward Green, all of New York City; Samuel Archer, J. W. Jansen, J. M. McCrawner, C. E. Beveridge, and Charles C. Ebert, all of Seattle, Wash.; E. D. Frohman, Pannier Bro. Stamp Co., Namsamn Bros. Co. (Max Namsamn, president), F. M. Namsamn, and American Steel Band Co., all of Pittsburgh, Pa.; Robertraw Manufacturing Co., Youngwood, Pa.; Vinnie MacLean, E. Albert Mass, John Carey, E. B. Goodrich, and Lulu Machschlemer, all of Los Angeles, Cal.; Calvin Tompkins, New York City; Earl H. Wells, B. J. Clark, George Cartwright, and Fred Schulder, all of Cleveland, Ohio; Horace Sague, Poughkeepsie, N. Y.; P. Duff & Sons, Raridan & East Brady Co., and W. B. Skelly Coal Co., all of Pittsburgh, Pa.; H. J. Graham, New York City; and C. E. A. Winslow, Connecticut, asking for the speedy passage of House bill 13281, which provides for amending the tariff so as to admit free the products of any American country which will admit our products free; to the Committee on Ways and Means.

By Mr. CANNON (by request): Petition of citizens of Cissna Park, Ill., in re migratory-bird law; to the Committee on Agriculture.

Also (by request), petition of citizens of Momence, Ill., favoring the Hulbert bill to make the Star Spangled Banner the national anthem of the United States; to the Committee on the Judiciary.

By Mr. CAREW: Memorial of Detroit Board of Commerce, opposing passage of the Tavenner bill; to the Committee on Labor.

By Mr. DALE of New York: Memorials of meeting of women of Cochise County and women voters of Greenlee County, Ariz.; the Uinta County Branch of the Congressional Union, at Evanston, Wyo.; the Massachusetts Branch of the Congressional Union for Woman Suffrage; and sundry citizens of New York, favoring the reporting out of the Susan B. Anthony suffrage amendment from the Judiciary Committee; to the Committee on the Judiciary.

Also, petition of William H. Morse, probation officer of Amsterdam, N. Y., and Arthur W. Tome, of Brooklyn, N. Y., indorsing the Owen-Hayden bill, Senate bill 1092 and House bill 42; to the Committee on the Judiciary.

By Mr. DILL: Petition of Mr. Conrad Bluhm and other residents of Spokane, Wash., urging the establishment of a Federal censorship of motion pictures in interstate commerce; to the Committee on Education.

Also, petition of Mr. Albert K. Arend and other residents of Spokane, Wash., urging passage of constitutional amendment forbidding all sectarian appropriations, also prohibition of same in Philippine and Porto Rico enabling acts; to the Committee on Insular Affairs.

By Mr. DYER: Memorial of 28 members of the United States House of Representatives, favoring action by the Committee on Foreign Affairs on House resolution 235; to the Committee on Foreign Affairs.

By Mr. EAGAN: Memorial of Board of Supervisors of Madera County, in re certain pending legislation; to the Committee on Military Affairs.

By Mr. FOCHT: Papers to accompany House bill 1463, for relief of David I. Hawk; to the Committee on Invalid Pensions.

Also, papers to accompany House bill 14551, for the relief of David H. Walker; to the Committee on Invalid Pensions.

By Mr. GARDNER: Petition of Pigeon Cove Woman's Club, of Pigeon Cove, Mass., favoring passage of a resolution by Congress designating the mountain laurel as the floral emblem of the United States; to the Committee on the Judiciary.

By Mr. HAMLIN: Papers to accompany House bill 15408, for relief of John E. Opedyke; to the Committee on Invalid Pensions.

By Mr. HASTINGS: Petitions of Sunday School of Methodist Episcopal Church South, of Boynton, Okla., for passage of House joint resolutions 84 and 85, for national prohibition; to the Committee on the Judiciary.

By Mr. HILL: Memorials of the Bricklayers' Union, No. 8, of Stamford, Conn., in favor of House bill 6915, for the retire-

ment of superannuated post-office employees; to the Committee on the Post Office and Post Roads.

Also, memorial of Common Council of the city of Stamford, Conn., in favor of House bill 6915, to retire superannuated postal employees; to the Committee on the Post Office and Post Roads.

By Mr. HUDDLESTON: Petition of W. B. Harrell and others, of Birmingham, Ala., in re House bill 652; to the Committee on the District of Columbia.

Also, petition of Frank Harwell and others in re House bills 491 and 6468; to the Committee on the Post Office and Post Roads.

By Mr. JAMES: Petitions of sundry citizens of Lake Linden, Mich., opposing the Madden rider, limiting the weight of parcel-post packages to 50 pounds; to the Committee on the Post Office and Post Roads.

By Mr. LINTHICUM: Memorial of Maryland State and District of Columbia Federation of Labor, indorsing House bill 652, providing for the Sunday closing of barber shops in the District of Columbia; to the Committee on the District of Columbia.

By Mr. LONDON: Petition of 175 citizens of Port Angeles, Wash., demanding that Congress vote against "military preparedness, conscription of men, and war of any kind"; to the Committee on Military Affairs.

By Mr. MATTHEWS: Papers to accompany House bill 15985, for relief of Charles Hoff; to the Committee on Invalid Pensions.

By Mr. OAKEY (by request): Petition of Young People's Society of Christian Endeavor, of Somers, Conn., for national prohibition; to the Committee on the Judiciary.

Also (by request), memorial of executive committee of the Society of the Chagres, composed of American canal employees who completed six years' service prior to January 1, 1915, favoring the passage of Senate bill 3457 and House bill 8828, and protesting against the discrimination between civilian employees and Army, Navy, and Marine Hospital employees on the Canal Zone; to the Committee on Insular Affairs.

By Mr. O'SHAUNESSY: Memorial of the Providence Chamber of Commerce, favoring House bill 651; to the Committee on Interstate and Foreign Commerce.

SENATE.

FRIDAY, *May 26, 1916.*

(Legislative day of Thursday, May 18, 1916.)

The Senate reassembled at 11 o'clock a. m., on the expiration of the recess.

CONCENTRATION AND MANEUVER CAMP IN WASHINGTON.

Mr. JONES. Mr. President, I have a resolution here calling for information—for copies of documents in the War Department. I ask unanimous consent for its immediate consideration.

The VICE PRESIDENT. Is there objection? The Chair hears none, and the resolution will be read.

The Secretary read the resolution (S. Res. 203), as follows:

Resolved, That the Secretary of War be directed to transmit to the Senate as soon as possible copies of the following reports and memoranda with reference to the American lake concentration and maneuver camp in the State of Washington, to wit:

Report of Gen. Funston for the year 1903.
Report of Capt. S. A. Cloman in 1907.
Report of Col. Woodbury in 1907, about April 4.
Report of Lieut. A. M. Ferguson of August 1, 1907.
Reports from the Secretary of the Interior and the Acting Commissioner of Indian Affairs under date of May 27, 1907.
Report of board of Army officers composed of Gen. Murray, Gen. Maus, and Capt. Craig, March 4, 1912.
Memoranda submitted by Gen. Duval! May 10, June 8, and September 26, 1907.
Report of Gen. Randall.

The VICE PRESIDENT. Is there objection to the resolution? The Chair hears none, and it is agreed to.

Mr. HOLLIS. Mr. President, I think the resolution ought to go over under the rule, so that the facts——

Mr. KENYON. Mr. President, I suggest the absence of a quorum.

The VICE PRESIDENT. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Clarke, Ark.	Johnson, S. Dak.	Nelson
Bankhead	Culberson	Jones	Oliver
Brandegee	Dillingham	Kenyon	Overman
Broussard	Fletcher	La Follette	Pomerene
Catron	Gallinger	Lane	Ransdell

The VICE PRESIDENT. Fifty Senators have answered to the roll call. There is a quorum present.

Mr. MARTINE of New Jersey. Mr. President——

The VICE PRESIDENT. There was unanimous consent given to the Senator from Washington [Mr. JONES] for the consideration of a resolution. The Senator from New Hampshire [Mr. HOLLIS] subsequently, after it had been read, objected to it.

Mr. SHAFROTH. What is the resolution? I should like to have it read.

The VICE PRESIDENT. It is a resolution calling on the Secretary of War for certain information in regard to the American lake concentration and maneuver camp in Washington.

Mr. SMOOT. Let the resolution be read.

The VICE PRESIDENT. It will be read again.

The Secretary again read the resolution.

The VICE PRESIDENT. There seems to be an objection on the part of the Senator from New Hampshire [Mr. HOLLIS]. He wanted to have the resolution go over for a day.

Mr. JONES. When will it come up again?

The VICE PRESIDENT. The Chair is trying to find out what the situation of the resolution is, if possible. The Chair understood that unanimous consent was given for the consideration of the resolution, and the Chair announced that it had been adopted. Then the Senator from New Hampshire asked that it should go over for a day. Is there objection to its going over?

Mr. JONES. I understood that the resolution was passed; but, of course, if the Senator from New Hampshire thinks it ought to go over, I would not insist on a different course.

The VICE PRESIDENT. The resolution, then, will go over for a day.

STEAMSHIP "REPUBLIC."

Mr. REED. Mr. President, out of order, I ask to be permitted to submit a report from the Committee on Commerce.

The VICE PRESIDENT. Without objection, the report will be received.

Mr. REED, from the Committee on Commerce, to which was referred the bill (S. 5985) authorizing the Commissioner of Navigation to cause the steamship *Republic* to be enrolled and licensed as a vessel of the United States, reported it without amendment and submitted a report (No. 482) thereon.

MEMORIAL TO FRANCIS ASBURY.

Mr. OVERMAN. I ask unanimous consent to introduce a joint resolution and that it be referred to the Committee on the Library.

The joint resolution (S. J. Res. 136) authorizing the erection on the public grounds in the city of Washington, D. C., of a memorial to Francis Asbury, was read twice by its title, and, with the accompanying paper, referred to the Committee on the Library.

LIFE JACKETS AND LIFE BUOYS.

Mr. FLETCHER. I ask unanimous consent to submit a favorable report from the Committee on Commerce.

The VICE PRESIDENT. The Chair hears no objection and the report will be received.

Mr. FLETCHER, from the Committee on Commerce, to which was referred the bill (H. R. 13112) to amend section 14 of the seamen's act of March 4, 1915, reported it without amendment and submitted a report (No. 483) thereon.

CENSORSHIP OF AMERICAN MAILS.

Mr. MARTINE of New Jersey. Mr. President, I have received a number of letters from constituents complaining of interference with their mails by the British authorities. I received one yesterday from a prominent gentleman in Newark, N. J., a man of large interests and large business, wherein he says:

> Within the past week I have received a number of letters from neutral countries. All of them had been opened by the English authorities and had been sealed by a label bearing the words "Passed by censor."

It seems to me that this is a manifest evil and injustice, and I am prompted to ask unanimous consent to submit the following resolution (S. Res. 204), which I will read with the permission of the Senate:

> Whereas the authorities of Great Britain have persistently rifled and violated the United States mail during the present war in Europe; Therefore be it
>
> *Resolved*, That the State Department of the United States be, and hereby is, requested to investigate this whole subject, with a view to putting a stop to this unlawful and outrageous practice.

I present the resolution and ask that it may be disposed of as the Senate may think proper.

Mr. STONE. What is the request?

Mr. MARTINE of New Jersey. My request is that the State Department be——

Mr. STONE. No; what is the request now in regard to the resolution?

Mr. MARTINE of New Jersey. I should like to have it acted on. I should like to take the sense of the Senate on it.

Mr. STONE. Mr. President——

Mr. MARTINE of New Jersey. I will be satisfied with any disposition the Chair may make of it.

Mr. STONE. Does the Senator wish to lay aside the unfinished business?

Mr. CLARKE of Arkansas. It has not been laid aside.

Mr. STONE. Then the resolution is not in order. Let it go over.

Mr. MARTINE of New Jersey. I am perfectly satisfied to have it referred.

Mr. STONE. Well, let it be referred to the committee.

The VICE PRESIDENT. The resolution will be referred to the Committee on Foreign Relations.

RIVER AND HARBOR APPROPRIATIONS.

Mr. NELSON. I ask unanimous consent to introduce the following resolution for reference to the Committee to Audit and Control the Contingent Expenses of the Senate.

Mr. CLARKE of Arkansas. The regular order!

The VICE PRESIDENT. The regular order is demanded, which is House bill 12193.

The Senate, as in Committee of the Whole, resumed the consideration of the bill (H. R. 12193) making appropriations for the construction, repair, and preservation of certain public works on rivers and harbors, and for other purposes.

The VICE PRESIDENT. The pending question is on the motion of the Senator from Wisconsin [Mr. HUSTING] to rerefer the bill to the Committee on Commerce.

Mr. HUSTING. Mr. President, I understand there are two amendments to be offered, and I have been requested to withdraw the motion temporarily. I should like to accommodate Senators; and while I am anxious to have the motion brought to a speedy vote, I will ask leave to temporarily withdraw it until the amendments proposed by the Senator from Colorado [Mr. SHAFROTH] and the Senator from Connecticut [Mr. BRANDEGEE] have been presented and acted upon, and then I shall renew the motion.

Mr. SMITH of Arizona. Mr. President, I have also an amendment that I wish to have disposed of. It will take only 10 minutes at the outside, I think. I do not believe it is necessary to press the motion to recommit before the bill is perfected, if it can be perfected in the opinion of some.

Mr. SHAFROTH. I ask if my amendment will be in order now since the motion made by the Senator from Wisconsin is withdrawn?

The VICE PRESIDENT. The Chair does not know whether it is withdrawn.

Mr. SHAFROTH. I understand that it has been withdrawn so as to give an opportunity to vote on amendments to the text.

Mr. SMOOT. Mr. President——

Mr. BRANDEGEE. Mr. President, a parliamentary inquiry. Has not the Senator from Wisconsin a right to withdraw his motion if he desires to withdraw it?

The VICE PRESIDENT. The Chair was uncertain as to whether the Senator from Wisconsin had withdrawn it.

Mr. HUSTING. I ask leave to withdraw the motion.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. The Senator from Connecticut.

Mr. BRANDEGEE. I have offered a proposed amendment——

Mr. CLARKE of Arkansas. Mr. President, we have not reached the order of business where new amendments offered by individual Senators can be considered. We are still working on the text of the bill, either for the purpose of amending it or striking it out.

Mr. BRANDEGEE. I understood that there were no more amendments to the text of the bill.

Mr. CLARKE of Arkansas. The Senator from Arizona has just stated that he has such an amendment to offer.

Mr. BRANDEGEE. If that is correct, then, of course, I withhold my amendment.

Mr. LA FOLLETTE. Mr. President, if the motion to recommit is to be withdrawn very likely it will not come before the Senate for a day or two, if my colleague is going to wait for all the amendments to be disposed of that Senators have to offer. I suggest that we proceed to vote on the motion to recommit. If the bill is recommitted, Senators will have an opportunity to present to the committee the amendments which they would otherwise offer on the floor, and the time of the Senate can be saved by adopting the motion to recommit at once.

Mr. CLARKE of Arkansas. Mr. President, I quite agree with the senior Senator from Wisconsin that this would be a very appropriate time to dispose of any motion that goes to the life of the bill and that it is useless to consume any more time upon amendments before that motion is voted on.

Mr. BRANDEGEE. Mr. President, I should like to have the exclusive privilege of talking, if I have the floor.

The VICE PRESIDENT. The Senator from Connecticut has the floor.

Mr. BRANDEGEE. I asked the junior Senator from Wisconsin [Mr. HUSTING] if he would be kind enough to withdraw his motion to recommit so that I might offer an amendment before the motion to recommit is voted upon. He agreed to do it. If that course throws the bill open to all amendments to the text, which I supposed had been disposed of, as far as I am concerned I shall not ask the Senator from Wisconsin to withdraw the motion. Rather than go ahead and spend two or three days on the bill with new amendments, as the Senator from Wisconsin informs me that he desires to leave town shortly, I shall not ask him to delay his motion on my account.

Mr. SHAFROTH. Mr. President, it seems to me that the withdrawal of the motion by the Senator from Wisconsin ought to be adhered to, because if my amendment is adopted it is going to influence my vote as to whether I shall vote for the recommittal of the bill or not, and I think it will influence others, because if the communities that are to be benefited by these improvements are to pay 20 per cent of their cost, it is to my mind an indication that the measure is a meritorious one. For that reason it seems natural that this ought to be disposed of before the question is taken on the motion of the Senator from Wisconsin.

The VICE PRESIDENT. The Senator from Wisconsin has withdrawn his motion, and amendments with reference to the text of the bill as it came from the House of Representatives are in order.

Mr. SMITH of Arizona. Mr. President, if that be true, I desire to offer an amendment at this point. On page 38 I move to strike out the provision contained in lines 3, 4, and 5 and in lieu thereof to insert what I send to the desk.

The VICE PRESIDENT. The amendment of the Senator from Arizona will be stated.

The SECRETARY. On page 38 it is proposed to strike out all of lines 3, 4, and 5 and to insert in lieu thereof the following:

Colorado River, Ariz.: For improvement and maintenance by the repair, enlargement, and protection of the Government levee on the Gila River near its junction with the Colorado River at Yuma, $28,000.

Mr. SMITH of Arizona. Mr. President, this amendment embraces a subject which came before the Senate at the time that a flood devastated the section of country therein referred to. The Senate at that time passed a bill appropriating $50,000 for the relief of that condition. Since then a report has been received from the War Department showing the necessity for the appropriation of the additional amount which I have stated in my amendment, to wit, $28,000. On page 1508 of the CONGRESSIONAL RECORD of January 25 last appear the proceedings of that day, in which the legislation to which I have referred, appropriating $50,000, was passed. Since then investigation by the War Department has established that $28.000 is sufficient to accomplish the purpose of protecting the levees of that river at Yuma. I do not wish to detain the Senate about the matter, the legislation on the subject providing for $28,000 having already passed, but the bill as it came from the House provides for but $3,000. That sum would only be sufficient to stop a few gopher holes and small washouts, and that work has already been done by the citizens themselves. Without further argument on my part I ask for the adoption of the amendment.

Mr. WORKS. Mr. President, I understand that high water prevails in that section just now. Does the Senator from Arizona know what effect this last storm is having upon conditions at Yuma?

Mr. SMITH of Arizona. It has had no effect there, so far as I have ascertained. The people there apprehend great trouble, however, from about the 20th of June to the middle of July, when the vast snowsheds shall have emptied the melted snows into that river. Those snows are so heavy in the mountains this year that there is grave apprehension felt, not only for the irrigation system there, but for the banks of both the Gila and the Colorado Rivers.

Mr. WORKS. Has the Senator from Arizona noticed what has been reported in the newspapers about the present condition of high water there?

Mr. SMITH of Arizona. There is no trouble there yet, from anything that I have seen in the newspapers. If there is, I have had no report of it.

Mr. CLARKE of Arkansas. Mr. President, the proposition of the Senator from Arizona, as I understand, is to strike out "$3,000," and in lieu thereof to insert "$28,000," on page 38, beginning in line 3?

Mr. SMITH of Arizona. Yes, sir.

Mr. CLARKE of Arkansas. Well, Mr. President, I am not going to resist that amendment, although I must confess that there is but very slight foundation for it in the way of a formal recommendation in its favor. It probably possesses merit that will become more apparent upon the fuller examination that we expect to give the matter when we get into conference.

Mr. SMITH of Arizona. That is what I am perfectly willing to have the Senate do; to let the matter go into conference and ascertain all that is desired to be known about the proposition. This only carries out the recommendation of the War Department. I think there is an intimation that the work might possibly be done for $14,000; but that if they riprap it or protect it by stones, so as to prevent its washing away, it will require $28,000 to do the work. It is a question for the conferees.

Mr. WALSH. Mr. President——

The VICE PRESIDENT. Does the Senator from Arizona yield to the Senator from Montana?

Mr. SMITH of Arizona. I do.

Mr. WALSH. I rose to inquire of the Senator from Arizona what relation this improvement bears to navigation?

Mr. SMITH of Arizona. This improvement bears no relation to navigation. This improvement was recommended by the Rivers and Harbors Committee of the other House many years ago when Yuma was threatened with destruction.

The Colorado River is considered a navigable stream; it has been so held by the War Department; and it was for that reason and to afford that protection that in the original instance probably the first dam was built. It was done on my motion years ago in the other House. That dam has stood until the last year, when it was washed away in part and flooded the whole city. The Senate passed a bill at that time appropriating $50,000 to save the city from destruction; and a permanent protected levee is now essential to its safety when the great flood comes again.

Mr. WORKS. Mr. President——

The VICE PRESIDENT. Does the Senator from Arizona yield to the Senator from California?

Mr. SMITH of Arizona. I do.

Mr. WORKS. I should like to ask the Senator from Arizona what relation, if any, this improvement has to the reclamation project at that point?

Mr. SMITH of Arizona. It has no relation to the reclamation project at that point, except as to the fact of the uncertainty of the action of the Gila River.

Further, I will say to the Senator that the people there have been taxed, I think, something like a million dollars on that irrigation project to protect the banks of the Colorado River, which, as I have said, is a navigable stream, according to the findings of the War Department. That amount was all charged to this irrigation work, and it stands a charge against those people to-day. This seems a very slight remuneration for saving the city from absolute destruction, those people having bound themselves, or, rather, this Government having bound them, to the payment of something like a million dollars to prevent the Colorado River from leaving its banks. This is not a fair charge against the project, and I purpose, with congressional help, to relieve these farmers from that unjust burden.

Mr. WORKS. As I have understood it, the people who have taken up land under that project have been assessed to raise the levee in and about Yuma for the protection of their land. Is not that so?

Mr. SMITH of Arizona. As I say, that is what they have done. The people there have been charged with something like a million dollars to protect the banks of the Colorado River, which should be borne by the General Government.

Mr. CLARKE of Arkansas. Is there a military reservation at Yuma?

Mr. SMITH of Arizona. No.

The VICE PRESIDENT. The question is on agreeing to the amendment proposed by the Senator from Arizona.

The amendment was agreed to.

Mr. BANKHEAD. I desire to offer an amendment on page 49, between lines 18 and 19. It simply provides for a survey.

Mr. CLARKE of Arkansas. We have not yet reached that order.

Mr. BANKHEAD. Very well, I withdraw the amendment for the present.

Mr. HARDWICK. Mr. President, I offer an amendment.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 14, line 19, it is proposed to strike out "$53,000" and insert "$78,000," so as to read:

Altamaha, Oconee, and Ocmulgee Rivers, Ga.: Continuing improvement and for maintenance, $78,000.

Mr. HARDWICK. Mr. President, it will be seen that this is the Altamaha-Oconee-Ocmulgee improvement project. The three rivers—the Oconee, the Ocmulgee, and the Altamaha—have been linked together by the engineers. Those rivers aggregate a length of something over 600 miles below Macon to our coast cities in Georgia. They do not carry at present a great volume of commerce, although it amounts, I believe, to something like $5,000,000 a year.

The work contemplated under this improvement is a very modest one; and the project, as I expect to explain to the Senate, is a very meritorious one. It is not a question of digging out the rivers to make them navigable where they are not properly and naturally so, but a question of removing some sand bars and such obstructions as that in these rivers, which ought to be navigable and kept so; and which, if kept so, will be of the greatest benefit to more than a million people in Georgia.

The head of navigation of these rivers, Mr. President, is the city of Macon, in the very center of my State—a very prosperous city of about 50,000 population. The people at Macon are undertaking to operate steel barges down these rivers to Brunswick and to Savannah, the Georgia ports.

The amount estimated for by the engineers was $43,000, because there was considerable balance left over. The House Committee on Rivers and Harbors and the House of Representatives raised that amount to $53,000, and that is the amount carried in the bill. Since the bill passed the House of Representatives I have received a telegram to which I desire to invite the attention of the Senate. It is addressed to me, is dated Macon, Ga., May 18, 1916, and reads:

Fifty thousand dollars is hardly sufficient to remove snags and other obstacles from the channel of the three rivers. Our boat has lost five days on sand bars on lower Altamaha River. All Government data to us were that 3 feet was minimum low-water depth. We constructed the *Ocmulgee*—

That is the name of one of their barges—

to draw 30 inches to be safe We find only 26 inches on some crossings. Our investment is greatly handicapped unless funds are provided for jetties in places that hold the sand. I urge you on behalf of the people of Georgia to struggle for special appropriation of $25,000 to be used for jettying on the Altamaha system. I suggest communication with Col. Langfitt at Savannah.

Col. Langfitt is the local district engineer. Of course I did not communicate with him, because the proprieties would require that such communications should go through the Board of Engineers and the Chief of Engineers here; and there was not time for that.

The name of the gentleman who sent the telegram to me is Mr. A. J. Long, president of the Macon & Atlantic Navigation Co. That company has already constructed two steel barges, one of which is in actual operation on this river system and the other is about to be put into commission. I visited Macon not many weeks ago and saw these boats. They have adequate wharves at Macon, and they are really doing a great work to give the city of Macon excellent freight rates. The surrounding country also will be benefited by bringing goods from the Georgia coast up these rivers and by sending their goods down these rivers to Georgia ports, and then up the east coast.

In my opinion, there is no small project—and this is not a tiny project, for there are 600 miles of river involved in this improvement—that is more meritorious. In the absence of a special report from the engineers on this subject, I tried to get them to say whether or not the suggestion was meritorious. They simply say they do not know; that this has been suggested since they investigated the project. I think there ought to be some investigation; and in urging this increase of appropriation I am perfectly willing to accept it with the understanding that the conferees will have that question investigated and ascertain as to the accuracy of this gentleman's statement that the boats constructed by his company, 6 inches less than the draft which the Government stated the channels would carry, can not get along at all without some additional appropriation to get the snags and sand bars out of the way. I shall not expect the conferees on the part of the Senate, if this amendment is included in the bill, or accepted by the Senator from Arkansas, to insist upon it in conference, unless it shall appear that the facts as set forth are substantially true. I believe, under these circumstances, the increase should be allowed, on the understanding I have indicated.

Mr. NORRIS. Mr. President, will the Senator yield?

Mr. HARDWICK. Yes, sir.

Mr. NORRIS. I want to make an inquiry of the Senator regarding Col. Langfitt. Has he charge of this matter?

Mr. HARDWICK. He is district engineer; yes, sir.

Mr. NORRIS. How long has he been there?

Mr. HARDWICK. Not a great many years. Guessing, I should say three or four years; but I do not know with certainty.

Mr. NORRIS. Can the Senator give us any information as to any recommendation that Col. Langfitt has made in regard to these rivers as affecting this proposed increase?

Mr. HARDWICK. Yes. I understood that Col. Langfitt recommended the amount reported by the Board of Engineers.

Mr. NORRIS. What amount was that?

Mr. HARDWICK. That was $43,000, besides a balance standing over of some $50,000.

Mr. NORRIS. The amount contained in the bill would not interfere with the amount remaining unexpended, would it?

Mr. HARDWICK. Not at all.

Mr. NORRIS. That would be used anyway?

Mr. HARDWICK. Yes; I think so.

Mr. NORRIS. What I wanted to get at was, whether the amendment proposed either directly or indirectly had the approval of Col. Langfitt, and as to what he thought about it.

Mr. HARDWICK. I will say to the Senator, very frankly, that I can not say that it has. I did not think it was proper for me to communicate directly with the district engineer and ask him to send me a recommendation to be used here in Congress. There has not been time to get it through the ordinary departmental channels.

I hope that the Senator will put this amendment on the bill, because I believe it is as meritorious a proposition as ever was submitted to the consideration of this body, for I understand it will enable the people at Macon to operate the barges, which they have built at heavy cost, and possibly to add more of them. If so, I say to the Senate that it will be a great thing for freight rates as affecting the city of Macon and the business men of Macon. It is a very modest amount.

The gentleman whose telegram I have read says that the two boats they have constructed were constructed to draw 30 inches on the strength of the statement made in the Government report that there were 3 feet of water the year round in the river; but within the last few days—the telegram was sent to me on May 18—their boat was delayed for five days on account of snags and sand bars and other obstructions, and because there were only 26 inches of water in some parts of the channel. The company of which he is president tried to be very conservative and constructed their boats 6 inches less in draft than the Government said was the low-water mark; and yet it happens that in some places there are 4 inches less depth than their boats were constructed to draw. Mr. Long thinks that if Congress will give them this $25,000 extra these rivers will then bear the boats which they have already constructed for it, and that they will be able to continue this work.

Senators, the work in which Mr. Long and his associates are engaged is actually going on. The boats are there, but I am afraid that without some further improvement than is provided for they simply will not be able to operate. I do not think any of the objections of the character which have been urged as to other projects in this bill can possibly be made to apply to this item or to the amendment which I have proposed.

Mr. SMOOT. Mr. President, this is one of the items which I had intended at first to move to strike from the bill; but, after a more careful examination of the project, I have concluded that I would not ask that the amount provided for in the bill be stricken out, but let it go this year at $53,000. I really believe, however, the Senator from Georgia, when the facts as to the amount of commerce actually carried and what it cost per ton are taken into consideration, will agree with me that $53,000 is ample for the project.

Mr. HARDWICK. Mr. President, will the Senator allow me to interrupt him?

Mr. SMOOT. Certainly.

Mr. HARDWICK. I have some personal knowledge of the facts of this matter, and perhaps I can help the Senator to a better understanding of it. I am quite willing to agree to any statement he may make as to the years which have passed; but, as a matter of fact, right now and since any of these figures were obtained the Macon Navigation Co. is putting on new barges and new boats, and the Senator must not judge of the commerce on that river from the figures given in previous reports. I have been there within the past 30 days. I have seen their wharves and have actually seen with my own eyes the boats to which I have referred, one of which is launched and in operation and the other of which is on the ways waiting to be launched. So I ask the Senator not to pass too harsh judgment on this subject. Mr. Long, who sends to me the telegram which I have read to the Senate, is an upright, conscientious, progressive, forceful business man. He is not trying to take any advantage of the Government; he is not a politician, seeking an appropriation for political purposes; but he knows that these rivers, even with the appropriation carried by the bill, simply will not provide for the navigation of the boats which he has already bought. I appeal to the Senator to remember that this makes a little different condition from the one he has in mind.

Mr. SMOOT. Mr. President, I am perfectly willing that the Senate shall, without further discussion, vote upon this increase; but I will state to the Senate that deducting the blocks and the staves from the commerce upon the three rivers the $53,000 provided for in this appropriation means the Government paying on the commerce carried $1.50 a ton. There are other items which are so much worse than that that I concluded I should not ask that this be stricken from the bill; but now, to double it seems to me to be asking too much and out of all reason.

Mr. HARDWICK. It is not doubling it. It is adding 25 per cent to it.

Mr. SMOOT. I recognize what the Senator says in relation to the construction of boats, as the report calls attention to the fact that there was one boat being constructed. In the report I notice that the commerce on the Altamaha was 13,666 tons, and it was carried by one boat, making 65 trips. That is all the traffic upon the river; and of that, Mr. President, there was very little merchandise, as I have already stated, and the same is true not only upon this river but upon the other two.

I do not want to take the time of the Senate any more in discussing this item, Mr. President, but I really believe that the committees of both the House and the Senate, in granting the $53,000, have given all that should be given for those projects.

Mr. CLARKE of Arkansas. Mr. President, it is a practice easily abused to permit these amounts recommended by the committees to be increased upon the application of a Senator, which is usually based upon some communication from a source that he deems reliable. In this particular case, however, I do not see that any particular harm would come, for the reason that the District engineer has reported that the $50,000 coming over from the former appropriation and the amount provided for in the bill will be all the money that can be economically spent on the project during this year. So, if we should happen to appropriate a little more than the report called for, and he has made a report that he conscientiously believes to be proper, the money will not be spent, and therefore it will not be taken out of the Treasury.

I have concluded, as a policy, not to take up the time of the Senate in resisting these items where they are not to impose certainly a permanent and additional burden on the Treasury.

Mr. JOHNSON of South Dakota. Mr. President, if I voted upon the amendment under discussion, I admit that I would have to do so without knowledge of its real merits. I have no doubt the Senator from Georgia will give to this body his best efforts in the direction of meritorious measures of appropriation, and I admit that the same condition would exist with regard to many of the amendments to this bill, and the bill itself as various Members see it.

I had not intended to discuss the rivers and harbors bill pending before the Senate, and I shall only do so now in the briefest possible way.

It is with real regret that I can not see my way clear to vote with my friends and colleagues who have had this bill under consideration in the committee, and who, no doubt, have given it much thought and study. I find, however, that I am unable to do so for a number of reasons which I shall not attempt to go into in detail at this time, but shall merely confine myself to one or two thoughts that come to me.

In the first place, I am opposed to Federal appropriations upon matters of this kind unless the States, cities, or municipalities tributary to the rivers and harbors under consideration contribute their pro rata amount. In the building of docks, the improvement of harbors, and all other matters connected with water transportation, the tributary country receives largely the advantages derived from the project which do not accrue to the railroads and other transportation companies.

I have listened with much interest to the discussions of this measure by some of our very able Senators, who, I know, are sincere in their views and who have pointed out their various reasons for the passage of this bill; and yet the reasons given are not sufficient, as I look at it, to induce me to vote for the appropriations asked for.

Mr. President, there is another reason why I believe that this bill should not become a law. Our Government to-day is facing

serious problems. We are at this very time trying to devise ways and means for the collection of revenues to increase our income, so that we may be able to meet any possible demands that might be made upon us which are of the greatest importance to us as a people, demands that may insure the real safety of our country and the happiness of our homes, demands that are already incurred of an unusual kind. We should pause and take these things into consideration before we vote away millions of dollars more on what seem to me to be exceedingly extravagant measures and which may have a tendency to drain our Treasury at this time, when we should only look with favor upon those appropriations which we believe to be the most worthy and necessary, whether it be for the protection of our commerce, for the protection of our country, or for the protection of our homes.

Individually, in my own small way, there are times when investments in business matters would be favorably considered and, again, other times when the same investments, regardless of the probable profits, would not be considered and should not be.

This Government, Mr. President, is only a collective group of men, and Government business should be handled as nearly as possible along the lines on which an individual handles his own business, considering the great volume of business the Government carries on. I shall not to-day—and I hope I never shall while a Member of this body—cast my vote except in accordance with that idea, and in voting for any appropriation I shall first want to satisfy myself that it is able to stand on its own legs, subject to the closest scrutiny.

Mr. President, I want to read an editorial from one of our leading papers of the West, the Sioux City Tribune, of Sioux City, Iowa, under date of May 23, 1916, which was handed to me this morning, and which I desire to have embodied as a part of my remarks touching on river transportation:

After 20 years of "improving" the Missouri River, at a cost to the taxpayers of the Nation of many millions of dollars, it is announced in a dispatch from Omaha that the first cargo of general merchandise by river boat that has left that city in 35 years pulled out of there Sunday for Kansas City. For the same money the Federal Government has spent "improving" the Missouri River it could have paid the railroad freight on all the Omaha-Kansas City shipments during the past decade or it could have built a double-tracked railroad between the two cities and donated its use to merchants of those two cities.

I do not believe, Mr. President, that the subject of river transportation will ever be settled satisfactorily until our Interstate Commerce Commission more nearly adjusts rates for the benefit of the country as a whole than it has been able to do up to the present time. This will take a long time, but it is coming.

I have been told that the railroads are opposing this measure. I do not believe it and I do not believe the circumstances which I shall recite will warrant that belief by any Member of this body.

The Senator from Mississippi [Mr. WILLIAMS] the other day touched briefly upon this phase of the question and covered the question clearly for a reduction of long-haul rates and for an increase of short-haul rates.

Some time ago when the railroads petitioned for permission to reduce their coast-to-coast freight rates they did so, as I remember, upon the plea that water competition through the Panama Canal made it impossible to do business at the rates then in existence; and in order to reimburse themselves for the proposed reduction in coast-to-coast rates they later asked for an advance from either coast to points in the Mississippi Valley and the Mountain States, both of which requests were granted. This branch of the subject, however, has been dwelt upon, and I will not take any time upon it to-day further than to state what followed. Now, let us see what did really happen.

A recent report of the Interstate Commerce Commission shows that a large part of the water competition which the railroads complained of, and gave as their reason for lowering their rates on coast-to-coast freight traffic and raising their rates to interior points, was not competition at all, as most of the water freight lines were either owned or controlled by the railroads. They also own or control, Mr. President, most of the terminal shipping facilities and valuable water fronts at all of the important water terminals, making it very hard for private shippers to carry on business successfully and at competing prices, because they must necessarily seek locations for loading and unloading their freight at very disadvantageous localities.

Complaint has recently been filed, I understand, by the Baltimore & Carolina Steamship Co. with the Interstate Commerce Commission covering this question very fully in connection with the thought which I have given of private lines obtaining docking facilities for handling their traffic. This case, which I suppose is very familiar to all Senators here, refers to docks at Wilmington, N. C. Another case which I might touch upon in connection with this phase of the subject is the old case of the Flour City Steamship Co. in regard to docking facilities at Buffalo, which, as I remember, was before the commission for some time and was finally decided in favor of the steamship company.

It is not necessary, Mr. President, to consider this branch of the subject further, because I believe it to be a generally recognized fact that such is the case. Then, it would seem that complete governmental regulation of all water and rail transportation is the only real solution of the problem, and the only real way in which the water and rail facilities of this country can ever be controlled so as to serve the people as a whole equally throughout the United States.

Mr. President, I would not, if I had the power, assist in the passage of legislation that would cripple the railroads, because I know them to be, if properly regulated, one of the great blessings of our country. Neither would I assist in legislation, if possible, that would be to the detriment of the farmers and people generally of our country, for I recognize fully that they are entitled to much more consideration than they ever get from these great combinations of control; and it has been my observation through life that legislation—real, honest legislation—with its object for the betterment of the great masses of the people and for fairness to the great transportation lines has always resulted in the general round-up so that the transportation companies have received, to say the least, all and more than they were entitled to.

With regard to the rivers and harbors bill now under discussion, I do not favor the passage of this measure, because I have always been in favor of a lump-sum appropraition for matters of this kind, which seems to me more fair. I believe, Mr. President and Senators, that that is the only policy that can ever be carried out and give to all parts of the country and to all communities what they are justly entitled to. In operating under that system any part of the country which needs and deserves appropriations along the waterways can make its wants known to the Secretary of War, who, in a businesslike way, can authorize his engineers to go and make a complete investigation of the real needs of that locality, and in that way get the real facts connected with it, after a thorough investigation. The engineers can then make a very full and complete report, together with their recommendations, to that department, which, in turn, can be submitted by the Secretary of War to the Congress of the United States for its consideration and final determination.

When we reach matters of that kind from this standpoint we will then more fully understand the requirements of each locality with regard to its needs in this direction, and we may then vote for all appropriations which we believe are entitled to consideration with a more full knowledge of conditions.

Mr. President, I believe sincerely that a large amount of our appropriations, under the system under which this rivers and harbors bill is drawn, is each year voted away by Congress, and the people are needlessly burdened by taxation, without real knowledge on the part of the individual Members of either House as to the needs of the case. And if I were to vote to-day for this bill I would certainly be one of that number.

I do not believe there is any business in the world so large that it can not be systematically managed for the real benefit of the enterprise; and I am unable to see why the Government of the United States, with all of its known facilities, can not and does not handle its business as any other successful business is handled. I believe you will fully agree with me that this has never been done, and that it is not done to-day, although I firmly believe that we are gradually getting a more perfect system through the wise and patriotic guidance of our great President. Our prosperity and happiness in the future demand that we handle our affairs on a more economical system.

I received, the other day, a letter from Hon. A. O. Ringsrud, a prominent citizen and merchant of Elk Point, Union County, S. Dak., in which he advises me that a specific appropriation to repair and protect Government work already in at that point, for the protection of nearly 3 miles of revetment in that vicinity, is greatly needed, and I personally know that such is a fact. We have other places in our State where the Missouri River is cutting away valuable lands belonging to the farmers in the community; and yet we are told that under this bill, which provides for Missouri River points north of Sioux City in the amount of $150,000, it will be impossible to apply any of this sum to the work at these points, or at least only such a small amount that it would not be of much real benefit.

We have had some little river transportation on the Missouri in South Dakota above the city of Yankton, where I live. Boats at various times have been running on this river in competition with the railroads in a small way. It was only a short

time until the railroads or some one else bought the owners of boats out, and the benefit to the people from that was then taken away.

We do not blame the individuals for selling the boats because they were in business for profit, and were entitled to handle their own affairs according to their own ideas, but we know that freight traffic can be handled much more easily and much more quickly for the ordinary shipper by rail than it can by water, and it then only becomes necessary on competitive lines for the railroads to make a reduction of rates and in a short time its competitive boat line is out of business. Then the railroads, by making proper showing that they are losing money along the territory covered, may reasonably make a request to have their rates raised, which looks reasonable to everybody, under conditions existing at the time of request.

Mr. President, this bill carries appropriations amounting to $43,000,000, which must be paid by taxation. The State of South Dakota, which I have the honor in part to represent, has its proportion of these taxes to pay. I do not believe that its citizens will want me to vote for this measure and I shall not do so. I have voted for two or three amendments to the bill, and I shall no doubt vote for others, but I did so with the expectation that the bill would become a law, as bills of this kind usually do, and as I looked at it, it might be somewhat improved by those amendments; but at no time has there been any consideration on my part for voting for the bill as a whole.

So, Mr. President, in closing, permit me to say that I can not see any real benefit that this rivers and harbors bill would give to the people. Besides, I believe it is full of appropriations that no good business organization in the world would spend 25 cents on the dollar for the individual improvements proportional to the amount asked for under this proposed law if the improvements asked for were a part of that business organization's assets, and I hope that the motion of the Senator from Wisconsin to recommit the bill to the committee may carry and that a better bill as I look at it may be presented to this body for its consideration.

Mr. STERLING. I offer the following amendment.

The VICE PRESIDENT. There is a pending amendment.

Mr. STERLING. I beg pardon.

The VICE PRESIDENT. The question is on the amendment of the Senator from Georgia [Mr. HARDWICK].

Mr. KENYON. Let us have the yeas and nays.

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CATRON (when his name was called). I have a pair with the Senator from Oklahoma [Mr. OWEN] and withhold my vote in his absence.

Mr. CLAPP (when his name was called). I have a general pair with the senior Senator from North Carolina [Mr. SIMMONS], who is absent, and I withhold my vote.

Mr. CUMMINS (when his name was called). I have a pair with the Senator from Mississippi [Mr. VARDAMAN]. I therefore withhold my vote.

Mr. THOMAS (when his name was called). I have a general pair with the senior Senator from North Dakota [Mr. MCCUMBER], who is absent, and I withhold my vote. If I were at liberty to vote, I would vote "nay."

Mr. THOMPSON (when his name was called). I have a pair with the senior Senator from Illinois [Mr. SHERMAN], but on this question I am at liberty to vote. I vote "nay."

Mr. WILLIAMS (when his name was called). Under the permission I have to vote on certain questions upon the bill I vote "yea."

The roll call was concluded.

Mr. DU PONT. I have a general pair with the junior Senator from Kentucky [Mr. BECKHAM]. In his absence I will withhold my vote.

Mr. CLARK of Wyoming. I have a general pair with the senior Senator from Missouri [Mr. STONE], and therefore I withhold my vote.

Mr. SAULSBURY. I transfer my general pair with the junior Senator from Rhode Island [Mr. COLT] to the junior Senator from South Carolina [Mr. SMITH] and vote "yea."

Mr. CURTIS. I have been requested to announce the following pairs:

The Senator from Maine [Mr. BURLEIGH] with the Senator from Arkansas [Mr. ROBINSON];

The Senator from West Virginia [Mr. GOFF] with the Senator from South Carolina [Mr. TILLMAN];

The Senator from North Dakota [Mr. GRONNA] with the Senator from Maine [Mr. JOHNSON];

The Senator from Connecticut [Mr. MCLEAN] with the Senator from Montana [Mr. MYERS];

The Senator from New York [Mr. WADSWORTH] with the Senator from New Hampshire [Mr. HOLLIS];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Maryland [Mr. SMITH]; and

The Senator from Ohio [Mr. HARDING] with the Senator from Alabama [Mr. UNDERWOOD].

The result was announced—yeas 33, nays 21, as follows:

YEAS—33.

Bankhead	Hardwick	Nelson	Shields
Brandegee	James	Newlands	Simmons
Broussard	Jones	Oliver	Smith, Ariz.
Chamberlain	Lee, Md.	Overman	Smith, Ga.
Chilton	Lewis	Poindexter	Sterling
Clarke, Ark.	Lippitt	Ransdell	Williams
Culberson	Lodge	Reed	
Curtis	Martin, Va.	Saulsbury	
Gallinger	Martine, N. J.	Sheppard	

NAYS—21.

Ashurst	Kenyon	Smoot	Warren
Borah	La Follette	Sutherland	Weeks
Fall	Lane	Taggart	Works
Gore	Phelan	Thompson	
Husting	Pomerene	Townsend	
Johnson, S. Dak.	Shafroth	Walsh	

NOT VOTING—42.

Beckham	Fletcher	McLean	Smith, Mich.
Brady	Goff	Myers	Smith, S. C.
Bryan	Gronna	Norris	Stone
Burleigh	Harding	O'Gorman	Swanson
Catron	Hitchcock	Owen	Thomas
Clapp	Hollis	Page	Tillman
Clark, Wyo.	Hughes	Penrose	Underwood
Colt	Johnson, Me.	Pittman	Vardaman
Cummins	Kern	Robinson	Wadsworth
Dillingham	Lea, Tenn.	Sherman	
du Pont	McCumber	Smith, Md.	

So Mr. HARDWICK's amendment was agreed to.

Mr. LEE of Maryland. Mr. President, I offer the following amendment.

The SECRETARY. On page 11, line 13, after the word "Rivers," insert "up to the Bridge Street Bridge, Elkton," and in the same line, after the word "for," insert "continuing project and for," so as to read:

Elk and Little Elk Rivers up to the Bridge Street Bridge, Elkton, Md.: For continuing project and for maintenance, $8,500.

Mr. LEE of Maryland. Mr. President, this amendment does not enlarge the amount appropriated in any sense. It simply makes the application of it a little more elastic. On the 23d I received a letter from the general passenger agent of the Baltimore & Philadelphia Steamboat Co., in which he said:

We have a new steamer which we expect to run daily from Baltimore to Betterton and Elkton, Md., and return (also connecting with the Pennsylvania Railroad to points along their line), starting about the middle of June, but as the water is so shallow in the Elk Rivers up to the bridge at Elkton, Md., we have asked for an amendment to this bill.

In another place he says this project "will open up a new territory in Maryland for thousands of passengers during the summer months."

I hardly think I need add to that suggestion except to state that this amendment probably contemplates some contribution by the steamboat company or some other effort on their part to make the money go a little further. The amendment simply permits the project to be extended to the limits of the old original project or survey which took it to this bridge in Elkton, the place where most of the business is done, and it can certainly not be otherwise than in the public interest.

Mr. JONES. Let me ask the Senator what is there in the language of the bill now which limits it? It seems to me the amendment the Senator seeks to put in would make it restrictive.

Mr. LEE of Maryland. There is evidently some limitation that prevents the improvement up to the Bridge Street Bridge in Elkton.

Mr. JONES. What is there in the language of the bill which does that?

Mr. LEE of Maryland. I presume the limitation is in this bill or elsewhere.

Mr. JONES. Then does the Senator propose to make a new project?

Mr. LEE of Maryland. This makes the project slightly more elastic and it may make a larger project. I do not see that it lies in the mouth of any representative of the Government to object to it, if a large result can be obtained with the same money, by private contribution or otherwise.

Mr. JONES. Yes; but the Senator makes a new project now and then hereafter he will come for more money.

Mr. LEE of Maryland. This is really the old original project or survey to take this proposition up to the bridge.

Mr. JONES. It seems to me the language of the bill is broader than what the Senator has proposed, unless he desires to require the appropriation to be spent at some particular point.

Mr. LEE of Maryland. For some reason the language of the bill limits this improvement to a shorter distance than the old original survey, which I have here and which I will show the Senator if he would like to look at it.

Mr. JONES. What I object to is that we provide in this language that it is to be spent here.

Mr. SMOOT. This project is completed. The engineers so state in the report on page 110, under the heading "Present project":

Present project: This project was adopted by the river and harbor act of July 25, 1912, and aims to secure a channel 7 feet deep and 80 feet wide from deep water to a point about 1,200 feet above Cedar Point in the Elk River and 2,000 feet up the Little Elk River, at an estimated cost of $6,060. No estimate for maintenance. (H. Doc. No. 770, 62d Cong., 2d sess.) The mean range of tide in both streams is 2 feet.

Condition at the end of fiscal year: The project is completed.

So state the engineers. Mr. President, by adding this amendment to the bill it simply undertakes to enlarge a project without being reported upon by the engineers, and next year if it is adopted there will be an additional appropriation asked for the extension of this project claiming it was authorized by Congress this year. We are acting here without a report from the engineers on the extension of work provided for in the amendment offered by the Senator from Maryland.

As far as I am concerned, Mr. President, the Senate can vote upon this amendment now, but whether it goes in or whether it goes out I am going to offer an amendment to strike this item from the bill, and I shall give my reasons when I offer that amendment.

Mr. LEE of Maryland. Mr. President, this amendment is offered in perfect good faith at the instance of the navigation company that wants to run a steamer on this river; and it is perfectly obvious that the place to run the steamer is where it connects with the main stem of the Pennsylvania Railroad for the purpose of transferring passengers to the boat line which will carry them across the bay to Betterton on the other side of the Chesapeake.

Mr. President, as I read the report upon this subject, whereas this has been a completed project, nevertheless it is a project that requires dredging to keep it in existence.

It has in time filled up, and the navigation has been hampered, but it is entirely proper in the interests of general transportation that these rivers should be enlarged and dredged out for the purpose of helping transportation not only of freight but of passengers.

Mr. SMOOT. Mr. President, the Army engineers report that there was an unexpended balance on July 1, 1915, of $5,000, and then they recommend for the maintenance of the Elk and Little Elk Rivers an amount of $2,500. We find here in the bill an amount of $8,500; and now, if the amendment offered by the Senator from Maryland shall be adopted, we shall have entered upon a new project, and there is no telling what it will cost and no telling when it will be completed. Furthermore, there is no report from the engineers regarding it. If the Senate wants to do that in this bill, I want them to vote for it.

Mr. CLARKE of Arkansas. Mr. President, the amendment of the Senator from Maryland is a very much more interesting affair than the Senator from Utah thinks it is. It is simply a limitation of the locality within which the maintenance item of $8,500 is to be expended. It is a mere direction to limit what would otherwise be unlimited; that is to say, under the terms of the amendment the amount might be spent at any point within the limits of the river wherever the engineer might choose to spend it. The purpose of the amendment is to limit its expenditure to the point indicated in the amendment offered by the Senator from Maryland. There is not any possible foundation for the assumption that it is the introduction of a new problem, or that it commits the Government to anything except the expenditure of $8,500.

Mr. SMOOT. I should like to have the amendment again stated.

The SECRETARY. On page 11, line 13, the item reads:

Elk and Little Elk Rivers, Md.: For maintenance, $8,500.

It is proposed to add an amendment, so that it will read:

Elk and Little Elk Rivers up to Bridge Street Bridge, Elkton, Md.: For continuing project and for maintenance, $8,500.

Mr. SMOOT. If what the Senator from Arkansas has said is true, then there is no necessity for that amendment; but I understood the Senator from Maryland to say that this was to extend the project to the bridge, so that passengers and freight could be landed at a certain landing of the Pennsylvania Railroad. If that is so, it is an increase of the present project, which the engineers say is completed.

Mr. CLARKE of Arkansas. Mr. President, a project, in the sense of our legislation here, is a recommendation of the Board of Engineers setting out in detail what is to be done, how much it will cost, and all those things, but this is a mere maintenance item; it picks out a section of the river and directs that the money shall be expended there, whereas, if that limitation were not contained in the bill, the engineers would have the discretion to spend it anywhere within the limits of the river. It is a mere direction as to spending the money at a given point, and to that extent it limits the discretion of the engineers.

Mr. SMOOT. That is not what the Senator from Maryland says.

Mr. CLARKE of Arkansas. I do not know what the Senator thinks it will do, but that is exactly what it will do if the amendment is adopted.

Mr. SMOOT. Well, I will ask the Senator from Maryland to restate what he understands this amendment will give the engineers authority to do? Why does the Senator want this amendment? I should like to have him restate it.

Mr. LEE of Maryland. The survey, which I hold here in my hand, under date of January 17, 1912, brings this improvement up to this particular bridge, and it seems obvious that the improvement should go to the bridge. That is where the mills and the fertilizer works are and it is relatively near the station on the main stem of the Pennsylvania Railroad.

As I understand, this is not a project, but it is merely a maintenance item. It is certainly, from the standpoint of new work, not a project, but it is for the maintenance of old work.

Mr. SMOOT. Mr. President, then, why does the Senator put in his amendment the words "for continuing project and for maintenance"?

Mr. LEE of Maryland. I prefer to leave that to the engineer office, with whom I have consulted, and who considered that this is not an objectionable amendment. It merely extends the discretion of the experts.

Mr. SMOOT. It is not an objectionable amendment if we are going to continue the project; but the engineers say that the project is completed, and yet the item in the bill as reported to the Senate is "for maintenance, $8,500." There is no limitation.

Mr. LEE of Maryland. The whole project was completed years ago, but it has partially filled up and shoaled.

Mr. SMOOT. The item now in the bill is for maintenance and does not extend the project.

Mr. LEE of Maryland. I will be glad to show the Senator the map, which seems to have the original project in it, and which brings it to the very point mentioned.

Mr. CLARKE of Arkansas. Mr. President, if the Senator from Utah will modify the particular language so as to express the idea which I have stated, I think it will be all right.

Mr. SMOOT. I would not object at all to making the amendment read in this way:

Elk and Little Elk Rivers, Md., up to the Bridge Street Bridge, Elkton, Md.: For maintenance, $8,500.

The amendment proposed by the Senator from Maryland uses the words "for continuing project and for maintenance."

Mr. CLARKE of Arkansas. "Maintenance" will be sufficient, in my opinion.

Mr. LEE of Maryland. That is acceptable to me.

Mr. SMOOT. Very well.

The VICE PRESIDENT. The Secretary will state the amendment as modified.

The SECRETARY. It is proposed to modify the amendment by striking out the portion which reads:

Continuing project and for.

The VICE PRESIDENT. The question is on agreeing to the amendment as modified.

The amendment as modified was agreed to.

Mr. SMOOT. Mr. President, I now move to strike out lines 13 and 14 on page 11.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. It is proposed to strike out lines 13 and 14 as amended, as follows:

Elk River and Little Elk River, up to the Bridge Street Bridge, Elkton, Md.: For maintenance, $8,500.

Mr. SMOOT. Mr. President, at the bottom of page 110 of the report of the engineers it will be found that the engineers estimate the amount required for the year 1917 to be $2,500. This project has cost $110,668. The commerce for the year 1914 was 44,111 tons, but included in that amount were pulp wood, 42,472 tons; fertilizer, 1,600 tons; and all other merchandise, 25 tons.

Mr. KENYON. To what river is the Senator referring, I should like to ask?

Mr. SMOOT. The Elk and the Little Elk Rivers. Mr. President, this improvement is to be made for the benefit of a pulp-wood factory. That is the only establishment to use it to amount to anything; and it seems to me the Government of the United States ought to stop spending money the advantage of which accrues mostly to one business concern.

Mr. BORAH. Mr. President, where is this river situated?

Mr. SMOOT. In Maryland.

Mr. BORAH. How much does the Senator say the tonnage was besides wood pulp?

Mr. SMOOT. Merchandise, 25 tons.

Mr. BORAH. This is the Moose and the Little Moose River, is it?

Mr. SMOOT. Yes; although their official names are the Elk and the Little Elk Rivers. Col. W. T. Rossell says, in House Document 770, Sixty-second Congress, page 9:

> Cost of maintenance is large, and river must be classed as unworthy of improvement.

And yet we are appropriating $8,500 in this bill—$6,000 more than the engineers could possibly see any use for—for the purpose of encouraging the commerce on a river which now amounts to 25 tons, outside of that carried for a wood-pulp factory, located upon the river, and a small amount of fertilizer. If it is good business for the Government of the United States to continue appropriating money for maintaining a waterway to be used almost exclusively by a pulp-wood factory, this is as good a time as any to vote for such continuance.

It is for that reason, Mr. President, that I have moved that this item be stricken from the bill, and upon that I ask for the yeas and nays.

Mr. LEE of Maryland. Mr. President, before the roll is called I should like to make a brief statement. The amendment which I have offered, and which has been adopted, was offered at the request of a steamboat company that actually wishes to go to that wharf and proposes to carry some thousands of passengers to another point farther down the Chesapeake Bay. It was a perfectly bona fide request at the instance of the traffic manager of this steamboat company.

Mr. SMOOT. Is it to take passengers to a summer resort?

Mr. LEE of Maryland. It is for the transportation of passengers, and it does not make any difference whether to a summer resort or not. They are passengers intending to go from one point to another.

Mr. SMOOT. Of course there is nothing in the report to show that, but I will take the Senator's word for it.

Mr. LEE of Maryland. I simply have it upon the statement of the traffic manager of the company. I think it is just as good as is any other information.

Mr. President, I hold here in my hand the report of the Secretary of War, made May 23, 1912, on this river. He states that the total ingoing tonnage was 158,000 tons and that the outgoing shipments were 23,000 tons. That statement is found on page 7 of House Document No. 770.

Mr. SMOOT. Then the traffic has decreased in two years about 60 per cent?

Mr. LEE of Maryland. It is quite natural for the traffic to decrease if the shoaling has been permitted to become so marked that the facilities for transportation may have been lessened. That is just exactly what we are complaining about; that is just exactly what we desire to have corrected. We desire to have the channel so improved that it can be used by commerce. It is a perfectly legitimate request, made in a very proper way, by the transportation company which proposes to use this river.

There has been a survey made since the original estimate was made, and upon this new survey and the recommendation of the Chief of Engineer's Office, the present item, $8,500, is based.

The VICE PRESIDENT. The Senator from Utah [Mr. SMOOT] calls for the yeas and nays on his amendment. Is the demand seconded?

The yeas and nays were ordered, and the Secretary proceeded to call the roll.

Mr. CLAPP (when his name was called). I have a general pair with the senior Senator from North Carolina [Mr. SIMMONS]. Observing that he is absent, I withhold my vote.

Mr. HARDWICK (when his name was called). I desire to transfer my pair with the junior Senator from Kansas [Mr. CURTIS] to the junior Senator from South Carolina [Mr. SMITH] and to vote. I vote "nay."

Mr. OVERMAN (when his name was called). I announce my pair with the junior Senator from Wyoming [Mr. WARREN] and withhold my vote.

Mr. THOMAS (when his name was called). I again announce my pair and withhold my vote. If at liberty to vote, I would vote "yea."

Mr. THOMPSON (when his name was called). I have a general pair with the Senator from Illinois [Mr. SHERMAN]. Not knowing how he would vote if present, I withhold my vote.

The roll call was concluded.

Mr. CHAMBERLAIN. I have a general pair with the junior Senator from Pennsylvania [Mr. OLIVER]. In his absence I withhold my vote.

Mr. MYERS. I transfer my pair with the Senator from Connecticut [Mr. MCLEAN] to the Senator from New Jersey [Mr. HUGHES] and vote "nay."

Mr. CHAMBERLAIN. I transfer the pair which I have announced with the Senator from Pennsylvania [Mr. OLIVER] to the Senator from Nevada [Mr. PITTMAN] and vote "nay."

Mr. CUMMINS. I inquire, has the Senator from Mississippi [Mr. VARDAMAN] voted?

The VICE PRESIDENT. He has not.

Mr. CUMMINS. I have a pair with that Senator, and therefore withhold my vote.

Mr. SAULSBURY. Repeating the same announcement as to my pair and its transfer as before, I vote "nay."

Mr. CURTIS. I am requested to announce the following pairs:

The Senator from Maine [Mr. BURLEIGH] with the Senator from Arkansas [Mr. ROBINSON];

The Senator from Vermont [Mr. DILLINGHAM] with the Senator from Maryland [Mr. SMITH];

The Senator from West Virginia [Mr. GOFF] with the Senator from South Carolina [Mr. TILLMAN];

The Senator from North Dakota [Mr. GRONNA] with the Senator from Maine [Mr. JOHNSON];

The Senator from Ohio [Mr. HARDING] with the Senator from Alabama [Mr. UNDERWOOD]; and

The Senator from New York [Mr. WADSWORTH] with the Senator from New Hampshire [Mr. HOLLIS].

The result was announced—yeas 22, nays 34, as follows:

YEAS—22.

Borah	Husting	Norris	Townsend
Clark, Wyo.	Kenyon	Pomerene	Warren
Curtis	La Follette	Smoot	Weeks
Fall	Lane	Sterling	Works
Gallinger	Lippitt	Sutherland	
Gore	Lodge	Taggart	

NAYS—34.

Ashurst	Hardwick	Myers	Smith, Ariz.
Bankhead	Hitchcock	Nelson	Smith, Ga.
Brandegee	James	Oliver	Smith, Mich.
Broussard	Jones	Poindexter	Stone
Chamberlain	Lea, Tenn.	Ransdell	Swanson
Chilton	Lee, Md.	Saulsbury	Walsh
Clarke, Ark.	Lewis	Sheppard	Williams
Culberson	Martin, Va.	Shields	
Fletcher	Martine, N. J.	Simmons	

NOT VOTING—40.

Beckham	Goff	Newlands	Shafroth
Brady	Gronna	O'Gorman	Sherman
Bryan	Harding	Overman	Smith, Md.
Burleigh	Hollis	Owen	Smith, S. C.
Catron	Hughes	Page	Thomas
Clapp	Johnson, Me.	Penrose	Thompson
Colt	Johnson, S. Dak.	Phelan	Tillman
Cummins	Kern	Pittman	Underwood
Dillingham	McCumber	Reed	Vardaman
du Pont	McLean	Robinson	Wadsworth

So Mr. SMOOT's amendment was rejected.

Mr. STERLING. Mr. President, I offer the amendment which I send to the desk.

The VICE PRESIDENT. The amendment will be stated.

The SECRETARY. On page 37, at the end of line 15, in the item relating to the Missouri River, it is proposed to insert the following:

> In view of the existing emergency and to prevent further loss and destruction of property, the sum of $100,000 for bank revetment work or other improvement at or near the city of Vermilion, Clay County, S. Dak.: *Provided, however*, That before any work is undertaken by the United States assurances satisfactory to the Secretary of War shall be given that the said city of Vermilion, or county of Clay, or other agencies, will provide and contribute in money, labor, or materials, an amount equal to 33⅓ per cent of the amount herein appropriated for such improvement.

Mr. CLARKE of Arkansas. Mr. President, that amendment adds a new item that was not estimated for by the department nor recommended by any standing committee, and I shall have to make a point of order against it.

The VICE PRESIDENT. Has it been referred to the committee?

Mr. CLARKE of Arkansas. It has not been recommended by any committee.

Mr. STERLING. Mr. President, I should like to be heard briefly in regard to this amendment.

Mr. CLARKE of Arkansas. I shall be glad to hear the Senator. I will withdraw the point of order for the present so that the Senator can be heard.

Mr. STERLING. I did not think for a moment that a point of order could be made against this amendment. I did not think it necessary that it should have been estimated for or that the identical resolution I offered should have been considered by the committee before it could be offered here as an amendment to this bill. It seems to me that the course of business during all the day up to this time has indicated otherwise, and amendments have been offered here adding to this bill items of appropriation that are altogether new and that, so far as I know and as I now believe, were never before the Committee on Commerce for consideration and were never estimated for.

I should like to say a few words in explanation of this amendment and the facts leading up to its introduction.

The amendment was first introduced as an emergency joint resolution because of the deplorable condition caused by the Missouri River at the town of Vermilion, S. Dak., my own home town. The resolution was referred to the Committee on Commerce. A subcommittee was appointed to consider it. That subcommittee made no report to the full committee. I appeared before the subcommittee and briefly discussed the resolution. The resolution as then introduced did not provide for any contribution by the county, the city, or any other agency toward this work. It was a resolution appropriating outright $100,000 for the improvement. In the discussion of the matter with the subcommittee, the question was raised as to whether the city of Vermilion or the county of Clay might not contribute something to the improvement. I had not been advised by the people of that locality as to whether or not they would feel able to contribute. I had some correspondence, however, in that regard. I suggested 50 per cent of the amount of the appropriation as an amount that they possibly might contribute to this improvement. I received in reply word to the effect that it would be almost impossible to have $50,000 contributed by the people there to that improvement. It is a small community, a town of 2,500 inhabitants. Its inhabitants are for the most part people of very moderate means, and so are the farmers in that vicinity, whose lands will be affected by this improvement if it is made, and whose farms are now being destroyed by the ravages of the Missouri River at that place and carried, one after another, into the Missouri River.

I did not correspond further, but I took the responsibility here of drawing an amendment to this bill, in which I provided that the city or the county or any other agency shall contribute 33⅓ per cent of the amount appropriated by the amendment. If they do not contribute or furnish satisfactory assurances to the Secretary of War that that amount, $33,333, will be contributed by the community in labor, in money, or in materials, then the Government is not out anything at all and this appropriation will not be available for use in that improvement.

Now, a word in regard to the exigencies of the case—and I should like to know in the outstart why this appropriation should be opposed, in view of what has been done in the improvement of the Missouri River at various points and places since 1879, and clear up to Fort Benton, the head of navigation, in the years past. I call attention to a brief summary of the expenditures for the various improvements.

At Fort Benton, the head of navigation, from 1900 to 1909, $8,750.

Judith, Mont., 1910, $8,000.

Williston, N. Dak., 1908–9, 1909–10, $22,122.

Expansion, N. Dak., 1910, $3,000.

Deapolis, N. Dak., 1910, $3,000.

Bismarck, N. Dak., from 1895 to 1908, a total of $116,464 spent in dike and revetment work at that one place; and in none of these instances, Mr. President, has there been a contribution upon the part of the locality of one dollar to the improvements I have mentioned here.

At Pierre, S. Dak., from 1896 to 1909, the sum of $86,712 has been expended. That is aside from repairs. Repairs on revetment work and dike work have been $14,800 at that place. Then, in addition to that, improvements to the extent of $20,000 were made by the Chicago & Northwestern Railway by the building of dikes in the river near its line at Pierre.

At Yankton, S. Dak., from 1897 to 1903, $42,041 has been expended. Not one cent has been contributed by the locality to the improvement. The city of Yankton is just 26 miles above Vermilion, my own home town, on the river. Elk Point is 15 miles below. I should like to call the attention of the Senate to some of the expenditures at Elk Point. They have ranged, as follows, for various years prior to 1911: $14,557, $18,556, $10,736, $11,169, making a total of $55,018. Then, in addition, $2,041 has been appropriated for repairs, making a total there of $57,059. But in addition to that is the appropriation in 1913 of $75,000 for improvement at this one place of Elk Point, 15 miles below my own home town, and the place for which I ask this appropriation. Seventy-five thousand dollars was spent there; and, Mr. President, the condition at Vermilion, as it has existed for the last three years, has been worse than at any place I have named here for which appropriations in large sums have been made. Never at Elk Point, where this grand total of $132,000 has been spent in revetment and in dike work, has there been a contribution of a single dollar. All of it has been done by the Government; and here, now, when I come asking for this, in comparison, modest appropriation of $100,000, with a contribution on the part of the people of my locality of one-third of that amount, I am met with the objection that there has been no estimate for it, and that it has not been considered by the committee.

Mr. BRANDEGEE. Mr. President——

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from Connecticut?

Mr. STERLING. I yield.

Mr. BRANDEGEE. I wanted to suggest to the Senator, right in connection with his reference to the point of order made by the Senator from Arkansas [Mr. CLARKE], that I do not think the point of order can be made to an item in the river and harbor bill on the ground stated, for the reason that clause 2 of Rule XVI, as will appear on page 18 of the Manual, after referring to general appropriation bills, provides:

> In like manner, amendments proposing new items of appropriation to river and harbor bills shall, before being considered, be referred to the Committee on Commerce.

Which contemplates a different method of procedure; and I do not think the rule as to estimates on general appropriation bills has any reference to a river and harbor bill. I think all that is necessary is that this amendment should have been referred to the committee, which, I understand, was done.

Mr. STERLING. I am much obliged to the Senator. That was the idea that I had myself, in view of the actual course of business here and the manner in which various amendments have been submitted to-day, rather than from any special knowledge of the rules. But I simply ask the question now, Mr. President, in view of what has transpired, and the relief that has been afforded to these other localities, whether I have not in this proposed amendment presented a just claim for the consideration of the Senate?

The Senator from Arkansas may ask the question why I ask for an appropriation of $100,000 with this additional amount to be contributed by the locality. A sentence from a letter written by the Secretary of War will show that. The resolution was referred to the Secretary of War. He reported adversely, I suppose after consultation with the Army engineers. This is what he says. I quote from his letter of March 25——

Mr. CLARKE of Arkansas. Mr. President——

The VICE PRESIDENT. Does the Senator from South Dakota yield to the Senator from Arkansas?

Mr. STERLING. I do.

Mr. CLARKE of Arkansas. I have expressed no opinion about the merits of the Senator's proposition, nor have I manifested any disposition to antagonize it. The rules of the Senate permit him to submit that matter in the form of a separate bill at any time he may see proper to do so. The rules for the preparation of appropriation bills contain certain limitations which are found to be necessary in order to keep the bills within any reasonable limits. In invoking them, we do not assume to pass upon the merits of the proposition; but, as the Senator suggests, they ought to be uniformly enforced if they are enforced at all, and that is always my habit. I made no exception in the case of the Georgia item, for the reason that it was a mere maintenance item, and there are no special limitations on items of that kind. The same thing is true of the Maryland item. But I am going to withdraw the point of order, and submit the matter to the Senate, so far as I am concerned; and if the Senate sees proper to add the item to the bill, it is entirely agreeable to me.

The committee had the matter under consideration and we thought the best disposition we could make of it would be to increase the lump-sum appropriation for that river and provide that an additional $25,000 might be expended for bank revetment. We did not overlook it, but we made the only disposition of it that we felt to be within our power.

I withdraw the point of order, Mr. President.

Mr. STERLING. As I had occasion to say the other day when discussing this committee amendment increasing the appropriation $25,000, it was a small favor to be thankfully received, but as I endeavored to point out there are at least three

other places within 50 miles of Sioux City where more than $75,000——

Mr. CLARKE of Arkansas. Because the committee has been liberal in appropriations at other points it does not follow that on every occasion when a Senator sees proper to make a request that it should be granted. We think we made ample provision for your locality.

Mr. STERLING. There has not been any ample provision made, as I will show by this quotation from the letter of the Secretary of War. They will need much of the amount of that increase at the town of Jefferson, about 25 miles southeast of Vermilion, and could use it now, or at the city of Elkpoint, 15 miles below Vermilion. There is $75,000 for revetment work for the whole stretch of the river from Sioux City to Fort Benton.

That is a distance of 1,477 miles. But this is from the letter of the Secretary. Referring to the situation at Vermilion he says:

> The protection of the bank in question would be of little, if any, benefit to navigation on the river, or to any other interest for which the Federal Government usually appropriates funds. The principal benefit would accrue to the private lands protected. It is probable that the amount carried by the joint resolution would not be more than half enough to do the work necessary for permanent relief.

The amount carried in the joint resolution was $100,000. I have added thirty-three and one-third thousand dollars as a contribution by the locality. I believe that $133,000 will do the work and make the permanent improvement that will afford protection.

Now, just a word to show the need. In 1881 there occurred what was called the great flood along the Missouri River, caused by an ice gorge below the city of Yankton, which flooded the whole valley from there to Sioux City. It practically destroyed the city of Vermilion, which was then all on the bottom land. The flood wrecked a very fine fleet of 12 steamboats at the wharves up at Yankton, 26 miles away. After the flood Vermilion was rebuilt, but instead of being rebuilt on bottom land as before the new city of Vermilion was built, for the most part, on the high plateau above, beyond the reach of river floods. It is all on the plateau save elevators, warehouses, the depot, and a few other buildings. There are no stores, however, and there are very few town residences on the bottom land near the station.

After the flood of 1881 instead of the channel of the Missouri River coming in right at Vermilion where the boats had formerly tied up at the town of Vermilion, it was 2½ or 3 miles away over against the Nebraska hills. That is where the channel then was, but that channel is now by erosion working its way back and is to-day within 300 feet of the old channel. When it works its way across that narrow neck of land we can imagine the havoc that will be created at high-water time in the destruction of railroad property and in the destruction of warehouse and elevator property at the city of Vermilion.

All this is supported by the affidavits of residents of the city of Vermilion by affidavits of farmers whose farms have been washed one after another into the river there—rich, alluvial land worth but for menace of the river $150 to $200 an acre—the finest farm land in South Dakota.

These facts were shown by the affidavits of the mayor of the town, two bankers of the town, and three or four farmers, showing that the channel now has worked its way back, destroying all this valuable land in its course, and is within the distance I have named of the old channel. So I felt justified in introducing this emergency amendment, and it ought to have been considered by the Senate before this time and adopted in order that we might have this necessary relief.

Mr. President, I have not tried to disguise this amendment by saying in the formal way used often in items of this kind that the Board of Engineers will expend the money as the engineers may see fit "in the interest of navigation." I have not used any such disguise in this amendment. Primarily I admit it is not in the interest of navigation, but it is for protection against the ravages of a great river, a navigable river of the United States forming the boundary between two great States of the Union at that place. That is what we are asking for. Has it any relation to navigation farther down the river? It is estimated that over 780,000,000 tons of sediment are carried into the Mississippi River from its upper waters and its various tributaries. Four hundred million tons of that sediment are emptied into the Mississippi by the Missouri River alone. What does it do? It obstructs the commerce to benefit which you are asking appropriations. It aggravates floods for the prevention of which you are making appropriations, and it vastly increases, of course, the aggregate of those appropriations. That tremendous amount of sediment which is carried down into the lower Mississippi River from the upper Missouri River impedes commerce, helps to swell the flood, and so in that regard this proposed improvement is in the interest of navigation. Every piece of successful revetment work along the banks of the upper Missouri River is to that extent in the interest of navigation between Sioux City and Kansas City and between Kansas City and the mouth of the Missouri, and even down to the mouth of the Mississippi. It is not remote at all from the general interest of navigation on these great water highways.

Mr. President, I think, in view of the history of the past in regard to these appropriations, in view of our actual deplorable condition to-day there at my own home city, and in view, too, of the fact that it is really in the interest of navigation this amendment ought to prevail.

Mr. THOMAS. Mr. President, in view of the fact that we shall be obliged to take care of the Elk River and the Little Elk River, in view of the fact that the Trinity River enterprise needs a great deal of money to make it perfect, in view of the number of other very important streams, not excepting the Ocmulgee and Oconee Rivers, I do not think that the Government can afford very well now to take care of the farmers of South Dakota, and consequently I am reluctantly compelled to renew the point of order that was made by the chairman of the committee against the amendment.

Mr. STERLING. Mr. President, of course I have nothing to say, but that I regret it, and I regard as absolutely uncalled for the position of the Senator from Colorado in view of the facts that I have presented.

Mr. THOMAS. The facts appeal very strongly to me, but we can have too many things, certainly many of the meritorious things, in this measure. So I must insist on the point of order.

The VICE PRESIDENT. The Chair has no doubt about the duty of the Chair to sustain the point of order.

Mr. POINDEXTER. I submit the following amendment: At the end of the bill insert——

Mr. CLARKE of Arkansas. Are we through with amendments to the House text? I think when we reach that point it ought to be announced, so that we shall not be compelled to go back.

Mr. SMOOT. I have an amendment to offer to the House text of the bill.

The VICE PRESIDENT. The Chair will state to the Senator from Washington [Mr. POINDEXTER] that his amendment is not yet in order.

Mr. SMOOT. On page 11 I move to strike out lines 15, 16, 17, and 18, in the following words:

> Nanticoke River, Del. and Md.: For maintenance of improvement of Nanticoke River and Northwest Fork of Nanticoke River (Marshy Hope Creek), Md., $5,000.

The VICE PRESIDENT. The question is on agreeing to the amendment submitted by the Senator from Utah.

Mr. SMOOT. Mr. President, this project is 2 miles long. The Army engineers report that it is completed, and that the 2 miles have cost the Government of the United States $21,216 up to date. The total appropriations for the preceding five years on this project have been only $1,806.19, and now we are asked to appropriate $5,000 to be expended upon this project for the coming year of 1917. Three times the amount that has been appropriated for the project during the last five years is to be expended upon this project, which is reported as completed.

The Army engineers admit that the improvement has had no effect upon water rates. They admit that the railroad rates and the water rates are exactly the same. It has not helped commerce one particle, if one can call the amount that is carried on the river "commerce."

I wish to say to the Senate now that this is a project to assist a canning factory located upon the river. The commerce for 1914 amounted to 13,039 tons, of which 4,335 tons were empty cans, while 1,136 tons were cordwood, and 1,867 tons were lumber.

This project has been consolidated with 5¼ miles of Marshy Hope Creek. Both projects combined have cost the Government of the United States $48,343.

If Congress is to appropriate money for the improvement and maintenance of this river, mainly, I will say at least for a canning factory, it seems to me the canning factory ought to cooperate with the Government in maintaining the stream.

I can not see any harm that will come to the commerce or to the Government of the United States or anybody else outside of the canning factory if we strike out the appropriation, and it is for that reason that I have moved that this item be stricken from the bill.

The PRESIDING OFFICER (Mr. POMERENE in the chair). The question is on agreeing to the amendment submitted by the Senator from Utah.

Mr. SMOOT. On that I ask for the yeas and nays.

The yeas and nays were ordered.

Mr. SHEPPARD. Let the amendment be stated.

The SECRETARY. On page 11, strike out lines 15, 16, 17, and 18, in the following words:

Nanticoke River, Del. and Md.: For maintenance of improvement of Nanticoke River and Northwest Fork of Nanticoke River (Marshy Hope Creek), Md., $5,000.

The PRESIDING OFFICER. The Secretary will call the roll on agreeing to the amendment of the Senator from Utah.

The Secretary proceeded to call the roll.

Mr. HARDWICK (when his name was called). I transfer my pair with the Senator from Kansas [Mr. CURTIS] to the Senator from South Carolina [Mr. SMITH] and vote. I vote "nay."

Mr. MYERS (when his name was called). Making the same announcement as heretofore of the transfer of my pair, I vote "nay."

Mr. SAULSBURY (when his name was called). I transfer my pair, as stated heretofore, to the junior Senator from New Jersey [Mr. HUGHES] and vote "nay."

Mr. THOMAS (when his name was called). I transfer my pair with the senior Senator from North Dakota [Mr. MCCUMBER] to the junior Senator from South Dakota [Mr. JOHNSON] and vote "yea."

Mr. THOMPSON (when his name was called). I am paired with the Senator from Illinois [Mr. SHERMAN] and in his absence withhold my vote.

Mr. UNDERWOOD (when his name was called). I transfer my pair with the junior Senator from Ohio [Mr. HARDING] to the junior Senator from California [Mr. PHELAN] and vote "nay."

The roll call was concluded.

Mr. TILLMAN. I have a pair with the Senator from West Virginia [Mr. GOFF], and in his absence I withhold my vote. I wish this announcement to stand for the day.

Mr. CATRON. I am paired with the Senator from Oklahoma [Mr. OWEN]. In his absence I withhold my vote.

Mr. LODGE (after having voted in the affirmative). I observe that the Senator from Georgia [Mr. SMITH] has not voted.

The PRESIDING OFFICER. He has not voted.

Mr. LODGE. I have a pair with that Senator. I therefore withdraw my vote.

The result was announced—yeas 19, nays 31, as follows:

YEAS—19.

Ashurst	Gallinger	Lippitt	Thomas
Borah	Gore	Norris	Townsend
Brandegee	Husting	Smoot	Warren
Clark, Wyo.	Kenyon	Sterling	Weeks
Fall	Lane	Sutherland	

NAYS—31.

Bankhead	Lea, Tenn.	Pittman	Simmons
Broussard	Lewis	Poindexter	Smith, Ariz.
Chilton	Martin, Va.	Pomerene	Smith, Mich.
Clarke, Ark.	Martine, N. J.	Ransdell	Swanson
Culberson	Myers	Reed	Underwood
Hardwick	Nelson	Saulsbury	Walsh
James	Oliver	Sheppard	Williams
Jones	Overman	Shields	

NOT VOTING—46.

Beckham	Fletcher	Lodge	Smith, Ga.
Brady	Goff	McCumber	Smith, Md.
Bryan	Gronna	McLean	Smith, S. C.
Burleigh	Harding	Newlands	Stone
Catron	Hitchcock	O'Gorman	Taggart
Chamberlain	Hollis	Owen	Thompson
Clapp	Hughes	Page	Tillman
Colt	Johnson, Me.	Penrose	Vardaman
Cummins	Johnson, S. Dak.	Phelan	Wadsworth
Curtis	Kern	Robinson	Works
Dillingham	La Follette	Shafroth	
du Pont	Lee, Md.	Sherman	

So Mr. SMOOT's amendment was rejected.

Mr. SMOOT. It is quite evident to me, Mr. President, that it is impossible to secure a favorable vote from the Senate upon striking from the bill any item. The items that I have moved to strike out should, in my judgment, never have been in the bill. I do not see how they can be justified.

There are about 50 other projects in the bill that I have proposed to move to strike out, but it would take a great deal of time to discuss them. I have not any doubt but that the result of the vote would be about the same as the votes that have already been taken. I am not going to take the time of the Senate to offer any more amendments and ask for a yea-and-nay vote upon them. It is perfectly useless.

I will, however, simply for the RECORD, with no explanation, name some of the items that I intended to speak upon. They are such projects as the Sarasota Bay, St. Petersburg Harbor, Hillsboro Bay, Apalachicola Bay, St. Johns, St. Johns—Palatka to Lake Harney—Virginia waterway, Meherrin River, Fishing Creek, Bay River, Swift Creek. It would be rather interesting to the Senate, I think, if I would stop and refer to that project. I can assure you they are "going some" when they ask for an appropriation for Swift Creek. Other projects are Cape Fear above Wilmington, Cape Fear below Wilmington, Flint River, James River, Rehoboth Bay waterway, and there are a great many others.

As far as I am concerned I shall offer no more amendments to the text of the House bill. I shall wait until some future time to continue this fight against appropriating Government money for so-called navigable creeks in this reckless way. The end of such appropriations is in sight. The American people will not stand it.

Mr. CLARKE of Arkansas. Unless some other Senator has an amendment of that character to offer that order of business is closed.

Mr. KENYON. It is not closed just yet.

Mr. CLARKE of Arkansas. I said if no other Senator had an amendment to offer. I did not undertake to close it.

Mr. KENYON. Mr. President, I have a number of amendments, on which I shall not ask for any more votes by a roll call, because it is quite apparent what the sentiment of the Senate is as to individual projects in various parts of the country. But in trying a lawsuit I have always discovered that when you have a packed jury the only thing to do is to make a record for some other court, and I feel as a distinguished Congressman from Missouri once said in the House, that he would appeal the case to another forum. I am perfectly willing that these amendments that I have offered shall just be declared defeated, without any further time being taken.

I move to strike out, on page 15, beginning in line 6 with the word "completing," the following:

Completing construction of the lock in Dam No. 4 and completing construction of Dam No. 5, in the State of Alabama, $30,000.

The PRESIDING OFFICER (Mr. MARTINE of New Jersey in the chair). The question is on agreeing to the amendment proposed by the Senator from Iowa.

The amendment was rejected.

Mr. KENYON. On page 14, line 8, in the item for the Santee, Wateree, and Congaree Rivers, S. C., I move to strike out "$55,000" and insert "$15,000."

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Iowa.

The amendment was rejected.

Mr. KENYON. On page 14, line 19, in the item for the Altamaha, Oconee, and Ocmulgee Rivers, Ga., I move to strike out "$53,000" and insert "$40,000," that being the amount the Army engineers allotted last year.

The PRESIDING OFFICER. The Chair is informed that that sum was increased to $78,000 by a vote of the Senate this morning.

Mr. KENYON. Only $78,000! I suppose my motion therefore is not in order——

Mr. CLARKE of Arkansas. No; it is not in order without a reconsideration of the former action of the Senate.

Mr. KENYON. Because instead of being reduced it has been increased.

Mr. SMOOT. I will state to the Senator that I moved to strike out the whole item, and I think the proposition to strike out received some twenty-odd votes.

Mr. KENYON. I withdraw that amendment.

The PRESIDING OFFICER. The Senator from Iowa withdraws the amendment.

Mr. KENYON. On page 28, I move to strike out the entire item providing $5,000,000 for the improvement of the Ohio River, which proposition has been discussed here. It is contained in lines 1, 2, and 3, on page 28.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Iowa.

The amendment was rejected.

Mr. KENYON. At the close of line 3, on page 28, I offer the amendment which I send to the desk and ask that the Secretary read it.

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. On page 28, line 3, after the numerals "$5,000,000" and before the period, it is proposed to insert the following proviso:

Provided, That one-half of this appropriation shall be available whenever there shall be contributed by the State, county, cities, locality or localities interested, an amount equal to one-half of such appropriation, which amount when so raised shall be placed to the order of the Secretary of War, and shall be expended by him pursuant to the report of the United States engineers on such project: *Provided further*, That the remaining one-half of such appropriation shall be retained in the Treasury, subject to the order of the Secretary of War, and to be used by him whenever needed in the completion of the project for which such appropriation is made.

The PRESIDING OFFICER. The question is on the amendment of the Senator from Iowa.

The amendment was rejected.

Mr. KENYON. I am almost inclined to ask for the yeas and nays on the amendment, but I shall not do so. Now, on page 37, line 5, relating to the Missouri River, I move to strike out "$1,500,000" and to insert "$150,000."

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Iowa.

The amendment was rejected.

Mr. KENYON. I offer an amendment to come in at the end of line 5, on page 37, which I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from Iowa will be stated.

The SECRETARY. On page 37, line 5, after the numerals "$1,500,000," and before the period, it is proposed to insert the following proviso:

Provided, That one-half of this appropriation shall be available whenever there shall be contributed by the State, county, cities, locality, or localities interested an amount equal to one-half of such appropriation, which amount, when so raised, shall be placed to the order of the Secretary of War and shall be expended by him pursuant to the report of the United States engineers on such project: *Provided further*, That the remaining one-half of such appropriation shall be retained in the Treasury, subject to the order of the Secretary of War, and to be used by him whenever needed in the completion of the project for which such appropriation is made.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Iowa.

The amendment was rejected.

Mr. KENYON. Mr. President, I desire to make a parliamentary inquiry. Will a substitute for the entire bill be in order after amendments proposed by individual Senators as to different provisions of the bill are disposed of, or must that substitute be offered at this time?

Mr. CLARKE of Arkansas. The substitute will be in order after the bill has been perfected as its friends desire that it shall be perfected.

The PRESIDING OFFICER. The bill is still before the Senate, as in Committee of the Whole, and open to amendment.

Mr. BRANDEGEE. Mr. President——

Mr. CLARKE of Arkansas. Mr. President, does that close all amendments to the House text that are proposed to be offered?

The PRESIDING OFFICER. The Chair so understands.

Mr. WEEKS obtained the floor.

Mr. SMOOT. Mr. President——

The PRESIDING OFFICER. Does the Senator from Massachusetts yield to the Senator from Utah?

Mr. SMOOT. If the Senator will yield to me for a moment, in order to fulfill a promise I made when this stage of the bill was reached, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Secretary will call the roll.

The Secretary called the roll, and the following Senators answered to their names:

Ashurst	Hardwick	Martine, N. J.	Shields
Bankhead	Hitchcock	Myers	Simmons
Beckham	Hollis	Nelson	Smith, Ariz.
Borah	Hughes	Norris	Smoot
Brandegee	Husting	Overman	Taggart
Broussard	James	Phelan	Thomas
Chamberlain	Johnson, S. Dak.	Pittman	Thompson
Chilton	Jones	Poindexter	Underwood
Clapp	Kenyon	Pomerene	Walsh
Culberson	La Follette	Ransdell	Warren
Curtis	Lane	Saulsbury	Weeks
Fletcher	Lea, Tenn.	Shafroth	Williams
Gallinger	Lodge	Sheppard	

Mr. RANSDELL. I am requested to announce the unavoidable absence of the Senator from Mississippi [Mr. VARDAMAN] on departmental business.

The PRESIDING OFFICER. Fifty-one Senators have responded to the roll call. A quorum is present. The Senator from Massachusetts will proceed.

Mr. WEEKS. Mr. President, I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from Massachusetts will be stated.

The SECRETARY. After section 4 it is proposed to insert the following:

That the sum of $200,000 be, and is hereby, appropriated, to be paid out of any money in the Treasury not otherwise appropriated, to be made immediately available and to be expended under the direction of the Secretary of War and the supervision of the Chief of Engineers, for the improvement of Weymouth Fore River, Mass., and the removal of the small shoal south of the west end of Peddocks Island, in accordance with the report submitted in Senate Committee Document No. 13, Sixty-third Congress, third session.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Massachusetts [Mr. WEEKS].

Mr. CLARKE of Arkansas. Mr. President, I want to say a word about that amendment. The amendment was submitted in regular course to the Committee on Commerce, and its merits were somewhat thoroughly investigated. The technical steps necessary to render it eligible to be added to this bill have been taken. There is no objection, therefore, of a technical character to the amendment; nor is there an objection as to the merits of the proposition. The committee were deterred from adding the item to the bill because the bill had already grown to such proportions that we felt that we had passed the limit, or, certainly, had reached the limit where we thought we could take the responsibility of suggesting any further increases. We believed it to be the better policy to submit the matter to the Senate, and I do so now.

The only objection that I see to the amendment is that the bill is already large enough; but if the Senate shall take a different view of it, it will be within its province when it shall do so.

The PRESIDING OFFICER. The question is on the amendment offered by the Senator from Massachusetts [Mr. WEEKS].

The amendment was agreed to.

Mr. BRANDEGEE and Mr. SHAFROTH addressed the Chair.

The PRESIDING OFFICER. The Chair will first recognize the Senator from Connecticut.

Mr. BRANDEGEE. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment proposed by the Senator from Connecticut will be stated.

The SECRETARY. On page 3, after line 16, it is proposed to insert the following:

For dredging an anchorage basin in the harbor of refuge at Duck Island, Conn., $71,000, in accordance with the provisions and recommendations contained in House Document No. 812, Sixty-fourth Congress, first session.

The PRESIDING OFFICER. The question is on the amendment proposed by the Senator from Connecticut.

The amendment was agreed to.

Mr. BRANDEGEE. Mr. President, in connection with that amendment, I should like to have printed in the RECORD a brief report of the Chief of Engineers explaining its merits. There are other reports in the document which I will send to the desk, but I only ask that the first report of the Chief of Engineers be printed.

The PRESIDING OFFICER. Without objection, that course will be pursued.

The report referred to is as follows:

WAR DEPARTMENT,
OFFICE OF THE CHIEF OF ENGINEERS,
Washington, February 24, 1915.

From: The Chief of Engineers, United States Army.
To: The Secretary of War.
Subject: Preliminary examination and survey of Duck Island Harbor of Refuge, Conn.

1. There are submitted herewith, for transmission to Congress, reports dated May 17 and December 21, 1915, with map, by Maj. G. B. Pillsbury, Corps of Engineers, on preliminary examination and survey, respectively, authorized by the river and harbor act approved March 4, 1915, of harbor of refuge at Duck Island, Conn.

2. Duck Island Harbor is a small bay on the north side of Long Island Sound, nearly midway between New London and New Haven Harbors. The present project for the improvement of this locality, adopted in 1910, provides for the construction of three breakwaters, one extending northwardly from Duck Island 1,100 feet, one extending westwardly from Duck Island 2,697 feet, and one extending southwardly from Stone Island near Kelsey Point, 3,750 feet. The project has been completed. The total expenditure to June 30, 1915, amounts to $416,242.28. The original depth in the sheltered area behind Duck Island was 16 feet, but since the construction of the breakwaters this area has gradually shoaled, until the depth has been reduced to a minimum of 9 feet. The district officer submits estimates for restoring the original depth of 16 feet, amounting to $71,000, and also for providing a depth of 18 feet, amounting to $93,000. The harbor has been used extensively as a refuge, and at present about 1,000 vessels seek shelter there annually. The district officer is of opinion that the further improvement of the harbor is advisable to the extent of dredging and maintaining an anchorage basin 18 feet in depth, and the division engineer concurs in this opinion.

3. These reports have been referred, as required by law, to the Board of Engineers for Rivers and Harbors, and attention is invited to its report herewith dated January 19, 1916. The board concurs in general with the views of the district officer and division engineer, but for reasons stated recommends the lesser project of 16 feet at mean low water, at an estimated cost of $71,000.

4. After due consideration of the above-mentioned reports, I concur in the views of the Board of Engineers for Rivers and Harbors, and therefore report that the further improvement of Duck Island Harbor, Conn., is deemed advisable to the extent of providing a depth of 16 feet at mean low water, approximately as indicated on the accompanying map, at an estimated cost of $71,000 for first construction and $25,000 every five years for maintenance. The entire first cost of the improvement should be provided in one appropriation.

DAN C. KINGMAN,
Chief of Engineers, United States Army.

Mr. SHAFROTH. Mr. President, I desire to present an amendment.

Mr. CLARKE of Arkansas. Will the Senator from Colorado allow me to offer a few formal amendments before he proceeds?

Mr. SHAFROTH. Very well; I will withhold my amendment.

Mr. CLARKE of Arkansas. On page 32, as an additional proviso to the Illinois River item, I offer the amendment which I send to the desk. I will state, in that connection, that it is offered at the instance of the Chief of Engineers. The matter has been submitted to both Senators from the State of Illinois, and in its present form it is acceptable to them.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. Following the amendment heretofore agreed to, on page 32, line 2, it is proposed to insert the following proviso:

Provided, That the improvement may be made in general accordance with the plans heretofore submitted to the Chief of Engineers and the Secretary of War, and subject to their approval, or on such modified plans as may be approved by the Chief of Engineers and the Secretary of War: *Provided further*, That the waterway shall be completed and open for navigation before any of the water now being, or hereafter to be, diverted from Lake Michigan shall be used for the development of power: *Provided further*, That the navigation features of the waterway and its appurtenances shall be operated and maintained in a manner satisfactory to the Chief of Engineers and the Secretary of War, and any repairs or maintenance work that may be directed by the Secretary of War on the recommendation of the Chief of Engineers shall be made within the time specified by him: *Provided further*, That when, under the terms of the act of the State of Illinois, the waterway shall be transferred to the United States for navigation purposes, the United States shall be given a clear title to such land as may be occupied or used in connection with the locks and various appurtenances necessary for the operation of the waterway for navigation, together with all structures thereon: *Provided further*, That nothing herein contained shall be held to prejudice or affect any rights the United States may have in the Illinois and Michigan Canal, or lands appurtenant thereto, or in any claims against the State of Illinois arising out of any failure upon the part of the State to maintain said canal as a navigable waterway.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. CLARKE of Arkansas. I offer an additional amendment, which has passed through the regular stages to make it proper at this time, and when the Secretary reads it I shall make a very brief statement about it.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. It is proposed to add a new section, as follows:

SEC. —. That the Secretary of War be, and he is hereby, authorized to accept for and on behalf of the United States, with thanks to the donors, funds raised or to be raised by the New York World by popular subscription for the construction of an electric lighting plant adequate for the illumination of the Statue of Liberty on Bedloes Island, New York Harbor, with the understanding that the funds will be applied to the purpose for which donated, and that the lighting plant, after construction, will be maintained at the expense of the United States.

Mr. CLARKE of Arkansas. Mr. President, some years ago the people of France generously gave to the people of the United States what is known as Bartholdi's Statue, which was erected at the entrance of New York Harbor. It has become one of the conspicuous testimonials of our national pride and of our gratitude to a people whose kindred sympathies prompted them, as the people and not as the nation, to make so substantial a contribution to our national pride and patriotic spirit. The lighting of the monument at night is easily a patriotic, national duty and a fair expression of our appreciation of the remembrance. The New York World has now raised an additional subscription sufficient to erect the necessary electric-lighting plant, and the purpose of this amendment is to accept this additional donation, and to assume the further responsibility of defraying the expenses of properly lighting the monument, after the plant has been completed and turned over to the United States. It provides for no additional appropriation at this time, but leaves that for further legislative treatment, accordingly, as its extent may hereafter be found necessary. I think the amendment ought to be adopted.

Mr. JONES. Mr. President, I am in hearty accord with the amendment. Personally, I would prefer to see the Government put up the money itself to provide for the lighting plant, which is something that ought to be done; but if we have not seen fit to do it, I am glad that somebody has donated the plant to us. We certainly ought to maintain it after it is given to us.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arkansas.

The amendment was agreed to.

Mr. SHAFROTH obtained the floor.

Mr. RANSDELL. Mr. President, I will ask the Senator from Colorado to yield to me to offer a formal amendment before submitting the amendment which he intends to offer.

Mr. SHAFROTH. Does it have the concurrence of the committee?

Mr. RANSDELL. Yes, sir.

Mr. SHAFROTH. Very well.

Mr. RANSDELL. In behalf of the Senator from Maryland [Mr. SMITH], I introduce an amendment providing for a survey of the Elk River in Maryland.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 46, after line 22, it is proposed to insert:

Elk River, Md.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Louisiana.

Mr. THOMAS. Mr. President, I should like some information about the amendment which has just been offered.

Mr. RANSDELL. It provides for a survey of the Elk River in Maryland. I offer the amendment, as I have stated, on behalf of the Senator from Maryland [Mr. SMITH].

Mr. THOMAS. It relates to an item which was opposed by the Senator from Utah [Mr. SMOOT], and I ask to have it go over until the Senator from Utah returns to the Chamber.

Mr. CLARKE of Arkansas. Let me request of the Senator from Colorado not to insist upon that. It is simply to reinvestigate the very situation which has been pointed out by the Senator from Utah. It will not cost the Government a cent. There is a regular corps of officers engaged in this kind of work.

Mr. THOMAS. I have no interest in it one way or the other, but I think it is only fair to the Senator from Utah that he should be present when the amendment is considered.

Mr. CLARKE of Arkansas. Let it go in the bill, with the reservation that if the Senator from Utah comes in and objects to it we will take it up again.

Mr. THOMAS. Very well. With that understanding, I shall not object to the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment proposed by the Senator from Louisiana [Mr. RANSDELL].

The amendment was agreed to.

Mr. NELSON. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Minnesota?

Mr. SHAFROTH. I will yield to the Senator if what he desires to offer leads to no debate.

Mr. NELSON. I offer an amendment relating to a survey of the upper Mississippi River.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 54, after line 3, it is proposed to insert the following:

Mississippi River, near Deer River, Minn., with a view to the construction of a new channel, beginning in or near lot 1 of section 24, township 144 north, range 25 west of fifth principal meridian, thence southerly and terminating in or near section 22, township 55 north, range 27 west of the fourth principal meridian, the termini and course of said channel to be determined with greater particularity by the Chief of Engineers, United States Army, the purpose of said new channel being to improve navigation, to enable a more perfect control of waters by Pokegama Dam.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Minnesota.

The amendment was agreed to.

Mr. CLAPP. Mr. President, will the Senator from Colorado yield to me to offer an amendment? It is a survey item.

Mr. SHAFROTH. I will yield to the Senator, if it leads to no discussion.

Mr. CLARKE of Arkansas. Mr. President, I will call the attention of the Senator from Washington [Mr. POINDEXTER] to the fact that the amendment, which I understand he intends to propose, might be offered as soon as the amendment which the Senator from Minnesota [Mr. CLAPP] desires to offer has been disposed of.

Mr. CLAPP. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 53, after line 26, it is proposed to insert:

St. Paul (Minn.) Harbor, with a view of determining whether the channel of the Mississippi River can be changed to or near the bluffs on the west side thereof.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment was agreed to.

Mr. STERLING. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from South Dakota?

Mr. SHAFROTH. I will yield if his amendment does not lead to debate.

Mr. STERLING. I merely want to suggest an amendment which, I think, will be agreeable to the chairman of the committee. It is an amendment to the committee amendment on page 54 under the head of "Surveys." On that page, in line 2,

after the word "to," I move to insert the words "flood control and to," so that it will read "with a view to flood control and to connecting and extending navigation."

Mr. CLARKE of Arkansas. There is no objection to that amendment.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

Mr. POINDEXTER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Washington?

Mr. POINDEXTER. I desire to offer an amendment.

Mr. SHAFROTH. I will ask the Senator from Washington whether the amendment he intends to offer will lead to any debate?

Mr. POINDEXTER. I apprehend not, I will say to the Senator.

Mr. SHAFROTH. I will yield if it does not lead to debate, though I desire to get through with the amendment I wish to offer.

Mr. POINDEXTER. I offer the amendment which I send to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. At the end of the bill it is proposed to add the following:

There shall be appointed by the chairmen of the Committee on Rivers and Harbors of the House of Representatives and the Commerce Committee of the Senate an inspector of river and harbor works. He shall be a trained and experienced civil engineer, not connected in any way with the Army. It shall be the duty of said inspector to thoroughly examine the several river and harbor projects which have been adopted by Congress, with special regard to the question of whether the moneys appropriated by Congress for these works are being expended to the best advantage from a standpoint both of economy and efficiency. In making said examination said inspector shall inquire whether the best methods are being used in the prosecution of said works to accomplish the improvement contemplated thereby. Said inspector shall also examine into the question of the needs of commerce for said improvements, and the probable or prospective uses thereof in commerce, and the probable or prospective results thereof on freight rates on railroads through the competition of such waterways; and for that purpose said inspector may ascertain the effect upon such rates of waterways heretofore improved, and the uses that have been made of the same for purposes of transportation. Said inspector shall make, in writing, to Congress a full semiannual report of his observations and conclusions in the foregoing matters. He shall hold office at the pleasure of the committees above mentioned, and his successor shall be appointed as provided above. He shall be paid a salary of $10,000 a year and his necessary, actual expenses, and shall have such clerical and other assistance as may be necessary, to be approved by the chairmen of said committees.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

Mr. CLARKE of Arkansas. Mr. President, I believe it to be a wise action for the Senate to let that amendment go into the bill, not necessarily because it will be adopted as the law, but because it is the germ of an idea that ought to be respected.

This debate for the past three weeks has brought out the fact that the public opinion of Congress is somewhat dissatisfied with the present method of making river and harbor appropriations; that there ought to be additional scrutiny provided; that it ought to extend to the method in which improvements heretofore ordered have been made; and that it ought to put Congress in possession of a fund of information that it does not now have, and that it ought to come from a source entirely dissociated from the Engineering Office, upon which we must now altogether rely for technical information.

Several projects covering the same general question will be offered. I think it policy to let them all go into the bill and be considered in conference, with a view to utilizing all that is good in them, to the end that we may evolve some supervisory tribunal or process by which better work can be done hereafter.

Mr. JONES. Mr. President——

Mr. THOMAS. Mr. President, may I ask the Senator in charge of the bill a question?

The PRESIDING OFFICER. Does the Senator from Arkansas yield to the Senator from Washington? He rose first.

Mr. CLARKE of Arkansas. I yield to the Senator from Colorado just now.

Mr. THOMAS. Let me ask if any estimate has been made for this added appropriation to the bill?

Mr. POINDEXTER. Mr. President, if the Senator will yield, I will say that the amendment is not subject to that point of order, because it does not carry an appropriation.

Mr. CLARKE of Arkansas. It does not provide for the appropriation of any money.

Mr. POINDEXTER. It simply provides for a salary of $10,000.

Mr. CLARKE of Arkansas. In the event it becomes an act of Congress.

Mr. POINDEXTER. It provides for the salary, but does not appropriate any money.

Mr. THOMAS. Then, when I am entitled to the floor, I shall oppose this amendment on another principle.

Mr. JONES. Mr. President——

The PRESIDING OFFICER. Does the Senator from Arkansas yield to the Senator from Washington?

Mr. CLARKE of Arkansas. I do.

Mr. JONES. I was just going to say that I would not oppose this amendment if the salary is cut to $7,000, but I object to an employee of the Senate getting more salary than we get ourselves.

Mr. CLARKE of Arkansas. I see no objection to striking out the salary entirely and leaving that to future legislation.

Mr. JONES. He ought to have some compensation, and I would have no objection to $7,000.

Mr. SHAFROTH. Mr. President, it is evident that this amendment is going to lead to some discussion, and if the Senator from Washington will take it up after the amendment which I have been trying to get up for some time is disposed of I shall be much obliged.

Mr. POINDEXTER. Mr. President, I should like to inquire of the Senator from Colorado what his amendment is?

Mr. SHAFROTH. My amendment is to require 20 per cent of the cost of each of the projects in this bill to be paid into the Treasury by the locality as a part of the appropriation which is made in the bill. The amendment has various phases which I wish to discuss for a few minutes.

Mr. KENYON. Mr. President, may I ask the Senator a question?

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Iowa?

Mr. SHAFROTH. I yield.

Mr. KENYON. I desire to ask the Senator from Washington [Mr. POINDEXTER] a question.

Mr. SHAFROTH. I will state to the Senator that I do not think my amendment is going to take a long while; but evidently I was entitled to recognition, and received recognition, and I yielded to various Senators on the assumption that the matters presented by them would not take any time or lead to much discussion.

Mr. NORRIS. Mr. President, will the Senator from Colorado yield to me?

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Nebraska?

Mr. SHAFROTH. Yes; I yield to the Senator from Nebraska.

Mr. NORRIS. I want to say, out of justice to the Senator from Colorado, that he yielded to let the Senator from Washington offer his amendment, on the theory that it would take no time. Now, I expect to discuss—not at length, but for a few moments—the amendment offered by the Senator from Washington, and I wanted to tell the Senator from Colorado that that was the case.

Mr. SHAFROTH. My colleague [Mr. THOMAS] has indicated that he wants to discuss it, and so, evidently, it is going to take considerable time. I will ask that the Senator from Washington take it up immediately after my amendment is disposed of.

Mr. POINDEXTER. I think that is entirely reasonable. I should like to answer the question the Senator from Iowa was going to ask me, however.

Mr. KENYON. I was going to ask the Senator what salary is provided for by this amendment. Do I understand that it is $10,000 per annum?

Mr. POINDEXTER. That is the amount named in the amendment. That is only a tentative suggestion.

Mr. KENYON. It is not the duty of this expert to discover water in all of these streams, is it?

Mr. POINDEXTER. It is his duty to report whether or not there is any water there. If the Congress of the United States is appropriating money for streams that have no water in them, and no way of getting any water, I think it would be an act of economy to appoint a reliable man to investigate that proposition and report to us.

Mr. KENYON. I agree with the Senator. He ought to have a good salary for doing that, too.

Mr. THOMAS. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to his colleague?

Mr. SHAFROTH. I yield to my colleague.

Mr. THOMAS. I merely want to say that, in view of the explanation of this matter just given me by the chairman of the committee, I shall make no further opposition to the amendment of the Senator from Washington.

Mr. UNDERWOOD. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Alabama?

Mr. SHAFROTH. I yield to the Senator from Alabama.

Mr. UNDERWOOD. I desire to offer an amendment on page 49, after line 17.

The PRESIDING OFFICER. There is an amendment pending.

Mr. SHAFROTH. It is a mere formal amendment, as I understand, which will elicit no discussion.

The PRESIDING OFFICER. There is now an amendment pending.

Mr. CLARKE of Arkansas. I ask unanimous consent that the amendment offered by the Senator from Alabama may be considered without prejudice to the pending amendment.

The PRESIDING OFFICER. Without objection, that may be done.

Mr. UNDERWOOD. I send the amendment to the desk and ask to have it read. It is to come in on page 49, after line 17.

The PRESIDING OFFICER. The amendment will be stated.

The SECRETARY. On page 49, after line 17, it is proposed to insert:

Mulberry Fork of the Warrior River above Sanders Shoals.

Mr. UNDERWOOD. Mr. President, this is merely a survey for a fork of the Warrior River, where the navigation is already completed, and it is to see whether a further survey for that river would be of any avail.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Alabama.

The amendment was agreed to.

Mr. SHAFROTH. I ask that the Secretary may state the amendment offered by me.

Mr. CLARKE of Arkansas. Let me suggest to the Senator from Washington that he temporarily withdraw his amendment and let the Senator from Colorado proceed with the consideration of his amendment.

Mr. POINDEXTER. I accept the suggestion of the Senator from Arkansas.

The PRESIDING OFFICER. The Senator from Washington asks that his amendment be laid aside.

Mr. POINDEXTER. I ask that it be temporarily laid aside, pending the disposition of the amendment offered by the Senator from Colorado.

Mr. SHAFROTH. No; it seems to me the Senator ought to reoffer it. I yielded simply for the purpose of letting it be considered if it led to no debate.

Mr. CLARKE of Arkansas. The courses are equivalent. Either one will answer.

The PRESIDING OFFICER. The amendment offered by the Senator from Colorado will be stated.

The SECRETARY. It is proposed to insert in the bill a new section, as follows:

SEC. —. That each of the appropriations herein made shall become available only in the event States, counties, cities, or individuals shall pay into the Treasury as part of the same 20 per cent of the amount thereof: *Provided, however,* That the provisions of this section shall not apply to those items requiring contributions from other sources.

Mr. SHAFROTH. Mr. President, there are four good reasons why this amendment should be adopted by the Senate.

In the first place, the object and accomplishment of the amendment will be to eliminate from this bill all projects that are unworthy. We know that when it comes to attempting to get money for a project from individuals or counties or cities you have a local interest that is familiar with the enterprise, the appropriation for which is sought in the river and harbor bill. They know whether it is a wise measure, whether it is a good measure, and, consequently, their judgment is a check upon an unworthy project.

Mr. President, I have seen Senators of the highest integrity say in this Chamber that a certain project in the bill, specifying it, was unworthy of consideration; that it was something that never should be passed by Congress. On the other hand, I have seen men of equal integrity rise and say that the same appropriation was one of the best measures in the entire bill. So far as I am concerned, I have no light upon which to act. I can not read all the testimony that has been taken in relation to the project, and the result is that I am at a loss to know how to vote with respect to an appropriation so assailed and so defended. But, Mr. President, if the people of the community where that project is to be constructed say that they will contribute a fair percentage of the amount appropriated, it is a guaranty that it is a worthy project; they know what is best to be done; they know whether or not it is wise to have the improvement made; and consequently we can rely upon their judgment and thereby can vote for an appropriation of that kind with very little investigation and with very little taking of testimony.

Mr. President, that is the condition with relation to this bill. Probably 20 or 30 items have been assailed in that way, and probably 20 or 30 items have been defended in that way. I do not know how to vote upon them. But if the people will say, "We will contribute 20 per cent of the amount of this appropriation for this purpose," I can readily say that no matter what my opinion was I believe that their opinion is better than mine with relation to it.

Mr. HARDWICK. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Georgia?

Mr. SHAFROTH. I yield.

Mr. HARDWICK. There are many attractive features to the Senator's idea, particularly if it were applied to items that were not purely an exercise of the commerce power; but we will take a case that is clearly an exercise of the commerce power. Take the great port of Savannah, for instance. The business of 11 States, at least, goes through that port. Would the Senator expect the people who reside right at the city to contribute that 20 per cent, or how many people would do it?

Mr. SHAFROTH. Whoever is interested; and if the benefits go up as far as New York those people would contribute.

Mr. HARDWICK. But if the Senator will pardon me, in the case I have in mind they would not do it, except at Savannah, and then in that case, in order to maintain a great port—the third largest exporting port in the United States—you put the burden on 50,000 or 75,000 people who live right at that city.

Mr. SHAFROTH. I do not propose to do anything of the kind, because they can get their contributions from the people who are benefited. I want to say, however, that this is not a new system. I have here a statement made in the CONGRESSIONAL RECORD of some years ago. The port of Antwerp is a great port. As a matter of fact, it gets commerce from all over the world. It cost $30,000,000 to improve the harbor at that port; but the city of Antwerp contributed two-fifths and the Kingdom of Belgium contributed three-fifths. That is twice as much a contribution as we are asking here. The object is not to burden those communities that have legitimate enterprises but to cut out those projects where there is no real foundation for appealing to the Congress of the United States for an appropriation.

Mr. President, each Senator sometimes gets requests to propose appropriations that are perfectly ridiculous. The applicants justify their request by saying: "Why, somebody else is getting such an appropriation; and if it does no other good whatever, it will result in spending the money in our community, and therefore we had better get it." Why, Mr. President, if you are going to take in projects that Members on the floor of the Senate will say are outrageous, the only test I can see that is fair will be as to whether the people will go down into their pockets and contribute something for the purpose.

Therefore, Mr. President, when we find some eight or ten of the provisions in this bill making this very requirement of contribution—in almost every instance for a greater amount than one-fifth, or 20 per cent—it seems to me that there ought to be very little objection to this amendment. In order to weed this bill of the projects that are called "pork-barrel" appropriations, in order to weed it of the unworthy projects, some kind of evidence of good faith should be presented on the part of the people who are urging such appropriations.

Now, Mr. President, I want to call attention to the first one—the item in regard to the Galveston sea wall. It is found on page 22. What is the provision there?

Provided, That no part of the amount herein appropriated shall be expended * * * until the said county or city of Galveston shall have obtained a right of way and made provision in a manner satisfactory to the Secretary of War for paying the cost of constructing at least 3,300 feet of similar sea-wall extension in addition to that herein appropriated for.

That requirement is a good deal more than any 20 per cent, and yet it is provided in this very bill. It is a good provision, because there is a local benefit to the city of Galveston by reason of that improvement and it ought to at least pay for a part of the benefit it receives.

I want to call attention to another one of these requirements claimed to be so unjust when applied to my amendment. On page 24 we find that there is, with relation to the Trinity River, a provision as follows:

Provided, That no part of the latter amount—

That is, the appropriation for that river of $250,000—

shall be expended until the city of Dallas or other local interests shall have contributed the sum of $50,000 toward the improvement.

In the case of the appropriation for the Illinois River, on page 31 of the bill, we find this provision:

Illinois River, Ill.: Continuing improvement and for maintenance below Copperas Creek, $55,000; and the improvement of navigation of the Illinois River, authorized by an act of the Illinois General Assembly providing for an expenditure of $5,000,000 therefor by the State of Illinois, be, and is hereby, authorized in accordance with said act.

Why, Mr. President, there the State of Illinois has contributed two, three, four, or five times as much as ever was contributed by the Government of the United States to that project. Is it fair to require of some that they shall contribute large amounts, and of others that they shall contribute nothing whatever?

It seems to me that the provisions that I am citing in this bill are ample and good precedents for the requirement in this amendment of the payment by those benefited of 20 per cent of these appropriations before any of them shall become effective.

I turn to the item with relation to St. Joseph, Mo., on page 37 of the bill. There is a requirement which is very plain and clear. It says:

Provided, That the amount required to be paid by the city of St. Joseph or other agency shall not be in excess of two-fifths of the total amount expended and in no event to exceed $50,000.

There St. Joseph has undertaken to put up two-fifths of the amount of the appropriation provided in this bill, and voluntarily does it; and that of itself shows that it is a worthy project. I do not have to inquire as to whether or not that is worthy, because, when I find that the local interests there are willing to put up two-fifths, or even one-fifth, I know that it is a project that is worthy of the approval of the Congress of the United States.

Now, Mr. President, we will take another item as to Los Angeles. There are various conditions imposed, but they are all bearing upon the question; and I believe in every instance the contribution is fully as much as the one-fifth that is required by this general amendment which I have offered. This item is in relation to Los Angeles and Long Beach Harbors:

Provided, That before any work is undertaken by the United States assurances satisfactory to the Secretary of War shall be given that the city or county of Los Angeles or other agencies will provide the right of way, defray the cost of the necessary roads and bridges, adjust all damage claims, and maintain all improvements after its completion.

Now, we have another one, as to San Diego, on page 39.

Mr. JONES. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Washington?

Mr. SHAFROTH. I do.

Mr. JONES. I just want to suggest to the Senator that according to the reports of the engineers the amount which would have to be contributed by Los Angeles would be over $900,000.

Mr. SHAFROTH. I am glad to know that. I knew it must be substantial. Here is an appropriation, then, that would make that community put up almost dollar for dollar, because the appropriation is $1,080,000, and if the expenditure which is to be made is $900,000 it makes Los Angeles put up practically as much as the appropriation before it becomes available.

Mr. FLETCHER. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Florida?

Mr. SHAFROTH. I yield to the Senator.

Mr. FLETCHER. I want to say to the Senator from Colorado that his argument shows very clearly what is the fact—that the engineers now have the power and authority to base their recommendations upon the condition of local contribution, and in instances where conditions warrant it that practice is being pursued to-day. There is no need of any legislation to effect that, because that is the course that is taken now. Wherever the engineers feel that it is more a matter of local interest than of general public interest, they require that the local interests shall contribute in the way which they find to be proper and just.

Mr. SHAFROTH. Yes; but that becomes a subject of favoritism. That is the trouble about it. You let some people get around the engineers and talk with them about the matter—that it is impossible to raise the money—and they may waive it; and it puts it practically in the hands of the engineers, as to whom we have no relation whatever, as to whether a contribution shall be made or not.

Mr. REED. Mr. President——

Mr. SHAFROTH. I yield to the Senator from Missouri.

Mr. REED. If the Senator would not leave it to the Government engineers because they are subject to influence, just whom would he leave it to?

Mr. SHAFROTH. Why, I do not leave it to anybody. The fact of putting up 20 per cent is what I leave it to. When people are willing to contribute I know that they think it is a meritorious enterprise. That is the test, and it is a test that will in every instance, in my judgment, determine whether a measure is meritorious or not.

Mr. REED. That would not be any test at all. There might be a lot of men whose heads were filled up with some impractical ideas or notions, who were incompetent to pass upon a question, but who were perfectly willing to put up one dollar if the Government would put up five; and yet the whole project might be utterly impracticable.

It seems to me that the Senator goes a long distance when he impugns the intelligence and honesty of all the Government engineers we have.

Mr. SHAFROTH. I do not impugn the honesty of the engineers.

Mr. REED. I understood the Senator to say they were subject to influence.

Mr. SHAFROTH. Why, everybody is subject more or less to favors and to the way in which a matter is presented—why, certainly.

Mr. REED. Does the Senator know of a single instance in which a Government engineer has been the subject of favors?

Mr. SHAFROTH. Oh, no. I was speaking generally. People, of course, by reason of large communities or by reason of persons presenting and urging things, naturally will be influenced by that fact. Why, you see it in this body. You find that a person who presses something very strongly and persistently wears the other Senator out, and he says, "Oh, let it go." That is often the case.

Mr. REED. Mr. President, I wonder if that would account for some of the speeches we have been hearing on this bill.

Mr. SHAFROTH. I do not know whether it would or not. But, Mr. President, there is no question but that a case might possibly arise such as the Senator from Missouri indicates, namely, that some big company or some special interest might advocate an enterprise that was not meritorious in order that the Government might put up 4 to 1. It would be 4 to 1 and not 5 to 1. It is not likely, however, that that would occur; but even if it did occur, the enterprise would be subject to the examination of the Senate and subject to the examination of these same engineers; and if the engineers were to turn it down, you would not have any difficulty in having it rejected, if there were good, substantial reasons for it.

Mr. President, the real thing, both in road building and in every other enterprise that calls for money from the United States Treasury, the thing that determines the merits of the appropriation more than any other one factor, is the question as to whether the people who are interested, the people who are going to get more benefit out of the project than anyone else, are willing to share some of the burdens of the appropriation.

Mr. VARDAMAN. Mr. President——

The PRESIDING OFFICER. Does the Senator from Colorado yield to the Senator from Mississippi?

Mr. SHAFROTH. I yield to the Senator.

Mr. VARDAMAN. Unfortunately for me, Mr. President, I was detained from the Chamber during the early part of the Senator's very interesting discussion of this question; but I want to ask the Senator how he would treat a case like this. The best way to illustrate is to take some fact as it exists, or some example.

The little city of Gulfport, on the Gulf coast of Mississippi, is a prosperous little city of about five or six thousand people. It is one of the largest lumber-exporting ports in the United States. Those people have gone to very great expense in building up the town and the wharf and the pier and all that, and a channel has been cut from the harbor into the city. Now the entire country enjoys the advantages of that port. What has been done by Gulfport is a contribution to the world. Freight is shipped through that port from as far north as Denver, Colo. Now, how are you going to levy tribute upon that?

Mr. SHAFROTH. You do not levy tribute. The people who are interested in the lumber business will come and say to your city: "Why, we want this; it is important, it is absolutely necessary, and therefore we will share the expense with you."

Mr. VARDAMAN. Why, in some instances the lumber is bought three or four hundred miles away, by people living in South America or in Europe.

Mr. SHAFROTH. That may be; but if it is necessary for that lumber to go through that port, the people who are interested in the lumber will be benefited by it, and consequently they will be the ones who will contribute.

Mr. VARDAMAN. It is a very easy matter to solve the road question, because the people living on lands contiguous to the road, whose lands are improved in value, bear the burden of the expense.

Mr. SHAFROTH. Not necessarily. Towns contribute in our part of the country more than any other.

Mr. VARDAMAN. Certainly they do, because the roads bring trade to the towns. It is a good investment for the towns.

Mr. SHAFROTH. Yes.

Mr. VARDAMAN. But in the case I have just mentioned to the Senator it is absolutely impossible to distribute the expense proportionately with the advantages that will be enjoyed.

Mr. SHAFROTH. How much is the appropriation for this port?

Mr. VARDAMAN. I think probably $85,000.

Mr. SHAFROTH. Twenty per cent of that would be about $16,000. Now, to say that the lumber concerns that are so great, and to which the port is necessary, can not put up $16,000 shows that the lumber interest is not so great as the Senator thinks.

Mr. VARDAMAN. The people interested in lumber, Mr. President, would not ship the lumber through that port, probably. They would ship it down the Mississippi River or some other way. Does the Senator propose in this amendment that the ports that are to be opened up to the world, to which we invite ships from every part of the earth, must bear 20 per cent of the cost, and force the ships that come to the ports to bear a portion of the burden? Is that the hospitable treatment we are to accord the people who desire commercial relations with us?

Mr. SHAFROTH. Why, certainly; and that seems to me the only fair way. Take the illustration which I gave before the Senator came in. The people of Antwerp, in Belgium, have constructed a thirty-million-dollar improvement of their harbor. The city of Antwerp paid two-fifths and the Belgian Government paid three-fifths of the cost of that improvement.

Mr. JONES and Mr. REED addressed the Chair.

Mr. SHAFROTH. That is double the amount which is asked here. I have shown a number of instances in this bill where they are already contributing as much as 50 per cent of the amount of the improvement. It is not fair that one person or one community should be required to pay a half and another community a third. Of course, if they voluntarily do it, that is another matter.

Mr. VARDAMAN. The Senator's amendment would work very well and satisfactorily to the people of the Mississippi Valley. We would be very glad to have the General Government contribute 80 per cent for Mississippi River improvement and only levy a tax of 20 per cent upon the States bordering on the river; but I think in the matter of ports it would not work well at all.

Mr. SHAFROTH. Well, Mr. President, it has worked in nearly every country in the world. Take England, for instance She adopts the policy of letting the cities do it entirely and letting the city assess a dock tax upon the ships that come in there. Her policy goes upon the theory that the ships are benefited—that the commerce is benefited. A great canal called the Manchester Canal has been built and paid for entirely by the city of Manchester, and it derives a revenue therefrom by reason of having a dock charge to those who come in, on the theory that those who are benefited should pay at least a large part of the expense.

The PRESIDING OFFICER. Will the Senator from Colorado yield to the Senator from Washington?

Mr. SHAFROTH. I yield to the Senator from Washington.

Mr. JONES. While I am not inclined to vote for the amendment suggested by the Senator, I wish to call his attention to another item in the bill which he probably has not observed, which I think will meet to a certain extent the suggestion of the Senator from Mississippi as to voluntary contributions. It is the appropriation for Willapa Harbor, in the State of Washington. While it is not specified in the item itself that the local people have to contribute, it is in the recommendation of the report of the engineers, which we make a part of the provision, and it is set out that the local people must contribute $143,000 and a little over.

I wish to call the attention of the Senator to the fact that the amount of money the Government will appropriate for the project is $247,950, and before we begin any expenditure it is made a condition that somebody must put up over $143,000. It is largely for the improvement of the harbor that is largely engaged in foreign commerce, sending out exports and bringing in imports. Those people will raise that money all right. They have already contributed $125,000 on a previous project.

Mr. VARDAMAN. I wish to say to the Senator that the little city of Gulfport, to which I referred a moment ago, and the Gulf & Ship Island Railroad have contributed a million and a half dollars, I understand, to that harbor, and the whole world is using it. They can not afford to keep it up, and it is not fair to require them to do it.

Mr. SHAFROTH. If it has contributed already $1,500,000, it would not be very much to contribute $16,000 more.

Mr. VARDAMAN. It would not be very much, but it would be 20 per cent, and it might work a very serious hardship.

Mr. SHAFROTH. It would be 20 per cent, and at the same time they get 100 per cent worth of improvement for the harbor.

Mr. REED. Mr. President——

Mr. SHAFROTH. I yield to the Senator from Missouri.

Mr. REED. The Senator from Colorado just made a remark that I think throws a flood of light on all his argument. His proposition is that these various improvements shall be treated as local improvements for local benefit.

Mr. SHAFROTH. No; only one-fifth local.

Mr. REED. Very well, one-fifth; and that, therefore, the community should contribute. And in support of that theory he carries us to Europe and tells us that the city of Manchester built works of enormous value at its own expense, but then proceeded to collect tolls from the commerce of Great Britain and the world to recompense itself, and that other European cities which he named have followed the same line of conduct.

Mr. SHAFROTH. I do not think Antwerp charges tolls. I think it is open and free.

Mr. REED. The Senator named a number, and he said that that was the general policy of England. These various localities will put up the money and then be permitted to charge tolls. In other words, the Senator wants to go back to the old toll-gate system.

Mr. SHAFROTH. No; I do not.

Mr. REED. The old tollgate system that has been condemned by modern intelligence for the last 50 years, and that was finally torn down by an indignant people. He would set up a tollgate system in the heart of a great country to collect tribute like Barbary pirates used to do before we taught them better—to collect tribute on the commerce of the world that comes here. At the same time we have inaugurated the policy of building at an expense of $400,000,000 a great canal, from which we never expect to get the money back, the tolls over which are purely nominal, and for the purpose of keeping up the expense of running it.

Mr. SHAFROTH. I am not advocating any tolls. I am expressly providing that there shall be contributed only one-fifth. Is it possible that the United States Treasury shall be drained and that money shall be taken for worthy and unworthy projects, and that for those unworthy projects not a dollar shall be paid by the locality?

Mr. REED. If it is an unworthy project, the Government ought not to put up $4 to $1 paid by the locality. No unworthy project should go into this bill. Whenever somebody stands here and demonstrates that a project is unworthy, I will vote to take it out.

Mr. SHAFROTH. We have seen the Senator from Iowa [Mr. KENYON] attempt to demonstrate, and he has made assertions and read testimony and authorities to show, that certain projects were not worthy. Yet have you voted to take them out?

Mr. REED. I have seen the Senator from Iowa and I have seen other Senators take this bill, and in every single instance where somebody who was posted on the subject matter rose to lay the real facts before the Senate, all those assertions vanished into nothing. The Senator from Wisconsin [Mr. HUSTING] the other day made an attack here that I did not see fit to reply to, but every single fact that he asserted was either a partial fact or it was something that had been utterly overthrown. The truth is he was talking about a subject he did not know anything of. He was honest in it, but he was only honest in his talk because he was utterly ignorant of the question he was discussing.

I have heard that sort of thing here on the floor of the Senate. I will not on the floor of the Senate vote $4 out of the Government Treasury if a dishonest man will put up a dishonest dollar for a dishonest proposition. No honest man ought to do it.

Mr. SHAFROTH. I have not any doubt the Senator would do just exactly what he says, but the difficulty is in determining the project that is unworthy. When we find one man saying it is unworthy and another man of equal integrity saying to the contrary how are you going to determine that matter? There is a test, however, that does determine it, and that is as to whether the community which will be benefited by the project will put up one-fifth of the amount and let the Government put up 80 per cent. It seems to me they ought to be glad to do it. There are very numerous instances, and I have cited them in this bill, showing that communities have been willing to put up more than one-fifth, to put up two-fifths and in some instances one-half, and that demonstrates, to my mind, that those enterprises, without even any inquiry, are worthy projects.

Mr. VARDAMAN. Mr. President——

Mr. SHAFROTH. I yield to the Senator from Mississippi.

Mr. VARDAMAN. Is it not a fact that most of the enterprises appropriated for in the bill have received local assistance, and in many instances a great deal more money than the Government has spent?

Mr. SHAFROTH. I do not know whether they have or not.

Mr. VARDAMAN. We have spent $1.50 where the Government has spent a dollar on the Mississippi River.

Mr. SHAFROTH. If that is the case, the amendment is in the interest of weeding out bad appropriations, that they shall pay 20 per cent rather than that they shall get them without contributing anything.

Mr. VARDAMAN. Is it not a fact that the universal rule such as is prescribed in your amendment will not fit all cases?

Mr. SHAFROTH. I think it will fit every case.

Mr. VARDAMAN. The trouble about it is, and it is no reflection upon the Senator's intelligence nor is it an argument particularly against any specific measure, that he makes that statement. It is the way he views it. It is just his humor.

Mr. SHAFROTH. No, Mr. President. When we find that in the instance which the Senator has cited that little port in Mississippi has put up a million dollars for harbor improvements in aid of the lumber interests, it would not be crippled and hurt when it got an appropriation of $80,000, if it put up $16,000 more. Any community that has put up a million dollars would have no difficulty in raising $16,000 more in order to get the improvement completed.

The Senator from Missouri had said that I am trying to get back to the old system of tollgates and collecting tolls for the purpose of getting revenue to pay for harbor improvements or river improvements. Mr. President, there is nothing in the amendment which I have offered that squints at that. My object is absolutely to prevent that, although I must say that England, the greatest maritime nation on earth, does impose charges of that kind and thinks it does not hamper her commerce. But I do not want that to be established here. However, it seems to me that, in order to weed out unmeritorious projects in the bill and in every other river and harbor bill, a provision of this kind will do it, and that consequently it is of great aid to the Treasury of the United States. Nothing is here said with respect to dock fees or with respect to any kind of toll, and they never will be collected under a provision of this kind.

Since the Senator from Washington has referred to the fact that certain contributions have been made in the State of Washington to harbors I wish to call attention to another one which I overlooked, and that is in regard to the Sacramento and Feather Rivers of California. There is the following provision contained in the bill, which I want to read:

Provided, That no part of this sum shall be expended until the State of California shall have deposited with the Treasurer of the United States to the credit of the Secretary of War a sum which, together with that heretofore furnished by said State, shall equal the total amount appropriated by the United States for said work.

Is there any intention manifested by these measures that are in this very bill to go to the imposition of tolls? It is absurd to think that such an argument could be fairly deduced, either from this amendment or from the provisions contained in the bill itself.

Mr. President, whether we believe it or not, there are thousands of people in the United States who look upon every river and harbor bill as containing unworthy projects. There is no doubt of that. Then why not eliminate them by a simple process without having to use favoritism in turning down or accepting provisions in the bill? I want to say to you that when that is done you will not have as many people apply to Senators for appropriations for projects unless they are worthy. Whenever they know that they will have to put up 20 per cent of the amount they will not come here with petitions for you to appropriate a million dollars or one hundred thousand dollars for the improvement. That very thing will have a tendency to make the bill a cleaner bill and a better bill, a bill not controlled by the urgent demands of some Senators with respect to their particular localities.

You can not make an absolute equality in regard to appropriations of this nature. You will find that some, by pressing their claims or by able presentation or by other means, will get an enlarged appropriation where such an enlarged appropriation is not made for just as meritorious a project by not having a clear presentation made to the committee or to the Senate.

Mr. President, I find that the second point in favor of the adoption of this amendment is the fact that it will save in this bill some eight to ten million dollars, and yet if every one of these measures is meritorious the communities will get them. That being the case, it seems to me, from the standpoint of economy and making the appropriation go further in the interest of the public, that this is a good amendment.

There is another great saving, and, in my judgment, it will be the greatest saving. It is the saving that will result from the fact that those representing unworthy projects will not come here and apply for appropriations when they have got to put up one-fourth of the same. There will be a saving of several million dollars in the bill from that cause.

So, Mr. President, we have a test of money, which makes an automatic test, that does not require any investigation hardly, except in the case suggested by the Senator from Missouri, where somebody might be willing to put up one-fifth in order to get an improvement which was even unworthy, which is not likely ever to occur, but which then is checked by the Senate itself and by the committee and by the engineers. It seems to me that this test would act automatically and that people would not be hounding Senators and Representatives to present measures unless there was great merit and great worth in them.

So, Mr. President, I want to say that there is no trouble in regard to the collection of the amount. The persons benefited will readily do that which is to their interest.

Senators assert that a certain community has raised large sums of money, but fears it can not pay one-fifth of the appropriation for it in this bill. Is it possible, when it has raised so many thousands and hundreds of thousands of dollars, that it can not pay one-fifth of the appropriation which is made for one year in this bill?

Mr. President, the requirement of contribution applies to every one of them. It will work a change in the river and harbor bills. They will not contain such large appropriations. The appropriations will not be so great, except for meritorious projects, and everyone is willing that meritorious projects should be approved.

Mr. President, unquestionably every community that gets an appropriation gets a benefit. They got a benefit in the case of Antwerp, of two-fifths, or 40 per cent, instead of one-fifth; it is fair and right that such communities should pay for a part of the benefit which they are to receive. That was true in the case of our road bill. Nobody suggested that the Government should construct a road at its own expense. It is done by cooperation with the States and counties and individuals, and in that way it will work out and eliminate the "pork-barrel" element which is bound to enter into every such bill under present conditions.

Mr. President, it seems to me from these facts that nothing but good can arise from the adoption of this amendment. It will not stop any improvement except that which is a bad improvement and which has been condemned. If it is a good improvement there is no question but that the money will be forthcoming, and then there will be satisfaction upon the part of all the people of the United States in the fact that the people are getting something for their money.

Mr. President, these are the reasons for the adoption of this amendment: First, that it will cut out the unworthy appropriations; second, that it will save the National Treasury $8,000,000 in this bill; third, that it will save the Government a large amount of money by reason of the promotors of the unworthy projects in this bill not coming to the front and offering to pay their proportion and consequently the appropriation will fall; and fourth and lastly, it will prevent the continual solicitation of Senators and Representatives, urging them to present doubtful measures and to get as much as they can whether the project is worthy or unworthy.

Mr. President, it seems to me for these reasons that the amendment which I have offered should be adopted.

Mr. NEWLANDS. Mr. President, I think the Senator from Colorado [Mr. SHAFROTH] has hit upon a very happy device for diminishing possible improvidence in waterway and harbor projects. We have three forms of commerce, the foreign commerce, the interstate commerce, and the State commerce. All the improvements in our rivers and our harbors are intended to promote in some degree each of these forms of commerce.

It is right that the National Government should attend to that part of the expenditure which relates to foreign and interstate commerce, and it is quite right that the States should contribute to that part which relates to purely State commerce. In addition, if we refuse to put the entire burden of these developments and improvements upon the National Government and insist upon the contribution of a part by the States and communities we diminish to that extent the possibility of improvident enterprises being urged and finally entered upon. If you subject each State and community to a part of the expense, that State and community will be much more careful in

looking over the plans, in considering possible economies, and in determining the feasibility of the project itself.

We all know that even though a project be unfeasible and improvident the project is often viewed with favor in the community where it is located if the entire cost of it is to come out of the Federal Treasury.

Mr. HARDING. Mr. President——

The PRESIDING OFFICER (Mr. SMITH of Michigan in the chair). Does the Senator from Nevada yield to the Senator from Ohio?

Mr. NEWLANDS. In a moment. The assumption in many of those cases is that the expenditure of Federal money in a particular locality, whether improvident or not, will put money in circulation and benefit that community. I am glad to yield to the Senator from Ohio.

Mr. HARDING. I wish to ask the Senator from Nevada what would be a practical plan in the operation he suggests? For instance, how would he deal upon this plan with the Ohio River, which borders six States and traverses the territory of none save a short distance in Pennsylvania?

Mr. NEWLANDS. I imagine that if a project involving the entire Ohio River is of such merit as to arouse the public sentiment of those six States in its favor, a method of cooperation will be worked out between those six States and the National Government under which the project will be entered upon. All we have to do is to provide the machinery, and that is what I have been attempting to do for many years. I have been insisting for years that there should be greater cooperation than there has been in the past between the Nation and the States with a view of the exercise of the functions of each sovereignty for the general good. For a century almost we have been engaged in a contest between the States on the one hand and the Nation on the other with reference to their respective powers and jurisdictions, and we have furnished an abundant opportunity for able and distinguished lawyers during that time to develop their views regarding constitutional law and for a century or more the functions of both the National Government and the State governments have been without use simply because they have been engaged in this eternal contest as to what belongs to the jurisdiction of the States and what belongs to the jurisdiction of the Nation, a contention never to be determined until after years of debate and legal controversy.

Mr. TOWNSEND. Mr. President——

The PRESIDING OFFICER. Does the Senator from Nevada yield to the Senator from Michigan?

Mr. NEWLANDS. Certainly.

Mr. TOWNSEND. I have been wondering what effect the amendment of the Senator from Colorado would have upon the provisions, for instance, for "St. Marys River at the falls, Michigan: Continuing improvement by the construction of a fourth lock, $800,000." Would it be the thought of the Senator from Nevada that the State of Michigan should pay one-fourth of the cost of that lock and one-fourth of the cost of improving the Livingston Channel and the other channel connecting the Great Lakes in the course down to the St. Lawrence? Those locks are not constructed largely for Michigan's benefit. Michigan does not get any more out of them than all the Northwestern States, as far as that is concerned.

Mr. NEWLANDS. I assume under the theory of the Senator from Colorado there would be a movement upon the part of all the States benefited to raise the one-fourth that is required for the commencement of the project by the National Government.

Mr. SHAFROTH. If the Senator from Nevada will pardon me, my theory in regard to it is that when they find that one-fifth has got to be put up those who are in interest will naturally come together. It may be the lumber interest and the iron interest, but the various interests that find it necessary to use those locks will come together and be willing to put up their proportion, and perhaps not a dollar will be paid by the State. It may be that it will be done by the cooperation of the States. It is done continually by individuals. As I have shown in this bill there are 8 or 10 projects that require that there shall be not only 20 per cent but as high as 50 per cent contributed by the local authorities. The amendment says "States, counties, cities, or individuals." It is not limited.

Mr. TOWNSEND. What local authority in Michigan, for instance, would contribute to the construction of the two locks?

Mr. SHAFROTH. I should think very largely Chicago. The grain dealers of Chicago would say we must have that improvement, and consequently we will raise this money; we will combine with Minnesota Iron Co.——

Mr. TOWNSEND. The Senator's contention is that the people of the State will contribute.

Mr. SHAFROTH. States, counties, cities, or individuals—all four.

Mr. KENYON. Would the Senators exclude railroads owning the terminals?

Mr. SHAFROTH. No; anybody; the railroads, too. There would be no trouble about it. Whenever you want to have something done that is to the interest of everybody, and there is simply a condition put upon them that only one-fifth shall be contributed by them, you will find that they will get together very quickly by correspondence——

Mr. TOWNSEND. But——

Mr. NEWLANDS. Mr. President, I think I shall have to resume the floor.

The PRESIDING OFFICER. The Senator from Nevada declines to yield further.

Mr. SHAFROTH. Very well.

Mr. NEWLANDS. I think it is quite apparent, as the Senator from Colorado suggests, that the self-interest of the communities and of the cities and corporations and individuals affected will prompt them to find some way under which this contribution can be made. I was speaking of the fact that we have been engaged for a century in contentions as to the rights and powers and functions of the respective sovereignties, and we have only recently hit upon the idea of teamwork between the sovereignties instead of contention between them as to which will do a needed thing. I must admit that the machinery that is suggested is perhaps somewhat clumsy, and yet I am going to vote for it, because it has a vital principle in it which will work for good, and it will be the commencement of legislation that will work out gradually a proper distribution of burdens between the National Government and the States and communities.

I would much prefer that the system which I have been urging for years of cooperation between the Nation and the States with reference to the development of our waterways should be immediately adopted. That system involves, first, the creation of a national commission, which will work out the great problem of investigation and the feasibility of projects and the ascertainment of the distribution of burdens, and then there will be the practical negotiation of that commission with boards or commissions organized by the States and communities with reference to teamwork and the distribution of the burdens and the benefits. If that were done, we would not be confined to a cast-iron rule in every instance of a contribution by the State or locality of simply 20 per cent of the total cost. The proportion would vary according to the conditions and according to the benefit to the particular community or State, and, according to the obligation, as to whether it was a National or State obligation. But surely in these great works, involving not only foreign commerce and interstate commerce but State commerce, the energies and the intelligence and the thought of all the sovereigns affected should be united in teamwork. So whilst I regard this amendment as not a scientific one and as one that would be adopted under the plan that I suggest, yet as it presents itself in this shape I intend to vote for it.

Mr. BRANDEGEE. Mr. President, I will be very brief about this. It seems to me to be an utterly impracticable scheme. Every river and harbor bill contains all sorts of projects—projects varying from the revetment of the bank of a river to the building of locks and dams in rivers, that in many instances are of no particular benefit whatever to general commerce or to general navigation. I can not conceive how an improvement that happens to be located in one waterway, either a river or a harbor, which is of general benefit to navigation, could ever be paid for by a contribution solicited from the various people who might be benefited by it.

Mr. CLARKE of Arkansas. May I ask the Senator from Connecticut how funds were provided to supply the shipping facilities at New London?

Mr. BRANDEGEE. Yes; I was going to touch upon that slightly before I got through.

Mr. CLARKE of Arkansas. The sooner the Senator gets to it, the better.

Mr. BRANDEGEE. I know the Senator delights to hear me, but he does not delight to hear me too long, unless I speak to the specific object that he outlines; and I think that is quite a general feeling.

Mr. CLARKE of Arkansas. The Senator from Connecticut misunderstood me. I said the sooner he got to that item the sooner he could illustrate the strength of the argument of the Senator from Colorado. We are always delighted to hear the Senator. I have never done anything to curtail his rights as a debater.

Mr. BRANDEGEE. I was so afraid that if I alluded to my own little items the Senator might move to reconsider them and strike them out of the bill I was going to glide gently and rapidly by them; but, inasmuch as the Senator has referred

to that particular case, I will call the Senate's attention to what would happen there.

The appropriation for the improvement at New London is $170,000 toward dredging through Long Island Sound and a couple of miles up the Thames River to a great pier owned by the State of Connecticut, and which the State of Connecticut paid a million dollars to build. I can readily perceive, if that $170,000 was conditioned upon the precedent agreement of some parties unnamed in the bill, and it was made the duty of the public at large or of either counties or cities or States to get together in some way, by a process which is benevolently and euphemistically described as coordination, that probably before they had agreed upon their proportionate amount the fiscal year would have rolled its course and the money would still be in the United States Treasury.

Mr. NEWLANDS. Let me correct the Senator and say that the term he should apply to that process is "cooperation" and not "coordination."

Mr. BRANDEGEE. Of course, the Senator from Nevada does not hesitate to confess that whenever a Senator uses either one of those words it is a personal reference to himself.

Mr. NEWLANDS. Or an infringement of my copyright. [Laughter.]

Mr. BRANDEGEE. That it is an infringement of his copyright; but take it in this particular instance where, as I said, the State has spent its million dollars and has made the improvement. It would immediately be claimed, of course, by the State that it had done its part of this program for a joint railway, a marine project, on condition that the Government would do its share, and that the Government was now fulfilling the implied condition which the War Department had agreed upon and estimated for. We would be in a hopeless contention between my home city and my home State, and, in my opinion, under this appropriation the harbor would not be dredged.

Take another case, referring to another amendment, that the Senate or the Presiding Officer was kind enough to add to the bill this morning at my suggestion—an improvement involving some $71,000 for a harbor of refuge on the north shore of Long Island Sound, on the south shore of Connecticut, to improve the harbor of refuge known as Duck Island Harbor; which is a very important harbor of refuge. There is a tremendous commerce on Long Island Sound. This is a harbor of refuge located half way between the city of New London and the city of New Haven. That is of benefit to any vessel that may happen to get into a storm; it is of no particular benefit to Connecticut any more than it is to Massachusetts or to New York or to the growers of southern pine in Georgia or to the dealers in ice in Maine, or to the coal barges of West Virginia.

Mr. SHAFROTH. Does not the Senator think——

The PRESIDING OFFICER. Does the Senator from Connecticut yield to the Senator from Colorado?

Mr. BRANDEGEE. I do. The Senator would take the floor any way; but I yield.

Mr. SHAFROTH. Does not the Senator from Connecticut think that when the Federal Government contributes 80 per cent toward an improvement, it is doing its full share, and even more?

Mr. BRANDEGEE. Mr. President, I am not expert at answering questions evolved from one's inner consciousness. I do not know what the full share of the Government is, but I do assume that, if the Government were justified under the commerce clause of the Constitution in deepening the channels of navigable rivers and of harbors, it would be justified on the ground that it was of benefit to the general commerce of the country, and not to develop particular little spots in particular rivers and bayous and remote places.

Mr. SHAFROTH. Taxes are levied over the entire United States, and some portions of the country are not in the slightest degree benefited by the improvement of a particular place.

Mr. BRANDEGEE. That is the very reason why the Government ought to pay the whole of it. The taxes are laid upon all the people, and ought, therefore, to be expended only for the general benefit, and not for local benefit.

Mr. SHAFROTH. But does not the Senator from Connecticut recognize that there are some appropriations in every river and harbor bill that are almost entirely and purely of a local nature?

Mr. BRANDEGEE. I do; and I think that is one of the worst vices in the river and harbor bill.

Mr. SHAFROTH. But for some reason we can not eliminate them.

Mr. BRANDEGEE. We can eliminate them whenever the Senate will return to the Constitution of the United States, and stop violating it. If we have any authority whatever to take the money collected from all the taxpayers of the country and to spend it on the bank of a particular river, not in order to promote commerce or to regulate commerce, but to save some land for some farmers who happen to live in that section—if we have any authority whatever constitutionally to do that, I have never been confronted with it.

I do not, however, want to get sidetracked into all these collateral questions, beneficial as that might be to Senators who have become so accustomed to straying from the Constitution that they do not know whether part of the time they are out of the cow pasture and many of them do not care.

What I say is that this prescribes no rule whatever, but leaves it to the judgment, quarrels, contentions, and rival schemes of a lot of conflicting localities and individuals—railroads, barge captains, and manufacturers—who in some way get together and flip a cent or get unanimous consent as to the exact proportion which each one shall pay. I say it will be utterly destructive of the whole bill, and I doubt if a penny could be spent——

Mr. SHAFROTH. Does not the Senator recognize that for years and years there was no such thing as an appropriation by the Federal Government for either a harbor or a river; that there were various persons who contended that there was no authority in the Constitution of the United States to appropriate a single dollar for such a purpose; that the first digression with relation to that was as to public highways; then it extended gradually, and, as one author states, not until 1883 were there substantial appropriations made for rivers and harbors?

How did the people improve the harbors at Boston, New York, Philadelphia, and other places during all of the century preceding that time? They raised the money by contributions, and they had good harbors.

Mr. BRANDEGEE. Mr. President, I can not yield further to the Senator from Colorado. I am willing he shall make a speech in his own time, if he so desires; but he has asked me several questions.

The PRESIDING OFFICER. The Senator from Connecticut declines to yield further.

Mr. BRANDEGEE. I simply say those States did it because they desired to do it. If it is so, that up to a certain period they thought it was not wise to stretch the Constitution, as it has since been stretched, that was their lookout. I am not saying that it is advisable to go any further.

The Senator from Colorado states that the people at one time built their own roads. I think they ought to have stuck to that business and not to have stuck it on to the National Government to do it. The Senator thinks otherwise; and he is one of the chief contributors in foisting the Government into the business of building rural roads, when, in my opinion, the Government has no constitutional authority whatever to do it; but the Senator can not bolster up one absurd and unworkable scheme by referring to a whole lot of unconstitutional activities or other fool schemes.

This proposition would absolutely prevent the expenditure of money on any project, except of the very simplest kind, that was absolutely limited to one locality, and not of benefit to others. If there is any such thing as that in the bill, it has no business to be there.

Mr. CLARKE of Arkansas. Mr. President, I can not permit this occasion to pass without saying a word about the idea involved in the amendment proposed by the Senator from Colorado [Mr. SHAFROTH]. It is one that has commended itself to me heretofore. It has much of force in it abstractly. The difficulty is in making a practical application of it. This will involve the invention of a system by which it can be made a rational limitation upon a wild demand for appropriations out of the National Treasury based on no other arguments than the fact that some similar appropriation has been made at some other locality at some other time. There comes to be a kind of rivalry between boards of trade in the local communities to have the same wasteful expenditure of public money made within the particular zone of their influence as takes place elsewhere.

In the beginning this demand for similar treatment, even where abuses are involved, manifested itself by a demand upon the individual Member of the Senate and of the other House of Congress, and this system of selection proceeded to a point of demoralization where the resulting bill that represented the aggregate of that sentiment was known as a "pork-barrel" bill. It thus grew into a positive abuse, measured by the then financial ability of the Government at that time. Its aggregate would be regarded now as a very moderate raid on the Treasury.

To protect the Treasury against that character of assault the method of submitting all projects to the scrutiny of a Board of Engineers was invented, and that has progressed until the pres-

ent day. It has eventuated in the approval of the projects involving an appropriation of the $43,000,000 contained in this bill plus about $150,000,000 more of approved projects ready to go into some other bill.

My experience in the last 12 years has satisfied me that that method has broken down just about as badly as the other, and that the time has now arrived when a move forward must be made and other safeguards invented and other plans of national defense of the Treasury supplied. In this respect another element of preparedness confronts us. I do not know of any test of sincerity and confidence to apply to an avaricious and aggressive people such as ours that is better than the financial test. Whenever you find an American citizen ready to invest his money in something you may be well assured he has some confidence in it and that he believes that in the end it will produce individual profits or advance national honor.

I believe that this idea of requiring a contribution where, in view of all the equities of the case, it is demanded ought in some fair way to be evolved and applied. This is the next step in the direction of properly safeguarding the Treasury. A blanket proposition such as my friend from Colorado has offered, now suddenly applied, will probably do more harm than good, because the communities have not been educated up to that standard nor been warned that existing projects were cast upon that basis.

Now, take the situation at New London. That, so far as the matter of financing it is concerned, is a composite proposition. The people of that community felt that they could enlarge its commerce there by diverting trade from other sections and converting their harbor into one of the workable ports of the Atlantic seacoast. The community had sufficient enterprise and foresight to agree to raise a million dollars for the purpose of building piers; but they built them into the shallow water, where they were of no value unless the National Government came to the rescue and provided a channel that would permit seagoing vessels to come up to that point and make an interchange of freight. Whether it was done by express stipulation or by common understanding, such an arrangement was made, it was mutually understood, and it is being enforced to-day.

We deal with the scope of the sentiment behind it when we come to a project. The zone of influence into which it reaches—everybody who expects to make money out of it—is included in its benefits, and financial matters have a way of adjusting their controversies. They can limit the zone of contribution to the zone of benefits whenever they want to do so. There is a way of doing it.

I do not intend to vote for this amendment, but I want to say that the thanks of the Senate are due to the Senator from Colorado for having presented it and enforced its plausibility and value by such a striking and forceful argument. The principle has come to stay, and, in my opinion, it is not going to be laughed out of court nor be otherwise flouted out of existence.

A few years ago we heard a good deal about the ingenuity of the lawmaker being matched against the ingenuity of the lawbreaker. We have reached a place in this river and harbor business, if the thing keeps up at the pace at which it is now going, when there will be a revulsion of sentiment in this country that will stop the whole business, and cut down and destroy the exercise of one of the most useful of the powers that this Government possesses.

I am not speaking of that in any selfish way, because down in the Mississippi Valley, where they make frequent demands upon the National Government—and I think they have peculiar reasons for doing so—the people have not stopped to discuss generalities or abstractions, but they have gone down into their pockets and put up every dollar they could raise and mortgaged the future for every dollar people were willing to trust them for. It is not a question of how much they will contribute, but what they have got to contribute out of. It exercises a very restraining influence, too, because it frequently occurs that much more extensive projects are projected than the community's funds will sustain, and that causes many projects to be recast and brought within more modest boundaries.

I merely wanted to put on record the fact that I think the suggestion of the Senator from Colorado is one worthy of further consideration, and to enter the domain of prophecy when I say that it will receive further attention from time to time as events like this occasion come about in the parliamentary history of the United States.

Mr. SUTHERLAND. Mr. President, the exercise of the power on the part of the General Government under the commerce clause of the Constitution to improve the rivers and harbors of the country in order to promote commerce among the States I think is one of the most beneficent powers which the General Government exercises; but I think all thoughtful observers of what has been going on during the last 20 years must agree that the appropriation of money for many of the projects is inexcusable and has become a great scandal and reproach. We are appropriating money ostensibly under this power to improve creeks and streams which when the improvement is made serves no useful purpose at all, much less a national purpose; but I fear that the amendment suggested by the Senator from Colorado would lead rather to an extension of the abuse than to a curtailment of it.

We all know how prone communities are to give a little money in order to invite a large expenditure. One example of that is in reference to the establishment of the so-called Carnegie libraries. Mr. Carnegie offers to give a certain sum of money to a municipality if the municipality will provide for maintaining the library throughout all time, or if the municipality will contribute a certain portion of the means to that end, or will do both. The result is that in some instances the community has taken upon itself a burden which it is now very often finding it difficult to meet. I think that that would be the result if this policy should be adopted. Here is a proposition that if the State or the community, or if individuals in the State or community, will contribute 20 per cent of the cost of a certain project the Government of the United States will pay 80 per cent.

Mr. BRANDEGEE. Mr. President, will the Senator permit a question there?

Mr. SUTHERLAND. Certainly.

Mr. BRANDEGEE. I do not think the Senator has stated the proposition. The proposition is that no money in this bill shall be expended unless the local authorities contribute 20 per cent of the total expenditure.

Mr. SUTHERLAND. Yes; I understand that the amendment is now confined to this bill; but, after all, it is the beginning of a policy. It is defended upon the ground that it is a good policy at any rate to inaugurate, and I am objecting to the policy.

Mr. BRANDEGEE. If the Senator will permit me again, as I understand the policy, it is not to bind the Government to a promise that whenever the local authorities will put up 20 per per cent the Government will put up the other 80.

Mr. SUTHERLAND. No; I quite understand that, but that is what it is going to result in in many instances if the policy is adopted in the future. Senators will be met and Representatives will be met with propositions to improve a river or a harbor or a creek in their particular localities upon the promise that the community will pay 20 per cent, and the Senate and the House will be beguiled into making the appropriation of 80 per cent upon that kind of a statement.

Mr. SHAFROTH. Mr. President, will the Senator yield for a question?

Mr. SUTHERLAND. Yes.

Mr. SHAFROTH. The Senator says that people will be prone to ask an appropriation when they have only a small amount, such as 20 per cent, to put up to the Government's 80 per cent. Are they not more prone to ask for appropriations when they do not have to put up anything themselves?

Mr. SUTHERLAND. They are prone to ask for but they are not so likely to get the appropriations. We have an illustration in our public-building system. A very bad practice has grown up of a town, through some committee which is appointed, coming to the appropriate committee of Congress, the Committee on Public Buildings and Grounds, and asking that a building be erected in that particular town, and they offer to contribute the site toward the cost of the building. Within my own experience—and I have been a member of that committee for some time—the committee has often yielded to suggestions of that sort and has provided for the erection of a building in a town because the community was contributing the site when very often it was a building that ought not to have been put up at all. So the tendency of a policy of this kind will be to encourage the same sort of thing with reference to appropriations for rivers and harbors.

As I look at it, the power to improve our rivers and harbors is a national power. The Constitution of the United States has very wisely conferred upon the Federal Government the power to regulate commerce. Notwithstanding the fact that in the earlier days there was considerable disagreement as to whether or not the improvement of rivers and harbors was an exercise of this power, it has come now to be universally recognized as a proper exercise of the power of the Federal Government to regulate commerce.

Mr. GALLINGER. Mr. President——

Mr. SUTHERLAND. Just a moment, if the Senator will allow me. That being a Federal power, it carries with it a Federal duty, that whenever an improvement of that kind is necessary the Federal Government ought to make it, and the

Federal Government ought to pay the entire expense of making it. If it is not a proper improvement from the national point of view, if it is purely a local improvement, then the National Government ought not to contribute 80 per cent or any per cent; it ought to contribute nothing to it; it ought not to embark on the enerprise at all. I now yield to the Senator from New Hampshire.

Mr. GALLINGER. Mr. President, I was about to ask the Senator from Utah if my recollection is correct that in 1853, or thereabouts, President Franklin Pierce, who was a Democratic President from my little State, vetoed every appropriation presented to him for internal improvements, and Congress promptly passed the bills over his veto? I think since then the question as to national control of internal improvements has hardly been questioned; but it was seriously questioned at that time.

Mr. SUTHERLAND. It was seriously questioned up to that time. The Democratic Party, as I recall the history of the matter, up to that time and perhaps later, took the position that it was beyond the power of the Federal Government to expend money for internal improvements, because they construed the Constitution strictly and said that you must be able to put your finger upon the precise clause or phrase of the Constitution which conferred the power, and they did not exercise their intelligence sufficiently to see in the commerce clause the subsidiary power to improve rivers and harbors as a means of regulating commerce.

Mr. President, for the reasons that I have thus very briefly stated I can not see my way clear to vote for this amendment.

Mr. PHELAN. Mr. President, I should like to ask the Senator from Colorado the significance of the proviso in his amendment which reads:

> That the provisions of this section shall not apply to those items requiring contributions from other sources.

What does the Senator mean by "other sources"?

Mr. SHAFROTH. From other sources than the Federal Treasury. There are various projects in this bill—I think 8 or 10—in connection with which it is provided that the appropriation shall become available in the event that the localities contribute a certain amount. One is the Sacramento River, and there are two projects in southern California, one at San Diego and one at Los Angeles, toward both of which contributions are made. Such items are excepted from the operation of the amendment, because in those instances the localities have put up more than one-fifth of the expenditure. That is the object and the meaning of that proviso, namely, to except from this rule of requiring a contribution of one-fifth before the appropriation shall be made available, all of those projects as to which by this bill contributions are required by specific provision.

Mr. PHELAN. I thought it might refer to some source other than the municipality, State, or county. It appeared to me that it might permit of that construction. I am aware that the California projects all contribute, and contribute a share larger than 20 per cent.

I desire to say, following the remarks of the Senator from Arkansas [Mr. CLARKE], that I am disposed to agree to the principle embodied in the amendment. I believe it is necessary to provide some check upon the demands of local communities upon the Federal Treasury. If the engineers have failed—which I do not admit, not knowing such to be a fact—this seems to be a very easy way to determine the merit of a proposition originating at the locality where the direct benefits probably will accrue. Therefore I am disposed to support the amendment.

Mr. RANSDELL. Mr. President, I hope Senators before voting on this amendment will consider carefully its practical workings. The Senator from California [Mr. PHELAN] has just said that he is disposed to vote for it. I should like that Senator and other Senators to tell me, as a practical proposition, how they would arrange for the local contribution of 20 per cent on the mighty Columbia River, which empties into the Pacific Ocean and which carries the commerce certainly of three States—Washington, Oregon, and Idaho. It is true there is a larger city in Oregon adjacent to the Columbia than in Washington, but the Columbia River and the improvement at its mouth provides for the commerce of that whole western country. Now, where would your 20 per cent come from out there, as a practical proposition? We are supposed to be practical business men. I cite that as one case.

Let us take the Ohio River. We are giving in this bill five and a half million dollars for the Ohio River. It starts in the State of Pennsylvania and flows down between West Virginia, Ohio, Indiana, Illinois, and Kentucky. It borders on six States. Much commerce, perhaps, from other States would use the Ohio; but suppose we eliminate all but these six States. Tell me, Senators, how you will provide for the 20 per cent contribution on the Ohio River.

Let us take the upper Mississippi. I will say nothing about the lower Mississippi. That has been treated by several Senators. The upper Mississippi between St. Louis and St. Paul borders several States—Missouri, Illinois, Iowa, Wisconsin, and Minnesota—five States, each one of the five getting very great benefit from the $1,500,000 which we are appropriating in this bill. You could not possibly arrange for the distribution of that 20 per cent among the five States.

Take the $2,100,000 this bill gives for the Delaware River from Philadelphia to Delaware Bay. That surely is not a Philadelphia project. That benefits a vast portion of this Republic. The river passes down between Pennsylvania, New Jersey, and Delaware. You would have three States there if you were trying to localize it; but you could not possibly do it, Senators. It is impractical. And so I might extend the argument.

Let me suggest this: I have not heard others do it. We have already expended in the neighborhood of $800,000,000 on improving the waterways of this Republic. For many years we have been improving them. No such plan as this proposed 20 per cent local contribution was adopted in the past. Are you going to change it now and force projects in the future to contribute, when many of them have already been completed without making any local contribution?

Let us take the noted instance of the Great Lakes, where we have expended about $100,000,000 and have developed the most marvelous commerce anywhere on the globe. Eighty million tons of commerce now pass through the Sault Ste. Marie and the Detroit River. All of that is beneficial to the Nation. How would you get local contribution there if you wanted to build some additional locks at the Sault Ste. Marie or to enlarge the channel of the Detroit? We probably shall have to build additional locks soon.

Mr. REED. What does that commerce benefit—the locality or the Nation?

Mr. RANSDELL. It benefits the entire Republic. As far west as the Rocky Mountains, through the Dakotas, through all that western region, they get the benefit of cheap freight rates through those rivers and lakes. But here is my point: We have already improved those lakes and connecting channels to the extent of $100,000,000. We can not get any local contribution on that; and it seems to me to be a little unfair to go on in the future and expect people to contribute when many of our waterways have already been finished.

Mr. SHAFROTH. Mr. President, does not the Senator recognize that with such great interests as the iron interests, and such great interests as Chicago, with its wheat market, all the traffic of which has to go through the locks of that canal, only a fraction of 1 per cent would be all that would be required of any of them? In fact, one of the appropriations here is $83,000; and in that case it would be $17,000. Is it possible that the steamship companies, the companies that send through the canal the iron ore, the wheat, and other products, would not contribute? Then, again, there are the railroad companies that have to meet at the termini this freight and ship it for certain distances. They are interested in it. Is it possible that there is no means of letting them contribute and that they would not contribute?

Mr. RANSDELL. Mr. President, the Senator's question is all right, but he could not enforce a rule of that kind. You could impose this contribution, but how would you enforce it? If you had it all in one State the legislature of a State might say: "We are going to improve the Tombigbee-Black Warrior system of rivers in the State of Alabama," for instance. "We want the National Government to contribute $15,000,000, and the State of Alabama shall put up $5,000,000." That might possibly be done where it all lies in one State; but where it is on the Great Lakes, like the locks and dams at Sault Ste. Marie, or like the Detroit—connecting links between the Lakes which border on six States and the Dominion of Canada; or where it is on the Ohio, also bordering on six States—how in the name of common sense, as a practical proposition, could we get the cooperation of all of these States? It would mean the stoppage of the work.

Now Senators, just one more thought and I am through.

The navigable waterways of this Nation, by act of Congress passed in 1796, were declared the property of the Republic. The States have nothing to do with them. No State or municipality could spend a dollar on a navigable waterway without getting authority from Congress; and after spending the money the waterway could not be used, except for navigation, without authority from Congress. Navigable waters belong to the Nation, and it is the duty of the Nation to improve them.

Mr. SHAFROTH. Mr. President, I should like to remind the Senator of the fact that the Supreme Court of the United States has decided time and time again that these waters, even of navigable streams, belong to the States through which they run, and that the only power which the National Government has is to prevent obstructions to navigation. You can not put an improvement in any river without the consent of the State, either. The National Government has simply a negative power—a power to prevent—but the Supreme Court has held, time and again, that the waters of those streams, both navigable and non-navigable, belong to the States.

Mr. RANSDELL. Mr. President, those decisions only go to the extent of saying that the States can use the waters provided they do not interfere with navigation. For all purposes of navigation the waters belong to the Nation, and the Nation can put any kind of improvement it wishes to put in the bed of a navigable stream; but no individual citizen dares to do it without rendering himself liable to civil and criminal action.

Just one other thought. I wish to say that, in connection with these improvements, the States and the communities are obliged to do a great deal. Let me state what my own city of New Orleans has done in the way of public docks and warehouses. It has spent in the last few years $7,500,000. It has spent that amount to make the improved Mississippi valuable for commerce. All over this country the local communities are building terminals. There is a great movement toward terminals. I would be perfectly willing, Mr. President and Senators, to see an amendment inserted in this bill to the effect that until provision is made for terminals, so that when the waterways have been improved they can be properly used, the appropriation should not be available. I have advocated that for several years, and I should be glad to see such a provision put in the bill.

But if we adopt the 20 per cent proviso advocated by the Senator from Colorado [Mr. SHAFROTH] we certainly can not enforce it, and it will kill many of the most meritorious projects in the measure.

Mr. REED. Mr. President, I do not intend to take more than a moment of the time. I should like to put a question to the author of the amendment and to Senators who intend voting for it.

I will say by way of preliminary that the amendment is very broad and sweeping. It provides that none of the money to be appropriated under this bill shall be expended until the local interests have raised 20 per cent and deposited it for the benefit of the Government. Of course if the amendment is adopted, then all the work in every harbor and in every river of the United States, without a single exception, save in the few instances where already there is contribution, absolutely stops until the contribution is made.

There are some appropriations in this bill for the fixing of harbors, the improvement to be made especially for the purpose of enabling our war vessels to get in and out of those harbors. I ask Senators who propose to vote for this remarkable amendment if they are willing to write into the statute law of the United States a provision that the Government can not improve a harbor and make it deep enough for one of her dreadnaughts to enter unless the local community will first raise 20 per cent of the cost? And yet that is the broad and sweeping condition of this very unusual amendment.

Mr. SHAFROTH. Mr. President, there is not a single one of the projects here but that is intended for commerce, as well, perhaps, in one or two instances, as deepening the harbor, so that ships of the United States can get in; but in nine cases out of ten it is simply a project in behalf of commerce. It seems to me that when commerce gets nine-tenths of the benefit it ought not to ask the Government of the United States to pay for it all.

Mr. REED. The Senator thinks that commerce is something that belongs to some certain individual men. He overlooks the fact that commerce is the lifeblood of the Nation, and that works for the benefit of every man, woman, and child in the Nation; that it is the one thing in which every human being is interested; that whatever benefits commerce benefits all; that whatever injures commerce injures all.

Mr. SHAFROTH. And that is true, Mr. President, in the case of roads; and yet in the case of roads nobody has suggested that the United States Government should pay all the expense.

Mr. REED. Oh, Mr. President, whenever you drive the Senator out of one hole he dodges into another. He goes from the river to the roads, and from the roads to the river, and you wear yourself out chasing him from the one to the other. Now, let us stick to the text for a minute, let us consider this one proposition by itself.

If this amendment goes through, we will have absolutely provided that we can not improve a harbor, even though it may be vitally essential that the improvement be made in order that the harbor may be entered by our battleships, unless and until the local community shall first raise and pay to the Government 20 per cent of the entire cost. I am talking about the practical application of this amendment. If it is adopted, and it is necessary to remove an obstruction in the Great Lakes—and for the moment I am tracking the argument of the distinguished Senator from Louisiana [Mr. RANSDELL]—and a Government engineer is about to remove the obstruction, when he reads this strange, remarkable amendment he must say, "I can not do this work until the local community has contributed." Very likely the obstruction that is to be removed is about 75 or 80 miles from any shore. What local community, pray, is to contribute? Whom is the Government engineer going to assess?

Mr. SHAFROTH. Why, Mr. President, there is no assessment here.

Mr. REED. Who is the abutting property owner who is to pay the 20 per cent?

Mr. SHAFROTH. He will not assess anybody; but the ships that navigate that channel are the ones that are interested in it.

Mr. REED. But ships are not a local interest. Taking the Senator's present view, however, where does it come out? A Government engineer finds it necessary to remove this particular obstruction in order that commerce may move properly. He is to pass the hat, is he, to the shipowners—to the men who sail vessels upon the Great Lakes? The Senator says, "Collect it from commerce." How is that to be done? Is the engineer to visit the boards of trade, the corn and cotton exchanges and take up a collection, or is he to charge tolls?

Mr. SHAFROTH. Oh, no, Mr. President.

Mr. REED. "He can get it from the shippers themselves," says the Senator. Now, let us see where that brings us out.

Suppose there are some means devised to get it from the shippers themselves. Who are the shippers upon the Great Lakes? Who are the people whose goods are hauled upon the Great Lakes? Are they simply the iron and steel concerns? Why, the Great Lakes haul the grains of Colorado. The Great Lakes haul goods that are loaded upon the railroads and shipped to the Senator's own beautiful mountain State. The Great Lakes haul people from his State. The Great Lakes haul goods and passengers that go into every State of this Union. The Great Lakes are the vast distributing inland seas over which the commerce to all the great interior of this country, and on to the West, is moved. Every man, woman, and child is interested in them. They reduce the rates of transportation to Chicago. They reduce the rates of transportation to St. Louis. They reduce the rates of transportation to Omaha. They reduce the rates of transportation to Denver, Colo. If you place a burden in the shape of a tax or toll or assessment or contribution on the commerce of the Great Lakes the producers and consumers of the country must pay it.

The "local interests" should pay, says the Senator. There is not a single item in this bill that has any business here if it is an item of purely local interest. Local items have no business in a bill that is national in its aspect. If such items are in the bill, they should be stricken out of the bill. If I were the chairman of this committee I would never stand before Congress saying that my committee had come to a point where it could not limit the expenditures to just and proper improvements, and that therefore it has become necessary to substitute for the discretion and restraining influence of the committee the restraint of a local assessment.

But, sir, how is it possible to determine the merits of a proposed improvement by requiring local contributions? There are great ports of this country that are vital to the life of the Nation, vital to her commerce, vital to every part of the land. If the mighty ships that plow the deep could not run into New York Harbor, into Boston Harbor, into other great eastern harbors, and load goods directly from the wharves, if they had to be loaded by lighters far out in the sea what would be the result? Every lighterage charge would be levied on the goods that were shipped. Every farmer who shipped horses or mules or cattle, every mine that shipped ore, would be compelled to pay that tribute of lighterage. Our commerce, to that extent, would be injured and millions of dollars would be expended that could be saved by the expenditure of a few thousand dollars.

Mr. SHAFROTH. Mr. President——

Mr. REED. Just a moment. It is for that reason—because the improvements of the harbors of our great eastern coast are not local, but are national; are not confined to any single com-

munity, but distribute their benefits through the entire country—that we have voted the money of the entire country for improvements of the harbors of the East.

Mr. SHAFROTH. Mr. President——

Mr. REED. Let me conclude this thought. In like manner, when we come to the improvements of the harbors upon the western shores of our country, we have no right to vote one single dollar of the revenues if they are local improvements. But I take it, sir, that when we send our ships from the eastern shores of this country through the Panama Canal and up the Pacific coast we want some place for those ships to land, and land in safety. We do not expend this money to benefit Los Angeles or any other western city. We do it because this being one mighty country and commerce being the lifeblood of civilization and progress and advancement we propose to set its currents circulating to every part of our great land.

Again, when it is proposed to improve the Mississippi, the Ohio, the Missouri—those vast arteries that reach into some 30 States of the Union, that gather the waters from the snows of the Sierras and carry them down to the Gulf, that reach out their giant arms and embrace the richest and most fertile parts of the land—when we speak of improving these rivers, we do not do so because Squedunk or Podunk or some other village along their banks has a local interest. We proceed upon the theory that we are giving an impetus to commerce. We know that we are bringing the producer and the consumer nearer together; we are saving money to the farmer, to the merchant, to the mechanic, and to every class of our citizens.

If any of those projects are impractical, if any of those projects can not be carried out, then of course they should not be put in this bill. But if they are practical no one ought to talk about making public improvement in this country depend upon the willingness of some certain individual to contribute and say that this Nation shall halt, shall stand still, shall not move, unless the local people in every instance shall be willing to contribute. We should not make national progress dependent upon individual enterprise or individual liberality. Each proposition should be settled upon its merits. If it will benefit the commerce of the Nation, then the Nation should undertake its accomplishment, regardless of what any local community may or may not do.

Mr. SHAFROTH. Mr. President, in connection with the Senator's reference to New York and other ports, I should like to call his attention to the fact that everyone of those ports has contributed to these improvements.

Mr. REED. Exactly; and here is the Senator's logic: If it shall be found that in order to get an improvement before the Federal Government was willing or able to make it, local interests have dug down into their own pockets and have contributed to that local improvement, it follows that the Government should provide that it shall never enter upon an improvement except where the local people have originally put up money.

Mr. SHAFROTH. Oh, no.

Mr. REED. Mr. President, that argues nothing except that our Government has in some instances probably been too slow, too derelict. Because the town of A, desiring to have water facilities, may have contributed from its treasury, that does not prove that the Government of the United States should declare that it will never undertake an improvement unless it can first induce the local interests to contribute.

I have taken very much more time than I dreamed of taking. I want to say to the Senator from Colorado that he is reversing history. He thinks the improvement of the Mississippi and Missouri Rivers, to say nothing of the great harbors of this country, is a local question.

Mr. SHAFROTH. No; I do not.

Mr. REED. He makes their improvement dependent upon local liberality and enterprise and says the Government shall not move until the localities move. He does not quite agree with Thomas Jefferson; he does not quite agree with the founders of this Republic, who believed that whoever controlled the Mississippi River would control the destiny of this Republic; who believed that when they had acquired that mighty stream they had made this country infinitely stronger than it was before; who did not think that a river 3,000 miles long was a local enterprise. Rather, they thought it a beneficence of God Almighty, which might be enjoyed by all the people of the land.

Why, Mr. President, when you ask the Senator, "What are your local interests?" his reply is subject to the objection often made in court that "it is vague, indefinite, and uncertain." According to the Senator, the work upon the Lakes is to stop until local interests put up the money. You ask the Senator where he is going to get his money, and he proposes a sort of "roving commission." He suggests that you might get it "from the shippers," you might get it from the "shipowners," you might get it from the "commerce." Yea, verily, you might get it from the Salvation Army; but you are not going to get it from any of them, but you will stop the enterprise of the Nation.

Mr. SHAFROTH. Does not the Senator recognize the fact that for more than 75 years of this Government's existence the National Government did not appropriate for rivers and harbors?

Mr. REED. Yes, sir; and I recognize the fact that——

Mr. SHAFROTH. And that improvements were made at all of the great ports of the United States and that they collected the necessary money and expended it themselves?

Now, it seems that when we offer this proposition they will be coming to us; we will not have to be going to them. If we do not do that, there is no end to the extent to which our appropriations are going to grow. If we are going to continue to take money from the Federal Treasury at the instance of every person who wants something done, you are going to find that we will have a depleted Treasury.

Mr. REED. Mr. President, of course the Senator did not rise to ask me a question. He rose to open the safety valve, which it is a very necessary thing occasionally to do. Of course our Government did not for many years expend much money on river and harbor improvements, and of course the progress of the country was thereby retarded. If the Government had been willingly expending money to improve our waterways and harbors from the first the probabilities are that the country would have realized thousands of dollars of advantage for every dollar expended.

What did the Government permit when it failed to give its aid to that which was to be of general and universal use? It permitted the single strong community that had the money to make an improvement in its harbor to improve that harbor and thus to gather to itself a concentration of the wealth and industry of perhaps an entire section of country; whereas other harbors and other places, if they had been opened by the Federal Government promptly, might have been of greater general benefit to the country.

Mr. President, I am getting a little bit weary of the constant cry of pork, this constant cry that this bill is an unjust bill. I say that if you ask me what the remedy is for any of these alleged wrongs, if there be wrongs, the remedy is in the Senate and in the House of Representatives. If the Senate and House of Representatives can not handle measures of this kind upon their merits, passing upon them fairly and justly, then both these bodies ought to be abolished by an amendment to the Constitution of the United States. All the great problems affecting the national life are confined to the care and keeping of these two bodies of Congress. If we have degenerated to such a point that unjust and iniquitous measures are allowed to go into a bill, if it be true that there is a bold looting of the Treasury, if it be true that we have come to so disgraceful a condition that men here will vote for a dozen corrupt propositions advanced by a dozen other corrupt men in order that some pet corruption of their own shall be worked out into the statutes, then it is time to either abolish the body or to change the membership of the body.

I understand, of course, that in a great bill of this kind there are some questions where there is an honest division of opinion. I assert, further than that, notwithstanding all that has been said, when you get down to the merits of all these propositions, you will find none of them so one-sided as they have been presented. An understanding of all the facts will alter views based upon a partial or prejudiced statement of the facts.

I question whether there are any of these propositions that will not yield a dollar of benefits for each dollar expended, although there may be some of them that will never absolutely establish a paying commerce. But if my view is incorrect, if we have filled the bill with bad and wicked schemes, if we are a lot of corrupt scoundrels, bartering with each other, each man voting for a dozen rotten enterprises in order that he may get one even more corrupt, then this is a body that has no right to exist, or at least its present membership has no right to be here, saving, of course, the few lonely saints who oppose the measure.

I will tell you what I think about some of these claims. It is very popular to be an economist. It is very popular to say "I have been trying to save your money; I contended against these evils; I fought against this repetition of loot; I was the one watchdog standing guard over the Government Treasury. My bark was the only honest sound that broke the stillness of the night of crime. My hand alone was lifted for virtue. My warning was uttered, but it fell upon the deaf ears of the Adar." That sounds well, but when it is not in good faith, when it is not backed up by facts, it is mere demagoguery and the cheapest kind of politics.

I make no question of any man's right to rise in the Senate and call attention to an item in the bill and produce his argu-

ment against that item and try to have it stricken out. It is the duty of a Senator to do that; it is his right, and it is his duty; but the amendment of the Senator from Colorado is based upon the idea, and his argument was plainly to the intendment, that Congress was so bad or so unjust or so wicked or so lazy that it would not find out the merits of a proposition, and hence the only test to apply was whether the local community would put up some money. He applies the dollar test to be paid by the local community. That will not work. The local community might be perfectly willing to pay out 20 cents on the dollar to get a stream improved where there never could be any commerce.

Mr. President, I have given this bill such examination as I could with all the other duties that press constantly upon us. I believe if we have not been careful enough in the past we ought to grow more careful in the future. If we have not been diligent enough, we ought to cultivate diligence, so that if there be any waste in this bill it may be avoided. But that is not the question involved in the amendment of the Senator from Colorado. He simply proposes that the Government shall initiate nothing and shall do nothing until the local interest moves and puts up 20 per cent of the cost of a project.

I stand here this afternoon to make an appeal for a broader policy of internal improvement. I stand here to say to the Senate and, as far as my voice will go, to the country that the United States Government ought at this time to be entering upon the greatest scheme of internal development ever undertaken by any nation at any period of the world's history. We ought to connect all parts of our country by our waterways. We ought to accomplish in part, at least, what has been so magnificently achieved in France and in Germany. We ought to be carrying upon the bosom of our canals and our rivers and our lakes a mighty commerce that will benefit every part of the land. We ought unhesitatingly to vote the money for the accomplishment of that purpose. We ought just as unhesitatingly to see to it that the money is expended in the wisest way that can be devised by the greatest engineers of the world. That ought to be our policy.

We have found time and again here in the last two years a congestion upon our railroads. We found it only in a recent month. We know the day is arriving when many of the great lines throughout the Central West must be double-tracked. Money must be invested in that way, and we know that the railroads hesitate about investing it. Why not take advantage of the great waters God has given us? Why not utilize them? Why not go to the expense of pulling up a few stumps and digging out a few bars? Why not restore commerce to the bosom of these mighty arteries? Why not do everything we can to make the State of Maine near to the State of California, Minnesota nearer New Orleans? Why not knit our vast land together?

While we are talking about preparedness and are getting ready for the evil day which may come, why not take into consideration that the thing to-day that helps Germany move her troops and move her munitions and armaments is her great system of river and canal transportation? Why not take a leaf out of the patriotic story of France? Even during this present war, with her sons draining their veins upon the battle field and her people impoverishing themselves to purchase the implements of warfare, France, even at this bloody time, has gone on completing her system of internal waterways, never halting for a moment. Why not learn the truth, that if we are to have a great country we must have men with vision, who are willing to employ the energies and agencies of Government to develop the resources of the land?

Mr. President, we have debated this bill for two weeks. There has been offered here amendment after amendment. With one exception, I think they have been voted down. The temper of the Senate has been tested. The record of Senators has been suficiently made. If there is any man to be turned out because he voted for this bill, he has written his record long enough and indelibly enough to satisfy all people. If there is any man who is to have a benefit because his voice has rung out like a clarion on behalf of the people, then surely, after he has spoken for 5 or 10 days in opposition to the bill, his virtues must have been sufficiently recorded. The dog days are coming after a while; there is other business to transact in the Senate; and I am just wondering whether these gentlemen can not offer their amendments and let us have viva voce votes, and finally get to a vote on the bill.

Mr. SHAFROTH. Mr. President, the Senator has just consumed one-half hour.

Mr. REED. That is just about one-tenth of the time the Senator from Colorado has taken to-day, and I am sure I could not consume it in a more aggravating manner than he did.

Mr. SHAFROTH. This is practically the only amendment I have offered and the only amendment that I have spoken to except in a statement I made in a colloquy with another Senator with respect to interstate commerce.

The Senator from Missouri says the railroads ought to be double-tracked. Does the Senator want the National Government to pay for the extra track? Is he trying to impose upon the National Government all the expenditures that may be made in the improvement? Does he want the Government to countenance for a minute that the National Government shall pay for all that track? Yet that would be in line with the position which he has taken.

Cooperation with States and with counties and with individuals is the wise thing in the enocomy of public improvement. I want to call the attention of the Senate to the fact that there was appointed a commission entitled the National Waterways Commission consisting of 12 men—6 Senators and 6 Representatives—who made an exhaustive examination as to the manner in which harbors and rivers should be improved. I wish to read their conclusion because they expressly say that there should be cooperation; that there should be a division of expenditures between the States, and it is signed by everyone of the members of the National Waterways Commission. At the head of this commission were the chairman of the Committee on Rivers and Harbors of the House of Representatives, and the chairman of the Committee on Commerce of the Senate. After a thorough examination and an exhaustive review they concluded that it was not fair that the United States Government should contribute all the money for the purpose when there were people and when there were corporations and when there were cities and when there were States that were benefited by reason of the improvements. I want to read to the Senator the conclusion which they reached:

In passing from this subject the commission would recommend:

1. That in the improvement of rivers and harbors similarly situated, where equitable division is possible, uniform rules be observed for a proper division of cost between the Federal Government and minor political divisions.

That does not mean a measly one-fifth; it means more. And yet these distinguished men, after a most thorough examination, concluded that that was the proper course to pursue.

There is at present a lack of uniformity. One illustration of this is in the improvement of interior channels and harbors. In some cases the expense is borne exclusively by the Federal Government and in other cases by the municipalities interested—

That is not uniformity and it is not fair—

2. That participation in improvements by local communities be encouraged, always with due care to avoiding the adoption of projects which are unworthy of recognition by the Federal Government.

3. That improvements not essential to navigation should not be undertaken by the Federal Government.

4. That improvements in rivers and harbors be not made unless sufficient assurance is given that proper wharves, terminals, and other necessary adjuncts to navigation shall be furnished by municipal or private enterprise and that the charges for their use shall be reasonable.

Now, Mr. President, I want to call attention to the distinguished men who made that recommendation. They are the Hon. Theodore E. Burton, of Ohio, chairman of the National Waterways Commission; Hon. Jacob H. Gallinger, of New Hampshire, vice chairman of that commission; Senator Samuel H. Piles, of Washington; Senator William Alden Smith, of Michigan; Senator F. M. Simmons, of North Carolina; Senator James P. Clarke, of Arkansas; Senator William Lorimer, of Illinois; Representatives D. S. Alexander, Frederick C. Stevens, Irving P. Wanger, Stephen M. Sparkman, and John A. Moon, all distinguished men, men in the Senate and House of Representatives of the United States who have given study to this question, going into these matters, seeing the operations that have been proceeding in the way of appropriations, and coming to the conclusion that there should be a division. I ask for only 20 per cent, only one-fifth of the amount, the Government putting up 80 per cent, and that is drawing upon the Treasury a greater amount really than ought to be done.

Mr. SMOOT. Mr. President, this bill carries an appropriation of over $43,000,000. I state without hesitation that at least 33⅓ per cent of the appropriation ought to be eliminated from the bill. I have no desire to reduce appropriations for worthy projects, nor even the appropriations in the bill, if it must be done by adopting the amendment of the Senator from Colorado.

I take the position, Mr. President, if the project is a worthy one, if it is truly upon a navigable stream, if it is an actual harbor of a national character, the Government of the United States ought to appropriate money for the work and ought to pay all the expense, not 80 per cent of it.

On the other hand, Mr. President, there are projects in this bill that are indefensible, and I believe as much as I believe that I live that if we could have a full Senate to listen to the

facts as they exist respecting them, and have each proposition to vote separately upon, there could not be secured a majority vote in this body for them.

But I do not want, Mr. President, by a vote of mine to approve of the indefensible projects in any way, shape, or form. I would not want to vote for them if the people were to pay 80 per cent and the Government 20 per cent. If they are local projects, if they are of local interest only, 20 per cent is not enough for the local people to pay; they ought to pay it all.

In referring to the question of a navigable stream, Mr. President, I do not mean a little creek that is dry eight months in the year. I do not mean a little stream tributary to a so-called navigable river, a little stream that no ship or boat or skiff of any kind will ever be seen upon. I say this bill provides for taking care of just such streams, or perhaps I should have said creeks. It is such projects that we have been trying to eliminate from the bill, but we have failed in every case with the exception of one.

I am in full sympathy with the reductions requested by the opponents of the bill as reported, but I am fearful that the plan proposed in the amendment of the Senator from Colorado will not meet the object and purpose I have in view.

Therefore, Mr. President, I must vote against the amendment.

Mr. SHAFROTH. Does not the Senator think that if the people where the measures are totally void of merit have to put up 20 per cent they will not do it, and thereby the project will fail and the Treasury of the United States be saved that amount of money? To that extent is it not wise to adopt the amendment?

Mr. SMOOT. I think, Mr. President, that there might be a few of them—that the local people would not put up the 20 per cent; but I do not believe that many of them would fail because of a refusal to do so, for the people would feel that the money would be expended in the community; they would feel that it would be a local benefit; they, perhaps, would have some pride in being classed as a town upon a supposed navigable stream, and would improve the opportunity of advertising the town as such. Perhaps they would feel that the 20 per cent would be well spent as an advertisement scheme if for nothing else.

Mr. President, I do not want in any way, shape, or form to give the people of this country to understand that the Treasury of the United States has an open door for the demands of people for projects that have no merit whatever in them. I hope that before we conclude action upon the bill, the Senate will agree upon some plan whereby the indefensible projects in it may be stricken out. If we have not now the time nor the inclination to do it, or if we are not in a position to differentiate between the good and the bad, then I want to see the Chief of Engineers, under the direction of the Secretary of War, granted the power to say how this money shall be expended and how much shall be expended upon any one project; in other words, to leave it entirely in their judgment. That would be a thousand times better than to pass a bill such as is now before the body, including items that no Senator can justly defend, and for which the Government of the United States ought never to have appropriated one dollar. It seems to me that the very earliest time possible for the stopping of such appropriations is the best, and now is the time to do it by amending this bill.

Mr. STONE. Mr. President——

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Missouri?

Mr. SMOOT. I yield to the Senator from Missouri.

Mr. STONE. Mr. President, the Senator from Utah [Mr. SMOOT] expresses his approval of the notion that a lump sum of money should be appropriated for river and harbor improvements, and then leave it to the Chief of Engineers or to some Government board to distribute the appropriation according to his or their judgment. In other words, the Senator would leave the rivers and harbors of the States having rivers and harbors worth while entirely under the control, and, in a way, at the mercy of a Federal board.

I have heard the Senator from Utah on several occasions declaim with great emphasis against a policy of that kind when applied to the lands and forests of the intermountain and arid sections of the country. There has been a great protest here against that, and that protest has been voiced by no Senator with greater emphasis than by my distinguished friend from Utah.

I wonder just where the difference is, where the line of division comes in, as to turning over the improvements and the control of the rivers of Missouri, for example, to a Federal board, while the Senator from Utah protests against turning over the control of the lands and forests of Utah to a Federal board.

I am in sympathy, and have been in sympathy, with the Senator's views as to the interests of his State, but he would subject the interests of my State to the very same thing against which he protests, and wisely protests, in his own State.

Mr. SMOOT. Mr. President, there is all the difference in the world. There is no comparison between the two cases. I have not the time this afternoon to state to the Senator from Missouri all the reasons why the rivers and harbors bill——

Mr. STONE. It will take longer than this afternoon, I think, to do so.

Mr. SMOOT. Well, it would not take longer than that if it were not so late in the day. I wish, however, to assure the Senator from Missouri that there is no similarity between the two cases. In the first place, the rule of the Committee on Commerce is, as has been stated so many times on this floor, that the projects that are provided for in the river and harbor appropriation bills must have been passed upon by the Board of Engineers before their adoption. That being the case, Mr. President, it is entirely a different proposition to submit the question of the distribution of the appropriations to that board, a body of engineers that has already passed upon the projects.

I want to say to the Senator from Missouri that I do not believe in lump-sum appropriations. He has heard me say time and time again that there has been more wicked waste through the expenditure of lump-sum appropriations than in any other appropriations made by Congress; but the Government of the United States is to furnish the money for the improvement of navigable streams upon the recommendation of the Board of Engineers. The Government of the United States does not claim to own the waters within the States, even if they form navigable streams. The United States claims the right to keep navigable streams free from any obstruction to navigation, and it has that right under the Constitution. Up to the year 1883 no appropriations were made by Congress for the improvement of rivers and harbors, and many people believe that the Constitution of the United States has been and is being violated in appropriating money for such a purpose; but the time for such a claim has passed and gone, for Congress has settled that by making repeated appropriations for the last 30 years.

Mr. LODGE. Mr. President, may I ask the Senator from Utah a question?

Mr. SMOOT. Yes; I yield to the Senator.

Mr. LODGE. Is it not true that the forests and other lands are sources of revenue, and that this bill proposes an expenditure of revenue?

Mr. SMOOT. I was just going to come to that side of the question, Mr. President. The question asked by the Senator from Massachusetts shows in a very few words one of the differences between the control of the navigable rivers and harbors of the country by the Government and the control of the waters and forest reserves within a State by the Government—waters that are owned by the State, waters that never cross the State line, waters that never reach a navigable river or a so-called navigable river, waters that are granted to the State in its enabling act. The forest lands within a State, it is acknowledged, are held in trust by the Government of the United States for the people of the United States; but the Government charges for the grazing of every head of live stock, for every sheep that is grazed upon those reserves, it charges for every stick of timber that is cut from the forest, and it undertakes to make those forests a source of revenue to the Government, while every river and harbor project for which we appropriate money costs the Government the amount appropriated. Therefore, Mr. President, there is a great difference between the Government exercising a power which it does not possess over waters within a State, over streams that are not navigable, and the control of the navigable streams over which the Constitution gives the Government of the United States control as far as navigation is concerned. I must not spend more time upon this subject.

As I was saying, I should like if it were possible to reduce the excessive appropriations in this bill.

Mr. REED. Mr. President, will the Senator allow me to ask him a question?

The VICE PRESIDENT. Does the Senator from Utah yield to the Senator from Missouri?

Mr. SMOOT. I yield to the Senator, although I will say to the Senator that I was about to conclude what I had to say on this pending amendment.

Mr. REED. I merely want to ask the Senator a question. Did the Senator vote for the river and harbor bill in 1912?

Mr. SMOOT. Mr. President, I do not know whether a yea-and-nay vote was taken on the river and harbor bill in 1912 or not, so I could not say positively, but I will say frankly to the

Senator that I have given more attention to river and harbor bills during the last three years than I did in all of my previous service in the Senate. I want frankly to say to the Senator that I always felt, and feel now, that there ought to be liberal appropriations for the improvement of our rivers and harbors, particularly our harbors, and I would have no objection at all to having the appropriations in this bill for some of the principal harbors in the country increased, particularly those where the great bulk of the commerce of the country enters. I would have no objection, I will say to the Senator from Missouri, to seeing some of the appropriations for navigable streams increased. Some of them ought to be increased, but what I object to is projects in the bill which I believe no one can justly defend. I want to say that much to the Senator, so that he may know my position. In 1912 I did not know there were projects in the river and harbor bill that could not be defended and justly defended. In the past I have left the consideration of river and harbor appropriations to others to examine into.

Mr. REED. Mr. President, I understand the Senator's position and I do not think anyone can quarrel with that statement; but I want to ask him if he did not vote for the river and harbor bill in 1912 and in 1910 and in the preceding years since he has been a Member of the Senate, and if it is not a fact that nearly all of the present bill relates to items which were approved by one or more of those previous Congresses and which are simply now being carried forward under this bill?

Mr. SMOOT. Mr. President, I would not say that I did not vote for the river and harbor bill in 1910 or in 1912. I may have voted for it in 1908; I may have voted for it in 1906; I may have voted for it in 1904; but I want to say now to the Senate that, as to every item of which I have complained in this bill and as to every item of which the Senator from Iowa [Mr. KENYON] has complained, I am quite sure the reports show a decrease of commerce upon the rivers now as compared with 1912 and 1910. All the money we have spent upon the rivers in the meantime has not increased their commerce, but, on the other hand, their commerce has decreased.

Mr. REED. Mr. President, my attention has been called to the fact by the Senator from Louisiana [Mr. RANSDELL], who, probably more than any other man in the Senate, has studied the question of rivers and harbors, that there are 280 items in the present bill, and that 210 of those items were in the bill of 1907 and have ever since been carried in the river and harbor appropriation bill, the work partially completed upon them; and since—and now I am not speaking by the authority of the Senator from Louisiana, but on my own responsibility—since 1907 and prior to the Congress of the year 1912 a number of other projects were duly approved by the Board of Engineers as permanent projects and carried in the bill. So that this bill, of which so much complaint is made, is nearly all devoted to carrying out projects which were approved when other Presidents than Mr. Wilson were in the White House and when the Senator's own party—the Republican Party—was in complete control of the situation, and even when we had the advice of Senator Burton. Indeed, I am informed that Senator Burton declared with reference to the bill of 1907, which carried 210 of the 280 items now in this bill and which appropriated, I believe, $85,000,000, that that bill was the most perfect river and harbor bill ever passed. Therefore it strikes me that if this bill is so wicked, and if the Democratic Party in submitting it have committed so great a crime, somebody other than the men who approved the projects which we now carry on ought to be heard clamoring against it.

Of course I concede to the Senator from Utah the right to change his mind. We all have that right, and we ought to change our minds if we are convinced; but it is a remarkable thing that since 1907, 210 of these projects have passed the muster of Congress, and that even prior to that many of them had been approved. It is somewhat remarkable that they have grown wicked and bad, villianous, damnable, execrable, infamous, and all the other things which have been said of them, just within the last few years, when the Democratic Party has been in power.

Mr. SMOOT. Mr. President, I wish to be perfectly frank in answering the statement of the Senator from Missouri. In the first place, I have never thought for a moment about politics or who was in power in considering this bill. Whoever the next President of the United States may be—and I expect him to be a Republican, as I expect also that there will be a Republican House and Republican Senate—I promise the Senator from Missouri now that he never will find me voting for items with which I have found fault in this appropriation bill.

Mr. REED. Mr. President——

Mr. SMOOT. If the Senator will allow me to finish, I will yield to any question he may ask. I never before looked into those items, I never gave any attention to them, until Senator Burton began to call the attention of the country to them; and I want to say to the Senate now, that while the opponents of these unjustifiable projects will not be successful this year, I know that they will ultimately be successful, and that such projects as have been complained of will not be approved in the future and appropriations will not be made for them. No matter who may be President, the people of the United States, their attention having been called to such unjustifiable items in the last two river and harbor bills, have become familiar, in part, with the question, and I believe that there is a feeling in the United States to-day that many of the projects found in this bill are indefensible, and that it is wrong for the Government's money to be wasted upon them. This is the last river and harbor bill made up in the form in which this bill is framed that will pass Congress. As long as the fight is kept up against the present wasteful system, I promise the Senate that each year the condemnation will be stronger, and it will not be longer than next year until the Senate of the United States and the Members of the House will vote to exclude such projects as have been objected to, in my opinion.

Mr. REED. Mr. President, if the Senator, on his latter statement, is as bad a prophet as he is on who is going to be President of the United States after the next election, I am afraid that the car of progress and reform will be eternally halted.

Mr. SMOOT. Mr. President, I only expressed my opinion, and I gave it as an opinion. It was not expressed as a prophecy.

Mr. POMERENE. Mr. President, as the Senator is indulging in prophecy, will he please tell the Senate who the President is going to be?

Mr. SMOOT. I do not know who he will be, but I believe with all my heart that he will be a Republican and whoever is nominated at Chicago next month.

Mr. THOMAS. Does the Senator think he is now in the Chamber?

Mr. SMOOT. Now, the Senator from Colorado is getting a little too personal. [Laughter.]

Mr. President, I simply rose to state the reasons why I could not vote for the amendment offered by the Senator from Colorado. I think I have done so, and I will say no more at present.

Mr. JONES. Mr. President, I am going to take just a minute or two—and I do so simply because of the situation in my State—to say why I can not vote for the amendment of the Senator from Colorado.

I believe in the proposition of contribution, and our State has done a great deal along that line in the development of river and harbor work. There is hardly an important project that has been undertaken in our State in the last 10 years toward which the locality has not made large contributions. The only item that we have put in this bill in the Senate for my State provides for a contribution of over 40 per cent.

I think this principle of contribution ought to be worked out to a greater extent than we work it out in the present bill. I do not believe, however, that the blanket proposition of the Senator from Colorado could be worked out very well; and this, in brief, is the reason why I propose to vote against it on this measure.

I hope the committee hereafter will give this proposition much more consideration than it has in the past. I think, however, we have more contribution projects in this bill than in almost any other bill in the past. I think we can well determine the contribution for each particular proposition upon the conditions surrounding it, and upon the importance of it, and upon the local benefits attached to it.

I am very glad, indeed, that this amendment has been presented, and that we have had the debate that we have had, so as to emphasize the importance of the principle, at any rate, that is involved. As I say, I hope it will be developed more in future bills than in this one.

Mr. FLETCHER. Mr. President, just one minute. Perhaps in reference to what the Senator from Utah has said, sounding somewhat, perhaps, a keynote, as it were, there ought to go in the RECORD at this point, by way of indicating the changed notions that have come over the spirit of the dreams of certain people, these figures:

The river and harbor bill of June 25, 1910, carried $51,945,843.

The river and harbor bill of February 27, 1911, carried $36,956,987.

The river and harbor bill of July 25, 1912, carried $33,259,370.

The river and harbor bill of March 4, 1913, carried $47,868,894.

The river and harbor bills of 1914 and 1915 carried, respectively, $20,000,000 and $25,000,000.

Mr. SMOOT. Mr. President, in that connection I simply want to say that when those appropriations were made in the

years named by the Senator from Florida the Republican Party were in power, and they had plenty of money in the Treasury of the United States to pay for those improvements. They were not going in debt to the extent of hundreds of millions of dollars, and they were not making extravagant appropriations, such as are being made to-day, which I shall at some time or other call to the Senate's attention.

That is all I care about saying.

Mr. RANSDELL. Mr. President, in connection with this discussion about waterways and rivers and harbors, I ask unanimous consent to have printed in the RECORD, without reading, a very able paper on "Rivers and railroads in the United States," by Mr. J. H. Bernhard, associate member of the American Society of Civil Engineers. This discussion was carried on between Mr. Bernhard and several other engineers, and is published in the March, 1915, proceedings of the American Society.

Mr. SMOOT. Mr. President, I will ask the Senator how long the article is. Is it very long?

Mr. RANSDELL. No, sir. I believe it is about 10 or 12 pages. I do not remember exactly how long. It is not very long.

Mr. SMOOT. The Senator does not mean 10 pages of the RECORD?

Mr. RANSDELL. No, sir; 10 or 12 pages of the document that I present.

Mr. SMOOT. I was simply going to say to the Senator that every page we print in the RECORD means an expenditure of about $41 by the Government, besides the postage upon it. I noticed here the other day that there was a little request made for printing in the RECORD something, the nature of which none of us knew, and I figured up the amount that it cost the Government, and it was over $400.

Mr. RANSDELL. I will say that this is a very able discussion of a very live subject, and one on which we want to get all the light that we possibly can. I hope there will be no objection to the request.

Mr. SMOOT. I will not object, if the Senator thinks it is necessary.

Mr. RANSDELL. I think it is.

The VICE PRESIDENT. Without objection, it will be so ordered.

The matter referred to is as follows:

[American Society of Civil Engineers, instituted 1852.]

PAPERS AND DISCUSSIONS.

(This society is not responsible for any statement made or opinion expressed in its publications.)

RIVERS AND RAILROADS IN THE UNITED STATES.

(Discussion of the paper by William W. Harts, M. Am. Soc. C. E., continued from March, 1915, proceedings.)

[By J. H. Bernhard, Assoc. M. Am. Soc. C. E.]

"J. H. Bernhard (New York City), Assoc. M. Am. Soc. C. E. (by letter).—The author has given the typical viewpoint of the Army engineer on river improvements; and as Mr. Lavis has advanced the arguments generally given by the railroads, it may not be amiss to offer for consideration the observations of a water-transportation engineer on this subject.

"As the author claims that the river engineering of the United States is nowhere surpassed in its suitability for the work proposed, it may be justifiable to repeat a statement made by Charles S. Riché, M. Am. Soc. C. E., lieutenant colonel, Corps of Engineers, United States Army, who, in a little pamphlet published by him, and in an address delivered at the Intercoastal Canal League meeting in Orange, Tex., in 1912, pointed out that there are 43 different kinds of lock dimensions and 26 various channel dimensions in the United States. As stated by the writer, in an address before the River Terminal Conference in St. Louis, in April, 1914, 'God alone could build a boat that would meet economically such a variance in conditions.' The railroads, on the other hand, have a uniform track, and permit a uniform height, length, and width of car, so that a railroad car can go anywhere in the United States, Mexico, and Canada.

"The author, remarking that the traffic on the majority of our inland-water routes has decreased, states: 'It is apparent that the present condition of our water routes as to the depth and availability of their channels is in advance of the use being made of them.' Does this mean that in his estimation further improvement is not necessary? If this argument held true, the poorer the roadbed or the poorer the street, the less the reason for improvement. The author wishes us to believe such when he states in his next sentence:

"'Whenever streams do not show an increasing traffic which is at least approaching the increase in commerce in the region traversed, it shows that the usefulness of the stream in question is declining, and the necessity for continuing large expenditures is open to doubt.'

"The writer's contention is that the only result of such decline should be the immediate investigation of its cause.

"Although entirely in accord with Maj. Burgess, who places the cause of the decline on the railroad rate, the writer would like to add to this reason other equally important ones. Next to the rate anarchism, poor river terminals, obsolete boats, the absence of proper connecting links between existing routes, poor navigation laws and regulations, Government assistance, banking facilities, and insurance rates are equally important as causes for the decline of water transportation.

"The rate situation in the United States is a natural result of former railroad abuse. The rail rates form a most unnatural and impossible fabric, based on two faulty foundations: First, 'charge what the traffic will stand'; and second, 'any rate to meet water competition.'

"It is almost entirely correct to say that there is no rail rate in the United States based on cost plus profit, although the aggregate—the gross receipts of the railroad—is calculated in that way. In the preliminary report just published by the Interstate Commerce Commission for the fiscal year ending June 30, 1914, the average cost of operating for the railroads in the United States was given as 72.21 per cent of the gross receipts, and the average receipts were 0.733 cent per ton-mile. The rail distance between New Orleans and St. Louis is 700 miles, which would give, as the average charge, based on 0.733 cent per ton-mile, $5.13. With these facts at hand, examine some of the following rates in effect between New Orleans and St. Louis:

"The rate for bran is $2.10; beef, $5; beer, $4.20; bridge materials, $3.50; canned goods, $5.20; cement, $2.50; coffee, $4.60; condensed milk, $4.20; flour, $2.80; grain, $1.80; lumber, $4; molasses, $4.10; nails, $4.40; nitrate of soda, $3.40; paint, $4.60; rice, $4.80; salt, $4.30; soap, $4.60; sugar, $3.40; and vehicles, $5.

"As will be seen from the foregoing, all these charges are well below the average, but then there might be water service between New Orleans and St. Louis.

"Although rebates are forbidden by State or Federal statutes, railroads grant them quite as much to-day as at any time in the past, the only distinction being that formerly they were granted to individuals surreptitiously and now they are granted to cities and towns openly; the former became illegal, the latter is legalized. These rebates arise from the unjust practice of railroads in basing rates to river points on water competition.

"The railroads say they must be allowed to meet the competition of the boats, otherwise the boats will take their business between river points. The Interstate Commerce Commission admits this claim, and allows the railroads to haul freight to river points at a loss, and then recoup themselves for this loss by exorbitant charges to off-river points. From these facts, one of two things must be true; either the railroads lose money on all hauls to river points, or they get excessive returns on hauls to off-river points. It is plainly a rebate case—'robbing Peter to pay Paul.' The river towns are having their freight hauled at the expense of the off-river towns, and pay for this privilege with the loss of still lower rates by boats; and the public loses all around.

"Examples of actually existing rates will be illuminating: First-class freight is shipped from New Orleans to Memphis, 396 miles, for $9 per ton, or 22.8 mills per ton-mile. To ship the same commodities from New Orleans to Amite, La., 68 miles, the cost is $10.40 per ton, or 153 mills per ton-mile. The citizens of Amite pay more than six and one-half times as much per ton-mile for their freight charges as the more fortunately situated residents of Memphis. Suppose the Government should charge the Amite people 13 cents for postage on a letter, but those in Memphis only 2 cents!

"To ship a barrel of flour from New Orleans to Amite costs 34 cents, or 5 mills per barrel-mile; to ship one from New Orleans to Memphis costs 25 cents, or 0.63 mill per barrel-mile. For carrying a barrel of flour 1 mile, the cost to the consumer in Amite is eight times as much as to the consumer in Memphis. First-class freight from New Orleans to Memphis (396 miles) is 45 cents per 100 pounds; from New Orleans to Opelika, Ala. (386 miles), it is 99 cents per 100 pounds, more than twice as much, for a shorter distance, to the off-river point. These are rates from one place to another which can be reached by water, compared with rates from the same place to another which can only be reached by rail.

"Table 1 will illustrate the 'rate wall' that hinders the freight movement to the river.

"Although the distance from Birmingham to Tuscaloosa is about one-eighth of that from Birmingham to New Orleans, the average freight rate is about one-half of that to New Orleans; but Tuscaloosa is on a navigable water, by which New Orleans, Mobile, or other cities may be reached.

"As a third example, the variation in rates, over the same distance, and over the same road, will be shown. This is simply one example where hundreds could be given. Flour for domestic use moves from St. Paul to New Orleans for $5.50 per ton; from New Orleans to St. Paul (same routing), for $9.80 per ton; but one is downstream and the higher rates are upstream. 'No,' says the railroad, 'it is because the natural movement of flour is from St. Paul to New Orleans.' The latter is true, because the rates forbid any other movement, but great would be the tonnage of finer winter flour that would move upstream if the rates were not prohibitive. In any case, why should there be any difference in rates over the same distance and the same railroad? Did not Congress long ago rule that rates under the same conditions should be equal, regardless of the tonnage shipped by the individual shipper? Why is this not equally true for one community against another? Had this flour been moved by water, and had it been meant for export, it would have been more cheaply loaded from barge to ship than to warehouses in the cities, therefore the railroads have a third rate, which is the 'export rate.' On flour from St. Paul to New Orleans the rate is $3.90, or 2.6 mills, per ton-mile.

"TABLE 1.—*Comparison of freight rates from Birmingham to New Orleans and to Tuscaloosa.*

Commodity.	Rate from Birmingham—		Ratio 13½ per cent.
	To New Orleans (418 miles).	To Tuscaloosa (56 miles).	
Sugar	$3.40	$4.80	140
Coffee	7.00	3.00	43
Rice	5.00	3.90	78
Molasses	4.40	1.80	41
Dried fruit	11.00	1.60	17½
Peas and beans	11.00	1.50	13½
Hay	3.60	1.40	39
Grain	3.60	1.40	39
Flour	4.40	1.60	36½
Coal	1.25	.80	64
Coke	1.75	.80	46
Wire and nails	3.20	2.00	62½
Pig iron	3.00	1.00	33½
Steel rails	3.00	1.50	50
Cast-iron pipe	3.00	1.50	50
Machinery	5.40	3.90	72

"The foregoing cases could be multiplied indefinitely, as they are representative of thousands of others, all of which show the injustice suffered by land communities in the matter of freight rates.

"Though the paralleling railroads of our inland waterways are strained to their utmost to carry the freight offered at each crop-moving season, the waterways themselves are vast expanses of idleness.

"A mistake is made by the public in assuming that it is always the river channel that causes this idleness. Nothing could be further from the truth. To-day the Mississippi, from St. Louis to its mouth, affords a channel which is the best to be found on any stream in the world, unless one takes the Amazon or the Congo into account; and see its emptiness. An 8-foot channel is all that the most efficient service requires. The Government works unremittingly to develop waterways, only to see the water-borne traffic on inland rivers grow less as the years go by, not due chiefly to the inadequate depth of the channels but to this rate-making anarchism; and until the idea that the principal function of inland water channels is to regulate the rates for rail transportation has been untaught, or made unnecessary by just rates, we will not see great river traffic.

"Still the average 'riverman' will insist that the poor condition of the channels keeps our inland waters idle. This is preposterous; the Rhine could never compare with the Mississippi in its advantages for transportation; its channel is narrower and shallower, more changeable, the current is swifter, and ice is known in the winter over its entire navigable length to its very mouth, yet in 1913 more than 97,000 vessels passed the Dutch and German frontier on the Rhine, which means a vessel every 5 minutes for the entire year. In order to illustrate this point clearly, page 109 of the English translation of the Trade Report of the Rotterdam Chamber of Commerce for 1913 will be quoted:

"'We could almost suffice by referring to our review covering 1912, seeing the slight difference between 1913 and its predecessor.

"'Arrivals are plentiful till the autumn, and the water level was satisfactory during the whole year. During only nine days, from the 30th of October to the 7th of November, a short period of low water on the Rhine was witnessed when the water mark recorded a level of 1.20 meters (4 feet), and below that to 1.14 meters (3 feet 9 inches).

"'The not normalized lower part of the river was, as a channel, in a rather favorable condition, the occurring sand deposits were for the greater part removed by dredging operations, and by altering the fairway in the second half of the year a sufficient channel was maintained.

"'The normalized upper part was satisfactory as a fairway, although on several occasions dredging work had to be started near the entrance in order to maintain a sufficient channel from the regulated Maas to the upper Merwede.

"'The average Rhine freights were during the year 1913 for cargoes of 800 to 1,000 tons, including tonnage, or ores and other crude commodities to Ruhrort, Disburg, Hockfeld, Alsum, Walsum, or Rheinhausen, $0.26 per ton, or 1.2 mills per ton-mile. For ores (copper ore, phosphate, etc.) to the upper Rhine and Mainz stations, $0.56 per ton, or 1.1 mills per ton-mile.

"'On the whole the freights were rather satisfactory, as was also the water level, which only from the middle of October to the beginning of November was low. The total tonnage across the German-Netherland frontiers was:

Total tonnage—	1912	1913	Increase.
With Netherlands	25,619,771.0	27,941,378.0	2,321,607.0
With Belgium	8,523,472.0	9,073,140.5	549,668.5
Rhine sea traffic	485,117.5	514,634.5	29,517.0
Total	34,628,360.5	37,529,153.0	2,900,792.5

"Tables 2 and 3 give a comparison of the Rhine traffic during the last 10 years.

"TABLE 2.—*Rhine traffic.*

Year.	Rotterdam.	Amsterdam.	Belgium.
	Tons.	*Tons.*	*Tons.*
1904	10,684,261	428,589	4,104,306
1905	12,771,307	478,320	4,435,580
1906	13,357,575	538,945	4,821,229
1907	14,762,523	597,518	4,937,736
1908	12,938,898	716,035	5,013,609
1909	15,134,175	798,535	6,205,324
1910	17,663,521	990,927	7,727,219
1911	19,042,847	1,042,603	7,956,855
1912	20,818,991	1,360,280	8,523,472
1913	22,764,241	1,531,772	9,073,140

"TABLE 3.—*Number of vessels passing Lobith, to and from Germany.*

Year.	Vessels.	Number of these vessels under the Dutch flag.
1904	67,519	46,584
1905	72,029	48,941
1906	75,306	49,821
1907	79,640	52,508
1908	71,206	47,021
1909	77,909	50,692
1910	85,372	55,740
1911	90,129	59,122
1912	91,904	58,978
1913	96,768	62,249

"Compare the foregoing rates with the statement of Col. Harts to the effect that the average cost of moving a ton of freight a mile in the United States is 7.3 mills, and that some coal roads, having easy grades and flat curves, boast that their tonnage cost has been cut to 2.3 mills per ton-mile. Now, considering that the distance between Minneapolis and New Orleans by rail is 1,300 miles, this would mean that the average charge should be $9.50 per ton, and even when calculated at the lowest cost when moving coal, on the best roads, at 2.3 mills per ton-mile, it would be $3 per ton, though flour—which, as far as moving is concerned, is quite different from coal, being very susceptible to moisture and odors, and only handled in box cars—has a rate of $3.90 per ton from Minneapolis to New Orleans. That this rate is below cost will be clear. Somebody else pays for this loss; of course—the interior territories; but is it then just to say that the rivers have lost their usefulness? Would it not be more correct to state that, by reason of artificial barriers, transportation by water in the United States can not compete economically with the railroads? These artificial obstructions, however, devised by railroads and perpetuated by the Interstate Commerce Commission, do not mean economy to the country, but

the country at large, by excessive high inland rates, pays the penalty for the idleness of the water routes.

"Even railroad officials are ready now to admit that their rail rates are less than what they should be along the water routes; they also admit that their rates on bulk commodities are profitless.

"On April 3, Mr. W. M. Rhett, assistant freight traffic manager of the Illinois Central Railroad, testified at the Interstate Commerce Commission hearing on the 'Western Rate case' that his road was handling many commodities, such as potash, clay, glycerine, pig lead, linoleum, vegetable tallow, rice, sisal grass, earthenware, hemp, and manila at a profitless rate. He mentioned only a few commodities; the writer could have named many more, and far more important ones. Undoubtedly Mr. Rhett knows them but does not feel inclined to have the rate of these particular commodities increased because they would move quickly by water. He was asking for an increase ranging from 10 cents to $1 per ton. Only these proposed increases, according to him, would enable the roads to continue business in these commodities. Even to bulk-commodity rates, objections are raised. On the same day, April 3, Mr. B. J. Rowe, coal traffic manager of the Illinois Central Railroad, testified before the Interstate Commerce Commission, at the same hearing, that they would have to increase their rates at an average of 7.95 cents per ton in the western territories. All this came only shortly after the many 'convincing' arguments of the railroads as to why their rates should be reduced, which 'convincing' evidence moved the Interstate Commerce Commission to grant their request. (Intermountain case.) The railroads were permitted to decrease their rates to meet competition created by the Panama Canal, with the result that the rates from coast to coast were lowered; but the transcontinental schedule for interior points was maintained. It is a ridiculous argument, if carefully analyzed. Suppose a Standard Oil Trust came before the United States and asked permission to reduce its prices continually, even below the cost of production, merely to meet the competition of an independent firm. Why, it would be the clearest infringement of the antitrust law; yet the railroads, by permission of the Interstate Commerce Commission, are permitted to reduce their rates in order to offset canal competition, to create which the country has expended $400,000,000.
